American requirements with respect to work, using CFRFC grant funds, based on the fact that the inclusion of the domestic equivalent of the manufactured goods (AKW Mullen shower stalls) would have increased the cost of the overall project by more than 25 percent.

Sandra B. Henriquez,
Assistant Secretary for Public and Indian Housing.

DEPARTMENT OF THE INTERIOR

Royalty Policy Committee (RPC) Notice of Renewal

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of renewal of the Royalty Policy Committee.

SUMMARY: Following consultation with the General Services Administration, notice is hereby given that the Secretary of the Interior is renewing the Royalty Policy Committee.

The Royalty Policy Committee provides advice to the Secretary of the Interior on the management of Federal and Indian mineral leases and revenues under the laws governing the Department of the Interior. The Committee will also review and comment on revenue management and other mineral and energy-related policies, and provide a forum to convey views representative of mineral lessors, operators, revenue payors, revenue recipients, governmental agencies, and public interest groups. The Royalty Policy Committee reports to the Secretary of the Interior through the Director of the Minerals Management Service.

FOR FURTHER INFORMATION CONTACT: Ms. Gina Dan, Minerals Revenue Management, Minerals Management Service; Denver, Colorado 80225–0165; telephone number (303) 231–3392.

Certification

I hereby certify that the renewal of the Royalty Policy Committee is in the public interest in connection with the performance of duties imposed on the Department of the Interior by 43 U.S.C. 1331 et seq.

Dated: March 26, 2010.

Ken Salazar,
Secretary of the Interior.

Fish and Wildlife Service

Notice of Availability of a Technical Agency Draft Recovery Plan for Pyne’s Ground-Plum (Astragalus bibullatus) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability and opening of public comment period.

SUMMARY: We, the Fish and Wildlife Service, announce the availability of the technical agency draft recovery plan for Pyne’s ground-plum (Astragalus bibullatus), a species endemic to the Central Basin in Tennessee. The draft recovery plan includes specific recovery objectives and criteria the species would have to meet in order for us to delist it to threatened status or delist it under the Endangered Species Act of 1973, as amended (Act). We request review and comment on this draft recovery plan from local, State, and Federal agencies, and the public.

DATES: In order to be considered, we must receive comments on the draft recovery plan on or before June 1, 2010.

ADDRESSES: If you wish to review the draft recovery plan, you may obtain a copy by contacting the Tennessee Field Office, U.S. Fish and Wildlife Service, 446 Neal Street, Cookeville, TN 38501 (telephone 931/528–6481), or by visiting our recovery plan Web site at http://endangered.fws.gov/recovery/index.html#plans. If you wish to comment, you may submit your comments by any one of several methods:

1. You may submit written comments and materials to the Field Supervisor, at the above address.
2. You may hand-deliver written comments to our Tennessee Field Office at the above address, or fax your comments to 931/528–7075.
3. You may send comments by e-mail to geoff_call@fws.gov.

FOR FURTHER INFORMATION CONTACT: Geoff Call at the above address (telephone 931/528–6481, ext. 213).

SUPPLEMENTARY INFORMATION:

Background

We listed Pyne’s ground-plum as an endangered species under the Act (16 U.S.C. 1531 et seq.), on September 26, 1991 (56 FR 48748). This species is a rare perennial member of the pea family (Fabaceae) endemic to the limestone cedar glades in the Central Basin Section of the Interior Low Plateau (Tennessee). It is currently known from only eight extant occurrences (specific locations or sites) located within 90 square miles in Rutherford County, Tennessee, within a short distance of the rapidly growing city of Murfreesboro.

Factors contributing to its endangered status are an extremely limited range and loss of habitat. The primary threat is the loss of habitat from residential, commercial, or industrial development; livestock grazing; woody encroachment; and recreational uses such as all terrain vehicles.

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the endangered species program. To help guide the recovery effort, we are preparing recovery plans for most listed species. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for downlisting or delisting, and estimate time and cost for implementing recovery measures.

The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires us to provide a public notice and an opportunity for public review and comment during recovery plan development. We will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. We and other Federal agencies will take these comments into account in the course of implementing approved recovery plans.

The objective of this technical agency draft plan is to provide a framework for the recovery of this species so that protection under the Act is no longer necessary. Pyne’s ground-plum will be considered for recategorization if it is no longer a threatened species. A recovery plan for Pyne’s ground-plum will be prepared for submission to the U.S. Fish and Wildlife Service (USFWS) for approval.

The USFWS is the primary Federal agency involved in the recovery of listed species, including Pyne’s ground-plum. The USFWS works cooperatively with Federal agencies, State and local governments, and private agencies and individuals in preparing recovery plans for listed species. The USFWS is responsible for ensuring that recovery plans are prepared and published in accordance with the requirements of the Act.

We are preparing this technical agency draft recovery plan to provide a framework for recovery of Pyne’s ground-plum. This recovery plan is intended to guide recovery efforts of this species and will be used to guide recovery efforts of the species. This plan is intended to provide a framework for recovery of this species and will be used to guide recovery efforts of the species.
Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Jeffrey M. Fleming,
Acting Regional Director, Southeast Region.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Environmental Documents Prepared for Proposed Oil, Gas, and Mineral Operations by the Gulf of Mexico Outer Continental Shelf (OCS) Region

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Availability of Environmental Documents Prepared for OCS Mineral Proposals by the Gulf of Mexico OCS Region.

SUMMARY: In accordance with Federal Regulations that implement the National Environmental Policy Act (NEPA), the Minerals Management Service (MMS) announces the availability of NEPA-related Site-Specific Environmental Assessments (SEA) and Findings of No Significant Impact (FONSI), prepared by MMS for the following oil-, gas-, and mineral-related activities proposed on the Gulf of Mexico.

FOR FURTHER INFORMATION CONTACT: Public Information Unit, Information Services Section at the number below. Minerals Management Service, Gulf of Mexico OCS Region, Attention: Public Information Office (MS 5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123–2394, or by calling 1–800–200–GULF.

SUPPLEMENTARY INFORMATION: MMS prepares SEAs and FONSI for proposals that relate to exploration, development, production, and transport of oil, gas, and mineral resources on the Federal OCS. These SEAs examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects.

Environmental Assessments are used as a basis for determining whether or not approval of the proposals constitutes a major Federal action that significantly affects the quality of the human environment in the sense of NEPA Section 102(2)(C). A FONSI is prepared in those instances where MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the SEA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.
