

of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

J.K. Technologies, LLC, of Baltimore, Maryland (J.K.) (Registered Importer 90-006) has petitioned NHTSA to decide whether nonconforming 2006 and 2007 Mercedes Benz G-Class (463 chassis) LWB MPVs are eligible for importation into the United States. The vehicles which J.K. believes are substantially similar are 2006 and 2007 Mercedes Benz G-Class (463 chassis) LWB MPVs that were manufactured for sale in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it carefully compared non-U.S. certified 2006 and 2007 Mercedes Benz G-Class (463 chassis) LWB MPVs, to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

J.K. submitted information with its petition intended to demonstrate that non-U.S. certified 2006 and 2007 Mercedes Benz G-Class (463 chassis) LWB MPVs, as originally manufactured, conform to many FMVSS in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 2006 and 2007 Mercedes Benz G-Class (463 chassis) LWB MPVs, are identical to their U.S.-certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect*, 103 *Windshield Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 106 *Brake Hoses*, 113 *Hood Latch System*, 116 *Motor Vehicle Brake Fluids*, 124 *Accelerator Control Systems*, 135 *Light Vehicle Brake Systems*, 139 *New Pneumatic Radial Tires for Light Vehicles*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Mounting*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, 301

Fuel System Integrity, and 302 *Flammability of Interior Materials*.

Petitioner also contends that the vehicle is capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*:

(a) Replacement of the instrument cluster with a U.S.-model component; (b) installation or activation of the U.S.-version control and display software; and (c) installation of a U.S.-model cruise control lever.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Installation of the following U.S.-model components on vehicles that are not already so equipped: (a) Front sidemarker lamps; (b) headlamps; and (c) tail lamps with integral rear side marker lamps.

Standard No. 110 *Tire Selection and Rims and Motor Home/Recreational Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 pounds) or Less*: Installation of a tire information placard.

Standard No. 111 *Rearview Mirrors*: Installation of a U.S.-model passenger side rearview mirror, or inscription of the required warning statement on the face of that mirror on all vehicles not already so equipped.

Standard No. 114 *Theft Protection*: Installation of U.S.-version software on all vehicles not already so equipped.

Standard No. 118 *Power-Operated Window, Partition, and Roof Panel Systems*: Installation or activation of U.S.-version software in the vehicle's computer system to meet the requirements of this standard on vehicles that do not already have this software installed or activated.

Standard No. 138 *Tire Pressure Monitoring Systems*: Inspection of all vehicles and installation of a conforming tire monitoring system on vehicles not already so equipped.

Standard No. 208 *Occupant Crash Protection*: Installation or activation of U.S.-version software to ensure that the seat belt warning system meets the requirements of this standard.

The petitioner states that the occupant crash protection systems used in these vehicles are identical to the U.S.-version with the exception of the front and rear passenger seat belt assemblies. All seat belt assemblies with the exception of the driver's seat belt assembly must be replaced with ones that meet the requirements of FMVSS No. 208 and FMVSS No. 209.

Standard No. 209 *Seat Belt Assemblies*: All seat belt assemblies with the exception of the driver's seat

belt assembly must be replaced with ones that meet the requirements of FMVSS No. 208 and FMVSS No. 209.

Standard No. 225 *Child Restraint Anchorage Systems*: Installation of U.S.-model child restraint anchorage system components that meet the requirements of FMVSS No. 225.

The petitioner additionally states that a vehicle identification plate must be affixed to the vehicles near the left windshield post to meet the requirements of 49 CFR part 565.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.
