SUMMARY: In this document, the Commission seeks to gather information on the feasibility of instituting usage alerts and cut-off mechanisms similar to those required under the European Union (EU) regulations that would provide wireless voice, text, and data consumers in the United States a way to monitor, on a real-time basis, their usage of a wireless communications service, as well as the various charges they may incur in connection with such usage (e.g., roaming services, voice service “minute plans,” text message plans). Specifically, the Commission seeks comment on whether technological or other differences exist that would prevent wireless providers in this country from employing similar usage controls as those now required by the EU.

Synopsis
