Announcement Type: Now.
Catalog of Federal Domestic Assistance Number(s): 93.933.
Key Dates: Application Deadline Date: June 11, 2010.
Earliest Anticipated Start Date: August 1, 2010.

I. Funding Opportunity Description

Statutory Authority

The Indian Health Service (IHS) is accepting competitive grant applications for the Sexual Assault Projects Expansion Community Developed Models for American Indian and Alaska Native (AI/AN) communities. This announcement is a limited targeted solicitation for urban Indian organizations as defined by Public Law 94–437, the Indian Healthcare Improvement Act (IHCIA), as amended, Title V Urban Health organization. This program is authorized under the Snyder Act, 25 U.S.C. 13, and 25 U.S.C. 1602(a), and 25 U.S.C. 1602(b)(9), (11), and (12); as well as 25 U.S.C. 1621(m) of the Indian Health Care Improvement Act (IHCIA), Public Law 94–437, as amended. This program is described in the Catalog of Federal Domestic Assistance (CFDA) under 93.933.

Background

AI/AN women continue to suffer from the highest rate of violent victimization in the United States.1 The incidence of DV and SA in Indian Country is staggering. Reports from the U.S. DOJ found that:

• Native women are more than 2.5 times more likely to be raped or sexually assaulted than women in the U.S. in general.
• According to a study by the DOJ’s Bureau of Justice Statistics (BJS), American Indians are twice as likely to experience sexual assault crimes compared to all other races.
• The Centers for Disease Control and Prevention Morbidity and Mortality Weekly Report survey dated 2008 indicated that 39 out of 100 AI/AN women have been victims of intimate partner violence (IPV) at some point in their lives.
• DOJ statistics indicate that 34.1 percent of AI/AN women (or one in three) will be raped during their lifetime; the comparable figure for the U.S. as a whole is less than one in five.
• Because some victims of violence choose not to report their SA experiences to law enforcement, SA prevalence is likely even higher.

Health Implications

In addition to injuries sustained by women during violent episodes, physical and psychological abuse is linked to a number of adverse health
