NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes; Renewal Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: This notice is to announce the renewal of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) for a period of two years.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC) has determined that the renewal of the charter for the Advisory Committee on the Medical Uses of Isotopes for the two year period commencing on March 16, 2010 is in the public interest, in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal Advisory Committee Act, after consultation with the Committee Management Secretariat, General Services Administration.

The purpose of the ACMUI is to provide advice to NRC on policy and technical issues that arise in regulating the medical use of byproduct material for diagnosis and therapy. Responsibilities include providing guidance and comments on current and proposed NRC regulations and regulatory guidance concerning medical use; evaluating certain non-routine uses of byproduct material for medical use; and evaluating training and experience of proposed authorized users. The members are involved in preliminary discussions of major issues in determining the need for changes in NRC policy and regulation to ensure the continued safe use of byproduct material. Each member provides technical assistance in his/her specific area(s) of expertise, particularly with respect to emerging technologies. Members also provide guidance as to NRC’s role in relation to the responsibilities of other Federal agencies as well as of various professional organizations and boards.

Members of this Committee have demonstrated professional qualifications and expertise in both scientific and non-scientific disciplines including nuclear medicine; nuclear cardiology; radiation therapy; medical physics; nuclear pharmacy; State medical regulation; patient’s rights and care; health care administration; and Food and Drug Administration regulation.

NUCLEAR REGULATORY COMMISSION

[NRC–2010–0114]

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

FOR FURTHER INFORMATION CONTACT: Tyrone Naquin, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: (301) 492–3187 or e-mail Tyrone.Naquin@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency’s “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG) is temporarily identified by its task number, DG–8040, which should be mentioned in all related correspondence. DG–8040 is proposed Revision 2 of Regulatory Guide 8.24, dated October 1979. This guide specifies the types and frequencies of surveys that are acceptable to the staff of the NRC for the protection of workers in plants licensed by the NRC to process enriched uranium and fabricate uranium fuel.

Title 10, Section 20.1501(a), of the Code of Federal Regulations (10 CFR 20.1501(a)) requires that each licensee make or cause to be made such surveys as may be necessary for it to comply with the regulations in that part. As used in 10 CFR Part 20, “Standards for Protection Against Radiation,” the term “survey” refers to an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of conditions.

This guide does not relate to the processing of uranium-233, nor does it deal specifically with the following aspects of an acceptable occupational health physics program that are closely related to surveys: (1) The number and qualification of the health physics staff, (2) instrumentation, including types, numbers of instruments, limitations of use, accuracy, and calibration, (3) personnel dosimetry, and (4) bioassay. Guidance on bioassay for uranium appears in Regulatory Guide 8.11, “Applications of Bioassay for Uranium.”

II. Further Information

The NRC staff is soliciting comments on DG–8040. Comments may be accompanied by relevant information or supporting data and should mention DG–8040 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC’s Agencywide Documents Access and Management System (ADAMS). Comments would be most helpful if received by May 3, 2010. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC–2010–0115 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site Regulations.gov. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.
