Among other things, the regulations require artificially dwarfed plants imported into the United States to be accompanied by a phytosanitary certificate issued by the government of the country of origin. This certificate must contain declarations that certain conditions were met in the country of origin to protect against the infestation of the plants by longhorned beetles and other plant pests.

We are seeking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

1. Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
2. Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

**Estimate of burden:** The public reporting burden for this collection of information is estimated to average 0.2533333 hours per response.

**Respondents:** Plant health officials of exporting countries, importers.

**Estimated annual number of respondents:** 30.

**Estimated annual number of responses per respondent:** 5.

**Estimated annual number of responses:** 150.

**Estimated total annual burden on respondents:** 38 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 28th day of May 2010.

[Docket No. FSIS–2009–0033]

**International Standard-Setting Activities**

**AGENCY:** Office of Food Safety, USDA.

**ACTION:** Notice.

**SUMMARY:** This notice informs the public of the sanitary and phytosanitary standard-setting activities of the Codex Alimentarius Commission (Codex), in accordance with section 491 of the Trade Agreements Act of 1979, as amended, and the Uruguay Round Agreements Act, Public Law 103–465, 108 Stat. 4809. This notice also provides a list of other standard-setting activities of Codex, including commodity standards, guidelines, codes of practice, and revised texts. This notice, which covers the time periods from June 1, 2009, to May 31, 2010, and June 1, 2010, to May 31, 2011, seeks comments on standards under consideration and recommendations for new standards.

**ADDRESSES:** Comments may be submitted by either of the following methods:

- **Federal eRulemaking Portal:** This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to [http://www.regulations.gov](http://www.regulations.gov). Follow the online instructions at that site for submitting comments.
- **Mail:** including diskettes or CD-ROMs, and hand- or courier-delivered items: Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, Room 2–2127, George Washington Carver Center, 5601 Sunnyside Avenue, Beltsville, MD 20705.

**Instructions:** All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2009–0033. Comments received in response to this docket will be available for public inspection and posted without change, including any personal information, to [http://www.regulations.gov](http://www.regulations.gov).

**Docket:** For access to comments received, go to the FSIS Docket Room at the address listed above between 8:30 a.m. and 4:30 p.m., Monday through Friday.

Please state that your comments refer to Codex and, if your comments relate to specific Codex committees, please identify those committees in your comments. If you are a copy of your comments to the delegate from that particular committee.

**SUPPLEMENTARY INFORMATION:**

**Background**

The World Trade Organization (WTO) was established on January 1, 1995, as the common international institutional framework for the conduct of trade relations among its members in matters related to the Uruguay Round Trade Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade (GATT). U.S. membership in the WTO was approved and the Uruguay Round Agreements Act was signed into law by the President on December 8, 1994. The Uruguay Round Agreements became effective, with respect to the United States, on January 1, 1995. Pursuant to section 491 of the Trade Agreements Act of 1979, as amended, the President is required to designate an agency to be “responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization.” The main organizations are Codex, the World Organisation for Animal Health, and the International Plant Protection Convention. The President, pursuant to Proclamation No. 6780 of March 23, 1995 (60 FR 15845), designated the U.S. Department of Agriculture as the agency responsible for informing the public of SPS standard-setting activities of each international standard-setting organization. The Secretary of Agriculture has delegated to the Office of Food Safety the responsibility to inform the public of the SPS standard-setting activities of Codex. The Office of Food Safety has, in turn, assigned the responsibility for informing the public...
of the SPS standard-setting activities of Codex to the U.S. Codex Office.

Codex was created in 1963 by two U.N. organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the principal international organization for establishing standards for food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers, ensure fair trade practices in the food trade, and promote coordination of food standards work undertaken by international governmental and nongovernmental organizations. In the United States, the United States Department of Agriculture (USDA); the Food and Drug Administration (FDA); Department of Health and Human Services (HHS); the National Oceanic and Atmospheric Association (NOAA); Department of Commerce (DOC); and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

As the agency responsible for informing the public of the SPS standard-setting activities of Codex, the Office of Food Safety publishes this notice in the Federal Register annually. Attachment 1 (Sanitary and Phytosanitary Activities of Codex) lists the SPS standard-setting activities of Codex and provides information available through its Web page, http://www.fsis.usda.gov/

Regulations & Policies/ Codex Alimentarius/index.asp. Please visit the Web page or notify the appropriate U.S. delegate or the U.S. Codex Office, Room 4861, South Agriculture Building, 1400 Independence Avenue, SW., Washington, DC 20250–3700 (uscodex@fsis.usda.gov), if you would like to access or receive information about specific committees.

