

solid waste landfill and changed the use of the site to a C&D landfill. At this time, the County would like to purchase the property it leased under the R&PPA as well as an additional 39.46 acres to be used as a source of material for cover and future expansion of the C&D landfill. These lands are being offered for direct sale to Madison County at no less than the appraised Fair Market Value of \$38,500. The sale meets the criteria for direct sale, pursuant to 43 CFR 2711.3-3, which allows direct sales when in the opinion of the authorized officer a competitive sale is not appropriate and the public interest would best be served by a direct sale, such as a sale to a State or local government.

Upon patent, if and when issued, the unreserved mineral interests will be conveyed simultaneously with the sale of the land. These unreserved mineral interests have been determined to have no known mineral values pursuant to 43 CFR 2720.2(a). Acceptance of the sale offer will constitute an application for conveyance of those unreserved mineral interests. The Purchaser will be required to pay a \$50.00 non-refundable fee for conveyance of the mineral interests.

The patent, if and when issued, will contain the following reservations, covenants, terms and conditions:

1. Rights-of-way for ditches and canals constructed by the authority of the United States will be reserved pursuant to the Act of August 30, 1890 (43 U.S.C. 945).

2. The conveyance will be subject to valid existing rights of record, including, but not limited to, those documented on the BLM public land records at the time of conveyance of the lands.

3. Pursuant to the requirements established by Section 120(h) of the Comprehensive Environmental Response, Compensation and Liabilities Act (CERCLA), 42 U.S.C. 9620(h), as amended by the Superfund Amendments and Reauthorization Act of 1988, (100 Stat. 1670), the patentee, its successors or assigns, by accepting a patent, will agree to indemnify, defend, and hold harmless the United States, its officers, agents, representatives, and employees (hereinafter "United States") from any costs, damages, claims, causes of action in connection with the patentee's use, occupancy, or operations on the patented real property. This agreement includes, but is not limited to, acts or omissions of the patentee and its employees, agents, contractors, lessees, or any third party arising out of, or in connection with, the patentee's use, occupancy, or operations on the patented real property which cause or

give rise to, in whole or in part: (1) Violations of Federal, State and local laws and regulations that are now, or may in the future become, applicable to the real property and/or applicable to the use, occupancy, and/or operations thereon; (2) judgments, claims, or demands of any kind assessed against the United States; (3) costs, expenses, or damages of any kind incurred by the United States; (4) releases or threatened releases of solid or hazardous waste(s) and/or hazardous substance(s), pollutant(s), or contaminant(s), and/or petroleum product(s) or derivative(s) of a petroleum product, as defined by Federal or State environmental laws; of, on, into, or under land, property, and other interests of the United States; (5) natural resource damages as defined by Federal and State law; or (6) other activities by which solid or hazardous substance(s) or waste(s), pollutant(s) or contaminant(s), or petroleum product(s) or derivative(s) of a petroleum product as defined by Federal or State environmental laws are generated, stored, used, or otherwise disposed of on the patented real property, and any cleanup response, remedial action, or other actions related in any manner to the said solid or hazardous substance(s) or waste(s) or contaminant(s), or petroleum product(s) or derivative(s) of a petroleum product as defined by Federal or State laws. Patentee shall stipulate that it will be solely responsible for compliance with all applicable Federal, State, and local environmental laws and regulatory provisions, throughout the life of the facility, including any closure and/or post-closure requirements that may be imposed with respect to any physical plant and or facility upon the real property under any Federal, State, or local environmental laws or regulatory provisions. This covenant shall be construed as running with the patented real property and may be enforced by the United States in a court of competent jurisdiction.

4. The conveyance will be also subject to additional terms and conditions that the authorized officer deems appropriate to ensure proper land use and protection of the public interest.
