Nature of Decision To Be Made

The responsible official will consider the comments, response, disclosure of environmental consequences, and applicable laws, regulations, and policies in making the decision and stating the rationale in the Record of Decision.

Scoping Process

Comments received during the initial scoping process, the 45-day public comment period for the original DEIS, and the appeal filing period provided numerous opportunities for public comment. Public comment will again be solicited at the onset of the 45-day comment period when the supplemental DEIS is published.

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the Magnuson-Stevens Fishery Conservation and Management Act, the Secretary of Commerce (Secretary) has the responsibility for the conservation and management of marine fishery resources. Much of this responsibility has been delegated to the NOAA's National Marine Fisheries Service (NMFS). Under this stewardship role, the Secretary was given certain regulatory authorities to ensure the most beneficial uses of these resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect data from users of the resource. Thus, as regional Fishery Management Councils develop specific Fishery Management Plans (FMP), the Secretary has promulgated rules for the issuance and use of a Vessel Monitoring System (VMS) and to obtain fishery-dependent data to monitor, evaluate, and enforce fishery regulations.

Framework Adjustment 1 (FW1) to the Atlantic Surf Clam and Ocean Quahog FMP contains a VMS requirement for surfclam and ocean quahog vessels participating in the individual transferable quota program and limited access Maine mahogany quahog vessels. VMS was identified as a need in this fishery to (1) Eliminate the requirement to notify NMFS Office of Law Enforcement (OLE) via telephone prior to beginning a fishing trip, (2) facilitate the monitoring of areas closed to fishing due to environmental degradation (e.g., harmful algal blooms and former dump sites for military

munitions), and (3) facilitate the monitoring of borders between state and Federal fishing jurisdictions.

II. Method of Collection

All information is submitted electronically through VMS units.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Oceanic and Atmospheric Administration (NOAA) Office of Education (OEd) collects, evaluates and assesses student data and information for the purpose of selecting successful candidates, generating internal NOAA reports and articles to demonstrate the success of its program. The OEd requires applicants to its student scholarship programs to complete an application for NOAA undergraduate and graduate scholarship programs. Part of the application package requires completion of a NOAA student scholar reference form in support of the scholarship application by academic professors/advisors. NOAA OEd student scholar alumni are also requested to provide information to NOAA for internal tracking purposes. NOAA OEd grantees are required to update the student tracker database with the required student information. In addition, the collected student data supports NOAA OEd's program performance measures.
