

- Families' participation in MSHS, and
- Any perceived obstacles to participation.

The resulting information can be collected for multiple cycles of NAWS data, identifying potential issues in various agricultural regions over the course of the seasons. If continued for multiple years, it should be possible to identify trends in farmworker family child care use for their young children and family perceptions of MSHS.

*Systematic Data Collection:
Incorporation of Related Questions in
Design of MSHS Survey*

The design options for the MSHS Survey will include components that OHS could use to gather information regarding obstacles and barriers. Possible routes identified thus far include record reviews that could provide insight (e.g., review of local community needs assessments and program recruitment methods); gathering staff and parent opinions regarding obstacles and barriers to MSHS participation; or direct interviews with community partners and local advocacy organizations. The design contract will illuminate methodological and logistical considerations for collecting these types of data, and will be useful as OHS considers future data collection strategies.

(1) A Plan for Eliminating Identified Barriers and for Increasing Enrollment of Eligible Children

Based on the information obtained from the Migrant and Seasonal Roundtables, and input from MSHS grantees, families, researchers, and private organizations involved in advocating for Migrant and Seasonal families, ACF will develop a plan that will articulate barriers identified through (1) and (2) above, propose methods for dealing with them that are within ACF's legislative purview, and incorporate methods that require action by other Federal agencies or statutory changes. The plan for eliminating identified barriers will form the basis for a strategy to increase the enrollment of eligible children in MSHS, as appropriate.
