Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific Cod in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reallocating the projected unused amount of Pacific cod from vessels using jig gear to catcher vessels less than 60 feet (18.3 meters) length overall (LOA) using hook-and-line or pot gear in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to allow the B season apportionment of the 2010 total allowable catch (TAC) of Pacific cod to be harvested.

DATES: Effective April 12, 2010, through 2400 hrs, Alaska local time (A.l.t.), December 31, 2010.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The B season apportionment of the 2010 Pacific cod TAC specified for vessels using jig gear in the BSAI is 422 metric tons (mt) as established by the final 2010 and 2011 harvest specifications for groundfish in the BSAI (75 FR 11788, March 12, 2010), for the period 1200 hrs, A.l.t., April 30, 2010, through 1200 hrs, A.l.t., August 31, 2010.

The Administrator, Alaska Region, NMFS, has determined that jig vessels will not be able to harvest 400 mt of the B season apportionment of the 2010 Pacific cod TAC allocated to those vessels under § 679.20(a)(7)(ii)(A)(1). Therefore, in accordance with § 679.20(a)(7)(iii)(A), NMFS apports 400 mt of Pacific cod from the B season jig gear apportionment to catcher vessels less than 60 feet (18.3 meters (m)) LOA using hook-and-line or pot gear.

The harvest specifications for Pacific cod included in the final harvest specifications for groundfish in the BSAI (75 FR 11788, March 12, 2010) are revised as follows: 22 mt to the B season apportionment for vessels using jig gear and 4,598 mt to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to 5 U.S.C. 553(d)(3). This finding is based upon the most recent fisheries assessments for Bering Sea and Aleutian Islands groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator has determined that there is no potential disruption to the fishing fleet as well as processors. NMFS was unable to provide a notice providing time for public comment because the most recent, relevant data only became available information recently obtained from the fishery.

This requirement is impracticable and contrary to the public interest as it would prevent NMFS from providing information needed to the industry as to the revised allocations. Immediate notification is necessary to allow for the orderly conduct and efficient operation of this fishery, to allow the industry to plan for the fishing season, and to avoid potential disruption to the fishing fleet as well as processors. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available information recently obtained from the fishery. The Assistant Administrator finds that this directed fishing allowance of 5,451 mt is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 et seq.

Dated: April 12, 2010.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
