

CPSA. Because not all third party conformity assessment bodies will first submit CPSC Form 223 at the same time, only some entities will re-register using CPSC Form 223 in any given year. Because the Commission does not know how many entities will re-register in any given year, for the purposes of this analysis, the Commission estimates that half of the third party conformity assessment bodies will re-register using CPSC Form 223 in any given year, for a total of 150 Re-Registrations per year (300 total third party conformity assessment bodies \times 0.5 = 150 re-registrations per year). The reporting burden for each re-registration is estimated to be one hour, making the total reporting burden for all re-registrations per year 150 hours (150 re-registrations \times 1 hour per re-registration = 150 hours).

Information Changes—Finally, under the same separate proposed rule noted above, third party conformity assessment bodies would be required to ensure that the information submitted on CPSC Form 223 remains current. Any changes in information must be submitted on a new CPSC Form 223. Based on current experience, the Commission estimates that only one percent of third party conformity assessment bodies will revise or update their information yearly, so the estimated number of respondents is 3 (300 third party conformity assessment bodies \times 0.01 = 3 information changes per year). Because information changes in most cases will likely only involve updating a phone number or contact person, the estimated reporting burden is 15 minutes per update, for a total reporting burden of 45 minutes per year (3 information changes \times 0.25 hours = 0.75 hours per year).

Estimated Total Cost Burden on Respondents—Assuming that CPSC Form 223 will be submitted by someone at the level of a general or operations manager at each third party conformity assessment body, at a median compensation (wages and benefits) of \$68 per hour, the total cost burden to the respondents is estimated to be \$30,668 (\$68 \times 451 hours).

Estimated Annualized Cost Burden to the Federal Government—The Commission estimates 150 re-registrations per year. Re-registrations will require review by a CPSC staff member with an average rate of pay of \$67/hour (the approximate hourly compensation (wages and benefits) of a GS-13 step 5 employee). Re-registration review involves a thorough review of the accreditation certificate and scope documents provided by the third party conformity assessment body to ensure,

among other things, that the accreditations are current, are to the ISO Standard ISO/IEC 17025:2005, “General Requirements for the Competence of Testing and Calibration Laboratories,” and include the appropriate test methods. The review is estimated to take an average of 1.75 hours per submission. Thus, the annualized cost to the Federal government is estimated to be approximately \$17,588 (150 re-registrations \times 1.75 hours \times \$67 = \$17,587.50 per year).

Additional costs to the Federal government associated with information changes submitted on CPSC Form 223 will be negligible. The Commission estimates that 15 minutes will be spent reviewing each update. The annualized cost to the Federal government is estimated to be approximately \$50 (3 information changes \times 0.25 hours \times \$67 = \$50.25 per year).

I. Funding Opportunity Description

Purpose of Program: The U.S.-Russia Program encourages cooperative education programs between institutions of higher education (IHEs) in the Russian Federation and the United States of America. The objective of this program is to provide grants that demonstrate partnerships between Russian and American IHEs that contribute to the development and promotion of educational opportunities between the two nations. The aim is to use the educational content as the

vehicle for learning languages, cultural appreciation, sharing knowledge, and forming long-term relationships between the two countries. In the context of the modern international society and a global economy, an understanding of the cultural context plays a vital role in education and training.

Applications are invited from IHEs with the capacity to contribute to a collaborative project with Russian IHEs.
