Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register**, *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 75 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, July 13, 2010
9 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 75, No. 133
Tuesday, July 13, 2010

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0229; Directorate Identifier 2009–NM–115–AD; Amendment 39–16356; AD 2010–14–11]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Model DHC–8–400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

> Certain main landing gear components have experienced premature failure during certification testing. Revision has been made to the DHC–8–400 Maintenance Requirements Manual, Airworthiness Limitation Items, to incorporate the revised safe life limits for the main landing gear lock actuator assembly, retraction actuator assembly rod end and piston, and the upper bearing in the main landing gear shock strut assembly. Failure of these components could adversely affect the structural integrity of the main landing gear.

* * * * *

We are issuing this AD to require actions to correct the unsafe condition on these products.

DATES: This AD becomes effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 17, 2010.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Craig Yates, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7355; fax (516) 794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on March 17, 2010 (75 FR 12710). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

> Certain main landing gear components have experienced premature failure during certification testing. Revision has been made to the DHC–8–400 Maintenance Requirements Manual, Airworthiness Limitation Items, to incorporate the revised safe life limits for the main landing gear lock actuator assembly, retraction actuator assembly rod end and piston, and the upper bearing in the main landing gear shock strut assembly. Failure of these components could adversely affect the structural integrity of the main landing gear.
>
> This [Canadian airworthiness] directive is issued to ensure safe operation of the main landing gear during its service life.

The corrective actions include revising the Airworthiness Limitations section of the Instructions for Continued Airworthiness, replacing the upper bearing on certain airplanes, and replacing certain rod ends. You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow our FAA policies. Any such differences are highlighted in a Note within the AD.

Costs of Compliance

We estimate that this AD will affect 62 products of U.S. registry. We also estimate that it will take about 22 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $18,588 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $1,268,396, or $20,458 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures

the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–11 Bombardier, Inc.: Amendment 39–16356. Docket No. FAA–2010–0229; Directorate Identifier 2009–NM–115–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Bombardier, Inc. Model DHC–8–400, –401, and –402 airplanes, having serial numbers (S/Ns) 4001, 4003, 4004, 4006, and 4008 through 4227 inclusive, certificated in any category.

Note 1: This AD requires revisions to certain operator maintenance documents to include new inspections. Compliance with these inspections is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by these inspections, the operator may not be able to accomplish the inspections described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (j)(1) of this AD. The request should include a description of changes to the required inspections that will ensure the continued damage tolerance of the affected structure. The FAA has provided guidance for this determination in Advisory Circular (AC) 25.1529–1A.

Subject

(d) Air Transport Association (ATA) of America Code 32: Landing gear.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Certain main landing gear components have experienced premature failure during certification testing. Revision has been made to the DHC–8–400 Maintenance Requirements Manual, Airworthiness Limitation Items (ALI), to incorporate the revised safe life limits for the main landing gear lock actuator assembly, retraction actuator assembly rod end and piston, and the upper bearing in the main landing gear shock strut assembly. Failure of these components could adversely affect the structural integrity of the main landing gear.

This [Canadian airworthiness] directive is issued to ensure safe operation of the main landing gear during its service life.

The corrective actions include revising the Airworthiness Limitations section (ALS) of the Instructions for Continued Airworthiness, replacing the upper bearing on certain airplanes, and replacing certain rod ends.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Actions

(g) For Model DHC–8–400, –401, and –402 airplanes having S/Ns 4001, 4003, 4004, 4006, and 4008 through 4210 inclusive: Do the actions specified in paragraphs (g)(1) and (g)(2) of this AD.

(1) Within 60 days after the effective date of this AD: Revise the ALS of the Instructions for Continued Airworthiness by incorporating the revised structural safe life limit for the upper bearing having part number (P/N) 46114–1, as provided in Bombardier Temporary Revision (TR), ALI–82, dated August 15, 2008, to Part 2, Airworthiness Limitation Items, of the Bombardier Dash 8 Q400 Maintenance Requirements Manual (MRM), PSM 1–84–7. The initial compliance time for replacing the upper bearing is specified in paragraph (g)(2) of this AD.

(2) Replace the upper bearing having P/N 46114–1 with a new or serviceable upper bearing, in accordance with Goodrich Dressed Shock Strut Assembly Main Landing Gear Part No. 46100–29/–31/–33/–35/–37/–39/–41/–43/–45/–47/–49/–51/–53 and –55 Component Maintenance Manual with Illustrated Parts List 32–11–03, Revision 11, dated August 22, 2008, at the applicable time specified in paragraphs (g)(2)(i), (g)(2)(ii), and (g)(2)(iii), of this AD.

(i) For airplanes having accumulated fewer than 15,000 total flight cycles as of the effective date of this AD: Replace prior to the accumulation of 15,000 total flight cycles.

(ii) For airplanes having accumulated 15,000 total flight cycles or more, but fewer than 20,000 total flight cycles, as of the effective date of this AD: Replace prior to the accumulation of 20,000 total flight cycles.

(iii) For airplanes having accumulated 20,000 total flight cycles or more as of the effective date of this AD: Replace before further flight.

(h) For Model DHC–8–400, –401, and –402 series airplanes having S/Ns 4001, 4003, 4004, 4006, and 4008 through 4227 inclusive: Do the applicable actions specified in paragraphs (h)(1) and (h)(2) of this AD.

(1) Within 60 days after the effective date of this AD: Revise the ALS of the Instructions for Continued Airworthiness to incorporate the revised safe life limits for the retraction actuator assembly rod end having P/N P3A2750 and P3A2750–1; retraction actuator assembly piston having P/N 46570–5; lock actuator cylinder assembly having P/N 46601–1/–3; and lock actuator assembly having P/N 46600–1/–3/–5/–7; as provided in Bombardier TR ALI–89, dated March 27, 2009, to Part 2, Airworthiness Limitation Items, of the Bombardier Dash 8 Q400 MRM, PSM 1–84–7. The initial compliance time for the replacement is specified in the TR, except as provided by paragraph (h)(2) of this AD.

(2) For airplanes with a main landing gear retraction actuator assembly rod end that has accumulated more than 9,850 total flight cycles as of the effective date of this AD: Within 600 flight cycles after the effective date of this AD, replace any affected rod end having P/Ns P3A2750 and P3A2750–1 with a new or serviceable rod end, in accordance with Goodrich Dressed Shock Strut Assembly Main Landing Gear Part No. 46100–29/–31/–33/–35/–37/–39/–41/–43/–45/–47/–49/–51/

–53 and –55 Component Maintenance Manual with Illustrated Parts List 32–11–03, Revision 11, dated August 22, 2008.

(i) After accomplishing the revision specified in paragraph (g)(1) or (h)(1) of this AD, except as provided in paragraph (j) of this AD, no alternative replacement times may be approved for this part.

Note 2: The ALI revisions required by paragraphs (g) and (h) of this AD may be done by inserting copies of Bombardier TRs ALI–82 and ALI–89 into Part 2, Airworthiness Limitation Items, of the Bombardier Dash 8 Q400 MRM, PSM 1–84–7. When these TRs have been included in the general revision of the MRM, the general revision may be inserted into the MRM, provided the relevant information in the general revision is identical to that in Bombardier TRs ALI–82 and ALI–89.

FAA AD Differences

Note 3: This AD differs from the MCAI and/or service information as follows: The MCAI and service information do not contain replacement procedures for the upper bearings and rod ends. This AD requires replacing the upper bearings and rod ends in accordance with Goodrich Dressed Shock Strut Assembly Main Landing Gear Part No. 46100–29/–31/–33/–35/–37/–39/–41/–43/–45/–47/–49/–51/–53 and –55 Component Maintenance Manual with Illustrated Parts List 32–11–03, Revision 11, dated August 22, 2008.

Other FAA AD Provisions

(j) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs): The* Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, New York, 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

(4) *Special Flight Permits:* Special flight permits, as described in Section 21.197 and Section 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199), are allowed, provided that the actions required in paragraph (h) of this AD have been accomplished.

Related Information

(k) Refer to MCAI Canadian Airworthiness Directive CF–2009–17, dated April 22, 2009; Bombardier TR ALI–82, dated August 15, 2008, and Bombardier TR ALI–89, dated March 27, 2009, to Part 2, Airworthiness Limitation Items, of the Bombardier Dash 8 Q400 Maintenance Requirements Manual, PSM 1–84–7; and Goodrich Dressed Shock Strut Assembly Main Landing Gear Part No. 46100–29/–31/–33/–35/–37/–39/–41/–43/–45/–47/–49/–51/–53 and –55 Component Maintenance Manual with Illustrated Parts List 32–11–03, Revision 11, dated August 22, 2008; for related information.

Material Incorporated by Reference

(l) You must use the service information listed in Table 1 of this AD, as applicable, to do the actions required by this AD, unless the AD specifies otherwise.

TABLE 1—MATERIAL INCORPORATED BY REFERENCE

(The revision level of Goodrich Dressed Shock Strut Assembly Main Landing Gear Part No. 46100–29/–31/–33/–35/–37/–39/–41/–43/–45/–47/–49/–51/–53 and –55 Component Maintenance Manual with Illustrated Parts List 32–11–03, Revision 11, dated August 22, 2008, is indicated only on the Record of Revisions; no other page of this document contains this information. Page LEP–3/4 is missing from the List of Effective Pages of this document; page LEP 3/4 is dated August 22, 2008.)

(1) The Director of the Federal Register approved the incorporation by reference of this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For Bombardier service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–5000; fax 514–855–7401; e-mail *thd.qseries@aero.bombardier.com;* Internet *http://www.bombardier.com.*

(3) For Goodrich service information identified in this AD, contact Goodrich Corporation, Landing Gear, 1400 South Service Road, West Oakville L6L 5Y7, Ontario, Canada; telephone 905–825–1568; e-mail *jean.breed@goodrich.com;* Internet *http://www.goodrich.com/TechPubs.*

(4) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Renton, Washington, on June 23, 2010.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2010–15923 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2009–0790; Directorate Identifier 2008–NM–177–AD; Amendment 39–16285; AD 2010–10–06]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A330–200 and –300 Airplanes and Model A340–200, –300, –500, and –600 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding an existing airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Uncontained APU [auxiliary power unit] generator failures on ground have occurred on Airbus A330 aircraft in service. APU generator design is common to all A330 and A340 aircraft.

Preliminary investigations confirmed that these failures have resulted in structural damage to the APU compartment and, in one case, to the stabiliser compartment. Loose APU generator parts can lead to damage to the APU firewall, reducing its fire extinguishing capability and potentially leading to a temporary uncontrolled fire.

Although the root cause has not yet been determined, the investigation showed a sequence of events where a collapse of the Drive End Bearing (DEB) leads to an uncontained failure. Evidence has also shown that the DEB failures are not instantaneous, and therefore, the detection of small debris could indicate early stage of a DEB failure.

* * * * *

We are issuing this AD to require actions to correct the unsafe condition on these products.

DATES: This AD becomes effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 17, 2010.

On June 26, 2007 (72 FR 31973, June 11, 2007), the Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on September 25, 2009 (74 FR 48872), and proposed to supersede AD 2007–18–04, Amendment 39–15184 (72 FR 50042, August 30, 2007). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

Uncontained APU [auxiliary power unit] generator failures on ground have occurred on Airbus A330 aircraft in service. APU generator design is common to all A330 and A340 aircraft.

Preliminary investigations confirmed that these failures have resulted in structural damage to the APU compartment and, in one case, to the stabiliser compartment. Loose APU generator parts can lead to damage to the APU firewall, reducing its fire extinguishing capability and potentially leading to a temporary uncontrolled fire.

Although the root cause has not yet been determined, the investigation showed a sequence of events where a collapse of the Drive End Bearing (DEB) leads to an uncontained failure. Evidence has also shown that the DEB failures are not instantaneous, and therefore, the detection of small debris could indicate early stage of a DEB failure.

To address this subject, EASA issued Emergency AD 2007–0188–E, requiring repetitive inspections of the APU generator Scavenge filter element and filter housing and of the APU generator Drain plug for signs of small debris coming from the APU generator, allowing detection of the early stage of APU generator failure. That AD was later revised to extend the compliance time and to provide another option for the repetitive inspection.

Subsequently, another uncontained APU generator failure occurred on ground on an A330 aircraft, operated within the provisions of MMEL [master minimum equipment list] item 36–11–01, with similar structural damages as the previous APU generator burst events. The investigation of this event revealed that the inspection required by paragraph 4 of AD 2007–0188R1 before the first flight under the MMEL rectification interval had not been performed and that the APU generator had not been properly installed (two seal plates instead of one).

Consequently, EASA issued AD 2008–0017, superseding AD 2007–0188R1 and requiring the following additional actions:

—a visual inspection of the APU generator seal plate fitting,

—an inspection following MMEL item 36–11–01 or 24–22–01 rectification and

—an inspection each time a new or serviceable APU generator or APU is installed on an aircraft.

EASA issued AD 2008–0017R1 to cancel the inspection of paragraph 4 for A330 aircraft, when operated within the provisions of MMEL item 36–11–01 further to ETOPS [Extended-Range Twin-Engine Operations Performance Standards] certification of A330 APU.

Finally, Airbus has developed a secondary housing for the APU generator that is designed to contain APU generator parts in the event of an APU generator burst.

For the above described reasons, this AD retains the requirements of EASA AD 2008–0017R1, which is superseded, and adds the requirement to install a secondary housing on the APU generator. After installation of the secondary APU generator housing on an aircraft, the repetitive inspections of this AD are no longer required for that aircraft.

This AD retains the requirements of AD 2007–18–04. The new requirements include inspecting the APU generator scavenge oil filter element for contamination, the APU generator drain plug for contamination, and the APU generator scavenge filter housing for contamination, and a terminating action (installing a secondary housing line replaceable unit). Applicable corrective actions include, depending on the findings, replacing or reinstalling the APU generator scavenge oil filter and packing, replacing or reinstalling the APU generator drain plug, and replacing or reinstalling the APU generator scavenge filter housing. You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

The NPRM cited Airbus Service Bulletins A330–24–3045, dated June 13, 2008; A340–24–4058, dated June 13, 2008; and A340–24–5022, dated June 23, 2008. Airbus has released the following new service bulletins:

TABLE—NEW SERVICE INFORMATION

Airbus—	Revision—	Dated—
Mandatory Service Bulletin A330–24–3045	01	October 1, 2008.
Mandatory Service Bulletin A340–24–4058	01	October 1, 2008.
Mandatory Service Bulletin A340–24–5022	01	November 27, 2008.

The latest revisions of the service information make minor updates and specify that no additional work is necessary on airplanes modified in accordance with the original documents. We have revised this final rule to incorporate the latest revisions of the service information. We have also added paragraph (h)(6) and Table 5 to this AD to give credit for actions done in accordance with the original service information. We have reidentified subsequent tables accordingly.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comment received.

Request To Include a Terminating Modification for Actions Required by Paragraphs (h)(3) and (h)(4) of the NPRM

EVA Airways Corporation (EVA) requests that we revise the NPRM to include a terminating modification for actions required by paragraphs (h)(3) and (h)(4) of the NPRM. Accomplishing the actions specified in paragraph (h)(5) of the NPRM would terminate the actions required by paragraphs (g)(2), (g)(3), and (h)(2) of the NPRM. EVA refers to a message it received from Airbus and states that installing the APU generator secondary housing terminates the repetitive inspections specified in paragraphs (g)(2), (g)(3), (h)(2), (h)(3), and (h)(4) of the NPRM.

We agree with the commenter's request. The EASA AD specifies that installing the secondary housing line replacement unit terminates repetitive inspections. We have also received information from Airbus indicating that installing the APU generator secondary housing terminates the repetitive inspections required by paragraphs (h)(3) and (h)(4) of the NPRM. We have revised paragraph (h)(5) of this final rule to specify that installing the APU generator secondary housing terminates the repetitive inspections specified in paragraphs (g)(2) and (g)(3) of this AD and the inspections specified in paragraphs (h)(2), (h)(3), and (h)(4) of this AD. We have also revised paragraphs (g)(2) and (g)(3) of this final rule to clarify that doing the installation required by paragraph (h)(5) of this AD terminates the repetitive inspections. We have also revised paragraphs (h)(2), (h)(3), and (h)(4) of this AD to clarify that doing the installation terminates the inspection requirements of those paragraphs.

Explanation of Changes Made to This AD

In paragraphs (g)(1), (g)(2), and (g)(3) of this AD, we have clarified that the service information specified in Table 2 or Table 3 of this AD is acceptable for compliance with the applicable actions.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We also determined that these changes will not increase the economic burden on any operator or increase the scope of the AD.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow our FAA policies. Any such differences are highlighted in a NOTE within the AD.

Explanation of Change to Costs of Compliance

Since issuance of the NPRM, we have increased the labor rate used in the Costs of Compliance from $80 per work-hour to $85 per work-hour. The Costs of Compliance information, below, reflects this increase in the specified hourly labor rate.

Costs of Compliance

We estimate that this AD will affect about 41 products of U.S. registry.

The actions that are required by AD 2007–18–04 and retained in this AD take about 11 work-hours per product, at an average labor rate of $85 per work hour. Required parts cost $0 per product. Based on these figures, the estimated cost of the currently required actions is $935 per product.

We estimate that it will take about 10 work-hours per product to comply with the new basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $0 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these costs. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $34,850, or $850 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Amendment 39–15184 (72 FR 50042, August 30, 2007) and adding the following new AD:

2010–10–06 Airbus: Amendment 39–16285. Docket No. FAA–2009–0790; Directorate Identifier 2008–NM–177–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) This AD supersedes AD 2007–18–04, Amendment 39–15184.

Applicability

(c) This AD applies to the airplanes certificated in any category, identified in paragraphs (c)(1) and (c)(2) of this AD.

(1) Airbus Model A330–201, –202, –203, –223, –243, –301, –302, –303, –321, –322, –323, –341, –342, and –343 series airplanes, all serial numbers, except those on which Airbus modification 56985 has been embodied in production.

(2) Airbus Model A340–211, –212, –213, –311, –312, and –313 series airplanes; and Model A340–541 and A340–642 airplanes; all serial numbers, except those on which Airbus modification 56985 has been embodied in production.

Subject

(d) Air Transport Association (ATA) of America Code 24: Electrical power.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Uncontained APU [auxiliary power unit] generator failures on ground have occurred on Airbus A330 aircraft in service. APU generator design is common to all A330 and A340 aircraft.

Preliminary investigations confirmed that these failures have resulted in structural damage to the APU compartment and, in one case, to the stabiliser compartment. Loose APU generator parts can lead to damage to the APU firewall, reducing its fire extinguishing capability and potentially leading to a temporary uncontrolled fire.

Although the root cause has not yet been determined, the investigation showed a sequence of events where a collapse of the Drive End Bearing (DEB) leads to an uncontained failure. Evidence has also shown that the DEB failures are not instantaneous, and therefore, the detection of small debris could indicate early stage of a DEB failure.

To address this subject, EASA issued Emergency AD 2007–0188–E, requiring repetitive inspections of the APU generator Scavenge filter element and filter housing and of the APU generator Drain plug for signs of small debris coming from the APU generator, allowing detection of the early stage of APU generator failure. That AD was later revised to extend the compliance time and to provide another option for the repetitive inspection.

Subsequently, another uncontained APU generator failure occurred on ground on an A330 aircraft, operated within the provisions of MMEL [master minimum equipment list] item 36–11–01, with similar structural damages as the previous APU generator burst events. The investigation of this event revealed that the inspection required by paragraph 4 of AD 2007–0188R1 before the first flight under the MMEL rectification interval had not been performed and that the APU generator had not been properly installed (two seal plates instead of one).

Consequently, EASA issued AD 2008–0017, superseding AD 2007–0188R1 and requiring the following additional actions:

—a visual inspection of the APU generator seal plate fitting,

—an inspection following MMEL item 36–11–01 or 24–22–01 rectification and

—an inspection each time a new or serviceable APU generator or APU is installed on an aircraft.

EASA issued AD 2008–0017R1 to cancel the inspection of paragraph 4 for A330 aircraft, when operated within the provisions of MMEL item 36–11–01 further to ETOPS [Extended-Range Twin-Engine Operations Performance Standards] certification of A330 APU.

Finally, Airbus has developed a secondary housing for the APU generator that is designed to contain APU generator parts in the event of an APU generator burst.

For the above described reasons, this AD retains the requirements of EASA AD 2008–0017R1, which is superseded, and adds the requirement to install a secondary housing on the APU generator. After installation of the secondary APU generator housing on an aircraft, the repetitive inspections of this AD are no longer required for that aircraft.

This AD retains the requirements of AD 2007–18–04, which superseded AD 2007–12–10, Amendment 39–15088. The new requirements include inspecting the APU generator scavenge oil filter element for contamination, the APU generator drain plug for contamination, and the APU generator scavenge filter housing for contamination, and a terminating action (installing a secondary housing line replaceable unit). Applicable corrective actions include, depending on the findings, replacing or reinstalling the APU generator scavenge oil filter and packing, replacing or reinstalling the APU generator drain plug, and replacing or reinstalling the APU generator scavenge filter housing.

RESTATEMENT OF REQUIREMENTS OF AD 2007–12–10, WITH NO CHANGES

Actions and Compliance

(f) Unless already done, do the following actions.

(1) For airplanes on which the date of issuance of the original French airworthiness certificate or the date of issuance of the original French or EASA export certificate of airworthiness is before March 1, 2007: Within 63 days after June 26, 2007 (the effective date of AD 2007–12–10), in accordance with the instructions of Airbus All Operators Telex (AOT) A330–24A3042, A340–24A4056, or A340–24A5020, all Revision 02, all dated April 12, 2007; as applicable, inspect the inlet screen (last chance filter) for the generator scavenge-oil pump for signs of debris and, as applicable, apply all associated corrective actions before further flight.

(2) For Model A330 aircraft operating under MMEL (master minimum equipment list) Item 24–22–01 'AC Main Generation' or MMEL Item 36–11–01 'Bleed Air Supply System Failure' and on which the date of issuance of the original French airworthiness certificate or the date of issuance of the original French or EASA export certificate of airworthiness is before March 1, 2007: As of June 26, 2007, before each flight, perform a check of the differential pressure indicator button on the lube filter and the generator scavenge filter in accordance with the instructions of Airbus AOT A330–24A3042, Revision 02, dated April 12, 2007, until accomplishment of paragraph (g)(5) of this AD.

Note 1: The repetitive checks before each flight specified in paragraph (f)(2) of this AD are not required for airplanes operated under

MMEL Item 36–11–01, provided the APU generator has been removed or deactivated in accordance with the instructions of Airbus AOT A330–24A3042, Revision 02, dated April 12, 2007.

(3) Actions done before June 26, 2007, in accordance with the applicable Airbus service information in Table 1 of this AD are acceptable for compliance with the corresponding provisions of paragraph (f) of this AD.

RESTATEMENT OF REQUIREMENTS OF AD 2007–18–04, WITH REVISED SERVICE INFORMATION

Actions and Compliance

(g) Unless already done, do the following actions.

(1) For airplanes on which the date of issuance of the original French airworthiness certificate or the date of issuance of the original French or EASA export certificate of airworthiness is on or before July 1, 2007: Within 30 days after September 14, 2007 (the effective date of AD 2007–18–04), in accordance with the instructions of paragraph 4.2.1 of the applicable Airbus service information specified in Table 2 or 3 of this AD, clean and inspect the APU generator scavenge oil filter element and housing and inspect the APU generator drain plug to detect metallic debris, and apply all applicable associated corrective actions before further flight. After the effective date of this AD, use only the service information specified in Table 3 of this AD.

TABLE 2—SERVICE INFORMATION

Airbus all operators telex—	Revision—	Dated—
A330–24A3044	01	July 20, 2007.
A330–24A3044	02	December 20, 2007.
A340-24A4057	02	August 14, 2007.

A340–24A4057	03	December 20, 2007.
A340–24A5021	02	December 20, 2007.

(2) Within 450 aircraft flight hours or 200 APU operating hours, whichever occurs later, after accomplishing the inspection required by paragraph (g)(1) of this AD, in accordance with the instructions of paragraph 4.2.2 of the applicable Airbus information specified in Table 2 or Table 3 of this AD: Inspect the APU generator scavenge oil filter element and housing and the APU generator drain plug to detect metallic debris; and apply all applicable associated corrective actions before further flight. Repeat the inspections thereafter at intervals not to exceed 450 aircraft flight hours or 200 APU operating hours, whichever occurs later until the installation required by paragraph (h)(5) of this AD is done. After the effective date of this AD, use only the service information specified in Table 3 of this AD.

(3) For airplanes on which the date of issuance of the original French airworthiness certificate or the date of issuance of the original French or EASA export certificate of airworthiness is after July 1, 2007: Within 450 aircraft flight hours or 200 APU operating hours after September 14, 2007, whichever occurs later, in accordance with the instructions of paragraph 4.2.2 of the applicable Airbus service information specified in Table 2 or Table 3 of this AD: Inspect the APU generator scavenge oil filter element and housing and the APU generator drain plug to detect metallic debris; and apply all applicable associated corrective actions before further flight. Repeat the inspections thereafter at intervals not to exceed 450 aircraft flight hours or 200 APU operating hours, whichever occurs later until the installation required by paragraph (h)(5) of this AD is done. After the effective date of this AD, use only the service information specified in Table 3 of this AD.

(4) Actions done before September 14, 2007, in accordance with the applicable Airbus service information in Table 4 of this AD are acceptable for compliance with the corresponding provisions of paragraph (g) of this AD.

TABLE 4—ACCEPTABLE EARLIER REVISIONS OF SERVICE INFORMATION

Airbus all operators telex—	Revision—	Dated—
A330–24A3044	Original	July 5, 2007.
A340-24A4057	Original	July 5, 2007.
A340-24A4057	01	July 20, 2007.
A340–24A5021	Original	July 5, 2007.

(5) For Model A330 aircraft operating under MMEL Item 24–22–01, "AC Main Generation," or MMEL Item 36–11–01, "Bleed Air Supply System Failure": Unless the APU generator has been deferred in accordance with the MMEL by deactivation (quill shaft removed) or removal, the inspection required by paragraph (g)(2) or (g)(3), as applicable, of this AD must be performed prior to the first flight of the specified MMEL repair time interval. Accomplishing the actions in this paragraph terminates the actions required by paragraph (f)(2) of this AD.

Note 2: For A330 aircraft, MMEL Item 24–22–01 (AC Main Generation) and/or MMEL Item 36–11–01 (Bleed Air Supply System Failure) require that the APU be used during the entire flight.

NEW REQUIREMENTS OF THIS AD

Actions and Compliance

(h) Unless already done, do the following actions.

(1) As of the effective date of this AD, before further flight after an APU generator or an APU is installed on the airplane: Inspect the APU generator scavenge oil filter element for contamination (including metallic particles), the APU generator drain plug for contamination (including metallic particles), and the APU generator scavenge filter housing for contamination (including metallic particles), in accordance with paragraph 4.2 of the applicable service information specified in Table 3 of this AD. Do all applicable corrective actions before further flight in accordance with paragraph 4.2 of the applicable service information specified in Table 3 of this AD.

(2) Within 450 aircraft flight hours or 200 APU operating hours, whichever occurs later, after accomplishing the inspection required by paragraph (h)(1) of this AD, do the inspection as required by paragraph (g)(2) of this AD. Doing the installation required by paragraph (h)(5) of this AD terminates the requirements of this paragraph.

(3) For Model A330 airplanes operated within the provisions of MMEL Item 24–22–01, "AC Main Generation," that are dispatched with the APU operating during the entire flight in accordance with the provisions of MMEL Item 24–22–01: Perform the inspection required by paragraph (g)(2) of this AD at the applicable time in paragraph (h)(3)(i) or (h)(3)(ii) of this AD, unless the APU generator is removed or deactivated (quill shaft removed as described in the MMEL item). Doing the installation required by paragraph (h)(5) of this AD terminates the requirements of this paragraph.

(i) Before the first flight of the MMEL rectification interval.

(ii) Before the first flight following MMEL rectification.

(4) Removing or deactivating the APU generator, or rendering the APU inoperative, in accordance with paragraph 4.3 of the applicable service information specified in Table 3 of this AD, defers the inspection required by paragraph (g)(2) of this AD. The deferred inspection must be performed before further flight after the system is reactivated. Doing the installation required by paragraph (h)(5) of this AD terminates the requirements of this paragraph.

(5) Within 6 months after the effective date of this AD, install a secondary housing line replaceable unit (LRU) over the end of the APU generator, in accordance with the Accomplishment Instructions of the applicable service information specified in Table 6 of this AD. Performing this modification terminates the repetitive inspections required by paragraphs (g)(2) and (g)(3) of this AD, and the inspections required by paragraphs (h)(2), (h)(3), and (h)(4) of this AD.

(6) Actions accomplished before the effective date of this AD in accordance with service information in Table 5 of this AD are acceptable for compliance with the corresponding actions specified in this AD.

FAA AD Differences

Note 3: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(i) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(j) Refer to MCAI EASA Airworthiness Directive 2008–0173, dated September 15, 2008, and the service information identified in Table 6 of this AD for related information.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2010–16181 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0684; Directorate Identifier 2010–CE–031–AD; Amendment 39–16360; AD 2010–14–15]

RIN 2120–AA64

Airworthiness Directives; Aircraft Industries a.s. (Type Certificate G60EU Previously Held by LETECKÉ ZÁVODY a.s. and LET Aeronautical Works) Model L–13 Blanik Gliders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) issued by the aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

A fatal accident occurred to a L–13 BLANÍK sailplane, in which the main spar of the right wing failed near the root due to positive load. The right wing detached from the aircraft and the pilots lost control of the sailplane.

The preliminary investigation has revealed that the fracture may have been due to fatigue.

This AD requires actions that are intended to address the unsafe condition described in the MCAI.

DATES: This AD becomes effective July 19, 2010.

On July 19, 2010, the Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD.

We must receive comments on this AD by August 27, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Greg Davison, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4130; fax: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued Emergency AD No.: 2010–0122–E, dated June 23, 2010 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

A fatal accident occurred to a L–13 BLANÍK sailplane, in which the main spar of the right wing failed near the root due to positive load. The right wing detached from the aircraft and the pilots lost control of the sailplane.

The preliminary investigation has revealed that the fracture may have been due to fatigue.

The Emergency AD 2010–0119–E required immediate inspection of the main spar at the root of the wing to detect fatigue cracking and the accomplishment of the relevant corrective actions as necessary. In addition, this AD 2010–0119–E imposed operational limitations. This AD retains the requirements of AD 2010–0119–E, which is superseded, and extends the applicability to L–13 A BLANÍK sailplanes.

The requirements of this AD are considered as interim action to immediately address this unsafe condition. If, as a result of the on-going investigation, a terminating action is later identified, further mandatory actions might be considered.

You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Aircraft Industries a.s. has issued Mandatory Bulletin MB No.: L13/109a, dated June 18, 2010. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of the AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all information provided by the State of Design Authority and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might have also required different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are described in a separate paragraph of the AD. These requirements take precedence over those copied from the MCAI.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because a fatal accident occurred in an L–13 Blanik glider. The main spar of the right wing of the accident glider failed near the root due to positive load. The right wing detached from the aircraft and the pilots lost control. The preliminary investigation has revealed that the fracture may have been due to fatigue. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2010–0684; Directorate Identifier 2010–CE–031–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866;

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–15 Aircraft Industries a.s. (Type Certificate G60EU Previously Held by LETECKÉ ZÁVODY a.s. and LET Aeronautical Works): Amendment 39–16360; Docket No. FAA–2010–0684; Directorate Identifier 2010–CE–031–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective July 19, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Models L–13 Blanik gliders, all serial numbers, certificated in any category.

Subject

(d) Air Transport Association of America (ATA) Code 57: Wings.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

A fatal accident occurred to a L–13 BLANÍK sailplane, in which the main spar of the right wing failed near the root due to positive load. The right wing detached from the aircraft and the pilots lost control of the sailplane.

The preliminary investigation has revealed that the fracture may have been due to fatigue.

The Emergency AD 2010–0119–E required immediate inspection of the main spar at the root of the wing to detect fatigue cracking and the accomplishment of the relevant corrective actions as necessary. In addition, this AD 2010–0119–E imposed operational limitations. This AD retains the requirements of AD 2010–0119–E, which is superseded, and extends the applicability to L–13 A BLANÍK sailplanes.

The requirements of this AD are considered as interim action to immediately address this unsafe condition. If, as a result of the on-going investigation, a terminating action is later identified, further mandatory actions might be considered.

Actions and Compliance

(f) Unless already done, do the following actions.

(1) As of July 19, 2010, aerobatics maneuvers (*i.e.,* roll, loop, stalled turn, immelmann turn, half roll, and inverted flight) are prohibited. Before further flight after July 19, 2010, insert a copy of this AD into the flight manual to comply with the requirements of this paragraph. The chapter "Aerobatics" in "Pilot's Notes for the L–13 sailplane" (flight manual) is not valid.

(2) Before further flight after July 19, 2010, inspect the wing critical areas following Aircraft Industries a.s. Mandatory Bulletin MB No.: L13/109a, dated June 18, 2010, except use a 10X magnifier.

(3) If any cracks are found during the inspection required by paragraph (f)(2) of this AD, no further flights are permitted.

(4) Within 10 days after the inspection required by paragraph (f)(2) of this AD, submit the following information requested by Aircraft Industries a.s. Mandatory Bulletin MB No.: L13/109a, dated June 18, 2010, for further assessment. Send information to the address listed in paragraph (i)(2) of this AD.

(i) Appendix No. 1, Summary of L–13 glider Log book record; and

(ii) Paragraph H. RECORD IN GLIDER LOGBOOK AFTER BULLETIN EXECUTION.

Note 1: The above limitation is an interim solution until a final action is identified, at which time the European Aviation Safety Agency (EASA) and the FAA may consider further AD action.

FAA AD Differences

Note 2: This AD differs from the MCAI and/or service information as follows. The service information requires a visual inspection with a 6X magnifier. We are requiring a 10X magnifier to detect cracks that could go undetected using only a 6X magnifier.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Greg Davison, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4130; fax: (816) 329–4090. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) Airworthy Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) Reporting Requirements: For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et.seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(h) Refer to MCAI EASA Emergency AD No.: 2010–0122–E, dated June 23, 2010; and Aircraft Industries a.s. Mandatory Bulletin MB No.: L13/109a, dated June 18, 2010, for related information.

Material Incorporated by Reference

(i) You must use Aircraft Industries a.s. Mandatory Bulletin MB No.: L13/109a, dated June 18, 2010, to do the actions required by this AD, unless the AD specifies otherwise.

(1) The Director of the Federal Register approved the incorporation by reference of

this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact Aircraft Industries, a.s., Na Záhonech 1177, 686 04 Kunovice, Czech Republic; phone: +420 572 817 660; fax: +420 572 816 112; Internet: *http://www.let.cz/;* e-mail: *ots@let.cz.*

(3) You may review copies of the service information incorporated by reference for this AD at the FAA, Central Region, Office of the Regional Counsel, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the Central Region, call (816) 329–3768.

(4) You may also review copies of the service information incorporated by reference for this AD at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Kansas City, Missouri, on June 28, 2010.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2010–16382 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0382; Directorate Identifier 2009–NM–211–AD; Amendment 39–16361; AD 2010–14–16]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Model DHC–8–400, –401, and –402 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding an existing airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Several cases have been reported where a loss of fluid in the No.2 hydraulic system has caused the power transfer unit (PTU) to overspeed, resulting in pressure fluctuations and increased fluid flow within the No. 1 hydraulic system. In one case, the hydraulic system control logic did not shut down the PTU and the overspeed condition persisted, resulting in the illumination of the No.1 HYD FLUID HOT caution light.

* * * * *

The unsafe condition is possible loss of both the No. 1 and No. 2 hydraulic systems, resulting in the potential loss of several functions essential for safe flight and landing of the airplane. We are issuing this AD to require actions to correct the unsafe condition on these products.

DATES: This AD becomes effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of September 2, 2008 (73 FR 47818, August 15, 2008).

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of July 10, 2007 (72 FR 30968, June 5, 2007).

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Fabio Buttitta, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7303; fax (516) 794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on April 21, 2010 (75 FR 20787), and proposed to supersede AD 2008–17–06, Amendment 39–15644 (73 FR 47818, August 15, 2008). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

Since we issued AD 2008–17–06, a modification of the power transfer unit (PTU) control logic, including the provision of automatic PTU shutdown in the event of loss of fluid in the No. 2 hydraulic system, has been developed. The modification addresses the identified unsafe condition. In addition, the applicability has been revised to remove airplanes having serial number 4185 and subsequent, since an equivalent modification has been installed in production on these airplanes. Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Airworthiness Directive CF–2006–08R1, dated August 31, 2009 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

Several cases have been reported where a loss of fluid in the No.2 hydraulic system has caused the power transfer unit (PTU) to overspeed, resulting in pressure fluctuations and increased fluid flow within the No. 1 hydraulic system. In one case, the hydraulic system control logic did not shut down the PTU and the overspeed condition persisted, resulting in the illumination of the No. 1 HYD FLUID HOT caution light.

As an interim action to avoid possible loss of both the No. 1 and No. 2 hydraulic systems, the Airplane Flight Manual (AFM) has been revised to include pulling the HYD PWR XFER circuit breaker in the event of the loss of all hydraulic fluid in the No. 2 hydraulic system.

Insertion of the resultant Temporary Amendment (TA) No. 13 into the AFM was mandated in the original issue of this [Canadian] directive. This instruction * * * remains in effect until * * * this [revised] directive is accomplished.

Revision 1 of this directive * * * mandates modification of the PTU control logic, including the provision of automatic PTU shutdown in the event of loss of fluid in the No. 2 hydraulic system. In addition, the applicability of the [Canadian] directive has been revised to remove aircraft Serial Number (SN) 4185 and subsequent, since an equivalent modification has been installed in production on these aircraft.

The unsafe condition is possible loss of both the No. 1 and No. 2 hydraulic systems, resulting in the potential loss of several functions essential for safe flight and landing of the airplane. You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use

different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow our FAA policies. Any such differences are highlighted in a NOTE within the AD.

Costs of Compliance

We estimate that this AD will affect about 42 products of U.S. registry.

The actions that are required by AD 2008–17–06 and retained in this AD take about 1 work-hour per product, at an average labor rate of $85 per work hour. Required parts cost about $0 per product. Based on these figures, the estimated cost of the currently required actions is $85 per product.

We estimate that it will take about 165 work-hours per product to comply with the new basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $10,982 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $1,050,294, or $25,007 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Amendment 39–39–15644 (73 FR 47818, August 15, 2008) and adding the following new AD:

2010–14–16 Bombardier, Inc.: Amendment 39–16361. Docket No. FAA–2010–0382; Directorate Identifier 2009–NM–211–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) This AD supersedes AD 2008–17–06, Amendment 39–15644.

Applicability

(c) This AD applies to Bombardier, Inc. Model DHC–8–400, –401, and –402 airplanes, certificated in any category; serial numbers 4001, 4003, 4004, 4006, and 4008 through 4184 inclusive.

Subject

(d) Air Transport Association (ATA) of America Code 29: Hydraulic power.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Several cases have been reported where a loss of fluid in the No.2 hydraulic system has caused the power transfer unit (PTU) to overspeed, resulting in pressure fluctuations and increased fluid flow within the No. 1 hydraulic system. In one case, the hydraulic system control logic did not shut down the PTU and the overspeed condition persisted, resulting in the illumination of the No. 1 HYD FLUID HOT caution light.

As an interim action to avoid possible loss of both the No. 1 and No. 2 hydraulic systems, the Airplane Flight Manual (AFM) has been revised to include pulling the HYD PWR XFER circuit breaker in the event of the loss of all hydraulic fluid in the No. 2 hydraulic system.

Insertion of the resultant Temporary Amendment (TA) No. 13 into the AFM was mandated in the original issue of this [Canadian] directive. This instruction * * * remains in effect until * * * this [revised] directive is accomplished.

Revision 1 of this directive * * * mandates modification of the PTU control logic, including the provision of automatic PTU shutdown in the event of loss of fluid in the No. 2 hydraulic system. In addition, the applicability of the [Canadian] directive has been revised to remove aircraft Serial Number (SN) 4185 and subsequent, since an equivalent modification has been installed in production on these aircraft.

The unsafe condition is possible loss of both the No. 1 and No. 2 hydraulic systems, resulting in the potential loss of several functions essential for safe flight and landing of the airplane.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

RESTATEMENT OF REQUIREMENTS OF AD 2007–12–03 AIRPLANE FLIGHT MANUAL (AFM) REVISION

(g) Within 14 days after July 10, 2007 (the effective date of AD 2007–12–03, Amendment 39–15081, which was superseded by AD 2008–17–06), revise the Limitations section of the applicable AFM to include the information in the applicable Bombardier temporary amendment specified in Table 1 of this AD, as specified in the temporary amendment. These temporary amendments introduce procedures for

pulling the "HYD PWR XFER" circuit breaker in the event of the loss of all hydraulic fluid in the No. 1 or No. 2 hydraulic system. Operate the airplane according to the limitations and procedures in the applicable temporary amendment.

TABLE 1—AFM TEMPORARY AMENDMENTS

For model—	Use Bombardier temporary amendment—	Issue—	Dated—	To Bombardier Dash 8 Q400 Airplane Flight Manual—
DHC–8–400 airplanes	13	1	July 14, 2005	PSM 1–84–1A.
DHC–8–401 airplanes	13	1	July 14, 2005	PSM 1–84–1A.
DHC–8–402 airplanes	13	1	July 14, 2005	PSM 1–84–1A.

Note 1: This may be done by inserting a copy of the applicable temporary amendment into the applicable AFM. When the applicable temporary amendment has been included in general revisions of the AFM, the general revisions may be inserted into the AFM, provided the relevant information in the general revisions is identical to that in the temporary amendment.

Restatement of Requirements of AD 2008–17–06: AFM Revision

(h) Within 14 days after September 2, 2008 (the effective date of AD 2008–17–06), revise the applicable AFM Normal and Abnormal Procedures section to include the information in the applicable Bombardier temporary amendment specified in Table 2 of this AD, as specified in the temporary amendment. These temporary amendments introduce additional procedures for ensuring that the "PTU CNTRL" switch is Normal, the "PTU CNTRL ON" advisory light is out, and the "HYD PWR XFER" circuit breaker is pulled in the event of the illumination of the "#2 HYD ISO VALVE" caution light. After accomplishing the AFM revision, the AFM limitation required by paragraph (g) in this AD may be removed from the AFM.

TABLE 2—AFM TEMPORARY AMENDMENTS

For model—	Use Bombardier temporary amendment—	Issue—	Dated—	To Bombardier Dash 8 Q400 Airplane Flight Manual—
DHC–8–400 airplanes	13	3	June 9, 2008	PSM 1–84–1A.
DHC–8–401 airplanes	13	3	June 9, 2008	PSM 1–84–1A.
DHC–8–402 airplanes	13	3	June 9, 2008	PSM 1–84–1A.

New Requirements of This AD: Actions

(i) Within 6,000 flight hours after the effective date of this AD, modify the PTU control logic, in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 84–29–22, Revision A, dated February 24, 2009. Doing this modification terminates the requirements of paragraphs (g) and (h) of this AD, and after the modification has been done, the AFM limitation required by paragraphs (g) and (h) of this AD may be removed from the AFM.

(j) Modifying the PTU control logic is also acceptable for compliance with the requirements of paragraph (i) of this AD if done before the effective date of this AD, in accordance with Bombardier Service Bulletin 84–29–22, dated December 5, 2008.

FAA AD Differences

Note 2: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(k) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(l) Refer to MCAI Canadian Airworthiness Directive CF–2006–08R1, dated August 31, 2009; the Bombardier temporary amendments specified in Tables 1 and 2; and Bombardier Service Bulletin 84–29–22, Revision A, dated February 24, 2009; for related information.

Material Incorporated by Reference

(m) You must use Bombardier Service Bulletin 84–29–22, Revision A, dated February 24, 2009, and the applicable temporary amendment identified in Table 3 of this AD; as applicable; to do the actions required by this AD, unless the AD specifies otherwise.

TABLE 3—ALL TEMPORARY AMENDMENTS INCORPORATED BY REFERENCE

Bombardier temporary amendment—	Issue—	Dated—	To Bombardier Dash 8 Q400 Airplane Flight Manual—
13	1	July 14, 2005	Model 400 PSM 1–84–1A.
13	1	July 14, 2005	Model 401 PSM 1–84–1A.
13	1	July 14, 2005	Model 402 PSM 1–84–1A.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2007–29176; Directorate Identifier 2007–NE–38–AD; Amendment 39–16365; AD 2010–14–20]

RIN 2120–AA64

Airworthiness Directives; McCauley Propeller Systems Model 4HFR34C653/L106FA Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for McCauley Propeller Systems model 4HFR34C653/L106FA propellers. This AD requires a onetime fluorescent penetrant inspection (FPI) and eddy current inspection (ECI) of the propeller hub for cracks. This AD results from reports of 10 hubs found cracked during propeller overhaul. We are issuing this AD to prevent failure of the propeller hub, which could cause blade separation, damage to the airplane, and loss of control of the airplane.

DATES: This AD becomes effective August 17, 2010. The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulations as of August 17, 2010.

ADDRESSES: You can get the service information identified in this AD from McCauley Propeller Systems, P.O. Box 7704, Wichita, KS 67277–7704; telephone (800) 621–7767.

The Docket Operations office is located at Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

FOR FURTHER INFORMATION CONTACT: Jeff Janusz, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, Small Airplane Directorate, 1801 Airport Road, Wichita, KS 67209; e-mail: *jeff.janusz@faa.gov;* telephone (316) 946–4148; fax (316) 946–4107.

SUPPLEMENTARY INFORMATION: The FAA proposed to amend 14 CFR part 39 with a proposed AD. The proposed AD applies to McCauley Propeller Systems model 4HFR34C653/L106FA propellers. We published the proposed AD in the **Federal Register** on September 28, 2007 (72 FR 55120). We also published a supplemental proposed AD in the **Federal Register** on April 13, 2010 (75 FR 18774). Those actions proposed to require a onetime FPI and ECI of the propeller hub for cracks.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is provided in the

ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

Comments

We provided the public the opportunity to participate in the development of this AD. We received one comment on the original proposed AD, which we responded to in the supplemental proposed AD. We received no comments on the supplemental proposed AD, or on the determination of the cost to the public.

Conclusion

We have carefully reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

We estimate that this AD will affect 128 propellers installed on airplanes of U.S. registry. We also estimate that it will take about 41.5 work-hours per propeller to perform the actions, and that the average labor rate is $85 per work-hour. Based on these figures, we estimate the total cost of the AD to U.S. operators to be $451,520.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866;

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a summary of the costs to comply with this AD and placed it in the AD Docket. You may get a copy of this summary at the address listed under **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2010–14–20 McCauley Propeller Systems: Amendment 39–16365. Docket No. FAA–2007–29176; Directorate Identifier 2007–NE–38–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to McCauley Propeller Systems model 4HFR34C653/L106FA propellers.

Unsafe Condition

(d) This AD results from reports of 10 hubs found cracked during propeller overhaul. We are issuing this AD to prevent failure of the propeller hub, which could cause blade separation, damage to the airplane, and loss of control of the airplane.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified unless the actions have already been done.

(f) For propeller hubs with 6,000 or more operating hours time-since-new (TSN) on the effective date of this AD, perform the procedures in paragraphs (h) through (k) of this AD within 100 operating hours time-in-service after the effective date of this AD.

(g) For propeller hubs with fewer than 6,000 operating hours TSN on the effective date of this AD, perform the procedures in paragraphs (h) through (k) of this AD before the propeller hub reaches 6,100 operating hours TSN.

Onetime Propeller Hub Inspection

(h) Remove and disassemble the propeller, and etch the propeller hub, using paragraphs 1.A. through 2.D. of the Accomplishment Instructions of McCauley Propeller Systems Alert Service Bulletin No. ASB254, dated August 20, 2007.

(i) Perform a onetime fluorescent penetrant inspection (FPI) of the propeller hub, using paragraphs 3.A through 3.G. of the Accomplishment Instructions of McCauley Propeller Systems Alert Service Bulletin No. ASB254, dated August 20, 2007.

(j) For hubs that pass the FPI, perform a onetime eddy current inspection of the propeller hub, using paragraphs 4.A. through 4.F. of the Accomplishment Instructions of McCauley Propeller Systems Alert Service Bulletin No. ASB254, dated August 20, 2007.

(k) Remove cracked hubs from service and any other propeller parts found cracked.

Previous Credit

(l) If you performed the onetime inspection of the propeller hub using McCauley Propeller Systems Service Bulletin No. SB238A, or Alert Service Bulletin ASB254, both dated August 20, 2007, before the effective date of this AD, you have satisfied the inspection requirements of this AD.

Interim Action

(m) These actions are interim actions and we may take further rulemaking actions in the future.

Alternative Methods of Compliance

(n) The Manager, Wichita Aircraft Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

Special Flight Permits

(o) Under 14 CFR part 39.23, we are limiting the special flight permits for this AD as follows:

(1) The propeller must have no signs of external oil leakage from the hub; and

(2) The propeller has no current reports of abnormal operation or vibration.

Related Information

(p) Contact Jeff Janusz, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, Small Airplane Directorate, 1801 Airport Road, Wichita, KS 67209; e-mail: *jeff.janusz@faa.gov;* telephone (316) 946–4148; fax: (316) 946–4107, for more information about this AD.

Material Incorporated by Reference

(q) You must use McCauley Propeller Systems, Service Bulletin No. ASB254, dated August 20, 2007, to perform the inspections required by this AD. The Director of the Federal Register approved the incorporation by reference of this service bulletin in

accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Contact McCauley Propeller Systems, P.O. Box 7704, Wichita, KS 67277–7704; telephone (800) 621–7767, for a copy of this service information. You may review copies at the FAA, New England Region, 12 New England Executive Park, Burlington, MA; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on July 1, 2010.

Francis A. Favara,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 2010–16615 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0308; Directorate Identifier 2010–NE–17–AD; Amendment 39–16366; AD 2010–14–21]

RIN 2120–AA64

Airworthiness Directives; Thielert Aircraft Engines GmbH Model TAE 125–01 Reciprocating Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Service has shown that the small outlet of the blow-by oil separators, part number 02–7250–18100R1; 02–7250–18100R2; 02–7250–18100R3; 02–7250–18100R4; 02–7250–18300R1; 02–7250–18300R2; 02–7250–18300R3; 02–7250–18300R4; or 02–7250–18300R5, may cause a blow-by gas pressure increase inside the crankcase of the engine in excess of the oil seal design pressure limits. Leaking engine oil may adversely affect the gearbox clutch or the engine lubrication system. This condition, if not corrected, could lead to in-flight cases of engine power loss or ultimately, shutdown.

We are issuing this AD to prevent loss of engine power or uncommanded engine shutdown during flight due to excessive crankcase blow-by gas pressure.

DATES: This AD becomes effective August 17, 2010. The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 17, 2010.

ADDRESSES: The Docket Operations office is located at Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

FOR FURTHER INFORMATION CONTACT: Tara Chaidez, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; *e-mail: tara.chaidez@faa.gov;* telephone (781) 238–7773; fax (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on April 5, 2010 (75 FR 17084). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states that:

Service has shown that the small outlet of the blow-by separators, part number 02–7250–18100R1; 02–7250–18100R2; 02–7250–18100R3; 02–7250–18100R4; 02–7250–18300R1; 02–7250–18300R2; 02–7250–18300R3; 02–7250–18300R4; or 02–7250–18300R5, may cause a blow-by gas pressure increase inside the crankcase of the engine in excess of the oil seal design pressure limits. Leaking engine oil may adversely affect the gearbox clutch or the engine lubrication system. This condition, if not corrected, could lead to in-flight cases of engine power loss or ultimately, shutdown.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

Based on the service information, we estimate that this AD will affect about 250 Thielert Aircraft Engines GmbH model TAE 125–01 engines installed on airplanes of U.S. registry. We also estimate that it will take about 1.5 work-hours per engine to comply with this AD. The average labor rate is $85 per work-hour. Required parts will cost about $1,500 per engine. Based on these figures, we estimate the cost of the AD on U.S. operators to be $406,875.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (phone (800) 647–5527) is provided in the **ADDRESSES** section. Comments will be

available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–21 Thielert Aircraft Engines GmbH: Amendment 39–16366. Docket No. FAA–2010–0308; Directorate Identifier 2010–NE–17–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Thielert Aircraft Engines GmbH model TAE 125–01 reciprocating engines with any of the following part number blow-by oil separators installed:

TABLE 1—PART NUMBERS OF AFFECTED BLOW-BY OIL SEPARATORS

02–7250–18100R1	02–7250–18100R2	02–7250–18100R3
02–7250–18100R4	02–7250–18300R1	02–7250–18300R2
02–7250–18300R3	02–7250–18300R4	02–7250–18300R5

These engines are installed in, but not limited to, Diamond Aircraft Industries Model DA 40, Piper PA–28–161 (Supplemental Type Certificate (STC) No. SA03303AT), and Cessna 172 (STC No. SA01303WI) airplanes.

Reason

(d) Service has shown that the small outlet of the blow-by oil separators, part number 02–7250–18100R1; 02–7250–18100R2; 02–7250–18100R3; 02–7250–18100R4; 02–7250–18300R1; 02–7250–18300R2; 02–7250–18300R3; 02–7250–18300R4; or 02–7250–18300R5, may cause a blow-by gas pressure increase inside the crankcase of the engine in excess of the oil seal design pressure limits. Leaking engine oil may adversely affect the gearbox clutch or the engine lubrication system. This condition, if not corrected, could lead to in-flight cases of engine power loss or ultimately, shutdown.

This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. We are issuing this AD to prevent loss of engine power or uncommanded engine shutdown during flight due to excessive crankcase blow-by gas pressure.

Actions and Compliance

(e) Unless already done, do the following actions:

(1) Remove the blow-by oil separators listed by part number in Table 1 of this AD within the next 110 flight hours after the effective date of this AD.

(2) Use the Measures section of Thielert Aircraft Engines GmbH Service Bulletin No. TM TAE 125–0019, Revision 1, dated March 5, 2009, to do the removal from service.

FAA AD Differences

(f) None.

Alternative Methods of Compliance (AMOCs)

(g) The Manager, Engine Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

Related Information

(h) Refer to European Aviation Safety Agency AD 2010–0020, dated February 8, 2010, for related information.

(i) Contact Tara Chaidez, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; *e-mail: tara.chaidez@faa.gov;* telephone (781) 238–7773; fax (781) 238–7199, for more information about this AD.

Material Incorporated by Reference

(j) You must use Thielert Aircraft Engines GmbH Service Bulletin No. TM TAE 125–0019, Revision 1, dated March 5, 2009, to do the actions required by this AD, unless the AD specifies otherwise.

(1) The Director of the Federal Register approved the incorporation by reference of this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact Thielert Aircraft Engines GmbH, Platanenstrasse 14 D–09350, Lichtenstein, Germany, *telephone:* +49–37204–696–0; *fax:* +49–37204–696- 55; *e-mail: info@centurion-engines.com.*

(3) You may review copies at the FAA, New England Region, 12 New England Executive Park, Burlington, MA; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on July 1, 2010.

Francis A. Favara,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Airworthiness Directives; The Boeing Company Model 757 Airplanes, Model 767 Airplanes, and Model 777–200 and –300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Model 757 airplanes, Model 767 airplanes, and Model 777–200 and –300 series airplanes. This AD requires repetitive inspections for damage of the electrical terminal at the left and right flightdeck window 1, and corrective actions if necessary. This AD also allows for replacing the flightdeck window 1 with a new improved flightdeck window equipped with different electrical connections, which terminates the repetitive inspections for that flightdeck window 1. This AD results from several reports of electrical arcs at the terminal blocks of the electrically heated flightdeck window 1. We are issuing this AD to prevent smoke and fire in the cockpit, which could lead to loss of visibility, and injuries to or incapacitation of the flightcrew.

DATES: This AD is effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of August 17, 2010.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; e-mail *me.boecom@boeing.com;* Internet *https://www.myboeingfleet.com.*

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is the Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Louis Natsiopoulos, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6478; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an airworthiness directive (AD) that would apply to certain Model 757 airplanes, Model 767 airplanes, and Model 777–200 and –300 series airplanes. That NPRM was published in the **Federal Register** on March 13, 2008 (73 FR 13483). That NPRM proposed to require repetitive inspections for damage of the electrical terminal at the left and right flightdeck window 1, and corrective actions if necessary. That NPRM also proposed to allow for replacing the flightdeck window 1 with a new improved flightdeck window equipped with different electrical connections, which would terminate the repetitive inspections for that flightdeck window 1.

Explanation of Revised Service Information

After the NPRM was issued, Boeing issued the following service bulletins:

- Boeing Special Attention Service Bulletin 757–30–0019, Revision 2, dated April 19, 2010, for Model 757–200, –200CB, and –200PF series airplanes.
- Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010, for Model 757–300 series airplanes.

We referred to Boeing Special Attention Service Bulletin 757–30–0019, and Boeing Special Attention Service Bulletin 757–30–0020, both Revision 1, both dated December 19, 2007, as appropriate sources of service information for doing the actions proposed in the NPRM.

The actions specified in Boeing Special Attention Service Bulletins 757–30–0019 and 757–30–0020, both Revision 2, include an additional inspection of the J1 and J4 (upper) terminals; however, the inspection of the upper connections is not included in this AD. We find that to delay this action to include the inspection of the J1 and J4 terminals and to ensure that the public has sufficient time to consider and comment on the additional actions, would be inappropriate in light of the unsafe condition identified on the J5 terminal. We are considering additional rulemaking to require the inspection of the J1 and J4 terminals.

Boeing Special Attention Service Bulletins 757–30–0019 and 757–30–0020, both Revision 2, include a reduced compliance time of 500 flight hours or 150 days, whichever occurs first, for the detailed inspection for damage specified in paragraph (f) of this AD (paragraph (g) of the NPRM). We have not changed this AD to include the reduced compliance time. We have determined that the compliance time, as proposed, represents an appropriate interval of time in which the required actions can be performed in a timely manner within the affected fleet, while still maintaining an adequate level of safety. We find that to delay this action to ensure that the public has sufficient time to consider and comment on the reduced compliance time, would be inappropriate in light of the identified unsafe condition.

For Model 757 airplanes, Boeing Special Attention Service Bulletins 757–30–0019 and 757–30–0020, both Revision 2, also include a revised interval for repeating the detailed inspection for damage specified in paragraphs (f) and (g) of this AD (paragraphs (g) and (h) of the NPRM). We have determined that extending the repetitive intervals, as recommended by the manufacturer, is consistent with data on in-service failure reports and will not adversely affect safety for the affected airplane models. Therefore, we have changed paragraphs (f) and (g) of this AD (paragraphs (g) and (h) of the NPRM), to include the revised interval. For windows manufactured by GKN Aerospace Transparency Systems (GKN), the inspection is now specified at intervals not to exceed 12,000 flight hours or 48 months, whichever occurs later. For windows manufactured by PPG Aerospace (PPG), the inspection is now specified at intervals not to exceed 6,000 flight hours or 24 months, whichever occurs later. We have also revised this same repetitive interval for Model 767 airplanes, and Model 777–200 and –300 series airplanes, as explained under "Requests to Extend Repetitive Inspection Interval" below.

The Compliance paragraphs (1.E.) of Boeing Special Attention Service Bulletins 757–30–0019 and 757–30–0020, both Revision 2, give additional time for doing the corrective action if the screw is cross threaded and the terminal lug is tight. We have added paragraph (h)(1) to this AD to specify doing the corrective action within 150 days or 500 flight hours after the inspection, whichever occurs first, rather than before further flight.

We have changed Table 1 of this final rule to refer to Boeing Special Attention Service Bulletin 757–30–0019, Revision 2, dated April 19, 2010; and Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010; as appropriate sources of service information. We have also changed Table 2 of this final rule to state that actions done before the effective date of this AD in accordance with Boeing Special Attention Service Bulletin 757–30–0019 or Boeing Special Attention Service Bulletin 757–30–0020, both Revision 1, both dated December 19, 2007, are acceptable for compliance with the corresponding requirements of this AD.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received from the 10 commenters.

Support for the NPRM

The National Transportation Safety Board (NTSB) fully supports the proposed action for the lower (J5) terminal.

Issue a Supplemental NPRM or Withdraw the NPRM

Air Transport Association (ATA) agrees with the intent of the proposal, but specifies that the NPRM, as written, has fundamental and detailed flaws that may not resolve the unsafe condition; instead, the NPRM focuses on electrical connections on another side of the terminal block, which likely are not the cause of the unsafe condition. ATA recommends that we instead issue a

supplemental NPRM that takes into consideration the comments of member airlines.

American Airlines (AAL) indicates that the proposed rule is premature and should be withdrawn until the NTSB has completed its investigation of an incident of window heat arcing on a Model 757 airplane at the J1 and J4 terminals. The NTSB also encourages amending the NPRM (we infer by supplemental NPRM) to include inspections of the J1 and J4 terminals on all of the affected flightdeck windows. The NTSB states that in a small number of cases it determined that a loose or inadequate connection at the J1 terminal or J4 terminal is the most likely cause of the smoke and/or fire in the cockpit.

AAL, Continental Airlines (CAL), Delta Airlines (DAL), and United Airlines (UAL) request we withdraw the NPRM until we do further investigation to identify the root cause of the window arcing events. The commenters state that the proposed AD should mandate a comprehensive and worthwhile solution; that a credible analysis providing the true root cause of the failure must be completed first; and that further investigation could alter or add to the solution, thus rendering it more meaningful. Certain commenters suggest what the root causes might be, including the following:

- AAL contends that material design choices contribute to unintended cross threading and apparent lack of screw retention over time; and that under-torque of the connector screw as the lone primary failure is speculative and that a more likely source of heating is arcing along the braided power wire downstream of the window heat connector. In addition, AAL service history shows the primary cause of failure to be arcing at the heat braided power wire at the lower window along with delamination between the window heat layer and the outer glass.
- CAL states that it appears the root cause attributed to cross threading might actually be faulty solder joints, and that stripping of the tapped brass block due to repetitive application of current torque requirements could be a driving force behind in-service failures.
- DAL notes that poor design/manufacture of the flightdeck window 1 terminal contributes to arcing events and that the design does not support a long-term robust connection to the screw.

We disagree with the requests to withdraw the NPRM or issue a supplemental NPRM.

The incident of window heat arcing at the J1 and J4 terminals that was investigated by the NTSB is related to the unsafe condition addressed by the NPRM that preceded this final rule. We have reports of four events involving arcing of the flightdeck window heat system at the upper aft (J1) and upper forward (J4) terminals on the first officer's flightdeck window that caused the inner pane of glass to fracture. The events, which occurred between January 2001 and August 2008, all occurred on Model 757 airplanes. Withdrawing the NPRM to include the upper terminals for Model 757 airplanes would be inappropriate as it would delay this AD action, which addresses failures of the lower (J5) terminal for Model 757 airplanes, Model 767 airplanes, and Model 777–200 and –300 series airplanes. However, we are considering additional rulemaking to address arcing at the upper (J1 and J4) terminals on Model 757 airplanes only.

Regarding the requests to determine the root causes, we disagree with withdrawing the NPRM until a different root cause is identified. Although we agree with the commenters that the failure mode that causes a significant arcing event is the melting of solder or the de-soldering of the terminal connection, we disagree as to the cause of the de-soldering of the terminal connection and subsequent arcing.

We have received reports that attribute the primary cause of the overheating of the terminal to a cross-threaded screw, a loose screw, or an incorrectly installed screw. We have also found that the majority of the arcing events happened within 500 flight hours after the flightdeck window was replaced or had undergone maintenance. The unintended cross threading and apparent lack of screw retention over time have been reported on flightdeck windows manufactured by both GKN and PPG. The failure of the moisture seal and the delamination of the flightdeck window plies are addressed by other ADs and other service bulletins; but we point out that such failures are detectable.

We find that the actions required by this AD will identify failures of the electrical terminals, regardless of the root cause, and that the corrective actions apply to all detected failures. However, if new information becomes available to justify revising this AD, we will consider further rulemaking.

For the above reasons, no change has been made to the AD in response to the requests to withdraw the NPRM or issue a supplemental NPRM.

Requests To Extend Repetitive Inspection Interval

Air France, ATA, and Northwest Airlines (NWA) request that we extend the interval for the repetitive inspection from 6,000 flight hours to 7,800 flight hours (Air France) or 8,000 flight hours (ATA and NWA). Air France contends that the inspections should be matched with the schedule for light maintenance checks. ATA recommends that we extend the interval based on service experience. NWA indicates there would not be an appreciable effect on safety in extending the inspection to an interval where the task can be performed during a scheduled "C" check in an environment more conducive to such maintenance.

We partially agree with the requests to extend the repetitive inspection interval. We agree with the request to extend the interval for GKN flightdeck windows. As explained previously under "Explanation of Revised Service Information," for windows manufactured by GKN, the inspection is now specified in this AD at intervals not to exceed 12,000 flight hours or 48 months, whichever occurs later. According to reports the failure rate of GKN flightdeck windows seems to be substantially lower than the failure rate of the PPG flightdeck windows, and the severity of events of the GKN flightdeck windows is less.

We disagree with extending the inspection interval for PPG flightdeck windows from 6,000 flight hours; however, we have determined that specifying the compliance time as 6,000 flight hours or 24 months, whichever occurs later, will provide relief to operators. In establishing the 6,000-flight-hour interval for those flightdeck windows, we considered not only the frequency of occurrence of the electrical connection failures, the time required to perform the inspection, and the consequent risk of uncorrected unsafe conditions, but also the scheduling of the inspections so they can be accomplished during regular maintenance down time. We determined that an interval of 6,000 flight hours would give the operators ample time to schedule the proposed actions at a routine scheduled maintenance and detect an unsafe condition before an event.

We have changed paragraphs (f) and (g) of this AD (paragraphs (g) and (h) of the NPRM) to include the revised intervals.

Requests To Clarify Intent of 500 Flight Hours for Inspection

AAL, DAL, and UAL request that we clarify the intent of the initial repetitive inspection that is proposed within 500 flight hours after the corrective action for certain airplanes. DAL points out that as written in the NPRM an operator

could accomplish the detailed inspection after one flight hour and be in compliance with the proposed rule. UAL would like to know if the intent is to perform a quality check (which could be performed shortly after the replacement), or if the intent is to check for degradation of the torque value over time. UAL states that if the intent is the latter, the wording should be "after 500 flight hours" instead of "within 500 flight hours." AAL also states that the inspection could be done within an hour after the corrective action and asks if the intent is simply to do a quality check.

We agree that the 500-flight-hour compliance time for the initial repetitive inspection for certain airplanes, as required by paragraph (g) of this AD (paragraph (h) of the NPRM), should be clarified. The intent of the inspection of certain airplanes "within 500 flight hours after the corrective action," as specified in paragraph (g) of this AD, is a quality assurance check. The phrase "within 500 flight hours after the corrective action" correctly allows for doing the initial repetitive inspection before further flight following accomplishment of the corrective action. According to the majority of the reported arcing events, the result of an incorrectly assembled screw/lug electrical connection (a heated terminal and the possibility of subsequent arcing) occurred in-service after the assembly of the electrical connection. Additionally, the phrase "within 500 flight hours after the corrective action" would also provide sufficient time for operators of mixed or large fleets to do the inspection without compromising safety. We have not changed the AD in this regard.

Requests To Exclude Certain Window From Proposed Actions

ATA, on behalf of its member AAL, requests that part number (P/N) 141T4800 flightdeck windows be excluded from the actions proposed in the NPRM. AAL has data that confirm it has not experienced what they deemed a "catastrophic" arcing or smoke event on a flightdeck window, P/N 141T4800. All of the "catastrophic" arcing and smoke events AAL has experienced have occurred on flightdeck window P/N 141T4801 with lug and screw electrical connections. AAL states that the P/N 141T4800 terminal blocks might show minor damage; however, the damage is limited and contained. AAL further asserts that the connection found in the terminating action proposed in the NPRM is exactly the P/N 141T4800 connection; therefore, the AD should exclude flightdeck windows that currently have P/N 141T4800.

We partially agree with the commenters. We agree that the performance of the P/N 141T4800 flightdeck window appears to be better than the P/N 141T4801 flightdeck window with lug and screw electrical connections; its failure rate is lower and the failures are not as severe. We disagree with excluding the P/N 141T4800 flightdeck windows from the AD because we have received reports of arcing events with the P/N 141T4800 flightdeck windows that require corrective action. However, we find that some mitigation is appropriate because the failure rate of the screw/lug terminal equipped PPG windshields to screw/lug equipped GKN flightdeck windows is about 2 to 1. Therefore, we have changed paragraphs (f) and (g) of this AD (paragraphs (g) and (h) of the NPRM) to specify a repetitive interval of 12,000 flight hours or 48 months, whichever occurs later, for screw/lug terminal equipped GKN flightdeck windows.

Requests To Include Certain P/N as Terminating Action

GKN and AAL state that flightdeck window P/N 141T800–13/–14 should be included as a terminating action in the NPRM. The commenters state that service information points to damaged solder joints as the primary cause of the electrical arcs and point out that the P/N 141T800–13/–14 flightdeck windows do not incorporate the design feature that causes extreme arcing, an ignition source, and melting of the glass; and that the design does not incorporate features that are subject to assembly error. Specifically, the commenters state that at the cockpit side, the flightdeck window P/N 141T800–13/–14 uses a screw connector which is seen as superior to the pin and socket connector used on the proposed terminating action windshield; this superiority is due to the high clamping pressure and ability to re-tighten or replace the screw in addition to the excellent material choice for the threaded insert.

We disagree with the request to include flightdeck window P/N 141T800–13/–14 as a terminating action. While we agree that damaged solder joints are the primary cause for the electrical arcs, we point out that the primary cause of loose connections is the incorrect torque of the screw or an incorrectly installed screw. A loose connection increases the heat at the terminal, which can cause damage to the internal solder joint. A loose screw or an incorrectly installed screw is due to limited access on the airplane. The pin/socket connector, which is the design proposed as the optional terminating action in the NPRM, is assembled in a controlled environment on a bench and with full access. The screw/lug design proposed by the commenters does not provide an equivalent level of safety to that of the pin/socket design, which is not subject to the same assembly errors. Therefore, we have not changed the AD in this regard.

Request for Further Analysis Before Terminating Action

CAL, DAL, and ATA on behalf of its member AAL, request that we and the manufacturer perform an engineering analysis to determine whether pin and socket connections, proposed as an optional terminating action, offer any advantage over screw and lug connections. AAL has had considerable experience with pin and socket connections and states that carrying any appreciable current through a pin and socket connection is less reliable than a ring terminal and screw connection. CAL states that it has had problems with pin and socket connections; however, it applauds the mechanical joining at the mesh to block interface. CAL considers that more time is needed to determine if the pin and socket design is more reliable. DAL is unaware of any destructive testing that has been performed to substantiate the use of the new design as the corrective action for flightdeck window arcing events.

We disagree with the need for further study. The pin and socket connection of the electrical heat terminal was designed and qualification tested for contact retention and current-carrying capacity by the suppliers as part of the certification process of the block. The testing verified the integrity of the design and showed it not to have nuisance failures. Further, the pin and socket technology is well-established and used in a significant number of electrical applications on the airplane. The pin and socket connectors for the flightdeck window heat terminal have been in service since 2004 without any reported failures. The failures that the commenters referred to were due to manufacturing error rather than a design defect. We have not changed the AD in this regard.

Request To Make Terminating Action Mandatory

The NTSB asks that we make the installation of a new flightdeck window mandatory rather than optional and states that the installation would prevent similar events of smoke or fire in the cockpit. The NTSB notes that the NPRM proposes installation of a new

flightdeck window that incorporates the pin and socket electrical connection that provides a more secure connection and is less susceptible to installation errors. This new flightdeck window design also uses a crimped ring terminal that is internal to the terminal block; the crimped ring terminal connects the flightdeck window heat braid wire to the terminal, which addresses some of the solder issues suspected in the NTSB's investigations around the J1 and J4 terminals.

We partially agree. While we agree with the commenter that the installation of the new flightdeck window with the pin and socket electrical connection is more robust because it is not as susceptible to assembly errors as is the flightdeck window with the screw/lug connection, we disagree with the request to make the installation of the flightdeck window with the new pin and socket electrical connection mandatory. The repetitive inspections and corrective actions required by this AD provide adequate means to maintain the safety of the screw/lug flightdeck windows. Requiring the replacement of the flightdeck windows is not necessary to address the unsafe condition. We have not changed the AD in this regard.

Request To Improve Access to Terminal Block

CAL notes that access to the terminal block on Boeing Model 757 airplanes is "atrocious"; even with small hands it cannot be held. CAL does not consider it a coincidence that this connection is the "problem child" because access is so poor. This limited access, coupled with poor "view-ability" turns a simple installation into a very complex installation. CAL requests that certain aircraft improvements and modifications be addressed, as well as human factor items such as special tooling to be developed.

We infer that the commenter asks us to address this issue in the AD. We partially agree with the request. The commenter is correct in saying that access to the electrical terminal block makes it difficult to achieve the torque limits outlined in the airplane maintenance manual and that this could be the primary reason for incorrectly assembled electrical terminations. We note that the optional terminating action of this AD (pin and socket design) is much easier to accomplish in the existing limited space. In addition, we find that to delay this action to allow time for modifications and human factor changes would be inappropriate in light of the identified unsafe condition. The commenter should note that under the provisions of paragraph (k) of the final rule, we will consider requests for approval of an alternative method of compliance (AMOC) if sufficient data are submitted to substantiate that the design change would provide an acceptable level of safety.

We have not changed the AD in this regard.

Request To Revise Service Bulletins

AAL requests revisions to the service bulletins listed in the table titled "Requested revisions."

REQUESTED REVISIONS

Boeing special attention service bulletin—	Revision—	Dated—
757–30–0019	1	December 19, 2007.
757–30–0020	1	December 19, 2007.
767–30–0041	Original	December 5, 2007.
777–30–0012	2	December 19, 2007.

AAL lists several editorial changes in the service bulletins in its comments, and specifies that revisions would reduce the burden of processing numerous requests for AMOCs.

UAL requests that we revise Boeing Special Attention Service Bulletin 777–30–0012, Revision 2, dated December 19, 2007, to clarify the following statement: "There is a time limit on how long the old number 1 flightdeck window can be used." UAL would like to know if the time limit refers to the serviceability limit of the old flightdeck window, or the availability of the flightdeck window, or to future spares.

We have discussed AAL's concerns with Boeing. In addition, we agree with UAL that the statement about the time limit is in error and should not be included in the service bulletin. We have also referred this concern to Boeing. We have not changed the AD in this regard.

Request To Add Reference to Table 1

Boeing asks that we add a reference to Table 1 of the NPRM in the paragraph titled "Actions Accomplished Previously," for the latest revision of the released service bulletins. Boeing points out that the service bulletins listed in both Table 1 and Table 2 are acceptable before the effective date of the AD.

We disagree with the request to refer to Table 1 in the "Credit for Actions Accomplished Previously" paragraph of this AD. The intent of the "Credit for Actions Accomplished Previously" paragraph is to list service bulletins that are acceptable for compliance before the effective date of the AD, but not after the effective date of the AD. The service bulletins listed in Table 1 of the AD are acceptable for compliance both before and after the effective date of the AD. The acceptable use of the service bulletins listed in Table 1 of this AD before the effective date is covered by the statement in paragraph (e) of this AD that says, "Comply with this AD within the compliance times specified, unless already done." We have not changed the AD in this regard.

Request To Add Statement to AD Regarding Window Manufacturer

Boeing asks that we add the following statement to the "Alternative Methods of Compliance" paragraph of the NPRM: "These inspections are for the #1 flight deck windows regardless of window manufacturer." Boeing explains that there are two different suppliers for the flightdeck windows, but each flightdeck window is connected to the airplane side wiring in the same manner and requires the specified inspections.

We disagree with the request to change this AD to add the statement. The AD requires inspection of the flightdeck windows according to the Accomplishment Instructions of the applicable service bulletin. The service bulletins listed in this AD apply to all flightdeck windows, regardless of manufacturer. We have not changed the AD in this regard.

Request To Take Similar Action for Model 747 Series Airplanes

The NTSB believes that we should take similar action for Model 747 series airplanes because a similar condition exists on those airplanes.

We agree with the NTSB and are considering rulemaking to address a similar unsafe condition on Model 747 series airplanes. We have not changed this AD in this regard.

Clarification of Service Bulletin Information

The last column in the table in paragraph 1.E., "Compliance," of Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010, specifies repeating the inspection for damage at "intervals not to exceed 6,000 flight hours or 24 months." The intent of that column is to specify an interval "not to exceed 6,000 flight hours or 24 months, whichever occurs later." We have included the correct interval in paragraphs (f) and (g) of this AD.

In several places of the Compliance paragraph (1.E.) of Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010; and Boeing Special Attention Service Bulletin 757–30–0019, Revision 2, dated April 19, 2010; the "Action" column implies that both the left and right windows must be replaced. For example, "* * * replace windshield in accordance with Work Package 1, step 3. *and* Work Package 2, step 3." The intent is to state, "* * * Work Package 1, step 3. *or* Work Package 2, as applicable * * *." Operators are to use one or the other (or both) work instruction, as applicable, to replace the window(s) that need replacing. We have included this information in paragraph (h)(2) of this AD.

The Action column for Inspection Condition 4 in the table in paragraph 1.E., "Compliance," of Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010, states "3. If terminal lug is still loose." That statement should be "3. If terminal lug is still loose then disassemble, inspect and reassemble the electrical connection."

Explanation of Additional Changes

We have clarified paragraph (f) of this AD (paragraph (g) of the NPRM) to specify that Work Packages 1 and 2 apply to the J5 terminal. As stated previously, the Accomplishment Instructions of Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010, and Boeing Special Attention Service Bulletin 757–30–0019, Revision 2, dated April 19, 2010, include an inspection of the J1 and J4 (upper) electrical connections; however, the inspection of these connections is not included in this AD.

We have clarified paragraph (g) of this AD (paragraph (h) of the NPRM) to remove the phrase "or tightening a loose screw" from the description of corrective actions that requires additional inspection within 500 flight hours. The only corrective action after which the inspection is necessary is replacement.

After the NPRM was issued, we reviewed the figures we have used over the past several years to calculate AD costs to operators. To account for various inflationary costs in the airline industry, we find it necessary to increase the labor rate used in these calculations from $80 per work hour to $85 per work hour. The cost impact information, below, reflects this increase in the specified hourly labor rate.

We have removed the "Service Bulletin Reference" paragraph from this AD. That paragraph was identified as paragraph (f) in the NPRM. Instead, we have provided the full service bulletin citations throughout this AD.

We also have revised this final rule to identify the legal name of the manufacturer as published in the most recent type certificate data sheet for the affected airplane models.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We also determined that these changes will not increase the economic burden on any operator or increase the scope of the AD.

Costs of Compliance

We estimate that this AD affects 1,212 airplanes of U.S. registry. The following table provides the estimated costs for U.S. operators to comply with this AD. The average labor rate is $85 per work hour.

COSTS

Action	Work hours	Parts	Cost per product	Fleet cost
Inspection	1	None	$85, per inspection cycle	$103,020, per inspection cycle.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

You can find our regulatory evaluation and the estimated costs of compliance in the AD Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(f), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–15–01 The Boeing Company: Amendment 39–16367. Docket No. FAA–2008–0274; Directorate Identifier 2008–NM–038–AD.

Effective Date

(a) This airworthiness directive (AD) is effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to the airplanes identified in Table 1 of this AD, certificated in any category.

TABLE 1—AIRPLANES AFFECTED BY THIS AD

The Boeing Company Model–	As identified in Boeing Special Attention Service Bulletin–
757–200, –200CB, and –200PF series airplanes	757–30–0019, Revision 2, dated April 19, 2010.
757–300 series airplanes	757–30–0020, Revision 2, dated March 31, 2010.
767–200, –300, and –300F series airplanes	767–30–0039, dated December 5, 2007.
767–400ER series airplanes	767–30–0041, dated December 5, 2007.
777–200 and –300 series airplanes	777–30–0012, Revision 2, dated December 19, 2007.

Unsafe Condition

(d) This AD results from several reports of electrical arcs at the terminal blocks of the electrically heated flightdeck window 1. We are issuing this AD to prevent smoke and fire in the cockpit, which could lead to loss of visibility, and injuries to or incapacitation of the flightcrew.

Compliance

(e) Comply with this AD within the compliance times specified, unless already done.

Inspection and Corrective Actions

(f) Within 500 flight hours after the effective date of this AD, do a detailed inspection for damage (including arcing, loose terminal, or heat damage) of the electrical terminal (J5 terminal) at the left and right flightdeck window 1, and do all applicable corrective actions, by accomplishing all the actions for the J5 terminal specified in Work Packages 1 and 2 of the applicable service bulletin specified in Table 1 of this AD, except as provided by paragraph (h) of this AD. Except as provided by paragraph (h) of this AD, do all applicable corrective actions before further flight. Except as provided by paragraph (g) of this AD, repeat the detailed inspection at the applicable interval specified in paragraph (f)(1) or (f)(2) of this AD. Doing the replacement specified in paragraph (i) of this AD terminates the repetitive inspection requirements of this paragraph for the replaced flightdeck window 1.

(1) For flightdeck windows manufactured by GKN with SCREW/LUG electrical connections, repeat the detailed inspection thereafter at intervals not to exceed 12,000 flight hours or 48 months, whichever occurs later.

(2) For flightdeck windows manufactured by PPG with SCREW/LUG electrical connections, repeat the detailed inspection thereafter at intervals not to exceed 6,000 flight hours or 24 months, whichever occurs later.

(g) For airplanes on which replacement with a new window 1 that uses screws and lugs for the electrical connections is done in accordance with Work Package 1 or 2 of the applicable service bulletin specified in Table 1 of this AD: Do the next detailed inspection within 500 flight hours after the corrective action, and repeat the inspection thereafter at the applicable interval specified in paragraph (g)(1) or (g)(2) of this AD. Doing the replacement specified in paragraph (i) of this AD terminates the repetitive inspection requirements of this paragraph for the replaced flightdeck window 1.

(1) For flightdeck windows manufactured by GKN with SCREW/LUG electrical connections, repeat the detailed inspection thereafter at intervals not to exceed 12,000 flight hours or 48 months, whichever occurs later.

(2) For flightdeck windows manufactured by PPG with SCREW/LUG electrical connections, repeat the detailed inspection thereafter at intervals not to exceed 6,000 flight hours or 24 months, whichever occurs later.

Exceptions

(h) Do the applicable actions specified in paragraph (f) of this AD except as provided by paragraphs (h)(1) and (h)(2) of this AD.

(1) If, during the inspection required by paragraph (f) of this AD, the screw is cross threaded and the terminal lug is tight, do the applicable corrective action within 150 days or 500 flight hours after the inspection, whichever occurs first.

(2) Where paragraph 1.E. of Boeing Special Attention Service Bulletin 757–30–0020, Revision 2, dated March 31, 2010, and Boeing Special Attention Service Bulletin 757–30–0019, Revision 2, dated April 19, 2010, states in the "Action" column to (for example) "* * * replace windshield in accordance with Work Package 1, step 3. *and* Work Package 2, step 3," the intent of the applicable service bulletin is to state, "* * * Work Package 1, step 3. *or* Work Package 2, as applicable * * *." Operators are to use one or the other (or both) work instruction, as applicable, to replace the window(s) that need replacing.

Optional Terminating Action

(i) Replacing a flightdeck window 1 that uses screws and lugs for the electrical connections with a flightdeck window that uses pins and sockets for the electrical connections in accordance with Work Packages 3 or 4 of the applicable service bulletin specified in Table 1 of this AD ends the repetitive inspection requirements of this AD for that window 1.

Credit for Actions Accomplished Previously

(j) Actions done before the effective date of this AD in accordance with the applicable service bulletin specified in Table 2 of this AD are acceptable for compliance with the corresponding requirements of this AD.

TABLE 2—ACCEPTABLE SERVICE BULLETINS

Boeing Special Attention Service Bulletin—	Revision—	Dated—
757–30–0019	Original	July 19, 2006.

Alternative Methods of Compliance (AMOCs)

(k)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Louis Natsiopoulos, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 917–6478; fax (425) 917–6590. Information may be e-mailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

Material Incorporated by Reference

(l) You must use the applicable service information contained in Table 3 of this AD to do the actions required by this AD, unless the AD specifies otherwise. If you accomplish the optional actions specified by this AD, you must use the applicable service information specified in Table 3 of this AD to perform those actions, unless the AD specifies otherwise.

(1) The Director of the Federal Register approved the incorporation by reference of this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1, fax 206–766–5680; e-mail *me.boecom@boeing.com;* Internet *https://www.myboeingfleet.com.*

(3) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(4) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2009–1249; Directorate Identifier 2009–NM–100–AD; Amendment 39–16358; AD 2010–14–13]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Model 777 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Model 777 airplanes. This AD requires inspecting the bolt, nut, and downstop of the slat track assembly to determine if the bolt, nut, or stops are missing and to determine if the thread protrusion of the bolt from the nut is within specified limits and parts are correctly installed, and related investigative and corrective actions if necessary. For certain airplanes, this AD also requires inspecting the slat cans at the outboard slat number 3 and 12 outboard main track locations for holes and wear damage, and corrective actions if necessary; and replacing the downstop hardware for the outboard slats number 3 and 12 outboard and inboard main track locations. This AD results from a report of a hole in the inboard main track slat can for outboard slat number 12 on a Model 777 airplane. The hole was caused when the bolt securing the downstop migrated out of the fitting and contacted the slat can. We are issuing this AD to detect and correct damage to the outboard slat main track slat cans, which can allow fuel leakage into the fixed wing leading edge in excess of the capacity of the draining system. Excess fuel leakage could result in an uncontained fire.

