

environmental impact statement being prepared in conjunction with the NRC's review of the license application.

As discussed in Section 2 of the EA, the site preparation activities will only be considered in the NRC's environmental review of the subsequent major Federal action (*i.e.*, issuance of a license) to the extent necessary to establish an environmental baseline. Thus, these preparatory activities will be considered in the environmental impact statement (EIS) the NRC staff is preparing to support a licensing decision on the proposed Eagle Rock Enrichment Facility.

Environmental Impacts of the No-Action Alternative

There are no environmental impacts of not granting the exemption.

Agencies and Persons Consulted

The NRC staff consulted with the Idaho State Historic Preservation Office, the U.S. Fish and Wildlife Service, and the Idaho Department of Environmental Quality regarding the site preparation activities addressed in this EA.

III. Finding of No Significant Impact

The NRC staff has prepared this EA in support of the proposed action. On the basis of this EA, the NRC finds that there are no significant environmental impacts from the proposed action, because none of the activities approved by the action are considered "construction" for the purposes of Part 51 environmental analyses, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.

IV. Further Information
