

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are the owners or operators of nitric acid plants.

Estimated Number of Respondents: 24.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 1,291.

Estimated Total Annual Cost: \$2,549,639, which includes \$81,639 in labor costs, \$68,000 in capital/startup costs, and \$2,400,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor cost to the respondents in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent. Therefore, the cost figures in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR. Note that there is an increase of one hour in the total labor hours to the respondents due to rounding-up.