DATES: This AD is effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of August 17, 2010.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; e-mail me.boecom@boeing.com; Internet *https://www.myboeingfleet.com.*

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is the Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Duong Tran, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 917–6452; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an airworthiness directive (AD) that would apply to certain Model 777 airplanes. That NPRM was published in the **Federal Register** on January 7, 2010 (75 FR 950). That NPRM proposed to require inspecting the bolt, nut, and downstop of the slat track assembly to determine

if the bolt, nut, or stops are missing and to determine if the thread protrusion of the bolt from the nut is within specified limits and parts are correctly installed, and related investigative and corrective actions if necessary. For certain airplanes, that NPRM also proposed to require inspecting the slat cans at the outboard slat number 3 and 12 outboard main track locations for holes and wear damage, and corrective actions if necessary; and replacing the downstop hardware for the outboard slats number 3 and 12 outboard and inboard main track locations.

Relevant Service Information

We have reviewed Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010. The NPRM referred to Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, as the appropriate source of service information. Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, clarifies procedures, deletes a requirement, adds a note to allow a different fastener, revises an incorrect chamfer callout, and adds information that was published in Boeing Information Notice 777–57A0064 IN 01 and 777–57A0064 IN 02. Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, does not require additional work.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received from the commenters.

Support for the NPRM

Continental Airlines (Continental) supports the intent of the NPRM.

Request To Add Exception for Group 1 Airplanes

Boeing requests that we revise the NPRM to add a statement to paragraph (h) of the NPRM stating, "The outboard main track locations for slats 3 and 12 are excluded from the inspection defined in Table 3 of Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009." Boeing states that, for Group 1 airplanes, the slat tracks do not penetrate into the wing fuel tank at these locations. Boeing also states that, for all Group 2 airplanes, this inspection is accomplished via Table 4 of Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009. Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, states that for only Group 2 airplanes the outboard main track locations at slats 3 and 12 must be inspected. Boeing notes that it plans to issue a new revision to this service bulletin in June 2010 that contains this information.

We disagree with the commenter that such a revision is necessary. We have updated this final rule to refer to Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010. Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, has corrected this information. We have added Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, as the appropriate source of service information for the actions required by this AD, including paragraph (g)(2) of this AD (in paragraph (g)(2) of the NPRM we referred to the original issue of the service bulletin for the compliance times but did not specifically reference the service bulletin as the applicable source of service information for doing the actions). We have also added paragraph (j) to this final rule to provide credit for actions done in accordance with Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009.

Request To Add Exception for Group 2 Airplanes

Boeing further requests that we revise paragraph (h) of the NPRM to state, "For airplanes defined as Group 2 in Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, it is not necessary to perform the torque check on the downstop hardware for slats 3 and 12 as defined in Table 2 of Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009." Boeing states that at locations where a fastener is to be replaced by subsequent instructions in Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, a torque check is redundant and is not a technical requirement. Boeing states that the visual inspections are still in place to guarantee that damage caused by a loose fastener will be caught. Boeing also adds that Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, specifies compliance times for the fastener replacement that are less than those for the torque check. Boeing notes that it plans to issue a new revision to this service bulletin in June 2010 that contains this information.

We agree with the commenter that such a revision is necessary. We have updated this final rule to refer to Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010. However, we have added a new paragraph (i) to this final rule to clarify that this measurement is not necessary on slats 3 and 12. We have added Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, as the primary source of service information for accomplishing the actions required by this AD.

Request To Increase the Inspection Threshold to 12 Months

Continental requests that we revise the compliance time for the inspection from 6 months to 12 months after the effective date of the AD. Continental states that the current 6-month compliance time will not provide a practical period in which to complete the full inspection for its Model 777 fleet based on their maintenance schedule. Continental states that a 12-month threshold would not compromise the safety of the airplane because there are existing zonal inspection requirements in the referenced Maintenance Planning Document/ Maintenance Review Board (MPD/MRB) tasks, discrepancies in the area of interest could be detected through the required routine inspections. Continental states that with a frequency of every 1,125 days from delivery, most affected airplanes should have had at least one inspection performed in accordance with the MPD/MRB tasks.

We disagree. Due to the urgent nature of a potential excessive fuel leakage, we do not find it appropriate to revise the inspection threshold. Furthermore, the MPD/MRB zonal inspection requirements are not intense enough to detect certain unobvious discrepancies (*e.g.,* loose bolts and insufficient nut torque). However, under the provisions of paragraph (k) of this AD, we will consider requests for approval of an extension of the compliance time if sufficient data are submitted to substantiate that the extension would provide an acceptable level of safety. We have not changed the AD in regard to this issue.

Request To Clarify Requirements of Downstop Fitting Rework

EVA Airlines requests that we incorporate the information from Boeing Information Notice 777–57A0064 IN 01, dated May 28, 2009, which states that the chamfer for the −2 stop fitting in view B–B of Appendix A of Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, should be "0.820 − 0.850 × 90 Degrees − 120 Degrees" instead of "0.820 − 0.050 × 90 Degrees − 120 Degrees."

We agree that this information should be incorporated into the AD. Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, corrects this information. As stated previously, we have changed this AD to refer to Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, as the primary source of service information for accomplishing the actions required by this AD.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We also determined that these changes will not increase the economic burden on any operator or increase the scope of the AD.

Explanation of Change to Costs of Compliance

Since issuance of the NPRM, we have increased the labor rate used in the Costs of Compliance from $80 per work-hour to $85 per work-hour. The Costs of Compliance information, below, reflects this increase in the specified hourly labor rate.

Costs of Compliance

We estimate that this AD would affect 129 airplanes of U.S. registry. The following table provides the estimated costs for U.S. operators to comply with this AD.

TABLE—ESTIMATED COSTS

Action	Work hours	Average labor rate per hour	Parts	Cost per product	Number of U.S.-registered airplanes	Fleet cost
Inspection for Group 1 airplanes.	39	$85	$0	$3,315 per inspection cycle.	127	$421,005 per inspection cycle.
Inspection for Group 2 airplanes.	55	85	0	4,675 per inspection cycle.	2	9,350 per inspection cycle.
Replacement for Group 2 airplanes.	8	85	9,267	9,947	2	19,894.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

You can find our regulatory evaluation and the estimated costs of compliance in the AD Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–13 The Boeing Company: Amendment 39–16358. Docket No. FAA–2009–1249; Directorate Identifier 2009–NM–100–AD.

Effective Date

(a) This airworthiness directive (AD) is effective August 17, 2010.

Affected Ads

(b) None.

Applicability

(c) This AD applies to The Boeing Company Model 777–200, -200LR, -300, and -300ER airplanes, certificated in any category; as identified in Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010.

Subject

(d) Air Transport Association (ATA) of America Code 57: Wings.

Unsafe Condition

(e) This AD results from a report of a hole in the inboard main track slat can for outboard slat number 12 on a Model 777 airplane. The Federal Aviation Administration is issuing this AD to detect and correct damage to the outboard slat main track slat cans, which can allow fuel leakage into the fixed wing leading edge in excess of the capacity of the draining system. Excess fuel leakage could result in an uncontained fire.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Inspect the Slat Main Track Stop Hardware and Measure the Torque of the Slat Main Track Stop Hardware

(g) At the applicable time specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, except as required by paragraph (h) of this AD: Do the applicable actions specified in paragraphs (g)(1) and (g)(2) of this AD.

(1) For all airplanes: Do a detailed inspection of the slat main track stop hardware to determine if the bolt, nut, or stops are missing and to determine if the thread protrusion of the bolt from the nut is within specified limits, and do all applicable

related investigative and corrective actions, in accordance with the Accomplishment Instructions of Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, except as required by paragraph (i) of this AD. Do all applicable related investigative and corrective actions at the applicable time specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, except as required by paragraph (h) of this AD.

(2) For airplanes identified as Group 2 airplanes in Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010: Do a detailed inspection of the slat cans at the outboard slat number 3 and 12 outboard main track locations for holes and wear damage and do all applicable corrective actions, and replace the downstop hardware for the outboard slats number 3 and 12 outboard and inboard main track locations, in accordance with the Accomplishment Instructions of Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010. Do all applicable corrective actions at the applicable time specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010.

Exception to the Service Bulletin

(h) Where Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, specifies a compliance time after the date on the service bulletin, this AD requires compliance within the specified compliance time after the effective date of this AD.

(i) Where Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, specifies measuring torque of the nuts of the slat main track stop hardware of slats 3 and 12, this AD does not require that action for Group 2 airplanes.

Credit for Actions Accomplished Previously

(j) Actions accomplished before the effective date of this AD according to Boeing Alert Service Bulletin 777–57A0064, dated March 26, 2009, are considered acceptable for compliance with the corresponding actions specified in this AD.

Alternative Methods of Compliance (AMOCs)

(k)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Duong Tran, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6452; fax (425) 917–6590. Or, e-mail information to *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov*.

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD, if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

Material Incorporated by Reference

(l) You must use Boeing Service Bulletin 777–57A0064, Revision 1, dated May 6, 2010, to do the actions required by this AD, unless the AD specifies otherwise.

(1) The Director of the Federal Register approved the incorporation by reference of this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; e-mail *me.boecom@boeing.com;* Internet *https://www.myboeingfleet.com*.

(3) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(4) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Renton, Washington on June 21, 2010.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2010–16201 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2009–1215; Directorate Identifier 2009–NM–126–AD; Amendment 39–16364; AD 2010–14–19]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A330–200 and –300, and Model A340–200, –300, –500 and –600 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

* * * [P]artial blockage of the water absorbing filter element P/N (part number) QA06123 was observed several times. The blockage was created by carbon debris from the cartridge and from the burst disc of the Halon bottle.

This water absorbing filter element is part of Halon Dual-Filter Assembly installed also in the Flow Metering System (FMS) of the cargo compartment Fire Extinguishing System used in the A330 and A340 aeroplanes.

Blockage of the water absorbing filter element could lead to reduction of Halon outflow, leading to incapacity to maintain fire extinguishing agent concentration. Combined with fire, this could result in an uncontrolled fire in the affected compartment, which would constitute an unsafe condition.

* * * * *

We are issuing this AD to require actions to correct the unsafe condition on these products.

DATES: This AD becomes effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 17, 2010.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on December 29, 2009 (74 FR 68737). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

During the qualification test campaign at the supplier site of the prototype Flow

Metering Compact Unit (FMCU) Part Number (P/N) QA07907–03, partial blockage of the water absorbing filter element P/N QA06123 was observed several times. The blockage was created by carbon debris from the cartridge and from the burst disc of the Halon bottle.

This water absorbing filter element is part of Halon Dual-Filter Assembly installed also in the Flow Metering System (FMS) of the cargo compartment Fire Extinguishing System used in the A330 and A340 aeroplanes.

Blockage of the water absorbing filter element could lead to reduction of Halon outflow, leading to incapacity to maintain fire extinguishing agent concentration. Combined with fire, this could result in an uncontrolled fire in the affected compartment, which would constitute an unsafe condition.

To avoid water absorbing filter element blockage, this AD requires replacement [with improved dual-filter assemblies] or modification of the Halon dual-filter assemblies of the lower deck cargo compartment fire extinguishing system:

—In the forward cargo compartment for aeroplanes fitted with Lower Deck Cargo Compartment (LDCC) and

—In the bulk cargo compartment for aeroplanes fitted with Bulk Cargo Rest Compartment (BCRC) fire extinguishing system.

You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received.

Support for the NPRM

Delta Air Lines (DAL) supports the intent of the NPRM.

Request To Refer to Updated Revisions of Service Information

Air Transport Association (ATA), on behalf of its member DAL, requests that we revise paragraph (f) of the NPRM to reference the most recent version of Airbus Mandatory Service Bulletin A330–26–3040 as an acceptable means of compliance.

We agree to refer to Airbus Mandatory Service Bulletin A330–26–3040, Revision 03, dated November 9, 2009. Airbus has also released Mandatory Service Bulletin A340–26–4038, Revision 03, dated November 9, 2009; and Mandatory Service Bulletin A340–26–5019, Revision 04, dated December 11, 2009. The revisions introduce minor changes and add the Halon filter part number, but do not add any additional work. We have revised this final rule accordingly.

Request To Mandate a Specific Version of PALL Service Bulletin

ATA, on behalf of its member DAL, states that it will be unable to fully comply because of an inconsistency in the PALL service information. DAL requests that we revise the NPRM to mandate a specific issue of PALL Service Bulletin 6753–20–2. DAL states that specifying a specific issue level is necessary because acceptable part numbers vary in the work instruction in the different issues of this PALL service bulletin.

We disagree. Airbus has issued new service information, which specifies the specific part number, Halon filter having part number QA06753–03VSB or QA06753–03. The Airbus service information specified in Table 1 of this AD refers to PALL Service Bulletin 6753–20–2 only as an additional source of guidance for modifying the Halon dual-filter assembly. We have revised this final rule to include the latest version of the applicable Airbus service information and to provide credit for work done in accordance with previous revisions of the service information.

Request To Postpone Release of the Final Rule Until PALL Service Bulletin Is Revised

ATA, on behalf of its member DAL, requests that we postpone releasing the final rule until PALL revises its service information. DAL states that the paragraph 2.D of PALL Service Bulletin 6753–20–2 specifies when performing the modification in situ to continue to step 7 after accomplishing an airplane leak check. DAL states that PALL Service Bulletin 6753–20–2 specifies to proceed to step 4 if not performing the modification in situ. However, DAL notes that steps 2.D.7 and 2.D.8 state to remove tooling from the filter assembly, which is installed in step 5. DAL notes that if the modification is being performed in situ, then step 5 is not accomplished, and therefore, steps 7 and 8 cannot be accomplished.

We do not agree to wait to issue the final rule until PALL releases a revised service bulletin. However, we agree that clarification may be necessary. We have coordinated with Airbus, and it has confirmed that PALL Service Bulletin 6753–20–2, Issue 4, dated November 21, 2009, contains a discrepancy in a note. Airbus states that when performing the work 'on-wing,' operators using PALL Service Bulletin 6753–20–2, Issue 4, dated November 21, 2009, for guidance should go to step 9, not step 7. We have not changed the AD in regard to this issue.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We determined that these changes will not increase the economic burden on any operator or increase the scope of the AD.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow our FAA policies. Any such differences are highlighted in a **NOTE** within the AD.

Explanation of Change to Costs of Compliance

Since issuance of the NPRM, we have increased the labor rate used in the Costs of Compliance from $80 per work-hour to $85 per work-hour. The Costs of Compliance information, below, reflects this increase in the specified hourly labor rate.

Costs of Compliance

We estimate that this AD will affect 32 products of U.S. registry. We also estimate that it will take about 13 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $708 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $58,016, or $1,813 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–19 Airbus: Amendment 39–16364. Docket No. FAA–2009–1215; Directorate Identifier 2009–NM–126–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to airplanes certificated in any category, identified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD.

(1) Airbus Model A330–201, –202, –203, –223, –243, –301, –302, –303, –321, –322, –323, –341, –342 and –343 airplanes, all serial numbers, except those on which Airbus modification 55590 has been embodied in production.

(2) Airbus Model A340–211, –212, –213, –311, –312, –313, –541, and –642 airplanes, all serial numbers fitted with lower deck cargo compartment (LDCC), except those on which Airbus modification 55590 has been embodied in production.

(3) Airbus Model A340–311, –312, –313, –541, and –642 airplanes, all serial numbers fitted with bulk cargo rest compartment (BCRC), except those on which Airbus modification 56047 has been embodied in production.

Note 1: The BCRC is embodied in production on Model A340–300, A340–500, and A340–600 airplanes through the following Airbus modification (including but not limited to): 47198, 47884, 48895, 48710, 49136, 50107, 50900, 50901, or 51320.

Note 2: The fire extinguishing system for the BCRC is embodied in production on Model A340–500 and A340–600 airplanes through Mod 47197 (partial BCRC); on Model A340–500 and A340–600 airplanes through Mod 47883 (full BCRC); and on Model A340–300 airplanes through Mod 50108 (partial BCRC).

Subject

(d) Air Transport Association (ATA) of America Code 26: Fire protection.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

During the qualification test campaign at the supplier site of the prototype Flow Metering Compact Unit (FMCU) Part Number (P/N) QA07907–03, partial blockage of the water absorbing filter element P/N QA06123 was observed several times. The blockage was created by carbon debris from the cartridge and from the burst disc of the Halon bottle.

This water absorbing filter element is part of Halon Dual-Filter Assembly installed also in the Flow Metering System (FMS) of the cargo compartment Fire Extinguishing System used in the A330 and A340 aeroplanes.

Blockage of the water absorbing filter element could lead to reduction of Halon outflow, leading to incapacity to maintain fire extinguishing agent concentration. Combined with fire, this could result in an uncontrolled fire in the affected compartment, which would constitute an unsafe condition.

To avoid water absorbing filter element blockage, this AD requires replacement [with improved dual-filter assemblies] or modification of the Halon dual-filter assemblies of the lower deck cargo compartment fire extinguishing system:

—In the forward cargo compartment for aeroplanes fitted with Lower Deck Cargo Compartment (LDCC) and

—In the bulk cargo compartment for aeroplanes fitted with Bulk Cargo Rest Compartment (BCRC) fire extinguishing system.

Actions and Compliance

(f) Unless already done, do the following actions.

(1) Replace or modify the Halon dual-filter assemblies of the flow metering fire extinguishing system in the forward and bulk cargo compartments, as applicable, in accordance with the Accomplishment Instructions of the applicable service bulletin identified in Table 1 of this AD, at the applicable time specified in paragraphs (f)(1)(i), (f)(1)(ii), and (f)(1)(iii) of this AD.

TABLE 1—SERVICE BULLETINS

Airbus model—	Airbus mandatory service bulletin—	Revision—	Dated—
A330–200 and –300 airplanes	A330–26–3040	03	November 9, 2009.
A340–200 and –300 airplanes	A340–26–4038	03	November 9, 2009.
A340–500 and –600 airplanes	A340–26–5019	04	December 11, 2009.

(i) For airplanes fitted with Halon dual-filter assemblies part number (P/N) QA06753: Within 18 months after the effective date of this AD.

(ii) For Model A340–642 series airplanes, weight variant 101, 102, and 103 fitted with Halon dual-filter assembly P/N QA06753–01 or P/N QA06753–02: Within 18 months after the effective date of this AD.

(iii) For airplanes other than those identified in paragraph (f)(1)(ii) of this AD and fitted with Halon dual-filter assembly P/N QA06753–01 or P/N QA06753–02: Within 24 months after the effective date of this AD.

Note 3: The Halon dual-filter assembly P/N QA06753 is embodied in production through Airbus modification 40041. The Halon dual-filter assembly P/N QA06753–01 is only embodied in service through Airbus Service Bulletin A330–26–3030 or Airbus Service Bulletin A340–26–4038. The Halon dual-filter assembly P/N QA06753–02 is embodied in production through modification 47197 or 47883 or 50108 (BCRC) and 51065 or 51329 (LDCC) or in service through Airbus Service Bulletin A330–26–3030 or Airbus Service Bulletin A340–26–4038.

(2) Actions accomplished before the effective date of this AD according to the service bulletins listed in Table 2 of this AD are considered acceptable for compliance with the corresponding actions specified in this AD.

FAA AD Differences

Note 4: This AD differs from the MCAI and/or service information as follows:

(1) The second paragraph of the applicability of the MCAI specifies certain models except those on which Modification 55590 has been done. Paragraph (c)(2) of this AD specifies those models fitted with lower deck cargo compartment (LDCC), except those on which Modification 55590 has been done.

(2) Although the MCAI tells you to submit information to the manufacturer, this AD does not require such a submittal.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

Related Information

(h) Refer to MCAI European Aviation Safety Agency Airworthiness Directive 2009–0064, dated March 12, 2009, and the service information identified in Table 3 of this AD, for related information.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0383; Directorate Identifier 2009–NM–214–AD; Amendment 39–16362; AD 2010–14–17]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747SR, and 747SP Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747SR, and 747SP series airplanes. This AD requires repetitive detailed inspections of certain overwing intercostal webs, and related investigative and corrective actions if necessary. This AD results from reports of cracks in overwing intercostal webs. We are issuing this AD to detect and correct such cracking, which could grow and result in a severed intercostal. If an intercostal is severed, cracks could develop in the adjacent frame structure and skin, resulting in a rapid loss of cabin pressure.

DATES: This AD is effective August 17, 2010.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of August 17, 2010.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; e-mail *me.boecom@boeing.com*; Internet *https://www.myboeingfleet.com.*

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is the Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Ivan Li, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6437; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an airworthiness directive (AD) that would apply to certain Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747SR, and 747SP series airplanes. That NPRM was published in the **Federal Register** on April 21, 2010 (75 FR 20792). That NPRM proposed to require repetitive detailed inspections of certain overwing intercostal webs, and related investigative and corrective actions if necessary.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comment received. Boeing supports the NPRM.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

We estimate that this AD affects 86 airplanes of U.S. registry. The following table provides the estimated costs for U.S. operators to comply with this AD.

TABLE—ESTIMATED COSTS

Action	Work hours	Average labor rate per hour	Parts	Cost per product	Number of U.S.-registered airplanes	Fleet cost
Inspection ...	4	$85	None	$340 per inspection cycle	86	$29,240 per inspection cycle.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

You can find our regulatory evaluation and the estimated costs of compliance in the AD Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2010–14–17 The Boeing Company: Amendment 39–16362. Docket No. FAA–2010–0383; Directorate Identifier 2009–NM–214–AD.

Effective Date

(a) This airworthiness directive (AD) is effective August 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747SR, and 747SP series airplanes, certificated in any category; as identified in Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009.

Subject

(d) Air Transport Association (ATA) of America Code 53: Fuselage.

Unsafe Condition

(e) This AD results from reports of cracks in overwing intercostal webs between station (STA) 1160 and STA 1220. The Federal Aviation Administration is issuing this AD to detect and correct such cracking, which could grow and result in a severed intercostal. If an intercostal is severed, cracks could develop in the adjacent frame structure and skin, resulting in a rapid loss of cabin pressure.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Repetitive Inspections of the Overwing Intercostal Web

(g) Before the accumulation of 8,000 total flight cycles, or within 1,500 flight cycles after the effective date of this AD, whichever occurs later: Do a detailed inspection of the left-side and right-side STAs 1160, 1180, 1200, and 1220 overwing intercostal webs, and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009, except as required by paragraph (i) of this AD. Do all applicable related investigative and corrective actions before further flight. If no cracking is found during any detailed inspection, repeat the inspection thereafter at intervals not to exceed 3,000 flight cycles.

(h) For any airplane with an overwing intercostal web replaced in accordance with Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009: Within 6,000 flight cycles after the web was replaced, do a detailed inspection of the replacement overwing intercostal web, and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009, except as required by paragraph (i) of this AD. Do all applicable related investigative and corrective actions before further flight. If no cracking is found during any detailed inspection, repeat the inspection thereafter at intervals not to exceed 3,000 flight cycles.

Exception to Service Bulletin

(i) If any cracking is found during any inspection required by this AD, and Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009, specifies contacting Boeing for appropriate action: Before further flight, repair the cracking using a method approved in accordance with the procedures provided in paragraph (j) of this AD.

Alternative Methods of Compliance (AMOCs)

(j)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to *Attn:* Ivan Li, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6437; fax (425) 917–6590. Information may be e-mailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov*.

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization that has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

Material Incorporated by Reference

(k) You must use Boeing Alert Service Bulletin 747–53A2750, dated August 27, 2009, to do the actions required by this AD, unless the AD specifies otherwise.

(1) The Director of the Federal Register approved the incorporation by reference of this service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; e-mail *me.boecom@boeing.com*; Internet *https://www.myboeingfleet.com*.

(3) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(4) You may also review copies of the service information that is incorporated

by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Renton, Washington, on June 25, 2010.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 772

[FHWA Docket No. FHWA–2008–0114]

RIN 2125–AF26

Procedures for Abatement of Highway Traffic Noise and Construction Noise

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal regulations on the Procedures for Abatement of Highway Traffic Noise and Construction Noise. The final rule clarifies and adds definitions, the applicability of this regulation, certain analysis requirements, and the use of Federal funds for noise abatement measures.

DATES: *Effective date:* July 13, 2011.

Incorporation by reference: The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 13, 2011.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Ferroni, Office of Natural and Human Environment, (202) 366–3233, or Mr. Robert Black, Office of the Chief Counsel, (202) 366–1359, Federal Highway Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Electronic Access

This document and all comments received by the DOT Docket Facility, Room PL–401, may be viewed through *www.regulations.gov.* Regulations.gov is available 24 hours each day, 365 days each year. Electronic submission and retrieval help and guidelines are available under the help section of this Web site.

An electronic copy of this document may be downloaded by using a computer, modem, and suitable communications software from the Government Printing Office's Electronic Bulletin Board Service at (202) 512–1661. Internet users may also reach the Office of the Federal Register's home page at: *http://www.archives.gov* and the Government Printing Office's Web page at: *http://www.access.gpo.gov/nara.*

Background

The FHWA developed the noise regulation as required by section 136 of the Federal-Aid Highway Act of 1970 (codified at 23 U.S.C. 109(i)). The regulation applies to highway construction projects where a State department of transportation has requested Federal funding for participation in the project. The FHWA noise regulation, found at 23 CFR 772, requires a highway agency to investigate traffic noise impacts in areas adjacent to federally funded highways for the proposed construction of a highway on a new location or the reconstruction of an existing highway that either significantly changes the horizontal or vertical alignment or increases the number of through-traffic lanes. If the highway agency identifies impacts, it must consider abatement. The highway agency must incorporate all feasible and reasonable noise abatement into the project design.

The FHWA published the "Highway Traffic Noise Analysis and Abatement Policy and Guidance" (Policy and Guidance), dated June 1995 (available at *http://www.fhwa.dot.gov/environment/noise/polguide/polguid.pdf*), which provides guidance and policy on highway traffic and construction noise abatement procedures for Federal-aid projects. While updating the 1995 Policy and Guidance, the FHWA determined that certain changes to the noise regulations were necessary.

As a result, the FHWA published a Notice of Proposed Rulemaking (NPRM) on September 17, 2009 (74 FR 47762). This final rule amends sections 772.1, 772.5 to 772.17, and Table 1—Noise Abatement Criteria. Sections 772.3 and 772.19 are not amended by this final rule, and Appendix A—National Reference Energy Mean Emission Levels as a Function of Speed, is removed by this final rule. This final rule also reorganizes various sections and parts of sections throughout the NPRM to institute a more logical order in the regulation. This reorganization does not change the meaning of the regulation and is not substantive in nature.

In the preamble of the NPRM, the FHWA specifically asked for comments on the cost of abatement, third party funding for abatement, and maintaining a noise abatement inventory. The FHWA appreciates the comments received on this section. A summary of the comments received and the FHWA's response to these comments can be found in the discussion of comments section.

The preamble of the NPRM requested comments on a proposed timeline for highway agencies to revise and have the FHWA approve their noise policies. Changes to this timeline have been made based on the comments received. Therefore, highway agencies will need to submit their revised noise policy, meeting the requirements of this final rule, to FHWA for approval within 6 months from the publication date of this final rule. The FHWA will review the highway agency's revised noise policy for conformance to the final rule and uniform and consistent application nationwide. The highway agency will provide FHWA a review schedule for approval of their revised noise policy that does not exceed 3 months from the highway agency's first submission of the revised noise policy to the FHWA. Each review of the document by FHWA should have a duration of at least 14 days for the initial and subsequent reviews. The highway agency's main point of contact for this review will be the FHWA Division Office in their State. Each highway agency's revised noise document will be concurrently reviewed by three FHWA offices to ensure uniform and consistent application of this final rule nationwide (one from the respective Division Office, one from the Resource Center, and one from Headquarters). Failure to submit a revised noise policy in accordance with the final rule could result in a delay in FHWA's approval of Federal-aid highway projects that require a noise analysis. The highway agency would be required to implement the new standard no later than 12 months from the date this final rule was published in the **Federal Register.**

Grandfathering to the pre-final rule of 23 CFR 772 should be considered for Federal-aid highway projects for which the Categorical Exclusion, Finding of No Significant Impact, or Record of Decision has been signed by the effective date of this final rule. The State highway agency should coordinate with their FHWA Division Office to determine which projects, if any, should be completed under the previous 23 CFR 772 and highway agency's previously approved noise policy.

The FHWA has updated the Policy and Guidance document to reflect what is presented in this final rule. Highway

agencies should use this document for additional guidance when developing their revised noise policies in compliance with this final rule. To further assist highway agencies in revising their noise policies, the FHWA has developed a policy template for the highway agencies to use if they desire to do so. The updated guidance and optional policy template can be found at: *http://www.fhwa.dot.gov/environMent/noise/index.htm.*

Discussion of Comments

The agency received comments from 25 State highway agencies (California, Florida, Georgia, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, North Carolina, New Jersey, New York, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington, and Wisconsin), 1 county highway agency (Anoka County Highway Department, Minnesota), 1 national organization (American Association of State Highway and Transportation Officials (AASHTO)), 7 noise consultants or consulting firms (Bergmann Associates, Inc., Bowlby & Associates, Environmental Acoustics, Inc., Environmental Science Associates, HNTB Corporation, Karel Cubic and Sharon Paul Carpenter), 1 university (East Carolina University), and 1 private citizen (Jennifer Leigh Hanson).

There were several comments received that were general in nature. Three State highway agencies and one private consultant expressed that they generally agreed with the NPRM. One private consultant commented that the numbering of the regulation should not skip the even numbers. The FHWA will retain the numbering sequence that the regulation currently has. One private consultant commented on the parentheses used on the "A" of dB(A). It is FHWA's position that since the metric used to assess highway traffic noise levels is the A-weighted decibel, that decibel be illustrated by "dB" and the parentheses are needed around the "A" to illustrate the A-weighting. The parentheses are commonly used by the highway noise industry and will be retained in the final rule. Two State highway agencies and a university commented that quiet pavements should be allowed as a federally funded noise abatement measure. While the FHWA recognizes the efforts of many State highway agencies and the pavement industries, there are still too many unknowns that currently prohibit the use of pavement as a noise abatement measure. One national organization commented that while they recognize the importance of uniform and consistent application of this regulation nationwide, they encourage the FHWA to incorporate flexibility to accommodate regional and State-specific needs. The FHWA has incorporated flexibility while setting specific parameters throughout this final rule. There are numerous situations in the final rule where the State highway agency is permitted to completely define a definition or process, or define a definition or process within the parameters set by the FHWA.

Based on comments received, the FHWA has changed the order and titles of several of the sections. The current section 772.17 "Traffic Noise Predication" is now section 772.9, with the same title. The current section 772.9 "Analysis of traffic noise impacts and abatement measures" is now section 772.11, with the title "Analysis of traffic noise impacts." The "and abatement measures" of this title has been removed as it is redundant with the noise abatement section. The current section 772.11 "Noise abatement" is now section 772.13, with the new title of "Analysis of noise abatement," which keeps consistent with the previous section dealing with the analysis of traffic noise impacts. The current section 772.13 "Federal participation" is now section 772.15 with the same title. The current section 772.15 "Information for local officials" is now section 772.17 with the same title.

Section-by-Section Discussion of Comments

Section 772.1—Purpose

In section 772.1, the FHWA is adding the word "livability" to this section, not based on comments received, but to incorporate the DOT Secretary's livability initiative.

Section 772.3—Noise Standards

In section 772.3, no changes have been made to this section based on comments received; however, one State highway agency commented on the difference between the use of the words "accordance" and "conformance." The FHWA did not use these two terms to show a difference in meaning, but rather to illustrate agreement between both the regulation and the noise standard.

Section 772.5—Definitions

In section 772.5, three State highway agencies and one private consultant commented that the definitions should be placed in alphabetical order. The FHWA agrees and the definitions are now listed and discussed in this final rule in alphabetical order. Also, one State highway agency suggested adding a definition for substantial noise reduction. The FHWA disagrees with the addition of "substantial noise reduction" since this principle is adequately addressed in the other sections of the final rule.

Benefited Receptor, 10 State highway agencies, 1 national organization, and 5 private consultants commented on the definition of benefited receptor. Eleven commenters generally support the definition with minor or no revisions, with two comments desiring additional flexibility in defining and applying benefited receptors. Three comments concerned the issues of benefited receptors that are impacted and benefited receptors that are not impacted, and two comments were concerned with a discernable 5 dB(A) change in noise versus a perceptible 3 dB(A) change in noise.

The FHWA has changed the definition to indicate that a benefited receptor is a "recipient of an abatement measure that receives a noise reduction at or above the minimum threshold of 5 dB(A), but not to exceed the highway agency's reasonableness design goal." The definition retains the 5 dB(A) minimum threshold, but provides flexibility to State highway agencies by allowing the agency to define a benefited receptor as one benefitting from a reduction in noise level that is between 5 dB(A) and the agency's design goal. These changes ensure construction of effective noise abatement measures. Generally, a 5 dB(A) change in noise levels is deemed discernible by a person with normal hearing. Noise abatement activities should result in a discernible 5 dB(A) change in noise level rather than a perceptible 3 dB(A) change in noise level. This approach provides a consistent approach throughout this final rule. State highway agencies will still be able to differentiate between benefiting impacted and non-impacted receivers within their own policies. States may continue weighting impacted receptors greater than non-impacted receptors when making decisions about reasonableness of noise abatement.

Common Noise Environment, seven State highway agencies, one national organization, and three private consultants commented on the definition of common noise environment. The definition was generally supported with minor changes or clarifications requested. Two commenters disagreed with the definition. Based on a comment from the New York DOT, the FHWA has added "within the same Activity Category in Table 1" to the definition,

with the other comments being addressed in sec. 772.13 Analysis of Noise Abatement. The FHWA is addressing the concept of common noise environment by defining the parameters for cost averaging to ensure cost averaging is applied uniformly and consistently nationwide. States can continue to consider each neighborhood as its own noise environment. The definition allows States flexibility to consider common noise environments within the project. A noise analysis should consider secondary sources, including non-highway noise sources, as part of the common noise environment. The final rule acknowledges that a common noise environment may span an entire project area and requires consideration of a common noise environment for land uses within the same activity category.

Date of Public Knowledge, one State highway agency, one national organization, and one private consultant agreed and supported the addition of this definition. No changes were made based on comments received, however, "CE" and "ROD" were spelled out and "as defined in 23 CFR 771" was added to provide additional clarification.

Noise Reduction Design Goal, based on comments received, the FHWA is defining "noise reduction design goal" to be "[t]he optimum desired dB(A) noise reduction determined from calculating the difference between future build noise levels with abatement, to future build noise levels without abatement. The noise reduction design goal shall be at least 7 dB(A), but not more than 10 dB(A)." The FHWA is defining "Noise Reduction Design Goal" to remove the disconnect that occurs with a 5 dB(A) substantial decrease criterion and substantial increase criteria's 5–15 dB(A) range.

Design Year, two State highway agencies, one national organization, and a private consultant commented in support of the definition of design year. The FHWA made no changes to this definition in the final rule.

Existing Noise Levels, two State highway agencies, one national organization, and one private consultant commented on the definition of existing noise levels. Most comments expressed support of the definition with minor clarifications. One State highway agency sought additional clarification on what are, and how to address, non-highway traffic noise sources. It is FHWA's position that an effective noise analysis should consider major noise sources in the environment including transportation, industry, and background noise.

Feasibility, two State highway agencies, one national organization, and two private consultants commented on the definition of feasibility. The definition was generally supported with minor revisions. Based on the comments, the FHWA added "considered in the evaluation of" to the definition to clarify that the combination of acoustical and engineering factions shall be examined when considering noise abatement measures. Other comments dealt with how to apply feasibility and therefore are better suited to in sec. 772.13 where feasible noise abatement is further addressed.

Impacted Receptor, four State highway agencies, one national organization, and two private consultants submitted comments generally supportive of the definition of impacted receptor, with minor revisions regarding redundancy, and allowing State highway agencies to define. The FHWA made several changes to this definition. The definition was simplified by removing the text that made it redundant with the definition of traffic noise impacts.

L10, four State highway agencies, one national organization, and two private consultants commented on this definition. Many of the comments recommended the definition be deleted because the metric is obsolete. Although currently the L10 metric is not the most applicable metric to use on highway projects, the L10 and Leq metrics were a part of this regulation from its genesis. As a result, the State of Minnesota has a law requiring the use of L10, and therefore this metric will remain in the final rule with no changes.

Multifamily Dwelling, six State highway agencies, a national organization, and two private consultants generally support the definition of multifamily dwellings with some minor revisions including, allowing the highway agency to define the term, and a request for addition flexibility and additional guidance from the FHWA. Massachusetts DOT disagreed with the definition, indicating that, as proposed, the definition of multifamily structures would skew the cost reasonableness calculations. It is FHWA's position that the purpose of any environmental analysis is to quantify impacts first, and explore methods to mitigate those impacts. The approach of only looking at first floor receptors ignores the possibility that impacts may occur at upper floor residences. The analysis to determine impacts shall be for all outdoor areas of frequent human use, both on the ground and on balconies (if present). This does not automatically result in feasible and reasonable noise abatement measures being determined for upper lever receptors. When a multifamily dwelling has a common exterior area of frequent human use, each unit of the multifamily dwelling that has access to that common exterior shall be included in the feasible and reasonable analysis. Multifamily development does not "skew" the determination of feasible and reasonable noise abatement measures. Providing noise abatement for multifamily development results in noise abatement for a higher number of people who may be using individual or common exterior areas. Frequency of use is not based on a comparison between how a single family dwelling would use their outdoor area versus how a multifamily dwelling would use their outdoor area. This process allows all receptors to be analyzed for noise impacts, and allows all impacted receptors to be considered for noise abatement. To add clarification, the FHWA added "when determining impacted and benefiting receptors" to the end of the second sentence.

Noise Barrier, based on comments received, the FHWA is defining "noise barrier" to be "[a] physical obstruction that is constructed between the highway noise source and the noise sensitive receptor(s) that lowers the noise environment, to include stand alone noise walls, noise berms (earth or other material), and combination berm/wall systems." Noise barriers have been a longstanding proven noise abatement measure and therefore it is necessary to clarify that a noise barrier can be a wall, berm or a combination berm/wall system.

Permitted, three State highway agencies, one national organization, one county highway department, and one private consultant commented that there should be more of a definite commitment to develop, and therefore suggested renaming this definition "permitted" instead of "planned, designed and programmed." There was also a comment to retain flexibility in interpreting a definite commitment. The FHWA agrees, and has changed this definition to "permitted" and removed all references to "planned, designed and programmed" from the final rule. The FHWA also added "as evidence by issuance of a building permit" to the definition.

Property Owner, three State highway agencies, one national organization, and a private consultant generally supported the definition of "property owner" with minor changes. The FHWA modifies this definition to include "holds a title,

deed or other legal documentation of ownership."

Reasonableness, two State highway agencies, one national organization, and two private consultants commented on the definition of "reasonableness." The definition was generally supported with minor revisions. Based on the comments of a private consultant, the FHWA added "considered in the evaluation of" to the definition to clarify that the combination of social, economic and environmental factions shall be considered when considering noise abatement measures. Other comments provided suggested adding that reasonableness is based on common sense and good judgment. It is FHWA's position that this leaves reasonableness open to personal opinion rather than using an objective approach and has not made the suggested change in the final rule.

Receptor, based on changes made from comments received, the FHWA is defining "receptor," to be "a discrete or representative location of a noise sensitive area(s), for any of the land uses list in Table 1."

Residence, four State highway agencies, one national organization and two private consultants commented on their general approval of this definition for "residence." Additional comments include surveying multifamily residents and the use of a basic unit of measure. A discussion on how to survey multifamily residents is not appropriate for the definition section, but is address later in the final rule.

The NPRM had proposed to define "severe noise impact" in sec. 772.5(s). Nine State highway agencies, one county highway agency, one national organization, and five private consultants commented on the definition of severe noise impact. Based on the comments received, the FHWA has removed this definition from the final rule due to the conflict from the commenters on size and scale of the range, and since the definition would likely be misinterpreted to mean that the noise levels or noise level increases must fall within those ranges.

The NPRM had proposed to define "special land use facilities" in sec. 772.5(e). Seven State highway agencies, one national organization, and three private consultants commented on the definition of "special land use facilities." The FHWA removed this term from the final rule based on changes to the activity categories presented in Table 1. There are now seven activity categories in order to break out various land uses into more appropriate groupings.

Statement of Likelihood, based on changes made from comments received, the FHWA is defining "statement of likelihood," to be "a statement provided in the environmental clearance document based on the feasibility and reasonableness analysis completed at the time of environmental document is being approval."

Substantial Construction, six State highway agencies, one county highway agency, one national organization and two private consultants comment on the definition of "substantial construction." The definition was generally supported with recommendations. Based on the comments received, the FHWA is removing from the definition "the filing of a plat plan or an occurrence of a similar action," and the word "original" before "highway." The final rule will retain this definition to help State highway agencies clarify when development must occur for Type II eligibility and for potential Type I reasonableness considerations.

Substantial Noise Increase, based on comments received from eight State highway agencies and two private consultants, the FHWA is defining "substantial noise increase," to be "One of two types of highway traffic noise impacts. For a Type I project, an increase in noise levels of 5 to 15 dB(A) in the design year over the existing noise level."

Traffic Noise Impacts, four State highway agencies, a national organization, and two private consultants commented on the definition of traffic noise impacts, with general support of the definition. Comments pertained to the inclusion of design year and reference to future condition as well as how to address other noise sources. The FHWA has added "design year" and "design year build condition" to the final rule. It is FHWA's position that an effective noise analysis should consider major noise sources in the environment including transportation, industry, and background noise. Without a project noise levels may exist that exceed the noise abatement criteria (NAC), but there are no impacts without a project.

Type I Project, 14 State highway agencies, 1 national organization, and 6 private consultants commented on this section. The majority of the comments referenced the use of a 3 dB(A) increase in determining a significant change for a Type I project, followed by the redundancy of the first two sentences, and use of the word "significant." The FHWA has revised this section to remove the first sentence and replace "significant" with "substantial." The use of a 3 dB(A) increase in determining a substantial change has been removed. The factor for determining a substantial horizontal change is a halving the distance between the noise source and the closest receiver between the existing condition to the future build condition. The factor for determining a substantial vertical change is "a project that removes shielding therefore exposing the line-of-sight between the receptor and the traffic noise source exposing the receptor to additional traffic noise. This is done by either altering the vertical alignment of the highway or by altering the topography between the highway traffic noise source and the receptor."

Twelve State highway agencies, 1 national organization, and 4 private consultant firms commented on what constitutes a Type I project for the addition of a through traffic lane or an auxiliary lane. Additional comments were provided on bus lanes, turn lanes, restriping travel lanes, weight stations, toll plazas, ride-share lots, and rest stops. Based on the comments received, the FHWA changed the definition of Type I project to now include bus lanes as through traffic lanes. The definition further clarifies that left turn lanes are not considered an auxiliary lane, and additional qualifying activities were added including "restriping existing pavement for the purpose of adding a through-traffic lane or an auxiliary lane" and "the addition of a new or substantial alteration of a weigh station, rest stop, ride-share lots and toll plaza." Finally, the FHWA adds clarifying language to make clear that "if a project is determined to be a Type I project under this definition then the entire project area as defined in the environmental document is a Type I project."

Five State highway agencies and one private consultant supported this section and suggested moving the addition of new interchanges or ramps to an existing facility to its own subsection. The FHWA agrees. The final rule will reflect that the "addition of new interchanges or ramps added to a quadrant to complete an existing partial interchange" will be its own section under the Type I definition.

Type II Project, one State highway agency and one private consultant commented that they were in support of this section on Type II projects. One State highway agency commented that it is not necessary for a State highway agency to develop a Type II program. The FHWA disagrees and did not change this section in the final rule. As supported in the 1995 guidance document, a Type II noise abatement program is appropriate to ensure statewide consistency.

Type III Project, nine State highway agencies and two private consultants commented on the creation of a Type III project. The majority of the comments were in support of the Type III project type, with some asking FHWA to provide examples of Type III projects and to develop a template for documenting Type III. One commenter requested clarifying that Type III projects do not need a noise analysis performed. The FHWA agrees and, as a result, added "Type III projects do not require a noise analysis" to the definition of a Type III project. Examples of Type III projects and a template for documenting Type III projects will be provided in FHWA guidance.

Section 772.7—Applicability

Two State highway agencies and a private consultant expressed support for the expansion of this section of the regulation. In sec. 772.7(a)(1), one State highway agency expressed support for the proposed change, but a private consultant requested additional clarification because item (1) requires applicability for any project requiring "FHWA approval regardless of funding sources." Therefore, a highway agency, other than the State DOT, such as a county or local highway agency is required to comply with 23 CFR 772 when one of its projects involves a new or modified access to an Interstate highway. This is a correct interpretation of what the FHWA intended, therefore no changes to this section were made.

In sec. 772.7(a)(2), one State highway agency expressed support for this provision in the regulation. This applies to all Federal and Federal-aid highway projects authorized under Title 23, United States Code. Therefore, this regulation applies to any highway project or multimodal project that is funded with Federal-aid highway funds. A county highway agency stated that the above statement appears to contradict the statement made under the Regulatory Flexibility Act that the proposed rule would not have a significant economic impact on a substantial number of small entities. The rulemaking addresses the obligation of Federal funds to States for Federal-aid highway projects. As such, it affects only States, and States are not included in the definition of small entity set forth in 5 U.S.C. 601. Therefore, the Regulatory Flexibility Act does not apply and the FHWA certifies that the final rule would not have a significant economic impact on a substantial number of small entities. Local public agencies have never had an exemption from complying with 23 CFR 772. The proposed rule does not present a new economic impact. The proposed changes in the rule will not result in an increase in the likelihood of construction of noise abatement.

In sec. 772.7(b), no comments were received, but the FHWA has modified this section in the final rule to provide additional clarification and to tie into the proposed requirement in the NPRM that this final rule will require State highway agencies to revise their noise polices in conformance with this final rule. The section now states "For FHWA approval, the highway agency shall develop noise policies in conformance with this regulation and shall apply these policies uniformly and consistently statewide."

Section 772.7(d) was proposed in the NPRM as sec. 772.7(c)(1), and is now listed as sec. 772.7(d). Two State highway agencies commented on this section. While one expressed support, the other State highway agency requested clarification on the intent of the section regarding use of State-only funds to avoid noise abatement. It is FHWA's position that the rule applies to any Federal or Federal-aid project. This means that the regulation applies to any project that includes a Federal action. No changes were made to this section.

Section 772.7(e) was proposed in the NPRM as sec. 772.7(c)(2) and is now listed as sec. 772.7(e). A national organization, eight State highway agencies, and three private consultants commented on this section. Some comments offered support for this clarification of Type II program requirements, while others questioned the need for a priority system and the status of States that already have a system in place. A private consultant recommended insertion of language that the ranking system serves as a guide, but not a requirement for selection for funding. A State highway agency requested a template for a priority system. The FHWA disagrees with the need to incorporate the ranking of potential Type II project as language in the final rule. State highway agencies will submit their existing ranking system to FHWA for approval when they submit their updated noise policies. The concept of a priority system is not new. This is a longstanding practice on the part of States with active Type II programs. The priority system restricts construction of "political" noise barriers under the guise of a Type II program when a State does not actually have a Type II program in place and has no intent of developing a Type II program. The priority system ensures uniform and consistent application of this provision of the rule. The following was added to this section "The highway agency shall re-analyze the priority system on a regular interval, not to exceed 5 years." A private consultant recommended adding a new section (3) to include "If a highway agency chooses to participate in a Type II program, the highway agency must have a statewide outreach program to inform local officials and the public of the items in § 772.15(a)(i)–(iv)." If States choose to participate in a Type II program, they should also act to encourage local communities to enact noise compatible land use planning to limit the expenditure of Federal highway dollars to construct Type II noise barriers in the future. The FHWA agrees with the concept, but not with the application of this idea. The circumstances that lead to a Type II project occurred in the past. State highway agencies should take the opportunity of a Type II project to inform local officials about noise compatible planning concepts to avoid future Type I projects. The development of this outreach effort should be a part of any Type II program.

Section 772.7(f), was proposed in the NPRM as sec. 772.7(c)(3) and is now listed as 772.7(f). A State highway agency and a private consultant requested a listing of the types of projects classified as Type III. The FHWA believes the rule clearly states that Type III projects are any project that falls outside the definition of a Type I or Type II project. The FHWA noise guidance provides additional information on this topic. A private consultant suggested adding language that NEPA may require noise analysis on Type III projects. A State highway agency recommended changing "not required" to "optional." The FHWA declines to make these changes in the final rule. The proposed and final language does not prohibit States from performing a noise analysis on Type III projects if they determine an analysis is necessary due to unusual characteristics of a particular project. Two State highway agencies commented on this section. One recommended elimination of Type III as a descriptor and the other expressed approval of the new designation. The FHWA retains the Type III project designation with no changes.

Section 772.9—Traffic Noise Prediction

Section 772.9, traffic noise prediction, is sec. 772.17 in the existing regulation. Moving the traffic noise prediction section from 772.17 to 772.9 was done to place the activities associated with traffic noise prediction in chronological order with the overall procedures for

abating highway traffic noise. Due to the new numbering of this section, the provisions presented below are numbered and identified as presented in this final rule and not how they were presented in the NPRM.

In sec. 772.9(a), one State highway agency and a private consultant commented that FHWA should continue to require use of the Traffic Noise Model (TNM) and remove reference to other models that may be compatible with TNM until alternate models are tested and approved for use through a change in the regulation. These entities further commented that FHWA should limit use of TNM to the most recent version. It is FHWA's position that the provision in the regulation to use other models determined compatible with TNM must appear in the regulation so that FHWA may work with other software developers in their efforts to implement the TNM acoustic code if their noise models for testing and approval. Therefore, "or any other model determined to by the FHWA to be consistent with the methodology of the FHWA TNM" will remain in the final rule. Lastly, the FHWA will update this regulation as necessary to require use of updated versions of the TNM.

Ten State highway agencies, a national organization, and two private consultants expressed concerns about proposed restrictions on use of the TNM Lookup Tables; four State highway agencies recommended additional restrictions on the use of the TNM Lookup Tables, and one State highway agency along with three private consultants recommended eliminating use of the Lookup Tables, or developing a replacement. This final rule eliminates use of the TNM Lookup Tables in either form to predict noise levels on Federal or Federal-aid projects. The FHWA developed the Lookup tables to provide TNM users with a simple screening tool for highway analyses. The tables were to supplement TNM to obtain quick estimates. The intended use of the estimates is to inform planners about the potential scope of their project, or to educate the public. The Lookup Tables are not a substitute for the TNM or for routine use in performing a noise analysis. Many practitioners started using the Lookup Tables due to long calculation times inherent with the use of the FHWA TNM when compared with the previous model. However, the dramatically increased speed of computers currently available on the market reduces the model run times to a fraction of what could be accomplished a few years ago. Further, a narrow interpretation of the previous rule indicates the changes to the regulation requiring use of the FHWA TNM eliminated the option to use the TNM Lookup Tables. However, use of the TNM Lookup Tables continued as a legacy. The FHWA has removed this provision proposed in the NPRM from this final rule. The FHWA clarifies through this final rule that the TNM Lookup Tables are not an acceptable model for use on Federal or Federal-aid highway projects. The FHWA will not update the TNM Lookup Tables for future versions of the FHWA TNM. The FHWA will retract the allowable use of the TNM Lookup as it has outlived its intended use.

In sec. 772.9(b), two State highway agencies and a university commented that quieter pavement should be allowed as a mitigation measure. As previously discussed, it is FHWA's position that there are still too many unknowns regarding the viability of quieter pavements as a mitigation measure. However, State highway agencies, the pavement industry, and the FHWA are researching various parts of this overall initiative. The FHWA is actively researching how to better incorporate more specific pavement types in the FHWA TNM. As a result the FHWA added this provision which states, "average pavement type shall be used in the FHWA TNM for future noise level prediction unless a highway agency substantiates the use of a different pavement type for approval by the FHWA." However, the FHWA is actively seeking highway agencies to assist in our research to better account for pavements in the FHWA TNM by engaging themselves in the experimental use of the specific pavement types currently in the FHWA TNM on projects.

In sec. 772.9(c), six State highway agencies, a national organization, and two private consultants questioned restrictions or wanted additional clarification on the use of noise contours. The final rule ties use of noise contours to information provided to local officials to satisfy sec. 772.17 Information for Local Officials and permits use of contours for some preliminary studies.

Section 772.11—Analysis of Traffic Noise Impacts

Section 772.11, titled "analysis of traffic noise impacts," was sec. 772.9 in the proposed regulation. The FHWA has removed "and abatement measures" from the title of this section since sec. 772.13 of the final rule now deals with abatement measures. Due to the new numbering of this section, the provisions presented below are identified as presented in this final rule and not how they were numbered in the NPRM. This and other organizational changes were done in response to a comment from a private consultant, who indicated that this section should separate the analysis and abatement portions into their respective sections of the regulation, and pointed out that there is a long-standing disconnect between the intent of this portion of the regulation and the practice of most State highway agencies in applying the regulation. The first condition is "where no exterior activities are to be affected by the traffic noise." The typical application would be an apartment building with no outdoor balconies, patios, or common grounds activity areas. The second condition is "where the exterior activities are far from or physically shielded from the roadway in a manner that prevents an impact on exterior activities." The implication of the second condition is that if the apartment, pool, and playground are on the side of the building away from the highway then one would need to consider the interior of the apartments facing the highway as Activity Category E. Few State highway agencies currently consider apartments as Category E. Instead, they analyze the playground and pool as exterior Category B, find that they are not impacted, and then fail to consider abatement for the apartments.

In sec. 772.11, one State highway agency had a general comment requesting that FHWA provide an opinion on a highway agency changing its definition of "substantial increase." It is the opinion of the FHWA that highway agencies may decide at its discretion to change established criterion within the allowable requirement of this final rule. However, highway agencies should consider past practices and the possible consequences of any changes they make to their noise policy and procedures.

No comments were received on sec. 772.11(a), but to provide clarification on how to analyze projects, the FHWA added sec. 772.11(a)(1) "For projects on new alignments, determine traffic noise impacts by field measurements" and sec. 772.11(a)(2) "for projects on existing alignments, prediction of existing and design year traffic noise impacts."

In sections 772.11(a)(1) and (a)(2), three State highway agencies and two private consultants requested rewording of this section to clarify determination of existing and future noise levels. The final rule clarifies that existing levels are determined through measurement or prediction. This is because there are times when the "existing" condition and the current year are not the same year.

In this case, predicting existing noise levels is necessary. The final rule clarifies prediction of future noise levels. A State highway agency requested clarification on determining existing noise levels on new alignment projects; the final rule covers new alignment and modification of existing alignment scenarios.

Two private consultants commented on sec. 772.11(b). One requested a definition of frequent human use and the other recommended a connection between exterior areas and frequent human use. The FHWA did not provide a definition for frequent human use, but did make the connection between exterior areas and frequent human use, by stating "In determining traffic noise impacts, a highway agency shall give primary consideration to exterior areas where frequent human use occurs." The FHWA also moved this provision to sec. 772.11 Analysis of traffic noise impacts.

In sec. 772.11(c)(1), one State highway agency expressed support for this provision while a second State highway agency requested expansion of the language to allow analysis of a single worst-case alternative in place of similar multiple project alternatives. It is FHWA's position that the language in the final rule does not preclude analysis of a worst-case scenario during preliminary engineering and early environmental studies; however, the highway agency must analyze all alternatives under detailed study as part of a final noise analysis.

Under sec. 772.11(c)(2), one national organization, four State highway agencies, and one private consultant sought additional clarification on the level of analysis necessary for various land use categories and project alternatives. They also suggested deemphasizing land uses previously listed in Activity Category C, which are primarily commercial activities. It is the FHWA's position that this provision of the rule does not require a separate noise analysis for each Activity Category. The rule requires that the noise analysis include a complete noise analysis of all land uses inside the project study area. Past practice of many highway agencies was to ignore certain Activity Categories, particularly Category C, because the highway agency determined that it is not reasonable to provide noise abatement for that Activity Category. Reasonableness decisions cannot precede determination of impacts. The regulation first requires consideration of impacts, then consideration for abatement. The focus of a noise analysis has always been, and will continue to be, on exterior areas of frequent human use. Consideration of Activity Category C land use is unlikely to result in a large increase in the number of receivers within a noise model because Category C receptors do not necessarily have areas of frequent human use.

In sec. 772.11(c)(2)(i), three State highway agencies and two private consultants commented on Activity Category A, offering general support or minor wording changes. One of the State highway agencies requested additional clarification on when to start the process to designate a land use as Category A and suggested that this may work better through inter-agency consultation rather than through FHWA approval. The FHWA has determined the recommended wording changes are unnecessary. It is appropriate for the determination of Activity Category A receptors to occur early in the process and through the inter-agency consultation process; however, the final determination for this designation remains a FHWA decision. To further clarify Activity Category A, "the exterior impact criteria for lands * * *." has been added to this provision.

In sec. 772.11(c)(2)(ii), in response to comments received, the designation of Activity Category B has been revised to include the exterior criteria for only residential land uses. The provision states, "[t]his activity category includes the exterior impact criteria for single-family and multifamily residences."

In sec. 772.11(c)(2)(iii), eight State highway agencies, one national organization, and one private consultant commented their general support of this provision and requested that FHWA provide a standardized method to evaluate reasonableness for special land use facilities. The term "special land use facilities" has been removed from the final rule. There are several logical and fair ways to evaluate certain types of land use, one approach is the Florida Department of Transportation's method. The FHWA will provide examples of other methods in the updated noise guidance document. The final rule changes references from special land uses to the actual activity category based on the reorganized Table 1. To provide additional clarification, the designation of Activity Category C has been revised to include a variety of land use facilities as listed in Table 1. This provision states "Activity Category C. This activity category includes the exterior impact criteria for a variety of land use facilities. Each highway agency shall adopt a standard practice for analyzing these land use facilities that is consistent and uniformly applied statewide."

In sections 772.11(c)(2)(iv), (v), and (vi), three State highway agencies and three private consultants offered comments on this section. Two highway agencies offered general support, however, the remaining highway agency and the private consultants offered suggestions on consideration of commercial land use in a noise analysis. The final rule modifies Table 1 to segregate certain commercial land use from noise generating commercial and industrial land uses.

One private consultant requested additional clarification on the timing of interior noise studies in sec. 772.11(c)(2)(iv). The consideration for the analysis may occur prior to noise monitoring. It is FHWA's position that the noise analyst should be able to identify interior locations that require monitoring during preliminary field work while developing a monitoring plan. One national organization and eight State highway agencies requested additional clarification on the analysis requirements for interior areas. It is FHWA's position that an interior analysis is only required when all exterior analysis alternatives are exhausted or in cases where there are no exterior activities. To provide extra clarification on which land use categories can be considered for an interior noise analysis, the FHWA has indicated "exterior" and/or "interior" within each Activity Category.

In sec. 772.11(c)(2)(v), in response to comments received, the designation of Activity Category E has been revised to address the exterior impact criteria for less noise sensitive developed lands.

In response to comments received, a new Activity Category F was created in sec. 772.11(c)(2)(vi) to include developed lands that are not sensitive to highway traffic noise.

In sec. 772.11(c)(2)(vii), the FHWA provided clarification on undeveloped lands. Undeveloped lands were listed as Activity Category D in the NPRM, but due to the changes to Table I, undeveloped lands are now listed under Activity Category G in this final rule. Three State highway agencies commented that this section is overly broad for considering whether a property is planned for development and suggested limiting this consideration to issuance of a building permit. This final rule has revised the existing regulation to limit consideration to the issuing of a building permit. Five State highway agencies requested further clarification on the purpose of predicting noise levels on undeveloped land. It is FHWA's position that providing local officials with the best estimate of future

noise levels on undeveloped land is a longstanding requirement of 23 CFR 772 and is necessary to help avoid future noise impacts due to incompatible development. The Pennsylvania DOT commented that predication of noise levels for undeveloped lands which contain threatened or endangered species could become problematic when coordinating with resource agencies. It is important to remember that 23 CFR 772 is concerned with noise impacts on the human environment. Extrapolation of impact thresholds within the regulation to other species requires an incorrect interpretation of the regulation and the NAC. Additionally, concern about the effects of highway noise and actual impacts to species resulting from highway noise may occur in the absence of a noise analysis. Also, the current zoning of a property is an indicator of future development, but the zoning may change. The purpose of the information provided to local officials is avoiding future noise impacts. Section 17 of the final rule details the analysis requirements for information for local officials. As a result the FHWA has replaced "planned, designed and programmed" with "permitted." Section 772.11(c)(2)(vii)(A) indicates that the date of issuance of a building permit shall be by the local jurisdiction or by the appropriate governing entity. Section 772.11(c)(2)(vii)(B) indicates that if "undeveloped land is determined to be permitted, then the highway agency shall assign the land to the appropriate Activity Category and study it in the same manner as developed lands in that Activity Category." This is to ensure that a noise analysis is done for the permitted land use. Section 772.11(c)(2)(vii)(C) indicates that noise levels shall be determined in accordance with sec. 772.17(a).

The FHWA received no comments on sec. 772.11(d) and (d)(1), but the FHWA wanted to clarify the intent of this section, sec. 772.11(d) now states "the analysis of traffic noise impacts shall include a(n):". This was done to clarify that 772.11(d)(1) to (4) all must be a part of a noise analysis.

To provide additional clarification, the FHWA has added sections 772.11(d)(2) and 772.11(d)(3) on validation and the noise meter type to be used on projects. Section 772.11(d)(2) states "For projects on new or existing alignments, validate predicted noise level through comparison between measured and predicted levels" and sec. 772.11(d)(3) states "Measurement of noise levels. Use an ANSI Type I or Type II integrating sound level meter." The inclusion on the type of noise meters to be used on a Federal-aid highway project is a result of industry standard and the FHWA guidance on which type of meters should be used.

Thirteen State highway agencies, a national organization, two private consultants, and a private individual expressed concern about the 500' study area as proposed in sec. 772.11(d)(4). The final rule eliminates this provision and instead requires State highway agencies to determine project limits to determine all traffic noise impacts for the design year. This section now states "Identification of project limits to determine all traffic noise impacts for the design year for the build alternative. For Type II projects, traffic noise impacts shall be determined from current year conditions." Two State highway agencies and one private consultant commented on sec. 772.11(d)(4), indicating that this section is inconsistent in that it discusses evaluation of impacts prior to a determination of future noise levels. This approach in the regulation may lead to some confusion. The FHWA reorganized the final rule to include separate sections requiring determination of noise levels and evaluation of noise impacts. Three State highway agencies commented that a disconnect occurs with a 5 dB(A) substantial decrease criterion and a substantial increase criteria in the range of 10–15 dB(A). The FHWA is clarifying that a 5 dB(A) reduction meets the acoustic feasibility requirement. Essentially, this reduction means that the noise abatement measure decreases noise impacts, but may not be optimal. To address this, FHWA introduces a design goal reasonableness criterion in the final rule. The final rule also expands substantial increase to a range of 5–15 dB(A). This provides States with additional flexibility to define substantial increases. Three State highway agencies and two private consultants requested clarification or removal of the phrase "lower threshold limit," in sec. 772.11(d)(3)(ii). The final rule clarifies this issue by stating in that, "[t]he substantial noise increase criterion is independent of the absolute noise level." In the past, some highway agencies applied the substantial noise increase criterion by linking it to an absolute noise level, meaning that a substantial noise increase was only considered from that absolute noise level or higher noise level. Typically a highway agency's noise policy would state "a substantial noise increase occurs when the design year noise level results in an increase of 15 dB(A) or more over existing noise levels as long as the predicted noise level is 55 dB(A) or above," or something similar. This language represented a misapplication of 23 CFR 772 and the noise guidance, and could result in situations where receptors may experience noise increases of more than 15 dB(A), but there would not be a substantial impact. Any noise increase that meets or exceeds that State highway agency criteria for a substantial increase is an impact, regardless of the absolute noise level.

Section 772.13—Analysis of Noise Abatement

Section 772.9(a) of NPRM has been moved to sec. 772.13(a) based on comments received. Three State highway agencies recommended wording changes to this section. The final rule uses "abate" rather than "mitigate" to clarify that the focus of the regulation when dealing with impacts is in on abatement of impacts rather than mitigation of impacts. The FHWA added for clarification "when traffic noise impacts are identified, noise abatement shall be considered and evaluated for feasibility and reasonableness."

No comments were received on section 772.13(b), which in the NPRM was section 772.11(a) but the FHWA has revised it to stress that primary consideration is given to exterior areas where frequent human use occurs. Five State highway agencies expressed concerns with section 772.11(b) of the NPRM which states "In situations where no exterior activities are to be affected by the traffic noise, or where the exterior activities are far from or physically shielded from the roadway in a manner that prevents an impact on exterior activities, a highway agency shall use Activity Category E as the basis for determining noise impacts," may result in additional interior analysis requirements. The FHWA agrees and has eliminated this section in the final rule.

Three States and one private consultant expressed support for including sec. 772.12(c)(1) in the rule. In sec. 772.13(c)(2), a private consultant commented on including a new provision on the proper use of absorptive treatment on noise barriers. As a result, the FHWA added sec. 772.13(c)(2), which states, "If a highway agency chooses to add absorptive treatments to a noise barrier as a functional enhancement, the highway agency shall adopt a standard practice for using absorptive treatment that is consistent and uniformly applied statewide." It is FHWA position that if a highway agency wants to use absorptive treatments on noise barriers, that they develop a standard practice

listing what situations the highway agency will consider absorptive treatments.

In sec. 772.13(d)(1), seven State highway agencies, one national organization, six private consultants, and one private individual commented on this section. Comments were primarily about application of the "majority" requirement to the entire project rather than to each neighborhood or increasing the substantial reduction criterion to a higher threshold. It is FHWA's position that highway agencies should make noise abatement decisions on a neighborhood basis when determining achievement of a substantial reduction. Considering all noise abatement measures in a project could penalize some neighborhoods where noise abatement is clearly effective because it is not possible to provide an effective design for a different neighborhood. Similarly, considering all noise abatement measures in the project jointly may result in construction of noise abatement that is not feasible at some locations because of highly effective abatement at other locations within the project. The FHWA does not advocate, or support for funding, construction of ineffective noise abatement measures.

A private consultant commented that the 5 dB(A) threshold for acoustic feasibility is too small. As such, the final rule clarifies that 5 dB(A) is the minimum requirement for a feasible barrier. The final rule also incorporates a new reasonableness criterion that each highway agency must establish a design goal of 7–10 dB(A). Further explanation of reasonableness design goal can be found in the discussion of 772.13(d)(2)(iii). Changes to this section in the final rule provide greater flexibility to States to identify a targeted number of impacted receivers necessary for a noise abatement measure to meet feasibility requirements. The FHWA has added the following, "The highway agency shall define, and receive FHWA approval for, the number of receptors that must achieve this reduction for the noise abatement measure to be feasible and explain the basis for this determination."

A State highway agency proposed averaging feasibility over the entire project. It is FHWA's position that averaging feasibility across the project to obtain a majority is a flawed approach to evaluate acoustic feasibility as it may result in construction of barriers that are not acoustically feasible. To take the example to the extreme, it is possible that one neighborhood could have 100 percent acoustic feasibility while a second has 0 percent acoustic feasibility and the State highway agency would build no barriers because there was no majority of receptors that achieved a 5 dB(A) reduction.

In sec. 772.13(d)(1)(ii), three State highway agencies and a private consultant requested additional clarification on what "safe" means. A private consultant recommended listing the non-acoustical feasibility factors to consider. Additional clarification will be provided in the guidance document. However, the final rule includes the factors to consider for feasibility. The following sentence was added "Factors to consider are safety, barrier height, topography, drainage, utilities, and maintenance of the abatement measure, maintenance access to adjacent properties, and access to adjacent properties (*i.e.* arterial widening projects)."

In sec. 772.13(d)(2), one State highway agency commented that FHWA should establish the reasonable cost of abatement for all States. The FHWA disagrees with this comment. The final rule requires States to develop cost reasonableness criteria based on historical construction cost as published in the NPRM. This is necessary to accommodate the spectrum of costs for various States and the various approaches States take to quantify construction costs. For example, some States only consider the cost of post, panels, and foundations when estimating the construction cost of a noise barrier, while others may include other factors such as design, maintenance of traffic, clearing and grubbing, etc. A State highway agency and a private consultant recommended placing cost as the primary cost reasonableness criterion. The final rule has three reasonableness criteria State highway agencies must consider: cost effectiveness, desires of the public, and design goal. A State may determine the abatement measure is not reasonable if it does not meet any of the three criteria. A county highway agency expressed concern that only the State would determine the reasonableness factors in the State noise policy and recommended a broader definition of reasonableness. The rule intentionally provides a narrow selection of reasonableness factors to ensure uniform and consistent application of the rule nationwide. Similarly, each State highway agency noise policy will list reasonableness factors considered by the State on all projects within the State regardless of jurisdiction to ensure statewide uniform and consistent application of the noise policy. State highway agencies may not tailor reasonableness factors to suit a particular jurisdiction or project.

Nineteen State highway agencies, one national organization, seven private consultants, and one private individual were concerned about various provisions of sec. 772.13(d)(2)(i). The concerns centered on two issues: (1) the requirement to obtain responses from a majority of benefited receptors, and (2) the limitation of surveying property owners rather than residents. A State highway agency expressed concerns about Executive Order 12898 compliance. The FHWA recognizes that the requirement to obtain a majority is overly proscriptive. Highway agencies should devise public involvement programs that satisfy their State's needs. States may institute schemes to give additional weight to the views of impacted residents, but must consider the views of benefited residents. The final rule requires solicitation of the views of residents and property owners. One State highway agency and one private consultant indicated concern with the provision that, "The highway agency is not required to consider the viewpoints of other entities to determine reasonableness, unless explicitly authorized by the benefited property owner." It is FHWA's position that this provision prevents entities other than benefiting residents from vetoing noise abatement on public right-of-way. Another State highway agency expressed that its current practice is to count a lack of response from a residence to a survey as a no vote for the barrier. Two State highway agencies requested clarifying language for the meaning of "desires" or substituting the word "views." It is FHWA's position that the failure to respond to a survey may demonstrate lack interest in noise abatement, particularly when there is a low response rate from the community, but only explicit "no" votes should be considered as "no" votes. States may institute schemes to give additional weight to the views of impacted residents, but must consider the views of benefited residents. The final rule incorporates the phrase "point of view" in place of "desire." This is to eliminate confusion over the meaning of "views," which in the past version of the rule, may have been confused with what people could see rather than their opinion. To provide a more uniform and consistent application nationwide, the following was added to this provision "The highway agency shall solicit the viewpoints form all of the benefited receptors and obtain enough responses to document a decision on either desiring or not desiring the noise

abatement measure. The highway agency shall define, and receive FHWA approval for, the number of receptors that are needed to constitute a decision and explain the basis for this determination."

In sec. 772.13(d)(2)(ii), a State highway agency and a private consultant expressed concern that the proposed rule appeared to change cost as a reasonableness factor from cost effectiveness, as historically applied, to cost of the measure. It is FHWA's position that this was an unintentional change in the language of the proposed rule. The final rule clarifies that State highway agencies must consider the cost effectiveness of the abatement measure rather than considering the overall cost of the abatement measure in terms of the project cost. "The maximum square footage of abatement/benefited receptor," was added to this provision as a way to determine a baseline cost reasonableness value.

Seven State highway agencies and three private consultants commented on the proposed change in sec. 772.13(d)(2)(ii) on how States determine cost reasonableness. All generally agreed with the new provision, but expressed that the provision should provide flexibility to develop cost reasonableness criteria outside the traditional scheme of cost per benefited receptor. One State expressed concern about what factors to include in the cost estimate, and a consultant indicated that States with little or no experience in building noise barriers could have difficulty establishing cost reasonableness criteria due to limited experience. Another State expressed concern about how the reevaluation of construction costs could affect projects caught in the process. It is FHWA's position that the final rule provides flexibility for State highway agencies to use alternate cost reasonableness schemes based on construction cost. The State highway agency and the FHWA should coordinate consideration of factors to include in the construction cost estimate and apply the same values to all projects. The cost estimate is based on averages, which include projects that may cost more or less than the average. The FHWA recognizes that some States have less experience than others with noise abatement construction. The FHWA provides additional information in the noise guidance. The reevaluation should focus on the construction costs with resulting changes in the cost reasonableness threshold. For example, if construction costs increase by 10 percent between evaluations, the cost reasonableness threshold should increase by a like amount. This way, a location determined cost reasonable at one time, would not fail to meet the cost reasonableness criteria later. This is similar to the approach recommended below regarding geographic differences.

In sec. 772.13(d)(2)(ii), two private consultants expressed concern about the provision to allow for geographical differences for cost reasonableness within a State. One suggested removing the provision entirely because it could be difficult to implement and monitor. The other wanted to ensure that wording of the final rule would ensure that identical neighborhoods in a State would have the same opportunity for noise abatement despite geographical differences in construction cost. It is the FHWA's position that the final rule retains this subsection as an option provision as proposed in the NPRM. The language in the final rule ensures that geographical cost differences will not affect a neighborhood's opportunity to receive noise abatement. State highway agencies implementing this provision will ensure that the cost reasonableness criteria/construction cost ratio is the same statewide. For example, the unit cost in City A is $12.50/sq. ft. and the cost per benefiting residence is $25,000. City B is much more expensive with a unit cost of $25/sq. ft. Therefore, the cost per benefiting residence in City B is $50,000.

Based on comments received from four State highway agencies, two private consultants, and a private citizen on obtaining a substantial noise reduction, the FHWA is incorporating noise reduction design goals as the new sec. 772.13(d)(2)(iii). The FHWA is defining "Noise Reduction Design Goal" to remove the disconnect that occurs with a 5 dBA substantial decrease criterion and substantial increase criteria's 5–15 dBA range. This provision states, "[n]oise Reduction design goals for highway traffic noise abatement measures. When noise abatement measure(s) are being considered, a highway agency shall achieve a noise reduction design goal. The highway agency shall define the design goal of at least 7 dB(A) but not more than 10 dB(A), and define the value of benefited receptors that must achieve this design goal. The highway agency shall define the design goal of at least 7 dB(A) but not more than 10 dB(A). The highway agency shall define, and receive FHWA approval for, the number of benefited receptors that must achieve this design goal and explain the basis for this determination." Defining the number of benefited receptors that must achieve this design goal assures that a too balanced approach is taken when defining a design goal.

In sections 772.13(d)(2)(vi) and (v), five State highway agencies and two private consultants commented on the optional reasonableness factors and the statement "No single reasonableness factor should be used as the sole basis for determining reasonableness." One State recommended removal of the optional abatement measures and that States should define these criteria in their own policies. Another State also requested inclusion of factors related to local zoning compliance in the final rule. The final rule clarifies that the provision about single reasonableness factors only applies to the optional factors. Inclusion of the optional reasonableness factors is based on example reasonableness factors in the 1995 guidance. The rule provides flexibility for States to choose additional reasonableness factors that work best for them. States are not required to incorporate the optional reasonableness factors. The final rule does not explicitly address local zoning. The final rule provides flexibility to address this under the optional factor of date of development. The FHWA has no control over zoning practices of local governments. As a result of these comments the FHWA added sec. 772.13(d)(2)(iv) to state, "[t]he reasonableness factors listed in § 772.13(d)(5)(i), (ii) and (iii), must collectively be achieved in order for a noise abatement measure to be deemed reasonable. Failure to achieve § 772.13(d)(5)(i), (ii) or (iii), will result in the noise abatement measure being deemed not reasonable" and modified sec. 772.13(d)(2)(v) to indicated that in addition to the required factors listed in sec. 772.13(d)(2)(i), (ii) and (iii), a highway agency may use the factors within this provision. A sentence was added to clarify that no single optional reasonableness factor could be used to determine reasonableness. In sec. 772.13(e), a national organization, six State highway agencies, and a private consultant requested clarification on substantial increase and the benefited receiver thresholds. The final rule clarifies that benefited receptors must obtain a reduction at or above 5 dB(A), but not exceed the highway agency's reasonableness design goal. This approach provides flexibility to establish different reasonableness criteria for receptors that are impacted and benefiting, versus receptors that are not impacted and benefiting.

Thirteen State highway agencies and four private consultants commented on the inclusion of the noise barrier inventory in the regulation at sec.

772.13(f). The commenters questioned whether this fulfills the current FHWA practice of collecting this information triennially and requested that FHWA specify or clarify the items State highway agencies must report. Two of the States speculated that Federal funding should pay for this effort since it is in the Federal Participation Section. One State sought clarification on whether they would have to report historical data in the format required in the regulation. It is FHWA's position that this new provision in the regulation does codify FHWA's noise barrier inventory that State highway agencies have voluntarily completed every 3 years since the 1990's. The final rule will state all required parameters and clarifies that noise reduction is the average insertion loss/reduction from the installed abatement measure. There is no intention to require reporting of previously reported data. The next inventory collection will start with abatement measures constructed in 2008, 2009, and 2010. The information collected for this inventory will be the same as previous inventories since this time period occurred before the publication of this final rule and before the implementation of this final rule. The inventory beginning with abatement measures constructed in 2011 and thereafter will be collected in accordance with this final rule. The following is been added to this provision, "The inventory shall include the following parameters: Type of abatement; cost (overall cost, unit cost per/sq. ft.); average height; length; area; location (State, county, city, route); year of construction; average insertion loss/noise reduction as reported by the model in the noise analysis; NAC category(s) protected; material(s) used (precast concrete, berm, block, cast in place concrete, brick, metal, wood, fiberglass, combination, plastic (transparent, opaque, other); features (absorptive, reflective, surface texture); foundation (ground mounted, on structure); project type (Type I, Type II, and optional project types such as State funded, county funded, tollway/turnpike funded, other, unknown)."

There were no specific comments on actual text of sec. 772.13(g), but based on the comments received on various parts of this regulation regarding the disconnect between the environmental clearance and the final design noise analysis and documentation, the FHWA has included sec. 772.13(g)(3), which states, "[d]ocumentation of highway traffic noise impacts: The environmental document shall identify locations where noise impacts are predicted to occur, where noise abatement is feasible and reasonable and locations with impacts that have no feasible or reasonable noise abatement alternative. For environmental clearance, this analysis shall be completed to the extent that design information on the alterative(s) under study in the environmental document is available at the time the environmental clearance document is completed. A statement of likelihood shall be included in the environmental document since feasibility and reasonableness determinations may change due to changes in project design after approval of the environmental document. The statement of likelihood shall include the preliminary location and physical description of noise abatement measures determined feasible and reasonable in the preliminary analysis. The statement of likelihood shall also indicate that final recommendations on the construction of an abatement measure(s) is determined during the completion of the project's final design and the public involvement processes."

In sec. 772.13(h), one State highway agency and one private consultant recommended a change from "planned, designed and programmed" to "permitted." The final rule incorporates this change. One State highway agency wanted "in accordance with the Highway Agency approved noise Policy" added to the regulation. Because the FHWA requires all States to have an approved noise policy, the FHWA feels this change would be unnecessary.

In sec. 772.13(i), eight State highway agencies and two private consultants expressed general support for this new provision on design build projects in the regulation, but expressed concern that changes to the project during construction may result in implementation of unneeded environmental commitments, and commented on the relationship between the final and preliminary noise abatement design. The FHWA understands the concerns expressed in the comments; however, the FHWA is concerned that absent a commitment to provide abatement determined reasonable and feasible in the environmental document, and based on the acoustic design developed in the noise analysis, there may be cases where value engineering efforts or other cost savings measures may result in changes to the abatement design that reduce the effectiveness of the noise abatement measures. States are also encouraged to consider developing performance based specifications within their noise policies that apply to design build project to accommodate the project flexibility inherent in the design build process and ensure constructed noise abatement is effective.

Section 772.13(j) was proposed as sec. 772.9(d) in the NPRM. This provision was moved to the analysis of noise abatement since it deals with paying for noise abatement. Ten State highway agencies, two private consultants, and one private individual commented on this section largely supporting the provision and in some cases, seeking minor clarification. In one case, a State highway agency commented that this provision could force States to provide abatement that is not feasible or reasonable. Another commented that this provision could unfairly skew noise abatement to those with greater funds, and a private individual wanted clarification on the timing of the funding. One State also wanted clarification on the entities that count as third parties. Some of the comments make it clear that the wording in the NPRM was not clear. The intent is for all noise abatement measures to stand on their own without contributing additional funds. The final rule states, "Third party funding is not allowed on a Federal or Federal-aid Type I or Type II project if the noise abatement measure would require the additional funding from the third party to be considered feasible and/or reasonable. Third party funding is acceptable on a Federal or Federal-aid highway Type I or Type II project, to make functional enhancements, such as absorptive treatment and access doors or aesthetic enhancements to a noise abatement measure already determined feasible and reasonable." The inclusion of functional enhancements in third party funding covers items that the third party may want in the noise barrier, but are not essential. Listing components such as absorptive treatment and functional enhancements differentiates between what a community may want in a noise barrier and what is necessary for an effective noise barrier. States should develop policies that include consideration for aesthetics, absorptive treatments, functional enhancements such as access doors, fire safety features, etc. Communities desiring functional enhancements or aesthetic treatment beyond that provided for in the State noise policy could contribute toward those enhancements. Third parties are any entity other than the State highway agency and DOT operating administrations.

Section 772.13(k) was proposed as provision 772.9(d) in the NPRM. This provision was moved to the analysis of noise abatement since it deals with cost averaging noise abatement. This

provision was moved to the analysis of noise abatement since it deals with paying for noise abatement. The final rule incorporates the concept of cost averaging across the project with some limitations as presented in a comment from a private consultant. This section now states, "on a Type I or a Type II project, a highway agency has the option to cost average noise abatement among benefited receptors within common noise environments, if no single common noise environment exceeds two times the highway agency's cost reasonableness criteria and collectively all common noise environments being averaged do not exceed the highway agency's cost reasonableness criteria."

Section 772.15—Federal Participation

In sec. 772.15(b), a State highway agency remarked that this section was always confusing and offered clarifying language. The FHWA agrees and revised this provision to largely include the language as presented in section 339(b) of the National Highway System Designation Act of 1995. As a result, sec. 772.15(b)(1) states, "No funds made available out of the Highway Trust Fund may be used to construct Type II noise barriers, as defined by this regulation, if such barriers were not part of a project approved by the FHWA before the November 28, 1995." November 28, 1995, is the date that the National Highway System Designation Act went into effect. A private consultant expressed that this section limits Type II projects to those that were "proposed where land development or substantial construction predated the existence of any highway." The definition for substantial construction is "the granting of a building permit prior to right-of-way acquisition or construction approval for the highway." The wording and meaning of definition and this provision differ and need to be reconciled. The FHWA agrees and the final rule addresses this by removing "any" and largely stating the language as presented in the National Highway System Designation Act of 1995. As a result, sec. 772.15(b)(2) states "Federal funds are available for Type II noise barriers along lands that were developed or were under substantial construction before approval of the acquisition of the rights-of-ways for, or construction of, the existing highway."

In sec. 772.15(b)(3), two State highway agencies questioned the restriction on Type II funding eliminating locations previously determined not feasible or reasonable for a Type I project. One of these agencies questioned whether this is still the case after a re-evaluation of an environmental document. It is FHWA's position that if a Type I location is not cost-reasonable based on the construction of homes at the time of that project, then that location is not cost-reasonable later for a Type II project. Highway agencies typically divide the overall cost of a noise abatement measure by the number of benefiting residences to determine a cost per benefiting residence. An abatement measure is cost reasonable if the cost per residence does not exceed the State's criteria. The only way the neighborhood becomes cost reasonable is if the number of residences increases. The new residences would not predate the facility and cannot count in the cost-reasonableness calculation. The only way to consider the commenter's approach is if the highway agency increased the allowable cost per benefited residence relative to the construction cost. This potentially exposes the highway agency to going back to look at previous decisions on other Type I and Type II projects to see if the highway agency inappropriately excluded locations from receiving noise abatement. This situation would not necessarily include Type I projects that involve a re-evaluation of an existing environmental document, but those circumstances would be scarce. Typically, a location determined not reasonable in an environmental document that is later determined reasonable in a re-evaluation results from construction of additional residences that result in a lower average cost per benefited residence and result in abatement not cost reasonable under the earlier document achieving the cost-reasonableness threshold. In this case, the highway agency would offer noise abatement to the neighborhood as part of the Type I project, eliminating the need to consider the location for a Type II project. The FHWA made no changes to this provision.

In sec. 772.15(c), one State highway agency sought clarification on some of the available noise abatement measures, specifically regarding the need to meet the feasibility and reasonableness criteria and regarding the purchase of land. It is FHWA's position that any proposed noise abatement measure must achieve the feasibility and reasonableness requirements established in the highway agency's noise policy. The section on acquisition of real property provides highway agencies with the authority to acquire right-of-way for the purpose of noise barrier construction. The statement regarding unimproved property is there to highlight that highway agencies cannot use this provision to purchase a residence just so the State can tear it down and construct a noise barrier for the second row of houses. Three highway agencies and a university recommended including quieter pavements as noise abatement, with one noting a large body of research completed by the State to support this approach. It is FHWA's position that there are still too many unknowns regarding pavement to consider its use as a noise abatement measure. These issues include acoustic longevity and construction variability. The FHWA has provisions for highway agencies to enter into a Quiet Pavement Pilot Program or to perform Quiet Pavement Research. The FHWA acknowledges the valuable research performed by various highway agencies; however, the regulation must be applicable nationwide and not just in one State. No changes were made to this provision.

In sec. 772.15(c)(1), six State highway agencies and three private consultants expressed support for FHWA's position clarifying that vegetation is not an appropriate noise abatement measure, but recommended removal of references to funding for aesthetic purposes. The FHWA has removed reference to funding for landscaping from the regulation. One State highway agency and one private consultant indicated concerns with the approach to make five of the noise abatement alternatives optional and only require consideration of noise barriers because this approach contradicts the long-standing practice to avoid, minimize, and then mitigate. It is the FHWA's position that the language in the final rule allows States to consider all noise abatement measures listed in the regulation while requiring only consideration of noise barriers. This approach provides highway agencies with the flexibility they need to accomplish the recommended approach if the highway agency chooses to do so.

A private consultant recommended adding a new section to 772.15(c) regarding absorptive cladding applied to an existing reflective surface as a noise abatement measure. Because the final rule does not preclude States from considering this approach as a noise abatement measure, no changes were made to this provision.

