

Note 1: The term, "sufficiently charged" means that the battery will retain enough of a charge, expressed in ampere-hours, to ensure that the battery cells will not be damaged. A battery cell may be damaged by lowering the charge below a point where there is a reduction in the ability to charge and retain a full charge. This reduction would be greater than the reduction that may result from normal operational degradation.

Note 2: These special conditions are not intended to replace § 25.1353(b) in the certification basis of the Boeing 737NG. These special conditions apply only to rechargeable lithium batteries and rechargeable lithium-battery system installations. The requirements of § 25.1353(b) remains in effect for batteries and battery installations of Boeing 737NG that do not use lithium batteries.

Boeing must show compliance with the requirements of these special conditions by test and/or analysis. The aircraft certification office, or its designees, will find compliance in coordination with the FAA Transport Standards Staff.

Issued in Renton, Washington, on April 5, 2010.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2009-0831; Airspace Docket No. 09-ANM-13]

Amendment of Class E Airspace; North Bend, OR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action will modify Class D airspace at Southwest Oregon Regional Airport, North Bend, OR, to allow aircraft at Sunnyhill Airport to arrive and depart outside Class D airspace. This action is necessary for the safety and management of Instrument Flight Rules (IFR) aircraft utilizing both airports.

DATES: *Effective date*, 0901 UTC, June 3, 2010. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Eldon Taylor, Federal Aviation

Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA, 98057; telephone (425) 203-4537.

SUPPLEMENTARY INFORMATION:

History

On November 9, 2009, the FAA published in the **Federal Register** a notice of proposed rulemaking to establish additional controlled airspace at North Bend, OR (74 FR 57616). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9T signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR part 71.1. The Class D airspace designations listed in this document will be published subsequently in that Order.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying the Class D airspace area at North Bend, OR. Controlled airspace is needed extending upward from the surface to and including 2,500 feet MSL within a 4.2-mile radius of Southwest Oregon Regional Airport, excluding that airspace within a 1.5-mile radius of Sunnyhill Airport. The exclusion will allow aircraft at Sunnyhill Airport to arrive and depart outside the Class D airspace. This rule will enhance IFR operations at both airports.

The FAA has determined this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 discusses the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more

detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies controlled airspace at Southwest Oregon Regional Airport, North Bend, OR.

List of Subjects in 14 CFR Part 71

Airspace, incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, and effective September 15, 2009, is amended as follows:

Paragraph 5000 Class D airspace.

* * * * *

ANM OR D North Bend, OR [Modified]

Southwest Oregon Regional Airport, OR
(Lat. 43°25'01" N., long. 124°14'49" W.)
Sunnyhill Airport, OR
(Lat. 43°28'59" N., long. 124°12'10" W.)

That airspace extending upward from the surface to and including 2,500 feet MSL within a 4.2-mile radius of the Southwest Oregon Regional Airport, excluding that airspace within a 1.5-mile radius of Sunnyhill Airport. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

Issued in Seattle, Washington, on April 5, 2010.

Robert E. Henry,

Acting Manager, Operations Support Group, Western Service Center.
