II. Contractor Requirements

Under this contract number, the contractor will perform the following:

Under Contract No. EP10H001452, the contractor shall review and/or update approximately 280 Data Evaluation Records (DERs) per contract period to address the evaluation of endocrine-related effects cited in the Other Scientifically Relevant Information (OSRI). The contractor shall retrieve some or all of an estimated 6,000 journal articles cited in the OSRI that provide information on the endocrine disruption potential of the chemicals under consideration.

The Test Order Recipients may submit journal articles that will require review of published mammalian literature submitted as OSRI. Journal articles may be submitted for nine Tier 1 Assays. It is estimated that the submission may include up to 10 articles/assays x 9 per chemical x 67 chemicals for a total of 6,000 journals articles.

The contractor shall perform expert analyses of difficult and complex toxicological issues as defined in written technical direction from the Contracting Officer Representative (COR). The technical direction will provide key scientific questions and data sets, as appropriate, that the contractor shall analyze and answer. These analyses shall assess the overall significance of the findings as they relate to the expected human health effects. Such studies may focus on endocrinology (including endocrine disruption), epidemiology, immunology, cholinesterase inhibition, synergistic interaction, behavioral pharmacology biostatics, mode of action studies, and risk assessment. To conduct these complex analyses, the contractor shall identify expert scientists in the required scientific disciplines, convene and/or attend work groups or meeting to conduct coordinated reviews, conduct the workgroup or meetings, and prepare draft reports.

This contract involves no subcontractors.

OPP has determined that the contract described in this document involves work that is being conducted in connection with FIFRA, in that pesticide chemicals will be the subject of certain evaluations to be made under this contract. Needs and Uses: In the Order in PS Docket No. 06-229, FCC 10-79, the Commission grants, with conditions, 21 waiver petitions filed by public safety entities ("Petitioners") seeking early deployment of statewide or local public

safety broadband networks in the 700 MHz spectrum. This waiver serves the public interest by allowing state and local jurisdictions to begin broadband deployment and speed services to the public safety community. This will also allow the Petitioners to take advantage of available or potential funding, either through grants or planned budgetary expenditures, as well as to take advantage of economies of scale and other cost saving measures for deployments that are already planned. In addition, Petitioners could benefit from the announced plans of some commercial carriers to begin construction of LTE-based networks this year and early next year, which would result in significant cost-savings. On May 21, 2010, the Commission's Public Safety and Homeland Security Bureau released a Public Notice providing further guidance on the requirements set forth in the Order.

One of the conditions for such waiver is the submission of interoperability plans to the Commission's Emergency Response Interoperability Center ("ERIC"). The Commission recently decided to establish ERIC to promote appropriate technical requirements that will ensure interoperability for these early deployments from their inception, as well as for any future deployed networks. Given the rapidly evolving nature of 3GPP deployments and standards, submission of the Petitioners' interoperability plans will help ensure interoperability and roaming among these early deployments.

Another condition of waiver is certification by Petitioners that their vendors are participating actively in the PSCR/DC Demonstration Network which will provide an open platform for development and testing of public safety 700 MHz LTE broadband equipment. This is important to ensure that, early in the deployment stage, new broadband equipment is being developed to support the network meets public safety's use expectations, will work in a multivendor environment, and allows for roaming across multiple networks.

We also require each Petitioner to enter into a de facto spectrum lease with the Public Safety Spectrum Trust ("PSST") in accordance with the terms and conditions of the Order. These leases must be submitted for approval by the Commission's Chief of the Public Safety and Homeland Security Bureau within 60 days of approval by OMB.

We also require each Petitioner, before deployment, to coordinate and address interference mitigation needs without any adjacent or bordering jurisdictions that also plan deployment, memorialize these agreements in
