Defense Federal Acquisition Regulation Supplement; Multiyear Contract Authority for Electricity From Renewable Energy Sources (DFARS Case 2008–D006)

AGENCY: Defense Acquisition Regulations System; Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: DoD is issuing an interim rule to implement section 828 of the National Defense Authorization Act for Fiscal Year 2008. Section 828 authorizes the Secretary of Defense to enter into a contract for a period not to exceed 10 years for the purchase of electricity from sources of renewable energy.

DATES: Effective Date: June 21, 2010. Comment Date: Comments on the interim rule should be submitted in writing to the address shown below on or before August 20, 2010, to be considered in the formation of the final rule.

ADDRESSES: Submit comments identified by DFARS Case 2008–D006 by any of the following methods:
• E-mail: dfars@osd.mil.

The rule is available at http://www.regulations.gov.

For further information contact: Ms. Cassandra Freeman, OSIP (AT&L) DPAP/DARS, Room 3B855, 3060 Defense Pentagon, Washington, DC 20330–3060.

All comments received will be posted to http://www.regulations.gov, including any personal information provided.

B. Regulatory Flexibility Act

DoD has prepared an initial regulatory flexibility analysis consistent with 5 U.S.C. 604. The analysis is summarized below and a copy may be obtained from the point of contact specified herein. There are a very limited number of small businesses engaged in the sale of energy-related services to include the sale of renewable energy. Those small businesses that engage in energy-related activities tend to have more than one area of competency, such as fossil fuel electric power, distribution of electric power, or other electric power generation, etc. With the potential overlap of competencies, it is very likely that a small business may have more than one of these competencies, thereby reducing the number of small businesses in these areas. The market for renewable fuels is highly volatile and does not have the predictability as compared to other fuel markets. Renewable energy and alternative fuel projects are capital-intensive investments, and involve the construction of production facilities which provides limitations to small entities. At this time, DoD is unable to estimate the number of small entities to which this rule will apply. DoD invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

SUPPLEMENTARY INFORMATION:

A. Background

This interim rule implements section 828 of the National Defense Authorization Act for Fiscal Year 2008 (Pub. L. 110–181). It amends DFARS parts 217 and 241 to authorize the Department of Defense to enter into a contract for a period not to exceed 10 years for the purchase of electricity from sources of renewable energy, as that term is defined in section 203(b)(2) of the Energy Policy Act of 2005 (42 U.S.C. 15852(b)(2)). DoD may exercise this authority to enter into a contract for a period in excess of five years only if the head of the contracting activity determines, on the basis of a business case analysis prepared by DoD, that—
(1) The proposed purchase of electricity under such contract is cost effective; and
(2) It would not be possible to purchase electricity from the source in an economical manner without the use of a contract for a period in excess of five years.

This rule was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.
