

to existing laws, regulations, formal orders, terms, conditions, and stipulations in or attached to the lease form, or included as conditions of approval to permits.

The purpose of the public scoping process is to: (1) Determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for amending the land use plan to adopt new stipulations and other conservation measures, and (2) decide whether, and under what conditions, to issue geothermal leases in the study area. At present, the BLM has identified the following preliminary issues:

- Conservation of Gunnison sage-grouse population and habitat;
- Conservation of Canada lynx seasonal habitat;
- Impacts to cultural resources;
- Impacts to known geothermal resources and features in and near the lease nomination area;
- Demand for renewable energy and local economic impacts;
- Access to and across private lands;
- Impacts to critical big game winter range and other wildlife habitat;
- Visual impacts from potential development; and
- Cumulative impacts associated with geothermal leasing including the potential for exploration and development operations.

By this notice, the BLM is complying with requirements in 43 CFR 1610.2(c) to notify the public of potential amendments to land use plans, predicated on the findings of the EA. If a land use plan amendment is necessary, the BLM will integrate the land use planning process with the NEPA process for this project.

The BLM may use a combination of scoping periods, public meetings, and the NEPA process to supplement the public involvement process required by Section 106 of the National Historic Preservation Act (NHPA) (16 U.S.C. 470f) as provided for in 36 CFR 800.2(d)(3). Native American Tribal consultations will be conducted and Tribal concerns, including impacts on Indian trust assets will be given due consideration. Federal, state, and local agencies, along with other stakeholders that may be interested or affected by the BLM's decision on this project are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate as a Cooperating Agency. Agencies or organizations with technical expertise or jurisdictional authority will be invited to participate as Cooperating Agencies in the NEPA analysis and

environmental review. Likely cooperating agencies identified thus far include the County of Gunnison, the City of Gunnison, the State of Colorado Governor's Energy Office and Department of Natural Resources (Division of Wildlife, Division of Water Resources, State Land Board, and Colorado Geological Survey), the FS, the Western Area Power Administration, the Environmental Protection Agency, the U.S. Fish and Wildlife Service, the Southern Ute Tribe, Ute Mountain Ute Tribe, and the Northern Ute Tribe.

An interdisciplinary approach will be used to develop any plan amendment in order to consider the variety of resource issues and concerns identified during public scoping. Notification of the planning process will be made to the Governor of Colorado, County Commissioners, local tribes and potentially affected members of the public. The public is encouraged to help identify questions and concerns during the scoping phase.

Preliminary planning criteria are:

1. The BLM will continue to manage the public land within the planning area in accordance with FLPMA, 43 U.S.C. 1701 (*et seq.*), other applicable laws and regulations, and all existing public land laws.

2. The BLM will use a collaborative and multi-jurisdictional approach, where possible, to jointly determine the desired future condition of public lands.

3. The socio-economic impacts of the alternatives will be addressed.

4. The amendment process will follow the FLPMA planning process and include an EA that will comply with NEPA standards and an Environmental Impact Statement if a Finding of No Significant Impact cannot be reached.

5. Decisions in the Amendment will strive to be compatible with existing plans and policies of adjacent local, State, Federal and Tribal agencies to the extent that those plans and policies are consistent with Federal law governing the administration of public land.