In sec. 772.15(c)(4), two State highway agencies and one private consultant commented on buffer zones. One highway agency requested further clarification in the updated FHWA noise guidance. Another highway agency requested limitation to planned, designed, and programmed land use and

a private consultant wanted the addition of "to move noise-sensitive receptors farther from the source" added to the subsection. The FHWA addresses buffer zones in the guidance document. Regarding the comment on planned, designed and programmed land use, the purpose of the buffer zone for noise abatement could also be to stop potential alignment shifts toward existing noise sensitive land uses outside the buffer zone. The intent of the buffer zone is to provide separation between potentially developable land and highways. Regarding the added language, this may imply that FHWA may actually move residences away from an existing highway to a new location to purchase the property as a buffer zone. Since this is not the intent of the regulation, no changes were made to this provision.

In sec. 772.15(c)(5), two State highway agencies and one private consultant expressed support for this provision regarding noise insulation and recommended incorporating any additional expenses accrued by the property owner after project completion. The FHWA agrees and the final rule incorporates this idea by referring to additional expenses as post-installation maintenance and operational costs. Also, to clarify what land uses are eligible for noise insulation, this provision now states, "noise insulation or Activity Category D land use facilities listed in table 1."

Eight State highway agencies and three private consultants expressed concerns about the provision in the NPRM regarding severe noise impact criteria in the regulation. Based on these comments, the FHWA has removed this provision on severe noise impacts from the final rule. It is FHWA's position that the regulation currently requires a highway agency to define "substantial increase," which recognizes all potential impacts that could result from the proposed project. Adding another layer of impact with the title of "severe" is problematic to the noise analysis and will create even more confusion to the public. Severe noise impacts could cause inconsistencies in the application of the noise analysis process, since it would require establishing another feasibility and cost reasonableness factor. As stated throughout this final rule, application of this regulation needs to be applied consistently and uniformly statewide. Also, "severe" noise impacts could be confusing to the public, since they typically feel that they are all severely impacted regardless of the noise level or increase in noise levels.

Section 772.17—Information for Local Officials

In sec. 772.17, 13 State highway agencies and 4 private consultants commented about the requirements in section 772.1 (section 772.15 in the NPRM) regarding information for local officials. Some comments were about the numbering of the section, which has been corrected in the final rule, and others were about the apparent redundancy in two of the subsections. There were also concerns about the extent of a statewide outreach program and some confusion about whether outreach to local officials is a new requirement. There was also opposition to the requirement to implement a statewide outreach program prior to considering date of development as a reasonableness criterion. It is FHWA's position that highway agencies may use information in the FHWA publication "The Audible Landscape." The FHWA is considering updating this document to incorporate additional planning strategies. The final rule also clarifies the minimum information provided to local officials, which is the distance from the highway to the impact criteria for each exterior land use in Table 1 of this regulation. The requirement to inform local officials about future noise impacts on undeveloped lands has been part of this regulation since its inception. Unfortunately, few highway agencies properly fulfill this requirement. It is likely that many municipalities have never had a Federal project that provided the opportunity for the highway agency to inform them about noise compatible planning practices. The FHWA recognizes that State governments often have little control over local planning; however, FHWA has also promoted noise compatible planning strategies for more than 30 years with little active involvement by States on the issue. It is incumbent on State highway agencies, therefore, to demonstrate that they have educated local officials on noise issues if date of development may preclude some locations from receiving noise abatement. The FHWA noise guidance provides additional clarification on statewide outreach programs. For clarification, the FHWA modified sec. 772.17(a) to include reference to Type I projects and section 772.17(a)(2) to state, "[a]t a minimum, identify the distance to the exterior noise abatement criteria in Table 1. The best estimation of the future design year noise levels at various distances from the edge of the nearest travel lane * * *"

In sec. 772.17(b), a private individual expressed that the rule should expand the date of development to allow State highway agencies to give additional weight to older residences. It is FHWA's position that highway agencies with statewide noise compatible planning outreach programs may consider date of development in their decisions to provide abatement. The regulation currently authorizes highway agencies to fund Type II programs on a voluntary basis to provide abatement for locations that predate adjacent highways in the absence of a Type I project. For clarification, the FHWA modified this provision to state, "If a highway agency chooses to participate in a Type II noise program or to use the date of development as one of the factors in determining the reasonableness of a Type I noise abatement measure, the highway agency shall have a statewide outreach program * * *"

Section 772.19—Construction Noise

In sec. 772.19, five State highway agencies, one national organization, and one private consultant commented that FHWA should provide additional regulatory guidance to address construction noise including a regulatory reference to the Roadway Construction Noise Model. It is FHWA's position that there is sufficient information regarding construction noise available in the construction noise handbook. The model will remain an option for use by States to predict construction noise impacts for projects. As such, no changes were made to this provision.

Table 1 to Part 772—Noise Abatement Criteria

Eight State highway agencies, a national organization and two private consultants provided comments on Table 1. Some of the same entities also provided comments in other sections of the regulation related to Table 1. The comments generally centered on the opposition to include trails, trail crossings, and cemeteries; recommended inclusion of additional land use categories; recommended elimination of some Category C land uses; or recommended reorganization of the table to better differentiate between land use categories. The FHWA disagrees with removal of trails and trail crossing and cemeteries from Table 1. These are recreational and noise sensitive areas eligible for consideration under previous FHWA guidance. The FHWA disagrees with the elimination of Category C land uses. Historical data based on highway agencies not including Category C locations in their noise analyses or their public involvement may paint an inaccurate

portrait of commercial property owner interest in noise abatement since many highway agencies failed to include commercial land uses in noise analyses or involve them in the public involvement process. The FHWA agrees Table 1 needs to better differentiate business land uses that require analysis. The final rule includes a reorganization of Table 1 to help clarify this issue and adds day care, television studios, radio studios, and recording studios as noise sensitive land uses. This reorganization includes the following Activity Categories:

Activity Category A, this activity category still provides the exterior activity criteria for "Lands on which serenity and quiet are of extraordinary significance and serve an important public need and where the preservation of those qualities is essential if the area is to continue to serve its intended purpose." No changes were made to this activity category.

Activity Category B, this activity category now only includes the exterior activity criteria for residential properties. All other land uses that were associated with this activity category in the past have been reorganized into other activity categories.

Activity Category C, this activity category is now the exterior activity criteria for the following land uses: "active sport areas, amphitheaters, auditoriums, campgrounds, cemeteries, day care centers, hospitals, libraries, medical facilities, parks, picnic areas, places of worship, playgrounds, public meeting rooms, public or non-profit institutional structures, radio studios, recording studios, recreation areas, Section 4(f) sites, schools, television studios, trails, and trail crossings." The exterior activity criteria for Activity Category C are the same as the exterior activity criteria for Activity Category B. The reason why the land uses associated with these activity categories are in separate categories is that the land used in Activity Category C includes a variety of land use facilities that require each highway agency to adopt a standard uniform and consistent practice in assessing their impacts and abatement measures.

Activity Category D, this activity category is now the interior activity criteria for the following land uses: "auditoriums, day care centers, hospitals, libraries, medical facilities, places of worship, public meeting rooms, public or non-profit institutional structures, radio studios, recording studios, schools, and television studios." The activity description for Activity Category D is similar to the activity description for Activity Category C. The difference between the Activity Category C and D is the exterior verses interior criteria.

Activity Category E, this activity category is now the exterior activity criteria for the following land uses: "hotels, motels, offices, restaurants/bars, and other developed lands, properties or activities not included in A–D or F." These land use facilities are less sensitive to highway traffic noise, and therefore have a higher activity criteria.

Activity Category F, this activity category has no activity criteria associated for the following land uses: "agriculture, airports, bus yards, emergency services, industrial, logging, maintenance facilities, manufacturing, mining, rail yards, retail facilities, shipyards, utilities (water resources, water treatment, electrical), and warehousing." These land use facilities are not sensitive to highway traffic noise and/or do not have exterior areas of frequent human use and therefore no activity criteria is appropriate to apply.

Activity Category G, this activity category has no activity criteria associated for undeveloped lands that are not permitted. Undeveloped land is not sensitive to highway traffic noise and does not have exterior areas of frequent human use.

Rulemaking Analyses and Notices

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this final rule is not a significant regulatory action within the meaning of Executive Order 12866 and is not significant within the meaning of the U.S. Department of Transportation regulatory policies and procedures.

The final rule revises requirements for traffic noise prediction on Federal-aid highway projects to be consistent with the current state-of-the-art technology for traffic noise prediction. It is anticipated that the economic impact of this rulemaking would be minimal; therefore, a full regulatory evaluation is not required.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (RFA) (Pub. L. 96–354, 5 U.S.C. 601–612), the FHWA has evaluated the effects of this final rule on small entities and anticipates that this action would not have a significant economic impact on a substantial number of small entities. The amendments address traffic noise prediction on certain State highway projects. As such, it affects only States, and States are not included in the definition of small entity set forth in 5 U.S.C. 601. Therefore, the RFA does not apply, and the FHWA certifies that the final rule would not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

This final rule would not impose unfunded mandates as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995, 109 Stat. 48). The actions proposed in this final rule would not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $141.3 million or more in any one year (2 U.S.C. 1532). Additionally, the definition of "Federal Mandate" in the Unfunded Mandates Reform Act excludes financial assistance of the type in which State, local, or tribal governments have authority to adjust their participation in the program in accordance with changes made in the program by the Federal Government. The Federal-aid highway program permits this type of flexibility.

Executive Order 13132 (Federalism)

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13132, dated August 4, 1999, and it has been determined that this final rule does not have a substantial direct effect or sufficient federalism implications on States that would limit the policymaking discretion of the States. Nothing in this final rule directly preempts any State law or regulation or affects the States' ability to discharge traditional State governmental functions.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

National Environmental Policy Act

The FHWA has analyzed this final rule for the purpose of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and anticipates that this action would not have any effect on the quality of the human and natural environment, since it updates the specific reference to acceptable highway traffic noise prediction methodology and removes unneeded references to a

specific noise measurement report and vehicle noise emission levels.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, *et seq.*), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. The FHWA determined that this final rule would affect a currently approved information collection for OMB Control Number 2125–0622, titled "Noise Barrier Inventory Request." The OMB approved this information collection on July 30, 2008, at a total of 416 burden hours, with an expiration date of July 31, 2011.

Executive Order 13175 (Tribal Consultation)

The FHWA has analyzed this final rule under Executive Order 13175, dated November 6, 2000, and believes that it would not have substantial direct effects on one or more Indian tribes; would not impose substantial direct compliance costs on Indian tribal governments; and would not preempt tribal law. This rulemaking primarily applies to noise prediction on State highway projects and would not impose any direct compliance requirements on Indian tribal governments; nor would it have any economic or other impacts on the viability of Indian tribes. Therefore, a tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

The FHWA has analyzed this final rule under Executive Order 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution or Use. We have determined that this final rule would not be a significant energy action under that order because any action contemplated would not be likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, the FHWA certifies that a Statement of Energy Effects under Executive Order 13211 is not required.

Executive Order 12630 (Taking of Private Property)

The FHWA has analyzed this final rule under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights. The FHWA does not anticipate that this final rule would affect a taking of private property or otherwise have taking implications under Executive Order 12630.

Executive Order 12988 (Civil Justice Reform)

This action meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity and reduce burden.

Executive Order 13045 (Protection of Children)

The FHWA has analyzed this final rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. The FHWA certifies that this final rule would not cause an environmental risk to health or safety that may disproportionately affect children.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 23 CFR Part 772

Highways and roads, Incorporation by reference, Noise control.

Issued on: June 21, 2010.

Victor M. Mendez,

Administrator.

■ In consideration of the foregoing, the FHWA revises part 772 of title 23, Code of Federal Regulations, to read as follows:

PART 772—PROCEDURES FOR ABATEMENT OF HIGHWAY TRAFFIC NOISE AND CONSTRUCTION NOISE

Sec.

772.1 Purpose.
772.3 Noise standards.
772.5 Definitions.
772.7 Applicability.
772.9 Traffic noise prediction.
772.11 Analysis of traffic noise impacts.
772.13 Analysis of noise abatement.
772.15 Federal participation.
772.17 Information for local officials.
772.19 Construction noise.
Table 1 to Part 772—Noise Abatement Criteria

Authority: 23 U.S.C. 109(h) and (i); 42 U.S.C. 4331, 4332; sec. 339(b), Pub. L. 104–59, 109 Stat. 568, 605; 49 CFR 1.48(b).

§ 772.1 Purpose.

To provide procedures for noise studies and noise abatement measures to help protect the public's health, welfare and livability, to supply noise abatement criteria, and to establish requirements for information to be given to local officials for use in the planning and design of highways approved pursuant to title 23 U.S.C.

§ 772.3 Noise standards.

The highway traffic noise prediction requirements, noise analyses, noise abatement criteria, and requirements for informing local officials in this regulation constitute the noise standards mandated by 23 U.S.C. 109(1). All highway projects which are developed in conformance with this regulation shall be deemed to be in accordance with the FHWA noise standards.

§ 772.5 Definitions.

Benefited Receptor. The recipient of an abatement measure that receives a noise reduction at or above the minimum threshold of 5 dB(A), but not to exceed the highway agency's reasonableness design goal.

Common Noise Environment. A group of receptors within the same Activity Category in Table 1 that are exposed to similar noise sources and levels; traffic volumes, traffic mix, and speed; and topographic features. Generally, common noise environments occur between two secondary noise sources, such as interchanges, intersections, cross-roads.

Date of Public Knowledge. The date of approval of the Categorical Exclusion (CE), the Finding of No Significant Impact (FONSI), or the Record of Decision (ROD), as defined in 23 CFR part 771.

Design Year. The future year used to estimate the probable traffic volume for which a highway is designed.

Existing Noise Levels. The worst noise hour resulting from the combination of natural and mechanical sources and human activity usually present in a particular area.

Feasibility. The combination of acoustical and engineering factors considered in the evaluation of a noise abatement measure.

Impacted Receptor. The recipient that has a traffic noise impact.

L10. The sound level that is exceeded 10 percent of the time (the 90th percentile) for the period under consideration, with L10(h) being the hourly value of L10.

Leq. The equivalent steady-state sound level which in a stated period of time contains the same acoustic energy as the time-varying sound level during the same time period, with Leq(h) being the hourly value of Leq.

Multifamily Dwelling. A residential structure containing more than one residence. Each residence in a multifamily dwelling shall be counted as one receptor when determining impacted and benefited receptors.

Noise Barrier. A physical obstruction that is constructed between the highway noise source and the noise sensitive receptor(s) that lowers the noise level, including stand alone noise walls, noise berms (earth or other material), and combination berm/wall systems.

Noise Reduction Design Goal. The optimum desired dB(A) noise reduction determined from calculating the difference between future build noise levels with abatement, to future build noise levels without abatement. The noise reduction design goal shall be at least 7 dB(A), but not more than 10 dB(A).

Permitted. A definite commitment to develop land with an approved specific design of land use activities as evidenced by the issuance of a building permit.

Property Owner. An individual or group of individuals that holds a title, deed, or other legal documentation of ownership of a property or a residence.

Reasonableness. The combination of social, economic, and environmental factors considered in the evaluation of a noise abatement measure.

Receptor. A discrete or representative location of a noise sensitive area(s), for any of the land uses listed in Table 1.

Residence. A dwelling unit. Either a single family residence or each dwelling unit in a multifamily dwelling.

Statement of Likelihood. A statement provided in the environmental clearance document based on the feasibility and reasonableness analysis completed at the time the environmental document is being approved.

Substantial Construction. The granting of a building permit, prior to right-of-way acquisition or construction approval for the highway.

Substantial noise increase. One of two types of highway traffic noise impacts. For a Type I project, an increase in noise levels of 5 to 15 dB(A) in the design year over the existing noise level.

Traffic Noise Impacts. Design year build condition noise levels that approach or exceed the NAC listed in Table 1 for the future build condition; or design year build condition noise levels that create a substantial noise increase over existing noise levels.

Type I Project. (1) The construction of a highway on new location; or,

(2) The physical alteration of an existing highway where there is either:

(i) Substantial Horizontal Alteration. A project that halves the distance between the traffic noise source and the closest receptor between the existing condition to the future build condition; or,

(ii) Substantial Vertical Alteration. A project that removes shielding therefore exposing the line-of-sight between the receptor and the traffic noise source. This is done by either altering the vertical alignment of the highway or by altering the topography between the highway traffic noise source and the receptor; or,

(3) The addition of a through-traffic lane(s). This includes the addition of a through-traffic lane that functions as a HOV lane, High-Occupancy Toll (HOT) lane, bus lane, or truck climbing lane; or,

(4) The addition of an auxiliary lane, except for when the auxiliary lane is a turn lane; or,

(5) The addition or relocation of interchange lanes or ramps added to a quadrant to complete an existing partial interchange; or,

(6) Restriping existing pavement for the purpose of adding a through-traffic lane or an auxiliary lane; or,

(7) The addition of a new or substantial alteration of a weigh station, rest stop, ride-share lot or toll plaza.

(8) If a project is determined to be a Type I project under this definition then the entire project area as defined in the environmental document is a Type I project.

Type II Project. A Federal or Federal-aid highway project for noise abatement on an existing highway. For a Type II project to be eligible for Federal-aid funding, the highway agency must develop and implement a Type II program in accordance with section 772.7(e).

Type III Project. A Federal or Federal-aid highway project that does not meet the classifications of a Type I or Type II project. Type III projects do not require a noise analysis.

§ 772.7 Applicability.

(a) This regulation applies to all Federal or Federal-aid Highway Projects authorized under title 23, United States Code. Therefore, this regulation applies to any highway project or multimodal project that:

(1) Requires FHWA approval regardless of funding sources, or

(2) Is funded with Federal-aid highway funds.

(b) In order to obtain FHWA approval, the highway agency shall develop noise policies in conformance with this regulation and shall apply these policies uniformly and consistently statewide.

(c) This regulation applies to all Type I projects unless the regulation specifically indicates that a section only applies to Type II or Type III projects.

(d) The development and implementation of Type II projects are not mandatory requirements of section 109(i) of title 23, United States Code.

(e) If a highway agency chooses to participate in a Type II program, the highway agency shall develop a priority system, based on a variety of factors, to rank the projects in the program. This priority system shall be submitted to and approved by FHWA before the highway agency is allowed to use Federal-aid funds for a project in the program. The highway agency shall re-analyze the priority system on a regular interval, not to exceed 5 years.

(f) For a Type III project, a highway agency is not required to complete a noise analysis or consider abatement measures.

§ 772.9 Traffic noise prediction.

(a) Any analysis required by this subpart must use the FHWA Traffic Noise Model (TNM), which is described in "FHWA Traffic Noise Model" Report No. FHWA–PD–96–010, including Revision No. 1, dated April 14, 2004, or any other model determined by the FHWA to be consistent with the methodology of the FHWA TNM. These publications are incorporated by reference in accordance with section 552(a) of title 5, U.S.C. and part 51 of title 1, CFR, and are on file at the National Archives and Record Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030 or go to *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.* These documents are available for copying and inspection at the Federal Highway Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590, as provided in part 7 of title 49, CFR. These documents are also available on the FHWA's Traffic Noise Model Web site at the following URL: *http://www.fhwa.dot.gov/environment/noise/index.htm.*

(b) Average pavement type shall be used in the FHWA TNM for future noise level prediction unless a highway agency substantiates the use of a different pavement type for approval by the FHWA.

(c) Noise contour lines may be used for project alternative screening or for land use planning to comply with § 772.17 of this part, but shall not be used for determining highway traffic noise impacts.

(d) In predicting noise levels and assessing noise impacts, traffic characteristics that would yield the worst traffic noise impact for the design year shall be used.

§ 772.11 Analysis of traffic noise impacts.

(a) The highway agency shall determine and analyze expected traffic noise impacts.

(1) For projects on new alignments, determine traffic noise impacts by field measurements.

(2) For projects on existing alignments, predict existing and design year traffic noise impacts.

(b) In determining traffic noise impacts, a highway agency shall give primary consideration to exterior areas where frequent human use occurs.

(c) A traffic noise analysis shall be completed for:

(1) Each alternative under detailed study;

(2) Each Activity Category of the NAC listed in Table 1 that is present in the study area;

(i) *Activity Category A.* This activity category includes the exterior impact criteria for lands on which serenity and quiet are of extraordinary significance and serve an important public need, and where the preservation of those qualities is essential for the area to continue to serve its intended purpose. Highway agencies shall submit justifications to the FHWA on a case-by-case basis for approval of an Activity Category A designation.

(ii) *Activity Category B.* This activity category includes the exterior impact criteria for single-family and multifamily residences.

(iii) *Activity Category C.* This activity category includes the exterior impact criteria for a variety of land use facilities. Each highway agency shall adopt a standard practice for analyzing these land use facilities that is consistent and uniformly applied statewide.

(iv) *Activity Category D.* This activity category includes the interior impact criteria for certain land use facilities listed in Activity Category C that may have interior uses. A highway agency shall conduct an indoor analysis after a determination is made that exterior abatement measures will not be feasible and reasonable. An indoor analysis shall only be done after exhausting all outdoor analysis options. In situations where no exterior activities are to be affected by the traffic noise, or where the exterior activities are far from or physically shielded from the roadway in a manner that prevents an impact on exterior activities, the highway agency shall use Activity Category D as the basis of determining noise impacts. Each highway agency shall adopt a standard practice for analyzing these land use facilities that is consistent and uniformly applied statewide.

(v) *Activity Category E.* This activity category includes the exterior impact criteria for developed lands that are less sensitive to highway noise. Each highway agency shall adopt a standard practice for analyzing these land use facilities that is consistent and uniformly applied statewide.

(vi) *Activity Category F.* This activity category includes developed lands that are not sensitive to highway traffic noise. There is no impact criteria for the land use facilities in this activity category and no analysis of noise impacts is required.

(vii) *Activity Category G.* This activity includes undeveloped lands.

(A) A highway agency shall determine if undeveloped land is permitted for development. The milestone and its associated date for acknowledging when undeveloped land is considered permitted shall be the date of issuance of a building permit by the local jurisdiction or by the appropriate governing entity.

(B) If undeveloped land is determined to be perrmitted, then the highway agency shall assign the land to the appropriate Activity Category and analyze it in the same manner as developed lands in that Activity Category.

(C) If undeveloped land is not permitted for development by the date of public knowledge, the highway agency shall determine noise levels in accordance with 772.17(a) and document the results in the project's environmental clearance documents and noise analysis documents. Federal participation in noise abatement measures will not be considered for lands that are not permitted by the date of public knowledge.

(d) The analysis of traffic noise impacts shall include:

(1) Identification of existing activities, developed lands, and undeveloped lands, which may be affected by noise from the highway;

(2) For projects on new or existing alignments, validate predicted noise level through comparison between measured and predicted levels;

(3) Measurement of noise levels. Use an ANSI Type I or Type II integrating sound level meter;

(4) Identification of project limits to determine all traffic noise impacts for the design year for the build alternative. For Type II projects, traffic noise impacts shall be determined from current year conditions;

(e) Highway agencies shall establish an approach level to be used when determining a traffic noise impact. The approach level shall be at least 1 dB(A) less than the Noise Abatement Criteria for Activity Categories A to E listed in Table 1 to part 772;

(f) Highway agencies shall define substantial noise increase between 5 dB(A) to 15 dB(A) over existing noise levels. The substantial noise increase criterion is independent of the absolute noise level.

(g) A highway agency proposing to use Federal-aid highway funds for a Type II project shall perform a noise analysis in accordance with § 772.11 of this part in order to provide information needed to make the determination required by § 772.13(a) of this part.

§ 772.13 Analysis of noise abatement.

(a) When traffic noise impacts are identified, noise abatement shall be considered and evaluated for feasibility and reasonableness. The highway agency shall determine and analyze alternative noise abatement measures to abate identified impacts by giving weight to the benefits and costs of abatement and the overall social, economic, and environmental effects by using feasible and reasonable noise abatement measures for decision-making.

(b) In abating traffic noise impacts, a highway agency shall give primary consideration to exterior areas where frequent human use occurs.

(c) If a noise impact is identified, a highway agency shall consider abatement measures. The abatement measures listed in § 772.15(c) of this part are eligible for Federal funding.

(1) At a minimum, the highway agency shall consider noise abatement in the form of a noise barrier.

(2) If a highway agency chooses to use absorptive treatments as a functional enhancement, the highway agency shall adopt a standard practice for using absorptive treatment that is consistent and uniformly applied statewide.

(d) Examination and evaluation of feasible and reasonable noise abatement measures for reducing the traffic noise impacts. Each highway agency, with FHWA approval, shall develop feasibility and reasonableness factors.

(1) Feasibility:

(i) Achievement of at least a 5 dB(A) highway traffic noise reduction at impacted receptors. The highway agency shall define, and receive FHWA approval for, the number of receptors that must achieve this reduction for the noise abatement measure to be acoustically feasible and explain the basis for this determination; and

(ii) Determination that it is possible to design and construct the noise abatement measure. Factors to consider are safety, barrier height, topography, drainage, utilities, and maintenance of

the abatement measure, maintenance access to adjacent properties, and access to adjacent properties (*i.e.* arterial widening projects).

(2) Reasonableness:

(i) Consideration of the viewpoints of the property owners and residents of the benefited receptors. The highway agency shall solicit the viewpoints of all of the benefited receptors and obtain enough responses to document a decision on either desiring or not desiring the noise abatement measure. The highway agency shall define, and receive FHWA approval for, the number of receptors that are needed to constitute a decision and explain the basis for this determination.

(ii) Cost effectiveness of the highway traffic noise abatement measures. Each highway agency shall determine, and receive FHWA approval for, the allowable cost of abatement by determining a baseline cost reasonableness value. This determination may include the actual construction cost of noise abatement, cost per square foot of abatement, the maximum square footage of abatement/benefited receptor and either the cost/benefited receptor or cost/benefited receptor/dB(A) reduction. The highway agency shall re-analyze the allowable cost for abatement on a regular interval, not to exceed 5 years. A highway agency has the option of justifying, for FHWA approval, different cost allowances for a particular geographic area(s) within the State, however, the highway agancy must use the same cost reasonableness/construction cost ratio statewide.

(iii) Noise reduction design goals for highway traffic noise abatement measures. When noise abatement measure(s) are being considered, a highway agency shall achieve a noise reduction design goal. The highway agency shall define, and receive FHWA approval for, the design goal of at least 7 dB(A) but not more than 10 dB(A), and shall define the number of benefited receptors that must achieve this design goal and explain the basis for this determination.

(iv) The reasonableness factors listed in § 772.13(d)(5)(i), (ii) and (iii), must collectively be achieved in order for a noise abatement measure to be deemed reasonable. Failure to achieve § 772.13(d)(5)(i), (ii) or (iii), will result in the noise abatement measure being deemed not reasonable.

(v) In addition to the required reasonableness factors listed in § 772.13(d)(5)(i), (ii), and (iii), a highway agency has the option to also include the following reasonableness factors: Date of development, length of time receivers have been exposed to highway traffic noise impacts, exposure to higher absolute highway traffic noise levels, changes between existing and future build conditions, percentage of mixed zoning development, and use of noise compatible planning concepts by the local government. No single optional reasonableness factor can be used to determine reasonableness.

(e) Assessment of Benefited Receptors. Each highway agency shall define the threshold for the noise reduction which determines a benefited receptor as at or above the 5 dB(A), but not to exceed the highway agency's reasonableness design goal.

(f) Abatement Measure Reporting: Each highway agency shall maintain an inventory of all constructed noise abatement measures. The inventory shall include the following parameters: type of abatement; cost (overall cost, unit cost per/sq. ft.); average height; length; area; location (State, county, city, route); year of construction; average insertion loss/noise reduction as reported by the model in the noise analysis; NAC category(s) protected; material(s) used (precast concrete, berm, block, cast in place concrete, brick, metal, wood, fiberglass, combination, plastic (transparent, opaque, other); features (absorptive, reflective, surface texture); foundation (ground mounted, on structure); project type (Type I, Type II, and optional project types such as State funded, county funded, tollway/turnpike funded, other, unknown). The FHWA will collect this information, in accordance with OMB's Information Collection requirements.

(g) Before adoption of a CE, FONSI, or ROD, the highway agency shall identify:

(1) Noise abatement measures which are feasible and reasonable, and which are likely to be incorporated in the project; and

(2) Noise impacts for which no noise abatement measures are feasible and reasonable.

(3) Documentation of highway traffic noise abatement: The environmental document shall identify locations where noise impacts are predicted to occur, where noise abatement is feasible and reasonable, and locations with impacts that have no feasible or reasonable noise abatement alternative. For environmental clearance, this analysis shall be completed to the extent that design information on the alterative(s) under study in the environmental document is available at the time the environmental clearance document is completed. A statement of likelihood shall be included in the environmental document since feasibility and reasonableness determinations may change due to changes in project design after approval of the environmental document. The statement of likelihood shall include the preliminary location and physical description of noise abatement measures determined feasible and reasonable in the preliminary analysis. The statement of likelihood shall also indicate that final recommendations on the construction of an abatement measure(s) is determined during the completion of the project's final design and the public involvement processes.

(h) The FHWA will not approve project plans and specifications unless feasible and reasonable noise abatement measures are incorporated into the plans and specifications to reduce the noise impact on existing activities, developed lands, or undeveloped lands for which development is permitted.

(i) For design-build projects, the preliminary technical noise study shall document all considered and proposed noise abatement measures for inclusion in the NEPA document. Final design of design-build noise abatement measures shall be based on the preliminary noise abatement design developed in the technical noise analysis. Noise abatement measures shall be considered, developed, and constructed in accordance with this standard and in conformance with the provisions of 40 CFR 1506.5(c) and 23 CFR 636.109.

(j) Third party funding is not allowed on a Federal or Federal-aid Type I or Type II project if the noise abatement measure would require the additional funding from the third party to be considered feasible and/or reasonable. Third party funding is acceptable on a Federal or Federal-aid highway Type I or Type II project to make functional enhancements, such as absorptive treatment and access doors or aesthetic enhancements, to a noise abatement measure already determined feasible and reasonable.

(k) On a Type I or Type II projects, a highway agency has the option to cost average noise abatement among benefited receptors within common noise environments if no single common noise environment exceeds two times the highway agency's cost reasonableness criteria and collectively all common noise environments being averaged do not exceed the highway agency's cost reasonableness criteria.

§ 772.15 Federal participation.

(a) *Type I and Type II projects.* Federal funds may be used for noise abatement measures when:

(1) Traffic noise impacts have been identified; and

(2) Abatement measures have been determined to be feasible and

reasonable pursuant to § 772.13(d) of this chapter.

(b) *For Type II projects.* (1) No funds made available out of the Highway Trust Fund may be used to construct Type II noise barriers, as defined by this regulation, if such noise barriers were not part of a project approved by the FHWA before the November 28, 1995.

(2) Federal funds are available for Type II noise barriers along lands that were developed or were under substantial construction before approval of the acquisition of the rights-of-ways for, or construction of, the existing highway.

(3) FHWA will not approve noise abatement measures for locations where such measures were previously determined not to be feasible and reasonable for a Type I project.

(c) *Noise Abatement Measures.* The following noise abatement measures may be considered for incorporation into a Type I or Type II project to reduce traffic noise impacts. The costs of such measures may be included in Federal-aid participating project costs with the Federal share being the same as that for the system on which the project is located.

(1) Construction of noise barriers, including acquisition of property rights, either within or outside the highway right-of-way. Landscaping is not a viable noise abatement measure.

(2) Traffic management measures including, but not limited to, traffic control devices and signing for prohibition of certain vehicle types, time-use restrictions for certain vehicle types, modified speed limits, and exclusive lane designations.

(3) Alteration of horizontal and vertical alignments.

(4) Acquisition of real property or interests therein (predominantly unimproved property) to serve as a buffer zone to preempt development which would be adversely impacted by traffic noise. This measure may be included in Type I projects only.

(5) Noise insulation of Activity Category D land use facilities listed in Table 1. Post-installation maintenance and operational costs for noise insulation are not eligible for Federal-aid funding.

§ 772.17 Information for local officials.

(a) To minimize future traffic noise impacts on currently undeveloped lands of Type I projects, a highway agency shall inform local officials within whose jurisdiction the highway project is located of:

(1) Noise compatible planning concepts;

(2) The best estimation of the future design year noise levels at various distances from the edge of the nearest travel lane of the highway improvement where the future noise levels meet the highway agency's definition of "approach" for undeveloped lands or properties within the project limits. At a minimum, identify the distance to the exterior noise abatement criteria in Table 1;

(3) Non-eligibility for Federal-aid participation for a Type II project as described in § 772.15(b).

(b) If a highway agency chooses to participate in a Type II noise program or to use the date of development as one of the factors in determining the reasonableness of a Type I noise abatement measure, the highway agency shall have a statewide outreach program to inform local officials and the public of the items in § 772.17(a)(1) through (3).

§ 772.19 Construction noise.

For all Type I and II projects, a highway agency shall:

(a) Identify land uses or activities that may be affected by noise from construction of the project. The identification is to be performed during the project development studies.

(b) Determine the measures that are needed in the plans and specifications to minimize or eliminate adverse construction noise impacts to the community. This determination shall include a weighing of the benefits achieved and the overall adverse social, economic, and environmental effects and costs of the abatement measures.

(c) Incorporate the needed abatement measures in the plans and specifications.

TABLE 1 TO PART 772—NOISE ABATEMENT CRITERIA

[Hourly A–Weighted Sound Level_decibels (dB(A)) [1]]

Activity category	Activity Leq(h)	Criteria [2] L10(h)	Evaluation location	Activity description
A	57	60	Exterior	Lands on which serenity and quiet are of extraordinary significance and serve an important public need and where the preservation of those qualities is essential if the area is to continue to serve its intended purpose.
B [3]	67	70	Exterior	Residential.
C [3]	67	70	Exterior	Active sport areas, amphitheaters, auditoriums, campgrounds, cemeteries, day care centers, hospitals, libraries, medical facilities, parks, picnic areas, places of worship, playgrounds, public meeting rooms, public or nonprofit institutional structures, radio studios, recording studios, recreation areas, Section 4(f) sites, schools, television studios, trails, and trail crossings.
D	52	55	Interior	Auditoriums, day care centers, hospitals, libraries, medical facilities, places of worship, public meeting rooms, public or nonprofit institutional structures, radio studios, recording studios, schools, and television studios.
E [3]	72	75	Exterior	Hotels, motels, offices, restaurants/bars, and other developed lands, properties or activities not included in A–D or F.
F				Agriculture, airports, bus yards, emergency services, industrial, logging, maintenance facilities, manufacturing, mining, rail yards, retail facilities, shipyards, utilities (water resources, water treatment, electrical), and warehousing.
G				Undeveloped lands that are not permitted.

[1] Either Leq(h) or L10(h) (but not both) may be used on a project.
[2] The Leq(h) and L10(h) Activity Criteria values are for impact determination only, and are not design standards for noise abatement measures.
[3] Includes undeveloped lands permitted for this activity category.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2009–1056]

RIN 1625–AA11

Regulated Navigation Area; Hudson River and Port of NY/NJ

AGENCY: Coast Guard, DHS.

ACTION: Temporary interim rule with request for comments.

SUMMARY: The Coast Guard is establishing a regulated navigation area (RNA) from Port Coeymans, New York on the Hudson River to Jersey City, New Jersey on Upper New York Bay, and from Jersey City to the Willis Avenue Bridge site on the Harlem River, New York, including all waters of the East River between these two locations. This action is necessary to provide for the safety of life on the navigable waters during the load out and transit of the Willis Avenue Bridge replacement span.

DATES: This rule is effective from July 13, 2010 through October 31, 2010. The RNA will be enforced from 3 a.m. on Monday, July 12, 2000, to 11:30 p.m. on Saturday, August 7, 2010. Comments and related material must reach the Coast Guard on or before August 12, 2010. Requests for public meetings must be received by the Coast Guard on or before August 12, 2010.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket USCG–2009–1056 and are available online by going to *http://www.regulations.gov,* inserting USCG–2009–1056 in the "Keyword" box, and then clicking "Search." They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

You may submit comments identified by docket number USCG–2009–1056 using any one of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.*

(2) *Fax:* 202–493–2251.

(3) *Mail:* Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590–0001.

(4) *Hand delivery:* Same as mail address above, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

To avoid duplication, please use only one of these four methods. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this interim rule, call or e-mail Mr. Jeff Yunker, Waterways Management Division at Coast Guard Sector New York, telephone 718–354–4195, e-mail *Jeff.M.Yunker@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related materials. All comments received will be posted, without change, to *http://www.regulations.gov* and will include any personal information you have provided.

As this temporary interim rule will be in effect before the end of the comment period, the Coast Guard will evaluate and revise this rule as necessary to address significant public comments.

Submitting Comments

If you submit a comment, please include the docket number for this rulemaking (USCG–2009–1056), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online (via *http://www.regulations.gov*) or by fax, mail or hand delivery, but please use only one of these means. If you submit a comment online via *http://www.regulations.gov,* it will be considered received by the Coast Guard when you successfully transmit the comment. If you fax, hand deliver, or mail your comment, it will be considered as having been received by the Coast Guard when it is received at the Docket Management Facility. We recommend that you include your name and a mailing address, an e-mail address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov,* click on the "submit a comment" box, which will then become highlighted in blue. In the "Document Type" drop down menu select "Proposed Rule" and insert "USCG–2009–1056" in the "Keyword" box. Click "Search" then click on the balloon shape in the "Actions" column. If you submit comments by mail or hand delivery, submit them in an unbound format, no larger than 8½; by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period and may change this rule based on your comments.

Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* click on the "read comments" box, which will then become highlighted in blue. In the "Keyword" box insert "USCG–2010–0176" and click "Search." Click the "Open Docket Folder" in the "Actions" column. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. We have an agreement with the Department of Transportation to use the Docket Management Facility.

Privacy Act

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, *etc.*). You may review a Privacy Act notice regarding our public dockets in the January 17, 2008, issue of the **Federal Register** (73 FR 3316).

Public Meeting

We do not now plan to hold a public meeting. You may submit a request for one using one of the four methods specified under **ADDRESSES**. Please explain why you believe a public meeting would be beneficial. If we determine that one would aid revising this rule, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Regulatory Information

The Coast Guard is issuing this temporary interim rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule. This rule establishes an RNA to provide for the safety of life on the navigable waters during the load out and transit of the Willis Avenue Bridge replacement span. It is impracticable to issue an NPRM and take public comment before July 12, 2010, when the load out and transit is scheduled to begin. Due to delays on other construction projects in the Gulf of Mexico, the calendar dates for the load out and transit were not confirmed until early May 2010. This delayed the projected arrival of specialized self propelled transporters necessary to move the Willis Avenue Bridge replacement span from its construction site at Port Coeymans, New York onto the barges transporting the bridge span to its installation site on the Harlem River in New York City. This in turn delayed the dates for all of the subsequent restrictions. Delaying either the bridge load out and transit, or creation of the RNA, is contrary to the public interest because the bridge will be a public convenience and because the RNA will provide for public safety by safeguarding both mariners and construction workers during the bridge's construction and transportation of the replacement bridge span. We are requesting public comment on the RNA, and if we receive public input that indicates a need to revise the RNA or the conditions it imposes, or raises any other significant public concerns, we will address those concerns prior to issuing any final rule. For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

Basis and Purpose

Under the Ports and Waterways Safety Act, the Coast Guard has the authority to establish RNAs in defined water areas that are determined to have hazardous conditions and in which vessel traffic can be regulated in the interest of safety. *See* 33 U.S.C. 1231 and Department of Homeland Security Delegation No. 0170.1.

The New York City Department of Transportation is replacing the Willis Avenue Bridge over the Harlem River. The replacement bridge span for this project is being constructed at Port Coeymans, NY on the Hudson River, approximately 115 nautical miles north of The Battery, Manhattan, NY. The transfer of the bridge span from the Port Coeymans Terminal to two Weeks Marine barges and transit to the installation site on the Harlem River is scheduled for the week of July 12, 2010. The week of July 19, 2010 will be used as a contingency in case of delays. The installation of the bridge span on the Harlem River is scheduled for August 2, 2010.

The load out of the new Willis Avenue Bridge span involves large machinery and construction vessel operations above and upon the navigable waters between Port Coeymans on the Hudson River, Upper New York Bay, the East River, and the bridge installation site at mile 1.5 on the Harlem River. Heavy-lift operations are sensitive to water movement, and wake from passing vessels could pose significant risk of injury or death to construction workers. The ongoing operations are, by their nature, hazardous and pose risks both to recreational and commercial vessel traffic and the bridge construction crew. In order to mitigate the inherent risks involved in the construction, it is necessary to control vessel movement through the area. The Coast Guard negotiated the terms of necessary navigation restrictions with the Kiewit and Weeks Marine contractors, and with Hudson River and Sandy Hook Pilots.

Discussion of Rule

This temporary interim rule establishes an RNA on designated waters on the Hudson River and in the New York City area. It is intended to ensure the safety of the public and vessels during the transfer and transit of the 363 foot long bridge span from Port Coeymans, NY to the Harlem River, NY via Upper New York Bay and Buttermilk Channel. The enforcement times given in this discussion for the various restrictions depend on transit conditions and may be changed due to inclement weather or other circumstances. Changes will be provided to the public by the on scene patrol vessels, Coast Guard Vessel Traffic Service New York, and/or Safety Voice Broadcasts. Except for persons or vessels authorized by the Coast Guard Captain of the Port New York or the designated representative, no person or vessel may enter or remain in the RNA during the enforcement period.

No vessels will be authorized between Hudson River Light 191 LLNR 38865 and Hudson River Light 193 LLNR 38875 at Coeymans, NY from 3 a.m. on Monday, July 12, 2010 until 8 a.m. on Tuesday, July 13, 2010. In case of inclement weather or construction delays this restriction will be established from 7 a.m. on Monday, July 19, 2010 until 7 a.m. on Tuesday, July 20, 2010.

No vessels will be authorized within 100 yards of the two Weeks Marine barges once the bridge span has been loaded onto the barges at Port Coeymans. Vessels will be required to transit at No Wake speed when passing the two Weeks Marine barges.

A No Meeting and No Overtaking zone will be established as the barges and bridge span transit from Port Coeymans to just south of the entrance to Rondout Creek. This zone will be established on Tuesday, July 13, 2010 or Wednesday, July 14, 2010 for approximately 9 hours and 30 minutes based on the expected transit speed of 4 knots. In case of inclement weather or construction delays this restriction will be established from 5:30 a.m. to 3 p.m. on Tuesday, July 20, 2010.

A No Meeting and No Overtaking zone will be established as the barges and bridge span transit between the eastern and western sections of Anchorage Ground No. 19 on the Hudson River. This zone will be established for approximately 60 minutes on Tuesday, July 13, or Wednesday, July 14, 2010, based on the expected transit speed of 4 knots. In case of inclement weather or construction delays this restriction will be established from 7:45 a.m. to 8:45 a.m. on Wednesday, July 21, 2010.

A No Meeting and No Overtaking zone will be established as the barges and bridge span transit Buttermilk Channel from its entrance at Anchorage Channel until the barges pass the northwest corner of Pier 2, Brooklyn. This zone will be established on Wednesday, July 14, 2010 from approximately 11 a.m. to 11:45 a.m. based on the expected transit speed of 4 knots.

The East River will be closed to all other vessel traffic between the Con Ed East River Generating Station at East 14th Street, Manhattan, and the Hell Gate Railroad Bridge at river mile 8.2. This restriction will be established on Wednesday, July 14, 2010 from approximately 12:20 p.m. to 1:45 p.m. based on the expected transit speed of 4 knots.

The Harlem River will be closed to all other vessel traffic between the 125th Street/Triborough/RFK Bridge (mile 1.3) and 500 feet north of the Willis Ave Bridge (mile 1.5). This restriction will be established on Monday, August 2, 2010 from approximately 5 a.m. to 6 p.m. during the installation of the bridge span.

Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order.

We expect the economic impact of this rule will not be significant due to the limited duration that the regulated area would be in effect and enforced. Also, the Hudson River closure during the transfer of the bridge span from shore to the barges has been scheduled on a weekday when it is expected to have minimal impact on recreational vessels. The Harlem River closure will be coordinated with vessel operators that regularly schedule Manhattan Island tours.

In addition, advance notifications will be made to the maritime community via the Local Notice to Mariners, marine information broadcasts and online at *http://homeport.uscg.mil/newyork.*

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to transit or anchor in a portion of the Hudson, East and Harlem Rivers and Upper New York Bay south of 42°29′11.692″ N, 073°47′14.142″ W (Hudson River LIGHT 193 LLNR 38875) from 3 a.m. on July 12, 2010 to 11:30 p.m. on August 7, 2010.

This RNA will not have a significant economic impact on a substantial number of small entities for the following reasons: The RNA will only stop vessels from transiting three specified locations on the Hudson, Harlem, and East Rivers, the 24-hour closure of the Hudson River at Port Coeymans has been scheduled on a weekday to reduce the impact to recreational vessels that are more prevalent on weekends, the East River closure between the Con Ed East River Generating Station and the Hell Gate Railroad Bridge will only be in effect for approximately 85 minutes and vessels can adjust their schedules, the Harlem River closure at the bridge installation site will be coordinated with vessel operators that regularly schedule Manhattan Island tours; the No Meeting and No Overtaking zones are established in areas identified by Weeks Marine, Hudson River and Sandy Hook Pilots as requiring additional safety measures due to the waterway characteristics and characteristics of vessels using the waterways in those locations. Before the effective period, we will issue maritime advisories widely available to users of the waterway.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have Tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction. This rule involves the establishing of a RNA and therefore falls within the categorical exclusion noted above. An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under **ADDRESSES**. Any comments received concerning environmental impacts will be considered and changes made to the environmental analysis checklist and categorical exclusion determination as appropriate.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.t01–1056 to read as follows:

§ 165.t01–1056 Regulated Navigation Area; Hudson River and Port of New York and New Jersey.

(a) *Description of the regulated navigation area (RNA).* The regulated area includes all waters of the Hudson River south of 42°29′11.692″ N, 073°47′14.142″ W (Hudson River LIGHT 193 LLNR 38875), all waters of Upper New York Bay north of a line drawn from the northeast corner of the Global Container and Northeast Auto Terminal to the northwest corner of Pier 41, Red Hook Brooklyn, all waters of the East River from The Battery to the Hell Gate Railroad Bridge at river mile 8.2, and all waters of the Harlem River from the Harlem River Foot Bridge at river mile 0.0 to 500 feet north of the Willis Avenue Bridge at river mile 1.5.

(b) *Definitions:* (1) Designated representative means a commissioned, warrant, or petty officer of the U.S. Coast Guard who has been designated by the Captain of the Port New York (COTP).

(2) Weeks Marine barges means a barge operated by the Weeks Marine Company.

(c) *Regulations.* In addition to 33 CFR 165.10, 165.11, and 165.13, the following restrictions or conditions apply within this RNA:

(1) No person or vessel may enter, transit, or remain in the RNA on the Hudson River between 42°28′42.100″ N, 073°47′19.100″ W (Hudson River LIGHT 191 LLNR 38865) and 42°29′11.692″ N, 073°47′14.142″ W (Hudson River LIGHT 193 LLNR 38875); on the East River between 40°43′36.210″ N, 073°58′17.750″ W, at the Con Ed East River Generating Station at East 14th Street Manhattan and the Hell Gate Railroad Bridge at river mile 8.2; on the Harlem River between the 125th Street/Triborough/RFK Bridge (mile 1.3) and 500 feet north of the Willis Ave Bridge (mile 1.5).

(2) No commercial vessel may meet, or overtake, the Weeks Marine barges when they are transiting the following waters:

(i) The Hudson River from Port Coeymans, NY to 41°54′59.712″ N, 073°57′36.126″ W (Hudson River Lighted Buoy 73 LLNR 38183) 500 yards south of the entrance to Rondout Creek.
(ii) The Hudson River between the eastern and western sections of Anchorage Ground No. 19.

(iii) Buttermilk Channel from its entrance at Anchorage Channel, about 175 yards north of 40°40′18.971″ N, 074°02′24.006″ W (Gowanus Flats Lighted Bell Buoy 32 LLNR 34990) until the barges pass the northwest corner of Pier 2 Brooklyn.

(iv) The Harlem River from the 103rd Street Foot Bridge (mile 0.0) to the Willis Ave Bridge at mile 1.5.

(2) No vessels are authorized within 100 yards of the two Weeks Marine barges while carrying the bridge span.

(3) All vessels must transit at reduced speed to minimize wake and surge when transiting past the Weeks Marine barges carrying the bridge span.

(4) All persons and vessels shall comply with the instructions of the COTP or the designated representative. Upon being hailed by a U.S. Coast Guard or other law enforcement vessel by siren, radio, flashing light, or other means the operator of a vessel shall proceed as directed.

(5) Vessel operators desiring to enter or operate within the RNA shall request permission to do so by contacting the COTP at 203–354–4195, or VTS NY via VHF Channel 13 or 16.

(d) *Enforcement Period:* The RNA will be enforced from 3 a.m. on Monday, July 12, 2010, to 11:30 p.m. on Saturday, August 7, 2010.

Dated: June 4, 2010.

D.A. Neptun,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AN32

Stressor Determinations for Posttraumatic Stress Disorder

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) is amending its adjudication regulations governing service connection for posttraumatic stress disorder (PTSD) by liberalizing in some cases the evidentiary standard for establishing the required in-service stressor. This amendment eliminates the requirement for corroborating that the claimed in-service stressor occurred if a stressor claimed by a veteran is related to the veteran's fear of hostile military or terrorist activity and a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, confirms that the claimed stressor is adequate to support a diagnosis of PTSD and that the veteran's symptoms are related to the claimed stressor, provided that the claimed stressor is consistent with the places, types, and circumstances of the veteran's service.

This amendment takes into consideration the current scientific research studies relating PTSD to exposure to hostile military and terrorist actions. The amendment acknowledges the inherently stressful nature of the places, types, and circumstances of service in which fear of hostile military or terrorist activities is ongoing. With this amendment, the evidentiary standard of establishing an in-service stressor will be reduced in these cases. The amendment will facilitate the timely processing of PTSD claims by simplifying the development and research procedures that apply to these claims.

DATES: *Effective Date:* This final rule is effective July 12, 2010.

Applicability Date: This final rule applies to an application for service connection for PTSD that:

- Is received by VA on or after July 12, 2010;
- Was received by VA before July 12, 2010 but has not been decided by a VA regional office as of that date;
- Is appealed to the Board of Veterans' Appeals (Board) on or after July 12, 2010;
- Was appealed to the Board before July 12, 2010 but has not been decided by the Board as of that date; or
- Is pending before VA on or after July 12, 2010 because the Court of Appeals for Veterans Claims (Veterans Court) vacated a Board decision on the application and remanded it for readjudication.

FOR FURTHER INFORMATION CONTACT: Thomas J. Kniffen, Chief, Regulations Staff (211D), Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 461–9725. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On August 24, 2009, VA published in the **Federal Register** (74 FR 42617) a proposal to modify the evidentiary standards for establishing an in-service stressor when a veteran files a claim for service connection for PTSD. We proposed to add a new paragraph (3) to 38 CFR 3.304(f) to state that, if a stressor claimed by a veteran is related to the veteran's fear of hostile military or terrorist activity and a VA psychiatrist or psychologist or contract equivalent confirms that the claimed stressor is adequate to support a diagnosis of PTSD and that the veteran's symptoms are related to the claimed stressor, in the absence of clear and convincing evidence to the contrary, and provided the claimed stressor is consistent with the places, types, and circumstances of the veteran's service, the veteran's lay testimony alone may establish the occurrence of the claimed in-service stressor. This evidentiary liberalization is consistent with the American Psychiatric Association's (APA) Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (1994) (DSM–IV) criteria for a PTSD diagnosis, as explained in the notice of proposed rulemaking. The rule further re-designates former paragraph (f)(3) as (f)(4), governing PTSD claims from former prisoners of war, and re-designates paragraph (f)(4) as (f)(5), governing PTSD claims based on in-service personal assault or military sexual trauma (MST).

Interested persons were invited to submit written comments on or before October 23, 2009. We received 126 comments on the proposed rule. VA received comments from veterans service organizations, including The American Legion, National Organization of Veterans' Advocates, Disabled American Veterans, Veterans for Common Sense, Paralyzed Veterans of America, and The Wounded Warrior Project; from public interest groups, including the Los Angeles Inner City Law Center and National Research Center for Women and Families; from government agencies, such as the New York City Department of Health and Mental Hygiene and the State of New York Division of Veterans Affairs; and from individuals. VA also received comments from members of the Subcommittee on Disability Assistance and Memorial Affairs of the House of Representatives Committee on Veterans' Affairs and other persons who participated in a roundtable discussion of the proposed rule, as well as from members of Congress.

We also received numerous comments from veterans and surviving spouses regarding their individual claims for veterans benefits. We do not respond to these comments in this notice as they are beyond the scope of this rulemaking.

Presumption of Service Connection Based on Receipt of Certain Pay

Some commenters suggested that VA revise the rule to create a presumption of service connection for PTSD based upon receipt of imminent-danger or hostile-fire pay. We make no change based on these comments because they are beyond the scope of the rule, which is limited to providing a reduced evidentiary standard for establishing occurrence of the stressor based upon a particular type of stressor.

Fear of Hostile Military or Terrorist Activity

Some commenters suggested that the rule should be revised to reduce the evidentiary standard for veterans who had certain Military Occupational Specialties (MOS). A MOS may be considered as evidence of exposure to a stressor, including hostile military or terrorist activity. *See* Veterans Benefits Administration (VBA) Adjudication Procedures Manual Rewrite M21–1MR (Manual M21–1MR), Part IV, subpart ii, ch. 1, sec. D, para. 13.k. However, a particular MOS does not necessarily establish such an exposure. *See Dizoglio* v. *Brown,* 9 Vet. App. 163, 166 (1996). Therefore, we make no changes based on these comments.

Some commenters interpreted the proposed rule as limited to fear of hostile or terrorist activity while serving in a combat zone, and others suggested that the rule should be revised to provide a reduced evidentiary standard on the basis of service in a combat zone. One commenter asked whether the rule applies to veterans who served on a submarine. The rule has no geographic requirement and is not limited to service in a combat zone or on land. Rather, it applies to all persons who served in active military, naval, or air service, as defined in 38 U.S.C. 101(24), and were discharged or released from

such service under conditions other than dishonorable.

One commenter stated the term "stressor" is ambiguous and may lead one to believe that the rule applies only if a veteran can identify a single specific event instead of hostile military or terrorist activity generally. One commenter suggested that the rule should apply as well to a series of events or the totality of circumstances of deployment to a combat zone. Another commenter questioned the meaning of the phrase "consistent with the . . . circumstances of service" and doubted whether an examiner would ever find that a traumatic event experienced by a veteran who had an MOS of cook is consistent with the circumstances of the veteran's service. Another commenter inquired about whether the examiner would be responsible for determining whether the stressor is consistent with the veteran's service.

VA believes that the language in the proposed rule is not ambiguous. As stated in the rule, " 'fear of hostile military or terrorist activity' means that a veteran experienced, witnessed, or was confronted with an event *or circumstance*." (Emphasis added). The term "circumstance" means "a condition, fact, or event accompanying, conditioning, or determining another: an essential or inevitable concomitant." *Webster's Ninth New Collegiate Dictionary,* 242 (1990). Therefore, the rule provides that a veteran's "fear" need not emanate from a single event or be consistent with the veteran's MOS but rather the fear may result from conditions to which the veteran was exposed during service. The requirement that a claimed stressor be consistent with the places, types, and circumstances of the veteran's service originates in the statute that authorizes this regulation, 38 U.S.C. 1154(a), which requires VA to duly consider the places, types and circumstances of the veteran's service. In addition, consistent with section 1154(a), VA regulations provide that consistency with the places, types, and circumstances of service is shown by the veteran's service records, the official history of each organization in which the veteran served, medical records, and all pertinent medical and lay evidence. 38 CFR 3.303(a). Finally, VA adjudicators, not examining psychiatrists and psychologists, will decide whether the claimed stressor is consistent with the veteran's service.

One commenter stated that the term "confronted with an event or events that involved actual or threatened death or serious injury, or a threat to the physical integrity of self or others" implies that a veteran must experience an event that is close and highly lethal. As stated above, there is no geographic requirement for the regulation. However, the stressor must be consistent with the places, types, and circumstances of the veteran's service. 38 U.S.C. 1154. In addition, an event does not have to be lethal. As provided in the rule, the traumatic event can involve actual or threatened serious injury, as well as death, or a threat to the physical integrity of the veteran or others.

One commenter stated that the list of examples in the definition of "fear of hostile military or terrorist activity" is incomplete and would "likely result in [VA] rejecting as adequate stressors such events as injuring or killing of civilians." Another commenter suggested adding language to clarify that an event or circumstance does not have to include one of the situations listed in the definition, *e.g.,* "an actual or potential improvised explosive device; * * * incoming artillery, rocket, or mortar fire; grenade." A list of examples cannot reasonably include every conceivable event or circumstance that would qualify as hostile military or terrorist activity under the rule. Nevertheless, we disagree that this "incompleteness" would likely result in VA rejecting events such as the injuring or killing of civilians. The definition of "fear of hostile military or terrorist activity" is not limited to any particular class of individuals. Involvement of "actual or threatened death or serious injury, or a threat to the physical integrity of the veteran *or others,*" which is not limited to military personnel, is all that is required to qualify as "an event or circumstance" within the meaning of the rule. Therefore, if a veteran experienced, witnessed, or was confronted with an event involving actual or threatened death, serious injury, or a threat to the physical integrity of civilians, the event would qualify as a stressor. Also, by using the modifying phrase "such as," VA intends to present a list of examples to illustrate what qualifies as an event or circumstance, not a defining restriction. *See Donovan* v. *Anheuser-Busch, Inc.,* 666 F.2d 315, 327 (8th Cir. 1981).

A commenter suggested that the definition of "fear of hostile military or terrorist activity" be extended to include domestic as well as foreign activity. The regulation is not limited to events or circumstances perpetrated by a foreign enemy. Therefore, VA makes no change based on the comment.

Some commenters said that VA should define when a stressor would be considered consistent with the places, types, and circumstances of the veteran's service. One commenter asked whether a veteran's claimed fear of hostile military activity during service in South Korea after the Korean Conflict ended or in the continental United States after September 11, 2001, would be consistent with the places, types, and circumstances of such service. Another commenter suggested that the rule should explain the types of evidence needed to establish consistency with the places, types, and circumstances of service.

The question of consistency is a matter involving application of 38 U.S.C. 1154(a) and 38 CFR 3.303(a) to the myriad of facts presented by individual claims. We note, however, that inclusion of the conjunction "and" in the statute and regulation means that a stressor must be consistent with all three of the enumerated criteria. *Watson* v. *Dep't of the Navy,* 262 F.3d 1292, 1299 (Fed. Cir. 2001). Finally, the statute and regulation indicate that VA is to consider the places, types, and circumstances of service as shown by service records, the official history of each organization in which the veteran served, the veteran's medical records, and all pertinent medical and lay evidence. Some commenters suggested that the rule be broadened to provide a reduced evidentiary standard based solely on deployment to a war zone or fear of such deployment, rather than on fear of hostile military or terrorist activity. One commenter suggested that such a rule is supported by the Institute of Medicine (IOM), *Gulf War & Health, Vol. 6: Physiologic, Psychologic, and Psychosocial Effects of Deployment-Related Stress,* 319 (2008) (IOM Report), which states:

> The epidemiologic literature on deployed vs[.] nondeployed veterans yielded sufficient evidence of an association between deployment to a war zone and psychiatric disorders, including [PTSD], other anxiety disorders, and depression; alcohol abuse; accidental death and suicide in the first few years after return from deployment; and marital and family conflict, including interpersonal violence.

We do not adopt this suggestion because many of the hardships related to deployment, such as uncertainty about the length of a tour of duty and lack of companionship or family contact, do not satisfy the DSM–IV requirements for a PTSD diagnosis, *i.e.,* experiencing, witnessing, or confronting an event involving actual or threatened death or serious injury or threat to the physical integrity of self or others. IOM Report at 35–38; DSM–IV at 427. We have instead focused the rule on factors associated with deployment that comport with the DSM–IV definition of PTSD.

Some commenters inquired whether the rule would cover a service member who experienced fear of hostile military or terrorist activity after learning about the experiences of others with such activity but before being deployed to a war zone. It is not our intention that the new evidentiary standard apply in such a situation, and we do not interpret the rule to cover that situation. Such a claim would be adjudicated under the generally applicable standard set forth in the introductory text of 38 CFR 3.304(f). The IOM Committee "defin[ed] deployment-related stress as deployment to a war zone" and "considered that military personnel deployed to a war zone, even if direct combat was not experienced, have the potential for exposure to deployment-related stressors that might elicit a stress response." IOM Report at 13. Consistent with these findings, the rule is intended to apply only when the veteran's service is proximate in time and place to the traumatic event to which the veteran has responded with intense fear, helplessness, or horror. This is consistent with current provisions of 38 CFR 3.304(f) that do not require corroborating evidence of occurrence of a stressor if a veteran was diagnosed with PTSD in service, engaged in combat with the enemy, or was a prisoner of war, *i.e.,* circumstances of service in which it is undisputed that the veteran was personally exposed to a stress-inducing event, making it unnecessary to obtain supporting documentation. *See* Proposed Rule, 57 FR 34536 (Aug. 5, 1992) (not requiring corroborating evidence that a stressor occurred if evidence establishes that the veteran engaged in combat or is a former prisoner of war). A non-deployed veteran who learns that others were subject to a hostile military or terrorist activity in a war zone cannot be said to have "experienced, witnessed, or [been] confronted with an event or circumstance" within the contemplation of the new regulation. In such cases, the claimed stressor (the hostile military or terrorist activity) would not be consistent with the places, types, and circumstances of the veteran's service when the activity occurred or the veteran learned that others were subjected to such activity.

Coverage of Other Stressors

VA also received comments suggesting that the rule should cover stressors such as MST, abuse by military personnel of subordinate military personnel, harassment, suicide of a fellow service member, witnessing a military vehicle accident in the United States, a fellow soldier's or sailor's post-service suicide, and social, political, and economic discrimination. One commenter suggested that VA should promulgate a similar rule to assist those with physical injuries due to hostile military or terrorist activity. These comments are outside the scope of this rule. Therefore, we make no change based on them. However, regarding MST, we note as well that 38 CFR 3.304(f)(5) (before this rulemaking codified at 38 CFR 3.304(f)(4)) permits evidence other than a veteran's service records to corroborate the occurrence of an in-service personal assault and prohibits VA from denying a claim for service connection for PTSD based on in-service personal assault without first advising the claimant that evidence from sources other than a veteran's service records may prove the stressor occurred.

Post-Combat Stress Disorder

A number of commenters suggested that use of the term PTSD is socially stigmatizing, is embarrassing to combat veterans, and may cause veterans to forego needed professional treatment. One commenter suggested that VA re-categorize PTSD rated as 70 percent or more disabling as post-combat stress disorder to diminish the stigma associated with a diagnosis of PTSD, encourage veterans to seek treatment, and prevent possible suicide. As explained in 38 CFR 4.130, the nomenclature in the VA schedule of ratings for mental disorders is based upon the DSM–IV, and 38 CFR 4.125 requires that a diagnosis of a mental disorder conform to the DSM–IV in order to substantiate a claim. Because the DSM–IV does not include post-combat stress disorder as a diagnosis, we make no change based on these comments.

Opposition to Liberalizing Evidentiary Standard

VA received written comments objecting to the liberalizing evidentiary standard for PTSD claims based on fear of hostile military or terrorist activity. Several commenters alleged that the rule implies that all a veteran must do to be granted service connection is communicate that he or she experienced "fear" to corroborate a stressor, will invite frivolous or fraudulent claims against the Federal Government, is offensive to heroic combat veterans of current and past wartime periods, and will delay adjudication of their claims. One commenter suggested that VA should re-evaluate veterans diagnosed with PTSD.

The reduced evidentiary standard provided by the rule is not applicable solely because a veteran reports that he or she experienced fear. Under the rule, VA will not rely on a veteran's lay testimony alone to establish occurrence of the stressor unless the following requirements are satisfied. First, the veteran must have experienced, witnessed, or have been confronted by an event or circumstance that involved actual or threatened death or serious injury, or a threat to the physical integrity of the veteran or others, and the veteran's response to the event or circumstance must have involved a psychological or psycho-physiological state of fear, helplessness, or horror. Second, a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, must confirm that the claimed stressor is adequate to support a diagnosis of PTSD and that the veteran's symptoms are related to the claimed stressor. Third, there must be in the record no clear and convincing evidence to the contrary, and fourth, the claimed stressor must be consistent with the places, types, and circumstances of the veteran's service. Because all of these requirements must be met for the veteran's lay testimony alone to establish the occurrence of the claimed stressor, we believe the likelihood of fraud to be minimal. Finally, 38 CFR 3.327(a) requires a reexamination whenever VA determines there is a need to verify either the continued existence or the current severity of a disability.

This rule is not intended to discount the heroic efforts of combat veterans, but rather is VA's response to scientific studies related to PTSD and military troop deployment. As noted in the proposed rule:

> Combat is one of the most potent stressors that a person can experience, but as military conflicts have evolved to include more guerilla warfare and insurgent activities, restricting the definition of deployment-related stressors to combat may fail to acknowledge other potent stressors experienced by military personnel in a war zone or in the aftermath of combat. Those stressors include constant vigilance against unexpected attack, the absence of a defined front line, the difficulty of distinguishing enemy combatants from civilians, the ubiquity of improvised explosive devices, caring for the badly injured or dying, duty on the graves registration service, and being responsible for the treatment of prisoners of war.

Proposed Rule, 74 FR at 42618 (quoting IOM Report at 2). Finally, we believe that this rule will improve the timeliness of the adjudication of claims of all veterans by eliminating the need to search for corroborating evidence in certain cases. For these reasons, we

make no change based on these comments.

DSM–IV Definition of PTSD

Some commenters stated that the proposed rule is inconsistent with DSM–IV, which does not require "a psychological or psycho-physiological state of fear, helplessness, or horror" to a traumatic event. Another commenter stated that VA is prohibited from using terms in the regulation that do not appear in DSM–IV.

The commenters are incorrect. In order to satisfy the DSM–IV diagnostic criteria for PTSD, a person's response to a traumatic event must involve "intense fear, helplessness, or horror." DSM–IV at 428. In addition, the traumatic event must be persistently reexperienced in one or more of several ways, including "intense psychological distress at exposure to internal or external cues that symbolize or resemble an aspect of the traumatic event" and "physiologic reactivity on exposure to internal or external cues that symbolize or resemble an aspect of the traumatic event," all of which involve intense psychological stress or psycho-physiological response. *Id.* In any event, nothing prohibits VA from using in this regulation a term that does not appear in the DSM–IV. As indicated above, the nomenclature employed by VA in the schedule for rating mental disorders "is based upon the [DSM–IV]." 38 CFR 4.130. This rule, however, does not concern the evaluation of mental disorders. It liberalizes the evidentiary standard for corroboration of a stressor in certain cases. Using a term that does not appear in the DSM–IV is well within VA's authority to prescribe exactly which cases may benefit from the liberalized evidentiary standard.

A commenter expressed concern that the rule is limited to "fear of hostile or terrorist activity" and asked whether a veteran would be entitled to the reduced evidentiary standard if the veteran manifested flashbacks and nightmares long after service. Both this rule and flashbacks and nightmares are related to the diagnostic criteria for PTSD, but they relate to distinct criteria. The rule relates to the criterion of a person's exposure to a traumatic event and the person's response to that event. *See* DSM–IV at 427–428. Flashbacks and nightmares relate to the criterion of the person's re-experiencing of the traumatic event. DSM–IV at 428.

Another commenter asserted that the requirement in the rule that the stressor must be consistent with the places, types, and circumstances of a veteran's service renders the rule narrower than the DSM–IV definition of PTSD and that the requirement that the stressor relate to a veteran's fear of hostile military or terrorist activity narrows the DSM–IV definition of PTSD.

As indicated above, in replying to a comment about the meaning of the phrase "consistent with the * * * circumstances of service," under 38 U.S.C. 1154(a), VA must duly consider the places, types, and circumstances of a veteran's service as shown by the veteran's service record, the official history of each organization in which such veteran served, the veteran's medical records, and all pertinent medical and lay evidence. Such consideration is a general requirement that applies to any service connection claim, not just claims for service connection of PTSD. Because section 1154 is the authority for this rule, we incorporate the statutory requirement into the rule.

Because the requirement that a claimed stressor relate to a veteran's fear of hostile military or terrorist activity has no effect on the diagnostic criteria for PTSD, the requirement does not narrow the DSM–IV definition of PTSD. The effect of the rule is to relax the evidentiary standard for establishing the occurrence of an in-service stressor for certain veterans, and the rule is limited to cases in which the claimed stressor is related to the veteran's fear of hostile military or terrorist activity for the reasons given in the notice of proposed rulemaking. Proposed Rule, 74 FR at 42618 (explaining that the rule is consistent with scientific studies related to PTSD and military troop deployment). The rule focuses on the procedure for establishing service connection for PTSD, not the criteria for establishing a legitimate diagnosis. Therefore, there is no inconsistency with the medical community at large, and we make no change based on the comment. In addition, the rule defines "fear of hostile military or terrorist activity" as "involv[ing] a psychological or psycho-physiological state of fear, helplessness, or horror."

One commenter stated that fear of hostile military or terrorist activity may not be sufficient to give rise to a diagnosis of PTSD in accordance with DSM–IV absent occurrence of an actual event. We agree that the occurrence of an actual event or circumstance is necessary. In fact, as the commenter noted, the first DSM–IV diagnostic criterion for PTSD is exposure to a traumatic event. DSM–IV at 427. The rule does not permit diagnosis of PTSD in the absence of exposure to a traumatic event or circumstance. The rule lists several examples of events or circumstances that could give rise to the requisite fear. The rule eliminates the need for corroborating evidence of the event if the requirements of the rule are met.

Another commenter asserted that the Global Assessment of Functioning (GAF) score has limited use and should be replaced. Axis V of the DSM–IV multiaxial diagnosis system measures the overall severity of psychiatric disturbance based on the GAF Scale, which rates an individual's social, occupational, and psychological functioning. VA regulations do not require a GAF score for purposes of determining whether PTSD is service connected, although the score may be required or requested by the Veterans Court, the Board, or a rating specialist for purposes of assessing the extent of disability after service connection has been established. This comment is therefore beyond the scope of this rulemaking.

Psychiatrist or Psychologist Employed by VA or With Whom VA Has Contracted

The majority of comments that VA received expressed disagreement with the requirement that the evidentiary standard for establishing occurrence of the stressor will be liberalized only if "a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, confirms that the claimed stressor is adequate to support a diagnosis of [PTSD] and that the veteran's symptoms are related to the claimed stressor." We have grouped these comments together by subject matter and address them below.

Consistency With 38 U.S.C. 5125

Some commenters asserted that the rule is contrary to 38 U.S.C. 5125, which one commenter contended means that VA must accept the opinion of a private physician if the opinion is adequate for rating purposes. In support of this contention, the commenter relied upon the heading of section 5125, "Acceptance of reports of private physician examinations."

Section 5125 provides that, "[f]or purposes of establishing any claim for benefits under chapter 11 or 15 of [title 38], a report of a medical examination administered by a private physician that is provided by a claimant in support of a claim for benefits * * * *may* be accepted without a requirement for confirmation by an examination by a physician employed by the Veterans Health Administration [(VHA)] if the report is sufficiently complete to be adequate for the purpose of adjudicating such claim." (Emphasis added). Generally, use of the word "may"

suggests that a provision is permissive, not mandatory. *Jama* v. *Immigration & Customs Enforcement,* 543 U.S. 335, 346 (2005). *See* 60 FR 27409 (May 24, 1995) (final rule amending 38 CFR 3.326 to reflect section 5125's authorization of private physician's examination reports if adequate for rating purposes). The meaning of section 5125 is plain, and therefore, the heading of the section cannot be used to limit its meaning. *Bhd. of R.R. Trainmen* v. *Baltimore & O.R. Co.,* 331 U.S. 519, 528–29 (1947). Thus, VA is not required to accept the report of a private physician as sufficient for rating a claim in all circumstances.

Alternative Qualifications for Psychiatrists and Psychologists

Commenters wrote that VA should accept the opinion of any psychiatrist or psychologist who evaluates the claimed condition based on the DSM–IV protocol or VA's protocol for PTSD examinations or who is certified by the APA. Several commenters asserted that private physicians provide more comprehensive and/or better examinations. Other commenters alleged that VA examiners refuse to diagnose PTSD and that their examinations are inconsistent and do not comply with DSM–IV. Also, one commenter contended that no confirmatory evidence from a VA psychiatrist or psychologist should be required because these examiners are often biased against claimants and likely to diagnose a mental disorder other than PTSD.

We decline to expand the rule to include the opinion of any psychiatrist or psychologist whose diagnosis conforms to DSM–IV or VA's protocol or who is certified by the APA because we believe that VA or contract examiners are uniquely qualified for the following reasons.

VA Examiners Are Trained To Provide Forensic Opinions Necessary To Decide PTSD Claims

By making 38 U.S.C. 5125 discretionary rather than mandatory, Congress clearly recognized that there may be circumstances in which VA would require a confirmatory medical opinion. The situation described in this rule is such a circumstance because it eliminates the requirement of credible supporting evidence of the occurrence of an alleged non-combat stressor under 38 CFR 3.304(f) in the situation described. Because the rule permits the proof of an in-service stressor based on the claimant's lay statement alone, VA believes that it is reasonable to limit this liberalization to medical opinions from practitioners who it knows are well-skilled and well-equipped to provide such forensic evidence, rather than broaden the rule to include opinions from private physicians.

VA's need for such forensic evidence is particularly important in the case of a claim for service connection for a mental disorder.

> When the DSM–IV categories, criteria, and textual descriptions are employed for forensic purposes, there are significant risks that diagnostic information will be misused or misunderstood. These dangers arise because of the imperfect fit between the questions of ultimate concern to the law and the information contained in a clinical diagnosis. * * *
>
> Nonclinical decision makers should also be cautioned that a diagnosis does not carry any necessary implications regarding the causes of the individual's mental disorder or its associated impairments.

DSM–IV at xxiii; *see* VHA Directive 2008–005 (Jan. 29, 2008). Consistent with the DSM–IV, VA has limited the mental health professionals who are qualified to perform initial Compensation and Pension (C&P) examinations for mental disorders to highly trained professionals. *See* VBA Fast Letter 06–03 (Mar. 15, 2006).

A C&P examination for PTSD is particularly complex because an examiner must: (1) Make complex judgments about potential malingering in the context of an administrative evaluation that will have obvious financial implications for a veteran;

(2) Comprehensively diagnose all comorbid mental disorders and apportion disability to various disorders in veterans who increasingly have co-occurring mental disorders; and

(3) Render an informed opinion about the effects of PTSD on social and occupational functioning, requiring a careful and often time-consuming review of a veteran's history. *Department of Veterans Affairs, Best Practice Manual for Posttraumatic Stress Disorder (PTSD) Compensation and Pension Examinations* (*Best Practice Manual*) 21–22, *http://www.avapl.org/pub/PTSD%20Manual%20final%206.pdf.*

VA Examiners Are Well-Trained in How To Perform PTSD Examinations

VA provides extensive guidance to VHA examiners about how to perform C&P examinations and gives specific guidance about PTSD examinations. *Id.* at 13–22; *C&P Service Clinician's Guide* (*Clinician's Guide*), ch. 14 (Mar. 2002), *http://www.warms.vba.va.gov/21guides.html.*

VA Certifies VA Examiners and Reviews the Quality of Examinations by VA and Contract Examiners

In addition, all PTSD C&P evaluations are performed by qualified examiners who utilize evidence-based instruments, as recommended in the Fiscal Year 2007 report of the VA Special Committee on PTSD. The Under Secretary for Health's Post-Traumatic Stress Disorder Special Committee: FY 2006 Annual Report, 9 (Jun. 5, 2007). In response to the Special Committee's recommendation, the Compensation and Pension Exam Program (CPEP), in conjunction with the Employee Education System and VHA/DoD Program Coordination Office, established a program requiring training and certification of all VHA clinicians who conduct C&P examinations, including Fee-for-Service Providers, which program includes special modules and tests for initial examinations for PTSD. VHA Directive 2008–005. In a May 2009 report to Congress, the Special Committee advised that the recommendation had been "met."

The CPEP office also reviews the quality of examinations of claimants conducted by VHA clinicians, including PTSD examinations, and when CPEP identifies problems in the quality of examinations, steps are taken to improve the quality via CPEP-sponsored conferences and training.

VBA provides contract examiners with information regarding the requirements of C&P examinations, and the quality of examinations provided by VA contractors is reviewed quarterly by a physician and nurse employed by VBA.

VA and Contract Examiners Are Often Better Informed About the Veteran.

In addition, VA psychiatrists and psychologists and contract examiners are often better informed about a veteran being examined than private practitioners are. When VBA requests a mental-disorder examination, including an examination for PTSD, it sends the claims folder to the examiner for the examiner's review. Manual M21–1 MR, Part III, subpart iv, ch. 3, sec. A, para. 1.e. The C&P examination worksheet for an initial evaluation for PTSD requires review of the veteran's claims file. The worksheet states, "A diagnosis of PTSD cannot be adequately documented or ruled out without obtaining a detailed military history and reviewing the claims folder." *Clinician's Guide* at 207. A private psychiatrist or psychologist would not have access to such documentation before opining about whether a claimed stressor is adequate

to support a PTSD diagnosis and whether the veteran's symptoms are related to the claimed stressor.

VA Examiners Perform More Examinations, Thereby Ensuring Consistency in Evaluations.

Finally, VA believes that the requirement in the rule for a confirmatory opinion from a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, will "ensure standardization and consistency of mental health evaluations and reporting of these evaluations." Proposed Rule, 74 FR at 42618. VHA performs over 700,000 C&P examinations annually, VHA Directive 2008–005, at 1, and contract physicians provide approximately 120,000 C&P examinations annually. As explained above, CPEP reviews VHA examination reports, and VBA reviews the reports of contract examiners. The review of these reports helps to guarantee the quality and consistency of PTSD examinations. However, VA has no control over the quality of examinations performed by private healthcare providers. Because VA is willing to liberalize the evidentiary standard for proving a stressor only in cases on which it can depend on the quality of the medical opinion, we decline to accept the opinion of any psychiatrist or psychologist as suggested.

With regard to the assertion that private physicians provide more comprehensive and/or better examinations, we believe that the protocol for initial VA examinations for PTSD, to which all VA and contract examiners must adhere, ensures comprehensive examinations addressing all aspects of a veteran's medical, social, and psychological history and the veteran's current mental status. *Clinician's Guide* at 206–12. We therefore make no change based on this comment.

We are unaware of VA examiners who refuse to diagnose PTSD, are biased against claimants, or are likely to diagnose a mental disorder other than PTSD, as other commenters alleged. In fact, a VBA review revealed that, when C&P examinations were conducted, PTSD was diagnosed in 77% of initial claims. *Best Practice Manual* at 1, 5, 57. We believe that the CPEP and VBA reviews of VA and contract examinations ensure consistency in examinations, and if CPEP assessments identify problems, steps are taken to improve quality and consistency, such as CPEP-sponsored training or recommendations to revise examination templates and/or worksheets. Also, if a VA examination does not comply with DSM–IV, as the commenter alleges, the examination is returned to the examiner for substantiation, as required by 38 CFR 4.125(a). We therefore make no changes to the regulation based on these comments.

VA Social Workers, Counselors, and Former Clinicians

Some commenters urged VA to accept confirmatory opinions from VA social workers, counselors, therapists, and former psychiatrists and psychologists. One commenter contended that consistency in examinations by such providers is guaranteed by VHA Handbook 1160.01, Uniform Mental Health Services in VA Medical Centers and Clinics, *http://www1.va.gov/emshg/docs/VHA_CEMP_Uniform_Mental_Health_Services_Hndb_1160_01_61108.pdf,* and VA Handbook 5005/23, Part II, Appendix G39, providing the requirements for appointment as a VHA social worker. As explained above, a C&P examination is forensic evidence for purposes of determining whether a veteran is entitled to disability compensation for PTSD and, if so, how much. This rule requires the medical opinion of a VA psychiatrist or psychologist, or a contract psychiatrist or psychologist, because VA can rely on the consistency and quality of examinations conducted by such individuals. These handbooks, on the other hand, pertain to care of VA patients, not C&P examinations, and to the appointment of personnel. They do not ensure the degree of training, information, and experience necessary to ensure quality and consistency in examinations.

With regard to former VA psychiatrists and psychologists, some former clinicians may not have been CPEP-certified depending upon when they were employed by VA. In addition, their examinations would not be subject to ongoing CPEP review, nor would they have access to a veteran's claims file to conduct the review required by the PTSD examination protocol. Therefore, VA would be unable to ensure standardization, consistency, and quality of their examinations. For that reason, we decline to permit their medical opinions to qualify for the evidentiary liberalization provided by this rule.

Potential Conflict for VA Examiners

Two commenters stated that the rule might present a conflict for a VA examiner who is required to act in the best interests of his or her patient. VBA Fast Letter 06–03 acknowledges that, "[t]o maintain the integrity of the patient-provider relationship, it is preferable that a veteran's treating health care provider not perform the C&P examination," and advises that, when an adjudicator requests a mental-disorder examination or opinion, the adjudicator "specify that the veteran's treating health care provider should not perform the examination if possible." This should avert any conflict.

Training and Availability of VA Psychiatrists and Psychologists

A commenter expressed concern about the training and education of psychiatrists or psychologists employed by VA or with whom VA has contracted and stated that it may be necessary for these examiners to receive training in military history. Another commenter said that the rule would require veterans to visit doctors who may be unfamiliar with their medical and treatment histories and could unnecessarily cause veterans to relive past stressors in order to establish service connection for a disability for which they have already been diagnosed. The commenter also said that the rule would impose on veterans who live in rural states an unreasonable burden to travel long distances to obtain the requisite examination by a VA psychiatrist or psychologist or an examiner with whom VA has contracted.

VA examiners are well-trained in how to interact with veterans during a C&P examination. As explained above, the PTSD examination protocol requires examiners to review the veteran's claims file so that the examiner will be familiar with the veteran's medical and military history. See *Best Practice Manual* at 22. In addition, it is estimated that examiners should spend 20 minutes orienting the veteran to the interview, reviewing the veteran's military history, and conducting a trauma assessment. *Id.* The *Best Practice Manual* states at page 14 that

> it is important to explain to the claimant that it is necessary to obtain a detailed description of one or more traumatic events related to military service, in order to complete the examination. Further, it is helpful to alert him or her to the fact that trauma assessment, though brief (about 15–20 minutes), may cause some distress. The veteran should be advised that trauma assessment is a mutual and collaborative process, and that he or she is not required to provide unnecessarily detailed answers to all questions, if it is too distressing to do so.

Assessment of a personally relevant trauma proceeds only "after sufficient rapport has developed and some cursory details regarding the context of the trauma situation(s) have been gathered." *Id.*

VA recognizes that an accurate diagnosis of PTSD requires extended discussion of experiences that may have been extremely traumatic and that repression, denial, and general haziness of memories are often hurdles in obtaining an adequate military history. *Clinician's Guide* at 196–97. Examiners are therefore advised that "it is crucial that the examiner place emphasis on avoiding an authoritarian role, avoiding judgmental interventions, and establishing rapport through an initial focus on current life experiences or other discussion which encourages comfort in the interview." *Id.* at 197. Based upon the training provided to these examiners, which we have explained above, we believe that they are well-prepared to examine veterans while minimizing the risk of causing veterans undue distress through reliving of their traumatic experiences.

As for the availability of examiners to provide the opinions required by the rule, VA intends to carefully monitor the need for examiners in various regions of the country and to make examiners available in response to demand. In fact, one reason for using contract examiners is to provide qualified examiners in places far from the closest VA medical facility.

Private Practitioners Other Than Psychiatrists and Psychologists

Some commenters suggested that VA expand the rule to include the opinion of a private licensed therapist, counselor, or social worker who has treated the claimant. To ensure that examiners are competent to provide findings and opinions that are valid and necessary for rating purposes, VBA determined that individuals who conduct C&P mental disorder examinations must have specific qualifications. VBA Fast Letter 06–03. Only mental health professionals with the following credentials are qualified to perform initial C&P mental disorder examinations: (1) Board-certified psychiatrists or board-"eligible" psychiatrists; (2) licensed doctorate-level psychologists; (3) doctorate-level mental health providers under the close supervision of a board-certified or board-eligible psychiatrist or licensed doctorate-level psychologist; (4) psychiatry residents under the close supervision of a board-certified or board-eligible psychiatrist or licensed doctorate-level psychologist; and (5) clinical or counseling psychologists completing a one-year internship or residency (for purposes of a doctorate-level degree) under the close supervision of a board-certified or board-eligible psychiatrist or licensed doctorate-level psychologist. Because VA has no guarantee that a private licensed therapist, counselor, or social worker who has treated a veteran has the qualifications required for a C&P mental disorder examination, we decline to adopt the commenters' suggestion.

Consideration of Veteran's Evidence

Some commenters asserted that the requirement for a confirmatory opinion from a VA practitioner or contract examiner discriminates against veterans with PTSD or veterans whose claims are based on a particular type of stressor and potentially violates their right to equal protection under the law. Another commenter asserted that the rule violates due process by denying a claimant the ability to submit competent medical evidence from private mental health professionals to rebut the VA opinion. One commenter suggested that the rule should specifically provide for rebuttal of the VA examiner's opinion with non-VA evidence. Also, commenters asserted that the rule would not permit a veteran to submit evidence from a private physician or psychologist or would require VA to reject such an opinion, thereby conflicting with VA's obligation to consider all evidence of record, and would violate the benefit of the doubt rule. Another commenter asserted that, absent the opinion of a VA psychiatrist or psychologist confirming that the claimed stressor is adequate to support a PTSD diagnosis and that the veteran's symptoms are related to the claimed stressor, VA adjudicators would not weigh or analyze the evidence. Other commenters asserted that the rule would violate 38 CFR 3.303(a) and 38 U.S.C. 5107(b).

