

4. OMB draws on principles of open government to invite public suggestions about improvements in existing regulations, with particular reference to economic growth.

These recommendations build on those of the 2009 Report, in which OMB emphasized the importance of open government and in particular of obtaining access to “dispersed knowledge” about how to improve regulation. To promote such engagement, OMB requests suggestions about regulatory changes that might serve to promote economic growth, with particular reference to increasing employment, innovation, and competitiveness. OMB is especially interested in identifying both new initiatives and current regulations that might be modified, expanded, or repealed in order to promote those goals. Consistent with Executive Order 12866, OMB welcomes suggestions for regulatory reforms that have significant net benefits, that might increase net exports, and that might promote growth, innovation, and competitiveness for small business, perhaps through increasing flexibility. OMB requests that nominations be submitted electronically to OMB within 60 days from the date of notice publication in the **Federal Register** through <http://www.regulations.gov>.

DATES: To ensure consideration of comments as OMB prepares this Draft Report for submission to Congress, comments must be in writing and received by 60 days after publication.

ADDRESSES: Submit comments by one of the following methods:

To ensure that your comments are received, we recommend that comments on this draft report be electronically submitted.

All comments and recommendations submitted in response to this notice will be made available to the public, including by posting them on OMB’s Web site. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. SUPPLEMENTARY INFORMATION: Congress directed the Office of Management and Budget (OMB) to prepare an annual Report to Congress on the Costs and Benefits of Federal Regulations. Specifically, Section 624 of the FY 2001 Treasury and General Government Appropriations Act, also known as the “Regulatory Right-to-Know Act,” (the Act) requires OMB to submit a report on the costs and benefits of Federal regulations together with recommendation for reform. The Act states that the report should contain estimates of the costs and benefits of regulations in the aggregate, by agency and agency program, and by major rule, as well as an analysis of impacts of Federal regulation on State, local, and Tribal governments, small businesses, wages, and economic growth. The Act also states that the report should be subject to notice and comment and peer review.

SUPPLEMENTARY INFORMATION:

Title of Collection: International Cover Page Addendum.

OMB Control No.: 3145-0205.

Abstract

The Office of International Science and Engineering within the Office of the NSF Director will use the International Cover Page Addendum. Principal Investigators submitting proposals to this Office will be asked to complete an electronic version of the International Cover Page Addendum. The Addendum requests foreign counterpart investigator/host information and participant demographics not requested elsewhere in NSF proposal documents.

The information gathered with the International Cover Page Addendum serves four purposes. The first is to enable proposal assignment to the program officer responsible for activity with the primary countries involved. No current component of a standard NSF proposal requests this information. (The international cooperative activities box on the standard NSF Cover Page applies only to one specific type of activity, not the wide range of activities supported by OISE.) NSF proposal assignment applications are program element-based and therefore cannot be used to determine assignment by country. The second use of the information is program management. OISE is committed to investing in activities in all regions of the world. With data from this form, the Office can determine submissions by geographic region. Thirdly, funding decisions cannot be made without details for the international partner not included in any other part of the submission process. The fourth section, counts of scientists and students to be supported by the project, are also not available elsewhere in the proposal since OISE budgets do not include participant support costs. These factors are all important for OISE program management.

Estimated Number of Annual Respondents: 600.

Burden on the Public: 150 hours (15 minutes per respondent).

Dated: April 26, 2010.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.