The information provided in Attachment 1 describes the status of Codex standard-setting activities by the Codex Committees for the time periods from June 1, 2009, to May 31, 2010, and June 1, 2010, to May 31, 2011. Attachment 2 provides the list of U.S. Codex Officials (including U.S. delegates and alternate delegates). A list of forthcoming Codex sessions may be found at: http:// www.codexalimentarius.net/web/ current.jsp?lang=en.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it online through the FSIS Web page located at http://www.fsis.usda.gov/regulations/ 2010_Notices_Index/. FSIS will also make copies of this Federal Register publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, Federal Register notices, FSIS public meetings, and other types of information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included.

The Update is also available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience.

Dated: Done at Washington, DC on May 28, 2010.

United States Manager for Codex.

Sanitary and Phytosanitary Activities of Codex Codex Alimentarius
Commission and Executive Committee

The Codex Alimentarius Commission will hold its Thirty Third Session July 5–9, 2010, in Geneva, Switzerland. At that time, it will consider standards, codes of practice, and related matters forwarded to the Commission by the general subject committees, commodity committees, and ad hoc Task Forces for adoption as Codex standards and guidance. The Commission will also consider the implementation status of the Codex Strategic Plan, the evaluation of the capacity of the Secretariat, the impact of private standards, the management of the Trust Fund for the Participation of Developing Countries and Countries in Transition in the Work of the Codex Alimentarius, as well as financial and budgetary issues. At this Session, the Commission will elect a chairperson and three vice chairpersons. Prior to the Commission meeting, the Executive Committee will meet at its Sixty-fourth Session on June 26–July 2, 2010. It is composed of the chairperson; vice-chairpersons; seven members elected from the Commission from each of the following geographic regions: Africa, Asia, Europe, Latin America and the Caribbean, Near East, North America, and South-West Pacific; and regional coordinators from the six regional committees. The United States is the elected representative from North America. The Executive Committee will conduct a critical review of the elaboration of Codex standards; review a study on the speed of the Codex standard-setting process, consider the Codex Strategic Plan and the capacity of the Secretariat; consider a business plan for Codex; review matters arising from reports of Codex Committees and proposals for new work, and review the FAO/WHO Trust Fund for Enhanced Participation in Codex.

Responsive Agency: USDA/FSIS.
U.S. Participation: Yes.

Codex Committee on Residues of Veterinary Drugs in Foods

The Codex Committee on Residues of Veterinary Drugs in Foods (CCRVDF)
determines priorities for the consideration of residues of veterinary drugs in foods and recommends Maximum Residue Limits (MRLs) for veterinary drugs. The Committee also develops codes of practice, as may be required, and considers methods of sampling and analysis for the determination of veterinary drug residues in food. A veterinary drug is defined as any substance applied or administered to a food producing animal, such as meat or milk producing animals, poultry, fish or bees, whether used for therapeutic, prophylactic or diagnostic purposes, or for modification of physiological functions or behavior.

A Codex Maximum Limit for Residues of Veterinary Drugs is the maximum concentration of residue resulting from the use of a veterinary drug (expressed in mg/kg or ug/kg on a fresh weight basis) that is recommended by the Codex Alimentarius Commission to be permitted or recognized as acceptable in or on a food. An MRL is based on the type and amount of residue considered to be without any toxicological hazard for human health as expressed by the Acceptable Daily Intake (ADI) or on the basis of a temporary ADI that utilizes an additional safety factor. The MRL also takes into account other relative public health risks as well as food technological aspects.

When establishing an MRL, consideration is also given to residues that occur in food of plant origin or the environment. Furthermore, the MRL may be reduced to be consistent with good practices in the use of veterinary drugs and the extent that practical analytical methods are available.

An Acceptable Daily Intake (ADI) is an estimate by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) of the amount of a veterinary drug, expressed on a body weight basis, which can be ingested daily over a lifetime without appreciable health risk.