These concerns are unfounded. Nothing in the rule precludes a claimant from submitting private medical evidence, permits VA to ignore any evidence that is submitted, or requires VA to reject an opinion from a private physician or psychologist. Statute and regulation require VA to consider all information and lay and medical evidence of record when deciding a claim for veterans benefits. 38 U.S.C. 5107(b); 38 CFR 3.303(a). Service connection for PTSD requires medical evidence diagnosing the disability, medical evidence establishing a link between the veteran's current symptoms and an in-service stressor, and credible evidence corroborating occurrence of the stressor. 38 CFR 3.304. If a stressor claimed by a veteran is related to the veteran's fear of hostile military or terrorist activity, the evidentiary standard for establishing occurrence of the stressor can be reduced but only if a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, confirms that the claimed stressor is adequate to support a PTSD diagnosis and that the veteran's symptoms are related to the stressor. If such confirmation is made in accordance with the rule, VA will not require evidence corroborating occurrence of the claimed stressor. Failure to obtain such confirmation, however, does not necessarily result in denial of the claim. If such confirmation is not made in accordance with the rule, VA will assist the claimant in obtaining evidence to corroborate occurrence of the claimed stressor. VA will consider all evidence of record, including evidence submitted by the claimant, give the claimant the benefit of the doubt when the evidence is in equipoise, and determine whether the requirements for establishing service connection for PTSD under 38 CFR 3.304(f) have been satisfied, notwithstanding any failure to satisfy the requirements of new section 3.304(f)(3). 38 U.S.C. 5103A and 5107(b); 38 CFR 3.303(a) and 3.102.

Competent Medical Evidence

Some commenters asserted that the requirement for confirmatory evidence from a VA psychiatrist or psychologist conflicts with 38 CFR 3.159(a)(1), which defines "competent medical evidence" to include "evidence provided by a person who is qualified through education, training, or experience to offer medical diagnoses, statements, or opinions."

There is no conflict because the definition in § 3.159(a)(1) concerns a matter different from the subject of this rule. This rule concerns whether "credible supporting evidence" will be required to establish the occurrence of a stressor in a claim for service connection of PTSD. Section 3.159(a)(1) defines the phrase "competent medical evidence" for purposes of explaining when VA will provide a medical examination or obtain a medical opinion in any service connection claim. *See* 38 U.S.C. 5103A(d)(2)(A) (VA "shall" provide medical examination or obtain medical opinion when several conditions are met, including that the record "contains competent medical evidence" that the claimant has a current disability or persistent or recurrent symptoms of disability); 38 CFR 3.159(c)(4)(i) (VA must provide a medical examination or obtain a medical opinion if several conditions are met, including that the information and evidence of record does not contain "sufficient competent medical evidence"

to decide the claim, but contains "competent lay or medical evidence" of a current diagnosed disability or persistent or recurrent symptoms of disability). Thus, the existence of "competent medical evidence" in the record does not preclude VA from obtaining a medical examination but rather mandates an examination if the other regulatory requirements are satisfied. For these reasons, we make no change to the rule based on these comments.

Treating Physician Rule

One commenter stated that the rule is in essence an "anti-treating physician" rule and that VA should adopt the "treating physician" rule used by the Social Security Administration. As explained above, the rule does not preclude a claimant from submitting and VA from considering evidence from the claimant's treating physician, if the claim cannot be granted under the new section 3.304(f)(3) procedures. Also, as the U.S. Court of Appeals for the Federal Circuit has recognized, adoption of the treating physician rule may conflict with the benefit of the doubt rule and would conflict with 38 CFR 3.303(a), which requires that service connection determinations will be based on the entire evidence of record and due consideration of VA's policy to administer the law under a broad and liberal interpretation, consistent with the facts of each case. *White* v. *Principi,* 243 F.3d 1378, 1381 (Fed. Cir. 2001); 38 U.S.C. 5107 and 7104(a); 38 CFR 3.102. We therefore do not adopt this suggestion.

Claimant's Evidentiary Burden

One commenter stated that the rule would increase the evidentiary burden on a claimant by requiring a confirmatory opinion by a VA psychiatrist or psychologist and a finding that the stressor is consistent with the places, types, and circumstances of the veteran's service.

Section 3.304(f) currently requires a medical-nexus opinion linking a veteran's current symptoms and the claimed stressor. This rule merely provides a liberalized evidentiary standard in certain situations based on the opinion of a VA psychiatrist or psychologist. Further, the requirement for consistency is mandated by 38 U.S.C. 1154(a) and 38 CFR 3.303(a). Also, pursuant to 38 U.S.C. 5103A(a) and (c), VA has a duty to assist a claimant for disability compensation in obtaining evidence necessary to substantiate the claim. In particular, VA is required to provide an examination or obtain a medical opinion when necessary to decide a claim for disability compensation. 38 U.S.C. 5103A(d). Section 5103A(d)(3) states that an examination or opinion is necessary if the record contains competent evidence of a current disability or persistent or recurrent symptoms, indicates that the disability or symptoms may be associated with the claimant's active service, and does not contain sufficient medical evidence for VA to make a decision on the claim.

One commenter asked whether the rule requires that the occurrence of a stressor be corroborated by evidence of a veteran's response to the stressor, such as behavioral changes as provided in former § 3.304(f)(4), or whether the veteran's lay testimony will be accepted as sufficient proof of the stressor. If the requirements of the rule are met, VA may accept the veteran's lay testimony as sufficient proof of the stressor. If, however, the requirements of the rule are not met, the record must contain corroborating evidence of the stressor. The rule does not require corroboration by evidence of the veteran's response, but evidence of the veteran's response is required for a legitimate diagnosis of PTSD resulting from exposure to the stressor. Furthermore, evidence of the veteran's response may be used to prove the occurrence of the stressor. Before deciding whether the stressor has been corroborated, VA will examine all the evidence of record to determine whether it corroborates occurrence of the stressor. *See* 38 CFR 3.303(a). Also, Manual M21–1MR instructs adjudicators to review alternative sources of evidence that may corroborate a claimed in-service stressor, such as a veteran's contemporaneous letters and diaries and performance reports. M21–1MR, Part III, subpart IV, ch. 4, sec. H, para. 29.i-k.

Relationship to Other Rules

One commenter stated that the rule could be viewed as restricting or superseding the beneficial rule codified at 38 CFR 3.304(f)(2), which states that a veteran's lay testimony alone is sufficient to establish the occurrence of a claimed stressor if the veteran engaged in combat with the enemy and the claimed stressor is related to that combat. We make no change based on this comment because the new rule merely provides another avenue by which veterans seeking disability compensation for PTSD can establish service connection and does not restrict or supersede any existing VA rules intended to assist claimants. A qualifying veteran may still establish service connection under 38 CFR 3.304(f)(2) without regard to the new rule.

Another commenter asked whether corroborating evidence of a stressor would be required if a veteran is not a combat veteran or does not qualify for the reduced evidentiary standard under this rule. Section 3.304(f) relaxes the ordinary evidentiary standard in other situations also, such as PTSD diagnosed in service, a former prisoner of war as claimant, and a claim based on personal assault in service. However, in the absence of such circumstances, VA would not grant service connection for PTSD unless the record contains a medical diagnosis of PTSD, medical evidence of a nexus between current symptoms and the in-service stressor, and corroborating evidence of the occurrence of the stressor. 38 CFR 3.304(f).

Authority for Rule

One commenter also suggested that VA should provide a legal foundation for the regulation and suggests the Persian Gulf War Veterans Act of 1998, Public Law 105–277, Div. C, tit. XVI, sec. 1603, 112 Stat. 2681–742, 2681–745, and the Veterans Programs Enhancement Act of 1998, Public Law 105–368, sec. 105, 112 Stat. 3315, 3324, which authorized the 2008 IOM report.

As explained in the notice of proposed rulemaking, the authority for this rulemaking is 38 U.S.C. 501(a)(1), which authorizes the Secretary to promulgate regulations "with respect to the nature and extent of proof and evidence and the method of taking and furnishing them in order to establish the right to benefits under such laws," and 38 U.S.C. 1154(a), which requires the Secretary to "include in the regulations pertaining to the service-connection of disabilities" provisions requiring "due consideration" of the places, types, and circumstances of a veteran's service. Proposed Rule, 74 FR 42617. We make no change to the rule based on this comment because the public laws cited by the commenter do not authorize regulations regarding the nature and extent of proof and evidence necessary to establish service connection for PTSD.

Applicability Date

This final rule applies to an application for service connection for PTSD that is received by VA on or after the rule's effective date, was received by VA before the rule's effective date but has not been decided by a VA regional office as of that date, is appealed to the Board on or after the rule's effective date, was appealed to the Board before the rule's effective date but has not been

decided by the Board as of that date, or is pending before VA on or after the rule's effective date because the Veterans Court vacated a Board decision on the application and remanded it for readjudication.

Some commenters suggested that the rule should be applied retroactively to claims that were finally denied by VA before the effective date of the regulation. Another commenter suggested that the effective date of an award of benefits under the rule should be the earlier of the date of the veteran's claim or October 21, 1998, the date of enactment of the Persian Gulf War Veterans Act of 1998. We do not adopt these suggestions.

Congress has provided that, once a decision on a claim for veterans benefits becomes "final," "the claim will not thereafter be reopened or allowed, except as may otherwise be provided by regulations not inconsistent with [title 38, United States Code]." 38 U.S.C. 7105(c). There are only two exceptions to this statutory rule of finality. *Cook* v. *Principi,* 318 F.3d 1334, 1339 (Fed. Cir. 2002) (en banc). The Secretary must reopen a previously denied claim if new and material evidence is submitted, and a final VA decision is subject to revision based on clear and unmistakable error. 38 U.S.C. 5108, 5109A, and 7111. Whether a final decision involves clear and unmistakable error is determined under the law that was in effect when the decision was made. *Russell* v. *Principi,* 3 Vet. App. 310, 313–14 (1992) (en banc). This rule was not and will not have been in effect for a claim that was finally denied before the rule's effective date. Therefore, VA will not apply the rule to claims that were finally denied before the effective date of the rule unless new and material evidence is submitted.

The effective date of benefits awarded pursuant to this rule will be assigned in accordance with the facts found but will not be earlier than the date of claim. 38 U.S.C. 5110(a). Although 38 U.S.C. 5110(g) and 38 CFR 3.114(a) authorize in some circumstances an effective date of benefits before the date of claim, those provisions are applicable to "administrative issue[s]" that liberalize the basis for benefit entitlement. VAOPGCPREC 11–99, para. 10 (liberalizing issue is one which effects substantive change in regulation and creates a new basis for entitlement to a benefit); S. Rep. No. 87–2042, at 2, 4, 6 (1962) (enactment of former sec. 3010(g) (currently sec. 5110(g)) intended to eliminate, when feasible, VA practice of requiring "specific application for the new benefit" whenever new regulation was promulgated); H.R. Rep. No. 87–2123, at 2, 4, 6 (1962) (same). This regulation, however, governs procedural matters rather than creating a new basis for entitlement to service connection for PTSD because it merely relaxes under certain circumstances the evidentiary standard for establishing occurrence of a stressor. As a result, 38 U.S.C. 5110(a), rather than 38 U.S.C. 5110(g), is applicable to awards under this rule. Although VAOPGCPREC 7–92 held that provisions in the VBA Adjudication Procedures Administration Manual M21–1 relieving former prisoners of war and combat veterans of the burden of producing evidence to substantiate that they experienced a stressful event are substantive rules, the opinion concerns the dichotomy between substantive and interpretive rules for purposes of determining whether notice-and-comment rulemaking is required pursuant to 5 U.S.C. 553, a dichotomy that is not relevant for purposes of determining whether section 5110(g) applies.

Another commenter asked whether the rule would constitute new evidence for purposes of reopening a finally denied claim for service connection for PTSD. The change in the evidentiary standard for establishing occurrence of an in-service stressor would not constitute a basis on which to reopen a finally denied claim for service connection for PTSD because it is procedural in nature and does not effect a substantive change in the law governing service connection for disabilities. *Routen* v. *West,* 142 F.3d 1434, 1442 (Fed. Cir. 1998).

Another commenter stated that surviving spouses should be entitled to receive the accrued benefits due their spouses under the rule. Section 5121(a) of title 38, United States Code, authorizes an award to certain survivors of a beneficiary of periodic monetary benefits to which the beneficiary was "entitled at death under existing ratings or decisions, or those based on evidence in the file at date of death * * * and due and unpaid." Eligible survivors of a veteran who had filed a claim for compensation for PTSD during his or her lifetime could therefore file a claim for accrued benefits alleging that the veteran was entitled to service connection for PTSD under the rule based on evidence in the file at the date of the veteran's death, provided that the claim for accrued benefits (if not the deceased veteran's claim) was received by VA on or after July 12, 2010 or was pending before VA on that date, at either a regional office or the Board. In addition, under 38 U.S.C. 5121A, if a claimant dies on or after October 10, 2008, while a claim for veterans benefits or an appeal of a decision with respect to such a claim is pending, a living person who would be eligible to receive accrued benefits due the claimant under section 5121(a) may, not later than one year after the date of the claimant's death, file a request to be substituted as the claimant for the purposes of processing the claim to completion. This rule would apply to a claim for service connection for PTSD in which an eligible survivor is substituted under section 5121A, provided that the veteran's application was received by VA on or after July 12, 2010 or was pending before VA on that date, at either a regional office or the Board of Veterans' Appeals.

Cost of Regulation

A commenter asked if VA has estimated the cost of the regulation. VA has determined that the rule will not have an annual effect on the economy of $100 million or more. Proposed Rule, 74 FR at 42619.

Implementation Recommendations

One commenter suggested that VA: (1) Work closely with the DoD to obtain reliable information to corroborate veterans' deployment and medical conditions; (2) mount an aggressive outreach campaign about the new regulation; (3) educate veterans and the public about PTSD; (4) monitor claims received and adjudicated under this regulation to evaluate its impact; and (5) promulgate regulations to cover claims for service connection for anxiety disorders, depression, and suicide based on deployment to a war zone. We make no change based on these comments as they are beyond the scope of this rulemaking.

Revision of Other VA Regulations

Some commenters recommended that VA revise the rating schedule for mental disorders. We make no change based on these comments, which are beyond the scope of this rulemaking, which deals with service connection for PTSD, not evaluating it after service connection has been established.

Inclusion of Rule in Part 5

Some commenters requested that the final rule be included in new part 5 of title 38, Code of Federal Regulations. This rule will be included in the part-5 notice of proposed rulemaking dealing with service-connection determinations.

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are

defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This final rule would not affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this final rule is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Paperwork Reduction Act

This document contains no provisions constituting a collection of information under the Paperwork Reduction Act (44 U.S.C. 3501–3521).

Executive Order 12866

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The Executive Order classifies a "significant regulatory action," requiring review by the Office of Management and Budget (OMB), as any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

The economic, interagency, budgetary, legal, and policy implications of this final rule have been examined, and it has been determined to be a significant regulatory action under the Executive Order because it is likely to result in a rule that will raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any year. This final rule would have no such effect on State, local, and tribal governments, or on the private sector.

Catalog of Federal Domestic Assistance Numbers and Titles

The Catalog of Federal Domestic Assistance program numbers and titles for this rule are 64.109, Veterans Compensation for Service-Connected Disability and 64.110, Veterans Dependency and Indemnity Compensation for Service-Connected Death.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. John R. Gingrich, Chief of Staff, Department of Veterans Affairs, approved this document on May 6, 2010, for publication.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Disability benefits, Health care, Pensions, Radioactive materials, Veterans, Vietnam.

Dated: July 7, 2010.

Robert C. McFetridge,

Director, Regulation Policy and Management.

■ For the reasons set out in the preamble, VA amends 38 CFR part 3 as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

■ 1. The authority citation for part 3, subpart A, continues to read as follows:

Authority: 38 U.S.C. 501(a), unless otherwise noted.

■ 2. Amend § 3.304 as follows.
■ a. Revise the introductory text of paragraph (f).
■ b. Redesignate paragraphs (f)(3) and (f)(4) as paragraphs (f)(4) and (f)(5), respectively.
■ c. Add new paragraph (f)(3).

The revision and addition read as follows:

§ 3.304 Direct service connection; wartime and peacetime.

* * * * *

(f) *Posttraumatic stress disorder.* Service connection for posttraumatic stress disorder requires medical evidence diagnosing the condition in accordance with § 4.125(a) of this chapter; a link, established by medical evidence, between current symptoms and an in-service stressor; and credible supporting evidence that the claimed in-service stressor occurred. The following provisions apply to claims for service connection of posttraumatic stress disorder diagnosed during service or based on the specified type of claimed stressor:

* * * * *

(3) If a stressor claimed by a veteran is related to the veteran's fear of hostile military or terrorist activity and a VA psychiatrist or psychologist, or a psychiatrist or psychologist with whom VA has contracted, confirms that the claimed stressor is adequate to support a diagnosis of posttraumatic stress disorder and that the veteran's symptoms are related to the claimed stressor, in the absence of clear and convincing evidence to the contrary, and provided the claimed stressor is consistent with the places, types, and circumstances of the veteran's service, the veteran's lay testimony alone may establish the occurrence of the claimed in-service stressor. For purposes of this paragraph, "fear of hostile military or terrorist activity" means that a veteran experienced, witnessed, or was confronted with an event or circumstance that involved actual or threatened death or serious injury, or a threat to the physical integrity of the veteran or others, such as from an actual or potential improvised explosive device; vehicle-imbedded explosive device; incoming artillery, rocket, or mortar fire; grenade; small arms fire, including suspected sniper fire; or attack upon friendly military aircraft, and the veteran's response to the event or circumstance involved a psychological or psycho-physiological state of fear, helplessness, or horror.

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 355 and 370

[EPA–HQ–SFUND–1998–0002; FRL–9168–7]

Emergency Planning and Community Right-to-Know Act; Guidance on Reporting Options for Sections 311 and 312 and Interpretations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Guidance and interpretations.

SUMMARY: In this document, the U.S. Environmental Protection Agency (EPA or the Agency) is providing guidance on various reporting options that States and local agencies may choose in implementing sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA). In addition, the Agency is also providing some new interpretations and revising some existing ones to help facilities comply with certain of the requirements under EPCRA.

DATES: *Effective Date:* July 13, 2010.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–HQ–SFUND–1998–0002. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *http://www.regulations.gov* or in hard copy at the Superfund Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Superfund Docket is (202) 566–0276.

FOR FURTHER INFORMATION CONTACT: Sicy Jacob, Office of Emergency Management, Mail Code 5104A, Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number: (202) 564–8019; fax number: (202) 564–2620; e-mail address: *jacob.sicy@epa.gov.* Also, you may contact the Superfund, TRI, EPCRA, RMP and Oil Information Center at (800) 424–9346 or (703) 412–9810 (in the Washington, DC metropolitan area). The Telecommunications Device for the Deaf (TDD) number is (800) 553–7672 or (703) 412–3323 (in the Washington, DC metropolitan area). You may wish to visit the Office of Emergency Management (OEM) Internet site at *http://www.epa.gov/emergencies.*

SUPPLEMENTARY INFORMATION: Here are the contents of the document:

I. Who is affected by this guidance?
II. What is the background of this guidance?
A. Statutory
B. Regulations and Guidance
III. What are the various reporting options for implementing Sections 311 and 312 of EPCRA?
A. UST Forms To Fulfill the Requirements for Tier I Information Under EPCRA Section 312
B. Partnership Programs for Joint Access to Information and Streamlined Submission of EPCRA Sections 311 and 312 Reporting
C. Electronic Submittal for EPCRA Section 312 Reporting
D. Incorporation of Previous Submissions Into EPCRA Section 312 Reporting
E. Electronic Access to Facility MSDS Database
F. EPCRA Section 312 Reporting To Fulfill Reporting Requirements Under Section 311
IV. Interpretations.
A. Emergency Release Notification
B. Hazardous Chemical Exemption for Solids Under EPCRA Section 311(e)(2)

I. Who is affected by this guidance?

This guidance is provided to States and local agencies on various reporting options that they may choose for implementing sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA). Entities that would be affected by this guidance are those organizations and facilities subject to EPCRA and its implementing regulations found in 40 CFR parts 355 and 370.

II. What is the background of this guidance?

A. Statutory

EPCRA, which was enacted as Title III of the Superfund Amendments and Reauthorization Act of 1986 (Pub. L. 99–499), (SARA) Title III, establishes authorities for emergency planning and preparedness, emergency release notification, community right-to-know reporting, and toxic chemical release reporting. It is intended to encourage State and local planning and preparedness for releases of extremely hazardous substances (EHSs) and to provide the public, local agencies, fire departments, and other emergency officials with information concerning potential chemical risks in their communities.

Section 302 of EPCRA requires facilities to notify their State Emergency Response Commission (SERC) of any EHS present at their site above its threshold planning quantity (TPQ). This information is then used by the Local Emergency Planning Committee (LEPC) to develop emergency response plans for the community. The implementing regulations, EHSs and their TPQs are codified in 40 CFR part 355.

Section 304 of EPCRA requires facilities to notify their SERC and the community emergency coordinator for the LEPC of any release of an EHS or a CERCLA hazardous substance above its reportable quantity (RQ). The RQs for the CERCLA hazardous substances are in Table 302.4 of 40 CFR Part 302. The implementing regulations for section 304 of EPCRA are codified in 40 CFR part 355.

Sections 311 and 312 of EPCRA require facilities to submit information on hazardous chemicals at their sites above the threshold quantities. The information on hazardous chemicals is submitted to the SERC, LEPC and the local fire department. The implementing regulations for sections 311 and 312 are codified in 40 CFR part 370.

B. Regulations and Guidance

On June 8, 1998, EPA published a proposed rule (63 FR 31268) to streamline the reporting requirements under EPCRA.[1] Specifically, EPA proposed four major regulatory revisions, along with draft guidance to provide flexibility to the States and local agencies in implementing the EPCRA program. The four proposed regulatory revisions were: (1) Higher threshold levels for reporting gasoline and diesel fuel at retail gas stations; (2) relief from routine reporting for substances with minimal hazards and minimal risks; (3) relief from routine reporting for sand, gravel and rock salt; and (4) "Other Regulatory Changes," such as: Reporting of mixtures; removing the Tier I and Tier II inventory forms and instructions from the CFR, as well as some other revisions to the forms and instructions; and some minor changes to the emergency planning and emergency release notification regulations (40 CFR part 355). The regulatory provisions for items (1) and (4) were finalized on February 11, 1999 (64 FR 7031) and November 3, 2008 (73 FR 65452), respectively. The regulatory provisions for items (2) and (3) may be finalized at a later date.

In addition to the four regulatory revisions, EPA took comment on various reporting options to streamline the reporting requirements for facilities and to reduce the information management burden for SERCs, LEPCs and fire departments in the form of draft guidance in the preamble to the June 8, 1998 proposed rule. The main objective of the draft guidance was to provide flexibility to the States and local agencies in implementing sections 311 and 312. In particular, EPA stated that

[1] The regulations were first promulgated in 1987 and amended in 1990, 1999 and 2008. *See* **Federal Register** Notices April 22, 1987 (52 FR 13378), October 15, 1987 (52 FR 38344), February 11, 1999 (64 FR 7031), July 26, 1990 (55 FR 30632) and November 3, 2008 (73 FR 65452).

States may implement any or all of the reporting options provided in the preamble whether EPA finalized the guidance or not. Since the proposed rule, many States have adopted at least one or two reporting options, such as electronic filing via diskettes or on-line filing of the Federal reporting form, Tier II, or the State equivalent form. States were always given the flexibility to implement the EPCRA program as necessary to meet the goals of EPCRA, which is to prepare for and respond to releases of EHSs and to provide the public with information on potential chemical risks in their communities. This flexibility includes adding more chemicals, setting lower reporting thresholds and creating a reporting form or format that includes more information than is required by the Federal reporting requirements.

EPA did not propose any regulatory revisions, but sought comments on various reporting options under sections 311 and 312. The reporting options discussed were: (1) The use of Underground Storage Tank (UST) forms to fulfill the requirements for Tier I Information under EPCRA section 312; (2) partnership programs for joint access to EPCRA sections 311 and 312 information by SERCs, LEPCs, and fire departments; (3) electronic submittal for EPCRA section 312 reporting; and (4) incorporation of previous submissions into EPCRA section 312 reporting. These four options, the Agency believed, would reduce the information management burden for States and local agencies, as well as minimize the reporting burden for the regulated community. (*See* preamble to the June 8, 1998 proposed rule for further discussion on the various reporting options.)

EPA also suggested a few other options to streamline reporting and revise some existing regulatory interpretations for facilities. These additional options, the Agency believed, would also reduce the information management burden for States and local agencies. The options and suggested interpretations are: (1) Electronic access to a facility's databases of MSDSs; (2) interpretation of the hazardous chemical exemption for solids under EPCRA sections 311(e)(2); and (3) EPCRA section 312 reporting to fulfill the reporting requirements under section 311. (See preamble to the June 8, 1998 proposed rule for further discussion on the various options and suggested interpretations.)

In the June 1998 preamble, EPA also defined and took comment on several terms or phrases used in the regulations. EPA requested comments on whether the Agency should provide guidance on the meaning of the term "promptly" associated with providing notice of any changes relevant to emergency planning (40 CFR part 355) and the phrase "as soon as practicable" associated with providing a written follow-up emergency notice under the emergency release notification requirements (40 CFR part 355). The Agency did not intend to revise the regulatory requirements, but only to provide guidance for these two terms. However, EPA received comments from many States and local agencies that the term "promptly" should be defined in the regulations since receiving information from facilities on changes relevant to emergency planning is crucial in developing and/or updating emergency response plans. As a result, the Agency defined this term in the recent final rule published on November 3, 2008 (73 FR 65452). The requirement added to 40 CFR 355.20 states that any changes relevant to emergency planning must be provided to the LEPC within 30 days after the changes have occurred. EPA will define the phrase, "as soon as practicable" associated with providing written follow-up emergency notice under the emergency release notification requirements in this guidance.

III. What are the various reporting options for implementing Sections 311 and 312 of EPCRA?

EPA requested comments on the draft guidance in the preamble to the June 1998 proposed rule (63 FR 31268) in an effort to streamline compliance with the reporting requirements. EPA did not propose any regulatory changes, but sought comments on the options provided. The Agency stated in the 1998 preamble that States and local agencies may implement any or all of the options regardless of whether EPA issues final guidance, provided the approach adopted met the statutory and regulatory requirements.

In general, commenters supported some of the options provided in the draft guidance. However, a few commenters stated that the options may actually increase compliance costs and the risk of non-compliance at companies with multiple facilities due to the loss of consistency in data management and compliance reporting. As noted previously, the various reporting options under EPCRA sections 311 and 312 were to provide flexibility to the States and local agencies so they may implement the program as necessary for their community emergency planning and response efforts. States may need to develop specific methods to manage the information provided by facilities within their State so that LEPCs can develop emergency response plans and provide the public with information. Thus, States are not required to adopt or implement these options.

The following is a more specific discussion of each of the reporting options and guidance on implementing them.

A. UST Forms To Fulfill the Requirements for Tier I Information Under EPCRA Section 312

At the time of the June 1998 proposal, many States were accepting the Tier I inventory form, which contains the minimum information about hazardous chemicals at a facility.[2] Only a few States required the Tier II inventory form, which contains specific information about hazardous chemicals at the facility.[3] To provide flexibility, the draft guidance offered States the option to allow facilities to use the UST form required under the Resource Conservation and Recovery Act (RCRA) to comply with the reporting requirements under section 312 of EPCRA. This option reduces the reporting burden for those facilities that only have USTs on their site containing hazardous chemicals. In most cases, these facilities are retail gas stations which usually only have USTs that may be subject to the reporting requirements under sections 311 and 312. At the same time, in the June 1998 proposed rule, EPA proposed to raise the reporting thresholds for gasoline and diesel fuel at retail gas stations provided these facilities meet certain requirements. EPA finalized the higher reporting thresholds for gasoline and diesel fuel on February 11, 1999 (64 FR 7047).

A few commenters supported the use of the UST form to fulfill the section 312 requirements, but most opposed it. These commenters argued that it would be confusing and burdensome for LEPCs and fire departments and would make electronic filing more difficult. Some of these commenters also stated that the differences in information and filing schedules would make this approach

[2] Tier I information provides the general types and locations of hazardous chemicals present at the facility during the previous calendar year. The Tier I information is the minimum information to be provided to be in compliance with the inventory reporting requirements. If Tier I information is reported, the hazardous chemicals must be aggregated by hazard categories. There are two hazard categories and three physical hazard categories for purposes of reporting under Tier I. These five hazard categories are defined in 40 CFR 370.66.

[3] Tier II information provides the specific amounts and locations of hazardous chemicals present at the facility during the previous calendar year.

inappropriate. Other commenters argued that EPA's approach would not result in streamlining and that EPA should eliminate duplicative reporting, not duplicative forms. These commenters also questioned the need for the approach because most States require the Tier II form and the higher reporting thresholds for gasoline and diesel fuel will remove most of the facilities subject to UST reporting from Part 370.

The Tier I inventory form provides the minimum information required under EPCRA section 312 and its implementing regulations. When the proposed rule was published in June 1998, some States were accepting the Tier I form. However, all States now require facilities to submit a State specific form or the Federal Tier II inventory form. Therefore, use of the UST form as suggested in 1998 may not be beneficial for implementing agencies. Additionally, EPA expected that the UST form would be used instead of the Tier I form mainly by retail gas stations since they likely only have underground storage tanks containing hazardous chemicals. Since EPA raised the reporting threshold for gasoline and diesel fuel stored at retail gas stations on February 11, 1999 (64 FR 7047), most retail gas stations may not need to report. Therefore, the Agency's guidance is that the use of the UST form as a replacement of the Tier I form for reporting under EPCRA section 312 is not recommended.

B. Partnership Programs for Joint Access to Information and Streamlined Submission of EPCRA Sections 311 and 312 Reporting

To streamline the submission process, EPA suggested in the draft guidance that SERCs, LEPCs, and fire departments could partner together and agree that one agency would receive the section 311 and 312 reporting information and make it available electronically to the others. Although the statute and its implementing regulations in 40 CFR part 370 state that facilities are required to submit their MSDSs or chemical lists under section 311 of EPCRA and the Tier I or Tier II form to their SERC, LEPC and the local fire department, EPA believed the single point submission option satisfies the intent of the statute and its implementing regulations. If implementing agencies choose to use this option, EPA stated that they should ensure that all statutory and regulatory requirements are met, especially the deadline for submission.

Many commenters supported the idea of partnerships to allow filing of information to a single point. Other commenters, while supporting this approach, cited problems. For example, many LEPCs and fire departments do not have access to computers or the Internet. A few commenters also stated that they provide compliance assistance to facilities and a centralized compliance point would take away this working relationship.

The Agency suggested the single point submission to reduce the burden on the regulated community, as well as reduce information management burden on some implementing agencies. For example, a SERC could develop a reporting format for facilities to submit the Tier II form or an equivalent State form. The SERC could collect the information and then make it immediately available electronically to LEPCs and fire departments on-line. Electronic access eliminates searching through hundreds of papers during an emergency situation. If LEPCs and/or fire departments do not have the capability to access the information on-line, then the SERC could provide the information to these entities on diskettes or in hard copy.

At the time of the June 1998 proposed rule, only a few States were accepting the Tier II form or the State form electronically. Today, many States have developed their own electronic reporting system or are using EPA's Tier II reporting system (Tier2 Submit). Most of these States accept section 312 reports on-line. EPA encourages these States to explore ways to provide their LEPCs and fire departments joint access to the information. EPA also expects that today most LEPCs and fire departments can accept or access section 312 reports electronically.

EPA realizes that a lack of funding may limit a State's capability to set up a partnership or to develop database systems and access to information. Since the EPCRA program has matured over the past ten years, many States have established program funding mechanisms through reporting fee systems, Federal grants, *etc.* EPA encourages States to use these mechanisms to provide the necessary resources to develop a database system and access to information for LEPCs and fire departments.

Although States have the flexibility to choose any method for submittal and joint access to information, that method must meet the March 1 reporting deadline specified in the statute. To ensure this deadline is met, States may want to revise their right-to-know program regulations to require facilities to submit the Tier II form or State equivalent before March 1 to allow enough time for processing and access by LEPCs and fire departments by March 1. If States choose to implement a partnership program for sharing of information, we believe that a formal agreement is necessary between the three entities. States should then notify the facilities about this agreement and the new submission process. That is, States should inform the facilities that they can submit their section 312 report to the SERC and it will provide access to the LEPC and the fire department.

C. Electronic Submittal for EPCRA Section 312 Reporting

Since the beginning of EPCRA, the Agency encouraged States to implement the EPCRA program as necessary to meet its goals: to prepare for and respond to emergency releases of extremely hazardous substances and provide information to the public on potential chemical risks in their communities. States have the flexibility to tailor the program to their needs by adding chemicals or setting lower reporting thresholds, etc. Over the years, States have reported that their biggest burden is handling thousands of paper Tier I/II form submissions. Some States requested that they be allowed to create an electronic reporting format for facilities to use to comply with EPCRA section 312. Electronic reporting would reduce the burden on facilities since they need to enter most of their information on the Tier II form only in the first year and then revise it as needed in subsequent years. As discussed in the previous section, electronic reporting makes joint access easier.

Many commenters supported electronic submittals, but noted that it would not be practical for many LEPCs, fire departments, and smaller facilities since they likely don't have the capability. Other commenters opposed the idea because of the financial burden on State and local agencies. Still other commenters supported electronic reporting and provided ideas for certification of electronic submissions.

The Agency understands the concerns raised by commenters on electronic reporting. Prior to the June 1998 proposed rule, many States and local agencies requested that the Agency develop an electronic reporting system to reduce the burden of information management at the State and local level. Some State and local agencies asked that they be allowed to develop their own electronic reporting format. This is why EPA suggested in the draft guidance that States and local agencies have the flexibility to choose any reporting options provided the statutory and regulatory requirements are met.

EPA has since developed and offered States an electronic reporting system—Tier2 Submit electronic reporting software. Many States also have created electronic reporting formats and require on-line reporting or submission via diskettes. Only a few States accept paper Tier II report submissions. EPA recognizes that there may be facilities that do not have the capability to submit Tier II forms electronically. EPA encourages States and local agencies to allow these facilities to submit paper copies of their Tier II report, unless the States make arrangements to collect and provide the data to LEPCs and the fire departments.

Recently, many States requested guidance on electronic signatures and certification of electronically submitted information. Currently, the regulations in part 370 require the facility owner or operator (or the officially designated representative of the owner or operator) submit a certification statement with their hazardous chemical inventory form containing an original signature that the information submitted is true, accurate and complete. The June 8, 1998 draft guidance stated that the States and local agencies may continue to develop their own reporting format, including electronic reporting as long as the information required includes the information required by the statute and its implementing regulations and that certification is required regardless of the format in which it is submitted. The draft guidance also stated that if States and local officials allow section 312 reporting information to be submitted via the Internet, it will be necessary for the facility owner or operator or its officially designated representative to certify the information submitted.

At the time the draft guidance was published in June 1998 **Federal Register**, on-line submittal and certification options were not available for reporting under section 312. Recently, States and the regulated community requested that EPA provide guidance on how the original signature requirement stated in 40 CFR 370.41 and 370.42 could be met if facilities submit the hazardous chemical inventory form on-line.

EPA advises States and the regulated community that for electronic section 312 reporting, the original signature as required by 40 CFR part 370 may be provided on paper (*i.e.* a "wet" signature) or by electronic certification according to requirements established by the State. (*Memorandum from Debbie Dietrich to EPA Regional Superfund Managers on Electronic Reporting and Signature under EPCRA Section 312, July 30, 2009.* This memorandum is available on the Agency's Web Site at *http://www.epa.gov/emergencies).* States have the flexibility to use any system for collecting chemical inventory information under section 312 and to establish the means to ensure the information is true, accurate, and complete so they may effectively and efficiently manage chemical risks and provide information to the public. Facilities that submit the hazardous chemical inventory form and certification on-line, do not need to also submit a certification statement on paper unless the State and local agencies require it. EPA encourages facility owners and operators to contact their State and local agencies for the reporting requirements in each State. The regulated community and the implementing agencies may visit the Agency's Web site at *http://www.epa.gov/emergencies* for Federal reporting requirements and access to each of the State Web sites.

D. Incorporation of Previous Submissions Into EPCRA Section 312 Reporting

Under EPCRA section 312, facilities are required to submit a Tier I form or, if requested, a Tier II form annually to the SERC, LEPC and the fire department even though the information submitted in a previous year has not changed. To reduce the burden on facilities that have no changes in their data from the previous year's submission, EPA discussed several options in the June 1998 preamble for meeting the requirements under EPCRA section 312 without having to re-create the information.

One approach suggested in the draft guidance would be for the facility to simply reference and attach a copy of the unchanged information from the previous year's submittal to the current year's submission. This would mean that the facility would have to retain a copy of its previous submission. A second approach would be for the facility to reference previous submittals already retained by the SERC, LEPC and local fire department. A third approach would require reporting only if the information changed.

Some commenters opposed the option to require reporting only when changes have occurred. Few commenters supported the idea of simply referencing and/or attaching a copy of the unchanged information. They stated this approach could increase the burden on implementing agencies because they would need to maintain and reference previous years' files. These commenters also stated that facilities probably would forget to report and could consider some changes unimportant.

At the time the various approaches were discussed in the preamble to the June 1998 proposal, States did not have electronic reporting methods in place. Now that many States have established electronic reporting or are using the Tier2 Submit software developed by EPA, the burden for facilities to re-create information on paper does not exist for most facilities. Facilities can store their Tier II report electronically and revise as needed for subsequent years. Therefore, EPA is no longer suggesting that facilities be allowed to incorporate previous submissions as part of the EPCRA section 312 reporting requirement since it is unlikely to reduce the reporting burden. However, States that still require submission of a facility's Tier II or State equivalent forms on paper may still consider options for incorporation of previous submissions to reduce the paperwork burden.

E. Electronic Access to Facility MSDS Database

Some facilities maintain an electronic database of MSDSs for the hazardous chemicals on their site. EPA requested comments whether a facility should be allowed to give the SERC, LEPC and the local fire department electronic access to its MSDS database instead of actually submitting the MSDSs to the three entities as required under EPCRA section 311.

A few commenters supported this option and some asked for development of a central database that would include MSDSs from all facilities. However, other commenters opposed the approach for a number of reasons, such as it would raise concerns about the security of a company's computer systems, it would not meet the requirements of the statute, as well as the fact that many LEPCs and fire departments do not have the capability to access databases electronically. Still other commenters stated that access would need to be assured even when power outages occur.

Submission of MSDSs for hazardous chemicals present at a facility to the SERC, LEPC and the fire department is a statutory requirement. EPA has codified this requirement in 40 CFR part 370. The Agency suggested electronic submission of MSDSs or providing access to a facility's MSDS database to reduce the burden on the regulated community and reduce the information management burden on implementing agencies. However, such an approach does raise a number of issues, including whether it would meet the statutory

requirements under EPCRA section 311. Therefore, the Agency is no longer recommending such an approach in place of the submission of the MSDS forms for hazardous chemicals at the facility to the SERC, LEPC and fire departments, except as discussed elsewhere in today's notice.

F. EPCRA Section 312 Reporting To Fulfill Reporting Requirements Under Section 311

EPA's draft guidance suggested another approach to reduce the reporting requirements for facilities. Specifically, the Agency sought comments on whether the section 312 reporting requirement can fulfill the section 311 reporting requirements provided that the section 312 reporting conforms to the required time frame and that the Tier II information is accurate and complete. Since reporting under both sections 311 and 312 are submitted to the SERC, LEPC and the fire department, this approach should not pose any additional burden on these entities.

Section 311 of EPCRA and its implementing regulations require the submission of MSDSs or a list of hazardous chemicals to the SERC, LEPC, and fire department within three months after becoming subject to the reporting requirements, or within three months after discovery of significant new information concerning a hazardous chemical that has already been reported, or within 30 days of a request from the SERC, LEPC or fire department. Section 312 of EPCRA requires a submission of a Tier I (or Tier II) form to these three entities by March 1 of each year. Since the section 312 report is due by March 1, for information from the previous calendar year, some facilities may submit their Tier I/II form between January 1 and March 1. Therefore, Section 312 could be used to meet the section 311 reporting requirements for those facilities that become subject to reporting under section 311, or discover significant new information concerning a hazardous chemical between October 1 and December 31 of any given calendar year.

All but one commenter who addressed this issue supported EPA's draft guidance regarding this matter. Many States indicated they already use this approach and find that it works well allowing them to utilize its resources in a more efficient manner. One commenter objected because it would require reprogramming of company systems.

After reviewing the comments, the Agency, recognizing that some States are already implementing this reporting option, is retaining this option in this final guidance. However, those States that choose to implement or are already implementing this reporting option will need to require facilities to submit a section 312 report three months after acquiring a new chemical in order to be in compliance with the section 311 reporting requirements.

IV. Interpretations

A. Emergency Release Notification

In addition to providing draft guidance to the implementing agencies for various reporting options under EPCRA section 312, EPA also provided draft guidance to the regulated community on defining certain terms and phrases used in the regulations. In the June 1998 proposed rule, EPA requested comments on the Agency's interpretation of the meaning of the term "promptly" in section 355.20 and the phrase "as soon as practicable" in section 355.40. The Agency did not intend to revise the regulatory requirements, but only to provide guidance for these two terms.

EPA received comments from many States and local agencies that the term "promptly" should be defined in the regulations since receiving information from facilities on changes relevant to emergency planning is crucial in developing and/or updating emergency response plans. Therefore, to be consistent with EPCRA section 303(d)(2), the Agency proposed to add the term "promptly" to the regulations in 40 CFR 355.20 associated with providing the LEPC with notification of any changes occurring at the facility which may be relevant to emergency planning. Commenters supported this revision, but suggested that the Agency provide a specific time period, such as 10, 20 or 30 days because of the need for this information for emergency planning. As previously noted, the final rule published on November 3, 2008 (73 FR 65452) revised 40 CFR 355.20 to state that any changes relevant to emergency planning must be provided to the LEPC within 30 days after the changes have occurred.

EPA also requested comments on whether the Agency should provide guidance on the meaning of the phrase "as soon as practicable" under the emergency release notification in 40 CFR 355.40, which states (at 40 CFR 355.40(b)) that a written follow-up emergency notice must be provided by a facility "as soon as practicable" after a release. EPA sought comments on whether 30 days should be allowed to provide a written follow-up notice.

Commenters generally supported defining "as soon as practicable," but differed on whether 30 days was a reasonable period. Some commenters stated that the period should be shorter (7 or 14 days) or longer (45 to 90 days), while other commenters supported the 30-day period. A few commenters noted that 30 days was inconsistent with EPA's guidance on enforcement actions.

Based on the comments and EPA's evaluation, the Agency has decided that 30 days should be sufficient to submit the written follow-up notice of the emergency release to the SERC and LEPC. The Agency will be revising its enforcement response policy to reflect this change. States may implement a more stringent timeframe if they so choose.

B. Hazardous Chemical Exemption for Solids Under EPCRA Section 311(e)(2)

EPCRA section 311 provides some exemptions for certain substances from the definition of hazardous chemical. Under section 311(e)(2), "any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use" is exempt from the definition of hazardous chemical and therefore need not be reported under sections 311 and 312. However, EPA's interpretation of this exemption has been that if portions of the solid metal are modified, such that exposure to a hazardous chemical can occur, then all of the solid metal should be included and counted to determine the quantity of hazardous chemical present for threshold purposes. For example, if there are 10,000 pounds of steel undergoing a welding process at a facility at any one time, then 10,000 pounds would need to be counted toward the quantity for threshold determination even if only a portion of the steel is welded. EPA believes this interpretation occasionally requires reporting of information that is unnecessary for emergency planning and community right-to-know purposes. To relieve the burden for facilities and to relieve the burden on information management for implementing agencies, the Agency suggested that this interpretation be modified in the preamble to the June 1998 proposed rule. Under the new interpretation, facilities would only have to include and count the amount of fume or dust emitted or released from a manufactured solid that is being modified to determine whether the EPCRA sections 311 and 312 reporting thresholds have been reached. EPA requested comments on this new interpretation and

commenters generally supported this new interpretation for this exemption.

Based on the comments provided by the regulated community and the implementing agencies, EPA is revising its interpretation for the exemption for solids under section 311(e)(2), such that facilities would only have to include and count the amount of fume or dust given off a piece of metal that is being modified toward the threshold determination. In addition, as EPA stated in the preamble to the June 1998 proposed rule, stamping a piece of metal doesn't negate the exemption for that piece of metal; the piece of metal would still qualify for the exemption. EPA believes that the stamping of sheet metal does not present exposure to a hazardous chemical.

This new interpretation would also apply to bricks or any other manufactured solid item that undergoes a modification process (for example, cutting). Thus, facilities would need to count the amount of fume or dust released during the modification process toward the threshold determination.

These interpretations are provided as guidance. States may implement more stringent requirements if they so choose.

The Agency realizes the format for this guidance is different from the usual EPA format. Since the Agency requested comments on the various reporting options and interpretations, we decided to publish the guidance in the **Federal Register** to address the comments. A fact sheet that includes all the elements in this guidance is available on the Agency's Web site at *http://www.epa.gov/emergencies.*

SUMMARY OF THE REPORTING OPTIONS

Reporting Option	Guidance
Use of UST Forms to Fulfill the Requirements for Tier I Information under EPCRA Section 312..	Since all States now require facilities to submit Tier II or State equivalent forms, this reporting option is no longer useful.
Partnership Programs for Joint Access to Information and Streamlined Submission of EPCRA Sections 311 and 312 Reporting. If a single point submission is allowed for facilities, then one agency would receive the information and provide access to the other two agencies..	States may implement this approach, but the statutory and regulatory requirements must still be met. That is, all three entities get access to section 312 information by March 1 annually.
Electronic Submittal and Certification for EPCRA Section 312 Reporting	• States may require facilities to submit information using Tier 2 Submit, the Federal electronic reporting format or the State equivalent electronic reporting format. • Those facilities that do not have capability to file electronically should be given the option to file a hardcopy. • The original signature requirement in 40 CFR 370.41 and 370.42 could be met by providing the certification statement on paper (*i.e.* wet signature) or by any electronic certification established by State and local agencies. (*Memorandum from Debbie Dietrich to EPA Regional Superfund Managers on Electronic Reporting and Signature under EPCRA Section 312, July 30, 2009.* This memorandum is available on the Agency's Web site at *http://www.epa.gov/emergencies).*
Incorporation of Previous Submissions into EPCRA Section 312 Reporting.	States may adopt this reporting approach, especially for those facilities that submit section 312 information on paper.
Electronic Access to Facility MSS Database	EPA believes that this approach is inappropriate since there is a concern for computer and information security.
EPCRA Section 312 Reporting to Fulfill Reporting Requirements under Section 311.	• This reporting approach is only beneficial to those facilities that acquire a new chemical between October 1 and December 31 of any given calendar year. • States may implement this reporting approach ensuring that facilities comply with section 312 three months after acquiring a new chemical.

SUMMARY OF THE INTERPRETATIONS

Interpretations	Guidance
Emergency Release Notification	Facilities may have up to 30 days to submit a written follow-up report to State and local agencies. States may implement more stringent requirements.
Hazardous Chemical Exemption for Solids under EPCRA section 311()(2).	Facilities would only have to count the amount of fume or dust given off a piece of metal, brick or any other manufactured solid item that undergoes a modification process (i.e. cutting, welding, *etc.*). States may implement more stringent requirements.

Dated: June 22, 2010.

Mathy Stanislaus,

Assistant Administrator, Office of Solid Waste and Emergency Response.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 10–51; FCC 10–88]

Structure and Practices of the Video Relay Service Program

AGENCY: Federal Communications Commission.

ACTION: Interim rule.

SUMMARY: In this document, the Commission adopts an interim rule addressing the certification of provider information for Telecommunications Relay Services (TRS) calls. By requiring providers to be more accountable for their submissions, the Commission takes necessary, affirmative steps to preserve the Interstate TRS Fund (Fund).

DATES: Effective July 13, 2010, except for the amendment to 47 CFR 64.604 (c)(5)(iii)(I), which contains new information collection requirements subject to the Paperwork Reduction Act (PRA) that have not been approved by the Office of Management and Budget (OMB). Written comments by the public on the new information collections are due September 13, 2010. The Commission will publish a document in the **Federal Register** announcing the effective date of these requirements.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554. In addition to filing comments with the Secretary, a copy of any comments on the information collection requirements contained herein should be submitted to Cathy Williams, Federal Communications Commission via e-mail at *PRA@fcc.gov* and *Cathy.Williams@fcc.gov,* and to Nicholas A. Fraser, Office of Management and Budget, via fax at (202) 395–5167, or via e-mail to *Nicholas_A._Fraser@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Gregory Hlibok, Consumer and Governmental Affairs Bureau at (202) 559–5158 (VP), or e-mail: *Gregory.Hlibok@fcc.gov.* For additional information concerning the information collection requirements contained in this document, contact Cathy Williams at (202) 418–2918, or e-mail: *Cathy.Williams@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Structure and Practices of the Video Relay Service Program,* Order, document FCC 10–88, adopted May 24, 2010, and released May 27, 2010, in CG Docket No. 10–51. Simultaneously with the Order, the Commission also issued a Declaratory Ruling and Notice of Proposed Rulemaking in CG Docket No. 10–51.

The full text of document FCC 10–88 and copies of any subsequently filed documents in this matter will be available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554. Document FCC 10–88 and copies of subsequently filed documents in this matter may also be purchased from the Commission's duplicating contractor at Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554. Customers may contact the Commission's duplicating contractor at its Web site *http://www.bcpiweb.com* or by calling 1–800–378–3160. To request materials in accessible formats (such as Braille, large print, electronic files, or audio format), send an e-mail to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice) or (202) 418–0432 (TTY). Document FCC 10–88 can be also downloaded in Word and Portable Document Format (PDF) at *http://www.fcc.gov/cgb/dro/trs.html#orders.*

Paperwork Reduction Act of 1995 Analysis

Document FCC 10–88 contains new information collection requirements subject to the PRA. It will be submitted to OMB for review under section 3507 of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new information collection requirements contained in this proceeding. Public and agency comments are due September 13, 2010. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506 (c)(4), the Commission seeks comment on how it may "further reduce the information collection burden for small business concerns with fewer than 25 employees."

Synopsis

The rapid growth of the Fund within a five year span requires the Commission to take immediate steps in preserving the Fund to ensure the continued availability of TRS. Indeed, the Commission has a fiduciary duty to ensure that the Fund operates efficiently, and to guard against waste, fraud, and abuse. The Commission takes steps in document FCC 10–88 to uphold that duty.

Section 553 of the Administrative Procedure Act requires that agencies provide notice of, and an opportunity for public comment on, their proposed rules except, *inter alia,* "when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." Notice and comment have been excused in emergency situations or where delay could result in serious harm. Additionally, agencies, including this Commission, have been afforded "substantial deference" when imposing interim regulations with or without prior notice and comment, particularly where such regulations have been shown to be necessary to prevent irreparable harm and the agency is seeking comment on the matter in a rulemaking proceeding.

In this case, the Commission finds good cause to adopt the interim rule below to make providers more accountable by requiring senior executives to certify compliance with the Commission's regulations under penalty of perjury. By requiring providers to be more accountable for their submissions, the Commission takes necessary, affirmative steps to preserve the TRS Fund. The Commission adopts an interim rule to require the Chief Executive Officer (CEO), Chief Financial Officer (CFO), or other senior executive of a relay service provider to certify, under penalty of perjury, that: (1) Minutes submitted to the Fund administrator for compensation were handled in compliance with section 225 of the Communications Act and the Commission's rules and orders, and are not the result of impermissible financial incentives, or payments or kickbacks, to generate calls, and (2) cost and demand data submitted to the Fund administrator related to the determination of compensation rates or methodologies are true and correct. In the accompanying *NPRM* section of document FCC 10–88, the Commission seeks additional comment on whether it should make this rule permanent.

The TRS rules currently require providers to "submit reports of * * * TRS minutes of use to the [Fund] administrator in order to receive payments." The rules further require

providers to submit minutes on a form fashioned by the Fund administrator and the administrator to "establish procedures to verify payment claims." Additionally, providers are required to certify on their monthly minutes of use submissions that the data being reported are "true and accurate." Therefore, providers are already required to certify as to the truth and accuracy of the monthly data they submit to the administrator. Accurate call data are essential to ensuring the integrity of the Fund; thus, to ensure that the Commission can adequately detect fraud against the Fund, the Commission concludes that additional safeguards are necessary to ensure that minutes billed to the Fund are legitimate. Although both the Commission and the Fund administrator have the authority to audit providers, greater accountability can be ensured by requiring CEOs, CFOs, or other senior executives of providers to submit minutes of use for payment and to certify under penalty of perjury the legitimacy of the minutes. The Commission also expects that this interim rule will lead to greater scrutiny by providers of their minutes before they submit them to the Fund administrator for payment.

The TRS rules also require providers to "provide the administrator with true and adequate data, and other historical, projected and state rate related information reasonably requested by the administrator, necessary to determine TRS Fund revenue requirements and payments." Providers are also required to certify on their yearly submission forms as to the truth and accuracy of the data being submitted. The Commission similarly believes that to ensure the accuracy of this information, including the information requested on the Relay Services Data Request Form submitted annually, the TRS rules should require CEOs, CFOs, or other senior executives of providers to certify under penalty of perjury that this information is true and correct.

The Commission adopts this interim rule without notice and comment, pursuant to 5 U.S.C. 553(b)(3)(B). In light of the explosive growth in the TRS Fund in recent years and evidence of fraud against the Fund, as evidenced by the recent indictments and guilty pleas from call center managers and employees admitting to defrauding the Fund of tens of millions of dollars, the fact that minutes are submitted for payment on a monthly basis, and the expectation that providers seeking compensation from the Fund are doing so in compliance with the TRS rules, the Commission finds that it is unnecessary and contrary to the public interest to delay adoption of this interim rule. The Commission finds that an immediate interim rule is necessary and consistent with the public interest. In this case, the Commission finds good cause to adopt an interim rule to make providers more accountable by requiring senior executives to certify compliance with the Commission's regulations under penalty of perjury. By requiring providers to be more accountable for their submissions, the Commission takes necessary, affirmative steps to preserve the TRS Fund.

Congressional Review Act

The Commission will send a copy of document FCC 10–88 in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Ordering Clauses

Pursuant to sections 1, 4(i) and (o), 225, 303(r), 403, 624(g), and 706 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i) and (o), 225, 303(r), 403, 554(g), and 606, document FCC 10–88 is adopted.

Document FCC 10–88 shall be effective July 13, 2010, pursuant to 5 U.S.C. 553(d)(3) and § 1.427(b) of the Commission's rules, 47 CFR 1.427(b), subject to OMB approval for new information collection requirements.

The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of document FCC 10–88 to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 64

Individuals with disabilities, Reporting and recordkeeping requirements; Telecommunications.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

Rule Changes

■ For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 64 as follows:

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 47 U.S.C. 154, 254(k); secs. 403(b)(2)(B), Pub. L. 104–104, 110 Stat. 56. Interpret or apply 47 U.S.C. 201, 218, 222, 225, 226, 228, and 254(k) unless otherwise noted.

■ 2. Revise § 64.604(c)(5)(iii)(I) to read as follows:

§ 64.604 Mandatory minimum standards.

* * * * *

(c) * * *

(5) * * *

(iii) * * *

(I) *Information filed with the administrator.* The Chief Executive Officer (CEO), Chief Financial Officer (CFO), or other senior executive of a provider submitting minutes to the Fund for compensation must, in each instance, certify, under penalty of perjury, that the minutes were handled in compliance with section 225 and the Commission's rules and orders, and are not the result of impermissible financial incentives or payments to generate calls. The CEO, CFO, or other senior executive of a provider submitting cost and demand data to the TRS Fund administrator shall certify under penalty of perjury that such information is true and correct. The administrator shall keep all data obtained from contributors and TRS providers confidential and shall not disclose such data in company-specific form unless directed to do so by the Commission. Subject to any restrictions imposed by the Chief of the Consumer and Governmental Affairs Bureau, the TRS Fund administrator may share data obtained from carriers with the administrators of the universal support mechanisms (*see* § 54.701 of this chapter), the North American Numbering Plan administration cost recovery (*see* § 52.16 of this chapter), and the long-term local number portability cost recovery (*see* § 52.32 of this chapter). The TRS Fund administrator shall keep confidential all data obtained from other administrators. The administrator shall not use such data except for purposes of administering the TRS Fund, calculating the regulatory fees of interstate common carriers, and aggregating such fee payments for submission to the Commission. The Commission shall have access to all data reported to the administrator, and authority to audit TRS providers. Contributors may make requests for Commission nondisclosure of company-specific revenue information under § 0.459 of this chapter by so indicating on the Telecommunications Reporting Worksheet at the time that the subject data are submitted. The Commission shall make all decisions regarding nondisclosure of company-specific information.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 0910131362–0087–02]

RIN 0648–XX55

Fisheries of the Exclusive Economic Zone Off Alaska; Pelagic Shelf Rockfish in the Western Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for pelagic shelf rockfish in the Western Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2010 total allowable catch (TAC) of pelagic shelf rockfish in the Western Regulatory Area of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), July 8, 2010, through 2400 hrs, A.l.t., December 31, 2010.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7269.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2010 TAC of pelagic shelf rockfish in the Western Regulatory Area of the GOA is 650 metric tons (mt) as established by the final 2010 and 2011 harvest specifications for groundfish of the GOA (75 FR 11749, March 12, 2010).

In accordance with § 679.20(d)(1)(i) and § 679.20(d)(1)(ii)(B), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2010 TAC of pelagic shelf rockfish in the Western Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 600 mt, and is setting aside the remaining 50 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for pelagic shelf rockfish in the Western Regulatory Area of the GOA.

After the effective date of this closure the maximum retainable amounts at § § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of pelagic shelf rockfish in the Western Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of July 7, 2010.

The AA also finds good cause to waive the 30–day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 8, 2010.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2010–17041 Filed 7–8–10; 4:15 pm]

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679
[Docket No. 0910131362–0087–02]

RIN 0648–XX53

Fisheries of the Exclusive Economic Zone Off Alaska; Northern Rockfish in the Western Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for northern rockfish in the Western Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2010 total allowable catch (TAC) of northern rockfish in the Western Regulatory Area of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), July 8, 2010, through 2400 hrs, A.l.t., December 31, 2010.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7269.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2010 TAC of northern rockfish in the Western Regulatory Area of the GOA is 2,703 metric tons (mt) as established by the final 2010 and 2011 harvest specifications for groundfish of the GOA (75 FR 11749, March 12, 2010).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2010 TAC of northern rockfish in the Western Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 2,603 mt, and is setting aside the remaining 100 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for northern rockfish in the Western Regulatory Area of the GOA.

After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment

pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of northern rockfish in the Western Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of July 7, 2010.

The AA also finds good cause to waive the 30–day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 8, 2010.

Carrie Selberg,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2010–17043 Filed 7–8–10; 4:15 pm]

BILLING CODE 3510–22–S

Proposed Rules

Federal Register
Vol. 75, No. 133
Tuesday, July 13, 2010

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0680; Directorate Identifier 2008–NM–195–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A310 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above that would supersede an existing AD. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as: Analysis performed in the frame of the Extended Service Goal has led Airbus to modify the inspection programme [modification of thresholds, intervals and associated configurations] which is currently required by DGAC (Direction Générale de l'Aviation Civile) France AD F–2005–001. This modified inspection programme is necessary to detect and prevent damage associated with a structural fatigue phenomenon of the rear spar internal angle and the tee fitting located in the centre wing box. This condition, if not corrected, could affect the structural integrity of the centre wing box. The unsafe condition is reduced structural integrity of the wings. The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by August 27, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–40, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus SAS—EAW (Airworthiness Office), 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; e-mail: *account.airworth-eas@airbus.com;* Internet: *http://www.airbus.com.* You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2125; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2010–0680; Directorate Identifier 2008–NM–195–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We have lengthened the 30-day comment period for proposed ADs that address MCAI originated by aviation authorities of other countries to provide adequate time for interested parties to submit comments. The comment period for these proposed ADs is now typically 45 days, which is consistent with the comment period for domestic transport ADs.

We will post all comments we receive, without change, to *http://www.regulations.gov;* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On April 20, 2006, we issued AD 2006–09–05, Amendment 39–14575 (71 FR 25921, May 3, 2006). That AD required actions intended to address an unsafe condition on the products listed above.

Since we issued AD 2006–09–05, the manufacturer has modified the inspection program currently required by AD 2006–09–05 by reducing certain compliance times. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2008–0187, dated October 10, 2008 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

> Analysis performed in the frame of the Extended Service Goal has led Airbus to modify the inspection programme [modification of thresholds, intervals and associated configurations] which is currently required by DGAC (Direction Générale de l'Aviation Civile) France AD F–2005–001 [which corresponds to FAA AD 2006–09–05].
>
> This modified inspection programme is necessary to detect and prevent damage associated with a structural fatigue phenomenon of the rear spar internal angle and the tee fitting located in the centre wing box. This condition, if not corrected, could affect the structural integrity of the centre wing box.

For the reason stated above, this new EASA AD retains the requirements of DGAC France AD F–2005–001, which is superseded, and refers to the latest revision of Airbus Service Bulletin (SB) A310–57–2047.

The unsafe condition is reduced structural integrity of the wings. This AD retains the requirements of AD 2006–09–05, but with certain reduced compliance times. The required actions include doing repetitive rotating probe inspections for any crack of the rear spar internal angle and the left and right sides of the tee fitting, and doing related investigative/corrective actions if necessary. The actions also include modifying the holes in the internal angle and tee fitting by cold expansion. You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Airbus has issued Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009; and Mandatory Service Bulletin A310–57–2035, Revision 10, dated March 25, 2008. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have proposed different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a NOTE within the proposed AD.

Costs of Compliance

Based on the service information, we estimate that this proposed AD would affect about 66 products of U.S. registry.

The actions that are required by AD 2006–09–05 and retained in this proposed AD take up to 600 work-hours per product, at an average labor rate of $85 per work hour. Required parts cost up to $38,900 per product. Based on these figures, the estimated cost of the currently required actions is up to $89,900 per product.

This new AD adds no new costs to affected operators; the manufacturer has modified the inspection program currently required by AD 2006–09–05, this proposed AD reduces the compliance times required by the existing AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by removing Amendment 39–14575 (71 FR 25921, May 3, 2006) and adding the following new AD:

Airbus: Docket No. FAA–2010–0680; Directorate Identifier 2008–NM–195–AD.

Comments Due Date

(a) We must receive comments by August 27, 2010.

Affected ADs

(b) This AD supersedes AD 2006–09–05, Amendment 39–14575. This AD also affects certain requirements of AD 98–26–01, Amendment 39–10942.

Applicability

(c) This AD applies to all Airbus Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes, certificated in any category.

Subject

(d) Air Transport Association (ATA) of America Code 57: Wings.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Analysis performed in the frame of the Extended Service Goal has led Airbus to modify the inspection programme [modification of thresholds, intervals and associated configurations] which is currently required by DGAC (Direction Générale de l'Aviation Civile) France AD F–2005–001 [which corresponds to FAA AD 2006–09–05].

This modified inspection programme is necessary to detect and prevent damage associated with a structural fatigue phenomenon of the rear spar internal angle and the tee fitting located in the centre wing box. This condition, if not corrected, could affect the structural integrity of the centre wing box.

The unsafe condition is reduced structural integrity of the wings.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

RESTATEMENT OF CERTAIN REQUIREMENTS OF AD 2006–09–05 MODIFICATION

(g) For all airplanes except those that are modified by Airbus Modifications 06672S6812, 06673S6813, and 07387S7974 in production: Within 60 months after June 7, 2006 (the effective date of AD 2006–09–05), modify the holes in the internal angle and tee fitting and do all applicable related investigative and corrective actions by accomplishing all the actions specified in the Accomplishment Instructions of Airbus Service Bulletin A310–57–2035, Revision 08, dated September 19, 2005; or Airbus Mandatory Service Bulletin A310–57–2035, Revision 10, dated March 25, 2008; except as required by paragraph (h) of this AD. Do all applicable related investigative and corrective actions before further flight. As of the effective date of this AD, use only Airbus Mandatory Service Bulletin A310–57–2035, Revision 10, dated March 25, 2008.

Contact the FAA

(h) Where the service information specified in Table 1 of this AD specifies to contact the manufacturer if certain cracks are found, before further flight, repair those conditions according to a method approved by either the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the Direction Générale de l'Aviation Civile (DGAC) (or its delegated agent); or EASA (or its delegated agent).

Actions Accomplished According to Previous Issues of Airbus Service Bulletin A310–57–2035

(i) Actions accomplished before June 7, 2006, in accordance with the service information specified in Table 2 of this AD, are considered acceptable for compliance with the corresponding actions specified in paragraph (g) of this AD.

NEW REQUIREMENTS OF THIS AD—REVISED COMPLIANCE TIMES FOR INSPECTIONS REQUIRED BY AD 2006–09–05

Initial and Repetitive Inspections of the Rear Spar Internal Angle

(j) For airplanes on which an inspection of the rear spar internal angle has not been done in accordance with Airbus Service Bulletin A310–57–2047 as of the effective date of this AD: At the later of the times specified in paragraphs (j)(1) and (j)(2) of this AD, do a rotating probe inspection for any crack of the rear spar internal angle located in the center wing box and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009; except as required by paragraphs (n) and (o) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspection thereafter at the applicable time specified in Table 4 of this AD. Certain compliance times are applicable to short range use, average flight time (AFT) equal to or less than 4 hours, or long range use, AFT exceeding 4 hours.

Note 1: To establish the AFT, divide the accumulated flight time (counted from the take-off up to the landing) by the number of accumulated flight cycles. This gives the average flight time per flight cycle.

(1) Within the applicable time specified in Table 3 of this AD.

(2) Within the applicable time specified in paragraph (j)(2)(i), (j)(2)(ii), or (j)(2)(iii) of this AD:

(i) For A310–203, –204, –221, and –222 airplanes: Within 700 flight cycles or 1,500 flight hours after the effective date of this AD, whichever occurs first.

(ii) For A310–304, –322, –324, and –325 short range airplanes: Within 700 flight cycles or 1,900 flight hours after the effective date of this AD, whichever occurs first.

(iii) For A310–304, –322, –324, and –325 long range airplanes: Within 500 flight cycles or 2,500 flight hours after the effective date of this AD, whichever occurs first.

TABLE 3—INITIAL INSPECTION INTERNAL ANGLE

Model and configuration	Compliance time (whichever occurs first)	
A310–203, –204, –221, and –222 airplanes on which Mod 6672S6812 and Mod 7387S7974 are not done.	Before the accumulation of 9,200 total flight cycles.	Before the accumulation of 18,500 total flight hours.
A310–203, –204, –221, and –222 airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in production.	Before the accumulation of 19,800 total flight cycles.	Before the accumulation of 39,600 total flight hours.

TABLE 3—INITIAL INSPECTION INTERNAL ANGLE—Continued

A310–203, –204, –221, and –222 airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 and before the accumulation of 6,200 total flight cycles and 12,500 total flight hours.	Within 19,800 flight cycles after the effective date of this AD.	Within 39,600 flight hours after the effective date of this AD.
A310–203, –204, –221, and –222 airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 and are not done before the accumulation of 6,200 total flight cycles and 12,500 total flight hours.	Within 8,200 flight cycles after the effective date of this AD.	Within 16,400 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6672S6812 and Mod 7387S7974 are not done.	Before the accumulation of 7,500 total flight cycles.	Before the accumulation of 21,100 total flight hours.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6672S6812 and Mod 7387S7974 are not done.	Before the accumulation of 5,300 total flight cycles.	Before the accumulation of 26,900 total flight hours.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done.	Before the accumulation of 15,900 total flight cycles.	Before the accumulation of 44,700 total flight hours.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in production.	Before the accumulation of 11,300 total flight cycles.	Before the accumulation of 56,900 total flight hours.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 and before the accumulation of 4,700 total flight cycles and 13,100 total flight hours.	Within 15,900 flight cycles after the effective date of this AD.	Within 44,700 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 and not done before the accumulation of 4,700 total flight cycles and 13,100 total flight hours.	Within 8,500 flight cycles after the effective date of this AD.	Within 23,800 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 before the accumulation of 3,300 total flight cycles and 16,700 total flight hours.	Within 11,300 flight cycles after the effective date of this AD.	Within 56,900 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6672S6812 and Mod 7387S7974 are done in accordance with Airbus Service Bulletin A310–57–2035 and not done before the accumulation of 3,300 total flight cycles and 16,700 total flight hours.	Within 6,000 flight cycles after the effective date of this AD.	Within 30,300 flight hours after the effective date of this AD.

TABLE 4—REPETITIVE INTERVALS

Model and configuration	Interval (not to exceed)
A310–203, –204, –221, and –222 airplanes	Within 7,200 flight cycles or 14,400 flight hours, whichever occurs first.
A310–304, –322, –324, and –325 short range airplanes	Within 6,800 flight cycles or 19,100 flight hours, whichever occurs first.
A310–304, –322, –324, and –325 long range airplanes	Within 4,800 flight cycles or 24,300 flight hours, whichever occurs first.

(k) For airplanes on which an inspection of the rear spar internal angle has been done in accordance with Airbus Service Bulletin A310–57–2047 as of the effective date of this AD: At the applicable time specified in paragraphs (k)(1), (k)(2), and (k)(3) of this AD, do a rotating probe inspection for any crack of the rear spar internal angle located in the center wing box and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009; except as required by paragraphs (n) and (o) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspection thereafter at the applicable time specified in Table 4 of this AD. Certain compliance times are applicable to short range use, AFT equal to or less than 4 hours, or long range use, AFT exceeding 4 hours.

(1) For A310–203, –204, –221, and –222 airplanes: At the earlier of the times specified in paragraphs (k)(1)(i) and (k)(1)(ii) of this AD.

(i) Within 7,940 flight cycles or 15,880 flight hours after the most recent inspection, whichever occurs first.

(ii) At the later of the times specified in paragraphs (k)(1)(ii)(A) and (k)(1)(ii)(B) of this AD.

(A) Within the applicable interval specified in Table 4 of this AD.

(B) Within 740 flight cycles or 1,480 flight hours after the effective date of this AD, whichever occurs first.

(2) For A310–304, –322, –324, and –325 short range airplanes: At the later of the times

specified in paragraphs (k)(2)(i) and (k)(2)(ii) of this AD.

(i) Within the applicable interval specified in Table 4 of this AD.

(ii) Within 700 flight cycles or 1,900 flight hours after the effective date of this AD, whichever occurs first.

(3) For A310–304, –322, –324, and –325 long range airplanes: At the later of the times specified in paragraphs (k)(3)(i) and (k)(3)(ii) of this AD.

(i) Within the applicable interval specified in Table 4 of this AD.

(ii) Within 500 flight cycles or 2,500 flight hours after the effective date of this AD, whichever occurs first.

Initial and Repetitive Inspections of the Tee Fitting

(l) For airplanes on which an inspection of the left and right sides of the tee fitting has not been done in accordance with Airbus Service Bulletin A310–57–2047 as of the effective date of this AD: At the later of the times specified in paragraphs (l)(1) and (l)(2) of this AD, do a rotating probe inspection for any crack of the left and right sides of the tee fitting, and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009; except as required by paragraphs (n) and (o) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspection thereafter at the applicable time specified in Table 6 of this AD. Certain compliance times are applicable to short range use, AFT equal to or less than 4 hours, or long range use, AFT exceeding 4 hours.

(1) Within the applicable time specified in Table 5 of this AD.

(2) Within the applicable time in paragraph (l)(2)(i), (l)(2)(ii), or (l)(2)(iii) of this AD.

(i) For A310–203, –204, –221, and –222 airplanes: Within 800 flight cycles or 1,600 flight hours, whichever occurs first.

(ii) For A310–304, –322, –324, and –325 short range airplanes: Within 800 flight cycles or 2,200 flight hours, whichever occurs first.

(iii) For A310–304, –322, –324, and –325 long range airplanes: Within 600 flight cycles or 3,100 flight hours, whichever occurs first.

TABLE 5—INITIAL INSPECTION TEE FITTING

Model and configuration	Compliance time (whichever occurs first)	
A310–203, –204, –221, and –222 airplanes on which Mod 6673S6813 is not done.	Before the accumulation of 14,300 flight cycles.	Within 28,700 flight hours after the effective date of this AD.
A310–203, –204, –221, and –222 airplanes on which Mod 6673S6813 is done in production.	Before the accumulation of 17,500 total flight cycles.	Before the accumulation of 35,000 total flight hours.
A310–203, –204, –221, and –222 airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and before the accumulation of 8,100 total flight cycles and 16,200 total flight hours.	Within 17,500 flight cycles after the effective date of this AD.	Within 35,000 flight hours after the effective date of this AD.
A310–203, –204, –221, and –222 airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and not before the accumulation of 8,100 total flight cycles and 16,200 total flight hours.	Within 9,600 flight cycles after the effective date of this AD.	Within 19,200 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6673S6813 is not done.	Within 10,800 flight cycles after the effective date of this AD.	Within 30,400 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6673S6813 is not done.	Before the accumulation of 8,500 total flight cycles.	Before the accumulation of 42,800 total flight hours.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6673S6813 is done in production.	Before the accumulation of 13,100 total flight cycles.	Before the accumulation of 36,700 total flight hours.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6673S6813 is done in production.	Before the accumulation of 10,300 total flight cycles.	Before the accumulation of 51,600 total flight hours.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and before the accumulation of 5,800 total flight cycles and 16,400 total flight hours.	Within 13,100 flight cycles after the effective date of this AD.	Within 36,700 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 short range airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and not before the accumulation of 5,800 total flight cycles and 16,400 total flight hours.	Within 7,400 flight cycles after the effective date of this AD.	Within 20,900 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and before the accumulation of 4,600 total flight cycles and 23,100 total flight hours.	Within 10,300 flight cycles after the effective date of this AD.	Within 51,600 flight hours after the effective date of this AD.
A310–304, –322, –324, and –325 long range airplanes on which Mod 6673S6813 is done in accordance with Airbus Service Bulletin A310–57–2035 and not before the accumulation of 4,600 total flight cycles and 23,100 total flight hours.	Within 6,000 flight cycles after the effective date of this AD.	Within 30,300 flight hours after the effective date of this AD.

TABLE 6—REPETITIVE INTERVALS

Model and configuration	Interval (not to exceed)
A310–203, –204, –221, and –222 airplanes	9,100 flight cycles or 18,300 flight hours, whichever occurs first.
A310–304, –322, –324, and –325 short range airplanes	7,300 flight cycles or 20,400 flight hours, whichever occurs first.
A310–304, –322, –324, and –325 long range airplanes	5,900 flight cycles or 29,600 flight hours, whichever occurs first

(m) For airplanes on which an inspection of the rear left and right sides of the tee fitting has been done in accordance with Airbus Service Bulletin A310–57–2047 as of the effective date of this AD: At the applicable time specified in paragraphs (m)(1) or (m)(2) of this AD, do a rotating probe inspection for any crack of the left and right sides of the tee fitting, and do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009; except as required by paragraphs (n) and (o) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspection thereafter at the applicable time specified in Table 6 of this AD. Certain compliance times are applicable to short range use, AFT equal to or less than 4 hours, or long range use, AFT exceeding 4 hours.

(1) For A310–203, –204, –221, and –222 airplanes: At the earlier of the times specified in paragraphs (m)(1)(i) and (m)(1)(ii) of this AD.

(i) Within 10,800 flight cycles or 17,400 flight hours after the most recent inspection, whichever occurs first.

(ii) At the later of the times specified in paragraphs (m)(1)(ii)(A) and (m)(1)(ii)(B) of this AD.

(A) Within the applicable interval specified in Table 6 of this AD.

(B) Within 700 flight cycles or 1,500 flight hours after the effective date of this AD, whichever occurs first.

(2) For A310–304, –322, –324, and –325 airplanes: At the later of the times specified in paragraphs (m)(2)(i) and (m)(2)(ii) of this AD.

(i) Within the applicable interval specified in Table 6 of this AD.

(ii) Within 700 flight cycles or 1,900 flight hours after the effective date of this AD, whichever occurs first.

Contact the FAA

(n) Where Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009, specifies to contact the manufacturer if certain cracks are found, before further flight, repair those conditions according to a method approved by either the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA (or its delegated agent).

No Reporting Required

(o) Although Airbus Service Bulletin A310–57–2047, Revision 06, dated July 13, 2004; and Revision 08, dated July 2, 2009; specify to submit certain information to the manufacturer, this AD does not include that requirement.

(p) Actions accomplished before the effective date of this AD in accordance with Airbus Mandatory Service Bulletin A310–57–2035, Revision 09, dated September 27, 2007, are considered acceptable for compliance with the corresponding actions specified in paragraph (g) of this AD.

(q) Actions accomplished before the effective date of this AD in accordance with the service information specified in Table 7 of this AD, are considered acceptable for compliance with the corresponding actions specified in paragraphs (j) through (m) of this AD.

TABLE 7—PREVIOUS ISSUES OF SERVICE BULLETIN A310–57–2047

Document	Revision	Date
Airbus Service Bulletin A310-57-2047	03	November 26, 1997.
Airbus Service Bulletin A310–57–2047	04	March 5, 1999.
Airbus Service Bulletin A310–57–2047	05	August 3, 2000.
Airbus Service Bulletin A310–57–2047	06	July 13, 2004.
Airbus Service Bulletin A310–57–2047	07	March 14, 2008.

Related AD

(r) Accomplishing a rotating probe inspection of the rear spar internal angle and the tee fitting in accordance with Airbus Service Bulletin A310–57–2047, Revision 08, dated July 2, 2009, or a service bulletin listed in Table 7 of this AD, terminates the requirements specified in paragraph (o) of AD 98–26–01.

FAA AD Differences

Note 2: This AD differs from the MCAI and/or service information as follows:

Although the MCAI or service information tells you to contact the manufacturer for repair information, paragraph (n) of this AD requires that you contact the FAA or EASA (or its delegated agent) instead. Although the MCAI or service information tells you to submit information to the manufacturer, paragraph (o) of this AD specifies that such submittal is not required.

Other FAA AD Provisions

(s) The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2125; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) AMOCs approved previously in accordance with AD 2006–09–05, Amendment 39–14575, are approved as AMOCs for the corresponding provisions of this AD.

(3) Airworthy Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

Related Information

(t) Refer to MCAI EASA Airworthiness Directive 2008–0187, dated October 10, 2008; and Airbus Service Bulletins A310–57–2047, Revision 08, dated July 2, 2009; and Airbus Mandatory Service Bulletin A310–57–2035, Revision 10, dated March 25, 2008; for related information.

Issued in Renton, Washington, on June 30, 2010.

Todd G. Dixon,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Model A330–200 and A330–300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as: An A330 experienced an uncommanded engine #1 in flight spool down, which occurred while applying fuel gravity feed procedure, in response to low pressure indications from all fuel boost pumps, in both left and right wings. The investigations revealed that the wing tank pressure switches P/N (part number) HTE69000–1 had frozen due to water accumulated in their external part, causing spurious low pressure indications. As per procedure, the main pumps are then switched off, increasing the level of unavailable fuel. This, in combination with very low fuel quantities or another independent trapped fuel failure scenarios, can lead to fuel starvation on the affected engine(s). The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by August 27, 2010.

ADDRESSES: You may send comments by any of the following methods:

- Federal eRulemaking Portal: Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- Fax: (202) 493–2251.
- Mail: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- Hand Delivery: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–40, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80, e-mail *airworthiness.A330-A340@airbus.com;* Internet *http://www.airbus.com*. You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2010–0697; Directorate Identifier 2010–NM–102–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We have lengthened the 30-day comment period for proposed ADs that address MCAI originated by aviation authorities of other countries to provide adequate time for interested parties to submit comments. The comment period for these proposed ADs is now typically 45 days, which is consistent with the comment period for domestic transport ADs.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2010–0018, dated February 4, 2010 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

> An A330 experienced an uncommanded engine #1 in flight spool down, which occurred while applying fuel gravity feed procedure, in response to low pressure indications from all fuel boost pumps, in both left and right wings.
>
> The investigations revealed that the wing tank pressure switches P/N (part number) HTE69000–1 had frozen due to water accumulated in their external part, causing spurious low pressure indications.
>
> As per procedure, the main pumps are then switched off, increasing the level of unavailable fuel. This, in combination with very low fuel quantities or another independent trapped fuel failure scenarios, can lead to fuel starvation on the affected engine(s). This condition, if not corrected, could lead to a potential unsafe condition.
>
> This AD requires the replacement of all four wing tank fuel pressure switches associated to main pumps by new ones with a more robust design preventing water accumulation and freezing.

You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Airbus issued Mandatory Service Bulletin A330–28–3111, Revision 02, dated March 24, 2010. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in

general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have proposed different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a NOTE within the proposed AD.

Costs of Compliance

Based on the service information, we estimate that this proposed AD would affect about 48 products of U.S. registry. We also estimate that it would take about 7 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is $85 per work-hour. Required parts would cost about $0 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these costs. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $28,560, or $595 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Airbus: Docket No. FAA–2010–0697; Directorate Identifier 2010–NM–102–AD.

Comments Due Date

(a) We must receive comments by August 27, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Airbus Model A330–201, –202, –203, –223, –243, –301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes, certificated in any category, all manufacturer serial numbers, equipped with part number (P/N) HTE69000–1 wing tank pressure switches installed at Functional Item Number (FIN) locations 74QA1, 74QA2, 75QA1 or 75QA2.

Subject

(d) Air Transport Association (ATA) of America Code 28: Fuel.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

An A330 experienced an uncommanded engine #1 in flight spool down, which occurred while applying fuel gravity feed procedure, in response to low pressure indications from all fuel boost pumps, in both left and right wings.

The investigations revealed that the wing tank pressure switches P/N HTE69000–1 had frozen due to water accumulated in their external part, causing spurious low pressure indications.

As per procedure, the main pumps are then switched off, increasing the level of unavailable fuel. This, in combination with very low fuel quantities or another independent trapped fuel failure scenarios, can lead to fuel starvation on the affected engine(s).

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Actions

(g) Within 5 years after the effective date of this AD, replace the wing tank main pump pressure switches having P/N HTE69000–1 in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–28–3111, Revision 02, dated March 24, 2010.

(h) Actions accomplished before the effective date of this AD according to Airbus Mandatory Service Bulletin A330–28–3111, dated August 12, 2009; or Revision 01, dated December 4, 2009; are considered acceptable for compliance with the corresponding actions specified in this AD.

FAA AD Differences

Note 1: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(i) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(j) Refer to MCAI European Aviation Safety Agency Airworthiness Directive 2010–0018, dated February 4, 2010; and Airbus Mandatory Service Bulletin A330–28–3111, Revision 02, dated March 24, 2010; for related information.

Issued in Renton, Washington, on June 29, 2010.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 3280

[Docket No. FR–5221–P–01]

RIN 2502–AI71

Manufactured Home Construction and Safety Standards

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Federal Manufactured Home Construction and Safety Standards by adopting certain recommendations made to HUD by the Manufactured Housing Consensus Committee (MHCC). The National Manufactured Housing Construction and Safety Standards Act of 1974 (the Act) requires HUD to publish in the **Federal Register** all proposed revised construction and safety standards (Construction and Safety Standards, or Standards) submitted by the MHCC. The MHCC has prepared and submitted to HUD its second group of recommendations to improve various aspects of the Construction and Safety Standards. HUD has reviewed those proposals and has made several editorial revisions to the proposals, and those revisions have been reviewed and accepted by the MHCC.

DATES: *Comment Due Date:* September 13, 2010.

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Room 10276, Washington, DC 20410–0500. Communications must refer to the above docket number and title. There are two methods for submitting public comments. All submissions must refer to the above docket number and title.

1. *Submission of Comments by Mail.* Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Room 10276, Washington, DC 20410–0001.

2. *Electronic Submission of Comments.* Interested persons may submit comments electronically through the Federal eRulemaking Portal at *www.regulations.gov.* HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the *www.regulations.gov* Web site can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the rule.

No Facsimile Comments. Facsimile (FAX) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202–708–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number through TTY by calling the Federal Information Relay Service at 800–877–8339. Copies of all comments submitted are available for inspection and downloading at *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: The Office of Regulatory Affairs and Manufactured Housing, Office of Housing, Department of Housing and Urban Development, 451 7th Street, SW., Room 9164, Washington, DC 20410; telephone number 202–708–6401 (this is not a toll-free number). Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Information Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

The National Manufactured Housing Construction and Safety Standards Act of 1974 (42 U.S.C. 5401–5426) (the Act) authorizes HUD to establish and amend the Federal Manufactured Home Construction and Safety Standards (the Construction and Safety Standards, or Standards) codified in 24 CFR part 3280. The Act was amended in 2000 by the Manufactured Housing Improvement Act of 2000 (Pub. L. 106–569), by expanding its purposes and creating the Manufactured Housing Consensus Committee (MHCC).

As amended, the purposes of the Act (enumerated at 42 U.S.C. 5401) are: "(1) to protect the quality, durability, safety, and affordability of manufactured homes; (2) to facilitate the availability of affordable manufactured homes and to increase homeownership for all Americans; (3) to provide for the establishment of practical, uniform, and, to the extent possible, performance-based Federal construction standards for manufactured homes; (4) to encourage innovative and cost-effective construction techniques for manufactured homes; (5) to protect residents of manufactured homes with respect to personal injuries and the amount of insurance costs and property damages in manufactured housing consistent with the other purposes of this section; (6) to establish a balanced consensus process for the development, revision, and interpretation of Federal construction and safety standards for manufactured homes and related regulations for the enforcement of such standards; (7) to ensure uniform and effective enforcement of Federal construction and safety standards for manufactured homes; and (8) to ensure that the public interest in, and need for, affordable manufactured housing is duly considered in all determinations relating to the Federal standards and their enforcement."

