Nature and Extent of Confidentiality: No information is requested that would require confidentiality.

Needs and Uses: The Commission will submit this expiring information collection during this comment period to the Office of Management and Budget (OMB) in order to obtain the full three year clearance from them. There is no change in the reporting, recordkeeping and/or third party disclosure requirements. However, the Commission is adjusting their burden estimates by 912 total annual hours and \$45,000 in annual costs. This is due to 228 more respondents subject to these requirements.

In June 2000 the Commission adopted rules which enhance the ability of

health care providers to offer high quality and cost effective care to patients with acute and chronic health care needs.

Medical telemetry equipment is used in hospitals and health care facilities to transmit patient measurement data, such as pulse and respiration rates to a nearby receiver, that permits greater patient mobility and increased comfort.

The Commission allocated spectrum to WMTS on a primary basis, which allows potentially life-critical medical telemetry equipment to operate on an interference-protected basis.

The Commission also adopted services rules for WMTS that "license by rule" meaning that users are permitted to operate WMTS equipment that complies with the rules without the need to apply for a license from the Commission.

Furthermore, the Commission adopted rules to designate a frequency coordinator, who maintains a database of all WMTS equipment.

Without the database, there would be no record of WMTS usage because WMTS transmitters are not individually licensed.

All parties using equipment in the WMTS are required to coordinate/register their operating frequency and other relevant technical operating parameters with the designated coordinator.

The database provides a record of the frequencies used by each facility or device to assist parties in selecting frequencies to avoid interference.

Without the database, there would be no record of WMTS usage because WMTS transmitters will not be individually licensed. The database is used by health care providers to plan for specific frequency use within a geographic area, especially where numerous WMTS operations may occur. The coordinator will also notify users of potential frequency conflicts.

Federal Communications Commission.

Office of Managing Director.
