Credit Reforms in Organized Wholesale Electric Markets; Notice of Agenda for Technical Conference

May 5, 2010.

As announced in the Notice of Technical Conference issued on April 15, 2010, Commission staff will hold a technical conference on May 11, 2010. The purpose of this conference is to discuss the proposal in the Credit Reforms in Organized Wholesale Electric Markets Notice of Proposed Rulemaking¹ regarding whether Independent System Operator (ISO)/Regional Transmission Operators (RTOs) should adopt certain tariff revisions to clarify their status as a party to each transaction so as to eliminate ambiguity regarding their ability to "set-off" market obligations and whether this proposal will have additional ramifications. The conference will be held from 9 a.m. to 12:30 p.m. (EDT), in the Commission Meeting Room at the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC. All interested persons are invited to attend, and registration is not required.

The agenda is attached. There will be two panels. The first panel will discuss the issue from the perspective of the ISO/RTO as market administrator but will also include the perspective of regulatory oversight in related markets. The second panel will discuss the issue from both a market participant perspective and a legal perspective.

As previously announced, a free webcast of this event will be available. Anyone with internet access who desires to view this event can do so by navigating <http://www.ferc.gov>'s Calendar of Events and locating this event in the Calendar. The event will contain a link to its webcast. The Capitol Connection provides technical support for the webcasts and offers the option of listening to the meeting by a phone-bridge for a fee. If you have any questions, visit <http://www.CapitolConnection.org> or call 703-993-3100.

This conference will be transcribed. Transcripts of the meeting will be available immediately for a fee from Ace Reporting Company (202-347-3700 or 1-800-336-6646). Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973.

For accessibility accommodations, please send an e-mail to accessibility@ferc.gov or call 1-866-208-3372 (voice) or 202-208-1659 (TTY), or send a fax to 202-208-2106 with required accommodations.

k. This application has been accepted for filing and is ready for environmental analysis.

l. The existing Brassua Project includes: (1) A 1,789-foot-long dam consisting of: (a) An earth dike 410 feet long with 100 feet of concrete core wall; (b) a concrete-faced earth dike 342.5 feet long; (c) a concrete Ambursen dam 284 feet long with a height of 52 feet above the stream bed; (d) a 18.5-foot fishway (inactive); and (e) a 734-foot earth dike with a concrete core wall; (2) a 9,700-acre reservoir (known as Brassua Lake) with a normal pool elevation 1,074.0 feet (U.S.G.S. datum) and maximum drawdown of 31 feet, extending 7.75 miles upstream; (3) a reinforced-concrete intake structure; (4) a 110-foot-long, 13-foot square penstock; (5) a 32-foot-high, 32-foot-wide and 60-foot-long powerhouse; (6) a 4.18-MW generating unit; (7) a 40-foot-wide, 15-foot-deep and 60-foot-long tailrace; (8) a substation; (9) a 0.5-mile-long, 34.5-kV (kilovolt) transmission line; and (10) appurtenant facilities. The earth sections of the dam are topped with 33.5-inch-high wave barriers (Jersey barriers).

The Brassua Project is operated as a seasonal storage facility where water releases are determined by downstream demands for hydroelectric generation in the Kennebec River and for flood control. Reservoir fluctuations follow an annual cycle under which reservoir levels are reduced during the fall and winter to provide additional flows downstream as well as to make storage volume available for spring snow melt and runoff. After the spring refill, flow

is released for the Brassua reservoir to provide summer minimum instream flows as well as water for industrial and municipal uses. Specific project operation requirements are discussed below.

The current license allows the licensees to operate the Brassua Project in peaking mode from July 1st through August 31st and from November 6th through the start of spring freshet (normally mid-May) of each year. The licensee is required to cease peaking operation and resume normal operation in which flows through the project are maintained constant on a daily basis from spring freshet through June 30th and from September 1st through November 5th of each year.

The current license requires the licensee to release the following minimum flows and maintain the following target water levels to protect fish and aquatic habitat and to benefit the reproductive efforts of the landlocked salmon population in the Moose River. All Minimum flow releases are maintained through the turbine or deep gates and discharged in the lower Moose River below the dam.

Any questions regarding this application should be directed to Susan T. Halbach, Senior Counsel, Tennessee Gas Pipeline Company, 1001 Louisiana Street, Houston, Texas 77002, or by calling (713) 420-5751 (telephone) or (713) 420-1601 (fax), susan.halbach@elpaso.com, Debbie Kalisek, Regulatory Analyst, Tennessee Gas Pipeline Company, 1001 Louisiana Street, Houston, Texas 77002, or by calling (713) 420-3292 (telephone) or (713) 420-1605 (fax), debbie.kalisek@elpaso.com, or to Thomas G. Joyce, Manager, Certificates, Tennessee Gas Pipeline Company, 1001 Louisiana Street, Houston, Texas 77002, or by calling (713) 420-3299 (telephone)

or (713) 420-1605 (fax), tom.joyce@elpaso.com.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to