In addition, the amended Act generally requires HUD to establish Construction and Safety Standards that are reasonable and practical, meet high standards of protection, are performance-based, and are objectively stated. Congress specifically established the MHCC to develop proposed revisions to the Construction and Safety Standards. The Act provides specific procedures (42 U.S.C. 5403) for the MHCC process.

After the passage of amendments to the Act in 2000, HUD, in accordance with the mandate of the Act, issued a request for proposals to interested organizations to be the "Administering Organization" that would serve as secretariat to the MHCC and therefore support the Construction and Safety Standards development process. After evaluating the bids received, HUD selected the National Fire Protection Association (NFPA) to be the MHCC's Administering Organization. Thereafter, NFPA assisted HUD in selecting the 21 voting members provided for by statute for appointment to the MHCC, seven in each of the following three statutory categories: Producers, Users, and General Interest and Public Officials. The Act also provides for one nonvoting member to represent HUD.

The MHCC held its first meeting in August 2002 and began work on reviewing possible revisions to the Construction and Safety Standards. The MHCC developed its own priorities for preparing proposed revisions for HUD to consider. As the MHCC proceeded, proposed revisions to the Construction and Safety Standards were divided into sets. On November 30, 2005, at 70 FR 72024, HUD published a final rule to amend various sections of the Construction and Safety Standards that was based on the first set of revisions the MHCC had proposed. This proposed rule is based on the second set of MHCC proposals to revise the Construction and Safety Standards. The MHCC proposals and recommendations can be viewed using the following link: *http://www.nfpa.org/assets/files/PDF/CodesStandards/MHCCHUD/MHCCPart2ChangesShown1105.pdf.*

HUD has reviewed those proposals and has made certain editorial revisions. HUD believes this proposed rule represents revisions that HUD and the MHCC have agreed upon.

II. Proposed Changes

The proposed rule would revise the following sections of the Construction and Safety Standards and also revise the incorporated reference standards, where indicated. Most of the proposed changes would codify existing building practices or conform HUD standards to HUD interpretive bulletins or existing building codes. As noted elsewhere in this preamble, HUD has identified only two standards in this proposed rule that would have an economic impact on the production costs of manufactured homes: The requirement that shower and bath valves use anti-scald mixing valves, and the increase in minimum insulation levels for cross-under ducts. HUD is requesting comment, however, on whether any of the other proposed changes would have an economic impact or impose additional costs on the production of manufactured housing and specifically seeks comments on the analysis supporting this proposed rule and on the assumptions used.

The following is a discussion of the specific revisions to the Construction and Safety Standards that are proposed by this rule.

A. Incorporation by Reference

The proposed rule would amend § 3280.4, by allowing the manufacturer to select which reference standard to incorporate into its designs and construction, where two or more reference standards are incorporated by reference for the same application or requirement. The existing practice is that if more than one reference standard exists, manufacturers must comply with the most restrictive aspects of each standard in their designs and construction. While this change reflects a relaxation of current requirements, by providing manufacturers with more flexibility in selecting materials, components, etc., to utilize in their production of homes, it is not actually a significant change. Currently, the areas in which there are duplicate reference standards are very few and, for those that do exist, HUD believes the degree of differences in performance and safety between the reference standards (*i.e.,* the restrictive and less restrictive) are not significant. However, the Department is specifically interested in receiving comments from the public as to whether the use of any of the duplicate reference standards for materials or equipment would result in reduced safety or performance levels for manufactured home occupants.

B. Planning Considerations

The proposed rule would amend § 3280.105(a)(2), by clarifying the method to be used when measuring the travel distance from the bedroom door to an exit door, a distance that must not exceed 35 feet. The proposed rule would clarify how the natural and unobstructed path is to be measured from the center of the bedroom door to the center of the exit door. Currently, there is no standardized method for making the travel distance measurement identified in the Standards. This proposed change would codify the method that is currently being used by manufacturers to make the 35-foot measurement to determine compliance with the Standards.

The proposed rule would also amend the provisions for exit facilities/exit doors in § 3280.105(b), by permitting door seals to reduce the minimum required exterior door opening by one inch. This proposed change would not change current construction requirements for exterior passage doors. Rather, it would codify an existing practice that has been previously permitted under Interpretative Bulletin B–1–76.

The proposed rule would make editorial revisions and amend the provisions for toilet requirements in § 3280.111, by adding an additional minimum clearance dimension from the centerline of a toilet to any adjacent wall of at least 15 inches. This proposed revision is consistent with current design practice in manufactured homes and is consistent with the requirements in residential building codes as well.

The proposed rule would modify and expand current § 3280.113, that sets requirements as to where safety glazing materials are to be located and how they are to be tested to determine if they can be considered safety glazing materials. The rule would also make the existing requirements for location and testing of safety glazing materials consistent with other model building codes and residential construction practices. Under the proposed revisions, safety glazing materials would be considered to be any glazing material capable of meeting the requirements of the Consumer Product Safety Commission (CPSC) or the Safety Performance Specifications and Methods of Test in ANSI Z97.1–1984.

C. Fire Safety

The proposed rule would add an alternative means of complying with the kitchen cabinet protection requirements in § 3280.204, by allowing the metal hood, 5/16-inch gypsum board, and 3/8-inch air space required by this section to be omitted when a microwave oven certified as conforming to Underwriters Laboratories Standard UL 923–2002 is installed between the cabinet and the range. Since the microwave oven would protect only combustible kitchen cabinet materials over the cooking range, all exposed surfaces along the bottom and sides of the cabinet would still be required to be protected by at least 5/16-inch gypsum board or the equivalent, in accordance with paragraph (a) of this section.

The proposed rule would also add and expand upon fire safety and performance requirements for all types of thermal insulating materials under proposed new section § 3280.207, Requirements for Thermal Insulating Materials. This is consistent with the requirements for evaluation of fire performance characteristics of

insulating materials used in residential building codes. HUD's existing regulation requires evaluation of fire performance characteristics of foam plastic insulating materials. Because thermal insulation materials used in manufactured homes are the same type of insulation materials used in residential building codes, they would already comply with the fire resistive properties being recommended by this proposed rule.

D. Body and Frame Requirements

The proposed rule would amend § 3280.305(c)(1)(i) by clarifying that the net uplift roof load must not be reduced by the dead load of the roof structure for the purposes of preparing engineering calculations or in performing structural load testing. This proposed change for roof uplift design would make no change to current engineering design practices. Rather, it would merely codify the current practices permitted under Interpretative Bulletin D–4–76.

The proposed rule would make editorial revisions and also clarify existing provisions in § 3280.305(c) that address areas where state or local building codes requirements exceed the provisions for design roof loads and wind loads required by the Standards. For consideration of state or local requirements for wind loads, the proposed rule would clarify that wind mapping data or records would need to indicate that higher design loads are necessary. The proposed rule would also change the title of each section to Consideration of Local Requirements.

The proposed rule would modify the existing requirements for control of formaldehyde emissions in § 3280.308, by lowering the maximum emission levels (as measured in the air chamber test specified in § 3280.406) for particleboard materials used in flooring applications from 0.3 parts per million (ppm) to 0.2 ppm; by limiting formaldehyde emissions from other uses of particleboard materials to 0.3 ppm; and by adding new formaldehyde emission controls for medium density fiberboard materials (MDF) of 0.3 ppm. These changes recommended by the MHCC, which are available on-line at *www.regulations.gov*, would be consistent with formaldehyde emission requirements in prior voluntary consensus standards for particleboard (ANSI–A208.1–1999) and MDF (ANSI A208.2–2004) and would require no change in existing technology for either product to achieve the proposed reduced formaldehyde levels or to meet the new requirements. However, the current national voluntary consensus standards for particleboard (ANSI A–208.1–2009) and MDF (ANSI A–208.2–2009) further reduces formaldehyde emission limits from those levels being proposed by HUD and were recently revised to harmonize with the formaldehyde emission standards established by the California Air Resource Board's Airborne Toxic Control Measure (CARB ACTM). The CARB ATCM standard for formaldehyde emissions for particleboard is 0.18ppm, but will become 0.09ppm on January 1, 2011. The CARB ATCM standard for MDF is currently 0.21ppm, but will become 0.11ppm for regular MDF on January 1, 2011, and 0.13ppm for thin MDF on January 1, 2012. The Environmental Protection Agency (EPA) is also currently investigating formaldehyde emissions from pressed wood products, including particleboard and MDF. Under a petition filed under the Toxic Substances Control Act,[1] EPA is being asked to extend the CARB ACTM formaldehyde emission limits nationally and to apply those limits to manufactured housing.[2] HUD is seeking comments from the public on whether the CARB ACTM and voluntary consensus standards limits for formaldehyde emissions from particleboard and MDF products should be the subject of future rulemaking.

E. Testing

A conforming amendment would be made to § 3280.403, for the testing of skylights consistent with the revisions to § 3280.305(c)(3)(iv) of the Construction and Safety Standards published in the **Federal Register** on November 30, 2005. The conforming amendment provides for skylights to be certified as complying with the AAMA/WDMA Voluntary Specifications for Skylights.

Section 3280.404(c)(2) of the proposed rule would prohibit any window that requires the removal of a sash to meet the egress size provisions of the Manufactured Home Construction and Safety Standards from being classified as an egress window. This proposed change would enhance egress and occupant safety in the event of an emergency.

F. Subpart F

The proposed rule would add new section § 3280.504(c) to allow the use of liquid-applied vapor retarders, so long as a nationally recognized testing agency has approved its use on the specific substrate to which it is to be applied. This addition would codify the current practice of accepting liquid-applied vapor retarders as an alternative to other conventional vapor retarder materials required by this section.

Section 3280.506(c) would be revised to clarify that interior-mounted storm window frames must be sealed in Thermal Uo Value Zone 3. This would reduce air infiltration and heat loss for interior-mounted-type storm windows and improve overall energy efficiency for manufactured homes designed to be located in the most restrictive climatic regions of the country.

Section 3280.509(c) would be amended by replacing the graph for determining the effective R values of compressed insulation with a table that allows for more precisely determining the effects on R values of non-uniform and uniform insulation compression for batt and blown insulation. This proposal would provide a more accurate method for determining effective R value requirements when insulation is compressed or used in sloping roof cavities and would result in more accurate projections of heat loss and heat gain for manufactured homes than would be determined by the current graphical method.

The proposed rule would amend § 3280.510(c), by eliminating the requirement to determine and report the optimal outdoor winter certification temperature for operating economy and energy conservation on the heating certificate. The requirement is being eliminated because this information has been found to be too technical and is not a basis often relied upon by consumers in determining sites for installing their homes.

However, in view of the renewed interest in improving energy conservation, HUD is requesting comments from the public regarding any other information that could be provided on the heating certificate that could be more useful to consumers in this regard. In addition, the information on the comfort cooling certificates required by this section would be amended to refer to the 1997 edition of the ASHRAE Handbook of Fundamentals.

G. Plumbing Systems

The proposed rule would make a conforming amendment to § 3280.603(a)(2) on water conservation to limit each water closet to 1.6 gallons of water per flush. Section 3280.607(b)(2)(iii) was amended in the final rule published in the **Federal Register** on November 30, 2005, by

[1] See, Formaldehyde Emissions from Composite Wood Products; Disposition of TSCA Section 21 Petition, 73 FR 36504 (June 27, 2008).

[2] See, Formaldehyde Emissions from Pressed Wood Products, Advance Notice of Proposed Rulemaking and Notice of Public Meetings, 73 FR 73620 (December 3, 2008).

requiring all water closets to be low consumption (1.6 gallons per flush) closets. This conforming amendment would conserve water and help assure the continued availability of adequate water supplies, as well as reduce wastewater flows.

The proposed rule would amend § 3280.603(b)(4), by adding a requirement that the installation instructions required by § 3280.306(b)(4) include a statement that any heat tape or pipe heating cable used be listed for use in manufactured homes. The proposed rule would further amend this section with regard to the requirements for the receptacle outlet for connection of the heat tape or pipe heating cable to conform with the amended provisions of § 3280.806(d).

The proposed rule would amend the table in 3280.604(b)(2), by incorporating standards for the installation of cross-linked polyethylene (PEX) plastic cold and hot water systems. This proposal would permit the use of PEX plastic piping as an alternate piping material to other materials that may currently be used to supply hot and cold water systems.

A new provision would be added in § 3280.607(b)(v) to require that shower, bath, and tub-shower combination valves be either balanced pressure, thermostatic, or a combination of mixing valves that conforms to the requirements of ASSE 1016–1996, Performance Requirements for Individual Thermostatic Pressure-Balancing and Combination Control for Bathing Facilities. These valves would be required to have handle position stops that are adjustable to a maximum setting of 120 °F to prevent scalding and burn injuries to occupants from very hot water. This proposed change would reduce the number of injuries and deaths resulting from tap water scald burns. Further, the Centers for Disease Control (CDC) and other organizations report that a majority of scald burn victims are young children whose injuries may have been prevented by the use of an anti-scald valve.[3] In addition, this proposed change would be consistent with International Residential Code requirements for Single and Two Family Dwellings.

The proposed rule would amend § 3280.607(b)(5)(ii) for the standpipe height required for laundry tubs from 30 inches to 42 inches above its trap and would require the standpipe to terminate in an accessible location no lower than the top of the clothes washing machine. This increase in standpipe height would be consistent with the International Residential Code requirements for Single and Two Family Dwellings and would prevent backflow and improve operation of clothes washers installed in manufactured homes.

The proposed rule would amend § 3280.609(a)(2), by allowing a two or three compartment sink, up to three individual sinks or up to three lavatories to be connected to one "P" trap, to be considered as a single fixture for the purposes of drainage and ventilation under certain circumstances. This proposal would allow more fixtures to be connected to one "P" trap than is currently permitted by the Standards and would be consistent with other residential model plumbing codes for similar three fixture configurations.

The proposed rule would amend § 3280.610(e), by permitting fixture drains that serve only a single lavatory fixture to be 1¼ inches in diameter. This proposed reduction in drain size for a single lavatory is not significant and would provide adequate drainage flow and venting for individual lavatory fixtures.

The proposed rule would amend the existing requirements for anti-siphon trap vent devices in § 3280.611(d), by redefining these devices as mechanical vents (see § 3280.602) and by expanding the requirements to also include gravity-operated mechanical vents (also known as air admittance valves). This proposal would allow manufacturers to use either type of mechanical vent (anti-siphon vent or air admittance valve) for venting of certain plumbing fixtures. The current standard allows the use of anti-siphon type vents only. In addition, paragraph (f) of this section would be expanded to permit vent terminals either through wall extensions or into mechanical vent devices.

H. Heating, Cooling, and Fuel Burning Systems

The proposed rule would amend § 3280.705(b), by allowing the use of corrugated stainless steel tubing (CSST) systems for use in gas piping systems. The inclusion of CSST piping as a permissible alternate gas piping/tubing material is currently permitted to be used in all other residential construction as a gas piping system by the model codes and state and local building codes. The proposed rule would require that CSST gas piping be installed in accordance with the requirements of ANSI/IAS LC–1–1997, Gas Piping Systems Using Corrugated Stainless Steel Tubing. In addition, a table for sizing CSST systems would be added in § 3280.705(d). Paragraph (h) of this section would also be amended by permitting CSST to be run inside walls, floors, partitions, and roofs under specified conditions.

Sections 3280.707(a) and (d) and 3280.714(a) would amend the energy efficiency and energy conservation requirements for comfort heating systems, water heaters, and cooling appliances so that they comply with the provisions of the National Appliance Energy Conservation Act of 1987, the current applicable requirements for these appliances.

Section 3280.715 would be amended by eliminating the use of Class 2 ducts and by deleting their definition from § 3280.703; by requiring manufacturers instructions to indicate that crossover ducts are not to be in contact with the ground and must be properly supported; and by requiring air supply crossover ducts in all Thermal Zones to have a minimal thermal resistance of R–8, unless installed in a basement. The proposed change to eliminate the use of Class 2 air handling ducts is consistent with the requirements of the International Residential Code for One and Two Family Dwellings, and would improve the fire safety and performance of air handling ducts by requiring the use of Class 0 or 1 ducts, which are more fire resistive than Class 2 ducts. In addition, HUD believes that Class 2 ducts are no longer being used in the production of manufactured homes. The proposal to increase the thermal resistance for crossover ducts would reduce heat loss and improve the energy efficiency of crossover ducts between sections of multi-section manufactured homes.

I. Electrical Systems

The proposed rule would amend § 3280.803 by indicating that a 1 ¼-inch maximum continuous raceway is to be used when installing a power supply cord within the wall from the bottom of the distribution panel to the underside of the floor. This proposed change and clarification is consistent with the current requirements of the National Electrical Code (NEC), NFPA 70–2005, which is currently incorporated by reference in the Manufactured Home Construction and Safety Standards. In addition, the requirements for installing service equipment in or on the home would be revised in paragraph (k)(3) of this section by referencing the appropriate articles of the NEC, NFPA 70–2005.

Section 3280.804(f) would be amended to require the distribution panelboard to be located in an

[3] Centers for Disease Control and Prevention and U.S. Department of Housing and Urban Development. *Healthy Housing Reference Manual*, Atlanta: U.S. Department of Health and Human Services, 2006.

accessible location and not located in a bathroom or clothes closet. This revision is consistent with requirements for acceptable locations for electrical distribution panels in residential model codes and the NEC.

The proposed rule would amend § 3280.805, by requiring all countertop outlets in the kitchen to be supplied by not less than two of the small appliance branch circuits. However, one or more of the small appliance branch circuits may also supply other receptacle outlets in the kitchen, pantry, dining room, and breakfast room. In addition, the proposed rule would amend paragraph (a)(3)(vi) of this section, by requiring that bathroom receptacle outlets be supplied by at least one 20 ampere branch circuit. While such circuits can have no other outlets, it is permissible to place the outlet for a heat tape or pipe heating cable on a bathroom circuit, provided that all of the bathroom outlets are on the load side of the ground fault circuit interrupter. These proposed changes would be consistent with the requirements in residential model codes and the NEC.

Section 3280.806(d) would be amended by not including receptacle outlets in the floor that are 18 inches or more from the wall as part of the required receptacle outlets for the room; by permitting the heat tape or pipe heating cable outlet to be on the bathroom circuit, provided that all bathroom outlets are on the load side of the ground fault circuit interrupter; and by requiring receptacles in any countertop to not be in a face-up position. These proposed changes would be consistent with the requirements in residential model codes and the NEC.

J. Revisions to Standards Incorporated by Reference (Reference Standards)

The following is a list of the standards incorporated by reference that would be revised by this proposed rule. Each reference standard is preceded with an indicator to identify the type of change being made. A new reference standard being added is indicated by the designation "N," while a reference standard being updated is indicated by the designation "U." The sections of the Construction and Safety Standards that would be amended by each modification are also shown on the right of each reference standard being added or updated.

K. Accessibility Requirements for Persons With Disabilities

In some situations, manufactured housing units which are subject to HUD's Manufactured Home Construction and Safety Standards may be provided through a program or activity that receives federal financial assistance from HUD. When this is the case, Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), and HUD's implementing regulations at 24 CFR part 8 would be applicable, including the requirements at 24 CFR 8.22 that address accessibility in new construction. However, these requirements are not applicable to any individual or buyer that obtains Federal Housing Administration financing when purchasing a manufactured housing unit. When working with a recipient of HUD funds, manufacturers must be prepared to produce manufactured housing units that meet the accessibility standards provided in 24 CFR part 8. There regulations currently incorporate

the Uniform Federal Accessibility Standards (UFAS) (see 24 CFR 8.32).

III. Findings and Certifications

Regulatory Planning and Review

The Office of Management and Budget (OMB) reviewed this rule under Executive Order 12866, *Regulatory Planning and Review.* This rule has been determined to be a "significant regulatory action," as defined in section 3(f) of the Order (although not an economically significant regulatory action, as provided under section 3(f)(1) of the Order).

As the preamble highlights, this rule proposes to amend several construction and safety standards under the National Manufactured Housing and Construction and Safety Standards Act of 1974. However, most of the proposed changes would codify existing practices or conform HUD standards to existing building codes. Only two standards included in this rule would have an impact on the production cost of manufactured homes: the requirement that shower and bath valves use anti-scald mixing valves, and the increase in minimum insulation levels for cross-under ducts.

Currently, producers of manufactured housing may use non-pressure balanced mixing valves in bathtubs and showers. The cost of non-pressure balanced mixing value generally totals $30 per valve. If this proposed requirement is adopted in the final rule, the per-unit cost to producers to purchase pressure balanced/anti-scald mixing valve would be $55, or an increase of $25 per valve. The average number of mixing valves is one per single-section home and two per multi-section home. Thus, the cost is $25 per single-section home and $50 per multi-section home.

The number of placements annually since 1999 and the projected annualized aggregate placements from January 2009 through August 2009 have decreased considerably. This trend continues through the latest data, which indicates that the annual rate of placements through August 2009 was 58,100. Of these, 20,900 were single-section homes, 36,000 were double- section homes, and the remaining 1,200 had more than two sections. Although this trend is expected to continue, so that annual placements continue to decrease, this analysis assumes annual production of 58,100. In addition, this analysis assumes that the cost of requiring the use of an anti-scald valve at the point of production of the home is less than installation at some later time. This assumption is based on the fact that replacing a mixing valve with an anti-scald valve at some later date would require the use of a licensed plumber for several hours to make the change and a higher cost to purchase the anti-scald valve(s) due to the volume purchasing power of manufacturers as compared to individual purchasers.

Accordingly, based on current annual placement rates, the total cost of the anti-scald valve requirement is $523,000 ($25 per home * 20,900 single-section homes). For multi-section homes, the total cost is $1.86 million ($50 per home * 37,000 multi-section homes). The combined cost totals $2.383 million.

The second cost comes from the increase in the minimum insulation levels for cross-under ducts. These ducts are used in multi-section homes to carry heat from one section to another. Thus, there is no cost increase for single-section homes. The cost per square foot of insulation for multi-section homes would increase from $1.25 per square foot of R–4 insulated cross-under duct to $3.50 per square foot of R–8 insulated cross-under duct, or $2.25 per square foot. On average there are 20 square feet of insulation needed per multi-section home. Thus, the total cost of increasing the minimum insulation level is $2.615 million ($2.25 per square foot * 20 square feet per home * 58,100 homes).

In estimating the benefits of these two requirements, HUD has considered that requiring anti-scald valves would reduce the number of injuries and deaths resulting from tap water scald burns. Although statistics specific to scald burns in manufactured homes are unavailable, according to Safe Kids, a nonprofit organization dedicated to preventing accidental childhood injury, hot tap water accounts for nearly 25 percent of all scald burns among children and is associated with more deaths and hospitalizations than any other hot liquid burns. Statistics reported by the CDC indicate that almost 3,000 people are hospitalized annually due to scald burns from tap water in the home.[4] The Safe Kids organization, however, reports that in 2002, 22,600 children received emergency room treatments for scald burns,[5] approximately 25 percent (5,560) coming from hot tap water. This analysis uses the CDC estimate of 3,000, which is a conservative estimate that represents the lower bound of scald injuries prevented.

The Safe Kids organization estimates that hospital costs for admitted scald burn patients average $22,700.[6] Although this estimate includes only children under the age of 14, this group comprises a large percentage of scald burn injuries. Finally, based on the number of occupied housing units in the 2007 American Housing Survey (AHS),[7] newly placed manufactured housing accounts for 0.05% of occupied housing units. If tap water scalds are evenly distributed across all housing units,[8] then 1.5 burns (3,000 total scald burns * 0.05% in newly-placed manufactured housing) could be prevented annually for annual savings of $35,744 (3,000 burn victims * 0.05% in manufactured homes * $22,700 in hospital costs).[9] OMB Circular A–94, which provides guidance on economic analyses required under Executive Order 12866, requires the present discounted value of annual benefits using alternative discount rates 3 percent and 7 percent. The discounted present value of savings from the use of anti-scald valves totals $1.227 million using the 3 percent rate and $0.546 million using the 7 percent rate. Note that using the Safe Kids estimate of 5,560 would increase these amounts to almost 3 scald burns and $66,246 in hospital care avoided annually. The discounted present value of savings assuming the higher estimate of burns totals $2.274 million using the 3 percent discount rate and $1.013 million using the 7 percent discount rate.

In addition to prevented injuries and hospitalizations, the anti-scald valve requirement will also reduce the number of deaths resulting from scald burns. Aside from the 3,000 to 5,560 scald burns occurring each year, the National Coalition to Prevent Childhood Injury estimates that approximately 100 deaths result from scald burns annually. As explained above, newly placed manufactured housing represents 0.05 percent of occupied housing units. Thus, if tap water scalds are evenly

[4] Centers for Disease Control and Prevention and U.S. Department of Housing and Urban Development. *Healthy Housing Reference Manual.* Atlanta: U.S. Department of Health and Human Services, 2006.

[6] National SAFE KIDS Campaign (NSKC). Burn Injury Fact Sheet. Washington (DC): NSKC, 2004.

[7] See 2007 AHS, Table 2–1.

[8] If state and local codes that regulate traditional "stick-built" housing predominantly require anti-scald valves, then this distribution may not be even across housing types. For this reason, manufactured homes may account for a larger than proportionate share of scald burns.

[9] Anti-scald valves decrease the maximum water temperature to 120 degrees. At this temperature, it would take 8 minutes of exposure to receive second-degree burns and 10 minutes for third-degree burns. While this does not completely eliminate the risk of scald burns, this risk does not need to be completely eliminated for benefits to be realized.

distributed across all housing units, then 0.05 burns annually, or one death every 20 years, would be prevented. Government estimates of the value of a human life range from $5 million used by the Consumer Product Safety Commission to $7.22 million used by the Environmental Protection Agency (EPA). Using the lower estimate of $5 million, the discounted present value of prevented deaths from the use of anti-scald valves totals $9.010 million using the 3 percent rate and $4.012 million using the 7 percent rate.

The insulation requirement will increase the energy efficiency of manufactured homes, which will decrease annual energy costs for homeowners. Based on estimates from the Department of Energy's Energy Gauge model, owners of multi-section homes, to which this requirement applies, would save approximately $3 in energy costs annually. Thus, the total annual benefit of this provision is $111,600 ($3 per home * 37,200 homes). Calculating the present value of the stream of benefits into the future yields a discounted present value of $3.832 million in energy savings using the 3 percent discount rate and $1.706 million using the 7 percent discount rate.

A summary of HUD's calculation of benefits from the anti-scald valve and insulation requirements follows:

BILLING CODE 4210–67–P

Benefits of Proposed Rule

Benefits of Anti-Scald Valve Requirement	
Value of Injuries Prevented	
Annual hospitalizations due to scald burns from tap water	3,000
New manufactured housing share of total occupied housing units	0.05%
Averge Cost of Scald Burn Victim	22,700
Annual Value of Benefits	**$35,744**
Discounted Present Value (3% Discount Rate)	**$1,227,178**
Discounted Present Value (7% Discount Rate)	**$546,358**
Value of Deaths Prevented	
Annual deaths due to scald burns from tap water	100
New manufactured housing share of total occupied housing units	0.05%
Value of life	5,000,000
Value of Benefits	**$262,438**
Discounted Present Value (3% Discount Rate)	**$9,010,323**
Discounted Present Value (7% Discount Rate)	**$4,011,532**

Benefits of Insulation Requirement			
	Single	**Multi**	**Total**
Number of Homes	20,900	37,200	58,100
Annual Savings per Home	0.00	3.00	
Annual Value of Benefits	**$0**	**$111,600**	**$111,600**
Discounted Present Value (3% Discount Rate)			**$3,831,566**
Discounted Present Value (7% Discount Rate)			**$1,705,872**

Discounted Present Value of Benefits of Rule		
	Discount Rate	
	3%	**7%**
Anti-Scald Valve Requirement	$10,237,502	$4,557,890
Injuries Prevented	*1,227,178*	*546,358*
Deaths Prevented	*9,010,323*	*4,011,532*
Insulation Requirement	3,831,566	1,705,872
Discounted Present Value of Benefits	**$14,069,068**	**$6,263,762**

BILLING CODE 4210–67–C

In summary, this proposed rule would impose costs equaling $4.057 million and create discounted present value of benefits totaling $6.264 million to $14.069 million, depending on the discount rate. Thus, the total impact of this rule, the sum of the total costs and benefits, equals between $10.321 million and $18.126 million annually. Consequently, the rule was determined not economically significant within the meaning of the Executive Order.

The docket file is available for public inspection in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202–402–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number through TTY by calling the Federal Information Relay Service at 800–877–8339.

Paperwork Reduction Act

The proposed modified information collection requirements contained in this proposed rule, at §§ 3280.510, 3280.511, 3280.804, and 3280.813, have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). In accordance with the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless the collection displays a currently valid OMB control number. OMB has issued HUD the control number 2502–0253 for the information collection requirements under the current Manufactured Housing Construction and Safety Standards Program.

The public reporting burden for this modified collection of information is estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. These proposed modifications to the existing heating and cooling certificates and two labels would result in no additional burden hours for completing the information collection currently accepted under control number 2502–0253.

In accordance with 5 CFR 1320.8(d)(1), HUD is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Interested persons are invited to submit comments regarding the information collection requirements in this proposal. Comments must refer to the proposal by name and docket number (FR–5221–P–01) and must be sent to:

HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; and

Reports Liaison Officer, Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, 451 7th Street, SW., Room 9116, Washington, DC 20410–8000.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 establishes requirements for federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments and the private sector. This rule will not impose any federal mandates on any state, local, or tribal government or the private sector within the meaning of the Unfunded Mandates Reform Act of 1995.

Environmental Review

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Finding of No Significant Impact is available for public inspection between the hours of 8 a.m. and 5 p.m. weekdays in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Room 10276, Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, please schedule an appointment to review the finding by calling the Regulations Division at 202–402–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number through TTY by calling the Federal Information Relay Service at 800–877–8339.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule would not have a significant economic impact on a substantial number of small entities. This rule would regulate establishments primarily engaged in making manufactured homes (NAICS 32991). The Small Business Administration's size standards define an establishment primarily engaged in making manufactured homes as small if it does not exceed 500 employees. Of the 222 firms included under this NAICS definition, 198 are small manufacturers that fall below the small business threshold of 500 employees. The proposed rule will apply to all of the manufacturers. The rule would thus affect a substantial number of small entities, but would not have a significant economic impact on these small entities.

Based on an analysis of the costs and the fact that a small manufacturer would just as likely produce homes at the higher end of the cost spectrum as would a major producer, evaluating the effect of the increase is not discernible based on the size of the manufacturing operation. For the reasons stated below, HUD knows of no instance of a manufacturer with fewer than 500 employees that would be economically affected significantly by this rule. As the preamble discusses, the overwhelming majority of the revisions to the Construction and Safety Standards proposed by this rule are directed to relieving burden on all manufacturers by having the Standards be consistent with current design and construction standards or state and local codes. Reducing the differences between the federal standards for design and construction of manufactured homes with current industry standards reduces burden for all manufacturers.

As discussed under the "Regulatory Planning and Review" section of this preamble, the annual economic impact of this rule is not significant, since the changes made by this rule are largely changes conforming to current industry practices and current building codes.

This assessment shows that this does not represent a significant economic effect on either an industry-wide or per-unit basis.

The relatively small increase in cost for the manufacturer associated with this proposed rule would not impose a significant burden on a small business for manufacturing homes that can cost the purchaser between $40,000 and $100,000. Therefore, although this rule would affect a substantial number of small entities, it would not have a significant economic impact on them. Therefore, the undersigned certifies that this rule will not have a significant impact on a substantial number of small entities.

Notwithstanding HUD's view that this rule will not have a significant economic effect on a substantial number of small entities, HUD specifically invites comments regarding this certification and any less burdensome alternatives to this rule that will meet HUD's objectives, as described in this preamble.

Executive Order 13132, Federalism

Executive Order 13132 (entitled "Federalism") prohibits an agency from publishing any rule that has federalism implications if the rule either: (i) Imposes substantial direct compliance costs on state and local governments and is not required by statute, or (2) preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Order. This proposed rule does not have federalism implications, within the meaning of the Executive Orders, and would not impose substantial direct compliance costs on state and local governments nor preempt state law within the meaning of the Order.

IV. Incorporation by Reference

Before HUD issues a final rule, these reference standards will be approved by the Director of the Federal Register for incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of these standards may be obtained from the following organizations:

AAMA—American Architectural Manufacturers Association, 1540 East Sundee Road, Palatine, Illinois 60067. *http://www.aamanet.org.*

ANSI—American National Standards Institute, 11 West 42nd Street, New York, New York 10036, (212) 642–4900, fax number (212) 398–0023, *http://www.ansi.org.*

APA—The Engineered Wood Association, 7011 South 19th Street, Tacoma, Washington 98411, (253) 565–6600, fax number (253) 565–7265, *http://www.apawood.org.*

ASSE—American Society of Sanitary Engineering, PO Box 40362, Bay Village, Ohio 44140, (216) 835–3040, fax number (216) 835–3488, *http://www.asse-plumbing.org.*

ASTM—American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, Pennsylvania 19428, (610) 832–9500, fax number (610) 832–9555, *http://www.astm.org.*

CSA (IAS)—CSA International (formerly International Approval Services), 8501 East Pleasant Valley Road, Cleveland, Ohio 44131, (216) 524–4990, fax number (216) 642–3463, *http://www.csa-international.org.*

WDMA—Window & Door Manufacturers Association, 1400 East Touhy Avenue, Des Plaines, Illinois 60018, (847) 299–5200, fax number (847) 299–1286, *http://www.wdma.com.*

List of Subjects in 24 CFR Part 3280

Housing standards, Manufactured homes.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number for Manufactured Housing Construction and Safety Standards is 14.171.

Accordingly, for the reasons stated in the preamble, HUD proposes to amend 24 CFR part 3280 as follows:

PART 3280—MANUFACTURED HOME CONSTRUCTION AND SAFETY STANDARDS

1. The authority citation for part 3280 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 5403, and 5424.

2. In § 3280.4, revise paragraph (a) and add a reference to RADCO in alphabetical order under paragraph (b) to read as follows:

§ 3280.4 Incorporation by reference.

(a) The specifications, standards, and codes of the following organizations are incorporated by reference. Reference standards have the same force and effect as the standards in this part. Where two or more referenced standards are equivalent in application, the manufacturer has the option to incorporate into the manufactured home design and construction the referenced standard of its choosing. When reference standards and the standards in this part are inconsistent, however, the requirements of this part must prevail to the extent of the inconsistency.

(b) * * *

RADCO—Resources, Applications, Designs, & Controls, 3220 East 59th Street, Long Beach, California 90805.

* * * * *

3. In § 3280.105, revise paragraphs (a)(2)(iv) and (b)(2) to read as follows:

§ 3280.105 Exit facilities; exterior doors.

(a) * * *

(2) * * *

(iv) One of the required exit doors must be accessible from the doorway of each bedroom without traveling more than 35 feet. The travel distance to the exit door must be measured on the floor or other walking surface along the center-line of the natural and unobstructed path of travel starting at the center of the bedroom door, curving around any corners or permanent obstructions with a one foot clearance from, and ending at, the center of the exit door.

(b) * * *

(2) All exterior swinging doors must provide a minimum 28-inch wide x 74-inch high clear opening. Door seals are permitted to reduce the opening, either vertically or horizontally, a maximum of one inch. All exterior sliding glass doors must provide a minimum 28-inch wide x 72-inch high clear opening.

* * * * *

4. Revise § 3280.111 to read as follows:

§ 3280.111 Toilet compartments.

Each toilet compartment must have a minimum width of 30 inches, with a minimum clear space of 21 inches in front of each toilet. A toilet located adjacent to a wall must have the center-line of the toilet located a minimum of 15 inches from the wall. A toilet located adjacent to a tub must have the center-line of the toilet located a minimum of 12 inches from the outside edge of the tub.

5. Amend § 3280.113 by revising paragraph (b) and adding new paragraphs (c) and (d) to read as follows:

§ 3280.113 Glass and glazed openings.

* * * * *

(b) *Hazardous locations requiring safety glazing.* Except as provided in paragraph (d) of this section, the following locations and areas require the use of safety glazing conforming to the requirements of paragraph (c) of this section:

(1) Glazing in all entrance or exit doors;

(2) Glazing in fixed and sliding panels of sliding glass doors;

(3) Glazing in storm type doors;

(4) Glazing in unframed side-hinged swinging doors;

(5) Glazing in doors and fixed panels less than 60 inches above the room floor level that enclose bathtubs, showers, hydromassage tubs, hot tubs, whirlpools, saunas;

(6) Glazing within 12 inches horizontally, as measured from the edge of the door in the closed position, and 60 inches vertically as measured from the room floor level, adjacent to and in the same plane of a door;

(7) Glazing within 36 inches of an interior room walking surface when the glazing meets all of the following:

(i) Individual glazed panels exceed 9 square feet in area in an exposed surface area;

(ii) The bottom edge of the exposed glazing is less than 19 inches above the room floor level; and

(iii) The top edge of the exposed glazing is greater than 36 inches above the room floor level.

(8) Glazing in rails and guardrails; and

(9) Glazing in unbacked mirrored wardrobe doors (*i.e.,* mirrors that are not secured to a backing that is capable of being the door itself).

(c) Safety glazing material is considered to be any glazing material capable of meeting the requirements of CPSC 16 CFR part 1201, or the Safety Performance Specifications and Methods of Test for Safety Glazing Materials Used in Buildings, ANSI Z97.1–1984.

(d) Glazing in the following locations is not required to meet the requirements in paragraph (b) of this section:

(1) Openings in doors through which a 3-inch sphere is unable to pass;

(2) Leaded and decorative glazed panels;

(3) Glazing in jalousie type doors;

(4) Glazing as described in paragraph (b)(6) of this section when an intervening wall or other permanent barrier exists between the door and the glazing;

(5) Glazing as described in paragraph (b)(7) of this section when a protective bar or member is installed horizontally between 34 inches and 38 inches above the room floor level, as long as the bar or member is a minimum of 1½ inches in height and capable of resisting a horizontal load of 50 pounds per lineal foot; and

(6) Mirrors mounted on a flush door surface or solid wall surface.

6. In § 3280.204, revise paragraph (c) to read as follows:

§ 3280.204 Kitchen cabinet protection.

* * * * *

(c) *Alternative compliance.* When all exposed surfaces along the bottoms and sides of combustible kitchen cabinets are protected as described in paragraph (a) of this section, the metal hood, the 5⁄16-inch thick gypsum board or equivalent material, and the 3⁄8-inch airspace required by paragraph (a) of this section can be omitted, provided that:

(1) A microwave oven is installed between the cabinet and the range; and

(2) The microwave oven is equivalent in fire protection to the metal range hood required by paragraph (a) of this section; and

(3) The microwave oven is certified to be in conformance with Microwave Cooking Appliances, UL 923–2002.

* * * * *

§§ 3280.207 through 3280.209 [Redesignated as §§ 3280.208 through 3280.210]

7. Redesignate §§ 3280.207 through 3280.209 as §§ 3280.208 through 3280.210, respectively.

8. Add a new § 3280.207 to read as follows:

§ 3280.207 Requirements for thermal insulating materials.

(a) *General.* Except for foam plastic materials and as provided in this section, exposed and concealed thermal insulating materials, including any facings, must be tested in accordance with NFPA 255–96, Standard Method of Test of Surface Burning Characteristics of Building Materials, and must have a flame spread index of 25 or less and a smoke developed index of 450 or less. The flame spread and smoke developed limitations do not apply to:

(1) Coverings and facings of insulation batts or blankets installed in concealed spaces when the facings are in substantial contact with the unexposed surface of wall, floor, or ceiling finish; or

(2) Cellulose loose-fill insulation that complies with paragraph (b) of this section.

(b) *Loose-fill insulation.* (1) Cellulose loose-fill insulation that is not spray applied or self-supporting must comply with, and each package must be labeled in accordance with, the Consumer Product Safety Commission requirements in 16 CFR parts 1209 and 1404.

(2) Other loose-fill insulation that cannot be mounted in the NFPA 255–96 test apparatus without a screen or other artificial support must be tested in accordance with CAN/ULC–S102.2–M88, Standard Method of Test for Surface Burning Characteristics of Flooring, Floor Covering, and Miscellaneous Materials and Assemblies, and must have a flame spread index of 25 or less and a smoke developed index of 450 or less.

(c) *Attic locations.* Exposed insulation installed on the floor or ceiling forming the lower boundary of the attic must be tested in accordance with NFPA 253–2000, Standard Method of Test for Critical Radiant Flux of Floor Covering Systems Using a Radiant Heat Energy Source, and must have a critical radiant flux of not less than 0.12 watt/cm^2.

9. Revise § 3280.301 to read as follows:

§ 3280.301 Scope.

This subpart covers the minimum requirements for materials, products, equipment, and workmanship needed to assure that the manufactured home will provide the following:

(a) Structural strength and rigidity;

(b) Protection against corrosion, decay, insects, rodents, and other similar destructive forces;

(c) Protection against wind hazards;

(d) Resistance to the elements; and

(e) Durability and economy of maintenance.

10. In § 3280.304(b)(1), in the list under the undesignated heading "Wood and Wood Products":

a. Revise the references to "Design and Fabrication of Glued Plywood-Lumber Beams," "Design and Fabrication of Plywood Sandwich Panels," and "Design and Fabrication of Plywood Stressed Skin Panels;"

b. Remove the reference to "Voluntary Product Standards, Performance Standard for Wood-Based Structural Use Panels," and add in its place a reference to "Performance Standards for Wood-Based Structural Use Panels"; and

c. Add new reference standards for "Engineered Wood Construction Guide" and for "Medium Density Fiberboard (MDF)," immediately preceding the undesignated heading "Other".

The revisions and additions read as follows:

§ 3280.304 Materials.

* * * * *

(b)(1) * * *

Wood and Wood Products

* * * * *

Design and Fabrication of Glued Plywood-Lumber Beams, Suppl. 2—APA–S 812R, 1998.

* * * * *

Design and Fabrication of Plywood Sandwich Panels—APA–U814 H, 1993.

Performance Standard for Wood-Based Structural Use Panels—PS 2–04, 2005.

Design and Fabrication of Plywood Stressed-Skin Panels, Suppl. 3—APA–U 813L, 1996.

* * * * *

Engineered Wood Construction Guide—APA, 2001.

Medium Density Fiberboard (MDF)—ANSI A208.2–1999.

* * * * *

11. In § 3280.305, revise paragraphs (c)(1)(i), (c)(2)(iv), and (c)(3)(ii) to read as follows:

§ 3280.305 Structural design requirements.

* * * * *

(c) * * *

(1) * * *

(i) *Standard wind loads (Zone I).* When a manufactured home is not designed to resist the wind loads for high wind areas (Zone II or Zone III) specified in paragraph (c)(1)(ii) of this section, the manufactured home and each of its wind-resisting parts and portions must be designed for horizontal wind loads of not less than 15 psf and a net uplift roof load of not less than 9 psf. The net uplift roof load must not be reduced by the dead load of the roof structure for the purposes of engineering design or structural load testing.

* * * * *

(2) * * *

(iv) *Consideration of Local Requirements.* For areas where wind mapping data or records or the requirements of the State or local authority indicate wind speeds in excess of those identified in this section, the Department may establish, through rulemaking, more stringent requirements for manufactured homes to be installed in such areas.

* * * * *

(3) * * *

(ii) *Consideration of Local Requirements.* For exposures in areas (mountainous or other) where recognized snow records, wind records, or the requirements of the State or local authority indicate significant differences from the loads stated in this paragraph (c)(3), the Department may establish, through rulemaking, more stringent requirements for manufactured homes to be installed in such areas. For snow loads, such requirements must be based on a roof snow load of 0.6 of the ground snow load for areas exposed to wind and a roof snow load of 0.8 of the ground snow load for sheltered areas.

* * * * *

12. In § 3280.306, revise paragraphs (b)(2)(v) and (g)(2) to read as follows:

§ 3280.306 Windstorm protection.

* * * * *

(b) * * *

(2) * * *

(v) That anchoring equipment should be certified by a registered professional engineer or architect to resist these specified forces in accordance with testing procedures in ASTM D3953, Standard Specification for Strapping, Flat Steel and Seals, 1997.

(g) * * *

(2) Type 1, Finish B, Grade 1 steel strapping, 1¼ inches wide and 0.035 inches in thickness, certified by a registered professional engineer or architect as conforming with ASTM D3953, Standard Specification for Strapping, Flat Steel and Seals, 1997.

13. In § 3280.308, revise paragraph (a)(2), and add paragraphs (a)(3) and (a)(4) to read as follows:

§ 3280.308 Formaldehyde emission controls for certain wood products.

(a) * * *

(2) Particleboard used as flooring materials must not emit formaldehyde in excess of 0.20 parts per million (ppm), as measured by the air chamber test specified in § 3280.406.

(3) Particleboard materials used in applications other than flooring must not emit formaldehyde in excess of 0.30 ppm, as measured by the air chamber test specified in § 3280.406.

(4) Medium Density Fiberboard (MDF) must not emit formaldehyde in excess of 0.3 ppm, as measured by the air chamber test specified in § 3280.406.

* * * * *

14. In § 3280.403, revise the section heading, revise paragraph (a), redesignate paragraph (b) as (b)(1), add paragraph (b)(2), revise paragraph (c), and add paragraph (e)(3) to read as follows:

§ 3280.403 Requirements for windows, sliding glass doors, and skylights.

(a) *Scope.* This section establishes the requirements for prime windows and sliding glass doors, except that windows used in an entry door are components of the door and are excluded from these requirements.

(b) * * *

(2) All skylights must comply with AAMA/WDMA 1600/I.S 7–00, Voluntary Specifications for Skylights. Skylights must withstand the roof loads for the applicable Roof Load Zone specified in § 3280.305(c)(3), and the following wind loads:

(i) For Wind Zone I, the wind loads specified in § 3280.305(c)(1)(i); and

(ii) For Wind Zones II and III, the wind loads specified for exterior roof coverings, sheathing, and fastenings in § 3280.305(c)(1)(ii).

(c) *Installation.* All primary windows, sliding glass doors, and skylights must be installed in a manner that allows proper operation and provides protection against the elements, as required by § 3280.307.

* * * * *

(e) * * *

(3) All skylights installed in manufactured homes must be certified as complying with AAMA/WDMA 1600/I.S 7–00, Voluntary Specifications for Skylights. This certification must be based on applicable loads specified in paragraph (b) of this section.

* * * * *

15. In § 3280.404, revise paragraph (c)(2) and add paragraph (c)(3) to read as follows:

§ 3280.404 Standard for egress windows and devices for use in manufactured homes.

* * * * *

(c) * * *

(2) An operational check of each installed egress window or device must be made at the manufactured home factory. All egress windows and devices must be capable of being opened to the minimum required dimensions by normal operation of the window without binding or requiring the use of tools. Any window or device failing this check must be repaired or replaced. A repaired window must conform to its certification. Any repaired or replaced window or device must pass the operational check.

(3) Windows that require the removal of the sash to meet egress size requirements are prohibited.

* * * * *

16. Revise § 3280.503 to read as follows:

§ 3280.503 Materials.

Materials used for insulation and the thermal and pressure envelopes must be of proven effectiveness and adequate durability to ensure that required design conditions concerning thermal transmission and energy conservation are attained.

17. In § 3280.504, redesignate existing paragraph (c) as paragraph (d) and add new paragraph (c) to read as follows:

§ 3280.504 Condensation control and installation of vapor retarders.

* * * * *

(c) *Liquid Applied Vapor Retarders.* Each liquid applied vapor retarder must

be tested by a nationally recognized testing agency for use on the specific substrate to which it is applied. The test report must include the perm rating, as measured by ASTM E 96–95, Standard Test Methods for Water Vapor Transmission of Materials, and associated application rate for each specific substrate.

* * * * *

18. In § 3280.505, revise paragraph (a) to read as follows:

§ 3280.505 Air infiltration.

(a) *Envelope air infiltration.* The pressure envelope must be designed and constructed to limit air infiltration to the living area of the home. Any design, material, method, or combination thereof that accomplishes this goal may be used. The goals of the infiltration control criteria are to reduce heat loss/heat gain due to infiltration, limit moisture transfer that causes condensation, and reduce draft that causes comfort problems.

* * * * *

19. In § 3280.506, revise paragraph (c) to read as follows:

§ 3280.506 Heat loss/heat gain.

* * * * *

(c) Manufactured homes designed for Uo Value Zone 3 must be factory-equipped with storm windows or insulating glass. Interior mounted storm window frames must be sealed.

20. In § 3280.508, revise paragraph (c) to read as follows:

§ 3280.508 Heat loss, heat gain, and cooling load calculations.

* * * * *

(c) Areas where the insulation does not fully cover a surface or is compressed must be accounted for in the U-calculation. (See § 3280.506.) The effect of framing on the U-value must be included in the Uo calculation. Other low-R-value heat-flow paths (“thermal shorts”) must be explicitly accounted for in the calculation of the transmission heat loss coefficient if, in the aggregate, all types of low-R-value paths amount to more than one percent of the total exterior surface area, or 40 square feet, whichever is less. Areas will be considered low-R-value heat-flow paths if both of the following apply:

(1) They separate conditioned and unconditioned space; and

(2) They are not insulated to a level that is at least one-half the nominal insulation level of the surrounding building component.

* * * * *

21. In § 3280.509, revise paragraph (c) to read as follows:

§ 3280.509 Criteria in absence of specific data.

* * * * *

(c) *Insulation compression.* Insulation compressed to less than nominal thickness and loose-fill insulation in sloping cavities must have its nominal R-values reduced in compressed areas in accordance with the following table:

TABLE TO § 3280.509(C)—EFFECT OF INSULATION COMPRESSION AND RESTRICTION ON *R*-VALUES

Original thickness %	Non-uniform (a) restriction		Uniform (b) compression	Original thickness %	Non-uniform (a) restriction		Uniform (b) compression
	Batt (%)	Blown (%)	Batt (%)		Batt (%)	Blown (%)	Batt (%)
0	20	15	0				
1	26	21	1	51	81	73	62

35	72	62	45	85	95	92	90
36	72	63	47	86	95	93	91

TABLE TO § 3280.509(C)—EFFECT OF INSULATION COMPRESSION AND RESTRICTION ON *R*-VALUES—Continued

Original thickness %	Non-uniform (a) restriction		Uniform (b) compression	Original thickness %	Non-uniform (a) restriction		Uniform (b) compression
	Batt (%)	Blown (%)	Batt (%)		Batt (%)	Blown (%)	Batt (%)
37	73	63	48	87	96	93	91
38	74	64	49	88	96	94	92
39	74	65	50	89	96	94	93
40	75	65	51	90	97	95	93
41	75	66	52	91	97	95	94
42	76	67	53	92	97	96	95
43	76	68	54	93	98	96	95
44	77	68	55	94	98	97	96
45	78	69	56	95	98	97	97
46	78	70	57	96	99	98	97
47	79	70	58	97	99	98	98
48	79	71	59	98	99	99	99
49	80	71	60	99	100	99	99
50	80	72	61	100	100	100	100

Note: To use this table, first compute the restricted insulation thickness as a fraction of the uncompressed (full) insulation thickness. Then look up the *R*-value remaining from the appropriate column (Non-uniform Restriction, Batt Non-uniform Restriction, Blown or Uniform Compression, Batt). Example: Assume a section of loose-fill ceiling insulation went from *R*-25 insulation at a height of 10 inches to a minimum height of 2 inches at the edge of the ceiling. The ratio of minimum to full thickness is 0.20 (2 divided by 10). Look up 0.20 (20 percent), read across to column 3 (Non-uniform Restriction, Blown), and read 50 percent. Therefore, the *R*-value of the loose-fill insulation over the restricted area would be *R*-12.5 (50 percent of 25).

(a) Non-uniform restriction is that which occurs between non-parallel planes, such as in the ceiling near the eaves.

(b) Uniform compression is compression between parallel planes, such as that which occurs in a wall.

* * * * *

22. In § 3280.510, revise paragraphs (b) and (c) to read as follows:

§ 3280.510 Heat loss certificate.

* * * * *

(b) *Outdoor temperature.* The heating certificate must indicate the lowest outdoor temperature at which the installed heating equipment will maintain a 70°F temperature inside the home.

(c) *Text of certificate.*

HEATING CERTIFICATE

Home Manufacturer _____
Plant Location _____
Home Model _____

(Include Uo Value Zone Map)

This manufactured home has been thermally insulated to conform with the requirements of the Federal Manufactured Home Construction and Safety Standards for all locations within Uo Value.

Zone. _____
Heating Equipment Manufacturer _____
Heating Equipment Model _____

The above heating equipment has the capacity to maintain an average 70 °F temperature in this home at outdoor temperatures of ____ °F.

* * * * *

23. In § 3280.511, revise paragraphs (a)(1) and (a)(2) to read as follows:

§ 3280.511 Comfort cooling certificate and information.

(a) * * *

(1) *Alternative 1.* If a central air conditioning system is provided by the home manufacturer, the heat gain calculation necessary to properly size the air conditioning equipment must be made in accordance with the procedures outlined in Chapter 27 of the 1997 ASHRAE Handbook of Fundamentals, with an assumed location and orientation. The following must be supplied in the Comfort Cooling Certificate:

Air Conditioner Manufacturer _____
Air Conditioner Model _____

Certified Capacity ____, BTU/hour in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards.

The central air conditioning system provided with this home has been sized, assuming an orientation of the front (hitch end) of the home facing ____, and is designed on the basis of a 75 °F indoor temperature and an outdoor temperature of __ °F dry bulb and __ °F wet bulb.

Alternative 1

Comfort Cooling Certificate Example

Manufactured Home Manufacturer: _____
Plant Location: _____
Manufactured Home Model: _____
Air Conditioner Manufacturer: _____

Certified capacity ____ BTU/hour, in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards.

The central air conditioning system provided with this home has been sized, assuming an orientation of the front (hitch end) of the home facing _____. On this basis, the system is designed to maintain an indoor temperature of 75 °F when the outdoor temperatures are ____ °F dry bulb and ____ °F wet bulb.

The temperature to which this home can be cooled will change depending upon the amount of exposure of the windows of this home to the sun's radiant heat. Therefore, the home's heat gains will vary depending upon its orientation to the sun and any permanent shading provided. Information concerning the calculation of the cooling loads at various locations, window exposures, and shadings is provided in Chapter 27 of the 1997 ASHRAE Handbook of Fundamentals.

(2) *Alternative 2.* For each home suitable for a central air conditioning system but in which such a system is not installed, the manufacturer must provide the following statement: "The air distribution system of this home is suitable for the installation of a central air conditioning system." The Comfort Cooling Certificate required by paragraph (a) of this section must include the information provided in the following:

Comfort Cooling Certificate

Manufactured Home Manufacturer: _____
Plant Location: _____
Manufactured Home Model:

The air distribution system of this home is suitable for the installation of central air conditioning.

The supply air duct system installed in this home is sized for a manufactured home central air conditioning system of up to ____ BTU/Hr. This size assumes the air conditioner uses air circulators rated at 0.3 inch water column static pressure or greater for the cooling air delivered to the manufactured home supply air duct system.

* * * * *

24. In § 3280.602, remove the definition for *Anti-siphon trap vent device* and add a new definition for *Mechanical trap vent device* in alphabetical order as follows:

§ 3280.602 Definitions.

* * * * *

Mechanical trap vent device means a device that automatically opens to admit air to a fixture drain above the connection of the trap arm so as to prevent siphonage, and closes tightly when the pressure within the drainage system is equal to or greater than atmospheric pressure so as to prevent the escape of gases from the drainage system into the manufactured home.

* * * * *

25. In § 3280.603, revise paragraphs (a)(2), (b)(4)(ii), and (b)(4)(iii) to read as follows:

§ 3280.603 General requirements.

(a) * * *

(2) *Conservation.* Each water closet must not use more than 1.6 gallons of water per flush.

* * * * *

(b) * * *

(4) * * *

(ii) A statement in the installation instructions required by § 3280.306(b), stating that if the heat tape or pipe heating cable is used, it must be listed for use with manufactured homes.

(iii) A receptacle outlet complying with § 3280.806(d)(10).

* * * * *

26. In § 3280.604(b)(2), in the list under the undesignated heading "Plastic Pipe and Fittings," add new reference standards for "Standard Specification for Crosslinked Polyethylene (PEX) Tubing," and "Standard Specification for Crosslinked Polyethylene (PEX) Plastic Hot- and Cold-Water Distribution Systems," immediately before the undesignated heading "Miscellaneous," to read as follows:

§ 3280.604 Materials.

* * * * *

(b) * * *

(2) * * *

* * * * *

Standard Specification for Crosslinked Polyethylene (PEX) Tubing—ASTM F876–1993.

Standard Specification for Crosslinked Polyethylene (PEX) Plastic Hot- and Cold-Water Distribution Systems—ASTM F877–1995.

* * * * *

27. In § 3280.605, redesignate paragraphs (a)(1) through (a)(7), as paragraphs (b) through (h); in newly redesignated paragraph (h), further redesignate paragraphs (i) and (ii) as paragraphs (h)(1) and (h)(2); and revise newly redesignated paragraph (h)(1) to read as follows:

§ 3280.605 Joints and connections.

* * * * *

(h) * * *

(1) Approved or listed hub-less pipe and fittings must be permitted to be joined with listed couplings or adapters, per the manufacturer's recommendations.

* * * * *

28. In § 3280.606, revise paragraph (a)(2) to read as follows:

§ 3280.606 Traps and cleanouts.

(a) * * *

(2) *Combination fixtures.* For the purposes of drainage and ventilation requirements, a two- or three-compartment sink, up to three single sinks, or up to three lavatories may be connected to one "P" trap and considered as a single fixture, so long as the sinks and lavatories are in the same room, have waste outlets not more than 30 inches apart, and have flood level rims at the same level. The "P" trap must be installed at the center fixture when three such fixtures are installed.

* * * * *

29. In § 3280.607, revise paragraphs (a)(3), (b)(2)(v), (b)(4)(i), (b)(5)(ii), and (c)(6)(i) through (c)(6)(iii), and add new paragraph (b)(3)(v) to read as follows:

§ 3280.607 Plumbing fixtures.

(a) * * *

(3) *Fixture Connections.* Fixture tailpieces and continuous wastes in exposed or accessible locations must be of not less than No. 20 Brown and Sharpe gauge seamless drawn-brass tubing or other approved pipe or tubing materials. Inaccessible fixture connections must be constructed according to the requirements for drainage piping. The diameter of each fixture tailpiece, continuous waste, or waste and overflow must be not less than:

(i) 1½ inches, for sinks of two or more compartments, dishwashers, clothes washing machines, laundry tubs, bathtubs, and showers; and

(ii) Not less than 1¼ inches for lavatories or single compartment sinks having a 2-inch maximum drain opening.

* * * * *

(b) * * *

(2) * * *

(v) *Floor Connection.* Water closets must be securely bolted to an approved flange or other approved fitting that is secured to the floor by means of corrosion-resistant screws. The bolts must be of solid brass or other corrosion-resistant material and must not be less than ¼ inch in diameter. A watertight seal must be made between the water closet and flange or other approved fitting by use of a gasket, sealing compound, or listed connector device.

(3) * * *

(v) Shower, bathtub, and tub-shower combination valves must be balanced pressure, thermostatic, or combination mixing valves that conform to the requirements of ASSE 1016–1996, Performance Requirements for Individual Thermostatic Pressure Balancing and Combination Control for Bathing Facilities. Such valves must be equipped with handle position stops that are adjustable in accordance with the valve manufacturer's instructions to a maximum setting of 120 °F.

(4) * * *

(i) A dishwashing machine must discharge its waste through a fixed air gap installed above the machine; through a high loop as specified by the dishwashing machine manufacturer; or into an open standpipe receptor with a height greater than the washing compartment of the machine. When a standpipe is used, it must be at least 18 inches, but not more than 30 inches, above the trap weir. The drain connections from the air gap or high loop are permitted to connect to an individual trap to a directional fitting installed in the sink tailpiece or to an opening provided on the inlet side of a food waste disposal unit.

* * * * *

(5) * * *

(ii) Standpipes must be either 1½ inch diameter minimum nominal iron pipe size, 1½ inch diameter nominal brass tubing of not less than No. 20 Brown and Sharp gauge, or 1½ inch diameter approved plastic materials. Receptors must discharge into a vented trap or must be connected to a laundry tub appliance by means of an approved or listed directional fitting. Each standpipe must extend not less than 18 inches or more than 42 inches above its trap and must terminate in an accessible location no lower than the top of the clothes washing machine. A removable, tight fitting cap or plug must be installed on the standpipe when the clothes washer is not provided.

* * * * *

(c) * * *

(6) *Hydromassage Bathtub.* (i) *Access panel.* A door or panel of sufficient size must be installed to provide access to the pump for repair or replacement.

(ii) *Piping drainage.* The circulation pump must be accessibly located above the crown weir of the trap. The pump drain line must be properly sloped to drain the volute after fixture use.

(iii) *Piping.* Hydromassage bathtub circulation piping must be installed to be self-draining.

* * * * *

30. In § 3280.609, revise paragraphs (b)(7) and (b)(8) to read as follows:

§ 3280.609 Water distribution systems.

* * * * *

(b) * * *

(7) *Hose bibbs.* When provided, all exterior hose bibbs and laundry sink hose connections must be protected by a listed nonremovable backflow prevention device. This requirement is not applicable to hose connections provided for automatic washing machines with built-in backflow prevention or water heater drain valves.

(8) *Flushometer tanks.* Flushometer tanks must be equipped with an approved air gap or vacuum breaker assembly that is located above the flood level rim above the fixture.

* * * * *

31. In § 3280.610, revise paragraphs (b)(1) and (e) to read as follows:

§ 3280.610 Drainage systems.

* * * * *

(b) * * *

(1) *Pipe.* Drainage piping must be standard weight galvanized steel, brass, copper tube DWV, listed Scheduled 40 ABS plastic, listed Scheduled 40 PVC plastic, cast iron, or other listed or approved materials.

* * * * *

(e) *Size of drainage piping.* Fixture drains must be sized as follows:

(1) Fixture drains serving a single lavatory must be a minimum of 1¼ inches in diameter.

(2) Fixture drains serving two or three fixtures must be a minimum of 1½ inches in diameter.

(3) Fixture drains serving four or more fixtures that are individually vented must be a minimum of 2 inches in diameter.

(4) Fixture drains for water closets must be a minimum of 3 inches in diameter.

* * * * *

32. In § 3280.611, revise paragraphs (b)(1), (d), and (f), to read as follows:

§ 3280.611 Vents and venting.

* * * * *

(b) * * *

(1) *Pipe.* Vent piping must be standard weight galvanized steel, brass, copper tube DWV, listed Scheduled 40 ABS plastic, listed Scheduled 40 PVC plastic, cast iron, or other listed or approved materials.

* * * * *

(d) *Mechanical Vents.* Where mechanical vents are used as a secondary vent system for plumbing fixtures that are protected by traps, the mechanical vents must comply with paragraphs (d)(1) or (d)(2) of this section.

(1) Spring-operated mechanical (anti-siphon) vents must comply with the following:

(i) No more than two fixtures individually protected by the spring-operated mechanical vent may be drained by a common 1½ inch diameter drain.

(ii) The drain size for three or more fixtures individually protected by a spring-operated mechanical vent must be at least 2 inches in diameter.

(iii) Spring-operated mechanical vents are restricted to venting fixtures with 1½ inch traps.

(iv) A spring-operated mechanical vent must be installed in a location that allows a free flow of air and is accessible for inspection, maintenance, and replacement. The sealing function must be at least 6 inches above the top of the trap arm.

(v) Materials for the spring-operated mechanical vents must be as follows:

(A) Cap and housing must be listed acrylonitrile-butadiene-styrene, DWV grade;

(B) Stem must be DWV grade nylon or acetal;

(C) Spring must be stainless steel wire, Type 302; and

(D) Sealing disc must be either:

(*1*) Neoprene, conforming to CISPI–HSN–85, Specification for Neoprene Rubber Gaskets for HUB and Spigot Cast Iron Soil Pipe and Fittings, and to ASTM C 564–97, Standard Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings; or

(*2*) Other material, conforming to ASTM C 920–2002, Standard Specification for Elastomeric Joint Sealants, and to ASTM D 4635–2001, Standard Specification for Polyethylene Films Made from Low-Density Polyethylene for General Use and Packaging Applications.

(2) Gravity-operated mechanical (air admittance valves) vents must comply with the following:

(i) Where installed to vent any fixture, the drain system must have a minimum 1½ inch diameter vent that terminates outside the manufactured home.

(ii) Where gravity-operated mechanical vent devices terminate in the attic cavity, the following requirements must be met:

(A) The attic cavity must be accessible.

(B) The sealing device must be installed a minimum of 6 inches above the insulation materials.

(C) The attic must be vented in accordance with § 3280.504(c)(1)(i).

(3) Mechanical vents must be installed in accordance with the vent manufacturer's instructions.

* * * * *

(f) *Vent terminal.* Vents must terminate through the roof or wall, or to a mechanical vent device in accordance with paragraph (d) of this section.

(1) *Roof extension.* Each vent pipe must extend through its flashing and terminate vertically. Vents that extend through the roof must extend undiminished in size, not less than 2 inches above the roof. Vent openings must be at least 3 feet away from any motor-driven air intake that opens into any habitable area.

(2) *Wall extensions.* Extensions through exterior walls must terminate downward, have a screen to prevent entrance of birds and rodents, and be located as follows:

(i) Extensions must not be located beneath a door, window, or other opening;

(ii) Extensions must be a minimum of 10 feet above the finished floor;

(iii) Extensions must be located a minimum of 2 feet above any building opening that is within 10 feet horizontally of any extension; and

(iv) Extensions must not terminate under an overhang with soffit vents.

(3) *Flashing.* The opening around each vent pipe shall be made watertight by an adequate flashing or flashing material.

* * * * *

33. In § 3280.702, revise the definitions of "Class 0 air ducts," "Class 1 air ducts," "Heating appliance," and "Water heater;" remove the definitions of "Class 2 air ducts" and "Energy Efficiency Ratio (EER);" and add definitions of "Combination space heating and water heating appliance," "Direct-vent system," and "Direct-vent system appliance" in alphabetical order, as follows:

§ 3280.702 Definitions.

* * * * *

Class 0 air ducts and air connectors means air ducts and air connectors having a fire hazard classification of zero when tested in accordance with UL 181–1998, Factory-Made Air Ducts and Air Connectors.

Class 1 air ducts and air connectors means air ducts and air connectors having a flame spread rating of not over 25 without evidence of continued progressive combustion and a smoke developed rating of not over 50 when tested in accordance with UL 181, Standard for Safety Factory-Made Air Ducts and Air Connectors.

* * * * *

Combination space heating and water heating appliance means a listed unit that is designed to provide space heating and water heating from a single primary energy source.

* * * * *

Direct-vent system means a system or method of construction where all air for combustion is derived directly from the outside atmosphere and all flue gases are discharged to the outside atmosphere.

Direct-vent system appliance means an appliance that is installed with a direct vent system.

* * * * *

Heating appliance means an appliance for comfort heating, domestic water heating, or a combination of comfort heating and domestic water heating.

* * * * *

Water heater means an appliance for heating water for domestic purposes.

34. In § 3280.703:

a. Under the undesignated heading "Appliances," add a reference standard for "Decorative Gas Appliances for Installation in Solid Fuel Burning Appliances" after the standard for "Gas-Fired Central Furnace;"

b. Under the undesignated heading "Miscellaneous," revise the reference standards for "Gas Appliance Thermostats" and "Standard for the Installation of Oil-Burning Equipment".

The revisions and additions to read as follows:

§ 3280.703 Minimum standards.

* * * * *

Decorative Gas Appliances for Installation in Solid Fuel Burning Appliances—RADCO Standard DS–010–1991.

* * * * *

Gas Appliance Thermostats–ANSI Z21.23, 1993.

* * * * *

Standard for the Installation of Oil-Burning Equipment, NFPA 31, 2001 Edition.

* * * * *

§ 3280.705 [Removed and reserved].

35. Remove and reserve § 3280.704.

36. In § 3280.705, add paragraph (b)(5), add Table 3280.705(d) following paragraph (d), and revise paragraph (h) (removing the Table designated "Part I" and the reference to "Part II [Reserved]") to read as follows:

§ 3280.705 Gas piping systems.

* * * * *

(b) * * *

(5) Corrugated stainless steel tubing (CSST) systems must be listed and installed in accordance with ANSI/IAS LC–1–1997, Gas Piping Systems Using Corrugated Stainless Steel Tubing, and the requirements of this section.

* * * * *

(d) * * *

TABLE 3280.705(D)—MAXIMUM CAPACITY OF DIFFERENT SIZES OF PIPE AND TUBING IN THOUSANDS OF BTU/HR OF NATURAL GAS FOR GAS PRESSURES OF 0.5 PSIG OR LESS, AND A MAXIMUM PRESSURE DROP OF ½ IN. WATER COLUMN

[1] Includes losses for four 90-degree bends and two end fittings. Tubing runs with larger numbers of bend and/or fittings shall be increased by an equivalent length of tubing according to the following equation: $L = 1.3n$, where L is actual length (ft) of tubing and n is the number of additional fittings and/or bends.

[2] EHD (Equivalent Hydraulic Diameter)-A measure of the hydraulic efficiency between different tubing sizes.

* * * * *

(h) *Concealed tubing.* (1) Copper tubing must not be run inside walls, floors, partitions, or roofs. Corrugated stainless steel tubing (CSST) may be run inside walls, floors, partitions, and roofs under the following conditions:

(i) The CSST is protected from accidental puncture by a steel strike barrier not less than 0.058 inch thick, or the barrier's equivalent, installed

between the tubing and the finished wall and extending 4 inches beyond concealed penetrations of plates, firestops, and wall studs, or specified by the tubing manufacturer's instructions; and

(ii) The CSST is installed in single runs and is not rigidly secured.

(2) Where tubing passes through exterior walls, floors, partitions, or similar construction, the tubing must be protected by the use of weather-resistant grommets that snugly fit both the tubing and the hole through which the tubing passes, or protected as specified in the tubing manufacturer's instructions.

(3) Concealed joints. Piping or tubing joints must not be located in any wall, floor, partition, or similar concealed construction space.

* * * * *

37. In § 3280.706, revise paragraph (j) to read as follows:

§ 3280.706 Oil piping systems.

* * * * *

(j) *Testing tag.* A tag must be affixed to each oil-fired appliance stating: "Before setting the system in operation, tank installations and piping must be checked for oil leaks with fuel oil of the same grade that will be burned in the appliance. No other material may be used for testing fuel oil tanks and piping. Tanks must be filled to maximum capacity for the final check for oil leakage."

38. In § 3280.707, revise paragraphs (a)(2) and (d) to read as follows:

§ 3280.707 Heat producing appliances.

(a) * * *

(2) Each gas and oil burning comfort heating appliance must have an Annual Fuel Utilization Efficiency of not less than that specified in the National Appliance Energy Conservation Act of 1987.

* * * * *

(d) *Performance efficiency.* Each automatic storage water heater must comply with the efficiency requirements of the National Appliance Energy Conservation Act of 1987.

39. Revise § 3280.711 to read as follows:

§ 3280.711 Instructions.

Operating instructions must be provided with each appliance. The operating and installation instructions for each appliance must be provided with the homeowner's manual.

40. In § 3280.714, revise paragraphs (a)(1)(i) and (ii) to read as follows:

§ 3280.714 Appliances, cooling.

(a) * * *

(1) * * *

(i) Electric motor-driven unitary air-cooled air conditioners and heat pumps in the cooling mode with rated capacity less than 65,000 BTU/hour (19,045 watts), when rated at ARI standard rating conditions in ARI Standard 210/240–89, Unitary Air Conditioning and Air Source Heat Pump Equipment, must have seasonal energy efficiency (SEER) values not less than as specified in the National Appliance Energy Conservation Act of 1987.

(ii) Heat pumps must be certified to comply with all requirements of the ARI Standard 210/240–89, Unitary Air Conditioning and Air-Source Heat Pump Equipment. Electric motor-driven vapor compression heat pumps with supplemental electrical resistance heat must be sized to provide by compression at least 60 percent of the calculated annual heating requirements for the manufactured home being served. A control must be provided and set to prevent operation of supplemental electrical resistance heat at outdoor temperatures above 40 °F (4 °C), except for defrost conditions. Electric motor-driven vapor compression heat pumps with supplemental electric resistance heat conforming to ARI Standard 210/240–89, Unitary Air Conditioning and Air-Source Heat Pump Equipment, must have Heating Season Performance Factor (HSPF) efficiencies not less than as specified in the National Appliance Energy Conservation Act of 1987.

* * * * *

41. In § 3280.715, revise the introductory text of paragraph (a)(1); revise the heading and add introductory text in paragraph (a)(2); and revise paragraphs (a)(4), (a)(5)(ii), (a)(6), (a)(7), and (d), to read as follows:

§ 3280.715 Circulating air systems.

(a) * * *

(1) Supply air ducts, fittings, and any dampers contained therein must be made of galvanized steel, tin-plated steel, or aluminum, or must be listed as Class 0 or Class 1 air ducts and air connectors in accordance with UL 181–1998, Factory-Made Air Ducts and Air Connectors. Class 1 air ducts and air connectors must be located at least 3 feet from the furnace bonnet or plenum. Air connectors must not be used for exterior manufactured home duct connection. A duct system integral with the structure must be of durable construction that can be demonstrated to be equally resistant to fire and deterioration as required by this section. Furnace supply plenums must be constructed of metal that extends a minimum of 3 feet from the heat exchanger measured along the centerline of airflow. Ducts constructed from sheet metal must be in accordance with the following table:

* * * * *

(2) *Duct Static Pressure Test.* The duct static pressure test is to be performed after the system has demonstrated compliance with paragraph (a)(4) of this section.

* * * * *

(4) *Airtightness of Supply Duct Systems.* A supply duct system is considered to be substantially airtight when the static pressure in the duct system, with all registers sealed and with the furnace air circulator at high speed, is at least 80 percent of the static pressure measured in the furnace casing, with its outlets sealed and the furnace air circulator operating at high speed. For the purpose of paragraph (a)(1) of this section, pressures must be measured with a water manometer or equivalent device calibrated to read in increments not greater than 1/10 inch water column. All duct designs requiring crossover duct plenums must be tested with the plenum in place.

(5) * * *

(ii) The manufacturer must provide installation instructions for supporting, mechanically fastening, sealing, and insulating each crossover duct. The instructions must indicate that no portion of the crossover duct is to be in contact with the ground, and must describe the means to support the duct without compressing the insulation and restricting airflow.

(6) Air supply ducts installed outside the thermal envelope must be insulated with material having an effective thermal resistance (R) of not less than 4, unless the ducts are within manufactured home insulation having a minimum effective value of R–4 for floors, or R–6 for ceilings.

(7) Unless installed in a basement, supply and return ducts, fittings, and crossover duct plenums exposed directly to outside air, such as those under-chassis crossover ducts or ducts connecting external heating, cooling, or combination heating/cooling appliances, must be insulated with material having a minimum thermal resistance of R–8 in all Thermal Zones. All such insulating materials must have a continuous vapor barrier retarder having a perm rating of not more than 1 perm. Where ducts are exposed underneath the manufactured home, they must comply with paragraph (a)(5)(ii) of this section, and shall be listed for exterior use.

* * * * *

(d) *Supports and protection.* Ducts must be securely supported. Nails or other fasteners must not be driven or

penetrate through duct walls. Where vertical ducts are installed within closets or rooms, they must be enclosed with materials equivalent to those used in the closet or room construction.

* * * * *

42. In § 3280.802, revise paragraphs (a)(37) and (a)(39) to read as follows:

§ 3280.802 Definitions.

(a) * * *

(37) *Receptacle* means a contact device installed at the outlet for the connection of an attachment plug. A single receptacle is a single contact device with no other contact device on the same yoke. A multiple receptacle is a device with two or more contact devices on the same yoke.

* * * * *

(39) *Utilization equipment* means equipment that utilizes electric energy for electronic, electromechanical, chemical, heating, lighting, or similar purposes.

* * * * *

43. In § 3280.803, revise paragraphs (d), (f), (i), (k)(2), and (k)(3) to read as follows:

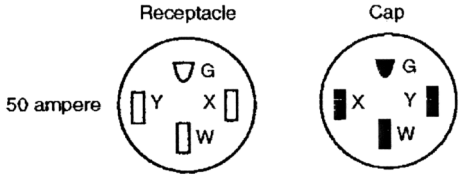
§ 3280.803 Power supply.

* * * * *

(d) A suitable clamp or the equivalent must be provided at the distribution panelboard knockout to afford strain relief for the cord to prevent strain from being transmitted to the terminals when the power supply cord is handled in its intended manner.

* * * * *

(f) The attachment plug cap must be a 3-pole, 4-wire, grounding type, rated 50 amperes, 125/250 volts, intended for use with the 50-ampere, 125/250-volt receptacle configuration, as shown below. The cap must be listed, by itself or as part of a power-supply cord assembly, for the purpose, and must be molded to or installed on the flexible cord so that it is secured tightly to the cord at the point where the cord enters the attachment plug cap. If a right-angle cap is used, the configuration must be so oriented that the grounding member is farthest from the cord.



Note: 50-ampere 125/250-volt receptacle and attachment plug cap configurations, 3-pole, 4-wire, grounding types used for manufactured home supply cords and manufactured home parks. Complete details of the 50-ampere cap and receptacle can be found *Wiring Device Dimensional Requirements* (ANSI/NEMA WD-6-1997).

* * * * *

(i) Where the cord passes through walls or floors, it must be protected by means of conduits and bushings or the equivalent. The cord is permitted to be installed within the manufactured home walls, provided that a continuous raceway having a maximum size of 1¼ inch is installed from the branch-circuit panelboard to the underside of the manufactured home floor.

* * * * *

(k) * * *

(2) A listed metal raceway or listed rigid nonmetallic conduit from the disconnecting means in the manufactured home to the underside of the manufactured home, with provisions for the attachment of a suitable junction box or fitting to the raceway on the underside of the manufactured home. The manufacturer must provide written installation instructions stating the proper feeder conductor sizes for the raceway and the size of the junction box to be used; or

(3) Service equipment installed in or on the manufactured home, provided that all of the following conditions are met:

(i) In its written installation instructions, the manufacturer must include information indicating that the home must be secured in place by an anchoring system or installed on and secured to a permanent foundation;

(ii) The installation of the service equipment complies with Article 230 of the National Electrical Code, NFPA 70–2005. Exterior service equipment or the enclosure in which it is to be installed must be weatherproof, and conductors must be suitable for use in wet locations;

(iii) Means are provided for the connection of the grounding electrode conductor to the service equipment and routing it to the conductor outside the structure;

(iv) Bonding and grounding of the service must be in accordance with Article 250, NFPA 70–2005, National Electrical Code;

(v) The manufacturer must include in its installation instructions one method of grounding the service equipment at the installation site. The instructions must clearly state that other methods of grounding are found in Article 250 of NFPA 70–2005, National Electrical Code;

(vi) The minimum size grounding electrode conductor must be specified in the instructions; and

(vi) A red warning label must be mounted on or adjacent to the service equipment. The label must state the following: WARNING—DO NOT PROVIDE ELECTRICAL POWER UNTIL THE GROUNDING ELECTRODE(S) IS INSTALLED AND CONNECTED (SEE INSTALLATION INSTRUCTIONS).

44. In § 3280.804, revise paragraphs (a), (c), (e), and (f) to read as follows:

§ 3280.804 Disconnecting means and branch-circuit protective equipment.

(a) The branch-circuit equipment is permitted to be combined with the disconnecting means as a single assembly. Such a combination is permitted to be designated as a distribution panelboard. If a fused distribution panelboard is used, the maximum fuse size for the mains shall be plainly marked, with the lettering at least 1/4-inch high and visible when fuses are changed. See Article 110–22 of NFPA 70–2005, National Electrical Code, concerning the identification of each disconnecting means and each service, feeder, or branch circuit at the point where it originated, and the type of marking needed.

* * * * *

(c) Disconnecting means. A single disconnecting means must be provided in each manufactured home, consisting of a circuit breaker, or a switch and fuses and its accessories, installed in a readily accessible location near the point of entrance of the supply cord or conductors into the manufactured home. The main circuit breakers or

fuses must be plainly marked "Main." This equipment must contain a solderless type of grounding connector or bar for the purposes of grounding, with sufficient terminals for all grounding conductors. The neutral bar termination of the grounded circuit conductors must be insulated in accordance with § 3280.809(b).

* * * * *

(e) A distribution panelboard employing a main circuit breaker must be rated not less than 50 amperes and employ a 2-pole circuit breaker rated 40 amperes for a 40-ampere supply cord, or 50 amperes for a 50-ampere supply cord. A distribution panelboard employing a disconnect switch and fuses must be rated not less than 60 amperes and must employ a single, 2-pole fuseholder rated not less than 60-amperes with 40- or 50-ampere main fuses for 40- or 50-ampere supply cords, respectively. The outside of the distribution panelboard must be plainly marked with the fuse size.

(f) The distribution panelboard must be located in an accessible location, and must not be located in a bathroom or a clothes closet. A clear working space at least 30 inches wide and 30 inches in front of the distribution panelboard must be provided. This space must extend from the floor to the top of the distribution panelboard. Where used as switches, circuit breakers must be installed so that the center of the grip of the operating handle of the circuit breaker, when in its highest position, will not be more than 6 feet, 7 inches above the floor.

* * * * *

45. In § 3280.805, add a sentence at the end of paragraph (a)(1), revise paragraphs (a)(2) and (a)(3)(i), and add a new paragraph (a)(3)(vi), to read as follows:

§ 3280.805 Branch circuits required.

(a) * * *

(1) * * * Lighting circuits are permitted to serve built-in gas ovens with electric service for lights, clocks, or timers, or for listed cord-connected garbage disposal units.

(2) *Small Appliances.* For the small appliance load in kitchens, pantries, dining rooms, and breakfast rooms of manufactured homes, two or more 20-ampere appliance branch circuits, in addition to the branch circuit specified in paragraph (a)(1) of this section, must be provided for all receptacle outlets in these rooms, and such circuits must have no other outlets. Countertop receptacle outlets installed in the kitchen must be supplied by not less than two small appliance branch circuits. One or more of the small appliance branch circuits may also supply other receptacle outlets in the kitchen, pantry, dining room, and breakfast room. Receptacles installed solely for the electrical supply to an electric clock and receptacles installed to provide power for supplemental equipment and lighting on gas-fired ranges, ovens, or counter-mounted cooking units are not subject to the requirements of this paragraph (a)(2).

(3) * * *

(i) The ampere rating of fixed appliances must not exceed 50 percent of the circuit rating if lighting outlets are on the same circuit (receptacles in the kitchen, dining area, and laundry are not considered to be lighting outlets);

* * * * *

(vi) Bathroom receptacle outlets must be supplied by at least one 20-ampere branch circuit. Such circuits must have no other outlets, except that it is permissible to place the receptacle outlet for a heat tape or pipe heating cable required by § 3280.806(d)(10) on a bathroom circuit. (See § 3280.806(b).)

* * * * *

46. In § 3280.806, revise paragraph (b) and paragraph (d) introductory text, redesignate paragraph (d)(10) as paragraph (d)(11), and add new paragraphs (d)(10) and (g) to read as follows:

§ 3280.806 Receptacle outlets.

* * * * *

(b) All 125-volt, single-phase, 15- and 20-ampere receptacle outlets installed outdoors, or in compartments accessible from outside the manufactured home, and in bathrooms, including receptacles in light fixtures, must have ground-fault circuit-interrupter protection for personnel. Ground-fault circuit-interrupter protection for personnel must be provided for receptacles serving countertops in kitchens and receptacle outlets located within 6 feet of a wet bar sink, except for receptacles installed for appliances in dedicated spaces, such as for dishwashers, disposals, refrigerators, freezers, and laundry equipment.

* * * * *

(d) *Receptacle outlets required.* Except in the bath, closet, and hall areas, receptacle outlets must be installed at wall spaces 2 feet or more wide, so that no point along the floor line is more than 6 feet, measured horizontally, from an outlet in that space. Receptacle outlets in floors shall not be counted as part of the required number of receptacle outlets, unless located within 18 inches of the wall. In addition, a receptacle outlet must be installed in the following locations:

* * * * *

(10) On the underside of the home for the connection of pipe heating cable(s) or heat tape(s), and the outlet must:

(i) Be located within 2 feet of the cold water inlet.

(ii) Be connected to an interior branch circuit, other than a small appliance branch circuit.

(iii) Be located on a circuit where all of the outlets are on the load side of the ground-fault circuit-interrupter protection for personnel.

(iv) Not be considered as the receptacle outlet required by paragraph (8) of this section.

* * * * *

(g) Receptacles must not be in a face-up position in any countertop.

47. In § 3280.807, revise paragraph (c) to read as follows:

§ 3280.807 Fixtures and appliances.

* * * * *

(c) Where a lighting fixture is installed over a bathtub or in a shower stall, it must be listed for wet locations. [See also Article 410.4(D) of the National Electrical Code NFPA No. 70–2005.]

* * * * *

48. In § 3280.808,

a. Revise paragraphs (f), (h), (i) introductory text, (i)(1), and (k);

b. Remove paragraph (l);

c. Redesignate paragraphs (m) through (r) as paragraphs (l) through (q); and

d. Revise newly redesignated paragraph (o)(2).

The revisions read as follows:

§ 3280.808 Wiring methods and materials.

* * * * *

(f) Where metal faceplates are used, they must be effectively grounded.

* * * * *

(h) Where rigid metal conduit or intermediate metal conduit is terminated at an enclosure with a locknut and bushing connection, two locknuts must be provided, one inside and one outside of the enclosure. Rigid nonmetallic conduit or electrical nonmetallic tubing is permitted. All cut ends of conduit and tubing must be reamed or otherwise finished to remove rough edges.

(i) Switches must be rated as follows:

(1) For lighting circuits, switches must be rated not less than 10 amperes, 120 to 125 volts, and in no case less than the connected load.

