

facility and they are being asked not to talk to an old friend. Living in America gives us the right to freedom of speech, but Bemis and the DOJ is trying to take that away. Give the people of the plant some dignity and sympathy, you are destroying a successful plant that through the years has brought business into the community of Menasha, and to the local cheese manufactures of the surrounding area.

The City of Menasha spent millions of dollars five years ago to bring more and new equipment into the Menasha facility. The city funded part of the expense to reroute the city street to make Menasha Plant a growth of opportunity. The community of Menasha found this to be a great addition to their city. It brought jobs to the area, revenue to local businesses, and a sense of pride back to their community. Bemis and the DOJ has taken all of that away. It was not only in the best interest of the employees at Alcan but it was in the best interest of Menasha to keep this plant going.

I hope that the DOJ takes a closer look at the destruction that Bemis has caused. Look at what this will do to the surrounding area and how it will affect the City of Menasha. This acquisition did not have to take place as it did. Bemis could have chosen to leave Menasha Plant alone and let them strive to be a small but competitive business. Leave the employees in tact and let the business make or break on its own. Bemis has toured the plant and taken everything they desired from it, they have taken knowledgeable people and trades and will survive. Now it seems as though their final goal is too bury Remedy Company and soon after the wax business will come to an end.

Sincerely,

A Concerned Menasha Citizen

Dear Maribeth Petrizzi,

I am writing in concern of the Bemis/Alcan acquisition, and currently work within the Menasha Plant where complete chaos takes place on a daily basis. It was the employees understanding that this transition is not to interrupt the work on either side of the sale. Unfortunately everyday is a battle zone, management is very cut throat on daily work supplies and tools that are needed by each side to conduct business as usual. There are supervisors and managers hoarding things just so others can not use them. There is bitterness throughout the plant and unrespectable and unprofessional talk among everyone. This plant has been very successful over the years and that is due to the loyalty and companionship that coworkers have with each other. Since Bemis has taken over this building it has mined long time friendships and reputations of managers and supervisors that were once respected. We have a Plant Manager and an Operations Manager on opposite sides of the fence now and it leads to baffles on a daily basis.

Employees have lost a lot since this purchase was allowed, customers are disappointed that Bemis has the advantage, and the community of Menasha, Wisconsin is losing a great plant that brings money into their community.

I am disappointed in the decision that the Department of Justice came to. This plant should not be divided and can only survive as one. Relocating departments from this mill is detrimental to the success of the remaining Menasha Plant. Bemis seems to be doing everything in their power to make sure that Menasha no longer will exist. Back in November of 2009 Bemis came in and met with potential employees and said that we were very valuable employees to them, that they cared about us. I would like to know when the caring comes into play. They are currently forcing some of the people that they have chosen to stay with them to work 12 hours a day seven days a week. They also do not allow for personal days during this time nor will they excuse any doctor's appointments that you may have scheduled. Many of these employees do not have regular scheduled shifts and it is very difficult to schedule appointments, as you well know some doctors require you to schedule appointments anywhere from three to six months in advance. Bemis claims they care about your health and want you to be healthy but yet I can not be a half hour late for work or I will be disciplined with an occasion. Five occasions are allowed within a year's timeframe and it takes you a year from the date of a call in to get that occasion back. Life today is busy and fast paced, people need to live life and enjoy it. Yet I can not understand how I am to enjoy my life working seven days a week twelve hours a day and expect to function normally. Granted this system is not suppose to remain for long, but who has given them a timeline for how long they can abuse employees. We are humans, not animals! It is offensive to work for such an employer that cares nothing about life and family.

I am in hopes that this hostile takeover ends in peace and that the DOJ reconsiders their proposal. This plant has always been a success story for the company and community and now it has turned into a bloody battle field. I believe that it is in the best interest of everyone including the DOJ to reconsider the ruling that was made. How would you like to walk into a war zone everyday wondering who is going to belittle you and who was going to be respectable to you? It's a question that employees should not even have to think about.

Sincerely,

Sheri Lemmers

Dear Friend,

This letter is in regards' to your decision in the Bemis acquisition of Alcan. I am an employee of the Alcan plant in Menasha and the decision to split our plant into two separate plants is a death sentence for many of us maybe all of us. Our plant was an

example of how an America plant can be successful. Put now we are being forced to be split the plant and compete against our self. Bemis should have been allowed to have the whole plant or non of it. I am not great at writing letters if you would give me ten minutes of your time I could explain this better. PLEASE call me. I strongly encourage you to change your decision, I need this job not an unemployment check. Let Bemis have the Menasha plant.

Sincerely,
Stuart S. Springstube
