Foreign-Trade Zones Board

[Docket 35-2010]

Foreign-Trade Zone 50 Long Beach, California, Application for Subzone, Louisville Bedding Company (Household Bedding Products), Ontario, California

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Board of Harbor Commissioners of the Port of Long Beach, grantee of FTZ 50, requesting special-purpose subzone status for the bedding products manufacturing facility of Louisville Bedding Company (LBC) located in Ontario, California. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on May 14, 2010.

The LBC plant (105 employees/9.7 acres) is located at 1200 South Etiwanda Avenue in Ontario, California. The facility is used to manufacture household bedding products, including mattress pads and pillows (up to 10 million pillows and 2 million mattress pads annually) for the U.S. market and export. LBC is requesting authority to utilize foreign-origin wide roll (80 inches and wider), high thread count (180 threads per inch and higher) cotton, polyester, and synthetic woven fabric and pillow shells (classified under HTSUS Headings 5208, 5210, 5512, 5513, and 6307; duty rate range: 7-14.9%) to be cut, sewn, quilted and assembled into the bedding products noted above under FTZ procedures. The company has also submitted an application to the Board for subzone status for its Louisville, Kentucky, facilities (Docket 28-2010, 75 FR 24572, 5-5-2010).

FTZ procedures could exempt LBC from customs duty payments on the foreign-origin fabrics and pillow shells used in export production. On its

shipments for the domestic market, the finished household bedding products would be entered for consumption from the proposed subzone classified under HTSUS 9404.90, and LBC is seeking authority to elect the various finished bedding product duty rates (4.4 - 7.3%, *ad valorem*) for the foreign-origin fabric and pillow shell material inputs. Domestic-status fibers would be used to fill the foreign pillow shells. The application indicates that the savings from FTZ procedures would help improve the facility's international competitiveness.

In accordance with the Board's regulations, Pierre Duy of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the following address: Office of the Executive Secretary, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW, Washington, DC 20230-0002. The closing period for receipt of comments is July 20, 2010. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to August 4, 2010.

A copy of the application will be available for public inspection at the Office of the Foreign-Trade Zones Board's Executive Secretary at the address listed above and in the "Reading Room" section of the Board's website, which is accessible via www.trade.gov/ftz. For further information, contact Pierre Duy at Pierre.Duy@trade.gov or (202) 482-1378.

Dated: May 17, 2010.

Andrew McGilvray,
Executive Secretary.

BILLING CODE 3510-DS-S

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

[Docket No.: PTO-P-2010-0042]

Elimination of Classification Requirement in the Green Technology Pilot Program

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice.

SUMMARY: The United States Patent and Trademark Office (USPTO) implemented the Green Technology Pilot Program on December 8, 2009, which permits patent applications pertaining to environmental quality, energy conservation, development of renewable energy resources, and greenhouse gas emission reduction to be advanced out of turn for examination and reviewed earlier (accorded special status). The program is designed to promote the development of green technologies. However, the pilot program was limited to only applications classified in a number of U.S. classifications to assist the USPTO to balance the workload and gauge resources needed for the program. The USPTO has determined that the classification requirement is unnecessary because the workload has been balanced with other mechanism, and this requirement was causing the denial of petitions for applications that are drawn to green technologies. The USPTO is hereby eliminating the classification requirement for any petitions that are decided on or after the publication date of this notice. This will permit more applications to qualify for the program, thereby allowing more inventions related to green technologies to be advanced out of turn for examination and reviewed earlier.

DATES: Effective Date: This change to the Green Technology Pilot Program is effective May 21, 2010.

Duration: The Green Technology Pilot Program will run for twelve months from December 8, 2009, and the USPTO will only accept the first 3,000 grantable petitions to make special under the Green Technology Pilot Program in new applications filed before December 8, 2009. Accordingly, if less than 3,000 grantable petitions are received, the pilot program will end on December 8, 2010.

FOR FURTHER INFORMATION CONTACT:

Pinchus M. Laufer and Joni Y. Chang, Senior Legal Advisors, Office of Patent Legal Administration, Office of the Associate Commissioner for Patent Examination Policy, by telephone at 571-272-7726 or 571-272-7720; by facsimile transmission to 571-273-7726, marked to the attention of Pinchus M. Laufer; or by mail addressed to: Mail Stop Comments Patents, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

SUPPLEMENTARY INFORMATION: The USPTO published a notice for the implementation of the Green Technology Pilot Program on December 8, 2009. See *Pilot Program for Green Technologies Including Greenhouse Gas*
