Adoption of the Amendment
Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Effective Date
(a) This airworthiness directive (AD) becomes effective May 28, 2010.

Affected ADs
(b) None.

Applicability
(c) This AD applies to GE CJ610 series turbojet and CF700 series turbolfan engines with AFT Technologies combustion liner, part number (P/N) AFT–5016T30C02 installed. These engines are installed on, but not limited to, Learjet Inc. model 24 series and model 25 series airplanes, Dassault Aviation Fan Jet Falcon series airplanes, and Sabreliner Corporation NA–265–70 and NA–265–80 series airplanes.

Unsafe Condition
(d) This AD results from a report of an AFT Technologies combustion liner that released a large section of the inner combustion liner and reports of six combustion liners with premature cracks. We are issuing this AD to prevent premature cracks in the combustion liner, which could release pieces of the inner combustion liner. A release of pieces of the inner combustion liner could cause an uncontained failure of the engine turbine and damage to the airplane.

Compliance
(e) You are responsible for having the actions required by this AD performed within the compliance times specified unless the actions have already been done.

Replacement of AFT Technologies Combustion Liner P/N AFT–5016T30C02

(f) For engines that have an AFT Technologies combustion liner, P/N AFT–5016T30C02, with fewer than 200 hours–since–new (HSN) or 300 cycles–since–new (CSN), remove the AFT Technologies combustion liner, P/N AFT–5016T30C02, before exceeding 200 HSN or 300 CSN, whichever occurs first.

(g) For engines that have an AFT Technologies combustion liner, P/N AFT–5016T30C02, with 200 HSN or more or 300 CSN or more, remove the AFT Technologies combustion liner, P/N AFT–5016T30C02, within 15 hours–in–service or 10 cycles–in–service, after the effective date of this AD, whichever occurs first.

(h) After the effective date of this AD, don’t install any AFT Technologies combustion liner, P/N AFT–5016T30C02, in any engine.

Alternative Methods of Compliance
(i) The Manager, New York Aircraft Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

In this interim rule, the Bureau revises its regulations regarding inmate contact with the community to delete two current Bureau regulations that prohibit inmates from publishing under a byline, due to a recent court ruling invalidating Bureau regulation language containing this prohibition.

Currently, 28 CFR 540.20(b) states as follows: “The inmate may not receive compensation or anything of value for correspondence with the news media. The inmate may not act as reporter or publish under a byline.”

Also, current 28 CFR 540.62(d) states as follows: “An inmate currently confined in an institution may not be employed or act as a reporter or publish under a byline.”

On August 9, 2007, in Jordan v. Pugh, 504 F. Supp. 2d 1109 (D. Colo. 2007), the court issued a decision invalidating the byline language of § 540.20(b). The court found that not all inmate publishing under a byline jeopardizes security, and overruled the byline portion of the provision as facially overbroad for prohibiting all such activity. The Bureau is not appealing this decision. We
