

Missouri River falls under a variety of USACE authorities and programs as well as programs and authorities of other agencies.

Major human alterations to the Missouri River began as early as the late 1800s with the removal of snags to improve navigation. River alterations continued into the twentieth century. At the direction of Congress, the USACE enhanced navigation, built dams, and regulated river flows. Simultaneously, land use changes affecting the River's floodplain occurred creating a system very different from its pre-alteration condition. Managing today's altered Missouri River is a complex task due to competing demands from a variety of different uses. The past two decades have produced a great deal of debate among Basin stakeholders on how to best manage the River's resources.

The 1944 Flood Control Act, as amended, and subsequent legislation have directed the USACE to allocate the River's resources among the authorized Missouri River project purposes; which are: Fish and wildlife, flood control, irrigation, navigation, power, recreation, water quality, and water supply. Section 108 of the Energy and Water Development Section of the FY09 Omnibus Appropriations Act provides the USACE authorization to study the Missouri River projects located within the Missouri River Basin to review the original authorized project purposes to determine if changes to the project purposes and existing Federal water resource infrastructure may be warranted. The study authorized by Section 108 will be referred to as the Missouri River Authorized Purposes Study (MRAPS). The MRAPS is a broad-based multi-purpose study that is anticipated to culminate in a comprehensive feasibility-type report with an integrated EIS. The MRAPS will be conducted in accordance with NEPA and with the "Principles and Guidelines for Water and Related Land Resource Implementation Studies" (Water Resource Council, 1983).

The scope of the MRAPS will be limited to review of the original authorized project purposes within the Missouri River Basin and will include a review of other Federal water resource infrastructure related thereto, such as those projects that are dependent on USACE operations or are covered by an operational agreement with the USACE. The MRAPS will evaluate the study area as a comprehensive system of projects, infrastructure, and natural resources providing a detailed review of the existing project purposes and conditions, evaluation of the current needs and problems within the study

area, and could lead to consideration of operational and/or infrastructure alternatives.

2. *Scoping and Public Involvement Process.* The MRAPS will include multiple phases of public, agency, and tribal government involvement. The first official phase of public scoping will be conducted throughout the Basin from late May 2010 through late August 2010, and will seek input on problems, opportunities, and constraints related to the existing authorized purposes and gather general concerns, issues, and needs related to the study. This scoping period plans for 29 public scoping meetings and 11 tribal focused public scoping meetings. Specific locations and dates of these meetings will be officially announced through electronic media, news releases, and mailings. Additional public meetings and involvement will take place throughout the study. For more information on scoping phases, dates, meeting locations, and general information, please visit <http://www.mraps.org>.

3. *Significant Issues.* Issues associated with the proposed study are likely to include, but will not be limited to: existing infrastructure and resource conditions; statutory and legal responsibilities including relevant court decisions; effects of potential alternatives on uses including, but not necessarily limited to: flood control, navigation, fish and wildlife, irrigation, power, recreation, water supply, and water quality control; defining the relationship with current USACE programs including the Missouri River Recovery Program (MRRP), Missouri River Ecosystem Restoration Plan (MRERP), and the Bank Stabilization and Navigation Project (BSNP); and analysis of effects to the Mississippi River from potential actions or alternatives that are examined in the Missouri River Basin.

4. *Additional Review and Consultation.* Additional public, scientific, and statutory review and consultation could include, but will not be limited to: The Clean Water Act, the Fish and Wildlife Coordination Act, the National Historic Preservation Act, the Endangered Species Act, and the Clean Air Act.

5. *Availability of the Draft Environmental Impact Statement.* Availability of the Draft EIS is contingent upon allocation of funding as the study progresses. Draft EIS availability will be announced to the public in the **Federal Register** in compliance with 40 CFR 1506.9 and 1506.10.

Dated: April 6, 2010.

**Kayla Eckert Uptmor,**  
Chief Planning Branch, Omaha District.

Dated: April 7, 2010.

**David L. Combs,**  
Chief Planning Branch, Kansas City District.

## DEPARTMENT OF DEFENSE

### Department of the Air Force

[Docket ID: USAF-2010-0011]

#### Privacy Act of 1974; System of Records

**AGENCY:** Department of the Air Force, DoD.

**ACTION:** Notice to amend a system of records.

**SUMMARY:** The Department of the Air Force is proposing to amend a system of records notice in its existing inventory of records systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended.

**DATES:** The changes will be effective on May 17, 2010 unless comments are received that would result in a contrary determination.

**ADDRESSES:** You may submit comments, identified by docket number and title, by any of the following methods:

- *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Mail:* Federal Docket Management System Office, 1160 Defense Pentagon, Washington, DC 20301-1160.

*Instructions:* All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

**FOR FURTHER INFORMATION CONTACT:** Mr. Ben Swilley at (703) 696-6172.

**SUPPLEMENTARY INFORMATION:** The Department of the Air Force systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the Air Force Privacy Act Officer, Office of Warfighting Integration and Chief Information Officer, SAF/XCPPF, 1800 Air Force Pentagon, Washington, DC 20330-1800.

The specific change to the records system being amended is set forth below. The proposed amendment is not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: April 12, 2010.

**Mitchell S. Bryman,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

## **DELAWARE RIVER BASIN COMMISSION**

### **Notice of Commission Meeting and Public Hearing**

Notice is hereby given that the Delaware River Basin Commission will hold an informal conference followed by a public hearing on Wednesday, May 5, 2010. The hearing will be part of the Commission's regular business meeting. The conference session and business meeting both are open to the public and will be held at the Commission's office building, located at 25 State Police Drive, West Trenton, New Jersey.

