

and RPF calculation, the selection of PAHs to include in the RPF approach, the derivation of RPFs for selected PAHs, and the uncertainties and limitations associated with the RPF approach. The purpose of the teleconference is for the panel to receive a briefing on the draft technical document and for members to clarify the charge to the panel. During the face-to-face meeting, the panel will review the technical document.

Availability of Meeting Materials: Agendas and materials in support of these meetings will be placed on the EPA Web site at <http://www.epa.gov/sab> in advance of each meeting. For technical questions and information concerning EPA's draft document, please contact Dr. Lynn Flowers at (703) 347-8537, or flowers.lynn@epa.gov.

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a federal advisory committee to consider as it develops advice for EPA. They should send their comments directly to the Designated Federal Officer for the relevant advisory committee. **Oral Statements:** In general, individuals or groups requesting an oral presentation at a public teleconference will be limited to three minutes per speaker, with no more than a total of 30 minutes for all speakers. At the face-to-face meeting, presentations will be limited to five minutes, with no more than a total of one hour for all speakers. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Interested parties should contact Mr. Aaron Yeow, DFO, in writing (preferably via e-mail) at the contact information noted above by June 1, 2010 for the teleconference and by June 14, 2010 for the face-to-face meeting, to be placed on the list of public speakers. **Written Statements:** Written statements should be supplied to the DFO via email at the contact information noted above by June 1, 2010 for the teleconference and by June 14, 2010 for the face-to-face meeting so that the information may be made available to the Committee members for their

consideration. Written statements should be supplied in one of the following electronic formats: Adobe Acrobat PDF, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format. Submitters are requested to provide versions of signed documents, submitted with and without signatures, because the SAB Staff Office does not publish documents with signatures on its Web sites.

Accessibility: For information on access or services for individuals with disabilities, please contact Mr. Aaron Yeow at (202) 343-9878 or yeow.aaron@epa.gov. To request accommodation of a disability, please contact Mr. Yeow preferably at least ten days prior to each meeting to give EPA as much time as possible to process your request.

Dated: May 12, 2010.

Anthony F. Maciorowski,
Deputy Director, EPA Science Advisory Staff
Office.

EXPORT-IMPORT BANK OF THE UNITED STATES

Economic Impact Policy

This notice is to inform the public that the Export-Import Bank of the United States has received an application for a \$49.3 million guarantee to support the U.S. export of aircraft tooling equipment to Mexico and the United Kingdom. The U.S. exports will enable the Mexican and British facilities to produce composite aircraft parts. All of the new Mexican and British production will be sent back to the U.S. for final assembly into business aircraft. Available information indicates that this type of supply chain structure exists because of the need for industry participants to produce technically specific goods at proprietary facilities. Interested parties may submit comments on this transaction by e-mail to economic.impact@exim.gov or by mail to 811 Vermont Avenue, NW., Room 947, Washington, DC 20571, within 14 days of the date this notice appears in the **Federal Register**.

Jonathan J. Cordone,
Senior Vice President and General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

May 13, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 - 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, and (e) ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before July 19, 2010. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202-395-5167 or via the Internet at Nicholas_A_Fraser@omb.eop.gov and to the Federal Communications Commission via email to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: Judith B. Herman, Office of Managing Director, (202) 418-0214. For additional information, contact Judith B. Herman, OMD, 202-418-0214, or email judith-b.herman@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0398.

Title: Sections 2.948 and 15.117(g)(2), Equipment Authorization Measurement Standards.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 725 respondents; 725 responses.

Estimated Time Per Response: 5 – 30 hours.

Frequency of Response: On occasion and other three year reporting requirements and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. sections 4(i), 302, 303(c), 303(f), 303(g), 303(r), and 309(a).

Total Annual Burden: 21,160 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

There is minimal exemption from the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(4), and 47 CFR 0.459(d) of the Commission's rules, that is granted for trade secrets, which may be submitted to the Commission as part of the documentation of the test results. No other assurances of confidentiality are provided to respondents.

Needs and Uses: The Commission will submit this information collection as a revision to the Office of Management and Budget (OMB) after this comment period to obtain the full three year clearance from them. There is a change in the Commission's burden estimates. The 60 hour program change increase is due to the new reporting requirement which is discussed further below. There is also a 12,000 hour adjustment increase in burden which

reflects the significant number of laboratories filing test site descriptions. This increase has been observed in the recent past, and is in large part due to Mutual Recognition Agreements (MRAs) signed with various foreign economic entities, by testing facilities filing site descriptions under Section 2.948, prior to submittal of equipment for authorization.

The revision for this information collection is as follows: On September 14, 2009, the Commission's Office of Engineering and Technology (OET) identified and requested comment on certain types of information that an applicant should provide to be considered an accreditation body of test laboratories under the Commission's rules, see DA 09-2049. Under the Commission's rules, section 2.948(d) sets forth the requirements for accreditation bodies seeking recognition from the FCC as a laboratory accreditation body. Accreditation bodies seeking such recognition from the Commission must file a report of their qualifications with the OET. They are only required to file this information once. The Commission currently has two recognized accreditation bodies, and is about to recognize a third. Additional accreditation bodies may be recognized.

The currently OMB-approved requirements for this information collection requires that each Electro-Magnetic Compatibility (EMC) testing facility that performs equipment testing in support of any request for equipment authorization to file a test site description, either with the Commission or with a Commission-approved accrediting body.

The test site description and the supporting information documents that the EMC testing facility complies with the testing standards used to make the measurements that support any request for equipment authorization.

In addition, the referenced 47 CFR Part 15 rules require that equipment manufacturers insert in their files a statement explaining the basis on which it relies to ensure that at least 97.5% of all production units of the test sample that are manufactured have a noise figure of no greater than 14 dB.

The Commission or the accrediting body uses the information from these test sites and supporting documentation, which accompany all requests for equipment authorization: 1) to ensure that the data are valid and that proper testing procedures are used;

2) to ensure that potential interference to radio communications is controlled; and

3) to investigate complaints of harmful interference or to verify the manufacturer's compliance with 47 CFR rule sections 2.948 and 15.117(g)(2) of the Commission's rules.

Federal Communications Commission.

Marlene H. Dortch,

Secretary,

Office of the Secretary,

Office of Managing Director.
