The principal focus of the refuge is on providing a wintering area for ducks and geese that use the Arkansas River corridor as they migrate along the Mississippi and Central Flyways. The number of waterfowl on the refuge in any given year varies, depending on water levels and weather conditions further along the flyways. However, it is not uncommon for the refuge to host up to 100,000 ducks and geese at once during the winter months. Mallards are the most abundant, but at least 18 species of ducks and 4 species of geese have been observed on the refuge.

More than 40,000 people visited the refuge in 2009. Almost half of these visitors came to the refuge to watch wildlife; bald eagles are an important draw. The refuge also provides opportunities for wildlife observation, wildlife photography, and environmental education and interpretation. There are opportunities for hunting and fishing as well, although these activities are limited to ensure that they are compatible with refuge purposes.

We announce our decision and the availability of the final CCP and FONSI for Holla Bend NWR in accordance with the National Environmental Policy Act (NEPA) [40 CFR 1506.6(b)] requirements. We completed a thorough analysis of impacts on the human environment, which we included in the draft comprehensive conservation plan and environmental assessment (Draft CCP/EA). The CCP will guide us in managing and administering Holla Bend NWR for the next 15 years. Alternative D is the foundation for the CCP.

The compatibility determinations for hunting, fishing, wildlife observation and photography, environmental education and interpretation, all-terrain vehicle use, cooperative farming, commercial fishing, haying, research studies, and trapping are available in the CCP.

**Background**

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

**Comments**

Approximately 100 copies of the Draft CCP/EA were made available for a 30-day public review period as announced in the Federal Register on January 8, 2010 (75 FR 1073). Five public comments were received. The Draft CCP/EA identified and evaluated four alternatives for managing the refuge.

**Selected Alternative**

After considering the comments we received, we have selected Alternative D for implementation. This alternative is judged to be the most effective management action for achieving the purposes of the refuge by optimizing habitat management and visitor services.

Refuge operations will be improved by balancing enhanced habitat and fish and wildlife population management and enhanced wildlife-dependent public use. This adaptive management alternative is basically concurrent implementation of selected enhancements from alternatives B (Enhanced Management of Habitat and Fish and Wildlife Populations) and C (Enhanced Management for Wildlife-Dependent Public Use), focusing on specific enhancements for which inherent linkages will result in greater benefits to the refuge and surrounding area than simple addition of the benefits of each enhancement implemented separately. For example, the baseline biological information developed under Alternative B will be useful in identifying opportunities to improve visitor experiences, and the increased volunteer support management developed under Alternative C will lead to increased efficiencies in collecting data on biological resources and responses (e.g., nuisance and invasive species occurrence, deer herd status, and evaluation of habitat management efforts) identified in Alternative B.

Habitat management will include converting 100 acres from agricultural production to grassland and scrub/shrub habitat; cooperative farming will continue on 1,200 acres. To the extent possible, crops will be converted to preferred waterfowl foods. We will monitor acreage of invasive plants and develop a strategy to eliminate non-
Native plants. Enhancements in the management of moist-soil habitat will include developing complete water control capability on all moist-soil unit acreage and use of periodic disturbance to set back succession. Further, we will pursue cooperative projects to improve habitat quality on 500 acres of open water. Waterfowl usage and shorebird response to habitat management also will be monitored.

Wildlife-dependent recreation activities will be the same as under Alternative A (Current Management).

The two significant enhancements in the public use program will be development of an environmental education center and the addition of a park ranger (visitor services) position. These enhancements will greatly increase our capability and opportunity to conduct environmental education and interpretation programs, and to better utilize qualified volunteers in support of Holla Bend NWR’s mission and objectives. One function of the park ranger will be to develop a plan for recruiting and effectively managing volunteer support.

This alternative also will include the addition of an ADA-compliant fishing pier at Lodge Lake’s bank fishing area, development of a bird observation trail north of the refuge office, improvements to the Lodge Lake Trail and the loop to the Levee Trail, and selective vegetation management along refuge roads to improve wildlife viewing opportunities. Information kiosks, directional signs, parking lots, and other visitor use facilities also will be improved to the extent feasible. This will include determining the maximum number of archery hunters we can support and evaluating the feasibility of adding a dove hunt season.

Under this alternative, we will pursue opportunities that arise to purchase or exchange priority tracts within the refuge acquisition boundary, which includes 1,703 acres in private ownership distributed in numerous small tracts around the perimeter of the refuge. We will maintain the refuge as resources allow.

The staff will be made up of the following: refuge manager, deputy refuge manager, heavy equipment operator, office assistant, biologist, biological science technician, park ranger (public use), park ranger (law enforcement), refuge operations specialist, and heavy equipment mechanic.

Authority

Mark J. Musaus,

Acting Regional Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[45x78]Notice of Interim Final Supplementary Rules for Public Lands Managed by the California Desert District

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Interim Final Supplementary Rules.

SUMMARY: The Bureau of Land Management (BLM) California Desert District (CDD) Office and the five Field Offices within the CDD, are issuing interim final supplementary rules for public lands administered by the BLM. The BLM has determined these interim final supplementary rules are necessary to enhance the safety of visitors, protect public health, protect natural resources, and improve recreation experiences and opportunities.

DATES: The interim final supplementary rules are effective June 25, 2010 and remain in effect until modified or rescinded by the publication of the final supplementary rules. We invite comments until July 26, 2010. Comments postmarked or received in person after this date may not be considered in the development of the final supplementary rules.

ADDRESSES: You may submit comments by the following methods: Mail or hand-delivery: Lynnette Elser, Bureau of Land Management, California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, California 92553, phone: (951) 697–5233, or e-mail: lelser@ca.blm.gov.

FOR FURTHER INFORMATION CONTACT: Lynnette Elser, Planning and Environmental Coordinator, BLM, California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, California 92553, phone: (951) 697–5233, or e-mail: lelser@ca.blm.gov.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

You may mail or hand-deliver comments to Lynnette Elser, Planning and Environmental Coordinator, BLM, California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, California 92553. Written comments on the interim final supplementary rules should be specific, confined to issues pertinent to the interim final supplementary rules, and should explain the reason for any recommended change. Where possible, comments should reference the specific section or paragraph of the rule that the comment is addressing. The BLM is not obligated to consider or include in the Administrative Record for the interim final supplementary rule: (a) comments that the BLM receives after the close of the comment period (See DATES), unless they are postmarked or electronically dated before the deadline, or (b) comments delivered to an address other than those listed above (See ADDRESSES).

Comments, including names, street addresses, and other contact information of respondents, will be available for public review at the BLM’s CDD Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, California 92553, during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except Federal holidays. Before including your address, telephone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

II. Background

Visitors to the CDD encounter inconsistent rules regarding appropriate behavior in recreational areas. This inconsistency hampers the BLM’s ability to provide a safe family-orientated recreational experience for the visitors. The BLM is establishing these rules to provide a consistent set of rules for the BLM managed land within the CDD.

The BLM is establishing these interim final supplementary rules under the authority of 43 CFR 8365.1–6, which allows the BLM State Directors to establish such rules for the protection of persons, property, and public lands and resources.

The BLM finds good cause to publish these supplementary rules on an interim basis because of immediate public safety and resource protection needs within the management area. These supplementary rules will serve as an enforcement tool in minimizing resource impacts and enhancing visitor safety. An estimated 5 million visitors use these BLM administered lands, encompassing more than 11 million acres, each year for a large variety of...
