

Purpose of the Meeting

This meeting will bring basic research scientists working on models of autoimmune disease relevant to lupus together with clinicians treating lupus patients. There are numerous mouse models of lupus, but their relevance to the actual disease is still a subject for debate. Thus it is the purpose of this meeting to have participants discuss similarities, as well as differences, in mouse models with respect to the disease with the clinicians who actually treat patients. In addition, input is encouraged from clinical attendees regarding what markers in an animal model would be most important for monitoring the disease and assessing the effectiveness of treatment. It is hoped that one consequence of this meeting might be some consensus as to what is most important in any animal model and what animal models might be most useful in developing new markers and treatments for the disease. For more information, including the agenda and registration for this conference, please see <http://web.ncifcrf.gov/events/SystemicLupus/default.asp>.
