Needs and Uses: 47 CFR 73.3550 provides that all requests for new or modified call signs be made via the on-line call sign reservation and authorization. The Commission uses an on-line system, FCC Form 380, for the electronic preparation and submission of requests for the reservation and authorization of new and modified call signs. Access to the call sign reservation and authorization system is made by broadcast licensees and permittees, or by persons acting on their behalf, via the Internet's World Wide Web. This on-line, electronic call sign system enables users to determine the availability and licensing status of call signs; to request an initial, or change an existing, call sign; and to determine and submit more easily the appropriate fee, if any. Because all elements necessary to make a valid call sign reservation are encompassed within the on-line system, this system prevents users from filing defective or incomplete call sign requests. The electronic system also provides greater certitude, as a selected call sign is effectively reserved as soon as the user has submitted its call sign request. This electronic call sign reservation and authorization system has significantly improved service to all

radio and television broadcast station licensees and permittees.

Needs and Uses: Under Section 223 of the Act, common carriers are required, to the extent technically feasible, to prohibit access to obscene or indecent communications from the telephone of a subscriber who has not previously requested such access in writing, if the carrier collects charges from subscribers for such communications. 47 CFR 64.201 implements Section 223 of the Act and also includes the following information collection requirements: (1) Adult message service providers notify their carriers in writing of the nature of their service; and (2) A provider of adult

message services request that its carriers identify these services as such in bills to their subscribers.
