

approved physical security program. By October 31, 2010, ANO-1 and 2 will be in full compliance with all but one specified requirement. By August 31, 2011, ANO-1 and 2 will be in full compliance with all the regulatory requirements of 10 CFR 73.55, as issued on March 27, 2009.

4.0 Conclusion for Part 73 Schedule Exemption Request

The staff has reviewed the licensee's submittals and concludes that the licensee has justified its request for an extension of the compliance date with regard to two specified requirements of 10 CFR 73.55 until October 31, 2010, and one specified requirement until August 31, 2011.

Accordingly, the Commission has determined that pursuant to 10 CFR 73.5, "Specific exemptions," exemption from the March 31, 2010, compliance date is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the Commission hereby grants the requested exemption.

The NRC has determined that the long-term benefits that will be realized when the complete system is in place justifies extending the full compliance date in the case of this particular licensee. The security measures for which ANO-1 and 2 need additional time to implement are new requirements imposed by March 27, 2009, amendments to 10 CFR 73.55, and are in addition to those required by the security orders issued in response to the events of September 11, 2001. Therefore, the NRC staff concludes that the licensee's actions are in the best interest of protecting the public health and safety through the security changes that will result from granting this exemption.

As per the licensee's request and the NRC's regulatory authority to grant an exemption to the March 31, 2010, deadline for the three items specified in the attachments to the Entergy letters dated January 14 and 28, 2010, the licensee is required to be in full compliance with 10 CFR 73.55 by August 31, 2011. In achieving compliance, the licensee is reminded that it is responsible for determining the appropriate licensing mechanism (*i.e.*, 10 CFR 50.54(p) or 10 CFR 50.90) for incorporation of all necessary changes to its security plans.

Pursuant to 10 CFR 51.32, "Finding of no significant impact," the Commission has previously determined that the granting of this exemption will not have a significant effect on the quality of the

human environment (75 FR 13607; dated March 22, 2010).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 23rd day of March 2010.