The 18th Session of the Committee met in Natal, Brazil, on May 11–15, 2009. The reference document is ALINORM 9/32/31. The results of the 18th session of the CCRVDF were considered by the Commission at its 32nd Session in July 2009. The reference document is ALINORM 09–32–REP. A meeting of the CCRVDF has not occurred since the last session of the Commission. The following items will be considered at the 33rd session of the Commission in July 2010.

To be considered for final adoption at Step 8:
- Draft MRL for Bovine Somatotropin in cattle.
- Draft MRLs for Ractopamine in pigs and cattle.

At the 18th session of the CCRVDF, the Committee completed a Priority List of Veterinary Drugs Requiring Evaluation or Re-evaluation by JECFA. These drugs are Monepantel (establishment of ADI and recommended MRLs in sheep), Monensin (re-evaluation of MRL in cattle), Derquantel (establishment of ADI and recommended MRLs in sheep), and Ractopamine (review of depletion data in pig tissues). The JECFA is currently evaluating the data for Ractopamine and will report the results of its evaluation to the 33rd session of the Commission.

The Committee will continue work on the following:
- Draft MRLs for Narasin in cattle and pigs.
- Draft MRLs for Tilmicosin in chicken and turkeys.
- A project document on risk management recommendations for veterinary drugs for which no ADI or MRL has been recommended by JECFA.
- The United States leads an electronic Working Group to define the scope for the work.
- Responsible Agencies: HHS/FDA/CVM; USDA/FSIS.
- U.S. Participation: Yes.

**Codex Committee on Contaminants in Foods**

The Codex Committee on Contaminants in Foods (CCCF) establishes or endorses permitted maximum levels, and, where necessary, revises existing guidelines levels for contaminants and naturally occurring toxicants in food and feed; prepares priority lists of contaminants and naturally occurring toxicants for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives; considers and elaborates methods of analysis and sampling for the determination of contaminants and naturally occurring toxicants in food and feed; and provides a summary of possible risk management options including the feasibility of setting MLs in rice for consideration at the next session (China).

- Prepare a discussion paper concerning risk management options in relation to new risk assessment outcomes (United States).

- Prepare a discussion paper on the occurrence of ochratoxigenic fungi and Ochratoxin A (OTA) in cocoa to assess whether a code of practice should be developed (Ghana and Brazil).

- Prepare a discussion paper to conduct a review of furan exposure, its toxicities, and available technologies to reduce Furan in foods with a view to exploring the possibility of developing a code of practice (United States).

- Prepare a discussion paper to examine the chemistry of pyrrolizidine alkaloids, their toxicity, available methods of analysis for detecting pyrrolizidine alkaloids; occurrence in Brazil nuts and shelled, destined for further processing Brazil nuts (including sampling plan).

- Proposed draft revision of the Code of Practice for the Prevention and Reduction of Aflatoxin Contamination (Tree Nuts) (appendix on Additional Measures for Brazil Nuts)

The Committee is continuing to work on:
- Proposed draft Code of Practice for the Reduction of Ethyl Carbanate in Stone Fruit Distillates, which was returned to Step 3 for further comments.
- Proposed draft maximum level for Melamine in liquid infant formula at Step 3.
- Discussion paper on Types of Mycotoxins and Mycotoxin-Producing Fungi found in Sorghum and the Levels of Mycotoxins in Sorghum.

The Committee agreed to the following new work, pending approval by the Executive Committee:
- Draft maximum levels for Deoxynivalenol (DON) and its acetylated derivative in cereals and cereal-based products (Canada).
- Draft maximum levels for total Aflatoxins in dried figs (Turkey).

The Committee agreed to establish the following electronic working groups to:
- Develop recommended MLs for substances in natural mineral waters and determine whether safety parameters should be integrated into the General Standard for Contaminants and Toxins in Food and Feed (GSC/TF) or retained in the standard for Natural Mineral Waters (United States and The Netherlands).
- Prepare a discussion paper that would review the current state of knowledge regarding Arsenic and provide a summary of possible risk management options including the feasibility of setting MLs in rice for consideration at the next session (China).

