DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent to Repatriate a Cultural Item: U.S. Department of Defense, Army Corps of Engineers, Walla Walla District, Walla Walla, WA and Museum of Anthropology, Washington State University, Pullman, WA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate a cultural item in the possession of the U.S. Department of Defense, Army Corps of Engineers, Walla Walla District, Walla Walla, WA,

and Museum of Anthropology, Washington State University, Pullman, WA, that meets the definition of "unassociated funerary object" under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the cultural item. The National Park Service is not responsible for the determinations in this notice.

In 1968, an unassociated funerary object was removed from the floodplain area of site 45FR50, Marmes Rockshelter, in Franklin County, WA, during excavations conducted by Washington State University under contract with the Army Corps of Engineers. The object is an articulated owl foot, originally found between two modified stone flakes, in the Marmes Windust Phase stratum at the site (11,000-8,000 BP). The object - the owl foot bones and two modified chert or chalcedony flakes - was accessioned by Washington State University under inventory number 5780.

Site 45FR50 consists of a rockshelter and sloping floodplain area in front of the rockshelter proper. The archeological materials at site 45FR50 have been variously classified into chronological and cultural phases, and include the Windust Phase (+11,000-8000 BP), Cascade Phase (8000-4500 BP), Tucannon Phase (4500-2500 BP), and Harder Phase (2500-500 BP). The floodplain deposits date from the earliest period, or the Windust Phase.

Human remains representing a minimum of four individuals and associated funerary objects were excavated from the floodplain deposits. The associated funerary objects included 23 pieces of faunal material directly associated with the human remains, and four bone rods found with a specific individual identified at the time of excavation as Marmes I. Other cultural items excavated from the earliest deposit (Windust Phase) include stone tools and lithic debitage, worked and unworked faunal bone, and possibly some red ochre. The owl foot object (consisting of the owl foot bones and two modified flakes) was excavated from the Windust Phase stratum, but was not found in direct association with any human remains. However, owls are important in southern Plateau Native American culture as ceremonial symbols, and items such as the owl foot object are still used as funerary items in Yakama and Nez Perce burials. Owl parts were often buried with medicine