* * * * *

(k) When outdoor or under-chassis line-voltage (120 volts, nominal or higher) wiring is exposed to moisture or

physical damage, it must be protected by rigid metal conduit or intermediate metal conduit. The conductors must be suitable for wet locations. Electrical metallic tubing or rigid nonmetallic conduit is permitted to be used when closely routed against frames and equipment enclosures.

* * * * *

(o) * * *

(2) Conductors having an insulation suitable for the temperature encountered may be run from the appliance terminal connections to a readily accessible outlet box placed at least one foot from the appliance. If provided, these conductors must be in a suitable raceway or Type AC or MC cable, of at least 18 inches but not more than 6 feet in length.

* * * * *

49. In § 3280.813, revise paragraph (b) to read as follows:

§ 3280.813 Outdoor outlets, fixtures, air-conditioning equipment, etc.

* * * * *

(b) A manufactured home provided with a branch circuit designed to energize outside heating equipment or air-conditioning equipment, other than room air conditioners, or both, located outside the manufactured home, other than room air conditioners, must have such branch-circuit conductors terminate in a listed outlet box, or disconnecting means, located on the outside of the manufactured home.

(1) A label must be permanently affixed adjacent to the outlet box. The label must be not less than 0.020-inches thick etched brass, stainless steel, anodized or alclad aluminum, or equivalent, and must not be less than 3 inches x 1–¾ inches in size.

(2) The label must include the correct voltage and ampere rating and the following information:

THIS CONNECTION IS FOR HEATING AND/OR AIR-CONDITIONING EQUIPMENT. THE BRANCH CIRCUIT IS RATED AT NOT MORE THAN____AMPERES, AT_____VOLTS, 60-HERTZ,_____CONDUCTOR AMPACITY. A DISCONNECTING MEANS IS LOCATED WITHIN SIGHT OF THE EQUIPMENT.

(3) The correct voltage and ampere rating shall be given. The tag must be not less than 0.020-inches thick etched brass, stainless steel, anodized or alclad aluminum, or equivalent. The tag must have a minimum size of not less than 3 inches x 1¾ inches.

50. In § 3280.815, revise paragraph (a) as follows:

§ 3280.815 Polarization.

(a)(1) Except as provided in paragraph (a)(2) of this section, the white conductor must be employed for the grounded (neutral) circuit conductors only and must be connected to the white terminal or lead on receptacle outlets and fixtures. The grounded conductor must be the unswitched wire in switched circuits.

(2) A cable containing an insulated conductor with a white or natural gray outer finish or a marking of three continuous white stripes may be used for single-pole, 3-way, or 4-way switch loops, where this conductor is used for the supply to the switch, but not as a return conductor from the switch to the switched outlet. In these applications, the conductor with white or natural gray insulation or with three continuous white stripes must be permanently re-identified to indicate its use by painting or other effective means at its terminations and at each location where the conductor is visible and accessible.

* * * * *

Date: May 25, 2010.

David H. Stevens,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–67–P

LIBRARY OF CONGRESS

Copyright Royalty Board

37 CFR Part 386

[Docket No. 2010–4 CRB Satellite Rate]

Rate Adjustment for the Satellite Carrier Compulsory License

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Proposed rule.

SUMMARY: The Copyright Royalty Judges are publishing for comment negotiated royalty rates for the satellite carrier statutory license of the Copyright Act for the license period 2010–2014.

DATES: Objections to the proposed rates must be submitted no later than August 12, 2010.

ADDRESSES: Objections may be sent electronically to *crb@loc.gov*. In the alternative, send an original, five copies and an electronic copy on a CD either by mail or hand delivery. Please do not use multiple means of transmission. Objections may not be delivered by overnight delivery service other than the U.S. Postal Service Express Mail. If by mail (including overnight delivery), objections must be addressed to: Copyright Royalty Board, P.O. Box 70977, Washington, DC 20024–0977. If hand delivered by a private party, objections must be brought to the Copyright Office Public Information Office, Library of Congress, James Madison Memorial Building, Room LM–401, 101 Independence Avenue, SE., Washington, DC 20559–6000, between 8:30 a.m. and 5 p.m. If delivered by a commercial courier, objections must be delivered between 8:30 a.m. and 4 p.m. to the Congressional Courier Acceptance Site located at 2nd and D Street, NE., Washington, DC, and the envelope must be addressed to: Copyright Royalty Board, Library of Congress, James Madison Memorial Building, Room LM–403, 101 Independence Avenue, SE., Washington, DC 20559–6000.

FOR FURTHER INFORMATION CONTACT: Richard Strasser, Senior Attorney, or Gina Giuffreda, Attorney Advisor, by telephone at (202) 707–7658 or e-mail at *crb@loc.gov*.

SUPPLEMENTARY INFORMATION: As required by section 119(c)(1)(B) of the Copyright Act, title 17 of the United States Code, the Copyright Royalty Judges published a Notice in the **Federal Register** announcing the commencement of a voluntary negotiation period for the purpose of determining the royalty fees to be paid under the satellite carrier statutory license, 17 U.S.C. 119. 75 FR 32228 (June 7, 2010). The law further provides that parties that have reached a voluntary agreement as to the rates may, within ten days of publication of the Notice, "request that the royalty fees in that agreement be applied to all satellite carriers, distributors, and copyright owners without convening a proceeding under subparagraph (F)." 17 U.S.C. 119(c)(1)(D)(ii)(I). The ten-day period ended on June 17, 2010.

On June 9, 2010, the Judges received a voluntary agreement from the Program Suppliers and Joint Sports Claimants (collectively, the "Copyright Owners") and DIRECTV, Inc., DISH Network, LLC, and National Programming Service, LLC (collectively, the "Satellite Carriers"). The Copyright Owners and Satellite Carriers request that the Judges adopt the rates set forth in Article 2 of their agreement, which we are publishing today for comment. The Judges are publishing the rates as required by section 119(c)(1)(D)(ii)(II).

Section 119(c)(1)(D)(ii)(III) provides that the Judges shall adopt the negotiated rates "unless a party with an intent to participate in the proceeding and a significant interest in the outcome of that proceeding objects under clause

(II)." Any party that files an objection to the rates published in today's Notice must state their intention to participate in a proceeding and state in detail their reasons for the objection as well their significant interest in the outcome of this proceeding.

List of Subjects in 37 CFR Part 386

Copyright, Satellite, Television.

Proposed Regulations

For the reasons set forth in the preamble, the Copyright Royalty Judges propose to add part 386 to Chapter III of title 37 of the Code of Federal Regulations to read as follows:

PART 386—ADJUSTMENT OF ROYALTY FEES FOR SECONDARY TRANSMISSIONS BY SATELLITE CARRIERS

Sec.
386.1 General.
386.2 Royalty fee for secondary transmission by satellite carriers.

Authority: 17 U.S.C. 119(c), 801(b)(1).

§ 386.1 General.

This part 386 adjusts the rates of royalties payable under the statutory license for the secondary transmission of broadcast stations under 17 U.S.C. 119.

§ 386.2 Royalty fee for secondary transmission by satellite carriers.

(a) *General.* (1) For purposes of this section, *Per subscriber per month* shall mean for each subscriber subscribing to the station in question (or to a package including such station) on the last day of a given month.

(2) In the case of a station engaged in digital multicasting, the rates set forth in paragraph (b) of this section shall apply to each digital stream that a satellite carrier or distributor retransmits pursuant to 17 U.S.C. 119, provided however that no additional royalty shall be paid for the carriage of any material related to the programming on such stream.

(b) *Rates.* (1) *Private home viewing.* The rates applicable to Satellite Carriers' carriage of each broadcast signal for private home viewing shall be as follows:

(i) 2010: 25 cents per subscriber per month (for each month of 2010;

(ii) 2011: the 2010 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items for October 2009 to October 2010;

(iii) 2012: the 2011 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items for October 2010 to October 2011;

(iv) 2013: the 2012 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2011 to October 2012;

(v) 2014: the 2013 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2012 to October 2013.

(2) *Viewing in Commercial Establishments.* The rates applicable to Satellite Carriers' carriage of each broadcast signal for viewing in commercial establishments shall be as follows:

(i) 2010: 50 cents per subscriber per month (for each month of 2010);

(ii) 2011: the 2010 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2009 to October 2010;

(iii) 2012: the 2011 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2010 to October 2011;

(iv) 2013: the 2012 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2011 to October 2012;

(v) 2014: the 2013 rate, adjusted for the amount of inflation as measured by the change in the Consumer Price Index for all Urban Consumers All Items from October 2012 to October 2013.

Dated: July 8, 2010.

William J. Roberts, Jr.,

U.S. Copyright Royalty Judge.

BILLING CODE 1410–72–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 679 and 680

[Docket No. 070718367–7374–01]

RIN 0648–AV33

Fisheries of the Exclusive Economic Zone Off Alaska; Community Development Quota Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to amend regulations that govern fisheries managed under the Western Alaska Community Development Quota (CDQ) Program. These revisions are needed to comply with certain changes made to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) in 2006. Proposed changes include revising regulations associated with recordkeeping, vessel licensing, catch retention requirements, and fisheries observer requirements to ensure that they are no more restrictive than the regulations in effect for comparable non-CDQ fisheries managed under individual fishing quotas or cooperative allocations. In addition, NMFS proposes to remove CDQ Program regulations that now are inconsistent with the Magnuson-Stevens Act, including regulations associated with the CDQ allocation process, transfer of groundfish CDQ and halibut prohibited species quota, and the oversight of CDQ groups' expenditures.

DATES: Comments must be received no later than August 12, 2010.

ADDRESSES: Send comments to Sue Salveson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, Attn: Ellen Sebastian. You may submit comments, identified by RIN 0648–AV33, by any one of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal eRulemaking Portal Web site at *http://www.regulations.gov.*
- *Mail:* P.O. Box 21668, Juneau, AK 99802.
- *Fax:* (907) 586–7557.
- *Hand delivery to the Federal Building:* 709 West 9th Street, Room 420A, Juneau, AK.

All comments received are a part of the public record. No comments will be posted to *http://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personal Identifying Information (*e.g.,* name, address) voluntarily submitted by the commenter may be publicly accessible. SUPPLEMENTARY INFORMATION: NMFS manages the groundfish and crab fisheries of the Bering Sea and Aleutian Islands management area (BSAI) under the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (groundfish FMP) and the Fishery Management Plan for Bering Sea/Aleutian Islands King and Tanner Crabs (crab FMP). The North Pacific Fishery Management Council (Council) prepared the FMPs pursuant to the Magnuson-Stevens Act (16 U.S.C. 1801, *et seq.*). The International Pacific Halibut Commission and NMFS manage fishing for Pacific halibut through regulations established under the authority of the Northern Pacific Halibut Act of 1982. Regulations governing the groundfish, crab, and halibut fisheries in the BSAI and implementing the FMPs appear at 50 CFR parts 300, 600, 679, and 680.

Overview of the CDQ Program

The CDQ Program is an economic development program associated with Federally managed fisheries in the BSAI. The purpose of the program is to provide western Alaska communities the opportunity to participate and invest in BSAI fisheries, to support economic development in western Alaska, to alleviate poverty and provide economic and social benefits for residents of western Alaska, and to achieve sustainable and diversified local economies in western Alaska. The large-scale commercial fisheries of the BSAI developed in the eastern Bering Sea without significant participation from rural western Alaska communities. These fisheries are capital-intensive and require large investments in vessels, infrastructure, processing capacity, and specialized gear. The CDQ Program was developed to redistribute some of the BSAI fisheries' economic benefits to adjacent communities by allocating a portion of commercially important BSAI species including pollock, crab, halibut, and various groundfish, to such communities. The percentage of each annual BSAI catch limit allocated to the CDQ Program varies by both species and management area. Regulations establishing the CDQ Program were first implemented in 1992. The CDQ Program was incorporated into the Magnuson-Stevens Act in 1996 through the Sustainable Fisheries Act (Pub. L. 104–297).

NMFS allocates a portion of the annual catch limits for a variety of commercially valuable marine species in the Bering Sea and Aleutian Islands area (BSAI) to the CDQ Program. These apportionments are in turn allocated among six different non-profit managing organizations representing different affiliations of communities (CDQ groups). There are 65 communities participating in the program. These communities, and their managing organizations, are identified in the Magnuson-Stevens Act at Section 305(i)(1)(D). CDQ groups use the revenue derived from the harvest of their fisheries allocations as a basis both for funding economic development activities and for providing employment opportunities. The successful harvest of CDQ Program allocations is integral to achieving the goals of the program. The National Marine Fisheries Service (NMFS), the State of Alaska (State), and the Western Alaska Community Development Association administer the CDQ Program.

The fisheries management regulations governing the CDQ fisheries are integrated into the regulations governing the concurrent fisheries for groundfish, halibut, and crab. These are often termed the "non-CDQ" fisheries. CDQ fisheries management regulations have been developed incrementally since the creation of the CDQ Program. These regulations were developed to ensure that catch of all species allocated to the CDQ Program should be limited to the amount of the allocations, with no catch from CDQ fisheries accruing against non-CDQ allocations. They also were developed to ensure that NMFS and the CDQ groups had timely, accurate catch information during the course of CDQ fishing activities. Applicable CDQ fisheries regulations may subject CDQ fishery participants to additional costs, additional catch reporting requirements, or be designed to control some aspect of CDQ fishing activities. This is typical of the development of regulations that govern catch share programs in the Alaska groundfish, halibut, and crab fisheries. Federal catch share programs convey harvesting privileges (licenses, fishing quota, exclusive access) for specific marine species to individuals, cooperatives, communities, or other eligible entities. In turn, the beneficiaries of such privileges are subject to higher levels of catch accounting, catch monitoring, and fisheries enforcement than they may have been subject to before receiving these privileges.

The original fishery management objectives for the groundfish, halibut, and crab CDQ fisheries include, in general, limiting the catch of all species to the amount allocated to the program and not allowing catch made under the program to accrue against non-CDQ portions of total allowable catch (TAC) limits or prohibited species catch (PSC) limits. These objectives also included managing target and non-target species allocations made to the CDQ groups with the same level of strict quota accountability, and holding each CDQ group responsible not to exceed any of its groundfish CDQ allocations.

2006 and 2007 Statutory Changes Affecting the CDQ Program

Section 305(i)(1) of the Magnuson-Stevens Act includes requirements to establish the CDQ Program and allocate a percentage of the total allowable catch (TAC) of each Bering Sea (BS) and Aleutian Island (AI) directed fishery to the program. Corresponding Federal and State regulations implement various administrative and fisheries management aspects of the CDQ Program. The fisheries management regulations governing the groundfish, halibut, and crab CDQ fisheries are integrated into the regulations governing the concurrent, non-CDQ fisheries for such species.

Section 305(i)(1) of the Magnuson-Stevens Act was amended on July 11, 2006, by the Coast Guard and Maritime Transportation Act (Coast Guard Act) (Pub. L. 109–241). The Coast Guard Act revised all of the existing language in section 305(i)(1) with new language. The new requirements in section 305(i)(1) address all aspects of management and oversight of the CDQ Program including the purpose of the CDQ Program; allocations of groundfish, halibut, and crab to the program and among the CDQ groups; management of the CDQ fisheries with respect to non-CDQ fisheries; eligible communities; eligibility criteria; limits on allowable investments; the creation of a CDQ administrative panel; compliance with State reporting requirements; a decennial review and allocation adjustment process; and other features of program administration and oversight by the State and NMFS. These amendments were intended to address a variety of oversight and management

issues associated with the CDQ Program, including conferring a higher level of self-governance to CDQ groups.

On January 12, 2007, the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act of 2006 (Pub. L. 109–479) further amended section 305(i)(1) of the Magnuson-Stevens Act specifically by amending sections 305(i)(1)(B)(ii) and (C). The allocations of groundfish (other than pollock and sablefish) to the CDQ Program and among the CDQ groups were increased by this Reauthorization Act. Furthermore, it amended restrictions associated with the transfer of quota among the CDQ groups.

Most of the new CDQ Program requirements in the Magnuson-Stevens Act must be implemented through revisions to Federal regulations at 50 CFR parts 679 and 680. This action proposes regulatory amendments related to the regulation of harvest in select CDQ fisheries, as described below. This action also proposes to modify or remove other regulations related to the CDQ allocation and transfer process, as well as to remove regulations associated with the oversight of expenditures and investments by CDQ groups. These proposed regulatory amendments are described later in the preamble to this proposed rule. Other regulatory amendments to the CDQ Program required by the Coast Guard Act have been or are being addressed in other, separate regulatory actions.

NMFS prepared an EA/RIR/IRFA (*see* **ADDRESSES**) as part of an evaluation to identify which regulations in 50 CFR parts 679 and 680 would need to be changed to comply with the Magnuson-Stevens Act requirements associated with the management of CDQ fisheries. NMFS presented this analysis to the Council in June 2007. The Council recommended implementation of an alternative that would amend CDQ fisheries management regulations to align them with comparable non-CDQ fisheries regulations.

The regulation of CDQ harvest is directly addressed in the Magnuson-Stevens Act at section 305(i)(1)(B)(iv). This paragraph states:

> The harvest of allocations under the program for fisheries with individual quotas or fishing cooperatives shall be regulated by the Secretary in a manner no more restrictive than for other participants in the applicable sector, including with respect to the harvest of non-target species.

Accordingly, this proposed action focuses on those BSAI fisheries with individual fishing quotas (IFQs) or those BSAI fisheries managed with cooperatives. The BSAI fisheries that include allocations of IFQs are the Pacific halibut, fixed gear sablefish, and crab fisheries. Recipients of IFQ receive a specific amount of a particular IFQ species to catch each year. The BSAI fisheries that include components managed with cooperatives include the BS pollock fishery, as well as the allocations of Atka mackerel, Aleutian Islands Pacific ocean perch, yellowfin sole, rock sole, flathead sole, and Pacific cod made to the non-American Fisheries Act (AFA) trawl catcher/processor sector (otherwise known as the Amendment 80 sector). Cooperatives allow multiple quota recipients to aggregate their annual quota amounts, coordinate their collective fishing operations, and benefit from the resulting efficiencies. Each of the BSAI fisheries managed with IFQs or cooperatives also include allocations to the CDQ Program.

NMFS interprets the statement "in a manner no more restrictive than for other participants in the applicable sector" from the Magnuson-Stevens Act to mean that the fishery management regulations associated with regulating the harvest of CDQ allocations should be no more costly, complex, or burdensome than those that apply to comparable non-CDQ sectors managed under IFQs or cooperative allocations. This applies to most of the major BSAI fisheries, although one noteworthy exception is the Pacific cod fishery conducted by hook-and-line catcher/processors. Hook-and-line catcher/processors are allocated 48.7 percent of the annual BSAI Pacific cod TAC, but are not rationalized as are most other major fishery sectors that fish for Pacific cod. Rationalization typically refers to programs that limit access to certain fisheries to balance the interests of competing participants, while providing a means to address overarching management and conservation issues. There are no IFQ or cooperative allocations associated with any fixed gear component of the Pacific cod fishery. Therefore, no changes are required by section 305(i)(1)(B)(iv) to regulations governing the harvest of Pacific cod by hook-and-line catcher/processors, although this is one of the major groundfish CDQ fisheries.

Furthermore, NMFS interprets the phrase "including with respect to the harvest of non-target species" in section 305(i)(1)(B)(iv) to apply to species that may legally be retained and sold while directed fishing for halibut, groundfish, or crab CDQ. In the BSAI groundfish fisheries, any given amount of catch may be composed of target species, some bycatch or incidental catch species, and some prohibited species. BSAI fisheries management regulations at § 679.2 define "harvesting or to harvest" as the catch and retention of any fish. The Magnuson-Stevens Act does not define "harvesting."

Prohibited species may not be retained if caught while groundfish fishing in the BSAI, with the exception of those prohibited species that may be retained for donation to a food bank or are required to be retained for proper accounting. These types of prohibited species include salmon, as well as halibut delivered by catcher vessels using trawl gear to shoreside processors. Crab and herring are not part of the prohibited species donation program. Therefore, NMFS interprets the Magnuson-Stevens Act's requirements at section 305(i)(1)(B)(iv) as not applying to regulations governing the catch of prohibited species in the CDQ Program.

NMFS considered the need to propose changes to the regulations that govern the regulation of crab CDQ harvest during its assessment of current regulations governing the CDQ fisheries. The crab CDQ fisheries are managed under the regulations developed for the Crab Rationalization (CR) Program, which was implemented in 2005 (70 FR 10174, March 2, 2005). The crab FMP defers many aspects of BSAI crab management to the State, including most aspects of the regulation of harvest of crab CDQ. The crab CDQ fishery occurs in conjunction with the crab IFQ fishery under comparable Federal and State regulations. NMFS has not identified any crab CDQ regulations that are more restrictive than those in effect for the crab IFQ fishery. Therefore, this action does not propose changes to Federal regulations governing the crab CDQ fisheries.

Amendment 80 to the groundfish FMP (Amendment 80) allocated non-pollock groundfish fisheries among fishing sectors, and included provisions that allow the formation of fisheries cooperatives (72 FR 52668, September 14, 2007). NMFS already has integrated the applicable portion of the groundfish CDQ fisheries into the catch monitoring and enforcement requirements that were implemented for non-AFA trawl catcher/processors in conjunction with the implementation of Amendment 80. "Non-AFA trawl catcher/processors" refers to a class of vessels that did not qualify to fish for pollock under the authority of the AFA. These are typically referred to as Amendment 80 vessels. Such vessels typically have been involved in fisheries for species such as Atka mackerel, Pacific ocean perch, flathead sole, Pacific cod, rock sole, and yellowfin sole (Amendment 80 species). Therefore, this action does not

propose any changes to Federal regulations governing the Amendment 80 species allocated to the CDQ Program or to groundfish CDQ fishing for Amendment 80 species.

This proposed rule would revise regulations in 50 CFR part 679 to be consistent with Magnuson-Stevens Act requirements for the regulation of harvest of the CDQ fisheries, as described previously. Regulations governing the harvest of halibut and sablefish IFQ, and the harvest of pollock under the AFA, are different from regulations governing the harvest of other non-CDQ groundfish. Therefore, the Magnuson-Stevens Act now requires NMFS to manage the CDQ fisheries for halibut, sablefish, and pollock differently than the more restrictive CDQ regulations that currently are in effect. Thus, NMFS proposes to separately identify CDQ fisheries and separate the fisheries management regulations associated with the halibut, sablefish, pollock, and groundfish CDQ fisheries. This, in turn, would allow NMFS to amend regulations for the halibut, sablefish, and pollock CDQ fisheries to align them with those regulations in place for the equivalent non-CDQ fisheries.

Proposed Regulatory Amendments To Implement Regulation of Harvest Requirements

The following is an overview of the proposed revisions to CDQ fisheries management regulations. Detailed explanations of, and rationales for, these proposed regulatory amendments are provided in following sections.

1. Add definitions of "sablefish CDQ fishing" and "pollock CDQ fishing" to provide a basis for establishing which fishery-specific regulations a vessel operator must comply with when participating in a particular CDQ fishery. The terms "halibut CDQ fishing" and "groundfish CDQ fishing" already are defined in regulation, but would be revised under this proposed rule. These proposed revisions are detailed in the *Definitions* section below.

2. Exclude sablefish CDQ from the definition of "license limitation groundfish," which would, in turn, exempt vessel operators from the requirement to have a License Limitation Program (LLP) groundfish license while fishing for sablefish CDQ under the CDQ Program. This would be consistent with the exemption allowed for vessels fishing for sablefish IFQ, which occurs under the IFQ Program. This proposed revision is detailed in the *Definitions* section below.

3. Remove a requirement that CDQ groups annually submit a request to NMFS to designate specific vessels as eligible to harvest groundfish CDQ on their behalf, as well as remove a prohibition against harvesting groundfish CDQ unless a vessel is designated as eligible to do so. These proposed revisions are detailed in the *Eligible Vessels* section below.

4. Revise CDQ catch monitoring and accounting requirements for the halibut, sablefish, and pollock CDQ fisheries to incorporate other applicable changes proposed by this action. This includes eliminating requirements that groundfish bycatch be retained for full catch accounting of all species caught by catcher vessels targeting halibut, sablefish, or pollock CDQ. These proposed revisions are detailed in the *Catch Accounting and Monitoring* section below.

5. Revise regulations to align observer coverage requirements for the sablefish CDQ, halibut CDQ, and pollock CDQ fisheries with comparable non-CDQ fisheries. These proposed revisions are detailed in the *Observer Coverage Requirements* section below.

In addition, there is a remove/add table at the end of the regulatory text portion of this proposed rule that portrays minor changes to wording or changes to cross-references. NMFS chose to propose some types of changes in the remove/add table because it is an efficient way to illustrate repetitive or simple changes. For example, the proposal to change the term "CDQ group number" to "CDQ number" affects multiple paragraphs of 50 CFR part 679.5, since this term is found in numerous locations in this section. The remove/add table clearly identifies the section and paragraph that is affected by each proposed change. The preamble refers the reader to the remove/add table whenever a proposed regulatory change is found there. All other regulatory changes are set forth in the proposed regulatory text following this preamble.

Revisions described below were specifically recommended by the Council in 2007 and are proposed under section 303(c) of the Magnuson-Stevens Act.

Definitions

This proposed rule would add or revise a number of definitions in § 679.2 associated with the CDQ Program. These proposed changes are based upon the Magnuson-Stevens Act requirement that CDQ harvests must be managed no more restrictively than BSAI fisheries managed with individual quotas or fishing cooperatives. Adding or refining definitions for different types of CDQ fishing would help distinguish which regulations apply to a given CDQ fishing activity, and support the Council's recommendations for this action. Subsequent sections of the preamble discuss proposed changes to (1) eligible vessel requirements, (2) catch monitoring and accounting, and (3) observer coverage requirements, as well as explain the rationale for these proposed changes to definitions.

Definitions of pollock CDQ fishing and sablefish CDQ fishing would be added to § 679.2. This would enable NMFS and vessel operators in applicable fisheries to distinguish which particular CDQ fishery a vessel is participating in and the corresponding CDQ-specific regulations with which a vessel operator must comply. Groundfish CDQ fishing currently is defined. Pollock and sablefish are encompassed within the existing definition of groundfish CDQ fishing, along with numerous other groundfish species. This proposed rule would separate sablefish CDQ and pollock CDQ from the definition of groundfish CDQ fishing. This rule also proposes to apply different catch accounting and observer requirements to the sablefish, pollock, and groundfish CDQ fisheries; the new definitions proposed here primarily are to support such changes.

The proposed definition of "pollock CDQ fishing" would be modeled on a definition in § 679.2 used to define "AI directed pollock fishery," which links a particular fishing activity to a distinct program allocation. This action proposes to define pollock CDQ fishing in a similar manner. Thus, a vessel would be considered directed fishing for pollock CDQ if it reported that its pollock catch accrued towards a pollock CDQ allocation. In addition, a new prohibition would be added at § 679.7(d) to prohibit a vessel operator from retaining more than the maximum retainable amount of pollock unless the vessel operator was pollock CDQ fishing. This would assist in clarifying that a vessel not otherwise eligible to target pollock (in other words, an Amendment 80 vessel) may not catch unlimited amounts of pollock while it is nominally targeting for other types of groundfish. The annual Bering Sea pollock catch limit already is fully apportioned between other industry sectors.

The definition of "halibut CDQ fishing" would be revised to remove references to conditions associated with retention of combinations of halibut CDQ, halibut IFQ, and other groundfish species. Instead of defining whether a vessel operator is halibut CDQ fishing based on the proportions of halibut and groundfish species retained onboard, NMFS proposes to define halibut CDQ

fishing based on whether a vessel is retaining halibut CDQ and whether it meets the definition of either sablefish CDQ or groundfish CDQ fishing.

This proposed rule would revise the definition of "groundfish CDQ fishing" to remove pollock CDQ fishing and sablefish CDQ fishing from the definition. Those two types of fishing would each be defined separately. Additionally, the term "eligible vessel" would be removed from this definition, as CDQ eligible vessel requirements are proposed to be removed by this action. The revised definition of groundfish CDQ fishing primarily would apply to vessels using trawl gear fishing for groundfish species other than pollock and to vessels using fixed gear fishing for groundfish species other than sablefish.

This proposed rule would revise the definition of "license limitation groundfish" to exclude sablefish CDQ harvested with fixed gear. Such a revision would mean that vessels fishing for sablefish CDQ would no longer be required to possess an LLP groundfish license when they are directed fishing for sablefish CDQ. This is equivalent to the exception made for vessels that are sablefish IFQ fishing. Sablefish managed under the IFQ Program was exempted from being considered a license limitation groundfish because this species already was managed under a limited access program prior to the development of the LLP.

Eligible Vessels

Each CDQ group must designate which vessels may fish for the group's groundfish CDQ or halibut CDQ by annually requesting that NMFS assign specific vessels with CDQ eligibility status. This requirement applies to each vessel of any length that will be groundfish CDQ fishing, and to each vessel equal to or greater than 60 ft (18.3 m) length overall (LOA) that will be halibut CDQ fishing. This requirement originally was implemented to provide specific information about which vessels would be participating in groundfish CDQ fisheries. NMFS required CDQ groups to submit detailed operational information about such vessels as part of the implementation of the multispecies groundfish CDQ Program in 1998. This was intended to ensure that the CDQ groups and their associated vessels were complying with increased observer coverage and catch reporting requirements. The eligible vessel designation also provided a means for the NOAA Office for Law Enforcement and U.S. Coast Guard enforcement personnel to verify that a vessel was authorized to participate in the CDQ fisheries.

As the groundfish CDQ fishery matured and stabilized between 1998 and 2003, the information submitted as part of the vessel eligibility process became unnecessary for management and enforcement. The information collected on the eligible vessels forms is available from other sources, such as observer data or NMFS fisheries permits data. In 2005, NMFS amended regulations governing the eligible vessel requirements to decrease the amount of information collected about each vessel and to remove the State from the administrative review process associated with vessel eligibility (70 FR 15010, March 24, 2005). Currently, vessel operators are required to maintain a copy of NMFS's eligibility approval onboard a vessel at all times while harvesting, transporting, or offloading groundfish CDQ. Permits are required to participate in the halibut IFQ, sablefish IFQ, and AFA pollock fisheries, but there are no requirements equivalent to the former CDQ eligible vessel requirements.

NMFS proposes to eliminate the CDQ eligible vessel requirements entirely, rather than just for the primary fisheries affected by this action. This includes the general requirement that a CDQ group must submit a request to NMFS for approval of a vessel as eligible to fish for CDQ allocations at § 679.32(c) and the specific eligibility information required to be submitted at § 679.5(n)(2). The U.S. Coast Guard, which is the enforcement agency most likely to board vessels at sea to verify a vessel's fishing status, has informed NMFS that it does not currently use information about a vessel's CDQ eligibility status for enforcement purposes. Instead, U.S. Coast Guard personnel use fisheries logbooks, required by NMFS, to determine if a vessel is CDQ fishing or is fishing under another management program.

Removal of the vessel eligibility requirements would eliminate the need for the prohibition at § 679.7(d)(4). This paragraph prohibits a vessel from harvesting groundfish CDQ on behalf of a CDQ group unless the vessel is listed as an eligible vessel for a CDQ group. The word "eligible" also would be removed from the term "eligible vessel" in prohibitions at § 679.7(d)(6) through (10), as is denoted in the remove/add table at the end of this proposed rule. Furthermore, § 679.7(f)(3)(ii), which prohibits the retention of sablefish unless certain permit conditions are met, would be revised to delete a cross-reference to § 679.32(c).

Catch Monitoring and Accounting

The proposed changes to CDQ catch monitoring and accounting regulations are based on the Council's recommendation to amend such regulations in order to comport with Magnuson-Stevens Act requirements for the CDQ Program. This recommendation is based on NMFS's comparison of applicable regulations governing the harvest of similar CDQ species and non-CDQ species. This includes an assessment of whether CDQ regulations, as compared to non-CDQ regulations, may be considered more restrictive in the context of relevant Magnuson-Stevens Act requirements, particularly to the degree that they either impose additional financial costs or operational requirements on CDQ fishery participants. Those CDQ-related regulations that were deemed more restrictive when compared to regulations governing IFQ or cooperative fisheries are proposed to be amended, per the Council's recommendation for this action. Such changes are intended to remove CDQ catch monitoring or reporting requirements beyond those in effect for non-CDQ fisheries for halibut and sablefish IFQ, as well as pollock harvested under the AFA. This should, in turn, decrease the operational restrictions, reporting complexities, and costs associated with additional observer coverage for participants in the sablefish, halibut, and pollock CDQ fisheries.

The CDQ Program's retention and catch reporting requirements, in conjunction with data from fisheries observers, allows NMFS to monitor the catch of the various CDQ species and prohibited species quota (PSQ) species categories on a timely, ongoing basis throughout the year. The original multispecies CDQ Program catch accounting design as implemented in 1998 stipulated that all groundfish CDQ and PSQ harvested by vessels participating in the groundfish CDQ fisheries must be accounted for in the allocations made to CDQ groups.

The CDQ catch accounting system was developed in the late 1990's and designed so that none of the groundfish or PSQ catch (except herring) made in the groundfish CDQ fisheries accrued to the non-CDQ TACs or PSC limits. Furthermore, groundfish CDQ accounting requirements were extended to the halibut CDQ fishery. Halibut CDQ vessels equal to or greater than 60 ft (18.3 m) LOA are required to comply with all groundfish CDQ and PSQ catch accounting requirements, including retention of all groundfish CDQ by

catcher vessels. In contrast, bycatch or incidentally caught groundfish in the non-CDQ fisheries managed with IFQs or cooperatives accrue against an annual TAC limit, seasonal apportionments, and sector allocations (if applicable) for that species and not against allocations to the IFQ holders or cooperative. Furthermore, the retention of non-target catch generally is not required.

Such comprehensive retention and accounting requirements are not required in the fixed gear sablefish IFQ, halibut IFQ, AFA pollock, or Amendment 80 cooperative fisheries. These fisheries do not have requirements that all incidentally caught groundfish species be retained and accounted for against allocations of these species made to quota holders or cooperatives. One exception is that participants in the halibut and sablefish IFQ fisheries must retain and deliver all catch of Pacific cod and rockfish taken when IFQ halibut or IFQ sablefish are onboard (unless the Pacific cod and rockfish fisheries are closed to directed fishing). Another exception is that all catch of Amendment 80 species in the Amendment 80 cooperative fisheries accrues towards a cooperative's allocations, regardless of whether such catch is retained or not. With respect to the IFQ fisheries requirement to retain and deliver Pacific cod and rockfish, NMFS is not proposing to apply these retention and reporting requirements to the halibut and sablefish CDQ fisheries primarily because doing so would extend NMFS's Federal groundfish permit requirements to a relatively small number of halibut CDQ fishermen who are not currently required to retain groundfish. These fishermen deliver their catch to small halibut processing facilities that do not process groundfish. The Council concurred in NMFS's recommendation on this issue.

NMFS proposes to revise CDQ catch monitoring requirements for the fixed gear sablefish, halibut, and pollock CDQ fisheries at § 679.32 and other applicable sections of 50 CFR part 679 to align regulations with the retention and reporting requirements in place for IFQ fisheries or fisheries managed with cooperatives. These proposed amendments also are related to the changes in observer coverage requirements described under the next section titled "Observer Coverage Requirements." The specific changes proposed to CDQ catch monitoring requirements follow.

Paragraph § 679.32(a) would be revised to identify the specific fisheries that paragraph (a) applies to: The CDQ fisheries for fixed gear sablefish, pollock, and other groundfish species. The halibut CDQ fishery no longer would be subject to groundfish retention for purposes of CDQ catch accounting, so this action proposes to remove the groundfish retention and catch monitoring requirements for the halibut CDQ fishery from § 679.32. Additionally, this proposed rule would add to paragraph (a) a cross-reference to the regulations governing halibut CDQ catch accounting at § 679.42(c).

Paragraph § 679.32(b) would be revised to state that the halibut caught by vessels that are sablefish CDQ fishing with fixed gear may be exempted from accrual against the CDQ groups' halibut PSQ if such an exemption is granted for vessels fishing for sablefish IFQ during the annual groundfish harvest specifications process. This exemption process already exists for the sablefish IFQ fishery. This exemption is proposed for vessels sablefish CDQ fishing to comply with section 305(i)(1)(B)(iv) of the Magnuson-Stevens Act. In addition, the proposed rule would update cross-references in paragraph (b) associated with prohibitions in § 679.7(d) and with halibut PSC limits in § 679.21(e).

This proposed rule also would revise the catch accounting requirements in § 679.32(c) to distinguish between the different catch monitoring requirements for vessels participating in three CDQ fisheries categories: fixed gear sablefish, pollock, and other groundfish. These categories would be in proposed paragraphs (c)(1), (c)(2), and (c)(3), respectively. These revisions include (1) describing the other general regulatory requirements with which participants in these fisheries must comply, (2) identifying the data sources used for CDQ catch accounting, and (3) specifying the operational requirements in place for different vessel categories.

Existing catch monitoring requirements for the groundfish CDQ fisheries other than fixed gear sablefish CDQ and pollock CDQ would be retained, but reorganized in § 679.32(c)(3). These proposed changes combine elements of existing regulations at § 679.32(c) through (e) that are associated with groundfish CDQ catch monitoring and reporting requirements, including the provision for CDQ groups and their affiliated vessels to use an alternative fishing plan to document how they will obtain groundfish catch data by means other than NMFS's standard data sources. This action also proposes to move an element associated with alternative fishing plans to revised § 679.32(c)(3) from § 679.50(c)(4)(ii). The particular element is associated with limitations on an observer's duty hours, but NMFS determined that it is more suitable to include that particular criterion with the balance of other, existing requirements for alternative fishing plans.

This proposed rule would add a requirement in revised § 679.32(c)(3) to require that operators of Amendment 80 catcher/processors using trawl gear to harvest groundfish CDQ comply with catch monitoring requirements in § 679.93(c). The monitoring requirements in § 679.93(c) were implemented as part of Amendment 80, as previously described. Operators of non-AFA trawl catcher/processors that are fishing in the BSAI must now adhere to the same catch monitoring standards, regardless of whether they are participating in CDQ, cooperative, or limited access fisheries.

Other proposed changes to § 679.32(c) include adding references in paragraphs (c)(2)(i)(B) through (F) to applicable observer coverage requirements at § 679.50(c)(4)(iii). In association with these changes, NMFS proposes to remove most occurrences of the qualifier "level 2" from the term "level 2 observer." This would make references to observer types more general, while the proposed addition of references to observer requirements at § 679.50(c)(4)(iii) would clarify the type of observer(s) required for each groundfish CDQ vessel category.

Paragraph § 679.32(d) would be revised to describe catch monitoring requirements by fishery category for shoreside processors and stationary floating processors. These changes support the primary purpose of this proposed action by removing regulatory requirements for the halibut, fixed gear sablefish, and pollock CDQ fisheries that are more restrictive than regulations in place for comparable non-CDQ fisheries. This paragraph would contain information about general requirements and specific requirements associated with deliveries of pollock CDQ and with deliveries of groundfish CDQ. Proposed new paragraph § 679.32(d)(1) would refer managers of seafood processors to other sections of 50 CFR part 679 associated with non-CDQ pollock delivery requirements. Proposed new paragraph § 679.32(d)(2) addresses the requirements for groundfish CDQ deliveries. This paragraph would retain the existing processor requirements in § 679.32(d). Furthermore, § 679.32(d)(2) is proposed to be revised to incorporate a cross-reference to observer coverage requirements at § 679.50(d)(5)(iii) and to remove three occurrences of the qualifier "level 2."

This rule proposes to remove paragraph § 679.32(e), except for paragraph (e)(3), as noted below. Paragraph (e) outlines the requirements

associated with groundfish CDQ recordkeeping and reporting requirements, including the data sources that will be used to determine CDQ and PSQ catch amounts. This paragraph also describes the data used to complete CDQ catch reports (submitted by CDQ groups) and CDQ delivery reports (submitted by shoreside processors taking deliveries of groundfish CDQ). These requirements are obsolete because NMFS no longer requires CDQ fisheries participants to submit these reports. The requirement to submit them was removed in the final rule implementing Amendment 80 (72 FR 52668, September 14, 2007). However, the corresponding regulatory change to remove references to these reports in § 679.32 was inadvertently excluded in the rulemaking prepared to implement Amendment 80.

CDQ reporting requirements have been incorporated into generally applicable reporting requirements described in § 679.5. The information that once was collected through the CDQ delivery report and the CDQ catch report is now available through observer data, weekly production reports, and the Interagency Electronic Reporting System used to monitor various Alaska commercial fisheries. Catch reporting mechanisms for Federal fisheries in Alaska have undergone significant changes since the original groundfish CDQ fisheries catch reporting requirements were implemented in 1998. NMFS no longer needs separate reports from the CDQ groups acknowledging the groundfish catch that will accrue against their allocations. NMFS has enhanced CDQ groups' ability to access their groundfish CDQ and PSQ balances directly from the NMFS catch accounting system. This allows the groups to continue to monitor the status of their CDQ account balances on a timely basis.

Paragraph (e)(3) of § 679.32 is proposed to be moved to revised § 679.32(c)(3)(ii)(G) to address the use of alternative methods of CDQ catch accounting. This would allow catcher/processors to continue to use "alternative fishing plans." In common practice, these plans allow a catcher/processor using longline gear to carry a single fisheries observer, rather than the two observers specified in regulation for this vessel category. Such plans typically contain performance standards that limit a vessel's fishing effort to the number of sets that can be sampled by a single observer. Vessel operators typically use alternative fishing plans to conduct CDQ fishing operations just prior to, and at the end of, the non-CDQ Pacific cod seasons. Once a non-CDQ cod season opens, catcher/processor vessels using these plans may switch to non-CDQ cod fishing, which has lower observer coverage levels than required of catcher/processors operating in the Pacific cod CDQ fishery. Alternative fishing plans allow vessel operators to avoid the costs associated with carrying a second observer during non-CDQ fishing operations or returning to port to disembark a second observer.

NMFS also is proposing to remove § 679.32(f). This paragraph describes the groundfish CDQ catch retention and monitoring requirements that are applicable to participants in the halibut CDQ fishery. It also includes observer coverage requirements for the halibut CDQ fishery. The halibut IFQ fishery is not subject to comparable requirements; thus, this proposed rule would remove these requirements in order to ensure that the halibut CDQ fishery is not managed more restrictively than the halibut IFQ fishery, per the Magnuson-Stevens Act. The halibut CDQ fishery would continue to be subject to the general halibut IFQ landing and reporting requirements in § 679.5(l).

Observer Coverage Requirements

This proposed rule would revise observer coverage requirements for the CDQ fisheries affected by this action. Existing CDQ observer coverage requirements were developed to support the comprehensive CDQ catch retention and reporting requirements developed for the groundfish CDQ fisheries (including the sablefish CDQ and pollock CDQ fisheries). The observer coverage requirements for vessels fishing for groundfish CDQ or vessels greater than or equal to 60 ft (18.3 m) LOA that are halibut CDQ fishing are different than those required in comparable non-CDQ fisheries. This action would align observer coverage requirements for the halibut CDQ, sablefish CDQ, and pollock CDQ fisheries by amending regulations in § 679.50(c) and (d). This is necessary to ensure that these CDQ fisheries are not subject to additional observer coverage requirements than those that are in place for participants in the halibut and sablefish IFQ fisheries, as well as the non-CDQ pollock fishery. If implemented, such changes would decrease the operational restrictions, reporting complexities, and costs associated with additional observer coverage for participants in the sablefish, halibut, and pollock CDQ fisheries.

Section 679.50(c)(4) would be revised to separate groundfish CDQ observer requirements into three distinct fisheries categories (sablefish, pollock, and groundfish). Each category would describe the applicable observer requirements by vessel type. Observer coverage requirements for vessels participating in the halibut CDQ fishery would be removed.

Observer coverage requirements for vessels sablefish CDQ fishing are proposed to be revised to match those in place for the sablefish IFQ fishery. A proposed, new paragraph (c)(4)(i) of § 679.50 would include a cross-reference to existing sablefish IFQ coverage requirements in § 679.50(c)(1) and (2). Those requirements are based on vessel length, gear type, the fishery category in which a vessel is operating, and the amount of time spent fishing for sablefish during a calendar quarter for those vessels in the 30 percent coverage category. For calculating the days fished per quarter, vessels would combine days fishing sablefish IFQ with days fishing sablefish CDQ.

Similarly, observer coverage requirements for the pollock CDQ fishery would be aligned with those in effect for the AFA pollock fishery by applying the non-CDQ pollock fishery's requirements to the pollock CDQ fishery. Existing observer requirements for both the CDQ and AFA pollock fisheries are almost identical, with the exception of observer coverage levels on trawl catcher vessels. Current regulations require 100 percent observer coverage on catcher vessels fishing for pollock CDQ. This action would revise regulations to base CDQ observer requirements for trawl catcher vessels on vessel length, as is required in the AFA pollock fishery.

In April 2009, the Council adopted Amendment 91 to the groundfish FMP to reduce Chinook salmon bycatch in the BS pollock fishery. Amendment 91 would establish caps on the amount of Chinook salmon that may be caught annually in the pollock fishery. If attained, directed fishing for pollock would be closed. In addition, Amendment 91 would allow industry participants to develop private-sector bycatch reduction incentive plans to assist in forestalling pollock fishery closures. The Council also recommended a suite of salmon bycatch monitoring requirements to improve estimates of Chinook salmon bycatch in the pollock fisheries. One element of these requirements would require all trawl catcher vessels directed fishing for pollock to carry an observer, regardless of vessel length. This would mean that trawl catcher vessels fishing for AFA pollock (or CDQ pollock) would have to carry at least one observer while directed fishing, which is the same requirement now borne by trawl catcher

vessels fishing for CDQ pollock. The Secretary of Commerce approved Amendment 91 to the groundfish FMP in May 2010. NMFS anticipates that regulations implementing the Chinook bycatch reduction provisions of Amendment 91 will be in effect in 2011.

This proposed rule also would eliminate observer requirements for vessels equal to or greater than 60 ft (18.3 m) LOA that are halibut CDQ fishing. Vessels that are halibut IFQ fishing are not required to carry observers. Therefore, paragraph (c)(4) of § 679.50 would be revised to remove references to observer requirements for vessels that are halibut CDQ fishing. Vessels that are greater than 60 ft (18.3 m) LOA that participate in the halibut CDQ fishery would no longer be required to carry an observer at any time.

NMFS is not proposing to change existing observer requirements for the groundfish CDQ fisheries that were not affected by Magnuson-Stevens Act requirements for the regulation of CDQ harvest. The proposed revisions to § 679.50(c)(4) would reorganize the paragraph by fishery category, but would retain existing observer requirements for the groundfish CDQ fisheries other than sablefish and pollock. Many of the remaining groundfish CDQ fisheries, such as flatfish and Atka mackerel caught with trawl gear, are now subject to the same observer and catch monitoring requirements that are required for the non-CDQ flatfish and Atka mackerel fisheries. This is due to the implementation of Amendment 80, which allocated BSAI non-pollock groundfish resources among fishing sectors and authorized the formation of harvesting cooperatives in the non-AFA trawl catcher/processor sector. That action applied identical monitoring and enforcement provisions to the non-CDQ and CDQ trawl fishing activities in this sector, as described earlier in this preamble.

In addition, this proposed rule would revise § 679.50(d)(5) to modify observer coverage requirements for shoreside processors. As with the proposed revision to vessel observer requirements described above, this paragraph would be separated into three fishery categories: fixed gear sablefish CDQ, pollock CDQ, and groundfish CDQ. Observer coverage requirements for the sablefish and pollock CDQ fisheries would be aligned with requirements in place for comparable non-CDQ fisheries. This proposed rule would retain the current requirement that each shoreside processor or stationary floating processor taking deliveries of groundfish CDQ (other than pollock, or sablefish caught with fixed gear) have a least one observer present at all times while groundfish CDQ is being received or processed.

NMFS also proposes to revise § 679.50(c)(2)(iii) to incorporate sablefish CDQ into this paragraph. Currently, this paragraph only encompasses the sablefish IFQ fishery. However, sablefish IFQ and sablefish CDQ are often fished concurrently because it is operationally efficient for vessel operators to combine fishing for IFQ and CDQ sablefish on a single trip. As discussed previously, this rule proposes to include retained sablefish IFQ in the definition of sablefish CDQ. Integrating sablefish CDQ into the description of the sablefish fishery category in this paragraph would, for purposes of observer coverage requirements, allow vessel operators to participate in the sablefish IFQ and CDQ fisheries without having to meet separate observer requirements for each fishery.

Other Revisions for Consistency With the Magnuson-Stevens Act

In addition to the fisheries management regulatory amendments necessary to implement section 305(i)(1)(B)(iv), NMFS also proposes revising or removing other regulations in 50 CFR part 679 that are no longer consistent with section 305(i)(1) of the Magnuson-Stevens Act. These inconsistencies were created as a result of the previously described amendments to the Magnuson-Stevens Act made through the Coast Guard Act and the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act of 2006. NMFS also proposes updating and clarifying regulations and cross-references to support the proposed, primary regulatory amendments made by this action.

Purpose of the CDQ Program

The statement of the purpose of the CDQ Program at § 679.1(e) would be revised to remove inconsistencies with the purpose of the CDQ Program specified in section 305(i)(1)(A) of the Magnuson-Stevens Act. Rather than including the statement of purpose from the Magnuson-Stevens Act in 50 CFR part 679, the text of § 679.1(e) is generalized to be consistent with the format and content of the other paragraphs in this section and to direct the reader to the purpose specified in the Magnuson-Stevens Act. Additionally, the other paragraphs of § 679.1 reference those subparts of 50 CFR part 679 that contain the regulations governing a particular fishery or program. Therefore, NMFS proposes revising § 679.1(e) to read "Regulations in this part govern the Western Alaska CDQ Program (*see* subparts A, B, C, D, and E of this part). The purpose of this program is specified in section 305(i)(1)(A) of the Magnuson-Stevens Fishery Conservation and Management Act."

Community Development Plans (CDPs)

A CDP is defined at § 679.2 as a business plan for the economic and social development of a western Alaska community or group of communities under the CDQ Program. Under § 679.30, the CDP is both an application for allocations of the CDQ and PSQ reserves and an on-going business plan required to be amended by the CDQ groups under certain circumstances. However, amendments to the Magnuson-Stevens Act under the Coast Guard Act removed both the authority and the need for the CDPs as applications for allocations among the CDQ groups and as the primary tool for oversight of the CDQ Program by NMFS and the State.

Section 305(i)(1)(I) of the Magnuson-Stevens Act states the following:

> (I) SECRETARIAL APPROVAL NOT REQUIRED.—Notwithstanding any other provision of law or regulation thereunder, the approval by the Secretary of a community development plan, or an amendment thereof, under the program is not required.

NMFS interprets this provision as prohibiting NMFS from requiring approval of CDPs and amendments to CDPs. In addition, CDPs are no longer needed as periodic applications for allocations of CDQ reserves among the CDQ groups because section 305(i)(1)(C) of the Magnuson-Stevens Act establishes the percentage allocations of groundfish, halibut, and crab among the CDQ groups as the percentage allocations in effect on March 1, 2006. A portion of these percentage allocations may be adjusted every 10 years starting in 2012 under the provisions of section 305(i)(1)(H). Therefore, NMFS proposes to remove the following regulations that are no longer consistent with the provisions of sections 305(i)(1)(I) and 305(i)(1)(C): (1) regulations at § 679.30(a) through § 679.30(d) that require submission, review, and approval of proposed CDPs; (2) regulations at § 679.30(g) related to monitoring of CDPs; and (3) regulations at § 679.30(h) related to suspension and termination of a CDP. Furthermore, NMFS proposes to delete from § 679.43(a) a reference associated with appealing initial administrative decisions made under § 679.30(d).

In addition, this proposed rule also would delete paragraph (d)(3) of § 679.7, which relates to community participation in the CDQ Program. This prohibition refers to a term (CDP) that would no longer be applicable to CDQ Program management. Similarly, NMFS proposes to delete § 679.7(d)(19), which is associated with complying with the requirements of a CDP.

This rule also proposes to revise or remove several definitions in § 679.2 associated with CDPs. The definition of "CDQ allocation" would be revised to remove a reference to the term CDP, since that term is proposed to be removed. The definition for "CDQ project" would be removed because this term is associated with requirements for the CDP in § 679.30. Finally, the definition of "Qualified applicant" is proposed to be removed because this term refers to applicants for CDQ and PSQ allocations under an allocation process described in § 679.30. This term is no longer in use and is not consistent with the Magnuson-Stevens Act.

On August 30, 2006, NMFS notified the State and the CDQ groups that it was suspending enforcement of regulations at 50 CFR part 679 related to the CDPs and the CDQ allocation process because of the inconsistencies with the Magnuson-Stevens Act. This notification and its attachments contain more detailed information about the requirements that are proposed to be removed from 50 CFR part 679 through this proposed rule. A copy of the letter is available at *http://www.alaskafisheries.noaa.gov/cdq/default.htm* or from NMFS (*See* **ADDRESSES**).

CDQ Eligible Communities

The Magnuson-Stevens Act now specifically identifies the communities and entities eligible for the CDQ Program. Previously, communities were determined to be eligible based on specific criteria contained in regulation. This proposed rule would revise the definition of "CDQ group" in § 679.2 to reference 16 U.S.C. 1855(i)(1)(D), which identifies the villages and associated groups that are eligible for the CDQ Program. Similarly, this proposed rule would revise the definition of "eligible community" (for purposes of the CDQ Program) in § 679.2 to incorporate a cross-reference to 16 U.S.C. 1855(i)(1)(D) and to Table 7 of 50 CFR part 679. Table 7 also would be revised to include the CDQ groups and communities that are listed in 16 U.S.C. 1855(i)(1)(D) as a public convenience.

NMFS notes that, although the Magnuson-Stevens Act uses the term "entity" or "entities" in association with the managing organizations associated with specific groups of CDQ eligible communities, NMFS does not propose to amend regulations that contain the commonly used and accepted "CDQ group" or "CDQ groups" to replace it with the terms "CDQ entity" or "CDQ entities." Besides being used in applicable Federal regulations, the term "CDQ group" has been commonly used since 1992 in association with general CDQ Program administration and by the public. NMFS does not believe that adopting the term CDQ entity or entities would enhance CDQ Program administration or that such terminology would be readily adopted by the public.

This proposed rule would revise the definition of "CDQ community" in § 680.2 to reference the list of communities eligible for the CDQ Program to incorporate a cross-reference to 16 U.S.C. 1855(i)(1)(D) and Table 7 to 50 CFR part 679. The current definition references the communities eligible under subpart C of 50 CFR part 679. If subpart C of 50 CFR part 679 is revised as proposed in this action, it will no longer include regulations about communities eligible for the CDQ Program. The definition of "CDQ group" in § 680.2 similarly would be revised to reference 16 U.S.C. 1855(i)(1)(D) and Table 7 to 50 CFR part 679. These changes correspond to the revisions proposed for comparable definitions in § 679.2.

Allocations and Transfers

The proposed rule would revise § 679.31 to consolidate regulations associated with (1) the establishment of CDQ and PSQ reserves, (2) the allocation of CDQ and PSQ reserves among CDQ groups, and (3) the implementation of quota transfers between CDQ groups. These proposed changes would make the regulations that are associated with the creation, distribution, and use of the fisheries resources allocated to the CDQ Program more clear and functional. The changes encompass many revisions to this section, as described in the following paragraphs.

This proposed rule would revise both the title and the introductory paragraph to § 679.31. The title would be revised to reflect that this section contains regulations governing CDQ and PSQ reserves, allocations, and transfers, rather than just CDQ and PSQ reserves. The introductory paragraph that refers to allocations to a CDQ group in accordance with NMFS-approved CDPs and the requirement that no more than 33 percent of each CDQ reserve be allocated to any one group with an approved CDP would be removed because they are not consistent with the Magnuson-Stevens Act. NMFS no longer makes CDQ allocations based on approved CDPs. The Magnuson-Stevens Act now contains requirements governing the percentage allocation of the CDQ reserves and any allocation adjustments that may be made in the future.

Paragraph (a)(2) of § 679.31 would be revised to remove phrases associated with CDPs and eligible communities, since these terms are now inconsistent with the Magnuson-Stevens Act; to remove an erroneous cross-reference within this paragraph; and to remove a definition of "proximate to" that would become obsolete if the other proposed changes in this paragraph are made.

Paragraph (b) would be added to § 679.31 to add language describing how CDQ and PSQ reserves are allocated among CDQ groups. Paragraph (b)(1) would state that the groundfish, halibut, and crab CDQ reserves would be allocated among the CDQ groups on the basis of the CDQ percentage allocations specified in section 305(i)(1)(C) of the Magnuson-Stevens Act, unless modified under section 305(i)(1)(H) of that act. Section 305(i)(1)(H) provides for a decennial review of the CDQ groups' performance and the possibility of an adjustment of up to 10 percent of each CDQ reserve allocated to each CDQ group. Regulations governing the decennial review and allocation adjustment process will be addressed in a future rulemaking. Proposed paragraph (b)(2) describes the allocation of nontarget groundfish species among CDQ groups by the CDQ administrative panel.

Furthermore, this proposed rule would add paragraph (b)(3) to § 679.31 to describe how annual allocations of PSQ are allocated among CDQ groups. These allocations are based on NMFS's determination about PSQ percentage allocations that were included in an August 31, 2006, **Federal Register** notice (71 FR 51804). This proposed paragraph would subsequently require that any future change in the percentage allocations of PSQ among the CDQ groups be done by regulatory amendment.

The proposed rule would revise requirements related to transfers of annual CDQ allocations at § 679.30(e)(1) to be consistent with section 305(i)(1)(C) of the Magnuson-Stevens Act. The proposed rule also would move the remaining transfer regulations from § 679.30(e)(1) to consolidate them with other regulations related to CDQ allocations at § 679.31(c).

The CDQ transfer regulations currently state that "NMFS will not

approve transfers to cover overages of CDQ or PSQ." However, section 305(i)(1)(C) of the Magnuson-Stevens Act now requires that "Voluntary transfers by and among eligible entities shall be allowed, whether before or after harvesting." NMFS interprets this requirement as applying only to those species allocated to the CDQ Program under section 305(i)(1), which are the species that support a directed fishery in the BSAI area. Species allocated to the CDQ Program under the Magnuson-Stevens Act do not include the prohibited species of halibut, crab, and salmon that also are allocated as PSQ to the CDQ Program and among the CDQ groups. The CDQ Program historically has been annually allocated amounts of prohibited species to account for the catch of such species in the groundfish CDQ target fisheries.

In 2005, prior to the Coast Guard Act and the revisions to the Magnuson-Stevens Act, the Council approved an action to modify elements of the CDQ Program. This included provisions to (1) only allocate target groundfish species to individual CDQ groups, (2) require NMFS to manage non-target species at the program level, rather than through individual allocations, and (3) allow post-delivery transfers of groundfish CDQ or halibut PSQ between CDQ groups to address in-season harvest overages. NMFS commenced rulemaking to implement these changes, but that effort was suspended due to the associated changes in the Magnuson-Stevens Act.

In conjunction with the proposed change to allow post-delivery transfers of groundfish CDQ, this proposed rule would incorporate the Council's recommendation to allow post-delivery transfers of halibut PSQ. This would provide CDQ groups the opportunity to work cooperatively among themselves to address future halibut PSQ overages. CDQ groups would still be prohibited from exceeding their annual halibut PSQ, but this measure would allow opportunities for CDQ groups to avoid such infractions. This parallels recent actions NMFS has taken to implement provisions for post-delivery transfers in other major Alaska fisheries, such as the Amendment 80 and Rockfish Program fisheries.

NMFS also proposes to remove § 679.30(e)(2), which contains requirements for transfers of percentage allocations of CDQ and PSQ between CDQ groups. These regulations are different from the regulations in paragraph (e)(1) that govern the transfer of the annual amounts of CDQ or PSQ allocated to each CDQ group. Annual quota amounts are derived by multiplying each annual CDQ reserve and PSQ reserve by the corresponding percentage allocation that has been established for each CDQ group. Section 305(i)(1)(C) of the Magnuson-Stevens Act now specifies the percentage allocations of groundfish, halibut, and crab CDQ in effect for each CDQ group. Thus, it is not consistent with this statutory requirement to continue to allow the CDQ groups to transfer their permanent percentage allocations among other CDQ groups. In addition, transfers of CDQ and PSQ percentage allocations are made through approval of amendments to the CDPs. As described above, section 305(i)(1)(e)(I) of the Magnuson-Stevens Act no longer allows NMFS to require approval of amendments to the CDP. Therefore, NMFS is proposing to remove all current regulations associated with approval of the CDP or amendments to the CDP. This would include the regulations at § 679.30(e)(2) related to amendments to transfer CDQ and PSQ percentage allocations.

Administrative Changes

AI Chinook Salmon Prohibited Species Allocation

This rule would revise regulations associated with allocating AI Chinook salmon PSC to the CDQ Program. Specifically, it would correct an error made when § 679.21(e) was restructured and revised as part of overlapping regulatory revisions. A final rule implementing Amendment 85 to the groundfish FMP (72 FR 50788, September 4, 2007) modified the allocation of the BSAI Pacific cod TAC among various harvest sectors. That action also made a suite of associated regulatory revisions, including a rearrangement of portions of § 679.21(e) to improve the organization of that section. Concurrently, Amendment 80 made other revisions to § 679.21, including increasing the CDQ Program allocations of crab PSC, halibut PSC, and non-Chinook salmon PSC.

When paragraph (e) was restructured, a reference to AI Chinook salmon was mistakenly omitted from § 679.21(e)(3)(i)(A)(*3*)(*i*). That paragraph specifies that the CDQ Program will receive 7.5 percent of the BS Chinook salmon PSC limit set forth in paragraph (e)(1)(vi). It should also refer to the AI Chinook salmon PSC limit at (e)(1)(viii), as the CDQ Program receives an allocation of the BS and the AI Chinook salmon PSC limits. Two separate Chinook salmon PSC limits were established by an action that separated the AI pollock fishery from the BS pollock fishery (70 FR 9856, March 1, 2005). This proposed rule would correct the mistaken deletion of the reference to the AI Chinook salmon PSC limit in describing the allocation of Chinook salmon PSC to the CDQ Program.

CDQ Group Responsibilities

Paragraph (f) of § 679.30, which contains a list of CDQ group responsibilities, is proposed to be removed because these responsibilities are specified elsewhere in regulations, are duplicative, or are so general that they cannot effectively be enforced. It is not necessary for NMFS to require the CDQ groups to direct and supervise all activities of the managing organization, maintain the ability to communicate with all vessels fishing on their behalf, or monitor the catch of CDQ or PSQ. Regulations elsewhere in 50 CFR part 679 contain specific requirements for recordkeeping, reporting, catch monitoring, and catch accounting that provide the information needed to manage the groundfish and halibut CDQ fisheries. For example, requirements to submit various reports about fishing activities and to not exceed CDQ or PSQ allocations already are included in §§ 679.5 and 679.7.

Clarifications and Corrections

This proposed rule also would implement other revisions to §§ 679.2, 679.7, and 679.24 to clarify definitions, clarify terms, and delete obsolete prohibitions and cross-references, as follows:

1. In § 679.2, the proposed rule would revise the definition of "PSQ reserve" to replace "a percentage" with "the amount," which would align this definition with the commonly understood definition of this term. Additionally, cross references in this paragraph to other sections of 50 CFR part 679 would be corrected.

2. In § 679.2, the proposed rule would revise the definition of "CDQ group number" to remove "group." NMFS proposes simply to use the phrase "CDQ number" to refer to the NMFS-issued identification numbers that are used to track each distinct CDQ group's permits, allocations, and catch. This change would align this definition with the term that already is used in common practice (*i.e.,* CDQ number). Additionally, cross references to other sections of 50 CFR part 679 would be corrected, per the remove/add table at the end of this rule.

3. In § 679.7, the proposed rule would delete prohibitions at (d)(21) and (d)(22). These prohibitions are related to reporting requirements for the CDQ catch and delivery reports, formerly located at § 679.5(n), which were

removed by the final rule implementing Amendment 80. Both prohibitions are associated with CDQ reporting requirements that CDQ groups once had to comply with. CDQ groups no longer are required to estimate or submit the catch information described in these two prohibitions, which renders them functionally obsolete. Catch reports now are submitted by vessel operators or seafood processors.

4. In § 679.22, the proposed rule would revise paragraph (h) to update a cross-reference to prohibitions in § 679.7(d). This is associated with the proposed revisions to § 679.7(d), as previously described.

5. In § 679.24, the proposed rule would revise paragraph (b)(1)(ii) to remove the clause "except as provided in paragraph (c)(4)(ii) of this section." Paragraph (c)(4) is associated with gear restrictions in the BSAI sablefish fisheries; it was revised by a final rule published May 19, 2008 (73 FR 28733). That action removed paragraph (c)(4)(ii), which was associated with a longline pot gear closure in the BS during the month of June. The proposed change to paragraph (b)(1)(ii) would correct the inadvertent retention of the cross-reference to a now non-existent paragraph.

6. In §§ 679.5, 679.7, 679.21, 679.26, 679.27, 679.28, 679.50, 679.84, and 679.93, the proposed rule would replace the term "NMFS-certified observer" with "observer." The changes are detailed in the remove/add table at the end of the regulatory text portion of this proposed rule. This would ensure that the term observer is used consistently throughout 50 CFR part 679, and that the term is aligned with the definition of observer in § 679.2.

Classification

Pursuant to sections 304(b)(1)(A) and 305(d) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with the BSAI groundfish FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for the purposes of Executive Order 12866.

An initial regulatory flexibility analysis (IRFA) was prepared, as required by section 603 of the Regulatory Flexibility Act (RFA). The IRFA describes the economic impact this proposed rule, if adopted, would have on small entities. A description of the action, why it is being considered, and the legal basis for this action are contained at the beginning of this section in the preamble and in the SUMMARY section of the preamble. A summary of the analysis follows. A copy of this analysis is available from NMFS (*see* **ADDRESSES**).

This action proposes alternatives that would amend regulations governing the harvest of select CDQ fisheries, per requirements of the Magnuson-Stevens Act. The Coast Guard Act of 2006 amended section 305(i)(1) of the Magnuson-Stevens Act by replacing all of the existing language in this section with new language. This substantially altered many components of the CDQ Program, including the oversight roles of the Federal and State governments, CDQ allocations and the allocation process, and fisheries management requirements. This action addresses specific fishery management provisions of the Magnuson-Stevens Act and proposes revisions to certain CDQ fisheries management regulations. The Magnuson-Stevens Act requires that the harvest of CDQ allocations be regulated no more restrictively than what is required for participants in applicable fishing sectors managed with individual fishing quotas (IFQ) or cooperatives.

The entities directly regulated by this action are the six CDQ groups that participate in the halibut, sablefish, groundfish, and pollock CDQ fisheries in the BSAI. CDQ groups are considered to be small entities under the RFA's categorization of small, non-profit organizations. This action is expected to reduce the costs associated with various aspects of participating in these CDQ fisheries. These include costs associated with different CDQ fisheries regulatory requirements governing: (1) Fisheries observer coverage levels, (2) catch retention and accounting, (3) vessel eligibility designation, and (4) licensing.

All six CDQ groups annually are allocated groundfish CDQ, halibut CDQ, and crab CDQ. These groups participate, either directly or indirectly, in the commercial harvest of these allocations. CDQ groups receive royalties from the successful harvest of CDQ by commercial fishing companies, as well as access to employment and training opportunities for their communities' residents. Royalties and income from CDQ harvesting activities are used to fund economic development projects in CDQ communities. In 2005, the CDQ groups received approximately $61 million in royalties from the harvest of CDQ allocations. Participants in the CDQ fisheries affected by this action would no longer be subject to regulations that are more costly, complex, or burdensome than those that apply to comparable IFQ fisheries or fisheries managed with cooperatives. Thus, this action is not expected to have an adverse economic impact on the small entities affected by this action.

NMFS evaluated three alternatives associated with this action. Alternative 1, the status quo, would maintain different fisheries management regulations for the halibut, fixed gear sablefish, and pollock CDQ fisheries. Each of these fisheries has a comparable IFQ or cooperative fishery. However, due to the different policies and objectives associated with the original development of the regulations governing the CDQ fisheries, CDQ harvest regulations sometimes differed from those in place for the non-CDQ fisheries associated with this action. Maintaining existing regulations associated with the CDQ fisheries that are more restrictive than those in place for comparable IFQ and cooperative fisheries would not comply with the Magnuson-Stevens Act.

Alternative 2, the preferred alternative, would revise CDQ fisheries management regulations in 50 CFR part 679 to align them with regulations that govern fisheries managed with IFQs and fisheries managed with cooperatives. Proposed regulatory revisions include (1) separating fixed gear sablefish CDQ and pollock CDQ from regulations associated with the other groundfish CDQ fisheries, (2) exempting participants in the sablefish CDQ fishery from having to have a license limitation program groundfish license by excluding fixed gear sablefish CDQ from the definition of "license limitation species," (3) removing a requirement that CDQ groups annually submit a request to NMFS to designate specific vessels as eligible to harvest groundfish CDQ on their behalf, (4) revising CDQ catch monitoring requirements to incorporate changes to the basis for CDQ catch accounting, based on adjusting CDQ observer coverage requirements for the halibut, sablefish, and pollock CDQ fisheries, and (5) revising regulations to align observer coverage requirements for the sablefish CDQ, halibut CDQ, and pollock CDQ fisheries with comparable non-CDQ fisheries. On the basis of the best available information, this preferred alternative imposes the minimum adverse economic impact on directly regulated small entities, while achieving the objectives of the regulatory action, among all the alternatives available to the agency. The preferred alternative incorporates regulatory revisions that reduce the potential economic and operational burden on small entities.

Alternative 3 would amend regulations to fully integrate sablefish CDQ into the sablefish IFQ fisheries

management system. It also would make the same general changes proposed for Alternative 2 (described in the preceding section). Sablefish CDQ currently is managed in conjunction with all other groundfish CDQ fisheries. In contrast, halibut CDQ is managed in conjunction with the halibut IFQ fisheries, and is thus subject to IFQ-related regulations. Alternative 3 would (1) require CDQ groups to obtain sablefish CDQ permits prior to conducting directed fishing for sablefish, (2) incorporate sablefish CDQ into the IFQ recordkeeping and reporting requirements and make IFQ prohibitions applicable to the sablefish CDQ fishery, and (3) incorporate the sablefish CDQ fishery into IFQ regulations associated with quota transfers and catch accounting.

Both Alternatives 2 and 3 would meet the requirement of the Magnuson-Stevens Act that CDQ fisheries be managed no more restrictively than fisheries managed with IFQs or harvesting cooperatives by matching regulations as closely as possible for relevant CDQ and non-CDQ fisheries. In the case of Alternative 3, the sablefish CDQ fishery would be fully integrated into both the regulations and the administrative structure in place for the sablefish IFQ fishery.

Alternative 2 was selected as the preferred alternative primarily based on the potential changes that each alternative would bring to the fixed gear sablefish CDQ fishery. NMFS believes that Alternative 2 would result in the least disruptive change to the CDQ groups and CDQ fisheries, while meeting the regulation of harvest requirements in the Magnuson-Stevens Act. Alternative 2 would amend regulations for the CDQ fisheries affected by this action to match regulations in place for most comparable non-CDQ fisheries, but would not make as many changes to the program as Alternative 3. Alternative 2 would not integrate the sablefish CDQ fishery into the sablefish IFQ program. CDQ groups would not be subject to sablefish CDQ permitting requirements and additional IFQ-related reporting requirements, nor would NMFS have to implement such requirements. Furthermore, retaining fixed gear sablefish CDQ under the comprehensive groundfish CDQ accounting and management system would make it easier for NMFS to monitor the catch and transfer of the multiple categories of sablefish CDQ allocated to the CDQ Program and CDQ groups.

NMFS is not aware of any additional alternatives to those considered that would accomplish the objectives of the Magnuson-Stevens Act and other applicable statutes that would minimize the economic impact of the proposed rule on small entities.

NMFS also is not aware of any other Federal rules that would duplicate, overlap, or conflict with this action.

This proposed rule contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA) and which have been approved by OMB under control number 0648–0269. However, these approved PRA requirements would be removed from the collection with publication of the final rule. Public reporting burden per response is estimated at: Four hours for each Alternative Fishing Plan; one hour for CDQ vessel eligibility request; 520 hours for a community development plan (CDP); 20 hours for an annual budget report; eight hours for an annual budget reconciliation report; 40 hours for a substantial amendment to a CDP; eight hours for a technical amendment to a CDP; two minutes for prior notice to observers of CDQ catch aboard a vessel; and two minutes for prior notice to observers by shoreside processors and stationary floating processors of offloading schedule of each CDQ delivery. All requirements except the Alternative Fishing Plan, the two minutes for prior notice to observers of CDQ catch aboard a vessel, and the two minutes for prior notice to observers by shoreside processors and stationary floating processors of offloading schedule of each CDQ delivery would be removed from the collection with publication of the final rule.

Response times include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to NMFS (*see* **ADDRESSES**), and by e-mail to *David_Rostker@omb.eop.gov,* or fax to 202–395–7285.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

List of Subjects in 50 CFR Parts 679 and 680

Alaska, Fisheries, Recordkeeping and reporting requirements.

Dated: July 7, 2010.

Eric C. Schwaab,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons stated in the preamble, NMFS proposes to amend 50 CFR parts 679 and 680 as follows:

PART 679— FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.,* 1801 *et seq.,* 3631 *et seq.;* Pub. L. 108–447.

2. In § 679.1, revise paragraph (e) to read as follows:

§ 679.1 Purpose and scope.

* * * * *

(e) *Western Alaska Community Development Quota (CDQ) Program.* Regulations in this part govern the Western Alaska CDQ Program (*see* subparts A, B, C, D, and E of this part). The purpose of the program is specified in 16 U.S.C. 1855(i)(1)(A).

* * * * *

3. In § 679.2,

a. Remove the definitions for "CDQ group number", "CDQ project", "Community Development Plan", "Eligible vessel", "Managing organization", and "Qualified applicant",

b. Revise the definitions for "CDQ allocation", "CDQ group", "CDQ Program", paragraph (1) of the definition for "Eligible community", and the definitions for "Groundfish CDQ fishing", "Halibut CDQ fishing", "License limitation groundfish", "PSQ allocation", "PSQ reserve", and

c. Add definitions for "CDQ number", "Pollock CDQ fishing", and "Sablefish CDQ fishing" in alphabetical order to read as follows:

§ 679.2 Definitions.

* * * * *

CDQ allocation means a percentage of a CDQ reserve specified under § 679.31 that is assigned to a CDQ group.

CDQ group means an entity identified as eligible for the CDQ Program under 16 U.S.C. 1855(i)(1)(D). CDQ groups are listed in Table 7 to this part.

CDQ number means a number assigned to a CDQ group by NMFS that must be recorded and is required in all logbooks and reports submitted by vessels harvesting CDQ or processors taking deliveries of CDQ.

CDQ Program means the Western Alaska Community Development Quota Program.

* * * * *

Eligible community means:

(1) For purposes of the CDQ Program, a community identified as eligible for the CDQ Program under 16 U.S.C. 1855(i)(1)(D). Eligible communities are listed in Table 7 to this part.

* * * * *

Groundfish CDQ fishing means fishing that results in the retention of any groundfish CDQ species, but that does not meet the definition of pollock CDQ fishing, sablefish CDQ fishing, or halibut CDQ fishing.

* * * * *

Halibut CDQ fishing means using fixed gear, retaining halibut CDQ, and not retaining groundfish over the maximum retainable amounts specified in § 679.20(e) and Table 11 to this part.

* * * * *

License limitation groundfish means target species and the "other species" category, specified annually pursuant to § 679.20(a)(2), except that demersal shelf rockfish east of 140° W longitude, sablefish managed under the IFQ program, sablefish managed under the fixed gear sablefish CDQ reserve, and pollock allocated to the Aleutian Islands directed pollock fishery and harvested by vessels 60 ft (18.3 m) LOA or less, are not considered license limitation groundfish.

* * * * *

Pollock CDQ fishing means directed fishing for pollock in the BS or AI under a pollock allocation to the CDQ Program authorized at § 679.31(a) and accruing pollock catch against a pollock CDQ allocation.

* * * * *

PSQ allocation means a percentage of a PSQ reserve specified under § 679.31 that is assigned to a CDQ group.

PSQ reserve means the amount of a prohibited species catch limit established under § 679.21(e) that has been allocated to the groundfish CDQ Program under § 679.21(e)(3)(i) and (e)(4)(i).

* * * * *

Sablefish CDQ fishing means fishing using fixed gear, retaining sablefish CDQ, and that results in the retained catch of sablefish CDQ plus sablefish IFQ being greater than the retained catch of any other groundfish species or species group.

* * * * *

4. In § 679.4, revise paragraph (e)(1)(i) to read as follows:

§ 679.4 Permits.

* * * * *

(e) * * *

(1) * * *

(i) The CDQ group, the operator of the vessel, the manager of a shoreside processor or stationary floating processor, and the Registered Buyer must comply with the requirements of this paragraph (e) for the catch of CDQ halibut.

* * * * *

5. In § 679.5,

a. Revise the heading of paragraph (n),

b. Remove paragraph (n)(2), and

c. Redesignate paragraphs according to the following table.

Redesignate paragraph(s) . . .	As paragraph(s) . . .
(n)(1)(i)	(n)(2).
(n)(1)(ii)	(n)(3).
(n)(1)(ii)(A) and (B)	(n)(3)(i) and (ii), respectively.
(n)(1)(iii)	(n)(4).
(n)(1)(iii)(A) and (B)	(n)(4)(i) and (ii), respectively.

The revision reads as follows:

§ 679.5 Recordkeeping and reporting (R&R).

* * * * *

(n) *CDQ and PSQ transfers.*

* * * * *

6. In § 679.7, remove paragraphs (d)(3), (d)(4), (d)(21), (d)(22), (d)(24), redesignate paragraphs according to the following table, add paragraph (d)(18), and revise paragraph (f)(3)(ii).

Redesignate paragraph(s) . . .	As paragraph(s) . . .
(d)(5) through (d)(12)	(d)(3) through (d)(10), respectively.
(d)(15)	(d)(11).
(d)(17) through (d)(20)	(d)(12) through (d)(15), respectively.
(d)(23)	(d)(16).
(d)(25)	(d)(17).

The revision and addition reads as follows:

§ 679.7 Prohibitions.

* * * * *

(d) * * *

(18) For the operator of a vessel fishing on behalf of a CDQ group to retain more than the maximum retainable amount of pollock established under § 679.20(e) unless the pollock harvested by that vessel accrues against a CDQ group's pollock CDQ allocation.

(f) * * *

(3) * * *

(ii) *Sablefish.* Retain sablefish caught with fixed gear without a valid IFQ permit, and if using a hired master, without an IFQ hired master permit in the name of an individual aboard, unless fishing on behalf of a CDQ group.

* * * * *

7. In § 679.21, revise paragraph (e)(3)(i)(A)(*3*)(*i*) to read as follows:

§ 679.21 Prohibited species bycatch management.

* * * * *

(e) * * *

(3) * * *

(i) * * *

(A) * * *

(*3*) * * *

(*i*) *Chinook salmon.* 7.5 percent of the PSC limits set forth in paragraphs (e)(1)(vi) and (viii) of this section.

* * * * *

8. In § 679.22, revise paragraph (h) to read as follows:

§ 679.22 Closures.

* * * * *

(h) *CDQ fisheries closures.* See § 679.7(d)(4) through (d)(8) for time and area closures that apply to the CDQ fisheries once salmon and crab PSQ amounts have been reached.

* * * * *

9. In § 679.24, revise paragraph (b)(1)(ii) to read as follows:

§ 679.24 Gear limitations.

* * * * *

(b) * * *

(1) * * *

(ii) While directed fishing for sablefish in the Bering Sea subarea.

* * * * *

10. Remove and reserve § 679.30.

11. Revise § 679.31 to read as follows:

§ 679.31 CDQ and PSQ reserves, allocations, and transfers.

(a) *CDQ and PSQ reserves.*—(1) *Groundfish CDQ reserves.* See § 679.20 (b)(1)(ii).

(2) *Halibut CDQ reserve.* (i) NMFS will annually withhold from the IFQ allocation the proportions of the halibut catch limit that are specified in paragraph (a)(2)(ii) of this section for use as a CDQ reserve.

(ii) The proportions of the halibut catch limit annually withheld for the halibut CDQ program, exclusive of issued QS, are as follows for each IPHC regulatory area (*see* Figure 15 to this part):

(A) *Area 4B.* In IPHC regulatory area 4B, 20 percent of the annual halibut quota shall be apportioned to a CDQ reserve.

(B) *Area 4C.* In IPHC regulatory area 4C, 50 percent of the annual halibut quota shall be apportioned to a CDQ reserve.

(C) *Area 4D.* In IPHC regulatory area 4D, 30 percent of the annual halibut quota shall be apportioned to a CDQ reserve.

(D) *Area 4E.* In IPHC regulatory area 4E, 100 percent of the annual halibut quota shall be apportioned to a CDQ reserve. A fishing trip limit of 10,000 lb (4.54 mt) applies to halibut CDQ harvested through September 1.

(3) *Crab CDQ reserves.* Crab CDQ reserves for crab species governed by the Crab Rationalization Program are specified at § 680.40(a)(1) of this chapter. For Norton Sound red king crab, 7.5 percent of the guideline harvest level specified by the State of Alaska is allocated to the crab CDQ reserve.

(4) *PSQ reserve.* (See § 679.21(e)(3)(i)(A) and (e)(4)(i)(A).)

(b) *Allocations of CDQ and PSQ among the CDQ groups*—(1) *Annual allocations of groundfish, halibut, and crab CDQ reserves among the CDQ groups.* The CDQ reserves in paragraphs (a)(1) through (a)(3) of this section and § 679.20(b)(1)(ii) shall be allocated among the CDQ groups based on the CDQ percentage allocations required under 16 U.S.C. 1855(i)(1)(C), unless modified under 16 U.S.C. 1855(i)(1)(H). A portion of the groundfish CDQ reserves will be allocated according to paragraph (b)(2) of this section.

(2) *Annual allocations of nontarget groundfish species among the CDQ groups.* Seven-tenths of one percent of each of the annual TACs allocated as groundfish CDQ reserves under § 679.20(b)(1)(ii)(C) and (D), with the exception of the trawl gear sablefish CDQ reserves, shall be allocated among the CDQ groups by the panel established in section 305(i)(1)(G) of the Magnuson-Stevens Act.

(3) *Annual allocations of PSQ reserves among the CDQ groups.* The annual PSQ reserves shall be allocated among the CDQ groups based on the percentage allocations approved by NMFS on August 8, 2005. These percentage allocations are described and listed in a notice published in the **Federal Register** on August 31, 2006 (71 FR 51804).

(c) *Transfers.* CDQ groups may request that NMFS transfer CDQ or PSQ from one group to another group by each group submitting a completed transfer request as described in § 679.5(n)(1). NMFS will approve the transfer request if the CDQ group transferring quota to another CDQ group has sufficient quota available for transfer. If NMFS approves the request, NMFS will make the requested transfer(s) by decreasing the account balance of the CDQ group from which the CDQ or PSQ species is transferred and by increasing the account balance of the CDQ group receiving the transferred CDQ or PSQ species. The PSQ will be transferred as of the date NMFS approves the transfer request and is effective only for the remainder of the calendar year in which the transfer occurs.

12. Revise § 679.32 to read as follows:

§ 679.32 CDQ fisheries monitoring and catch accounting.

(a) *Applicability.* This section contains requirements for CDQ groups, vessel operators, and managers of processors that harvest or process fixed gear sablefish CDQ, pollock CDQ, or groundfish CDQ as defined in § 679.2. Regulations governing the catch accounting of halibut CDQ are at § 679.42(c).

(b) *PSQ catch.* Time and area closures required once a CDQ group has reached its salmon PSQ or crab PSQ are listed in § 679.7(d)(4) through (d)(8). The catch of salmon or crab by vessels using other than trawl gear does not accrue to the PSQ for these species. The discard of halibut by vessels using pot gear, jig gear, or hook-and-line gear to harvest sablefish CDQ will not accrue to the halibut PSQ if this bycatch has been exempted from the halibut PSC limit under § 679.21(e)(4)(ii) in the annual BSAI specifications published in the **Federal Register**.

(c) *Fisheries monitoring requirements and catch accounting sources for vessels sablefish, pollock, or groundfish CDQ fishing.*—(1) *Sablefish CDQ fishing with fixed gear.* NMFS will use the following data sources to account for catch made by vessels sablefish CDQ fishing with fixed gear:

(i) *Sablefish CDQ.* NMFS will use the same information sources that are used to debit sablefish IFQ accounts (*see* § 679.42(c)(2)) to debit fixed gear sablefish CDQ accounts. This information must be reported through standard reporting requirements in § 679.5(a).

(ii) *Groundfish CDQ.* NMFS will use the catch information submitted under standard reporting requirements in § 679.5 to debit any other groundfish CDQ species caught while sablefish CDQ fishing from applicable groundfish CDQ accounts.

(2) *Pollock CDQ fishing*—(i) *Operational requirements for catcher/processors and motherships.* Operators of catcher/processors directed fishing for pollock CDQ and motherships taking deliveries of codends from catcher vessels directed fishing for pollock must comply with the following:

(A) Comply with the observer coverage requirements at § 679.50(c)(5)(i)(A).

(B) Notify the observers of CDQ catch before CDQ catch is brought onboard the vessel and notify the observers of the CDQ group and CDQ number associated with the CDQ catch.

(C) Comply with the catch weighing and observer sampling station requirements at § 679.63(a).

(ii) *Data sources used for CDQ catch accounting*—(A) *Catcher/processors and motherships.* NMFS will use observer data as the basis to debit pollock CDQ, groundfish CDQ, and PSQ account balances.

(B) *Catcher vessels delivering to shoreside processors.* NMFS will use the catch information submitted under standard reporting requirements in § 679.5 to debit pollock CDQ, other groundfish CDQ species, and PSQ caught while pollock CDQ fishing from applicable CDQ account balances.

