**II. Background**

*A. What Action is the Agency Taking?*

Pursuant to 40 CFR 155.58, this notice announces the availability of EPA's proposed registration review decision for the pesticide lauryl sulfate salts, case number 4061, and opens a 60-day public comment period on the proposed decision. Sodium lauryl sulfate (PC Code 079011) is the only active ingredient in case 4061. There is one registered product that contains sodium lauryl sulfate as an active ingredient. The product Kleenex® Brand Antiviral Tissues contains 2.02% sodium lauryl sulfate and is registered by Kimberly-Clark Global Sales, LLC (EPA Reg. No. 9402-10). The tissues also contain citric acid as an active ingredient at 7.51%. Products containing sodium lauryl sulfate as an active ingredient were first registered in 1948 and sodium lauryl sulfate is widely used as an intentionally-added inert ingredient in pesticide products.

The registration review docket for a pesticide includes earlier documents related to the registration review of the case. For example, the review opened with the posting of a summary document, containing a preliminary work plan, for public comment.

The documents in the initial docket described the Agency's rationales for not conducting additional risk assessments for the registration review of lauryl sulfate salts. This proposed registration review decision continues to be supported by those rationales included in documents in the initial docket.

Following public comment, the Agency will issue a final registration review decision for products containing lauryl sulfate salts.

The registration review program is being conducted under congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, required EPA to establish by regulation procedures for reviewing pesticide registrations, originally with a goal of reviewing each pesticide's registration every 15 years to ensure that a pesticide continues to meet the FIFRA standard for registration. The Agency's final rule to implement this program was issued in

August 2006 and became effective in October 2006, and appears at 40 CFR part 155, subpart C. The Pesticide Registration Improvement Act of 2003 (PRIA) was amended and extended in September 2007. FIFRA, as amended by PRIA in 2007, requires EPA to complete registration review decisions by October 1, 2022, for all pesticides registered as of October 1, 2007.

The registration review final rule at 40 CFR 155.58(a) provides for a minimum 60-day public comment period on all proposed registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the docket for lauryl sulfate salts. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

The Agency will carefully consider all comments received by the closing date and will provide a "Response to Comments Memorandum" in the docket. The final registration review decision will explain the effect that any comments had on the decision and provide the Agency's response to significant comments.

Background on the registration review program is provided at: [http://www.epa.gov/oppsrd1/registration\\_review](http://www.epa.gov/oppsrd1/registration_review). Links to earlier documents related to the registration review of this pesticide are provided at: [http://www.epa.gov/oppsrd1/registration\\_review/lauryl-sulfate/index.html](http://www.epa.gov/oppsrd1/registration_review/lauryl-sulfate/index.html).

#### *B. What is the Agency's Authority for Taking this Action?*

Section 3(g) of FIFRA and 40 CFR part 155, subpart C, provide authority for this action.