The conference among the commissioners and staff will begin at 10:30 a.m. and will consist of a presentation on the Commonwealth's Total Dissolved Solids (TDS) Strategy by a representative of the Pennsylvania Department of Environmental Protection and a presentation on the Delaware River Valley Early Warning System by a representative of the Philadelphia Water Department.

The subjects of the public hearing to be held during the 1:30 p.m. business meeting include the dockets listed below:

1. *Cabot Corporation, D-1970-072-4.* An application for the renewal of an existing 0.222 million gallons per day (mgd) discharge from Outfalls Nos. 001

(process wastewater and non-contact cooling water (NCCW)), 002 (stormwater, condensate and NCCW), and 003 (process water treatment system wastewater). The project is located on Swamp Creek at River Mile 92.47—32.3—12.9—12.6 (Delaware River—Schuylkill River—Perkiomen Creek—Swamp Creek), on the border of Douglass Township, Montgomery County, Pennsylvania and Colebrookdale Township, Berks County, Pennsylvania.

2. *Gilbertsville Golf Club, D-1999-047-2.* The purpose of this project is to continue to provide up to 12 million gallons per 30 days (mg/30 days) of water for golf course irrigation from existing Wells Nos. 2, 9, and 13, which were installed in the Brunswick Formation. The docket holder augments two ponds from the existing groundwater wells to satisfy the irrigation water demand for the docket holder's golf course. The project is located in the Minster Creek Watershed in the New Hanover Township, Montgomery County, PA and is located in the Southeastern Pennsylvania Ground Water Protected Area (GWPA).

3. *Womelsdorf Sewer Authority, D-1967-084 CP-2.* An application to approve an expansion of the existing Womelsdorf Sewer Authority Wastewater Treatment Plant (WWTP). The WWTP was expanded in 2000 from 0.3 million mgd to 0.475 mgd; however this expansion was never approved by the Commission. The WWTP will continue to discharge to the Tulpehocken Creek, a tributary to the Schuylkill River. The facility is located in Heidelberg Township, Berks County, Pennsylvania.

4. *Morysville, D-1973-060 CP-2.* An application for approval to increase the Morysville WWTP discharge from 0.25 mgd to 0.32 mgd. The hydraulic design capacity of 0.38 mgd will not be modified. The project will continue to discharge to Ironstone Creek at River Mile 92.47—54.15—4.0—4.1 (Delaware River—Schuylkill River—Manatawny Creek—Ironstone Creek), in Colebrookdale Township, Berks County, Pennsylvania.

5. *North Wales Water Authority, D-1986-020 CP-2.* An application for approval of a modification of the North Wales Water Authority WWTP. The applicant proposes to upgrade the existing 0.835 mgd WWTP to include the addition of an activated sludge unit and a chemical feed system. The project includes the transfer of ownership from North Wales Borough to the North Wales Water Authority. The WWTP's hydraulic design rate of 0.835 mgd will remain unchanged. The WWTP will

continue to discharge to an unnamed tributary of the Wissahickon Creek, which is a tributary of the Schuylkill River. The facility is located in Upper Gwynedd Township, Montgomery County, Pennsylvania.

6. *Township of Spring, D-1988-077 CP-2.* An application for approval of the expansion of the Spring Township WWTP. A 1.0 mgd oxidation ditch treatment system utilizing a fixed film contact aeration (packed bed reactor) system is proposed to be added to the existing 1.28 mgd WWTP in order to expand the plant's hydraulic design capacity from 1.28 mgd to 2.28 mgd. The average annual flow of the expanded plant will be 2.0 mgd. The WWTP will continue to discharge to Cacoosing Creek, a tributary of Tulpehocken Creek, which is a tributary of the Schuylkill River. The facility is located in the Township of Spring, Berks County, Pennsylvania.

7. *Hilltown Township Water and Sewer Authority, D-1992-020 CP-3.* An application for the renewal of a groundwater withdrawal project to continue the withdrawal of 16.0 mg/30 days to supply the applicant's public water supply system from existing Wells Nos. 2 and 5 and new Well No. 1A. New Well No. 1A was drilled as a replacement well for Well No. 1, which was abandoned due to a casing failure. The applicant requests that the withdrawal from New Well No. 1A be limited to 9.60 mg/30 days. The project is located in the Brunswick and Lockatong Formations in the Pleasant Spring Creek Watershed in Hilltown Township, Bucks County, Pennsylvania, within the Southeastern Pennsylvania Ground Water Protected Area.

8. *Lyons Borough Municipal Authority, D-1994-080 CP-2.* An application for approval to expand and upgrade the Lyons Borough Municipal Authority WWTP. The hydraulic design flow will increase from 0.2 mgd to 0.3 mgd, and modifications will include the construction of two equalization tanks, a package aeration unit, three gravity filters, an ultra-violet (UV) light disinfection system, a post-aeration tank, a screw press for sludge dewatering, chemical feed systems and a filtration building. The project also includes a request for an increase from 1,000 milligrams per liter (mg/l) to 2,000 mg/l in the Total Dissolved Solids (TDS) effluent limit for the upgraded WWTP. The increase in flow and TDS is anticipated as a result of proposed acceptance of an additional 0.10 mgd of industrial process water from East Penn Manufacturing Company, an industrial wastewater discharger to the WWTP. The WWTP will continue to discharge