- Prepare a discussion paper on the occurrence of ochratoxigenic fungi and Ochratoxin A (OTA) in cocoa to assess whether a code of practice should be developed (Ghana and Brazil).
- Prepare a discussion paper to conduct a review of furan exposure, its toxicities, and available technologies to reduce Furan in foods with a view to exploring the possibility of developing a code of practice (United States).

plants, food and feed; and the carry-over from feed to food (The Netherlands).

- Proposals on descriptions of the food/feed for which a maximum level applies and to screen the existing MS and provide, where necessary, a clearer description of the food/feed to which the ML applies (European Union).

The Committee decided to suspend work on the proposed draft ML and sampling plans for Fumonisins in Maize and Maize-products until further advice was provided by JECFA.

**Responsible Agencies:** HHS/FDA; USDA/FSIS.

**U.S. Participation:** Yes.

### Codex Committee on Food Additives

The Codex Committee on Food Additives (CCFA) establishes or endorses acceptable maximum levels for individual food additives; prepares a priority list of food additives for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives (JECFA); assigns functional classes to individual food additives; recommends specifications of identity and purity for food additives for adoption by the Commission; considers methods of analysis for the determination of additives in food; and considers and elaborates standards or codes for related subjects such as the labeling of food additives when sold as such. The 42nd Session of the Commission met in Beijing, China, March 15–19, 2010. The relevant document is ALINORM 10/33/12. Immediately prior to the Plenary session, there was a 1-day physical Working Group on the General Standard for Food Additives (GSFA) chaired by the United States. The following items will be considered by the 33rd Session of the Commission in July 2010.

**To be considered for adoption at Steps 8 and 5/8:**

- Draft and proposed draft food additive provisions and amendments to the GSFA.
- Proposed draft Guidelines on Substances Used as Processing Aids (N14–2008).
- Amendments to the International Numbering System (INS) for Food Additives.
- Specifications for the Identify and Purity of Food Additives arising from the 71st JECFA meeting.

**Other matters to be considered for adoption:**

- Amendments to revise the name and descriptors of food categories 06.0, 06.2, and 06.2.1 (concerning cereals and flours) of the GSFA.
- Deletion of Note 180 (“Expressed as beta-carotene.”) in all adopted and proposed provisions for Carotenoids, and Carotene, beta- (vegetable), beta-(vegetable) of the GSFA.
- Amendment to the provision of Ascorbyl Esters in food category 13.2 (Complementary foods for infants and young children) of the GSFA.
- Amendments associated with Notes 130 and 133 to correct inconsistencies related to the provisions phenolic antioxidants (butylated hydroxyanisole, butylated hydroxytoluene, propyl gallate, and tertiary butylhydroquinone).
- Amendment to the text of Note 136 (“For use in white vegetables only.”) associated with certain provisions for Sulfites.
- Amendment to Section 2 “Table of functional classes, definitions and technological purposes” of the INS (CAC/GL 36–1989).

**To be considered for revocation:**

- Food additive provisions of the GSFA.
- Inventory of Processing Aids (CAC/ MISC 3).

**To be considered for discontinuation:**

- Several draft and proposed draft food additive provisions of the GSFA.
- To be considered for approval:
  - Project document proposing new work on the revision of the food category system of the GSFA.
  - Project document proposing new work on the revision of Standard for Food Grade Salt (CODEX STAN 150–1985).
- Priority list of compounds proposed for evaluation by JECFA.

**The Committee established electronic Working Groups (eWGs) to:**

- Review Section 4 of the Preamble of the GSFA (Carry-over of Food Additives into Food) with the view to analyze inconsistencies between this Section and the “Carry-over Principle” in Volume 1 of the Codex Alimentarius and to consider the need to revise Section 4 of the Preamble to the GSFA (Brazil).
- Prepare proposed draft provisions for lauric arginate ethyl esters, steviol glycosides, and sulfites. This eWG would also prepare recommendations for all provisions of erythrosine (United States).
- Prepare a discussion paper containing proposals for criteria and conditions on the use of Note 161 (“Subject of national legislation of the importing country aimed, in particular, at consistency with Section 3.2 of the Preamble.”) in the GSFA (Netherlands).
- Prepare a discussion paper on the development of a proposal for a re-evaluation process of substances in light of new data and new scientific developments in risk assessment (JECFA Secretariat).

