

facilitate truck movements at the access road on SR76.

The access road would lead to the ancillary facilities area just north of the landfill footprint. The ancillary facilities area would include booth and fee scale, an administration building, maintenance building, and a recyclable drop-off area. Two 10,000-gallon leachate-holding tanks, a 20,000-gallon water storage tank, a 20,000-gallon recycled water tank, and a 50 gallon per minute reverse osmosis system would be located in the ancillary facilities area.

In addition, the proposed project would include the relocation of SDG&E transmission towers located on the slope of Gregory Mountain and an option to relocate approximately 3,200 linear feet of San Diego County Water Authority Pipelines 1 and 2, which traverse the property. The proposed project would include the dedication of a minimum of 1,313 acres of the site as permanent open space for long-term preservation of sensitive habitat and species.

Through the EIS process, feasible environmental mitigation measures will be developed to reduce potential environmental impacts. Measures to reduce construction impacts would be implemented through construction contract specifications and permit requirements.

3. *Issues:* There are several potential environmental issues that will be addressed in the Draft EIS. Additional issues may be identified during the scoping process. Issues initially identified for evaluation in the Draft EIS as potentially significant include:

1. Visual impacts from the landform alterations;
2. air quality impacts from construction, operation, increased vehicle emissions;
3. biological impacts to habitat and wildlife;
4. cultural resources (ethnographic resources);
5. hydrogeology, surface hydrology and water quality from disturbance of sediment, operations, and runoff from development;
6. noise from increased traffic associated with operations;
7. traffic and transportation; and
8. cumulative impacts from past, present, and reasonably foreseeable future projects.

4. *Alternatives:* Several alternatives are being considered for the proposed action. The Draft EIS will include a co-equal analysis of the No Action and project alternatives considered. Alternatives were considered through the state environmental review process and an associated EIR that included a no

project alternative; two on-site landfill scenarios; an on-site prescriptive design alternative with a single liner; two off-site North San Diego County locations; and alternatives to reduce the need for a landfill. The EIS will likely consider some of these alternatives. The EIS will include and evaluate a No Action Alternative that would not implement any of the proposed project elements and would not involve any discharge of dredged or fill material into waters of the U.S., and therefore, would not require a Corps permit. These alternatives will be further formulated and developed during the scoping process. Additional alternatives that may be developed during scoping will also be considered in the Draft EIS.

5. *Scoping Process:* The Corps will conduct a public scoping meeting for the proposed Gregory Canyon Landfill Project Draft EIS to receive public comment and to assess public concerns regarding the appropriate scope and preparation of the Draft EIS. Participation in the public meeting by federal, state, and local agencies and other interested organizations and persons is encouraged. The meeting will be held on June 3, 2010 beginning at 6:00 PM (PST) at the City of San Marcos Senior Center (Horizon Room), 111 Richmar Avenue, San Marcos, CA 92069. Comments on the proposed action, alternatives, or any additional concerns should be submitted in writing. Written comment letters will be accepted until June 18, 2010.

The Corps also anticipates formally consulting with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act and with the State Historic Preservation Officer under Section 106 of the National Historic Preservation Act.

6. *Availability of the Draft EIS:* The Draft EIS is expected to be published and circulated by mid-2011, and a public meeting will be held after its publication.

Dated: April 29, 2010.
