

Deletions

On 3/5/2010 (75 FR 10223–10224) and 3/12/2010 (75 FR 11863–11864), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the products deleted from the Procurement List.

End of Certification

Accordingly, the following products are deleted from the Procurement List:

POLICY JUSTIFICATIONAustralia – RQ-7B SHADOW 200 Unmanned Aircraft Systems

The Government of Australia has requested a possible sale of two (2) RQ-7B SHADOW 200 Unmanned Aircraft Systems (UAS), communication equipment to include 4 Ground Control Stations, support equipment, spare and repair parts, tools and test equipment, technical data and publications, personnel training and training equipment, U.S. government and contractor engineering, technical and logistics support services, and other related elements of logistics support. The estimated cost is \$218 million.

Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. Australia's efforts in peacekeeping and humanitarian operations in Iraq and in Afghanistan have served U.S. national security interests. This proposed sale is consistent with those objectives and facilitates burden sharing with our allies.

The proposed sale of the RQ-7B SHADOW 200 systems will improve Australia's capability to support ongoing ground operations in Afghanistan. Australia will also use the enhanced capability in future contingency operations encompassing humanitarian assistance, disaster relief, and stability operations in the Asia-Pacific region. Australia will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be AAI Corporation in Hunt Valley, Maryland. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of four contractor representatives to Australia to support delivery of the RQ-7B SHADOW 200 UAS in-country.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 10-19

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act

Annex
Item No. vii

(vii) Sensitivity of Technology:

1. The RQ-7B SHADOW Unmanned Aircraft System is a twin-boom pusher layout, similar to the RQ-2 Pioneer and RQ-5 Hunter, has a 13 foot wingspan, weighs 350 lbs and flies at around 14,000ft at 70 knots with around four hours endurance. It can carry a GPS system for autonomous operations. SHADOW 200 is used to locate, recognize and identify targets up to 125km from a brigade tactical operations center. The system recognizes tactical vehicles by day and night from an altitude of 8,000ft and at a slant range of 3.5km.

2. The AN/APX-100 transponder system provides automatic identification of the aircraft. The system receives, decodes, and replies to interrogations on modes 1,2,3/A,4,C and S from all suitable equipped challenging airborne and ground facilities. The receiver operates on 1,300 MHZ and the transmitter section operates on a frequency of 1090MHZ. Because these frequencies are in the UHF band, the operational range is limited to line-of-site. The transponder is classified Secret if MODE IV or MODE S fill is installed in the equipment with a crypto device.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
