Comment and Upload File" field. USTR prefers submissions in Microsoft Word (.doc) or Adobe Acrobat (.pdf). If the submission is in an application other than those two, please indicate the name of the application in the “Comments” field.

For any proposals submitted electronically containing business confidential information, the file name of the business confidential version should begin with the characters “BC”. Any page containing business confidential information must be clearly marked “BUSINESS CONFIDENTIAL” on the top of that page. Filers of submissions containing business confidential information must also submit a public version of their proposals. The file name of the public version should begin with the character “P”. The “BC” and “P” should be followed by the name of the person or entity submitting the proposal. Filers submitting proposals containing no business confidential information should name their file using the character “P”, followed by the name of the person or entity submitting the comment or proposal.

Please do not attach separate cover letters to electronic submissions; rather, include any information that might appear in a cover letter in the proposals themselves. Similarly, to the extent possible, please include any exhibits, annexes, or other attachments in the same file as the submission itself, not as separate files.

USTR strongly urges submitters to file proposals through http://www.regulations.gov, if at all possible. Any alternative arrangements must be made with Ms. Blue in advance of transmitting a proposal. Ms. Blue should be contacted at (202) 395–3475. General information concerning the Office of the United States Trade Representative may be obtained by accessing its Internet Web site (http://www.ustr.gov).

Carmen Suro-Bredie,
Chairman, Trade Policy Staff Committee.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Doet No. FD 35385]

Oregon International Port of Coos Bay—Acquisition Exemption—Rail Line of Union Pacific Railroad Company in Coos County, OR

The Oregon International Port of Coos Bay (Port), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1150.41 to acquire approximately 22.37 miles of rail line, known as the Coquille Branch,1 from Union Pacific Railroad Company in Coos County, Or. The line extends between milepost 763.13, in Cordes, where it connects to track currently owned by the Port, and milepost 785.5, in Coquille, the end of the line.

The Port certifies that its projected annual revenues as a result of this transaction will not result in the creation of a Class II or Class I rail carrier and further certifies that its projected annual revenue will not exceed $5 million.

The earliest this transaction may be consummated is July 23, 2010, the effective date of the exemption (30 days after the exemption was filed).

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Petitions for stay must be filed no later than July 16, 2010 (at least 7 days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. 35385, must be filed with the Surface Transportation Board, 395 E Street, SW., Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Sandra L. Brown, 1920 N Street, NW., Suite 800, Washington, DC 20036.

Board decisions and notices are available on our Web site at http://www.stb.dot.gov.

Decided: July 2, 2010.

1The Port states that rail operations are currently suspended because the previous operator, Central Oregon & Pacific Railroad, Inc. (CORP), issued an embargo in 2007 and later obtained discontinuance authority over the line. See Central Oregon & Pacific Railroad, Inc.—Abandonment and Discontinuance of Service—in Coos, Douglas, and Lane Counties, Or.; Docket No. AB 515 (Sub-No. 2) (served Oct. 31, 2008). The Port further states that the line is not currently in operable condition, and thus significant repairs are required. Once the line becomes operational, the Port plans to have a third-party operator in place to provide service.
Maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA’s approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act, and is limited to the following determinations:

a. The Noise Compatibility Program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA’s approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, State, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA under the Airport and Airway Improvement Act of 1982, as amended. Where Federal funding is sought, requests for project grants must be submitted to the FAA Western-Pacific Region, San Francisco Airports District Office in Burlingame, California.

The City of Modesto submitted to the FAA on October 2, 2008, the Noise Exposure Maps for evaluation. The FAA determined that the Noise Exposure Maps were in compliance with applicable requirements on January 9, 2009. Notice of this determination was published in the Federal Register on January 26, 2009.

The Modesto City-County Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions. It was requested that the FAA evaluate and approve this material as a Noise Compatibility Program as described in 49 U.S.C. 47504 (formerly Section 104(b) of the Act). The FAA began its review of the program on December 9, 2009 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new or modified flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The Noise Compatibility Program recommended two noise abatement elements, four land use management elements and one program management element. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program was approved, by the Manager of the Airports Division, Western-Pacific Region, effective June 2, 2010.

Approval was granted for one Noise Abatement Element, four Land Use Management Elements and one Program Management Element. The approved measures included: Designate a commercial service hold area near midfield; Adopt the Modesto City-County Airport Part 150 Noise Compatibility Program by reference in the cities of Modesto and Ceres, and Stanislaus County General Plans; Consistently designate the area northwest of the airport within the City of Modesto and Stanislaus County General Plan; The City of Modesto should consider adopting an airport compatibility checklist for discretionary review of projects within its vicinity; Adopt the Noise Overlay Zone; and Update Noise Exposure Maps and Noise Compatibility Program.

The Noise Abatement Element—Pursue a change to the Department of Defense’s Instrument Flight Rule Supplement was disapproved for purposes of Part 150. The FAA disapproved the element due to lack of supporting analysis in the Noise Compatibility Plan. However, the disapproval does not prohibit the City of Modesto from working with the Department of Defense to revise the recommended operational hours in the Instrument Flight Rule Supplement on a voluntary basis.

The FAA determinations are set forth in detail in the Record of Approval signed by the Manager of the Airports Division, Western-Pacific Region, on June 2, 2010. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the Modesto City-County Airport. The Record of Approval also will be available on-line at: http://www.faa.gov/airports/environmental/airport_noise/part_150/states/.

Issued in Hawthorne, California, on June 18, 2010.

Brian Q. Armstrong,
Acting Manager, Airports Division, Western-Pacific Region, AWP–600.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance from certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner’s arguments in favor of relief.

Orange Empire Railway Museum

[Waiver Petition Docket Number FRA–2010–0102]

The Orange Empire Railway Museum (OERM) seeks a waiver of compliance from certain provisions of the Railroad Freight Car Safety Standards, 49 CFR 215.303, which requires stenciling of restricted cars; as well as 49 CFR 224.3, which requires Reflectorization for freight cars.
