

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 18.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: One for each registration application, experimental use permit, or reporting of adverse effects.

Estimated total annual burden hours: 389 hours.

Estimated total annual costs: \$26,875.00. This includes an annual cost of \$26,721 for CBI substantiations and \$154 for adverse effects reporting.

IV. Are There Changes in the Estimates From the Last Approval?

There is an increase of 86 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects an increase in the number of PIP applications during the last 2 years. EPA expects that this higher level of activity will continue. This change is an adjustment.

V. What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. What Action Is the Agency Taking?

EPA is announcing receipt of an initial filing of a pesticide petition requesting a temporary tolerance exemption from the requirement of a tolerance for *E. coli* 0157:H7 specific bacteriophages used on food-contact surfaces in food processing plants. This pesticide petition is filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or modification of regulations in part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that the pesticide petition described in this notice contains data or information prescribed in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the pesticide petition. Additional data may be needed before EPA can make a final determination on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition that is the subject of this notice, prepared by the petitioner, is included in the docket EPA has created for this rulemaking. The request will include:

- The identity of the pesticide.
- Use of the pesticide.
- Safety issues related to the petition.
- Residue issues related to the petition.
- Practicable methods for removing residues that exceed the tolerance level.
- Proposed tolerance, and;

• Reasonable grounds in support of the petition.

The docket for this petition is available on-line at <http://www.regulations.gov>.

As specified in FFDC section 408(d)(3), (21 U.S.C. 346a(d)(3)), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

PP 9G7585. Intralytix, Inc., 701 East Pratt Street, Baltimore, MD 21202, proposes to establish an exemption from the requirement of a tolerance for residues of the antimicrobial, *E. coli* 0157:H7 specific bacteriophages used on food-contact surfaces in food processing plants. The petitioner believes no analytical method is needed because this petition proposes a temporary exemption from the requirement of a tolerance.
