3. *Current OMB approval number:* 3150-0104.

4. *The form number if applicable:* NRC Forms 366, 366A, and 366B.

5. *How often the collection is required:* On occasion, as defined reactor events are reportable as they occur.

6. *Who will be required or asked to report:* Holders of operating licenses for commercial nuclear power plants.

7. *An estimate of the number of annual responses:* An estimated 400 responses per year based on historical averages.

8. *The estimated number of annual respondents:* 104.

10. *Abstract:* With NRC Forms 366, 366A, and 366B, the NRC collects reports of the types of reactor events and problems that are believed to be significant and useful to the NRC in its efforts to identify and resolve possible threats to the public health and safety, or to the environment. The information reported on NRC Forms 366, 366A, and 366B is used by the NRC to confirm licensing bases, study potentially generic safety problems, assess trends and patterns of operating experience, monitor performance, identify precursors of more significant events, and provide operating experience feedback to the industry. These forms are designed to provide the information necessary for engineering studies of operational anomalies and trends and patterns analysis of abnormal occurrences. The same information is used for other analytic procedures that aid in identifying accident precursors.
