SUPPLEMENTARY INFORMATION:

Title: Cotton Ginning Survey.

OMB Control Number: 0535-0220.

Expiration Date of Approval: November 30, 2010.

Type of Request: Intent To Seek Approval To Revise and Extend an Information Collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture. The Cotton Ginning surveys provide cotton ginning statistics from August through February by State to aid in forecasting cotton production. Data collected consists of bales of cotton ginned to date, cotton to be ginned, lint cotton produced, cottonseed produced, cottonseed sold to oil mills, cottonseed used for other uses, number of gins by type, bales produced by county of origin, and cottonseed prices received by producers. The forecasting procedure involves calculating a weighted percent ginned to date as well as an allowance for cross-State movement and bale weight adjustments. Production by State allows adjustments for year-end State and county estimates. Total pounds of lint cotton produced is used to derive an actual bale weight which increases the precision of production estimates.

Authority: These data will be collected under authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA), *Federal Register*, Vol. 72, No. 115, June 15, 2007, p. 33376.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 6 minutes per response.

Respondents: Cotton Ginners.

Estimated Number of Respondents: 750.

Estimated Total Annual Burden on Respondents: 950 hours.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological, or other forms of information technology collection techniques.
