To adjust for different sizes of family, 45 CFR 96.85 calls for multiplying 60 percent of a State’s estimated median income for a four-person family by the following percentages: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For each additional family member above six persons, 45 CFR 96.85 calls for adding 3 percentage points to the percentage for a six-person family (132 percent) and multiply the new percentage by 60 percent of a State’s estimated median income for a four-person family.
