SUPPLEMENTARY INFORMATION:

I. Abstract

The Energy Policy Act of 2005 (Pub. L. 109–58) authorizes the Secretary to approve individual TERAs. The intent of these agreements is to promote tribal oversight and management of energy and mineral resource development on tribal lands and further the goal of Indian self-determination. A TERA offers a tribe an alternative for developing energy-related business agreements and awarding leases and granting rights-of-way for energy facilities without having to obtain further approval from the Secretary.

This information collection conducted under TERA regulations at

25 CFR part 224 will allow IEED to determine the capacity of tribes to manage the development of energy resources on tribal lands. Information collected:

- Enables IEED to engage in a consultation process with tribes that is designed to foster optimal pre-planning of development proposals and speed up the review and approval process for TERA agreements;
- Provides wide public notice and opportunity for review of TERA agreements by the public, industry, and government agencies;
- Ensures that the public has an avenue for review of the performance of tribes in implementing a TERA;
- Creates a process for preventing damage to sensitive resources as well as ensuring that the public has fully communicated with the tribe in the petition process;
- Ensures that a tribe is fully aware of any attempt by the Department of the Interior to resume management authority over energy resources on tribal lands; and
- Ensures that the tribal government fully endorses any relinquishment of a TERA.

II. Request for Comments

IEED requests that you send your comments on this collection to the location listed in the **ADDRESSES** section. Your comments should address: (a) The necessity of the information collection for the proper performance of the agencies, including whether the information will have practical utility; (b) the accuracy of our estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) ways we could enhance the quality, utility and clarity of the information to be collected; and (d) ways we could minimize the burden of the collection of the information on the respondents, such as through the use of automated collection techniques or other forms of information technology.