(3) *Groundfish CDQ fishing*—(i) *Operational requirements*—(A) *Catcher vessels without an observer.* Operators of catcher vessels in this category must comply with one of the following requirements:

(*1*) Catcher vessels less than 60 ft (18.3 m) LOA must retain all groundfish CDQ species, halibut CDQ, and salmon

PSQ until they are delivered to a processor that meets the requirements of paragraph (d) of this section, unless retention of groundfish CDQ species is not authorized under § 679.4; discard of the groundfish CDQ species is required under subpart B of this part; or, in waters within the State of Alaska, discard is required by the State of Alaska.

(*2*) Catcher vessels delivering unsorted codends to motherships must retain all CDQ and PSQ species and deliver them to a mothership that meets the requirements of paragraph (c)(3)(i)(D) of this section.

(B) *Catcher vessels with an observer using trawl gear and delivering to shoreside processors.* Operators of vessels in this category must comply with all of the following requirements:

(*1*) Comply with the observer coverage requirements at § 679.50(c)(4)(iii)(E).

(*2*) Retain all CDQ species and salmon PSQ until they are delivered to a processor that meets the requirements of paragraph (d) of this section unless retention of groundfish CDQ species is not authorized under § 679.4 of this part; discard of the groundfish CDQ species is required under subpart B of this part; or, in waters within the State of Alaska, discard is required by laws of the State of Alaska.

(*3*) Retain all halibut and crab PSQ in a bin or other location until it is counted and sampled by the observer.

(*4*) Provide space on the deck of the vessel for the observer to sort and store catch samples and a place from which to hang the observer sampling scale.

(C) C*atcher/processors using trawl gear.* Operators of vessels in this category must comply with the following requirements:

(*1*) Comply with the observer coverage requirements at 679.50(c)(4)(iii)(A).

(*2*) Notify the observers of CDQ catch before CDQ catch is brought onboard the vessel and notify the observers of the CDQ group and CDQ number associated with the CDQ catch.

(*3*) Comply with the catch monitoring requirements at § 679.93(c).

(D) *Motherships taking deliveries of unsorted codends.* Operators of vessels in this category must comply with the following requirements:

(*1*) Comply with the observer coverage requirements at § 679.50(c)(4)(iii)(B).

(*2*) Notify the observers of CDQ catch before CDQ catch is brought onboard the vessel and notify the observers of the CDQ group and CDQ number associated with the CDQ catch.

(*3*) Provide an observer sampling station as described at § 679.28(d).

(*4*) The operator of a mothership taking deliveries of unsorted codends from catcher vessels must weigh all catch on a scale that complies with the requirements of § 679.28(b). Catch must not be sorted before it is weighed, unless a provision for doing so is approved by NMFS for the vessel. Each CDQ haul must be sampled by an observer for species composition and the vessel operator must allow observers to use any scale approved by NMFS to weigh partial CDQ haul samples.

(E) *Observed catcher vessels using nontrawl gear.* Operators of vessels in this category must retain all CDQ species until they are delivered to a processor that meets the requirements of paragraph (d) of this section unless retention of groundfish CDQ species is not authorized under § 679.4 of this part, discard of the groundfish CDQ or PSQ species is required under subpart B of this part, or, in waters within the State of Alaska, discard is required by laws of the State of Alaska. All of the halibut PSQ must be counted by the observer obtained in compliance with § 679.50(c)(4)(iii)(E), and sampled for length or average weight.

(F) *Catcher/processors using nontrawl gear.* Each CDQ set on a vessel using nontrawl gear must be sampled by an observer obtained in compliance with § 679.50(c)(4)(iii)(C) or (D) for species composition and average weight.

(ii) *Data sources used for CDQ catch accounting.* NMFS will use the following sources to account for the catch of groundfish CDQ and PSQ species caught by vessels groundfish CDQ fishing.

(A) *Catcher vessels less than 60 ft (18.3 m) LOA.* The weight or numbers of all CDQ and PSQ species will be obtained from the CDQ delivery information submitted by processors to NMFS in accordance with paragraph (d) of this section.

(B) *Catcher vessels delivering unsorted codends.* The weight and numbers of groundfish CDQ (including pollock) and PSQ species will be determined by applying the species composition sampling data collected for each CDQ haul by the observer on the mothership to the total weight of each CDQ haul as determined by weighing all catch from each CDQ haul on a scale approved under § 679.28(b).

(C) *Observed catcher vessels using trawl gear.* The estimated weight of halibut and numbers of crab PSQ discarded at sea will be determined by using the observer's sample data. The weight or numbers of all landed groundfish CDQ and salmon PSQ will be derived from the delivery information submitted through the eLandings system, as required at § 679.5(e).

(D) *Catcher/processors and motherships using trawl gear.* The weight and numbers of CDQ and PSQ species will be determined by applying the observer's species composition sampling data for each CDQ haul to the total weight of the CDQ haul as determined by weighing all catch from each CDQ haul on a scale certified under § 679.28(b).

(E) *Observed catcher vessels using nontrawl gear.* The weight of halibut PSQ discarded at sea will be determined by using the observer's sample data. The weight or numbers of all landed groundfish CDQ and salmon PSQ will be derived from the delivery information submitted through the eLandings system, as required at § 679.5(e).

(F) *Catcher/processors using nontrawl gear.* The weight of halibut PSQ and all groundfish CDQ species, except sablefish, will be determined by applying the observer's species composition sampling data to the estimate of total catch weight, if any CDQ species are discarded at sea. Sablefish CDQ caught with fixed gear is accounted for as described in paragraph (c)(1) of this section.

(G) *Alternative fishing plan for catcher/processors.* A CDQ group may propose the use of an alternative method, such as using only one observer where normally two would be required, sorting and weighing of all catch by species on processor vessels, or using larger sample sizes than could be collected by one observer by submitting an alternative fishing plan to NMFS. NMFS will review the alternative fishing plan and approve it or notify the qualified applicant in writing if the proposed alternative does not meet the requirements of such a plan.

(*1*) *Alternative fishing plan requirements.* (*i*) The alternative proposed must provide equivalent or better estimates than use of the NMFS standard data source would provide and the estimates must be independently verifiable.

(*ii*) Each haul or set on an observed vessel must be able to be sampled by an observer for species composition.

(*iii*) Any proposal to sort catch before it is weighed must ensure that the sorting and weighing process will be monitored by an observer.

(*iv*) The time required for the level 2 observer to complete sampling, data recording, and data communication duties must not exceed 12 hours in each 24-hour period and the level 2 observer must not be required to sample more than 9 hours in each 24-hour period. NMFS will not approve an alternative fishing plan that would require the

observer to divide a 12-hour shift into shifts of less than 6 hours.

(*2*) *Alternative fishing plan distribution and validity.* The CDQ group must provide a copy of the NMFS-approved alternative fishing plan to the operator of the approved vessel. The vessel operator must maintain the plan onboard the vessel at all times while it is operating under the alternative fishing plan. Alternative fishing plans are valid for the remainder of the calendar year in which they are approved. Alternatives to the requirement for a certified scale or an observer sampling station will not be approved.

(d) *Monitoring requirements for shoreside processors and stationary floating processors.*—(1) *Requirements for processors taking deliveries of pollock CDQ.* (i) *Catch weighing.* Managers of shoreside processors or stationary floating processors taking deliveries of pollock CDQ must comply with the requirements at § 679.63(c).

(ii) *Catch monitoring and control plan.* Managers of AFA inshore processors or stationary floating processors taking deliveries of pollock CDQ must follow an approved catch monitoring and control plan as described at § 679.28(g).

(2) *Requirements for processors taking deliveries of groundfish CDQ.* Managers of shoreside processors and stationary floating processors taking deliveries of groundfish CDQ must comply with the following requirements:

(i) Comply with observer coverage requirements at § 679.50(d)(5)(iii) of this part.

(ii) *Provide prior notice to observer of offloading schedule.* Notify the observer of the offloading schedule of each CDQ delivery at least 1 hour prior to offloading to provide the observer an opportunity to monitor the sorting and weighing of the entire delivery.

(iii) *CDQ and PSQ by weight.* Sort and weigh on a scale approved by the State of Alaska under § 679.28(c) all groundfish and halibut CDQ or PSQ by species or species group.

(iv) *PSQ by number.* Sort and count all salmon and crab PSQ.

(v) *CDQ and PSQ sorting and weighing.* Sorting and weighing of CDQ and PSQ must be monitored by an observer.

13. In § 679.43, paragraph (a) is revised to read as follows:

§ 679.43 Determinations and appeals.

(a) *General.* This section describes the procedure for appealing initial administrative determinations made in this title under parts 300, 679, 680, and subpart E of part 300.

* * * * *

14. In § 679.50, paragraphs (c)(2)(iii), (c)(4), and (d)(5) are revised to read as follows:

§ 679.50 Groundfish Observer Program.

* * * * *

(c) * * *

(2) * * *

(iii) *Sablefish fishery.* In a retained catch of IFQ and CDQ sablefish that is greater than the retained catch of any other groundfish species or species group that is specified as a separate groundfish fishery under this paragraph (c)(2).

* * * * *

(4) *Fixed gear sablefish CDQ, pollock CDQ, and groundfish CDQ fisheries.* The owner or operator of a vessel fishing for sablefish CDQ with fixed gear, pollock CDQ fishing, or groundfish CDQ fishing as defined in § 679.2 must comply with the following observer coverage requirements while transporting (catcher vessel only), harvesting, processing, or taking delivery of CDQ or PSQ species.

(i) *Fixed gear sablefish CDQ fishery.* Catcher vessels and catcher/processor vessels equal to or greater than 60 ft (18.3 m) LOA participating in the fixed gear sablefish CDQ fishery must comply with the observer coverage requirements in paragraphs (c)(1)(iv) through (viii) and (c)(2)(iii) of this section.

(ii) *Pollock CDQ fishery.* (A) A catcher/processor that is pollock CDQ fishing or mothership taking deliveries from catcher vessels that are pollock CDQ fishing must comply with the observer coverage and workload requirements in paragraph (c)(5) of this section.

(B) A catcher vessel that is pollock CDQ fishing must comply with the observer coverage requirements in paragraph (c)(1) of this section.

(iii) *Groundfish CDQ fisheries*—(A) *Catcher/processors using trawl gear.* A catcher/processor not listed in § 679.4(l)(2)(i) using trawl gear and groundfish CDQ fishing, except catcher/processors directed fishing for pollock CDQ, must comply with the observer coverage requirements at paragraph (c)(6)(i) of this section and the catch monitoring requirements in § 679.93(c).

(B) *Motherships.* A mothership that receives groundfish CDQ species from catcher vessels using trawl gear to participate in a directed fishery for CDQ groundfish species must have at least two level 2 observers as described at paragraphs (j)(1)(v)(D) and (E) of this section aboard the vessel, at least one of whom must be certified as a lead level 2 observer.

(C) *Catcher/processors using hook-and-line gear.* A catcher/processor using hook-and-line gear to directed fish for groundfish CDQ species must have at least two level 2 observers as described at paragraphs (j)(1)(v)(D) and (E) of this section aboard the vessel, unless NMFS approves an alternative fishing plan under § 679.32(c)(3) authorizing the vessel to carry only one lead level 2 observer. At least one of the level 2 observers must be certified as a lead level 2 observer.

(D) *Catcher/processors using pot gear.* A catcher/processor using pot gear to directed fish for groundfish CDQ species must have at least one lead level 2 observer as described at paragraphs (j)(1)(v)(D) and (E) of this section aboard the vessel.

(E) *Catcher vessels.* A catcher vessel equal to or greater than 60 ft (18.3 m) LOA using any gear to directed fish for groundfish CDQ species, except a catcher vessel using trawl gear that delivers only unsorted codends to a mothership or catcher/processor, must have at least one level 2 observer as described at paragraph (j)(1)(v)(D) of this section aboard the vessel.

(F) *Limitations.* The time required for the level 2 observer to complete sampling, data recording, and data communication duties shall not exceed 12 hours in each 24-hour period, and, the level 2 observer is required to sample no more than 9 hours in each 24-hour period.

* * * * *

(d) * * *

(5) *Accepts deliveries of fixed gear sablefish CDQ, pollock CDQ, and groundfish CDQ* as defined in § 679.2 must comply with the following observer coverage requirements.

(i) *Fixed gear sablefish CDQ fishery.* Shoreside processors or stationary floating processors taking delivery of fixed gear sablefish CDQ must comply with the observer coverage requirements in paragraphs (d)(1) and (d)(2) of this section.

(ii) *Pollock CDQ fishery.* Each shoreside processor or stationary floating processor taking delivery of pollock CDQ must comply with the observer coverage requirements and duty restrictions in paragraph (d)(6) of this section.

(iii) *Groundfish CDQ fisheries.* Each shoreside processor or stationary floating processor taking deliveries of groundfish CDQ must have at least one level 2 observer as described at paragraph (j)(1)(v)(D) of this section present at all times while groundfish CDQ is being received or processed.

(iv) *Observer working hours.* The time required for the level 2 observer to complete sampling, data recording, and data communication duties may not exceed 12 hours in each 24-hour period, and the level 2 observer is required to sample no more than 9 hours in each 24-hour period.

* * * * *

§§ 679.2, 679.5, 679.7, 679.21, 679.26, 679.27, 679.28, 679.50, 679.84, and 679.93 [Amended]

15. At each of the locations shown in the "Location" column of the following table, remove the phrase indicated in the "Remove" column and replace it with the phrase indicated in the "Add" column for the number of times indicated in the "Frequency" column.

Notices

Federal Register
Vol. 75, No. 133
Tuesday, July 13, 2010

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Dixie Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meetings.

SUMMARY: The Dixie Resource Advisory Committee will meet in Cedar City, Utah. The committee is meeting as authorized under the Secure Rural Schools and Community Self-Determination Act (Pub. L. 110–343) and in compliance with the Federal Advisory Committee Act. The purpose of the two meetings are to conduct "welcomes" and introductions, review the Federal Advisory Committee Act requirements, brief participants on Payments to States legislative history, discuss the guidelines for Title II and Title III funding and proposals, discuss preliminary project ideas, and receive public comment on the meeting subjects and proceedings.

DATES: July 27, 2010, 9 a.m. & August 18, 2010, 9 a.m.

ADDRESSES: July 27, 2010 meeting will be held at Southern Utah University, Sharwan Smith Center (Cedar Breaks Room), 351 West University Blvd. August 18, 2010 meeting will be held at the Cedar City Heritage Center, 105 North 100 East, Room 1, Cedar City, Utah. Written comments should be sent to Dixie National Forest, 1789 North Wedgewood, Cedar City, UT 84701. Comments may also be sent via e-mail to *gmerrill@fs.fed.us,* or via facsimile to 435–865–3791.

All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Dixie National Forest, 1789 North Wedgewood, Cedar City, UT. Visitors are encouraged to call ahead to (435) 865–3730 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Kenton Call, RAC Coordinator, Dixie National Forest, (435) 865–3730; e-mail: *ckcall@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The meetings are open to the public. The following business will be conducted: (1) Welcome and Committee introductions; (2) Federal Advisory Committee Act overview and powerpoint; (3) Review of Payments to States legislative history and discussion of requirements related to Title II and Title III funding; (4) Discussion of Committee member roles and operational guidelines; (5) Discussion of preliminary projects; (6) Election of committee chairperson, (7) Review of next meeting purpose, location, and date; and (8) Receive public comment. Persons who wish to bring related matters to the attention of the Committee may file written statements with the Committee staff before or after the meeting. Public input sessions will be provided and individuals who made written requests by July 19, 2010 will have the opportunity to address the Committee at those sessions. As time allows, there may be additional opportunity for public comment.

Dated: July 6, 2010.

Maria T. Garcia,

Acting Forest Supervisor.

[FR Doc. 2010–17049 Filed 7–12–10; 8:45 am]

BILLING CODE 3410–11–P

DEPARTMENT OF AGRICULTURE

Forest Service

Prince William Sound Resource Advisory Committee; Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Prince William Sound Resource Advisory Committee will convene for their first formal meeting in Anchorage, Alaska, for the purpose of establishing the Committee through the development of bylaws, a chairperson, and a future meeting schedule, under the provisions of Title II of the Secure Rural Schools and Community Self-Determination Act of 2008 (Pub. L. 110–343).

DATES: The meeting will be held on Monday, July 26, 2010.

ADDRESSES: The meeting will take place at the Chugach National Forest Supervisor's Office, 3301 "C" Street; Suite 300, Anchorage, Alaska 99503. Send written comments to Prince William Sound Resource Advisory Committee, c/o USDA Forest Service, PO Box 280, Cordova, AK 99574 or electronically to *nobrien@fs.fed.us.*

FOR FURTHER INFORMATION CONTACT: Teresa Benson, Designated Federal Official, c/o USDA Forest Service, PO Box 280, Cordova, AK 99574, telephone (907) 424–4742.

SUPPLEMENTARY INFORMATION: The agenda will include background on the provisions of Title II of the Secure Rural Schools and Community Self-Determination Act of 2008 (Pub. L. 110–343) and an overview of the Federal Advisory Committee Act (FACA). In addition, the agenda will include time for the Committee to develop and adopt bylaws, a chairperson, and a future meeting schedule to discuss project proposals. All Resource Advisory Committee Meetings are open to the public. The public input and comment forum will take place in the afternoon of July 26, 2010. Interested citizens are encouraged to attend.

Date: July 2, 2010.

Teresa M. Benson,

District Ranger.

BILLING CODE 3410–11–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of Industry and Security.

Title: Special Priorities Assistance.

OMB Control Number: 0694–0057.

Form Number(s): BIS–999.

Type of Request: Regular submission (Extension of a currently approved information collection).

Burden Hours: 600.

Number of Respondents: 1,200.

Average Hours per Response: 30 minutes.

Needs and Uses: The information collected from defense contractors and suppliers is required for the enforcement and administration of special priorities assistance under the Defense Production Act, the Selective Service Act and the Defense Priorities and Allocation System (DPAS) regulation. It is used by Government personnel to provide assistance to these companies when placing rated orders, to obtain timely delivery of products, materials or services from suppliers, or for any other reason under the DPAS, in support of approved national programs.

Affected Public: Business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain benefits.

OMB Desk Officer: Jasmeet Seehra, Fax number (202) 395–7285.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Jasmeet Seehra, OMB Desk Officer, at *jseehra@omb.eop.gov,* or fax to (202) 395–7285.

Dated: July 7, 2010.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

International Trade Administration

Aerospace Supplier Development Mission to China

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

Mission Description

The United States Department of Commerce, International Trade Administration, U.S. and Foreign Commercial Service (CS) is organizing an Aerospace Supplier Development Mission to China from November 7–17, 2010.

The 2010 Aerospace Supplier Development Mission to China is being developed due to a successful similar trade mission to China in 2008 and due to continued requests from many small and medium-sized enterprises (SMEs) supplying the aviation industry. It is intended to include representatives from a variety of U.S. aerospace industry manufacturers and service providers, and it will introduce these suppliers to end-users and prospective partners whose needs and capabilities are targeted to each U.S. participant's strengths. Participating in an official U.S. industry delegation, rather than traveling to China on their own, will enhance the companies' ability to secure meetings in China. The mission will include appointments and briefings in Beijing, Shanghai, Xi'an, and Guangzhou, some of China's major aerospace industry hubs, as well as participation in Airshow China in Zhuhai to conclude the mission. The mission participants will have opportunities to interact extensively with CS China aviation specialists to discuss industry developments, opportunities, and sales strategies.

Commercial Setting

The Chinese aerospace sector ranks among the world's most dynamic, going far beyond the country's massive investment in aircraft (mainland carriers anticipate reaching 4,000 by 2025). Chinese aerospace companies have rapidly developed into serious players in the industry's global value chain. Chinese aerospace firms, including those linked to U.S. and European "primes," now frequently make their own sourcing decisions, participate as "risk sharing partners" in new airframe and engine development programs, or take on the role of first-tier suppliers on Chinese programs.

The evolution of China's aerospace industry is part of a broader industry trend toward supply chain consolidation and lean manufacturing. Many traditional Tier 1 supplier responsibilities are being pushed down the supply chain to second- and third-tier suppliers. As the larger firms move into aerospace system integration, the lower-tier suppliers have little choice but to globalize themselves. This involves supplying China with products and services that might historically have been provided to U.S. and European suppliers that have since shifted production. In many cases, once established in China, the first-tier firms require their supply chain partners to begin dealing directly with Chinese members of the supply chain. While extremely challenging for SME suppliers, these new relationships bring an added benefit—the opportunity for additional sales with other aerospace companies doing business in China.

China Aviation Industry Corporation I and II (AVIC I and II), conglomerates of hundreds of companies, control the country's aerospace industry. Over the years, the main AVIC companies have formed joint-venture companies with key Western aerospace partners. The larger AVIC companies also have so-called "foreign divisions" engaged in manufacturing, design and engineering for Western customers on a semi-autonomous basis.

Mission Goals

The goals of the 2010 Aerospace Supply Chain Development Mission to China are threefold: (1) To introduce U.S. companies to Chinese joint-venture groups and Western original equipment manufacturers (OEMs); (2) to explore supplier opportunities under other aerospace programs (including Chinese programs and Western programs with Chinese firms "risk sharing"); and (3) to facilitate an effective U.S. presence at Airshow China.

Mission Scenario

The mission's first stop is Beijing, home to AVIC's headquarters and the China National Aero-Technology Import and Export Corporation (CATIC), AVIC's trading and purchasing division. The second and third stops are Shanghai and Xi'an, home to Xi'an Aircraft Industry Group and the Yanliang National Aviation High-Tech Industrial Base. The fourth stop, Guangzhou, provides the opportunity to focus on Guangzhou Aircraft Maintenance Engineering Company Limited (GAMECO) as an example of a maintenance/repair/overhaul operation and a meeting with MTU Zhuhai.

The mission will conclude in Zhuhai, at the China International Aviation and Aerospace Exhibition (known as Airshow China), the only Chinese aerospace exhibition endorsed by the Chinese central government. The last Airshow China, in 2008, marked the largest ever in the show's history. It attracted 600 exhibitors from 35 countries, showcased 58 aircraft including the Airbus A380 and turned out over 90,000 trade visitors along with 200 media units. CS Guangzhou will provide entry to the trade show and will help facilitate the U.S. companies' participation in the American Product Literature Center.

Matchmaking efforts will involve coordination with the American

Chamber of Commerce in China's U.S.-China Aviation Cooperation Program (ACP), a public/private partnership promoting technical, policy and commercial cooperation between the two countries' aviation sectors, and with other relevant groups. CS Guangzhou will help facilitate walk-in meetings for mission participants with the Chinese exhibitors at the air show. U.S. participants will be counseled before, during, and after the mission by U.S. Export Assistance Center trade specialists, primarily by members of the Aerospace and Defense Technology Team, as well as participate in the American Product Literature Center at Airshow China, allowing them to display their company brochures and materials.

Participation in the Aerospace Supplier Development Mission to China will include the following:

- Pre-travel briefings/webinar on subjects ranging from Chinese business practices to security;
- Pre-scheduled meetings with potential partners, distributors, end users, or local industry contacts in Beijing, Shanghai, Xi'an, Guangzhou, and at Airshow China in Zhuhai;
- Transportation to airports in Beijing, Shanghai, and Xi'an;
- Coach class airline tickets: Beijing to Shanghai, Shanghai to Xi'an, Xi'an to Guangzhou;
- Bus transportation from Guangzhou to Zhuhai;
- One Airshow China entry pass per company representative;
- Participation in the American Product Literature Center at Airshow China;
- Participation in industry receptions at Airshow China;
- Meetings with CS China aviation industry specialists in Beijing, Shanghai and Guangzhou;

Proposed Timetable

Sunday, Nov 7, 2010, BJ	—Participants arrive in Beijing on their own schedule.
	—Afternoon briefing at Hotel.
Monday, Nov 8, BJ	—Pre-scheduled matchmaking appointments, focusing on contacts at AVIC 1 and CATIC.
	—Briefing on Civil Aviation Administration of China (CAAC) standards and regulations.
	—Roundtable with the ACP.
Tuesday, Nov 9, BJ–SH	—Meetings with Air China, AMECO.
	—Afternoon flight to Shanghai.
Wednesday, Nov 10, SH	—Meetings with Shanghai Aircraft Manufacturing Co, Ltd and COMAC.
	—AM Tour.
	—Industry briefing at CS Shanghai.
	—Meeting at Honeywell China Aerospace Academy (TBC) OR Shanghai Pratt & Whitney Aircraft Engine Maintenance Co., Ltd.
	—Meeting at Boeing Shanghai Aviation Services Co, Ltd.
Thursday, Nov 11, SH–XA	—Morning flight to Xi'an, arrive Yanliang in early afternoon.
	—Visit Yanliang National Aviation High-Tech Industrial Base in the afternoon.
Friday, Nov 12, XA	—Visits to Xi'an Aircraft Industry Group.
Saturday, Nov 13, XA	—Trip to Teracotta Warrior site; other sightseeing.
Sunday, Nov 14, XA–GZ	—Sightseeing cont'd.
	—Afternoon flight to Guangzhou.
Monday, Nov 15, GZ–ZH	—Networking breakfast with the American Chamber of Commerce.
	—Meeting with GAMECO's Procurement Department and China Southern Airlines' Procurement Department, with technical tour of the facilities.
	—Meeting with China Southern Airlines.
	—Bus trip to Zhuhai (approx 2 hours).
Tuesday, Nov 16, ZH	—Attend Airshow China opening ceremonies
	—One-on-one appointments and show visits.
	—APLC show.
Wednesday, Nov 17, ZH	—Breakfast meeting with Consul General in Zhuhai.
	—One-on-one appointments and show visits.
	4 pm: Mission ends.

Participation Requirements

All parties interested in participating in the Aerospace Supplier Development Mission to China must complete and submit an application for consideration by the Department of Commerce. All applicants will be evaluated on their ability to meet certain conditions and best satisfy the selection criteria as outlined below. The mission will open on a first come first served basis to a minimum of 12 qualified U.S. companies.

Fees and Expenses

After a company has been selected to participate on the mission, a payment to the Department of Commerce in the form of a participation fee is required. The participation fee will be $5,100 per SME (less than 500 employees) plus $800 per additional company representative; or $6,000 per large company (more than 500 employees) plus $800 per additional company representative.

Expenses for lodging, some meals, incidentals, and travel (except for in-country arrangements previously noted) will be the responsibility of each mission participant.

Conditions for Participation

- An applicant must submit a completed and signed mission application and supplemental application materials, including adequate information on the company's products and/or services, primary market objectives, and goals for participation.
- Each applicant must also certify that the products and services it seeks to export through the mission are either produced in the United States, or, if not, marketed under the name of a U.S. firm and have at least fifty-one percent U.S. content.

Selection Criteria for Participation

Selection will be based on the following criteria:

• Suitability of a company's products or services to the mission's goals.

• Consistency of the company's goals and objectives with the stated scope of the trade mission.

• Timeliness of company's signed application and participation agreement.

• Timely and adequate provision of information on company's products/services and market objectives, in order to facilitate appropriate matching with potential business partners.

Any partisan political activities (including political contributions) of an applicant are entirely irrelevant to the selection process.

Timeframe for Recruitment and Applications

Mission recruitment will be conducted in an open and public manner, including publication in the Federal Register, posting on the Commerce Department trade mission calendar (*http://www.ita.doc.gov/doctm/tmcal.html*) and other Internet Web sites, press releases to general and trade media, direct mail, broadcast fax, notices by industry trade associations and other multiplier groups, and publicity at industry meetings, symposia, conferences, and trade shows. Recruitment for the mission will begin immediately and conclude no later than September 10, 2010. Applications received after that date will be considered only if space and scheduling constraints permit.

BILLING CODE 3510–FP–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

Submission for OMB Review; Comment Request

The United States Patent and Trademark Office (USPTO) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

AGENCY: United States Patent and Trademark Office (USPTO), Commerce.

Title: Deposit of Biological Materials.

Form Number(s): None.

Agency Approval Number: 0651–0022.

Type of Request: Extension of a currently approved collection.

Burden: 3,505 hours annually.

Number of Respondents: 3,501 responses per year. The USPTO expects that 3,500 patent applications on inventions dealing with deposits of biological materials will be filed each year, and that 1 depository will seek recognition every three years.

Avg. Hours per Response: The USPTO estimates that it will take 1 hour for the average patent applicant respondent to collect and submit the necessary deposit information and an average of 5 hours for the average depository seeking approval to store biological material to gather and submit the necessary approval information.

Needs and Uses: Information on the deposit of biological materials in depositories is required for (a) the USPTO determination of compliance with 35 U.S.C. 2(b)(2) and 112, and 37 CFR 1.801–1.809 and 1.14, where inventions sought to be patented rely on biological material subject to the deposit requirement, including notification to the interested public about where to obtain samples of deposits; and (b) in compliance with 37 CFR 1.803 to demonstrate that the depositories are qualified to store and test the biological material submitted to them. This collection is used by the USPTO to determine whether or not the applicant has met the requirements of the patent regulations. In addition, the USPTO uses this information to determine the suitability of a respondent depository based upon administrative and technical competence and the depository's agreement to comply with the requirements set forth by the USPTO.

Affected Public: Individuals or households; businesses or other for-profits; not-for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Nicholas A. Fraser, e-mail: *Nicholas_A_Fraser@omb.eop.gov.*

Once submitted, the request will be publicly available in electronic format through the Information Collection Review page at *http://www.reginfo.gov.*

Paper copies can be obtained by:

• *E-mail: InformationCollection@uspto.gov.* Include "0651–0022 copy request" in the subject line of the message.

• *Fax:* 571–273–0112, marked to the attention of Susan K. Fawcett.

• *Mail:* Susan K. Fawcett, Records Officer, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Written comments and recommendations for the proposed information collection should be sent on or before August 12, 2010 to Nicholas A. Fraser, OMB Desk Officer, via e-mail at *Nicholas_A_Fraser@omb.eop.gov* or by fax to 202–395–5167, marked to the attention of Nicholas A. Fraser.

Susan K. Fawcett,

Records Officer, USPTO, Office of the Chief Information Officer.

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

Submission for OMB Review; Comment Request

The United States Patent and Trademark Office (USPTO) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: United States Patent and Trademark Office (USPTO).

Title: Patent Term Extension.

Form Number(s): PTO/SB/131.

Agency Approval Number: 0651–0020.

Type of Request: Revision of a currently approved collection.

Burden: 7,808 hours annually.

Number of Respondents: 13,586 responses per year.

Avg. Hours per Response: The USPTO estimates that it will take the public approximately 10 minutes (0.17 hours) to 25 hours, depending on the complexity and type of filing, to gather the necessary information, prepare the

appropriate documents, and submit the information in this collection to the USPTO.

Needs and Uses: The patent term restoration portion of the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417), which is codified at 35 U.S.C. 156, permits the USPTO to extend the term of protection under a patent to compensate for delay during regulatory review and approval by the Food and Drug Administration (FDA) or Department of Agriculture. Only patents for drug products, medical devices, food additives, or color additives are potentially eligible for extension. The maximum length that a patent may be extended under 35 U.S.C. 156 is five years. The USPTO administers 35 U.S.C. 156 through 37 CFR 1.710–1.791.

Separate from the extension provisions of 35 U.S.C. 156, the USPTO may in some cases extend the term of an original patent due to certain delays in the prosecution of the patent application, including delays caused by interference proceedings, secrecy orders, or appellate review by the Board of Patent Appeals and Interferences or a Federal court in which the patent is issued pursuant to a decision reversing an adverse determination of patentability. The patent term provisions of 35 U.S.C. 154(b), as amended by Title IV, Subtitle D of the Intellectual Property and Communications Omnibus Reform Act of 1999, require the USPTO to notify the applicant of the patent term adjustment in the notice of allowance and give the applicant an opportunity to request reconsideration of the USPTO's patent term adjustment determination. The USPTO administers 35 U.S.C. 154 through 37 CFR 1.701–1.705.

The public uses this information collection to file requests related to patent term extensions and reconsideration or reinstatement of patent term adjustments. The information in this collection is used by the USPTO to consider whether an applicant is eligible for a patent term extension or reconsideration of a patent term adjustment and, if so, to determine the length of the patent term extension or adjustment.

Affected Public: Businesses or other for-profits; and not-for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Nicholas A. Fraser, e-mail: *Nicholas_A._Fraser@omb.eop.gov.*

Once submitted, the request will be publicly available in electronic format through the Information Collection Review page at *http://www.reginfo.gov.*

Paper copies can be obtained by:

- *E-mail:* InformationCollection@uspto.gov. Include "0651–0020 copy request" in the subject line of the message.
- *Fax:* 571–273–0112, marked to the attention of Susan K. Fawcett.
- *Mail:* Susan K. Fawcett, Records Officer, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Written comments and recommendations for the proposed information collection should be sent on or before August 12, 2010 to Nicholas A. Fraser, OMB Desk Officer, via e-mail to *Nicholas_A._Fraser@omb.eop.gov,* or by fax to 202–395–5167, marked to the attention of Nicholas A. Fraser.

Dated: July 8, 2010.

Susan K. Fawcett,

Records Officer, USPTO, Office of the Chief Information Officer.

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Conflict of Interest Disclosure for Nonfederal Government Individuals Who Are Candidates To Conduct Peer Reviews

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before September 13, 2010.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Karl Moline, (301) 713–2328 or *Karl.Moline@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The Office of Management and Budget (OMB) issued government-wide guidance to enhance the practice of peer review of government science documents. OMB's Final Information Quality Bulletin for Peer Review ("Peer Review Bulletin" or PRB) (available at *http://www.whitehouse.gov/omb/memoranda/fy2005/m05–03.pdf*) establishes minimum peer review standards for influential scientific information that Federal agencies intend to disseminate.

The Peer Review Bulletin also directs Federal agencies to adopt or adapt the National Academy of Sciences (NAS) policy for evaluating conflicts of interest when selecting peer reviewers who are not Federal government employees (federal employees are subject to Federal ethics requirements). For peer review purposes, the term "conflicts of interest" means any financial or other interest which conflicts with the service of the individual because it could: (1) Significantly impair the individual's objectivity; or (2) create an unfair competitive advantage for any person or organization.

NOAA has adapted the NAS policy and developed two confidential conflict disclosure forms which the agency will use to examine prospective reviewers' potential financial conflicts and other interests that could impair objectivity or create an unfair advantage. One form is for peer reviewers of studies related to government regulation and the other form is for all other influential scientific information subject to the Peer Review Bulletin. In addition, the latter form has been adapted by NOAA's Office of Oceanic and Atmospheric Research for potential reviewers of scientific laboratories.

The forms include questions about employment as well as investment and property interests and research funding. Both forms also require the submission of curriculum vitae. NOAA is seeking to collect this information from potential peer reviewers who are not government employees when conducting a peer review pursuant to the PRB. The information collected in the conflict of interest disclosure is essential to NOAA's compliance with the OMB PRB, and helps to ensure that government studies are reviewed by independent, impartial peer reviewers.

II. Method of Collection

Forms may be downloaded from the Internet and are fillable and signable

electronically or manually. They may be submitted, along with the Curriculum Vitae, via e-mail or regular mail.

III. Data

OMB Control Number: 0648–0567.

Form Number: None.

Type of Review: Regular submission (extension of a currently approved collection).

Affected Public: Individuals or households.

Estimated Number of Respondents: 320.

Estimated Time per Response: 30 minutes.

Estimated Total Annual Burden Hours: 160.

Estimated Total Annual Cost to Public: $0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: July 8, 2010.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2010–16970 Filed 7–12–10; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XX23

Marine Mammals; File No. 15483

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Bruce Mate, Ph.D., Oregon State University, Hatfield Marine Science Center, Newport, OR has applied in due form for a permit to conduct research on marine mammals.

DATES: Written, telefaxed, or e-mail comments must be received on or before August 12, 2010.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the Features box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov*, and then selecting File No. 15483 from the list of available applications.

These documents are also available upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713–2289; fax (301)713–0376; and

Northwest Region, NMFS, 7600 Sand Point Way NE, BIN C15700, Bldg. 1, Seattle, WA 98115–0700; phone (206)526–6150; fax (206)526–6426.

Written comments on this application should be submitted to the Chief, Permits, Conservation and Education Division, at the address listed above. Comments may also be submitted by facsimile to (301)713–0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits, Conservation and Education Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Tammy Adams or Kristy Beard, (301)713–2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The applicant requests a five-year permit to test the effectiveness of an acoustic deterrent at keeping gray whales (*Eschrictius robustus*) migrating past the coast of central Oregon between January and mid-April away from wave energy buoys, which may pose a collision or entanglement risk to the whales. During the experiment, gray whales and other marine mammals may be taken by Level B harassment as researchers attempt to provoke an avoidance response through sound transmission into their environment. The sound source consists of a transmitter and projector connected to a 12V 1000AHr battery. The sound will have peak efficiency in the 1–3 kHz (1,000–3,000 Hz) range and a maximum source level of 170 dB re: 1 μPa at 1 m. The signal will consist of a pulse up to 1 second in duration with a pulse rate of 3 pulses per minute. The acoustic device will operate during daylight hours only. Animals will be tracked and monitored by shore-based observers. The source level used in this study is not expected to cause injury to gray whales or other animals in the study area. Researchers expect short-term, short-distance deflection of migratory trajectories as gray whales adjust their bearing to avoid received sound pressure levels greater than 120 dB, which would occur within 750 m from the source. The applicant requests authorization to harass up to 2260 gray whales annually. The applicant also requests authorization to incidentally harass up 364 harbor porpoise (*Phocoena phocoena*), 14 each of Southern Resident and West Coast Transient killer whales (*Orcinus orca*), 508 harbor seals (*Phoca vitulina*), 8 California sea lions (*Zalophus californianus*), 4 Eastern Distinct Population Segment Steller sea lions (*Eumetopias jubatus*), and 4 Northern elephant seals (*Mirounga angustirostris*) annually during the experiment.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: July 7, 2010.

Tammy C. Adams,

Acting Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 2010–17053 Filed 7–12–10; 8:45 am]

BILLING CODE S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XX37

Endangered and Threatened Species; Notice of Intent to Prepare a Recovery Plan for the Sei Whale

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to prepare recovery plan; request for information.

SUMMARY: The National Marine Fisheries Service (NMFS) is announcing its intent to prepare a recovery plan for the Sei Whale (*Balaenoptera borealis*) and requests information from the public. NMFS is required by the Endangered Species Act of 1973 (ESA), as amended, to develop plans for the conservation and survival of federally listed species, i.e., recovery plans.

DATES: To allow NMFS adequate time to conduct the reviews, all information must be received no later than [*September 13, 2010*.

ADDRESSES: You may submit comments, identified by the code 0648–XX37 by any of the following methods:

1. Electronic Submissions: Submit all electronic comments via the Federal eRulemaking Portal: *http://www.regulations.gov*

2. Facsimile (fax): 301–713–0376, Please identify the fax comments as "Sei Whale Recovery Plan Information"

3. Mail: National Marine Fisheries Service, Office of Protected Resources, 1315 East West Highway, Silver Spring, MD 20910, ATTN: Greg Silber

FOR FURTHER INFORMATION CONTACT: Greg Silber at the above address, or at 301–713–2322.

SUPPLEMENTARY INFORMATION: Management responsibility for sei whales lies with the Secretary of Commerce and has been delegated to NMFS. As such, NMFS is charged with the recovery of sei whales which are listed as endangered under the ESA.

The recovery planning process is guided by the statutory language of Section 4(f) of the ESA and NMFS policies. Recovery planning identifies all methods and procedures which are necessary to recover any endangered species or threatened species. Section 4(f)(1)(B) of the ESA specifies that recovery plans must incorporate in each plan - (i) a description of such site-specific management actions as may be necessary to achieve the plan's goal for the conservation and survival of the species; (ii) objective, measurable criteria which when met, would result in a determination, that the species be removed from the list; and (iii) estimates of the time required and cost to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal.

The recovery planning process is guided by the statutory language of Section 4(f) of the ESA, which requires that public notice and an opportunity for public review and comment be provided during recovery plan development. NMFS requests relevant information from the public during preparation of the draft Recovery Plan. Such information should address: (a) criteria for removing the sei whale from the list of threatened and endangered species; (b) factors that are presently limiting, or threaten to limit, the survival of the sei whale; (c) actions to address limiting factors and threats; (d) estimates of time and cost to implement recovery actions; and (e) research, monitoring and evaluation needs.

Upon completion, the draft Recovery Plan will be available for public review and comment through the publication of a **Federal Register** Notice.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: July 8, 2010.

James H. Lecky,

Director, Office of Protected Resources, National Marine Fisheries Service.

Certain Activated Carbon from the People's Republic of China: Extension of Time Limit for Final Results of the Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: July 13, 2010.

FOR FURTHER INFORMATION CONTACT: Bob Palmer or Kathleen Marksberry, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–9068 or (202) 482–7906, respectively.

SUPPLEMENTARY INFORMATION:

Background

On May 29, 2009, Department of Commerce ("Department") published the notice of the initiation of the antidumping duty administrative review on certain activated carbon from the People's Republic of China ("PRC"), covering the period April 1, 2008, through March 31, 2009. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 74 FR 25711 (May 29, 2009) ("*Initiation Notice*").

On November 24, 2009, the Department published a notice extending the time period for issuing the preliminary results by 120 days to April 30, 2010. *See Certain Activated Carbon from the People's Republic of China: Extension of Time Limits for Preliminary Results of the Antidumping Duty Administrative Review*, 74 FR 61330 (November 24, 2009). Additionally, the Department exercised its discretion to toll deadlines for the duration of the closure of the Federal Government from February 5, through February 12, 2010. *See* Memorandum to the Record from Ronald Lorentzen, DAS for Import Administration, regarding "Tolling of Administrative Deadlines As a Result of the Government Closure During the Recent Snowstorm," dated February 12, 2010. On May 13, 2010, the Department published the preliminary results of this review. *See Certain Activated Carbon from the People's Republic of China: Notice of Preliminary Results of the Second Antidumping Duty Administrative Review, and Preliminary Rescission in Part*, 75 FR 26927 (May 13, 2010) ("*Preliminary Results*"). The final results are currently due on September 10, 2010.

Extension of Time Limits for Final Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("Act"), requires the Department to issue the final results in an administrative review of an antidumping duty order 120 days after the date on which the preliminary results are published. The Department may, however, extend the deadline for completion of the final results of an administrative review to 180 days if it determines it is not practicable to complete the review within the foregoing time period. *See* section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

The Department requires additional time to complete this review because the Department must fully analyze and consider significant issues related to surrogate values raised in the parties'

case and rebuttal briefs and post–preliminary surrogate value submissions. Thus, it is not practicable to complete this review within the time specified under the Act. Therefore, we are extending the time for the completion of the final results of this review by 45 days to October 25, 2010.

This notice is published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 7, 2010.

Edward C. Yang,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2010–17023 Filed 7–12–10; 8:45 am]

BILLING CODE 3510–DS–S

DEPARTMENT OF COMMERCE

International Trade Administration

(A–580–809)

Circular Welded Non–Alloy Steel Pipe from the Republic of Korea: Extension of Time Limit for Preliminary Results of the Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT: Matthew Jordan at (202) 482–1540; AD/CVD Operations, Office 1, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On December 23, 2009, the Department of Commerce ("the Department") published a notice of initiation of administrative review of the antidumping duty order on circular welded non–alloy steel pipe from the Republic of Korea, covering the period November 1, 2008 through October 31, 2009. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 74 FR 68229 (December 23, 2009). The current deadline for the preliminary results of this administrative review is August 9, 2010.[1]

Extension of Time Limit for Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act"), requires the Department to issue the preliminary results of an administrative review within 245 days after the last day of the anniversary month of an order for which a review is requested and the final results of review within 120 days after the date on which the preliminary results are published. If it is not practicable to complete the review within the time period, section 751(a)(3)(A) of the Act allows the Department to extend these deadlines to a maximum of 365 days and 180 days, respectively.

The Department requires additional time to review and sales and cost information submitted by the respondents in this administrative review because this review involves complex sales and cost accounting issues. Thus, it is not practicable to complete this review within the originally anticipated time limit (*i.e.*, by August 9, 2010). Therefore, the Department is extending the time limit for completion of the preliminary results by 120 days to not later than December 7, 2010, in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

We are issuing and publishing this notice in accordance with sections 751(a)(3)(A) and 777(i)(1) of the Act.

Dated: July 7, 2010.

Edward C. Yang,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510–DS–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XW97

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coral and Coral Reefs off the Southern Atlantic States; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Mr. Don DeMaria. If granted, the EFP would authorize Mr. DeMaria to collect and retain, with certain conditions, limited numbers of gorgonian corals from Federal waters, off the coast of North Carolina. The specimens would be used to support research efforts towards a grant awarded to the National Cancer Institute to screen marine invertebrates for possible anti-cancer compounds.

DATES: Comments must be received no later than 5 p.m., eastern time, on July 28, 2010.

ADDRESSES: You may submit comments on the application by any of the following methods:

- E-mail: *Nikhil.Mehta@noaa.gov*. Include the following document identifier in the subject line of the e-mail comment: "DonDeMaria__EFP".
- Mail: Nikhil Mehta, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.
- Fax: 727–824–5308.

The application and related documents are available for review upon written request to any of the above addresses.

FOR FURTHER INFORMATION CONTACT: Nikhil Mehta, 727–824–5305; fax: 727–824–5308; e-mail: *Nikhil.Mehta@noaa.gov*.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

This action involves activities covered by regulations implementing the Fishery Management Plan for Coral, Coral Reefs, and Live/Hardbottom Habitat of the South Atlantic Region. The applicant has requested authorization to collect a maximum of 11 lb (5 kg) of gorgonian corals belonging to the Genus *Thesea*. Specimens would be collected in Federal waters off the coast of North Carolina. The project proposes to use SCUBA gear to make the collections. Samples would be collected over a period of 2 months, commencing on the date of issuance of the EFP.

The overall intent of the project is to support research efforts to screen marine invertebrates for possible anti-cancer compounds. The research is part of a contract (No. HHSN261200900012C) between the National Cancer Institute (*http://*

[1] As explained in the memorandum from the Deputy Assistant Secretary for Import Administration, the Department has exercised its discretion to toll deadlines for the duration of the closure of the Federal Government from February 5 through February 12, 2010. Thus, all deadlines in this segment of the proceeding have been extended by seven days. The revised deadline for the preliminary results of this review is now August 9, 2010. *See* Memorandum to the Record from Ronald Lorentzen, DAS for Import Administration, regarding "Tolling of Administrative Deadlines As a Result of the Government Closure During the Recent Snowstorm," dated February 12, 2010.

www.cancer.gov/), and the Coral Reef Research Foundation (CRRF, *http://www.coralreefresearchfoundation.org/*). Samples would be collected by Mr. DeMaria, who is a sub-contractor for CRRF.

NMFS finds this application warrants further consideration. Based on a preliminary review, NMFS intends to issue the requested EFP, pending receipt of public comments, as per 50 CFR 600.745(b)(3)(i). Possible conditions the agency may impose on this permit, if it is indeed granted, include but are not limited to, a prohibition on conducting research within marine protected areas, marine sanctuaries, special management zones, or artificial reefs without additional authorization. A report on the project findings would be due at the end of the collection period, to be submitted to NMFS and reviewed by the South Atlantic Fishery Management Council.

A final decision on issuance of the EFP will depend on NMFS' review of public comments received on the application, consultations with the affected state, the South Atlantic Fishery Management Council, and the U.S. Coast Guard, as well as a determination that it is consistent with all applicable laws.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 8, 2010.

Fisheries of the South Atlantic and Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); goliath grouper.

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR Workshop for South Atlantic and Gulf of Mexico goliath grouper.

SUMMARY: The SEDAR assessments of the South Atlantic and Gulf of Mexico stocks of goliath grouper will consist of a series of three workshops: a Data Workshop, an Assessment Workshop, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The Assessment Workshop will take place August 2–5, 2010. See **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The Assessment Workshop will be held at the Hilton Bayfront, 333 First Street South, St. Petersburg, FL 33701; telephone: (727) 894–5000.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; telephone: (843) 571–4366.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR includes three workshops: (1) Data Workshop, (2) Stock Assessment Workshop and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Stock Assessment Workshop is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Consensus Summary documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 23 Workshop Schedule:

August 2–5, 2010; SEDAR 23 Assessment Workshop

August 2, 2010: 1 p.m. - 6 p.m.; August 3 - 4, 2010: 8 a.m. - 6 p.m.; August 5, 2010: 8 a.m. - 3 p.m.

Using datasets provided by the Data Workshop, participants will develop population models to evaluate stock status, estimate population benchmarks and reauthorized Magnuson-Stevens Act criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters. Participants will prepare a workshop report, compare and contrast various assessment approaches, and determine whether the assessments are adequate for submission to the review panel.

Although non-emergency issues not contained in this agenda may come before these groups for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 10 business days prior to each workshop.

Dated: July 7, 2010.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN: 0648–XX50

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); South Atlantic red snapper.

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 24 Assessment Webinars 3 & 4 and Review Workshop for South Atlantic red snapper.

SUMMARY: The SEDAR assessment of the South Atlantic stock of red snapper will consist of a series of workshops and webinars: a Data Workshop, a series of Assessment webinars, and a Review

Workshop. This is the twenty-fourth SEDAR. This is notice of the Assessment Webinar and Review Workshop components of SEDAR 24. See **SUPPLEMENTARY INFORMATION**.

DATES: Assessment Webinar 3 will take place August 13, 2010. Assessment Webinar 4 will take place August 24, 2010. The Review Workshop will take place October 12–14, 2010. See **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The Assessment Webinars will be held live online via an internet based conferencing service. The Webinars may be attended by the public. Those interested in participating should contact Kari Fenske at SEDAR. See **FOR FURTHER INFORMATION CONTACT** to request an invitation providing webinar access information.

The Review Workshop will be held at the Hilton DeSoto, 15 East Liberty St., Savannah, GA 31401; telephone: (912)232–9000.

FOR FURTHER INFORMATION CONTACT: Kari Fenske, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; telephone: (843) 571–4366; e-mail: *kari.fenske@safmc.net*.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR includes a Data Workshop, a Stock Assessment Process and a Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Stock Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Peer Review Evaluation Report documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops and Assessment Process are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils; the Atlantic and Gulf States Marine Fisheries Commissions; and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 24 Assessment Webinar 3 Schedule:

August 13, 2010: 11 a.m. - 3 p.m.

Assessment panelists will: (1) discuss red snapper model exploratory runs (sensitivities), (2) select a preferred model, (3) review final model runs, results, (4) provide guidance on model projections, (5) characterize and quantify model uncertainty, and (6) recommend status determination. Workshop panelists will document their findings and recommendations in an Assessment Workshop Report that will be made available to the public.

SEDAR 24 Assessment Webinar 4 Schedule:

August 24, 2010: 2 p.m. - 4 p.m.

Assessment panelists will review the Assessment Report.

SEDAR 24 Review Workshop Schedule:

October 12, 2010: 1 p.m. - 8 p.m.;
October 13, 2010: 8 a.m. - 8 p.m.;
October 14, 2010: 8 a.m. - 4 p.m.

The Review Workshop is an independent peer review of the assessments developed during the SEDAR 24 Data Workshop and Assessment Process. Workshop Panelists will review the assessment and document their comments and recommendations in a Peer Review Evaluation Report.

Although non-emergency issues not contained in this agenda may come before these groups for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Dated: July 7, 2010.

Information Systems, Technical Advisory Committee; Notice of Partially Closed Meeting

The Information Systems Technical Advisory Committee (ISTAC) will meet on July 28 and 29, 2010, 9 a.m., in the Herbert C. Hoover Building, Room 3884, 14th Street between Constitution and Pennsylvania Avenues, NW., Washington, DC. The Committee advises the Office of the Assistant Secretary for Export Administration on technical questions that affect the level of export controls applicable to information systems equipment and technology.

Wednesday, July 28

Public Session

1. Welcome and Introductions.
2. Working Group Reports.
3. Smart Grid.
4. Civil Satellite Telecommunications.
5. GPU/CPU/Accelerators.

Thursday, July 29

Closed Session

6. Discussion of matters determined to be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 section 10(a)(1) and 10(a)(3).

The open session will be accessible via teleconference to 20 participants on a first come, first serve basis. To join the conference, submit inquiries to Ms. Yvette Springer at *Yspringer@bis.doc.gov,* no later than July 21, 2010.

A limited number of seats will be available for the public session. Reservations are not accepted. To the extent time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate distribution of public presentation materials to Committee members, the Committee suggests that public presentation materials or comments be forwarded before the meeting to Ms. Springer.

The Assistant Secretary for Administration, with the concurrence of

the delegate of the General Counsel, formally determined on May 19, 2009, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. app. 2 section (10)(d)), that the portion of the meeting concerning trade secrets and commercial or financial information deemed privileged or confidential as described in 5 U.S.C. 552b(c)(4) and the portion of the meeting concerning matters the disclosure of which would be likely to frustrate significantly implementation of an agency action as described in 5 U.S.C. 552b(c)(9)(B) shall be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 section 10(a)(1) and 10(a)(3). The remaining portions of the meeting will be open to the public.

For more information, call Yvette Springer at (202) 482–2813.

Dated: July 7, 2010.

National Institute of Standards and Technology

Announcing a Meeting of the Information Security and Privacy Advisory Board

AGENCY: National Institute of Standards and Technology.

ACTION: Notice.

SUMMARY: The Information Security and Privacy Advisory Board (ISPAB) will meet Wednesday, August 4, 2010, from 9 a.m. until 5 p.m. Thursday, August 5, 2010, from 8:30 a.m. until 5 p.m., and Friday, August 6, 2010 from 8 a.m. until 12:30 p.m. All sessions will be open to the public.

DATES: The meeting will be held on Wednesday, August 4, 2010, from 9 a.m. until 5 p.m., Thursday, August 5, 2010, from 8:30 a.m. until 5 p.m. and Friday, August 6, 2010 from 8 a.m. until 12:30 p.m.

ADDRESSES: The meeting will take place at the Marriott Hotel Washington, 1221 22nd Street, NW., Washington, District of Columbia 20037 on August 4, 5, & 6, 2010. Please see admittance instructions in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Mr. Matthew Scholl, Information Technology Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8930, Gaithersburg, MD 20899–8930, telephone: (301) 975–2941.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the Information Security and Privacy Advisory Board (ISPAB) will meet Wednesday, August 4, 2010, from 9 a.m. until 5 p.m., Thursday, August 5, 2010, from 8:30 a.m. until 5 p.m. and Friday, August 6, 2010 from 8 a.m. until 12:30 p.m. All sessions will be open to the public. The ISPAB was established by the Computer Security Act of 1987 (Pub. L. 100–235) and amended by the Federal Information Security Management Act of 2002 (Pub.L. 107–347) to advise the Secretary of Commerce and the Director of NIST on security and privacy issues pertaining to federal computer systems. Details regarding the ISPAB's activities are available at *http://csrc.nist.gov/groups/SMA/ispab/index.html/*.

The agenda is expected to include the following items:

—Embedded software (biomedical, ICS) and associated malware.
— FISMA Guidance.
— National Initiative for Cybersecurity Education (NICE).
—Key Priorities next 2–3 years for NIST in cyber security.
— Threat Vector Initiative.
— Fedramp.
— Cyber Coordinator Briefing.
— National Protection and Programs Directorate Briefing.
— Security Roadmap.
— Initiative 3 Exercise (Einstein).
— NIST Update.
— GAO Review.
— Board Work Plan.
— OMB Update/Metrics.
— S-Cap usage and continuous monitoring.
— Authentication and Trust Framework Secure Online Transaction (SOT) Work.
— Assurance of Legitimate Government Outbound Mail.
— Commerce Department NOI.

Note that agenda items may change without notice because of possible unexpected schedule conflicts of presenters. The final agenda will be posted on the website indicated above.

Public Participation: The ISPAB agenda will include a period of time,

not to exceed thirty minutes, for oral comments from the public (Thursday August 5, 2010, at 3–3:30 p.m.). Each speaker will be limited to five minutes. Members of the public who are interested in speaking are asked to contact the ISPAB Secretariat at the telephone number indicated above. The board is interested in public comments on the agenda as a whole with specific interest in the following topics due to their impact on security and privacy as new technologies, potential areas of success for the U.S. Government if conducted properly and areas have a current significant relevance to the Federal Government.

— Embedded software (biomedical, ICS) and associated malware.
— Authentication and Trust Framework Secure Online Transaction (SOT) Work.
— FISMA Guidance.
— S-Cap usage and continuous monitoring.

In addition, written statements are invited and may be submitted to the ISPAB at any time. Written statements should be directed to the ISPAB Secretariat, Information Technology Laboratory, 100 Bureau Drive, Stop 8930, National Institute of Standards and Technology, Gaithersburg, MD 20899–8930. Approximately 15 seats will be available for the public and media.

Dated: July 8, 2010.

David Robinson,

Chief Financial Officer.

DEPARTMENT OF DEFENSE

Office of the Secretary

Federal Advisory Committee; Defense Business Board (DBB); Correction

AGENCY: Department of Defense (DoD).

ACTION: Meeting notice; correction.

SUMMARY: On June 21, 2010, the Department of Defense (DoD) published a notice in the **Federal Register** (75 FR 34987), announcing a meeting of the Defense Business Board (DBB) on July 22, 2010, at the Pentagon Conference Center, Room B–6. This document corrects the June 21 notice by changing the meeting location from the Pentagon Conference Center, Room B–6, to the Pentagon, Room 3D557. The date and time that were announced in the June 21 meeting notice are correct.

Although the meeting is open to the public, an escort is required. Further details are provided in the June 21 meeting notice.

DATES: The meeting will be held on Thursday, July 22, 2010, from 9 a.m. to 9:45 a.m.

ADDRESSES: The meeting will be held at the Pentagon, Room 3D557, Washington, DC (escort required, *see* below).

FOR FURTHER INFORMATION CONTACT: For meeting information please contact Ms. Debora Duffy, Defense Business Board, 1155 Defense Pentagon, Room 5B–1088A, Washington, DC 20301–1155, *Debora.Duffy@osd.mil,* (703) 697–2168. The Board's Designated Federal Officer (DFO) is Ms. Phyllis Ferguson, Defense Business Board, 1155 Defense Pentagon, Room 5B–1088A, Washington, DC 20301–1155, *Phyllis.Ferguson@osd.mil,* (703) 695–7563.

SUPPLEMENTARY INFORMATION: See the June 21, 2010, **Federal Register** meeting notice for information concerning public accessibility, the meeting agenda, and procedures for providing public comments.

Correction

In the **Federal Register** of June 21, 2010, in FR Doc. 2010–14871, beginning on page 34987, make the following correction:

On page 34987, in the third column, correct the **ADDRESSES** caption to read:

ADDRESSES: The meeting will be held at the Pentagon, Room 3D557, Washington, DC (escort required, *see* below).

Dated: July 8, 2010.

Mitchell S. Bryman,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary

[Docket ID: DOD–2010–OS–0102]

Privacy Act of 1974; System of Records

AGENCY: Defense Logistics Agency; DoD.

ACTION: Notice to delete a system of records.

SUMMARY: The Defense Logistics Agency proposes to delete a system of records notice in its existing inventory of records systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended.

DATES: This proposed action will be effective without further notice on August 12, 2010, unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by dock number and title, by any of the following methods:

• *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Federal Docket Management System Office, 1160 Defense Pentagon, Washington, DC 20301–1160.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is of make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Jody Sinkler at (703) 767–5045.

SUPPLEMENTARY INFORMATION: The Defense Logistics Agency systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the Chief Privacy and FOIA Officer, Headquarters Defense Logistics Agency, ATTN: DGA, 8725 John J. Kingman Road, Suite 1644, Fort Belvoir, VA 22060–6221.

The Defense Logistics Agency proposes to delete a system of records notice in its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. The proposed deletion is not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: July 8, 2010.

Mitchell S. Bryman,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Deletion:
S600.40.

SYSTEM NAME:

Readiness and Accountability Records (November 16, 2004; 69 FR 67112).

REASON FOR DELETION:

Records formerly maintained under S600.40 are now being maintained under a DoD-wide Privacy Act system of records notice identified as DPR 39 DoD, entitled "DoD Personnel Accountability and Assessment System"

published in the **Federal Register** on March 24, 2010, at 75 FR 14141.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13).

DATES: Interested persons are invited to submit comments on or before August 12, 2010.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Education Desk Officer, Office of Management and Budget, 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503, be faxed to (202) 395–5806 or e-mailed to *oira_submission@omb.eop.gov* with a cc: to *ICDocketMgr@ed.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The OMB is particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: July 7, 2010.

Darrin A. King,

Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management.

Institute of Education Sciences

Type of Review: Revision.

Title of Collection: Program for International Student Assessments (PISA) 2012 Recruitment and Field Test.

OMB #: 1850–0755.

Agency Form Number(s): N/A.

Frequency of Responses: Annually.

Affected Public: Individuals or households.

Estimated Number of Annual Responses: 2,087.

Estimated Annual Burden Hours: 1,057.

Abstract: The Program for International Student Assessment (PISA) is an international assessment that focuses on 15-year-olds' capabilities in reading, mathematics, and science literacy. It was first implemented by the National Center for Education Statistics (NCES) in 2000 and has been administered every three years since. This submission is for the fifth cycle in the series, PISA 2012, and requests OMB approval for field test and main study recruitment, field trial data collection, and a waiver of the 60-day **Federal Register** notice for the main study clearance in 2012. As in 2003, in PISA 2012, mathematics will be the major subject domain. The field test will also include computer-based assessments in reading, science, and general problem solving, and an assessment of financial literacy in a paper-and-pencil format. The United States may decide to participate in these components in the main study as well, based on the results of the field test. In addition to assessment data, PISA provides background information on school context and student demographics to benchmark performance and inform policy. School recruitment for the field test will begin in September 2010 with data collection beginning in March 2011. Main study recruitment will begin in September 2011 with data collection beginning in September 2012. The PISA 2012 field test sample will include about 35 schools (main study sample about 150) and about 1,600 students (4,500–5,700 for the main study, depending on the components administered). In January 2011 NCES will submit the final field trial instruments to OMB; then, following the field test study, in May 2011, NCES will submit to OMB the final main study recruitment materials, design, and burden; and in spring 2012, NCES will submit the final main study instruments.

Requests for copies of the information collection submission for OMB review may be accessed from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAMain* or from the Department's Web site at *http://edicsweb.ed.gov,* by selecting the "Browse Pending Collections" link and by clicking on link number 4303. When you access the information collection, click on "Download Attachments" to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to the Internet address *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title and OMB Control Number of the information collection when making your request.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13).

DATES: Interested persons are invited to submit comments on or before August 12, 2010.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Education Desk Officer, Office of Management and Budget, 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503, be faxed to (202) 395–5806 or e-mailed to *oira_submission@omb.eop.gov* with a cc: to *ICDocketMgr@ed.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The OMB is

particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: July 8, 2010.

Darrin A. King,

Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management.

Federal Student Aid

Type of Review: Extension.

Title of Collection: eZ-Audit: Electronic Submission of Financial Statements and Compliance Audits.

OMB Number: 1845–0072.

Agency Form Number(s): N/A.

Frequency of Responses: Annually.

Affected Public: Businesses or other for-profit; not-for-profit institutions; State, Local, or Tribal Gov't, State Educational Agencies (SEAs) or Local Educational Agencies (LEAs).

Estimated Number of Annual Responses: 5,900.

Estimated Annual Burden Hours: 2,500.

Abstract: eZ-Audit is a web-based process designed to facilitate the submission of compliance and financial statement audits, expedite the review of those audits by the Department, and provide more timely and useful information to public, non-profit and proprietary institutions regarding the Department's review. eZ-Audit establishes a uniform process under which all institutions submit directly to the Department any audit required under Title IV, HEA program regulations. eZ-Audit has a minimal number of financial template line items and general information questions. No additional burden hours have been added.

Requests for copies of the information collection submission for OMB review may be accessed from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAMain* or from the Department's Web site at *http://edicsweb.ed.gov,* by selecting the "Browse Pending Collections" link and by clicking on link number 4284. When you access the information collection, click on "Download Attachments" to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to the Internet address *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title and OMB Control Number of the information collection when making your request.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Office of Postsecondary Education; Overview Information; Pilot Program for Course Material Rental; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2010

Catalog of Federal Domestic Assistance (CFDA) Number: 84.116T.

Dates:

Applications Available: July 13, 2010.

Deadline for Transmittal of Applications: August 12, 2010.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The objective of this program is to provide grants to institutions of higher education (IHEs) for pilot programs that expand the services of bookstores to provide the option for students to rent course materials in order to achieve savings for students.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv), this priority is from section 803 of the Higher Education Opportunity Act (HEOA), Public Law 110–315—(20 U.S.C. 1015b Note).

Absolute Priority: For FY 2010 and any subsequent year in which we make awards from the list of unfunded applicants from this competition, this priority is an absolute priority.

This priority is:

Applications to support pilot programs that expand the services of bookstores to provide the option for students to rent course materials in order to achieve savings for students.

The projects supported by this program may include, but are not limited to, activities that: (1) Acquire course materials that the entity will make available by rent to students; (2) develop or acquire equipment or software necessary for the conduct of a rental program; (3) hire staff needed for the conduct of a rental program, with priority given to hiring enrolled undergraduate students; (4) build or acquire extra storage space dedicated to course materials for rent; (5) place a priority on higher cost and introductory level classes; and (6) focus on students with the greatest financial need.

Program Authority: Section 803 of the Higher Education Opportunity Act, Pub. L. 110–315, 20 U.S.C. 1015b note; Consolidated Appropriations Act, 2010, Pub. L. 111–117.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

Note: The regulations in 34 CFR part 79 apply to all applicants except Federally recognized Indian Tribes.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $9,900,000.

Estimated Range of Awards: $900,000–$1,100,000 for the 24-month grant period.

Estimated Average Size of Awards: $1,000,000 for the 24-month grant period.

Estimated Number of Awards: 9–10.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 24 months.

III. Eligibility Information

1. *Eligible Applicants:* IHEs.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

IV. Application and Submission Information

1. *Address to Request Application Package:* ED Pubs, U.S. Department of Education, P.O. Box 22207, Alexandria, VA 22304. Telephone, toll free: 1–877–433–7827. FAX: (703) 605–6794. If you use a telecommunications device for the deaf (TDD), call, toll free: 1–877–576–7734.

You can contact ED Pubs at its Web site, also: *http://www.EDPubs.gov* or at its e-mail address: *edpubs@inet.ed.gov.*

If you request an application package from ED Pubs, be sure to identify this program or competition as follows: CFDA number 84.116T.

Individuals with disabilities can obtain a copy of the application package in an accessible format (*e.g.,* Braille, large print, audiotape, or computer diskette) by contacting the person or team listed under *For Further Information Contact* in Section VII of this notice.

2. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this program.

Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. You must limit the application narrative to 20 typed pages, using the following standards:

- A "page" is 8.5′ × 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger, or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial. An application submitted in any other font (including Times Roman or Arial Narrow) will not be accepted.

The page limit does not apply to the cover sheet; the budget section, including the budget narrative; the assurances and certifications; the one-page abstract; the resumes; the bibliography; or the letters of support.

We will reject your application if you exceed the page limit.

3. *Submission Dates and Times:*

Applications Available: July 13, 2010.

Deadline for Transmittal of Applications: August 12, 2010.

Applications for grants under this program must be submitted electronically using the Electronic Grant Application System (e-Application) accessible through the Department's e-Grants site. For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to Section IV.7. *Other Submission Requirements* of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under *For Further Information Contact* in Section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

4. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program.

5. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Data Universal Numbering System Number, Taxpayer Identification Number, and Central Contractor Registry:* To do business with the Department of Education, (1) you must have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN); (2) you must register both of those numbers with the Central Contractor Registry (CCR), the Government's primary registrant database; and (3) you must provide those same numbers on your application.

You can obtain a DUNS number from Dun and Bradstreet. A DUNS number can be created within one business day.

If you are a corporate entity, agency, institution, or organization, you can obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow 2–5 weeks for your TIN to become active.

The CCR registration process may take five or more business days to complete. If you are currently registered with the CCR, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your CCR registration on an annual basis. This may take three or more business days to complete.

7. *Other Submission Requirements:* Applications for grants under this program must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications

Applications for grants under the Pilot Program for Course Material Rental, CFDA Number 84.116T, must be submitted electronically using e-Application, accessible through the Department's e-Grants Web site at: *http://e-grants.ed.gov.*

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement *and* submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

While completing your electronic application, you will be entering data online that will be saved into a database. You may not e-mail an electronic copy of a grant application to us.

Please note the following:

- You must complete the electronic submission of your grant application by 4:30:00 p.m., Washington, DC time, on the application deadline date. E-Application will not accept an application for this competition after 4:30:00 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process.
- The hours of operation of the e-Grants Web site are 6:00 a.m. Monday until 7:00 p.m. Wednesday; and 6:00 a.m. Thursday until 8:00 p.m. Sunday, Washington, DC time. Please note that, because of maintenance, the system is unavailable between 8:00 p.m. on Sundays and 6:00 a.m. on Mondays, and between 7:00 p.m. on Wednesdays and 6:00 a.m. on Thursdays, Washington, DC time. Any modifications to these hours are posted on the e-Grants Web site.
- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.
- You must submit all documents electronically, including all information you typically provide on the following forms: the Application for Federal

Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications. You must attach any narrative sections of your application as files in a .DOC (document), .RTF (rich text), or .PDF (Portable Document) format. If you upload a file type other than the three file types specified in this paragraph or submit a password protected file, we will not review that material.

• Your electronic application must comply with any page limit requirements described in this notice.

• Prior to submitting your electronic application, you may wish to print a copy of it for your records.

• After you electronically submit your application, you will receive an automatic acknowledgment that will include a PR/Award number (an identifying number unique to your application).

• Within three working days after submitting your electronic application, fax a signed copy of the SF 424 to the Application Control Center after following these steps:

(1) Print SF 424 from e-Application.

(2) The applicant's Authorizing Representative must sign this form.

(3) Place the PR/Award number in the upper right hand corner of the hard-copy signature page of the SF 424.

(4) Fax the signed SF 424 to the Application Control Center at (202) 245–6272.

• We may request that you provide us original signatures on other forms at a later date.

Application Deadline Date Extension in Case of e-Application Unavailability: If you are prevented from electronically submitting your application on the application deadline date because e-Application is unavailable, we will grant you an extension of one business day to enable you to transmit your application electronically, by mail, or by hand delivery. We will grant this extension if—

(1) You are a registered user of e-Application and you have initiated an electronic application for this competition; and

(2)(a) E-Application is unavailable for 60 minutes or more between the hours of 8:30 a.m. and 3:30 p.m., Washington, DC time, on the application deadline date; or

(b) E-Application is unavailable for any period of time between 3:30 p.m. and 4:30:00 p.m., Washington, DC time, on the application deadline date.

We must acknowledge and confirm these periods of unavailability before granting you an extension. To request this extension or to confirm our acknowledgment of any system unavailability, you may contact either (1) the person listed elsewhere in this notice under *For Further Information Contact* (*see* VII. Agency Contact) or (2) the e-Grants help desk at 1–888–336–8930. If e-Application is unavailable due to technical problems with the system and, therefore, the application deadline is extended, an e-mail will be sent to all registered users who have initiated an e-Application. Extensions referred to in this section apply only to the unavailability of e-Application.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through e-Application because—

• You do not have access to the Internet; or

• You do not have the capacity to upload large documents to e-Application; *and*

• No later than two weeks before the application deadline date (14 calendar days; or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevents you from using the Internet to submit your application. If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Krish Mathur, U.S. Department of Education, 1990 K Street, NW., Room 6155, Washington, DC 20006–8544. FAX: (202) 502–7877.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. Submission of Paper Applications by Mail

If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.116T), LBJ Basement Level 1, 400 Maryland Avenue, SW., Washington, DC 20202–4260.

You must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. Submission of Paper Applications by Hand Delivery

If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application, by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.116T), 550 12th Street, SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this grant notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

Selection Criteria: The selection criteria for this program are from 34 CFR 75.210 and are listed in the application package.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. Section 803(d) of HEOA requires the Secretary to report to the Congress on the effectiveness of this program. Therefore, a final performance report must include an estimate of the savings achieved by the students served by this program, as well as new models and best practices for course material rental developed by the grantee. If you receive a multi-year award, you must also submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *http://www.ed.gov/fund/grant/apply/appforms/appforms.html.*

4. *Performance Measures:* Under the Government Performance and Results Act of 1993 (GPRA), the following three performance measures will be used by the Department in assessing the success of this Pilot Program for Course Material Rental:

(1) The extent to which the best practices developed by the funded projects are being replicated (*i.e.,* adopted or adapted by others).

(2) The extent to which the projects are being institutionalized and continued after funding.

(3) The effectiveness of the projects in achieving savings for the students served by this pilot program.

If funded, you will be asked to collect and report data from your project on steps taken toward achieving the outcomes evaluated by these performance measures (*i.e.,* institutionalization, replication, and effectiveness). Consequently, applicants are advised to include these outcomes in conceptualizing the design, implementation, and evaluation of their proposed projects. Institutionalization and replication are important outcomes that ensure the ultimate success of this program.

VII. Agency Contact

*For Further Information Contact:*Krish Mathur, Fund for the Improvement of Postsecondary Education, U.S. Department of Education, 1990 K Street, NW., Room 6155, Washington, DC 20006–8544. Telephone: (202) 502–7512.

If you use a TDD, call the FRS, toll free, at 1–800–877–8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (*e.g.,* braille, large print, audiotape, or computer diskette) on request to the program contact person listed under *For Further Information Contact* in Section VII of this notice.

Electronic Access to This Document: You can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF), on the Internet at the following site: *http://www.ed.gov/news/fedregister.*

To use PDF, you must have Adobe Acrobat Reader, which is available free at this site.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Delegation of Authority: The Secretary of Education has delegated authority to Daniel T. Madzelan, Director, Forecasting and Policy Analysis for the Office of Postsecondary Education, to perform the functions and duties of the Assistant Secretary for Postsecondary Education.

Dated: July 8, 2010.

Daniel T. Madzelan,

Director, Forecasting and Policy Analysis.

[FR Doc. 2010–17047 Filed 7–12–10; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Western Area Power Administration

Deer Creek Station Energy Facility Project (DOE/EIS–0415)

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Record of Decision and Floodplain Statement of Findings.

SUMMARY: The Western Area Power Administration (Western) received a request from Basin Electric Power Cooperative (Basin Electric) to interconnect its proposed Deer Creek Station Energy Facility Project (Project) to Western's transmission system. Basin Electric's Project includes the construction of a new 300-megawatt (MW) natural gas-fired combined-cycle generation facility in Brookings County, South Dakota, approximately 13.2 miles of new natural gas supply pipeline, a 0.75-mile transmission line, two water wells, a 1.25-mile water supply line, and 1 mile of local road improvements.

Western considered the interconnection request under the provisions of its Open Access Transmission Service Tariff (Tariff), along with the information in the environmental impact statement (EIS) and all comments received, and has made the decision to allow Basin Electric's request to interconnect at Western's existing White Substation. The U.S. Department of Agriculture, Rural Utilities Service (RUS), also received a request from Basin Electric for financial assistance for the Deer Creek Station Energy Facility Project. RUS is a cooperating agency in the EIS process.

FOR FURTHER INFORMATION CONTACT: Please contact Mr. Matt Marsh, National Environmental Policy Act (NEPA) Document Manager, Western Area Power Administration, P.O. Box 35800, Billings, MT 59107; telephone (406) 247–7385 or e-mail *DeerCreekStationEIS@wapa.gov* for additional information concerning the Project. For general information on the Department of Energy's (DOE) NEPA review process, please contact Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance, GC–54, U.S. Department of Energy, 1000 Independence Avenue, SW.,

Washington, DC 20585; telephone (800) 472–2756.

SUPPLEMENTARY INFORMATION: Western is a Federal agency within the DOE that markets and transmits wholesale electrical power through an integrated 17,000-mile, high-voltage transmission system across 15 western states. Western received a request from Basin Electric to interconnect their proposed Project to Western's transmission system. Basin Electric's Project is located within Western's Upper Great Plains Region, which operates and maintains nearly 100 substations and nearly 7,800 miles of Federal transmission lines in Minnesota, South Dakota, North Dakota, Montana, Nebraska, and Iowa.

Western published a Notice of Intent to prepare an EIS for the project on February 6, 2009 (74 FR 6284). A Notice of Availability of the Draft EIS was published by the Environmental Protection Agency (EPA) on February 5, 2010 (75 FR 6026), and a Notice of Availability of the Final EIS was published by EPA on May 28, 2010 (75 FR 30022).

Western's Purpose and Need

Western's need for action is triggered by Basin Electric's interconnection request. Western's Tariff describes the conditions necessary for access to its transmission system. Western provides an interconnection if there is available capacity on the transmission system, while considering transmission system reliability and power delivery to existing customers, and the applicant's objectives.

Western's Proposed Action

Western's Federal involvement is limited to consideration of Basin Electric's interconnection request for their Project, under the provisions of the Tariff. Western's Proposed Action is to interconnect the Project to Western's transmission system. This involves adding a transformer bay to the White Substation and making other minor system modifications within the substation.

Applicant's Purpose and Need

Basin Electric's 2007 Power Supply Analysis (PSA) indicated that additional intermediate capacity would be needed by mid-2012 to meet its members' growing energy demand. Based on the PSA, a 700- to 800-megawatt (MW) capacity deficit is projected in the eastern portion of Basin Electric's service area by the year 2014. Basin Electric is proposing to meet this increased demand by implementing a resource expansion plan that includes 200 MW of peaking generation, 300 MW of wind generation, 250 MW of intermediate generation, and 600 MW of baseload generation.

Applicant's Proposed Project

As an intermediate capacity unit, Basin Electric's proposed Project would be cycled at low load periods, such as evenings and weekends. The unit would be capable of rapidly responding to load swings of the system. The Project has been sized for 300 MW in order to meet the 250-MW intermediate power supply need and have a 50-MW reserve to meet peak intermediate needs. The advantage of siting such a project in Brookings County is that wind generation on the grid in this area can be integrated with the combined-cycle natural gas generation. During periods of high wind generation, gas-fired generation can be reduced. During periods of low wind generation, the gas-fired generation will be available to back up the wind generation.

The Project would use combined-cycle technology, in which a gas turbine powers an electric generator. Under the combined-cycle configuration, the exhaust from the combustion turbine generator passes through a heat recovery steam generator that extracts heat from the turbine exhaust. The waste heat is used to generate steam that then passes through a steam turbine generator.

Alternatives Considered

The EIS reviewed the options considered by Basin Electric in its PSA. Western has no decision-making authority over these options. Western's Federal involvement is limited to the determination of whether to allow the interconnection of Basin Electric's Project. For the purposes of furthering environmental decision making, the EIS evaluated three alternatives. Under the No Action Alternative, Western would not execute an interconnection agreement with Basin Electric. Given the lack of a Western interconnection, Basin Electric could not construct its Project as proposed. However, as Basin Electric is a regulated utility having load growth responsibility, it is reasonable to expect that it would construct a similar generation facility somewhere in eastern South Dakota. Such a facility may not connect to a Federal transmission system, involve Federal financing, or have any other Federal nexus that would require a NEPA process.

Under the Proposed Action, Western would execute an interconnection agreement. Basin Electric would construct a 300-MW combined-cycle combustion turbine natural gas generating facility and supporting infrastructure at one of two alternative sites in eastern South Dakota. The EIS analyzed the two alternative sites as White Site 1 and White Site 2. The sites were selected because of their proximity to a natural gas supply, to a Western transmission line, to a water supply, and constructability.

White Site 1 is located approximately six miles southeast of White, South Dakota, in the northeast quarter of Section 25, Township 111 North, Range 48 West, of the Fifth Principal Meridian, Brookings County. The footprint of the White Site 1 power generation facility would take up 40 acres of a 100-acre site. To provide natural gas, a 13.2-mile natural gas line would be constructed from the site to access the Northern Border Pipeline in Deuel County, South Dakota. Electricity generated by the facility would be transmitted to Western's White Substation by a 0.75-mile long, 345-kV transmission line. Cooling water would be provided by two wells located near Deer Creek, and the water would be transmitted to the site by a 1.25-mile water pipeline.

White Site 2 is located approximately four miles east-northeast of White, South Dakota, in the northwest quarter of Section 2, Township 111 North, Range 48 West, of the Fifth Principal Meridian, Brookings County. In addition to a 40-acre generation facility footprint, White Site 2 would also involve substation construction that would occupy an additional six acres. To provide natural gas, a 10-mile natural gas pipeline would be constructed from the site to access the Northern Border Pipeline in Deuel County. Electricity generated by the facility would be transmitted from the new substation to a Western transmission line located 0.5 miles from the site. Cooling water would be provided by municipal water supply. A water line extension of one mile would be constructed to the site.

White Site 1 is convenient to the White Substation, is further away from occupied residences, and has better drainage than White Site 2. White Site 2 would require construction of a substation for interconnection. As a result, Basin Electric selected White Site 1 as its preferred site.

Environmentally Preferred Alternative

As required by 40 CFR 1505.2(b), Western has identified an environmentally preferred alternative: the No Action Alternative. Under this alternative, Western would deny the interconnection request and not modify its transmission system to interconnect the Project with its transmission system. Under this alternative it is assumed that Basin Electric's proposed Project would

not be built and associated environmental impacts would not occur. However, Western must respond to Basin Electric's interconnection request under the terms of the Tariff. The Tariff and underlying Federal Energy Regulatory Commission Orders mandating open access to transmission systems establish conditions under which interconnection requests must be considered, including a NEPA review.

Under the No Action Alternative, Basin Electric's purpose and need would not be met. Basin Electric, as a regulated utility with load growth responsibility, would have to find an alternate means to meet the increase in intermediate generation demand for electric power in the eastern portion of its service area. It is reasonable to expect that Basin Electric would construct a similar generation facility somewhere in eastern South Dakota that may or may not have a Federal nexus requiring NEPA review and consideration of mitigation efforts as a part of that review.

Environmental Impacts

The analysis in the EIS demonstrated that Basin Electric's Project would have no impacts or minimal impacts on geology, farmland, environmental justice, recreation, visual, and cultural resources. Expected impacts on other environmental resources are discussed below.

Air emissions from the Project would be those expected from a modern natural gas-fueled power plant, and would be less than applicable emissions standards for carbon monoxide (CO), nitrogen oxides (NO_X), and particulates less than 10 microns in diameter (PM_{10}). The facility would also not be a major source of hazardous air pollutants, and construction-related emissions and transportation-related emissions would be minor. Greenhouse gas emissions from operation of the Project would be approximately one million metric tons of carbon dioxide (CO_2) equivalents per year. To put these greenhouse gas emissions in perspective, if 300 MW of energy were to be produced using a traditional subcritical pulverized coal boiler, the emissions of CO_2 equivalents would increase almost 4-fold, up to a projected 3.8 million metric tons. In addition, the Project is being constructed to complement renewable generation in the area, specifically wind energy generation, which would further facilitate reduction in overall greenhouse gas emissions. Electricity from this source would normally be generated on an intermittent basis when wind energy is not available.

Water resources concerns are related to erosion and sedimentation, and groundwater. Crossings of streams and wetlands by gas pipelines and waterlines have been minimized to the extent practicable by careful routing. Where crossings are unavoidable, construction would meet all permit conditions of the U.S. Army Corps of Engineers and State water quality agencies. The impacts to streams and wetlands from the Project would be temporary in nature, and were determined to be not significant. Construction-site storm-water management would also meet all State and Federal regulations. Groundwater for plant cooling water would be pumped from the Big Sioux aquifer in the Deer Creek floodplain near the Project site. Initial pump tests indicate that Deer Creek would not be affected by drawdown. Biological resources concerns in this mostly agricultural area are mostly related to small crossings of native prairie by the gas pipeline corridor. Two locations contain native prairie forb and warm season grass communities. These locations are potential habitat for the Dakota skipper, a candidate for listing under the Endangered Species Act. Impacts in these areas are expected to be temporary and the prairie would be restored following pipeline trenching.

Traffic and noise were also identified as potential impacts. While the local road network provides adequate capacity to meet projected traffic demands, access to the site would be on unpaved county and township roads. Peak traffic is estimated at 360 one-way trips to the site. Maximum noise levels are projected to increase, but not significantly over background levels. Noise levels would be below U.S. Housing and Urban Development guidelines.

Public Involvement

A Notice of Intent (NOI) describing the proposed action was published in the **Federal Register** on February 6, 2009 (74 FR 6284). The NOI announced the intent to prepare an EIS on the Project, described the proposal, provided scoping meeting locations and dates, started a 30-day comment period, and provided contacts for further information about the Project and for submitting scoping comments. The public scoping meeting was held at White, South Dakota, on February 24, 2009. A total of 12 written comments from agencies and two written comments from individuals were received in response to the NOI. Western responded to these comments in the Draft EIS.

A Notice of Availability of the Draft EIS was published by the EPA in the **Federal Register** on February 5, 2010 (75 FR 6026). A public hearing to receive comments on the Draft EIS was held in White, South Dakota on February 25, 2010. While eighteen people attended the public hearing, none wished to comment for the record, and no comments on the Draft EIS were received from the public during the public comment period. Western received comments on the Draft EIS from a number of Federal and State agencies. The U.S. Environmental Protection Agency (EPA) indicated that the document adequately disclosed the environmental impacts of the alternatives and no further data collection is necessary and identified opportunities for additional mitigation. While the U.S. Department of the Interior indicated that they had no comments, the U.S. Fish and Wildlife Service (USFWS) concurred that the Project will not adversely affect federally-listed endangered and threatened species. In addition, the South Dakota Department of Game, Fish and Parks (SDGFP) provided technical corrections to the treatment of state-listed species and their distribution.

