SUPPLEMENTARY INFORMATION:

I. Abstract

The marine mammal stranding report provides information on strandings so that the National Marine Fisheries Service (NMFS) can compile and analyze by region the species, numbers, conditions, and causes of illnesses and deaths in stranded marine mammals. NMFS requires this information to fulfill its management responsibilities under the Marine Mammal Protection Act (16 U.S.C. 1421a). The NMFS is also responsible for the welfare of marine mammals while in rehabilitation status. The data from the marine mammal rehabilitation disposition report are required for monitoring and tracking of marine mammals held at various NMFS-authorized facilities. This information is submitted primarily by volunteer members of the marine mammal stranding networks who are authorized by NMFS.

II. Method of Collection

Paper applications, electronic reports, and telephone calls are required from participants, and methods of submittal include the Internet through the NMFS National Marine Mammal Stranding Database and facsimile transmission of paper forms.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Marine Mammal Protection Act of 1972 (MMPA; 16 U.S.C. 1361 *et. seq.*) prohibits the "take" of marine mammals unless otherwise authorized or exempted by law. Among the provisions that allow for lawful take of marine mammals, sections 101(a)(5)(A) and (D) of the MMPA direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing), within a specified geographical region, if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings shall be granted: (1) If the Secretary, acting by delegation through the National Marine Fisheries Service (NMFS), finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and (2) if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

Issuance of an incidental take authorization (ITA) under section 101(a)(5)(A) or (D) of the MMPA requires three sets of information collection: (1) A complete application for an ITA, as set forth in NMFS' implementing regulations at 50 CFR 216.104, which provides the information necessary for NMFS to make the necessary statutory determinations; (2) information relating to required monitoring; and (3) information related to required reporting. These collections of information enable NMFS to: (1) Evaluate the proposed activity's impact on marine mammals; (2) arrive at the appropriate determinations required by the MMPA and other applicable laws prior to issuing the authorization; and (3) monitor impacts of activities for which take authorizations have been issued to determine if predictions regarding impacts on marine mammals were valid.

II. Method of Collection

Applicants may transmit an electronic application file or report (e.g. .doc or .pdf file) via e-mail, or deliver paper forms via hand delivery, the U.S. Postal Service, or by an overnight delivery service.

SUPPLEMENTARY INFORMATION:**I. Abstract**

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), the National Marine Fisheries Service (NMFS) is responsible for management of the Nation's marine fisheries. NMFS must also carry out, as necessary and appropriate, obligations the United States undertakes internationally regarding tuna management through the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*). NMFS must collect domestic landings data for Atlantic highly migratory species (HMS) via dealer reports in order to provide information vital for fishery management. In addition, the United States must monitor the import, export, and re-export of bluefin tuna, frozen bigeye tuna, and swordfish in order to comply with international obligations established through membership in the International Commission for the Conservation of Atlantic Tunas (ICCAT). ICCAT has implemented a trade monitoring program for bluefin tuna, frozen bigeye

tuna, and swordfish to discourage illegal, unregulated, and unreported fishing activities as well as to further understand catches of and international trade in these species. Similar objectives are the basis for the Southern bluefin tuna (BFT) trade monitoring program established by the Commission for the Conservation of Southern Bluefin Tuna (CCSBT). Although the United States is not a member of the CCSBT, effective management of the Southern bluefin tuna resource is in the best interest of affected parties in the United States. Thus, the United States has implemented the CCSBT trade monitoring program, along with the analogous ICCAT programs.

This collection serves as a family of forms for Atlantic HMS dealer reporting requirements, including for the purchase of HMS from fishermen, and the import, export, and/or re-export of HMS.
