

additional consideration of the prior art or raise utility, enablement, or written description issues not considered during examination of the allowable elected claims.

Separately, the Office is also considering instructing examiners that when all claims directed to an elected invention are allowable, nonelected claims must be considered for rejoinder and withdrawal of the restriction requirement. In making this decision, examiners must reevaluate both aspects of the restriction requirement, *i.e.*, whether the nonelected invention(s) as now claimed are independent or distinct from the claim(s) to the allowable elected invention and whether there would be a serious burden if the nonelected inventions were rejoined.

6. *What other areas of restriction practice can the Office improve and how?* While the Office has set forth particular restriction practice issues for which comments are specifically being requested, the Office is in this request for comments inviting comments on any area in which restriction practice could be improved.

Type of Review: Revision.
Title: Annual Mandatory Collection of Elementary and Secondary Education Data for ED*Facts*.

Frequency: Annually.
Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 7,059.

Burden Hours: 1,113,034.

Abstract: ED*Facts* is in the implementation phase of a multiple year effort to consolidate the collection of education information about States, Districts, and Schools in a way that improves data quality and reduces paperwork burden for all of the national education partners. In order to minimize the burden on the data providers, ED*Facts* seeks the transfer of the proposed data as soon as it has been processed each year for State, District, and School use. These data will then be stored in ED*Facts* and accessed by Federal education program managers and analysts as needed to make program management decisions. This process will eliminate redundant data collections while providing for the timeliness of data submission and use.