**Responsible Agency:** HHS/FDA. **U.S. Participation:** Yes.

### Codex Committee on Pesticide Residues

The Codex Committee on Pesticide Residues recommends to the Codex Alimentarius Commission establishment of maximum limits for pesticide residues for specific food items or in groups of food. A Codex Maximum Residue Limit for Pesticide (MRLP) is the maximum concentration of a pesticide residue (expressed as mg/kg) recommended by the Codex Alimentarius Commission to be legally permitted in or on food commodities and animal feeds. Foods derived from commodities that comply with the respective MRLPs are intended to be toxicologically acceptable. That is, consideration of the various dietary residue intake estimates and determinations, both at the national and international level, in comparison with the Acceptable Daily Intake (ADI), should indicate that foods complying with Codex MRLPs are safe for human consumption. Codex MRLPs are primarily intended to apply in international trade and are derived from
reviews conducted by the Joint Meeting on Pesticide Residues (JMPR).

The 41st Session of the Committee met in Beijing, China, on April 19–24, 2010. The relevant document is ALINORM 10/33/24. The following items will be considered by the Commission at its 33rd Session in July 2010.

To be considered for adoption at Step 8:
• Draft and revised draft Maximum Residue Limits for pesticide/commodity combinations: Benalaxyl (7 commodities), Bosalcid (1 commodity), Carbofuran (4), Carbosulfan (4), and Methomyl (1)

To be considered at Step 5/8:
• Proposed draft and revised draft Maximum Residue Limits for pesticide/commodity combinations: Benalaxyl (7 commodities), Bosalcid (1 commodity), Carbofuran (4), Carbosulfan (4), and Methomyl (1)

To be considered for adoption at Step 5/8:
• Proposed draft Guidelines on Performance Criteria and Validation of Methods for Detection, Identification, and Quantification of Specific DNA Sequences and Specific Proteins in Foods.

• Methods of Analysis in Codex Standards at Different Steps, including Methods of Analysis for Natural Mineral Waters.

• Proposed draft Revised Guidelines for Measurement Uncertainty.

The Committee agreed to establish an electronic working group to develop a discussion paper on Procedures for Conformity Assessment and Resolution of Disputes, Taking into Account Proficiency, as well as quality assurance guidelines or related texts for the assessment of food laboratory proficiency, as well as quality assurance systems for laboratories.

The 31st Session of the Committee met in Budapest, Hungary, March 8–12, 2010. The relevant document is ALINORM 10/33/23. The following items will be considered for adoption by the 32nd Session of the Commission in July 2010.

To be considered for final adoption at step 5/8:
• Proposed draft Principles and Guidelines for the Conduct of Foreign On-site Audits and Inspections.

The Committee will continue working on:
• Proposed draft Principles and Guidelines for the Conduct of Assessments of Foreign Official Inspection and Certification Systems. Responsible Agencies: HHS/FDA; USDA/FSIS.

U.S. Participation: Yes.

Codex Committee on General Principles

The Codex Committee on General Principles deals with procedures and general matters as are referred to it by the Codex Alimentarius Commission. Such matters have included the review and endorsement of procedural revisions to the Codex Procedural Manual; the development of a mechanism for examining any economic impact statements submitted by governments concerning possible implications for their economies of some of the individual standards or some of the provisions thereof; and the establishment of a Code of Ethics for International Trade in Food.

The Committee held its 26th Session in Paris, France, on April 12–16, 2010. The reference document is ALINORM 10/33/33. The following will be considered by the Commission at its 33rd Session in July 2010:

To be considered for final adoption at Step 8:
• Draft revised Code of Ethics for International Trade in Food including Concessional and Food Aid Transactions Amendments to the Codex Procedural Manual.

• Proposed amendment to the Guidelines to Chairpersons of Codex Committees and Ad Hoc Intergovernmental Task Forces.
• Proposed amendment to the Guidelines to Host Governments of Codex Committees and Ad Hoc Intergovernmental Task Forces.
  Responsible Agencies: USDA/FSIS; HHS/FDA.
  U.S. Participation: Yes.

Codex Committee on Food Labeling
The Codex Committee on Food Labeling drafts provisions on labeling applicable to all foods; considers, amends, and endorses draft specific provisions prepared by the Codex Committees drafting standards, codes of practice, and guidelines; and studies specific labeling problems assigned by the Codex Alimentarius Commission. The Committee also studies problems associated with the advertisement of food with particular reference to claims and misleading descriptions.

The Committee held its 38th Session in Quebec City, Canada, on May 3–7, 2010. The reference document is ALINORM 10/33/22. The following items are to be considered by the 32nd Session of the Commission in July 2010.

To be considered at Step 5/8:
• Proposed draft Criteria/Principles for Legibility of Nutrition Labels.
• Editorial amendments to several standards, specifically:
  • Section 4.2.3.3 of the General Standard for the Labeling of and Claims for Prepackaged Foods (Codex Standard 1–1985) with the Codex International Numbering System in CAC/GL 36–1989.
• Editorial amendments to guidelines for the production, processing, labeling and marketing of organically produced foods (CAC/GL 32–1999) (other uses of ethylene).

The Committee will continue to work on:
• Proposed draft revision of the Guidelines on Nutrition Labeling (CAC/GL 2–1985) concerning the list of nutrients that are Always Declared on a Voluntary or Mandatory Basis (at Step 5 of the procedure).
• Proposed draft recommendations for the labeling of foods obtained through certain techniques of genetic modification/genetic engineering (at Step 3 of the procedure).
• Draft amendment to the General Standard for the Labeling of Prepackaged Foods (at Step 6).
• Draft amendment to the Guidelines for the Production, Processing, Labeling and Marketing of Organically Produced Food (CAC/GL 32–1999). Section 5.1 relating to other uses of ethylene (at Step 7).

Responsible Agencies: HHS/FDA; USDA/FSIS.
U.S. Participation: Yes.

Codex Committee on Food Hygiene
The Codex Committee on Food Hygiene (CCFH) develops basic provisions on food hygiene applicable to all food; considers, amends if necessary, and endorses provisions on food hygiene prepared by Codex commodity committees and contained in Codex commodity standards; considers, amends if necessary, and endorses (unless otherwise directed by the Codex Alimentarius Commission) provisions on food hygiene prepared by Codex commodity committees and contained in Codex codes of practice; develops provisions on food hygiene applicable to specific food items or food groups, whether coming within the terms of reference of a Codex commodity committee or not; considers specific food hygiene problems assigned to it by the Commission; suggests and prioritizes areas where there is a need for microbiological risk assessment at the international level and develops questions to be addressed by the risk assessors; and considers microbiological risk management matters in relation to food hygiene and in relation to FAO/WHO risk assessments.

The 41st Session of the CCFH met in San Diego, California, on November 16–20, 2009, and is summarized in the report number ALINORM 10/33/13. The following items related to the activities of the CCFH will be considered by the Commission at its 33rd Session in July 2010.

Ad Hoc Intergovernmental Task Force on Antimicrobial Resistance

The ad hoc Intergovernmental Task Force on Antimicrobial Resistance was created by the 29th Session of the Commission.

The Task Force, hosted by the Republic of Korea, has a time frame of four sessions, which started with its first meeting in October 2007. Its objective is to develop science-based guidance to be used to assess the risks to human health associated with the presence in food and feed, including aquaculture, and the transmission through food and feed of antimicrobial resistant microorganisms and antimicrobial resistance genes and to develop appropriate risk management advice based on that assessment to reduce such risk. In this process, work undertaken in this field at national, regional, and international levels should be taken into account.

The 3rd Session of the Task Force met in Jeju, Republic of Korea, on October 12–16, 2009. The relevant document is Alinorm 10/33/42.

The Task Force is continuing work on:

- Proposed draft Guidelines for Risk Analysis of Foodborne Antimicrobial Resistance.
- Responsible Agencies: HHS/FDA; USDA/FSIS.
- U.S. Participation: Yes.

FAO/WHO Regional Coordinating Committees

The FAO/WHO Regional Coordinating Committees define the problems and needs of each of the regions concerning food standards and food control; promote exchange of information on proposed regulatory initiatives and problems arising from food control and stimulate the strengthening of food control infrastructures; recommend to the Commission the development of worldwide standards for products of interest to the region, including products considered by the Committees to have an international market potential in the future; develop regional standards for food products moving exclusively or almost exclusively in intra-regional trade; promote coordination of all regional food standards work undertaken by international governmental and non-governmental organizations within each region; exercise a general coordinating role for each of the regions; and promote the use of Codex standards and related texts by members.