Because no substantive changes were needed to the Draft EIS, Western did not republish the Draft EIS but instead issued the comments, responses, and changes to the document, with a new cover sheet, as the Final EIS pursuant to 40 CFR part 1503.4(c). The complete Final EIS is composed of both the Draft EIS and the responses to comments found in the Final EIS. The mitigation measures for air quality recommended by the EPA in their comments on the Draft EIS have been adopted. The EPA provided comments on the Final EIS with concerns about groundwater withdrawal and monitoring. Additional details about groundwater issues are presented in the *Groundwater Mitigation* section below.

Mitigation Measures

Through public and agency participation in the NEPA process, Basin Electric has altered the design of the Project to minimize impacts to the environment. Best Management Practices will be used for sediment and erosion control, as described in a Project-specific Storm Water Pollution Prevention Plan, Spill Prevention Control and Countermeasure Plan, South Dakota Department of Environment and Natural Resources (SDDENR) General Permit for Storm Water Discharges with Industrial Activities, and SDDENR General Permit for Storm Water Discharges from

Construction Activities. Other Project specific mitigation measures are identified in the Draft EIS document for each resource category and in the Final EIS response to comments. Basin Electric's Standard Mitigation Measures for the Project are listed in Appendix F of the Draft EIS. Project-specific mitigation measures, to be implemented as conditions of this decision, are listed below.

Air Quality Mitigation

A dust control plan will be implemented for use of unpaved county and township roads in the plant vicinity. The air permit is expected to be issued in summer 2010. The draft permit establishes limits for NO_X, CO, PM_{10}, total sulfur content for natural gas and fuel oil to be used, opacity levels, and start up and shut down operations. Basin Electric will comply with all conditions and limits in the final air permit.

Groundwater Mitigation

The 2 groundwater production wells will be located approximately 275 feet from Deer Creek. Based on the typical hydraulic characteristics of the Big Sioux aquifer the cone of influence around the production wells would be 21 to 112 feet at a pumping rate of 125 gallons per minute. Only one production well will be in service at any given time. A minimum buffer of 163 feet between the edge of the cone of influence and Deer Creek will thus be preserved. Two pumping tests will determine the actual extent of the cone of influence, which is expected to fall within the range identified above. Pumping tests will be performed during the initial pumping of the first production well and during the period of maximum withdrawal at Project start-up to fill the on-site water storage tank. Monitoring will take place at least every hour during these testing periods. Two groundwater monitoring wells would be left in place between the two production wells and Deer Creek. Given the existing data and buffer between the production well and Deer Creek, no impacts to Deer Creek are anticipated. If the cone of influence is larger than anticipated, Basin Electric will reassess the potential for impacts to Deer Creek in conjunction with Western.

Wetlands Impact Avoidance and Mitigation

The Project site, gas pipeline, transmission line and water line have the potential to impact wetlands. The Project area contains pothole wetlands, wetland swales (some of which are cultivated) and creeks. Construction in wetlands will be avoided to the extent practicable. Where impacts to wetlands are unavoidable, construction will be performed so that any impacts are minimized. Wetland areas are very common in the Project area, so complete avoidance is not possible.

Construction of Basin Electric's Project would impact 8.74 acres of wetlands along the natural gas pipeline and water pipeline alignments. In addition, construction of the access road into the power generation facility would permanently impact 0.02 acre of wetlands, and temporarily impact an additional 0.02 acre. All of the Project impacts will occur to drainage wetlands classified as riverine, according to the Natural Resources Conservation Service Hydrogeomorphic Classification System for wetlands. Similar wetland areas in the Project area are often cultivated when located in cropland, especially in dry years.

The following water body crossing procedures will be used. Hazardous and regulated materials, chemicals, fuels, and lubricating oils would not be stored and concrete coating activities would not be performed within 100 feet of any intermittent creek or other water body. All construction equipment would be refueled at least 100 feet from any water body. All spoil from creek crossings would be placed in the construction right-of-way (ROW) at least 10 feet from the water's edge, if present. Sediment barriers would be used to prevent the flow of spoil material into the water body. Where possible and practical, any large wetlands and perennial streams will be horizontally directional drilled (HDD). Drilling equipment and bell holes (entrance and exit pits) will be placed at least 25 feet away from the edge of any waterways and wetlands. Soil excavated from the bell holes will be backfilled and stabilized. Where HDD is not used, trenching will be accomplished by minimizing the extent of construction equipment usage in wetland areas and limiting equipment travel and use to the existing ROW. Equipment crossing of wetlands will be completed through use of timber mats if rutting in excess of four inches occurs. Impermeable material such as clay rich soils or sand bag trench blocks will be placed as soil block within the ditch at the entry and exit points of each individual wetland complex so as to minimize the potential of inadvertent drainage of the wetland area.

The following is a general list of procedures to be utilized to reduce wetland impact in areas where open-cut trench crossings in wetland areas will occur. The duration of construction-related disturbance within wetlands will be minimized by means of timely construction during the historically dry periods of the year, typically in the fall. If standing water or saturated soils are present, low ground-weight construction equipment will be used or normal equipment would be operated on timber riprap, prefabricated equipment mats, or geotextile fabric overlain with gravel. Geotextile fabric used for this purpose will be strong enough to allow removal of all gravel and fabric from the wetland. The top 12 inches of topsoil will be segregated from the area disturbed by trenching, except in areas where standing water or saturated soils are present. Once the trench has been backfilled, the segregated topsoil will be used to cover the trench. Impermeable material such as clay rich soils or sandbags will be placed as trench blocks at the entry and exit points of each individual wetland complex to minimize the potential of inadvertent drainage of the wetland area.

Temporary sediment barriers will be used to stop or reduce the flow of sediment coming into wetland locations. These barriers will be constructed of materials such as silt fence, staked hay or straw bales, or sand bags depending on conditions present and the most effective barrier for those conditions. Temporary sediment barriers will be installed as necessary at the base of slopes until disturbed vegetation has been reestablished.

During pipeline installation, the welding of a pipe string will be done at the edge of the wetland and the completed section will be pulled or pushed across (or under, if HDD is used) the wetland and tied into the rest of the pipeline. During wetland disturbance, erosion control structures will be placed as necessary to prevent flow of soil from spoil piles into undisturbed wetland areas. If the wetland has a vegetative mat that can be saved in large segments, the mat will be saved for replacement over the backfilled trench to help re-establish vegetation more rapidly. Once construction has been completed, wetland areas will be restored by grading, which will return the area's drainage patterns to pre-construction contours. Excess backfill will be disposed of on dry land in the ROW rather than on wetland areas. Excess backfill will not be placed on any wetland or floodplain area.

Restoration will be undertaken for temporary impacts to jurisdictional wetlands. Mitigation measures for temporary impacts may include placement of a horizontal marker (*e.g.,* fabric, certified weed-free straw, etc.) to delineate the existing ground elevation

of wetlands that would be temporarily filled during construction. Following construction, mitigation measures will include removal of temporary fill, recontouring to the original site elevations, and then reseeding using native plant species to reestablish a prevalence of hydrophytic vegetation. Revegetation protocols typically will make use of plant species currently growing in the affected wetlands.

Biological Mitigation

SDGFP will be consulted if any active raptor nests were discovered within 0.25 miles of any of the Project facilities during construction. To ensure that impacts to the Dakota skipper are avoided, pipeline construction will not take place in the two locations of Dakota skipper suitable habitat during the growth and blooming period for the nectar source of the adult butterfly (May–July), which includes the summer breeding period of the butterfly. Nesting bird surveys will be completed prior to ground disturbance activities in accordance with protocols developed in consultation with Western and the USFWS. The seed mix and specifications for native plantings in disturbed area will be developed by Basin Electric, based on the NRCS-recommended seed mixes.

Traffic and Roadway Mitigation

Traffic signage changes and intersection improvements will be implemented to manage the temporary increase in traffic volumes and loads during construction and for deliveries that will occur during Project operations.

Noise Mitigation

Basin Electric will conduct a post-construction operational noise assessment to be completed by an independent third-party noise consultant, approved by the South Dakota Public Utilities Commission, to show compliance with the noise levels according to the predictive model used in the noise analysis. The noise assessment will be performed in accordance with American National Standards Institute (ANSI) B133.8—Gas Turbine Installation Sound Emissions. The results of that analysis will be evaluated by Basin Electric to determine if any modifications to the proposed facilities or operations are needed.

Consultation

Western is the lead Federal agency for compliance with Section 106 of the National Historic Preservation Act. By letter of May 10, 2010, the South Dakota State Historic Preservation Officer concurred that no historic properties would be affected by the Project. RUS is the lead Federal agency for compliance with Section 7 of the Endangered Species Act. A biological assessment was prepared and submitted with a determination that the Project may affect, but would not likely adversely affect listed species. As stated above, the USFWS concurred with this determination.

Floodplain Statement of Findings

In accordance with 10 CFR part 1022, Western considered the potential impacts of the Project on floodplains and wetlands. The natural gas pipeline for Basin Electric's Project would cross 100-year floodplains in eight places. There are no pipeline routes that would completely avoid floodplains, given the locations that existing pipelines would need to be tapped and drainage patterns in the region. As a result, there is no practicable alternative to construction of a natural gas pipeline in floodplains. In addition, the wells producing cooling water would be located in the floodplain of Deer Creek. Total impacts to the floodplain from the well facilities would be an approximately 200-foot by 200-foot area for two individual wellheads, a monitoring well, and an 8-by-10 foot control building. The access road, wells, and control building would be contoured to an elevation of one foot above the 100-year flood elevation. Consistent with the requirements of the National Flood Insurance Program, the building would be watertight and utilities would be capable of resisting flood damage. Because all other available water well supply sites are located in the Deer Creek floodplain, there is no practicable alternative to locating this site within the floodplain.

Permanent impacts to wetlands of 0.02 acres would occur on the Project site due to construction of facilities. Temporary impacts to wetlands would occur due to construction of the proposed Project facilities, including the Project site (0.02 acres), water pipeline (5.86 acres), and natural gas pipeline (2.88 acres). Impacts have been minimized by changing the site layout, use of HDD, and by construction of facilities adjacent to existing linear features such as county and township roads. Where unavoidable, impacts are minimized by use of pads for heavy equipment and restoration to preconstruction contours. There are no pipeline routes that completely avoid wetlands, given the locations that existing pipelines would need to be tapped and the constraints of the Project site. As a result, there is no practicable alternative to construction in wetlands. Project facilities in the floodplain would not impound or impede drainage of flood flows, or increase the severity of or damage from any flood flows.

Decision

Western's decision is to allow Basin Electric's request for interconnection at the White Substation in South Dakota and to complete modifications to the substation to support the interconnection.[1] Western's decision to grant this interconnection request satisfies the agency's statutory mission and Basin Electric's objectives while minimizing harm to the environment. An interconnection agreement will be executed in accordance with Western's Tariff.

Basin Electric has committed to minimize its proposed Project's impact on the environment through the Project's design, the use of pollution control technology, and the implementation of mitigation measures as incorporated in the Project description and summarized above. Western will adhere to its own standard mitigation measures for all modifications within White Substation. Western conditions its approval of Basin Electric's request to interconnect to Western's transmission system upon the adoption and implementation of the mitigation measures as described in the Final EIS.

This decision is based on the information contained in the Deer Creek Station Energy Facility Project Final EIS (DOE/EIS–0415). The EIS and this ROD were prepared pursuant to the requirements of the Council on Environmental Quality Regulations for Implementing NEPA (40 CFR parts 1500–1508), DOE Procedures for Implementing NEPA (10 CFR part 1021), and DOE's Floodplain/Wetland Review Requirements (10 CFR 1022). Full implementation of this decision is contingent upon the Project obtaining all applicable permits and approvals.

Dated: June 30, 2010.

Timothy J. Meeks,

Administrator.

[FR Doc. 2010–17004 Filed 7–12–10; 8:45 am]

BILLING CODE 6450–01–P

[1] Western's authority to issue a record of decision for integrating transmission facilities is pursuant to authority delegated on October 4, 1999, from the Assistant Secretary for Environment, Safety and Health to Western's Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2010–0487; FRL–8830–3]

Agency Information Collection Activities; Proposed Collection; Comment Request; Reporting and Recordkeeping for Asbestos Abatement Worker Protection; EPA ICR No. 1246.11, OMB Control No. 2070–0072

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a request to renew an existing approved Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR, entitled: "Reporting and Recordkeeping for Asbestos Abatement Worker Protection" and identified by EPA ICR No. 1246.11 and OMB Control No. 2070–0072 is scheduled to expire on January 31, 2011. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection.

DATES: Comments must be received on or before September 13, 2010.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2010–0487, by one of the following methods:

- *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail*: Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Hand Delivery*: OPPT Document Control Office (DCO), EPA East, Rm. 6428, 1201 Constitution Ave., NW., Washington, DC. Attention: Docket ID Number EPA–HQ–OPPT–2010–0487. The DCO is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the DCO is (202) 564–8930. Such deliveries are only accepted during the DCO's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to docket ID number EPA–HQ–OPPT–2010–0487. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room hours of operation are 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number of the EPA/DC Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Docket visitors are required to show photographic identification, pass through a metal detector, and sign the EPA visitor log. All visitor bags are processed through an X-ray machine and subject to search. Visitors will be provided an EPA/DC badge that must be visible at all times in the building and returned upon departure.

FOR FURTHER INFORMATION CONTACT: *For technical information contact*: Robert Courtnage, National Program Chemicals Division (7404T), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 566–1081; fax number: (202) 566–0473; e-mail address: *courtnage.robert@epa.gov*.

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; e-mail address: *TSCA-Hotline@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. What Information is EPA Particularly Interested In?

Pursuant to section 3506(c)(2)(A) of PRA, EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What Should I Consider when I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the collection activity.

7. Make sure to submit your comments by the deadline identified under **DATES**.

8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

III. What Information Collection Activity or ICR Does this Action Apply to?

Affected entities: Entities potentially affected by this action include state and local government employers in the 25 states, the District of Columbia, and certain other U.S. territories that have employees engaged in asbestos-related construction, custodial, and brake and clutch repair activities without the Occupational Safety and Health Administration (OSHA)-approved state plans.

Title: Reporting and Recordkeeping for Asbestos Abatement Worker Protection.

ICR numbers: EPA ICR No. 1246.11, OMB Control No. 2070–0072.

ICR status: This ICR is currently scheduled to expire on January 31, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA's asbestos worker protection rule is designed to provide occupational exposure protection to state and local government employees who are engaged in asbestos abatement activities in states that do not have state plans approved by OSHA. The rule provides protection for public employees not covered by the OSHA standard from the adverse health effects associated with occupational exposure to asbestos. Specifically the rule requires state and local governments to monitor employee exposure to asbestos, take action to reduce exposure to asbestos, monitor employee health, and train employees about asbestos hazards.

The rule includes a number of information reporting and recordkeeping requirements. State and local government agencies are required to provide employees with information about exposures to asbestos and the associated health effects. The rule also requires state and local governments to notify EPA before commencing any asbestos abatement project. State and local governments must maintain medical surveillance and monitoring records and training records on their employees, must establish a set of written procedures for respirator programs, and must maintain procedures and records of respirator fit tests. EPA will use the information to monitor compliance with the asbestos worker protection rule. This request addresses these reporting and recordkeeping requirements.

Responses to the collection of information are mandatory (see 40 CFR part 763, subpart G). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.32 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 22,488.

Frequency of response: On occasion; includes third-party notification.

Estimated total average number of responses for each respondent: 51.

Estimated total annual burden hours: 363,523 hours.

Estimated total annual costs: $13,982,371. This includes an estimated burden cost of $13,982,371 and an estimated cost of $0 for capital investment or maintenance and operational costs.

IV. Are There Changes in the Estimates from the Last Approval?

There is a decrease of 40,228 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. The principal reason for this decrease is because Illinois has adopted an OSHA-approved state plan since OMB last approved this information collection, reducing the number of affected states from 26 to 25 (and the District of Columbia). This in turn reduced the number of respondents subject to this information collection. This change is an adjustment.

V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

List of Subjects

Environmental protection, Reporting and recordkeeping requirements.

Dated: July 7, 2010.

Stephen A. Owens,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Agency Information Collection Activities; Submission to OMB for Review and Approval; Comment Request; Recognition Application for Sustainable Water Leadership Program (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44

U.S.C. 3501 *et seq.*), this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. The ICR, which is abstracted below, describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before August 12, 2010.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OW–2003–0064, to (1) EPA online using *http://www.regulations.gov* (our preferred method), by e-mail to *ow-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Water Docket, Mail Code: 28221T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, and (2) OMB by mail to: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Jason Bushta, Office of Water, Mail Code 4204M, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–3067; e-mail address: *bushta.jason@epa.gov.*

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On February 19, 2010 (75 FR 7476), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under Docket ID No. EPA–HQ–OW–2003–0064, which is available for online viewing at *http://www.regulations.gov,* or in person viewing at the Water Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202–566–1744, and the telephone number for the Water Docket is 202–566–9744.

Use EPA's electronic docket and comment system at *http://www.regulations.gov,* to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at *http://www.regulations.gov* as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to *http://www.regulations.gov.*

Title: Recognition Application for Sustainable Water Leadership Program (Renewal).

ICR numbers: EPA ICR No. 1287.10, OMB Control No. 2040–0101.

ICR Status: This ICR is scheduled to expire on February 28, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request (ICR) calculates the burden and costs associated with the recognition application for the Sustainable Water Leadership Program, formerly the National Clean Water Act Recognition Awards Program and prior to that, the National Wastewater Management Excellence Awards Program.

This voluntary program has been updated to reflect new industry practices consistent with EPA's sustainable infrastructure initiatives and is authorized by Section 501(e) of the Clean Water Act (CWA). The Sustainable Water Leadership Program maintains elements from the previous Clean Water Act Recognition Awards Program, namely, excellence in operations and maintenance, biosolids, combined sewer overflows, pretreatment, and stormwater management, and also expands eligibility to community drinking water utilities and systems, as well as managed decentralized treatment systems (public or private). The development of the Sustainable Water Leadership Program is the latest evolution in EPA's commitment to recognize and award outstanding and innovative utility management practices.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 20 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Water Supply and Irrigation Systems, Sewage Treatment Facilities, Engineering Services, Refuse Systems, Colleges, Universities, Professional Schools, Air and Water Resource and Solid Waste Management.

Estimated Number of Respondents: 679.

Frequency of Response: Biennially.

Estimated Total Annual Hour Burden: 13,574.

Estimated Total Annual Cost: $614,919, includes no annualized capital or O&M costs.

Changes in the Estimates: There is an increase of 11,544 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is due to changes and adjustments in the number and types of applicants eligible for recognition, which are expected to attract more applicants. Additionally, this ICR now encompasses burden hours for pretreatment awards which have until now been covered under a separate ICR for the National Pretreatment Program (OMB Control No. 2040–0009, EPA ICR No. 0002.14).

Dated: July 6, 2010.

John Moses,

Director, Collection Strategies Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9175–2; Docket ID No. EPA–HQ–ORD–2009–0934]

The Effects of Mountaintop Mines and Valley Fills on Aquatic Ecosystems of the Central Appalachian Coalfields and a Field-Based Aquatic Life Benchmark for Conductivity in Central Appalachian Streams

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of public comment period to August 13, 2010.

SUMMARY: EPA is announcing a second extension of the public comment period for two related draft documents: (1) "The Effects of Mountaintop Mines and Valley Fills on Aquatic Ecosystems of the Central Appalachian Coalfields" (EPA/600/R–09/138A) and (2) "A Field-based Aquatic Life Benchmark for Conductivity in Central Appalachian Streams" (EPA/600/R–10/023A). We are specifically extending the comment period to give the public additional time to evaluate the data used to derive a benchmark for conductivity. The original **Federal Register** notice announcing the public comment period was published on April 12, 2010 (75 FR 18499), and an extension of the public comment period was published on June 1, 2010 (75 FR 30393). By following the link below, reviewers may download the initial data and EPA's derivative data sets that were used to calculate the conductivity benchmark. These reports were developed by the National Center for Environmental Assessment (NCEA) within EPA's Office of Research and Development as part of a set of actions taken by EPA to further clarify and strengthen environmental permitting requirements for Appalachian mountaintop removal and other surface coal mining projects, in coordination with federal and state regulatory agencies (*http://www.epa.gov/owow/wetlands/guidance/mining.html*).

Both documents will be reviewed by an independent Mountaintop Mining Advisory Panel convened by EPA's Science Advisory Board (SAB). The SAB's public meeting is scheduled for July 20–22, 2010, and was announced in the **Federal Register** on May 25, 2010 (75 FR 29339). The public comment period described above and the SAB meeting follow separate processes and provide separate opportunities for all interested parties to comment on the document. EPA intends to forward to the SAB those comments received as of July 13, 2010 for consideration by the SAB Panel. Those comments received after July 13 will also be made available to the SAB review panel for their consideration as they complete their Panel report. When finalizing the draft documents, EPA will consider the comments from the SAB review as well as any significant public comments that it receives in accordance with this notice.

EPA is releasing these draft documents for the purpose of pre-dissemination peer review under applicable information quality guidelines. The documents have not been formally disseminated by EPA. They do not represent and should not be construed to represent a final Agency policy or determination; however, the documents reflect EPA's best interpretation of the available science. The draft documents are available via the Internet on NCEA's home page under the Recent Additions and Publications menus at *http://www.epa.gov/ncea.*

DATES: The public comment period began on April 12, 2010 and ends on August 13, 2010. Technical comments should be in writing and must be received by EPA by August 13, 2010.

ADDRESSES: The draft reports, "The Effects of Mountaintop Mines and Valley Fills on Aquatic Ecosystems of the Central Appalachian Coalfields" and "A Field-based Aquatic Life Benchmark for Conductivity in Central Appalachian Streams" are available primarily via the Internet on the National Center for Environmental Assessment's home page under the Recent Additions and Publications menus at *http://www.epa.gov/ncea.* A limited number of paper copies are available, contact the EPA; telephone: (703–347–8629); facsimile: (703–347–8691). If you are requesting a paper copy, please provide your name, your mailing address, and the document titles (1) "The Effects of Mountaintop Mines and Valley Fills on Aquatic Ecosystems of the Central Appalachian Coalfields" and (2) "A Field-based Aquatic Life Benchmark for Conductivity in Central Appalachian Streams."

Comments may be submitted electronically via *www.regulations.gov*, by mail, by facsimile, or by hand delivery/courier. Please follow the detailed instructions provided in the **SUPPLEMENTARY INFORMATION** section of **Federal Register** Notice (75 FR 30393).

FOR FURTHER INFORMATION CONTACT: For information on submitting comments to the docket, please contact the Office of Environmental Information Docket; telephone: 202–566–1752; facsimile: 202–566–1753; or e-mail: *ORD.Docket@epa.gov.* For technical information, please leave a message at 703–347–8629 or send e-mail to *MTM-Cond@epa.gov.*

Dated: July 6, 2010.

Rebecca Clark,

Acting Director, National Center for Environmental Assessment.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2010–0505; FRL–9174–8]

Oil and Natural Gas Sector—Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: EPA will be conducting public meetings to provide an opportunity for public involvement during EPA's review of air regulations affecting the oil and natural gas industry. The review in progress covers oil and natural gas exploration and production, as well as natural gas processing, transmission, storage, and distribution. The primary purpose of these meetings is to establish a dialog among government, the affected industry, and other interested members of the public early in the rule development process, as well as to receive information that may be useful to EPA in its review. At these meetings, EPA will explain the regulatory process, provide a brief overview of its regulatory review, solicit information that may be useful to EPA in the review of these rules, and provide an opportunity for participants to ask questions and submit comments. These meetings will be open to the public.

DATES: *Meetings:* There will be daytime and evening meetings to provide greater public access. The first pair of meetings will be held on August 2, 2010, from 12 p.m. to 4 p.m., and 6 p.m. to 10 p.m., in the Council Chamber of the Arlington Municipal Building, Arlington, Texas. The second pair of meetings will be held on August 3, 2010, from 12 p.m. to 4 p.m., and 6 p.m. to 10 p.m., in the ballroom of the Holiday Inn Denver East-Stapleton, Denver, Colorado. Meetings may end earlier than the scheduled times based on participation.

Participation: Although not required for attendance, we ask that anyone who plans to attend one or more of the meetings provide name, affiliation, and sessions attending to the meeting information contact listed under **FOR FURTHER INFORMATION CONTACT** at least

10 days prior to the meeting. However, anyone who wishes to present comments at any of the meetings must notify the meeting information contact at least 10 days prior to the meeting to facilitate EPA in developing the agenda. We request that an electronic or hard copy of any prepared comments be provided to EPA at the time of the meeting.

Special Accommodations: To request accommodation of a disability, please contact the meeting information contact listed under **FOR FURTHER INFORMATION CONTACT**, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

ADDRESSES: The August 2, 2010, meetings will be held at the Arlington Municipal Building, 101 W. Abram St., Arlington, Texas 76010. The August 3, 2010, meetings will be held at the Holiday Inn Denver East-Stapleton, 3333 Quebec St., Denver, Colorado 80207.

FOR FURTHER INFORMATION CONTACT: *For information on the EPA Oil and Natural Gas Sector Program, contact:* Mr. Bruce Moore, Sector Policies and Programs Division (E143–01), Office of Air Quality Planning and Standards, Environmental Protection Agency, 109 T.W. Alexander Dr., Research Triangle Park, North Carolina 27711; telephone number: (919) 541–5460; fax number: (919) 541–0246; e-mail address: *moore.bruce@epa.gov. For meeting information, contact:* Mr. Nick Parsons, Sector Policies and Programs Division (E143–01), Office of Air Quality Planning and Standards, Environmental Protection Agency, 109 T.W. Alexander Dr., Research Triangle Park, North Carolina 27711; telephone number: (919) 541–5372; fax number: (919) 541–0246; e-mail address: *parsons.nick@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

Does this action apply to me?

EPA is in the process of reviewing air regulations affecting the oil and natural gas industry. This review may potentially affect any segment of the oil and natural gas industry, which includes, but is not limited to: Offshore drilling; onshore drilling; oil and natural gas production; natural gas processing; natural gas transmission; and natural gas distribution. You may be affected in some way by regulatory action following this review if you own, operate, work, or live near oil and natural gas operations in the segments listed above.

Docket. EPA has established a docket for the above mentioned review process under Docket ID Number EPA–HQ–OAR–2010–0505. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the EPA Docket Center, Public Reading Room, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742.

II. Background

Under sections 111(b)(1)(B), 112(d)(6), and 112(f)(2) of the Clean Air Act (CAA), EPA has a mandatory duty to take actions relative to the review/revision of new source performance standards (NSPS) and national emission standards for hazardous air pollutants (NESHAP) within 8 years of the issuance of the standards. On January 14, 2009, WildEarth Guardians and San Juan Citizens Alliance brought suit against EPA in the District Court for the District of Columbia, alleging that EPA failed to meet its obligations under sections 111(b)(1)(B), 112(d)(6), and 112(f)(2) of the CAA with respect to the Oil and Natural Gas Production source category. On February 4, 2010, the Court entered a consent decree that resolves the claims in this lawsuit. The consent decree requires, among other things, that EPA sign by January 31, 2011, proposed standards and/or determinations not to issue standards pursuant to sections 111(b)(1)(B), 112(d)(6), and 112(f)(2) of the CAA, and that EPA finalize its proposals by November 30, 2011. The consent decree authorizes EPA to sign by January 31, 2011, a final determination not to review the NSPS pursuant to section 111(b)(1)(B) of the CAA without issuing a proposal for such determination.

EPA is in the process of taking actions under CAA sections 111 and 112 relative to the review/revision of the following NSPS and NESHAP: The NSPS for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants (40 CFR part 60, subpart KKK); the NSPS for Onshore Natural Gas Processing: SO_2 Emissions (40 CFR part 60, subpart LLL); the NESHAP From Oil and Natural Gas Production Facilities (40 CFR part 63, subpart HH); and the NESHAP From Natural Gas Transmission and Storage Facilities (40 CFR part 63, subpart HHH). As part of this process, EPA is holding public meetings in the Dallas, Texas, and Denver, Colorado, areas, both of which are in regions significantly affected by oil and natural gas production operations. The purpose of these meetings is to establish a dialog among government, the affected industry, and other interested members of the public, as well as to receive information that may be useful to EPA in its review of the NSPS and NESHAP identified above. Such information could include information regarding the nature of local oil and gas production operations, air emissions from oil and gas production operations, control technologies and/or practices that may minimize or otherwise address air emissions, and information on the public health, welfare, and other environmental impacts of air emissions from oil and gas production operations. At these meetings, EPA plans to provide a brief overview of the Agency's review process for the NSPS and NESHAP identified above, including background information on these regulations. There will also be opportunities for questions and answers. In addition, any interested party from industry or the general public may present oral or written information to EPA at these meetings.

Dated: July 7, 2010.

Mary E. Henigin,

Acting Director, Office of Air Quality Planning and Standards.

RIN 2040–AD94

Drinking Water Strategy Contaminants as Group(s)—Notice of Web Dialogue

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On March 22, 2010, Administrator Lisa P. Jackson announced the Drinking Water Strategy, a new vision to expand public health protection for drinking water by going beyond the traditional framework. The Drinking Water Strategy includes the following four principles: Addressing some contaminants as group(s) rather than one at a time so that enhancement of drinking water protection can be achieved cost-effectively; fostering development of new drinking water technologies to address health risks posed by a broad array of contaminants; using the authority of multiple statutes to help protect drinking water; and

partnering with States to share more complete data from monitoring at public water systems. EPA is committed to engaging the public and stakeholders as we move forward to implement the four principles. The purpose of this notice is to announce that EPA will host a Web dialogue. The discussion topics for this Web dialogue are focused on the first of the four principles, addressing some contaminants as group(s) rather than addressing single contaminants. EPA invites the public and stakeholders to participate in this information exchange on addressing contaminants as group(s).

DATES: The Web dialogue is a two-day event. It will open at 9 a.m., Eastern Daylight Time (6 a.m., Pacific Daylight Time) on Wednesday, July 28, 2010, and will close at 6 p.m., Eastern Daylight Time on Thursday, July 29, 2010.

ADDRESSES: This meeting will take place on the Internet at *http://www.webdialogues.net/epa/dwcontaminantgroups.*

FOR FURTHER INFORMATION CONTACT: For technical inquiries, contact Shari Bauman, Standards and Risk Management Division, Office of Ground Water and Drinking Water (MC 4607M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460 at (202) 564–0293, or *bauman.shari@epa.gov.*

SUPPLEMENTARY INFORMATION: The meeting is open to the public. During the Web dialogue, EPA plans to solicit input on the potential approaches associated with addressing contaminants as group(s). The proposed discussion topics are:

- Addressing Drinking Water Contaminants as Groups.
- Fitting Groups Within the Safe Drinking Water Act.
- Defining Groups.
- Group Technical Approaches.
- Group Implementation Approaches.

Individuals interested in engaging in the Web dialogue information exchange must register at *http://www.webdialogues.net/epa/dwcontaminantgroups.* Registration will open on July 7, 2010. Any person interested in viewing the discussions without comment is not required to register.

The Web dialogue is an opportunity for all registered participants to exchange information and share ideas that they would like for EPA to consider when developing a framework to address contaminants as group(s).

For more information about the Drinking Water Strategy, visit *http://www.epa.gov/safewater/sdwa/dwstrategy.html.*

Dated: July 7, 2010.

Cynthia C. Dougherty,

Director, Office of Ground Water and Drinking Water.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

July 7, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 – 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, and (e) ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 13, 2010. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via email to Nicholas_A._Fraser@omb.eop.gov and to the Federal Communications Commission via email to PRA@fcc.gov and Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: Cathy Williams on (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0466.

Title: Station Identification, Sections 73.1201, 74.783 and 74.1283.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for–profit entities; Not–for–profit institutions; State, Local and Tribal Government.

Number of Respondents and Responses: 4,200 respondents; 4,200 responses

Estimated Time per Response: 10 minutes to 1 hour.

Frequency of Response: Recordkeeping requirement; Third party disclosure requirement; On occasion reporting requirement.

Obligation to Respond: Required to obtain benefits – Statutory authority for this collection of information is contained in Sections 154(i), 303 and 308 of the Communications Act of 1934, as amended.

Total Annual Burden: 6,566 hours

Total Annual Costs: None.

Nature and Extent of Confidentiality: No need for confidentiality required with this collection of information.

Privacy Impact Assessment(s): No impact(s).

Needs and Uses: The information collection requirements covered under OMB control number 3060–0466 are as follows:

47 CFR Section 73.1201(a) requires television broadcast licensees to make broadcast station identification announcements at the beginning and ending of each time of operation, and hourly, as close to the hour as feasible, at a natural break in program offerings. Television and Class A television broadcast stations may make these announcements visually or aurally.

47 CFR Section 74.783(b) requires licensees of television translators whose station identification is made by the television station whose signals are being rebroadcast by the translator, must secure agreement with this television station licensee to keep in its file, and available to FCC personnel, the translator's call letters and location, giving the name, address and telephone number of the licensee or his service representative to be contacted in the event of malfunction of the translator. It shall be the responsibility of the translator licensee to furnish current information to the television station licensee for this purpose.

47 CFR Section 73.1201(b)(1) requires that the official station identification consist of the station's call letters immediately followed by the community or communities specified in its license as the station's location. The name of the licensee, the station's frequency, the station's channel number, as stated on the station's license, and/or the station's network affiliation may be inserted between the call letters and station location. Digital Television (DTV) stations, or DAB Stations, choosing to include the station's channel number in the station identification must use the station's major channel number and may distinguish multicast program streams. For example, a DTV station with major channel number 26 may use 26.1 to identify a High Definition Television (HDTV) program service and 26.2 to identify a Standard Definition Television (SDTV) program service. A radio station operating in DAB hybrid mode or extended hybrid mode shall identify its digital signal, including any free multicast audio programming streams, in a manner that appropriately alerts its audience to the fact that it is listening to a digital audio broadcast. No other insertion between the station's call letters and the community or communities specified in its license is permissible. A station may include in its official station identification the name of any additional community or communities, but the community to which the station is licensed must be named first.

47 CFR Section 74.783(e) permits low power TV permittees or licensees to request to be assigned four–letter call signs in lieu of the five–character alpha–numeric call signs.

47 CFR Section 74.1283(c)(1) requires a FM translator station licensee whose identification is made by the primary station must arrange for the primary station licensee to furnish the translator's call letters and location (name, address, and telephone number of the licensee or service representative) to the FCC. The licensee must keep this information in the primary station's files.

Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

July 5, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 – 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, and (e) ways to further reduce the information collection burden for small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 13, 2010. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via email to Nicholas_A._Fraser@omb.eop.gov and to the Federal Communications Commission via email to PRA@fcc.gov and Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: Cathy Williams on (202) 418–2918

SUPPLEMENTARY INFORMATION: OMB Control Number: 3060–0668.

Title: Section 76.936, Written Decisions.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: State or Local, or Tribal government.

Number of Respondents and Responses: 600 respondents and 600 responses.

Estimated Hours per Response: 1 hour.

Frequency of Response: Third party disclosure requirement; On occasion reporting requirement.

Total Annual Burden: 600 hours.

Total Annual Costs: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Section 4(i) of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: Confidentiality is not required with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 76.936 states that a franchising authority must issue a written decision in a rate–making proceeding whenever it disapproves an initial rate for the basic service tier or associated equipment in whole or in part, disapproves a request for a rate increase in whole or in part, or approves a request for an increase whole or in part over the objection of interested parties. Franchising authorities are required to issue a written decision in rate–making proceedings pursuant to Section 76.936 so that cable operators and the public are made aware of the proceeding.

Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

July 7, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as

required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 – 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, and (e) ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before [September 13, 2010]. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via email to Nicholas_A._Fraser@omb.eop.gov and to Cathy Williams, Federal Communications Commission via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: Cathy Williams on (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–xxxx.

Title: Structure and Practices of the Video Relay Service Program, CG Docket No. 10–51.

Form Number: N/A.

Type of Review: New Collection.

Respondents: Business or other for–profit entities.

Number of Respondents and Responses: 10 respondents; 130 responses.

Estimated Time per Response: .017 hours (1 minute average per response).

Frequency of Response: Annual and monthly reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for the information collection requirements is found at Sections 1, 4, 225, and 303(r) of the Communications Act of 1934, as amended (Act), 47 U.S.C. 151, 154, 225, and 303(r).

Total Annual Burden: 2.17 hours.

Total Annual Cost: None.

Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information (PII) from individuals.

Privacy Impact Assessment: No impact(s).

Needs and Uses: In document FCC 10–88, the Commission finds good cause to adopt an interim rule requiring the Chief Executive Officer, Chief Financial Officer, or other senior executive of a Telecommunications Relay Service (TRS) provider submitting minutes to the Interstate TRS Fund (Fund) administrator for compensation on a monthly basis to certify, under penalty of perjury, that the submitted minutes were handled in compliance with Section 225 of the Act and the Commission's rules and orders. Also in this document, the Commission requires such an executive to certify, under penalty of perjury, that cost and demand data submitted to the Fund administrator on an annual basis related to the determination of compensation rates or methodologies are true and correct. The explosive growth in the Fund in recent years and evidence of fraud against the Fund, as evidenced by recent indictments and guilty pleas from call center managers and employees admitting to defrauding the Fund of tens of millions of dollars, require the Commission to take immediate steps in preserving the Fund to ensure the continued availability of TRS. By requiring providers to be more accountable for their submissions, the Commission takes necessary, affirmative steps to preserve the TRS Fund.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

July 8, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 – 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, and (e) ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 13, 2010. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via the Internet at Nicholas_A._Fraser@omb.eop.gov and to the Federal Communications Commission via email to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: Judith B. Herman, Office of Managing Director, (202) 418–0214. For additional information, contact Judith B. Herman, OMD, 202–418–0214 or email judith–b.herman@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0975.

Title: Sections 68.3 and 1.4000, Promotion of Competitive Networks in Local Telecommunications Markets Multiple Tenant Environments (MTEs).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for–profit, not–for–profit institutions, federal government, state, local or tribal government.

Number of Respondents and Responses: 5,874 respondents, 5,874 responses.

Estimated Time Per Response: .5 – 10 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. section 151.

Total Annual Burden: 194,284 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) after this comment period to obtain the full three year clearance from them. There is no change to the reporting and/or third party disclosure requirements. There is a 21,598 hour reduction. The Commission anticipated that this burden would decrease over time because the request for location information would have already been made at most buildings. Therefore, the number of respondents is decreasing as well as the total annual burden hours.

In a October 2001 Order, FCC 00–366, the Commission did the following: 1) prohibited carriers from entering into contracts that restrict or effectively restrict a property owner's ability to permit entry by competing carriers; 3) established procedures to facilitate moving the demarcation point to the minimum point of entry ("MPOE") at the building owner's request, and requires incumbent local exchange carriers (LECs) to timely disclose the location of existing demarcation points where they are not located at the MPOE; 3) determined that, under Section 224 of the Communications Act of 1934, as amended, utilities, including LECs, must afford telecommunications carriers and cable service providers reasonable and non–discriminatory access to conduits and rights–of–way located in customer buildings and campuses, to the extent such conduits and rights–of–way are owned or controlled by the utility; and 4) extended to antennas that receive and transmit telecommunications and other fixed wireless signals the existing prohibition of restrictions that impair the installation, maintenance or use of certain video antennas on property within the exclusive use or control of the antenna user, where the user has a direct or indirect ownership or leasehold interest in the property.

a. The demarcation point burden consists of two components: 1) the LEC shall make available information on the location of the demarcation point within ten business days of a request from the premises owner (location information); and 2) at the time of installation, the LEC shall fully inform the premises owner of its options and rights regarding the placement of the demarcation point or points (options information).

b. The Over–the–Air Reception Devices (OTARD) portion of this information collection relates to the revision of the Commissions rules under 1.4000. Under those revisions, as a condition of invoking protection under 47 CFR 1.400 from government, landlord, and association restrictions, a licensee must ensure that subscriber antennas are labeled to give notice of potential radio frequency safety hazards of these antennas. Labeling information (third party disclosure requirement) should include minimum separation distances required between users and radiating antennas to meet the Commission's radio frequency exposure guidelines. Labels should also include reference to the Commission's applicable radio frequency exposure guidelines and should use the ANSI–specified warning symbol for radio frequency exposure. In addition, the instruction manuals and other information accompanying subscriber transceivers should include a full explanation of the labels, as well as a reference to the applicable Commission radio frequency exposure guidelines.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted for Review and Approval to the Office of Management and Budget (OMB), Comments Requested

July 8, 2010.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501 – 3520. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) ways to further reduce the information collection burden for small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a currently valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before August 12, 2010. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via the Internet at Nicholas_A._Fraser@omb.eop.gov and to the Federal Communications Commission via email to PRA@fcc.gov. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page http://reginfo.gov/public/do/PRAMain, (2) look for the section of the web page called "Currently Under Review", (3)

click on the downward–pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, and (6) when the list of FCC ICRs currently under review appears, look for the title of this ICR (or its OMB Control Number, if there is one) and then click on the ICR Reference Number to view detailed information about this ICR.

FOR FURTHER INFORMATION CONTACT: Judith B. Herman, Office of Managing Director, (202) 418–0214. For additional information or copies of the information collection(s), contact Judith B. Herman, OMD, 202–418–0214 or email judith–b.herman@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1135.

Title: Revisions to Rules Authorizing the Operation of Low Power Auxiliary Stations (Including Wireless Microphones).

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for–profit, not–for–profit institutions and state, local or tribal government.

Number of Respondents and Responses: 5,100 responses; 127,500 responses.

Estimated Time per Response: .25 hours (15 minutes).

Frequency of Response: Third party disclosure requirements (disclosure and labeling requirements).

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. sections 151, 152, 154(i),154(j), 301, 302(a), 303, 304, 307, 308, 309, 316, 332, 336 and 337.

Total Annual Burden: 31,875 hours.

Total Annual Cost: $1,625,000.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality since these are third party disclosure and labeling requirements.

Needs and Uses: The Commission will submit this expiring information collection during this comment period to obtain the full three year clearance from the Office of Management and Budget (OMB). The Commission is reporting a revision which is due to elimination of the early clearing requirement burden as it will be unnecessary after June 12, 2010 while keeping the disclosure and labeling requirements that would allow the Commission to clear the 700 MHz band of wireless microphones and provide them a home in the core TV spectrum, where many wireless microphones are already operating. Therefore, the Commission is reporting a 1,049 hour program change reduction in burden.

The point–of–sale disclosure requirement is necessary for a successful transition of wireless microphones out of the 700 MHz band. The Commission anticipates that many wireless microphone users currently operating in the 700 MHz band will have to purchase or lease new equipment capable of operating in the core TV spectrum. The point–of–sale disclosure requirement will help these consumers make an educated decision as they obtain new microphones, and it will help them operate in the core TV spectrum without causing harmful interference to other services in the spectrum. Further, a label on 700 MHz band wireless microphones bound for export will help to ensure that these wireless microphones do not continue to be made available for use in the United States, in contravention of our efforts to remove them from the 700 MHz band.

Federal Communications Commission.

Marlene H. Dortch,

Secretary,

Office of the Secretary,

Office of Managing Director.

BILLING CODE 6712–01–S

FEDERAL COMMUNICATIONS COMMISSION

[DA 10–1112]

Notice of Debarment; Schools and Libraries Universal Service Support Mechanism

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Federal Communications Commission (the "Commission") debars Mr. Rowner from the schools and libraries universal service support mechanism for a period of three years.

DATES: Debarment commences on the date Mr. Benjamin Rowner receives the debarment letter or July 13, 2010, whichever date come first, for a period of three years.

FOR FURTHER INFORMATION CONTACT: Mindy Littell, Federal Communications Commission, Enforcement Bureau, Investigations and Hearings Division, Room 4–A331, 445 12th Street, SW., Washington, DC 20554. Mindy Littell may be contacted by phone at (202) 418–0789 or e-mail at *Mindy.Littell@fcc.gov.* If Ms. Littell is unavailable, you may contact Mr. Trent Harkrader, Deputy Chief, Investigations and Hearings Division, by telephone at (202) 418–2955 and by e-mail at *Trent.Harkrader@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Commission debarred Mr. Rowner from the schools and libraries universal service support mechanism for a period of three years pursuant to 47 CFR 521 and 47 CFR 0.111(a)(14). Attached is the debarment letter, DA 10–1112, which was mailed to Mr. Rowner and released on June 23, 2010. The complete text of the notice of debarment is available for public inspection and copying center during regular business hours at the FCC Reference Information Center, Portal II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554, In addition, the complete text is available on the FCC's Web site at *http://www.fcc.gov.* The text may also be purchased from the Commission's duplicating inspection and copying center during regular business hours at the contractor, Best Copy and Printing, Inc., Portal II, 445 12th Street, SW., Room CY–B420, Washington, DC 20554, telephone (202) 488–5300 or (800) 378–3160, facsimile (202) 488–5563, or via e-mail *http://www.bcpiweb.com.*

Federal Communications Commission.

Hillary S. DeNigro,

Chief, Investigations and Hearings Division, Enforcement Bureau.

The debarment letter follows:

Mr. Benjamin Rowner
c/o Federal Correctional Institution
Otisville, NY Satellite Prison Camp
P.O. Box 1000
Otisville, NY 10963

Re: Notice of Debarment
File No. EB–10–IH–2079

Dear Mr. Rowner:

Pursuant to section 54.8 of the rules of the Federal Communications Commission (the "Commission"), by this Notice of Debarment you are debarred from the schools and libraries universal service support mechanism (or "E-Rate program") for a period of three years.[1]

On April 7, 2010, the Enforcement Bureau (the "Bureau") sent you a Notice of Suspension and Initiation of Debarment Proceedings (the "Notice of

[1] 47 CFR 54.8(g)(2008). *See also* 47 CFR 0.111(a)(14).

Suspension").[2] That Notice of Suspension was published in the **Federal Register** on April 21, 2010.[3] The Notice of Suspension suspended you from participating in activities associated with or relating to the schools and libraries universal service support mechanism and described the basis for initiation of debarment proceedings against you, the applicable debarment procedures, and the effect of debarment.[4]

Pursuant to the Commission's rules, any opposition to your suspension or its scope or to your proposed debarment or its scope had to be filed with the Commission no later than thirty (30) calendar days from the earlier date of your receipt of the Notice of Suspension or publication of the Notice of Suspension in the **Federal Register**.[5] The Commission did not receive any such opposition.

As discussed in the Notice of Suspension, you pleaded guilty to and were sentenced to serve twenty-seven months in federal prison, to be followed by twenty-four months of supervised release for federal crimes in connection with your participation in a scheme to defraud the E-Rate program.[6] You held yourself out as an E-Rate salesperson and installer and admitted that you and others devised schemes to defraud school districts and the E-Rate program by having your co-conspirators steer E-rate related contracts to various companies that directly benefited you,your conspirators, and your company.[7] You were also ordered to pay $271,716 in restitution to USAC for your role in the schemes.[8] Such conduct constitutes the basis for your debarment, and your conviction falls within the categories of causes for debarment under section 54.8(c) of the Commission's rules.[9] For the foregoing reasons, you are hereby debarred for a period of three years from the debarment date, i.e., the earlier date of your receipt of this Notice of Debarment or its publication date in the **Federal Register**.[10]

Debarment excludes you, for the debarment period, from activities associated with or related to the schools and libraries support mechanism, including the receipt of funds or discounted services through the schools and libraries support mechanism, or consulting with, assisting, or advising applicants or service providers regarding the schools and libraries support mechanism.[11]

Sincerely,

Hillary S. DeNigro

Chief, Investigations and Hearings Division Enforcement Bureau

Re: Notice of Suspension and Initiation of Debarment Proceedings File No. EB–10–IH–2079

Dear Mr. Rowner:

The Federal Communications Commission ("FCC" or "Commission") has received notice of your guilty plea for conspiracy to defraud the United States in violation of 18 U.S.C. 371 in connection with your participation in the schools and libraries universal service support mechanism ("E-Rate program").[12] Consequently, pursuant to 47 CFR 54.8, this letter constitutes official notice of your suspension from the E-Rate program. In addition, the Enforcement Bureau ("Bureau") hereby notifies you that we are commencing debarment proceedings against you.[13]

I. Notice of Suspension

The Commission has established procedures to prevent persons who have "defrauded the government or engaged in similar acts through activities associated with or related to the schools and libraries support mechanism" from receiving the benefits associated with that program.[14] On July 10, 2008, you, Benjamin Rowner, entered a plea agreement and pleaded guilty to knowingly and intentionally conspiring with others to defraud and obtain money from the E-Rate Program through submission of materially false representations, concealment of material facts, mail fraud, wire fraud, and intentional manipulation of the competitive bidding process.[15] Specifically, from Fall 1999 to at least November 2003, you held yourself out as an E-Rate salesperson and installer for the purpose of defrauding the E-Rate Program.[16] You admitted that you and others devised schemes to defraud school districts and the E-Rate program

[15] *Rowner Plea* at 2–3; *see also Rowner and Soled Information* at 5–12; Department of Justice Press Release (Apr. 23, 2008), available at *http://www.justice.gov/atr/public/press_releases/2008/232526.htm* ("DOJ April 2008 Press Release").

[16] *Rowner Plea* at 3–8; *see also Rowner and Soled Information* at 5–12.

by having your co-conspirators steer E-rate related contracts to various companies that directly benefited you, your conspirators, and your company, primarily DeltaNet, Inc.[17] In furtherance of the schemes, you submitted misleading, fraudulent and false documents to the Universal Service Administrative Company ("USAC") claiming schools were paid or would pay their co-pay, submitted other materially false and fraudulent documents to USAC, and concealed from the school districts relationships with co-conspirators in order to induce schools to select your companies as service providers in violation of E-Rate Program rules.[18] Ultimately, your conspiracy was comprised of two closely related schemes that affected at least thirteen different schools in eight different states across the United States.[19]

On February 4, 2010, you were sentenced to serve twenty-seven months in prison, to be followed by twenty-four months of supervised release for your role in the scheme to defraud the E-Rate program.[20] You were also ordered to pay $271,716 in restitution to USAC for your role in the schemes.[21]

Pursuant to section 54.8 of the Commission's rules, your conviction requires the Bureau to suspend you from participating in any activities associated with or related to the schools and libraries support mechanism.[22] Such activities include the receipt of funds or discounted services through the schools and libraries support mechanism, or consulting with, assisting, or advising applicants or service providers regarding the schools and libraries support mechanism.[23]

Your suspension becomes effective upon the earlier of your receipt of this letter or publication of notice in the **Federal Register**, pending the Bureau's final debarment determination.[24] In accordance with the Commission's debarment rules, you may contest this suspension or the scope of this suspension by filing arguments in opposition to the suspension, with any relevant documentation.[25] Your request must be received within 30 days after you receive this letter or after notice is published in the Federal Register, whichever comes first.[26] Such requests, however, will not ordinarily be granted.[27] The Bureau may reverse or limit the scope of suspension only upon a finding of extraordinary circumstances.[28] The Bureau will decide any request for reversal or modification of suspension within 90 days of its receipt of such request.[29]

II. Initiation of Debarment Proceedings

Your guilty plea and conviction of criminal conduct in connection with the E-Rate program, in addition to serving as a basis for immediate suspension from the program, also serves as a basis for the initiation of debarment proceedings against you. Your conviction falls within the categories of causes for debarment defined in section 54.8(c) of the Commission's rules.[30] Therefore, pursuant to section 54.8 of the Commission's rules, your conviction requires the Bureau to commence debarment proceedings against you.[31]

As with your suspension, you may contest debarment or the scope of the proposed debarment by filing arguments and any relevant documentation within 30 calendar days of the earlier of the receipt of this letter or of publication in the **Federal Register.**[32] Absent extraordinary circumstances, the Bureau will debar you.[33] The Bureau will decide any request for reversal or limitation of debarment within 90 days of receipt of such request.[34] If the Bureau decides to debar you, its decision will become effective upon the earlier of your receipt of a debarment notice or publication of the decision in the **Federal Register.**[35]

If and when your debarment becomes effective, you will be prohibited from participating in activities associated with or related to the schools and libraries support mechanism for three years from the date of debarment.[36] The Bureau may, if necessary to protect the public interest, extend the debarment period.[37]

Please direct any response, if by messenger or hand delivery, to Marlene H. Dortch, Secretary, Federal Communications Commission, 445 12th Street, S.W., Room TW–A325, Washington, DC 20554, to the attention of Rebekah Bina, Attorney Advisor, Investigations and Hearings Division, Enforcement Bureau, Room 4–C330, with a copy to Michele Levy Berlove, Acting Assistant Chief, Investigations and Hearings Division, Enforcement Bureau, Room 4–C330, Federal Communications Commission. If sent by commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail), the response should be sent to the Federal Communications Commission, 9300 East Hampton Drive, Capitol Heights, Maryland 20743. If sent by first-class, Express, or Priority mail, the response should be sent to Rebekah Bina, Attorney Advisor, Investigations and Hearings Division, Enforcement Bureau, Federal Communications Commission, 445 12th Street, S.W., Room 4–C330, Washington, DC 20554, with a copy to Michele Levy Berlove, Acting Assistant Chief, Investigations and Hearings Division, Enforcement Bureau, Federal Communications Commission, 445 12th Street, S.W., Room 4–C330, Washington, DC, 20554. FEDERAL COMMUNICATIONS COMMISSION

[DA 10–1113]

Notice of Debarment; Schools and Libraries Universal Service Support Mechanism

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Federal Communications Commission (the "Commission") debars Mr. Soled from the schools and libraries universal service support mechanism for a period of three years.

DATES: Debarment commences on the date Mr. Jay H. Soled receives the debarment letter or July 13, 2010, whichever date comes first, for a period of three years.

FOR FURTHER INFORMATION CONTACT: Mindy Littell, Federal Communications Commission, Enforcement Bureau, Investigations and Hearings Division, Room 4–A331, 445 12th Street, SW., Washington, DC 20554. Mindy Littell may be contacted by phone at (202) 418–0789 or e-mail at *Mindy.Littell@fcc.gov.* If Ms. Littell is unavailable, you may contact Mr. Trent Harkrader, Deputy Chief, Investigations and Hearings Division, by telephone at (202) 418–2955 and by e-mail at *Trent.Harkrader@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Commission debarred Mr. Soled from the schools and libraries universal service support mechanism for a period of three years pursuant to 47 CFR 521 and 47 CFR 0.111(a)(14). Attached is the debarment letter, DA 10–1113, which was mailed to Mr. Soled and released on June 23, 2010. The complete text of the notice of debarment is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portal II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554. In addition, the complete text is available on the FCC's Web site at *http://www.fcc.gov.* The text may also be purchased from the Commission's duplicating inspection and copying during regular business hours at the contractor, Best Copy and Printing, Inc., Portal II, 445 12th Street, SW., Room CY–B420, Washington, DC 20554, telephone (202) 488–5300 or (800) 378–3160, facsimile (202) 488–5563, or via e-mail *http://www.bcpiweb.com.*

Federal Communications Commission.

Re: Notice of Debarment
File No. EB–10–IH–2080

Dear Mr. Soled:

Pursuant to section 54.8 of the rules of the Federal Communications Commission (the "Commission"), by this Notice of Debarment you are debarred from the schools and libraries universal service support mechanism (or "E-Rate program") for a period of three years.[1]

On April 7, 2010, the Enforcement Bureau (the "Bureau") sent you a Notice of Suspension and Initiation of Debarment Proceedings (the "Notice of Suspension").[2] That Notice of Suspension was published in the **Federal Register** on April 21, 2010.[3] The Notice of Suspension suspended you from participating in activities associated with or relating to the schools and libraries universal service support mechanism and described the basis for initiation of debarment proceedings against you, the applicable debarment procedures, and the effect of debarment.[4]

Pursuant to the Commission's rules, any opposition to your suspension or its scope or to your proposed debarment or its scope had to be filed with the Commission no later than thirty (30) calendar days from the earlier date of your receipt of the Notice of Suspension or publication of the Notice of Suspension in the **Federal Register.**[5] The Commission did not receive any such opposition.

As discussed in the Notice of Suspension, you pleaded guilty to and were sentenced to serve twenty-seven months in federal prison, to be followed by twenty-four months of supervised release for federal crimes in connection with your participation in a scheme to defraud the E-Rate program.[6] You held yourself out as an E-Rate salesperson and installer and admitted that you and others devised schemes to defraud school districts and the E-Rate program by having your co-conspirators steer E-rate related contracts to various companies that directly benefited you, your conspirators, and your company.[7] You were also ordered to pay $271,716 in restitution to USAC for your role in the schemes.[8] Such conduct constitutes the basis for your debarment, and your conviction falls within the categories of causes for debarment under section 54.8(c) of the Commission's rules.[9] For the foregoing reasons, you are hereby debarred for a period of three years from the debarment date, i.e., the earlier date of your receipt of this Notice of Debarment or its publication date in the **Federal Register.**[10]

Debarment excludes you, for the debarment period, from activities associated with or related to the schools and libraries support mechanism, including the receipt of funds or discounted services through the schools and libraries support mechanism, or consulting with, assisting, or advising

Re: Notice of Suspension and Initiation of Debarment Proceedings, File No. EB–10–IH–2080

Dear Mr. Soled:

The Federal Communications Commission ("FCC" or "Commission") has received notice of your guilty plea for conspiracy to defraud the United States in violation of 18 U.S.C. 371 in connection with your participation in the schools and libraries universal service support mechanism ("E-Rate program").[12] Consequently, pursuant to 47 CFR 54.8, this letter constitutes official notice of your suspension from the E-Rate program. In addition, the Enforcement Bureau ("Bureau") hereby notifies you that we are commencing debarment proceedings against you.[13]

I. Notice of Suspension

The Commission has established procedures to prevent persons who have "defrauded the government or engaged in similar acts through activities associated with or related to the schools and libraries support mechanism" from receiving the benefits associated with that program.[14] On July 10, 2008, you, Jay H. Soled, entered a plea agreement and pleaded guilty to knowingly and intentionally conspiring with others to defraud and obtain money from the E-Rate Program through submission of materially false representations, concealment of material facts, mail fraud, wire fraud, and intentional manipulation of the competitive bidding process.[15] Specifically, from Fall 1999 to at least November 2003, you held yourself out as an E-Rate salesperson and installer for the purpose of defrauding the E-Rate Program.[16] You admitted that you and others devised schemes to defraud school districts and the E-Rate program by having your co-conspirators steer E-rate related contracts to various companies that directly benefited you, your conspirators, and your company, primarily DeltaNet, Inc.[17] In furtherance of the schemes, you submitted misleading, fraudulent and false documents to the Universal Service Administrative Company ("USAC") claiming schools were paid or would pay their co-pay, submitted other materially false and fraudulent documents to USAC, and concealed from the school districts relationships with co-conspirators in order to induce schools to select your companies as service providers in violation of E-Rate Program rules.[18] Ultimately, your conspiracy was comprised of two closely related schemes that affected at least thirteen different schools in eight different states across the United States.[19]

On February 4, 2010, you were sentenced to serve twenty-seven months in prison, to be followed by twenty-four months of supervised release for your role in the scheme to defraud the E-Rate program.[20] You were also ordered to pay $271,716 in restitution to USAC for your role in the schemes.[21]

Pursuant to section 54.8 of the Commission's rules, your conviction requires the Bureau to suspend you from participating in any activities associated with or related to the schools and libraries support mechanism.[22] Such activities include the receipt of funds or discounted services through the schools and libraries support mechanism, or consulting with, assisting, or advising applicants or service providers regarding the schools and libraries support mechanism.[23]

Your suspension becomes effective upon the earlier of your receipt of this letter or publication of notice in the **Federal Register,** pending the Bureau's final debarment determination.[24] In accordance with the Commission's debarment rules, you may contest this suspension or the scope of this suspension by filing arguments in opposition to the suspension, with any relevant documentation.[25] Your request must be received within 30 days after you receive this letter or after notice is published in the **Federal Register,** whichever comes first.[26] Such requests, however, will not ordinarily be granted.[27] The Bureau may reverse or limit the scope of suspension only upon a finding of extraordinary

[11] *See* 47 CFR 54.8(a)(1), (a)(5), (d), (g); Notice of Suspension, 25 FCC Rcd at 3520.

[12] Any further reference in this letter to "your conviction" refers to your guilty plea and subsequent sentencing for conspiracy to defraud the United States. *United States* v. *Jay H. Soled*, Criminal Docket No. 1:08–cr–00464–2, Plea Agreement (N.D. Ill. filed Feb. 4, 2010 and entered Mar. 15, 2010) ("*Soled Judgment*"); *United States* v. *Jay H. Soled*, Criminal Docket No. 1:08–cr–00464–2, Plea Agreement (N.D. Ill. filed July 10, 2008 and entered July 14, 2008) ("Soled Plea"); *United States* v. *Benjamin Rowner and Jay H. Soled*, Criminal Docket No. 1:08–cr–20047–01–02 CM/JPO, Information (D. Kan. filed and entered Apr. 23, 2008) ("*Rowner and Soled Information*").

[13] 47 CFR 54.8; *see also* 47 CFR 0.111 (delegating to the Enforcement Bureau authority to resolve universal service suspension and debarment proceedings). The Commission adopted debarment rules for the schools and libraries universal service support mechanism in 2003. *See Schools and Libraries Universal Service Support Mechanism*, Second Report and Order and Further Notice of Proposed Rulemaking, 18 FCC Rcd 9202 (2003) ("*Second Report and Order*") (adopting section 54.521 of the Commission's rules to suspend and debar parties from the E-Rate program). In 2007, the Commission extended the debarment rules to apply to all of the Federal universal service support mechanisms. *Comprehensive Review of the Universal Service Fund Management, Administration, and Oversight; Federal-State Joint Board on Universal Service; Schools and Libraries Universal Service Support Mechanism; Lifeline and Link Up; Changes to the Board of Directors for the National Exchange Carrier Association, Inc.*, Report and Order, 22 FCC Rcd 16372, 16410–12 (2007) (*Program Management Order*) (renumbering section 54.521 of the universal service debarment rules as section 54.8 and amending subsections (a)(1), (5), (c), (d), (e)(2)(i), (3), (e)(4), and (g)).

circumstances.[28] The Bureau will decide any request for reversal or modification of suspension within 90 days of its receipt of such request.[29]

II. Initiation of Debarment Proceedings

Your guilty plea and conviction of criminal conduct in connection with the E-Rate program, in addition to serving as a basis for immediate suspension from the program, also serves as a basis for the initiation of debarment proceedings against you. Your conviction falls within the categories of causes for debarment defined in section 54.8(c) of the Commission's rules.[30] Therefore, pursuant to section 54.8 of the Commission's rules, your conviction requires the Bureau to commence debarment proceedings against you.[31]

As with your suspension, you may contest debarment or the scope of the proposed debarment by filing arguments and any relevant documentation within 30 calendar days of the earlier of the receipt of this letter or of publication in the **Federal Register.**[32] Absent extraordinary circumstances, the Bureau will debar you.[33] The Bureau will decide any request for reversal or limitation of debarment within 90 days of receipt of such request.[34] If the Bureau decides to debar you, its decision will become effective upon the earlier of your receipt of a debarment notice or publication of the decision in the **Federal Register.**[35]

If and when your debarment becomes effective, you will be prohibited from participating in activities associated with or related to the schools and libraries support mechanism for three years from the date of debarment.[36] The Bureau may, if necessary to protect the public interest, extend the debarment period.[37]

Please direct any response, if by messenger or hand delivery, to Marlene H. Dortch, Secretary, Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554, to the attention of Rebekah Bina, Attorney Advisor, Investigations and Hearings Division, Enforcement Bureau, Room 4–C330, with a copy to Michele Levy Berlove, Acting Assistant Chief, Investigations and Hearings Division, Enforcement Bureau, Room 4–C330, Federal Communications Commission. If sent by commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail), the response should be sent to the Federal Communications Commission, 9300 East Hampton Drive, Capitol Heights, Maryland 20743. If sent by first-class, Express, or Priority mail, the response should be sent to Rebekah Bina, Attorney Advisor, Investigations and Hearings Division, Enforcement Bureau, Federal Communications Commission, 445 12th Street, SW., Room 4–C330, Washington, DC 20554, with a copy to Michele Levy Berlove, Acting Assistant Chief, Investigations and Hearings Division, Enforcement Bureau, Federal Communications Commission, 445 12th Street, SW., Room 4–C330, Washington, DC 20554. You shall also transmit a copy of the response via e-mail *to Rebekah.Bina@fcc.gov* and to *Michele.Berlove@fcc.gov*.

If you have any questions, please contact Ms. Bina via mail, by telephone at (202) 418–7931 or by e-mail at *Rebekah.Bina@fcc.gov*. If Ms. Bina is unavailable, you may contact Ms. Michele Levy Berlove, Acting Assistant Chief, Investigations and Hearings Division, by telephone at (202) 418–1477 and by e-mail at *Michele.Berlove@fcc.gov*.

FEDERAL COMMUNICATIONS COMMISSION

[CG Docket No. 10–51; FCC 10–88]

Structure and Practices of the Video Relay Service Program

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Commission reiterates that Interstate Telecommunications Relay Service (TRS) Fund (Fund) payments may be suspended to providers that do not submit to audits. The Commission is authorized to do so pursuant to its rules intended to protect the integrity of the Fund and to deter and detect waste, fraud, and abuse. The Commission and the Fund administrator have conducted some audits, but not all providers have submitted to the auditing process.

DATES: Effective July 13, 2010.

FOR FURTHER INFORMATION CONTACT: Gregory Hlibok, Consumer and Governmental Affairs Bureau at (202)

559–5158 (VP), or e-mail: *Gregory.Hlibok@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Structure and Practices of the Video Relay Service Program,* Declaratory Ruling, document FCC 10–88, adopted May 24, 2010, and released May 27, 2010, in CG Docket No. 10–51. Simultaneously with the Declaratory Ruling, the Commission also issued an Order and Notice and Proposed Rulemaking in CG Docket No. 10–51.

The full text of document FCC 10–88 and copies of any subsequently filed documents in this matter will be available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554. Document FCC 10–88 can also be downloaded in Word or Portable Document Format (PDF) at: *http://www.fcc.gov/cgb/dro/trs.html#orders.*

Synopsis

The TRS mandatory minimum standards expressly provide that the "Commission shall have the authority to audit providers and have access to all data, including carrier specific data, collected by the Fund administrator." The Commission's rules also state that the "[F]und administrator shall have authority to audit TRS providers reporting data to the administrator." Further, the rules state that "the administrator shall establish procedures to verify payment claims, and may suspend or delay payments to a TRS provider if the TRS provider fails to provide adequate verification of payment upon reasonable request, or if directed by the Commission to do so." Finally, the rules state that the "Fund administrator shall make payments only to eligible TRS providers operating pursuant to the mandatory minimum standards as required in § 64.604 [of the Commission's rules]." These rules are intended to protect the integrity of the Fund and to deter and detect waste, fraud, and abuse.

The Commission and the TRS Fund administrator have conducted some audits, but not all providers have submitted to the auditing process. Therefore, the Commission reminds providers that the above-cited rules, which provide for the suspension or delay of payments to TRS providers who do not provide verification of payment upon reasonable request, authorize the Commission to withhold payment from providers who do not submit to audits, whether requested by the Commission or the Fund administrator.

Congressional Review Act

The Commission will send a copy of document FCC 10–88 in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Ordering Clauses

Pursuant to sections 1, 4(i) and (o), 225, 303(r), 403, 624(g), and 706 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i) and (o), 225, 303(r), 403, 554(g), and 606, document FCC 10–88 is adopted.

The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of document FCC 10–88 to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than July 28, 2010.

A. Federal Reserve Bank of Richmond (A. Linwood Gill, III, Vice President) 701 East Byrd Street, Richmond, Virginia 23261–4528:

1. First Exchange Bank 401(k) Employee Stock Ownership Plan, individually and as a member of a group consisting of William Goetell, Fairmont, West Virginia, and Jennifer Price, Morgantown, West Virginia, acting in concert, to retain control of Heritage Bancshares, Inc., and thereby indirectly retain control of First Exchange Bank, both of Mannington, West Virginia.

Board of Governors of the Federal Reserve System, July 8, 2010.

Robert deV. Frierson,

Deputy Secretary of the Board.

[FR Doc. 2010–16980 Filed 7–12–10; 8:45 am]

BILLING CODE 6210–01–S

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at *www.ffiec.gov/nic/.*

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 6, 2010.

A. Federal Reserve Bank of Dallas (E. Ann Worthy, Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. Industry Bancshares, Inc., Industry Texas; to acquire 100 percent of the voting shares of The First National Bank of Shiner, Shiner, Texas.

2. A.N.B. Holding Company, Ltd., Terrell, Texas; to acquire up to 32 percent of the voting shares of The ANB Corporation, Terrell, Texas, and thereby indirectly acquire voting shares of The American National Bank of Texas, Terrell, Texas; Lakeside Bancshares, Inc., and Lakeside National Bank, both of Rockwall, Texas.

Board of Governors of the Federal Reserve System, July 8, 2010.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–10–0234]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed project or to obtain a copy of data collection plans and instruments, call the CDC Reports Clearance Officer on 404–639–5960 or send comments to CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS D–74, Atlanta, GA 30333 or send an e-mail to *omb@cdc.gov.*

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

National Ambulatory Medical Care Survey (NAMCS), (OMB No. 0920–0234 exp. 7/31/2012)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the utilization of health care provided by nonfederal office-based physicians in the United States.

On February 26, 2010, the Office of Management and Budget (OMB) approved data collection for three years. This revision is to notify the public that the President's fiscal year 2011 budget requests that Congress consider a budget increase for this survey for 2011. If the budget increase is approved by Congress, expanded data collection will begin in the first calendar quarter of 2011 or as soon thereafter as is possible. An increased sample size of approximately 6,800 physicians and 60,000 visit records (a doubling from 3,400 physicians and 30,000 visit records sampled in 2010) is requested. Currently the NAMCS produces national and regional estimates. If the full budget increase is approved by Congress, the survey will be able to produce the same estimates as it does currently as well as data on a limited number of states when data are combined across two years. This increase will greatly improve the ability to track providers' practice patterns, including their adoption and meaningful use of health information technology (HIT).

Congress may approve all, some or none of the budget increase requested in the President's budget. If approved, this notice would allow the proposed request for a sample increase to move forward to OMB for final review in sufficient time to implement the sample increase in the first quarter of 2011. This notice also covers increases in sample size that might result due to other budget allocations.

NAMCS was conducted annually from 1973 to 1981, again in 1985, and resumed as an annual survey in 1989. The purpose of NAMCS, a voluntary survey, is to meet the needs and demands for statistical information about the provision of ambulatory medical care services in the United States. Ambulatory services are rendered in a wide variety of settings, including physicians' offices and hospital outpatient and emergency departments. The NAMCS target universe consists of all office visits made by ambulatory patients to non-Federal office-based physicians (excluding those in the specialties of anesthesiology, radiology, and pathology) who are engaged in direct patient care. In 2006, physicians and mid-level providers (*i.e.,* nurse practitioners, physician assistants, and nurse midwives) practicing in community health centers (CHCs) were added to the NAMCS sample, and these data will continue to be collected. To complement NAMCS data, NCHS initiated the National Hospital Ambulatory Medical Care Survey (NHAMCS, OMB No. 0920–0278) in 1992 to provide data concerning patient visits to hospital outpatient and emergency departments. NAMCS and NHAMCS are the principal sources of data on ambulatory care provided in the United States. A three-year clearance is requested.

There is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN TABLE

Form	Number of respondents	Number of responses per respondent	Avg. burden per response (in hrs)	Total burden hours
Induction Interview-Physicians/CHC Providers	7,112	1	28/60	3,319
Patient Record Form	2,797	30	8/60	11,188
EMR Mail Survey	10,302	1	20/60	3,434
CHC Induction Interview-Facility	208	1	20/60	69

ESTIMATED ANNUALIZED BURDEN TABLE—Continued

Form	Number of respondents	Number of responses per respondent	Avg. burden per response (in hrs)	Total burden hours

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0307]

Agency Information Collection Activities; Proposed Collection; Comment Request; "Antiparasitic Drug Survey"

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on FDA's "Antiparasitic Drug Survey."

DATES: Submit either electronic or written comments on the collection of information by September 13, 2010.

ADDRESSES: Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Denver Presley Jr., Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, 301–796–3793.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

"Antiparasitic Drug Survey" (OMB Control Number 0910–NEW)

Resistance of parasites to one or more of the major classes of FDA approved antiparasitic drugs is a documented problem in cattle, horses, sheep, and goats in the United States. Further, FDA is aware that there are differing scientific opinions on the impact of the use of multiple antiparasitic drugs at the same time on the development of resistance to these drugs. The results from this survey will assist FDA in regulating antiparasitic drugs. FDA will also share their results with the veterinary parasitology community.

FDA plans to survey scientists and veterinarians with expertise in veterinary parasitology using a web-based tool. The questions in the survey are designed to elicit expert opinions and clarify areas of agreement and disagreement within the veterinary parasitology community. The survey will query subjects on topics such as: (1) Concurrent use of multiple antiparasitic drug products, (2) recommended tests to detect and monitor for antiparasitic resistance, (3) characteristics of combination antiparasitic drug products that may either slow or enhance the selection for multi-drug resistant parasites, and (4) regulatory considerations regarding combination antiparasitic drugs.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN[1]

Portion of Study	No. of respondents	Annual Frequency per response	Total Annual Responses	Hours per Response	Total Hours
Pre-test	5	1	5	.33	1.65
Survey	100	1	100	.33	.33
Total					34.65

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA will conduct a pre-test of the survey with five respondents, and it is estimated that it will take a respondent 20 minutes (0.33 hours) to complete the pre-test, for a total of 1.65 hours. One hundred respondents will complete the survey. It is estimated that it will take a respondent 20 minutes (0.33 hours) to complete the survey, for a total of 33 hours. Thus, the total estimated annual reporting burden is 34.65 hours. FDA's burden estimate is based on prior experience with consumer surveys that are similar.

Dated: July 7, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0337]

Agency Information Collection Activities; Proposed Collection; Comment Request; Guidance for Industry on Special Protocol Assessment

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection in the guidance for industry on special protocol assessment.

DATES: Submit either electronic or written comments on the collection of information by September 13, 2010.

ADDRESSES: Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Elizabeth Berbakos, Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, 301–796–3792, e-mail: *Elizabeth.Berbakos@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Guidance for Industry on Special Protocol Assessment (OMB Control Number 0910–0470)—Extension

The "Guidance for Industry on Special Protocol Assessment" describes agency procedures to evaluate issues related to the adequacy (e.g., design, conduct, analysis) of certain proposed studies. The guidance describes procedures for sponsors to request special protocol assessment and for the agency to act on such requests. The guidance provides information on how the agency interprets and applies provisions of the Food and Drug Administration Modernization Act of 1997 and the specific Prescription Drug User Fee Act of 1992 (PDUFA) goals for special protocol assessment associated with the development and review of PDUFA products. The guidance describes two collections of information: (1) The submission of a notice of intent to request special protocol assessment of a carcinogenicity protocol, and (2) the submission of a request for special protocol assessment.

Notification of a Carcinogenicity Protocol

As described in the guidance, a sponsor interested in agency assessment of a carcinogenicity protocol should notify the appropriate division in FDA's Center for Drug Evaluation and Research (CDER) or the Center for Biologics Evaluation and Research (CBER) of an intent to request special protocol assessment at least 30 days prior to submitting the request. With such notification, the sponsor should submit relevant background information so that the agency may review reference material related to carcinogenicity protocol design prior to receiving the carcinogenicity protocol.

Request for Special Protocol Assessment

The guidance asks that a request for special protocol assessment be submitted as an amendment to the investigational new drug application (IND) for the underlying product and that it be submitted to the agency in triplicate with Form FDA 1571 attached. The guidance also suggests that the sponsor submit the cover letter to a request for special protocol assessment via facsimile to the appropriate division in CDER or CBER. Agency regulations (21 CFR 312.23(d)) state that information provided to the agency as part of an IND is to be submitted in triplicate and with the appropriate cover form, Form FDA 1571. An IND is submitted to FDA under existing regulations in part 312 (21 CFR part 312), which specifies the information that manufacturers must submit so that FDA may properly evaluate the safety and effectiveness of investigational drugs and biological products. The information collection requirements resulting from the preparation and submission of an IND under part 312 have been estimated by FDA and the reporting and recordkeeping burden has been approved by OMB under OMB Control Number 0910–0014.

FDA suggests that the cover letter to the request for special protocol assessment be submitted via facsimile to the appropriate division in CDER or CBER to enable agency staff to prepare for the arrival of the protocol for

assessment. The agency recommends that a request for special protocol assessment be submitted as an amendment to an IND for two reasons: (1) To ensure that each request is kept in the administrative file with the entire IND, and (2) to ensure that pertinent information about the request is entered into the appropriate tracking databases. Use of the information in the agency's tracking databases enables the appropriate agency official to monitor progress on the evaluation of the protocol and to ensure that appropriate steps will be taken in a timely manner.

The guidance recommends that the following information should be submitted to the appropriate Center with each request for special protocol assessment so that the Center may quickly and efficiently respond to the request:

- Questions to the agency concerning specific issues regarding the protocol; and
- All data, assumptions, and information needed to permit an adequate evaluation of the protocol, including: (1) The role of the study in the overall development of the drug; (2) information supporting the proposed trial, including power calculations, the choice of study endpoints, and other critical design features; (3) regulatory outcomes that could be supported by the results of the study; (4) final labeling that could be supported by the results of the study; and (5) for a stability protocol, product characterization and relevant manufacturing data.

Description of Respondents: A sponsor, applicant, or manufacturer of a drug or biologic product regulated by the agency under the act or section 351 of the Public Health Service Act (42 U.S.C. 262) who requests special protocol assessment.

Burden Estimate: Table 1 of this document provides an estimate of the annual reporting burden for requests for special protocol assessment.

Notifications for a Carcinogenicity Protocol

Based on data collected within CDER and CBER, including the number of notifications for carcinogenicity protocols and the number of carcinogenicity protocols submitted in fiscal year (FY) 2007, 2008, and 2009, CDER estimates that it will receive approximately 60 notifications of an intent to request special protocol assessment of a carcinogenicity protocol per year from approximately 28 sponsors. CBER estimates that it will receive approximately one notification of an intent to request special protocol assessment of a carcinogenicity protocol per year from approximately one sponsor. The hours per response, which is the estimated number of hours that a sponsor would spend preparing the notification and background information to be submitted in accordance with the guidance, is estimated to be approximately 8 hours.

Requests for Special Protocol Assessment

Based on data collected within CDER and CBER, including the number of requests for special protocol assessment submitted in FY 2007, 2008, and 2009, CDER estimates that it will receive approximately 372 requests for special protocol assessment per year from approximately 216 sponsors. CBER estimates that it will receive approximately 10 requests from approximately 10 sponsors. The hours per response is the estimated number of hours that a respondent would spend preparing the information to be submitted with a request for special protocol assessment, including the time it takes to gather and copy questions to be posed to the agency regarding the protocol and data, assumptions, and information needed to permit an adequate evaluation of the protocol. Based on the agency's experience with these submissions, FDA estimates approximately 15 hours on average would be needed per response.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN[1]

	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
Notification for Carcinogenicity Protocols	29	2.10	61	8	488
Requests for Special Protocol Assessment	226	1.69	382	15	5,730
Total					6,218

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: July 7, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection; Comment Request; Cancer Trials Support Unit (CTSU) Public Use Forms and Customer Satisfaction Surveys (NCI)

SUMMARY: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI), the National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection: Title: Cancer Trial Support Unit (CTSU). *Type of Information Collection Request:* Existing Collection in Use Without an OMB Number. *Need and Use of Information Collection:* CTSU collects annual surveys of customer satisfaction for clinical site staff using the CTSU Help Desk and the CTSU web site. An ongoing user satisfaction survey is in place for the Oncology Patient Enrollment Network (OPEN). User satisfaction surveys are compiled as part of the project quality assurance activities and are used to direct improvements to processes and technology. In addition, the CTSU collects standardized forms to process site regulatory information, changes to membership, patient enrollment data, and routing information for case report forms. This questionnaire adheres to The Public Health Service Act, Section 413 (42 U.S.C. 285a–2) authorizes CTEP to establish and support programs to facilitate the participation of qualified investigators on CTEP-supported

studies, and to institute programs that minimize redundancy among grant and contract holders, thereby reducing overall cost of maintaining a robust treatment trials program.

Frequency of Response: The help desk and web site survey are collected annually. The OPEN survey is ongoing. Submission of forms varies depending on the purpose of the form and the activity of the local site.

Affected Public: CTSU's target audience is staff members at clinical sites and CTEP-supported programs. Respondent and burden estimates are listed in the Table below. The annualized burden is estimated to be 27,861 hours and the annualized cost to respondents is estimated to be $757,828. There are no Capital Costs, Operating Costs, and/or Maintenance Costs to report.

Request for Comments: Written comments and/or suggestions from the public and affected agencies should address one or more of the following points: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Michael Montello, Pharm. D., CTEP, 6130 Executive Blvd., Rockville, MD 20852. At non-toll-free number 301–435–9206 or e-mail your request, including your address to: *montellom@mail.nih.gov*.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

Dated: July 7, 2010.

Vivian Horovitch-Kelley,

NCI Project Clearance Liaison, National Institutes of Health.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0344]

Agency Information Collection Activities; Proposed Collection; Comment Request; Testing Communications on Medical Devices and Radiation-Emitting Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on communication studies involving medical devices and radiation-emitting products regulated by FDA. This information will be used to explore concepts of interest and assist in the development and modification of communication messages and campaigns to fulfill the agency's mission to protect the public health.

DATES: Submit either electronic or written comments on the collection of information by September 13, 2010.

ADDRESSES: Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Daniel Gittleson, Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, 301–796–5156, *Daniel.Gittleson@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Testing Communications on Medical Devices and Radiation-Emitting Products—(OMB Control Number 0910–New)

FDA is authorized by section 1003(d)(2)(D) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 393(d)(2)(D)) to conduct educational and public information programs relating to the safety of regulated medical devices and radiation-emitting products. FDA must conduct needed research to ensure that such programs have the highest likelihood of being effective. Improving communications about medical devices and radiation-emitting products will involve many research methods, including individual indepth interviews, mall-intercept interviews, focus groups, self-administered surveys, gatekeeper reviews, and omnibus telephone surveys.

The information collected will serve three major purposes. First, as formative research it will provide critical knowledge needed about target audiences to develop messages and campaigns about medical device and radiation-emitting product use. Knowledge of consumer and health care professional decisionmaking processes will provide the better understanding of target audiences that FDA needs to design effective communication strategies, messages, and labels. These communications will aim to improve public understanding of the risks and benefits of using medical devices and radiation-emitting products by providing users with a better context in which to place risk information more completely.

Second, as initial testing, it will allow FDA to assess the potential effectiveness of messages and materials in reaching and successfully communicating with their intended audiences. Testing messages with a sample of the target audience will allow FDA to refine messages while still in the developmental stage. Respondents will be asked to give their reaction to the messages in either individual or group settings.

Third, as evaluative research, it will allow FDA to ascertain the effectiveness of the messages and the distribution method of these messages in achieving the objectives of the message campaign. Evaluation of campaigns is a vital link in continuous improvement of communications at FDA.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN

Section of the act	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours	Total Operating & Maintenance Costs[1]
1003(d)(2)(D)	16,448	1	16,448	0.1739	2,860	$25,239
Total	16,448	1	16,448	0.1739	2,860	$25,239

[1] There are no capital costs associated with this collection of information.

Annually, FDA projects about 30 studies using a variety of research methods, and lasting an average of 0.17 hours each (varying from 0.08–1.5 hours). The operating and maintenance costs include contractor expenses for designing and conducting information collection activities, specifically, drawing samples, training interviewers, collecting and analyzing information, and reporting and disseminating findings. FDA estimates the burden of this collection of information based on prior recent experience with the various types of data collection methods described earlier. FDA is requesting this burden so as not to restrict the agency's ability to gather information on public sentiment for its proposals in its regulatory and communications programs.

Dated: July 7, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Modification to the Basic Center Program Funding Opportunity Announcement

Program Office: Administration on Children, Youth, & Families—Family & Youth Services Bureau.

Funding Opportunity Title: Basic Center Program.

Announcement Type: Modification.

Funding Opportunity Number: HHS–2010–ACF–ACYF–CY–0002.

CFDA Number: 93.623.

Due Date for Applications: 07/19/2010.

This is a Modification to the Basic Center Program Funding Opportunity Announcement (FOA), HHS–2010–ACF–ACYF–CY–0002, published to the ACF Grant Opportunities webpage on June 2, 2010, *http://www.acf.hhs.gov/grants/open/foa/view/HHS-2010-ACF-ACYF-CY-0002.* A modified FOA that incorporates the following changes was published to the ACF Grant Opportunities webpage on June 25, 2010. The application procedures are hereby modified.

SUMMARY: The Family and Youth Services Bureau (FYSB) is accepting applications for the Basic Center Program (BCP), which is authorized by the Runaway and Homeless Youth Act to address Runaway and Homeless Youth (RHY) problems. BCPs provide an alternative for runaway and homeless youth who might otherwise end up with law enforcement or in the child welfare, mental health, or juvenile justice systems. Each BCP must provide runaway and homeless youth with a safe and appropriate shelter; individual, family, and group counseling, as appropriate; and aftercare.

The purpose of the modification is to correct information appearing in *Section IV.2 Content and Form of Application Submission* regarding application formatting and point deduction for noncompliance with FOA instructions.

Modification to the Published Announcement

Please delete the following under *Section IV.2. Content and Form of Application Submission:*

"Applicants that do not adhere to the prescribed format will have points deducted from the overall total after the grant review:

Program narrative (which includes Objective and Need for Assistance, Results and Benefits, Approach, Organizational Profile, Staff and Position Data, and Budget

Justification) is not double spaced: Deduction of 5 points.

Margins less than ½ inch: Deduction of 3 points.

Font is not at least 12-point size or Times New Roman: Deduction of 2 points."

Please replace the deleted language under *Section IV.2. Content and Form of Application Submission* with the following:

"Applications that do not adhere to the prescribed format will be converted to conform with the prescribed format. Should the conversion result in a document which exceeds 90 pages, all pages exceeding the 90-page limit will be removed and will not be considered in the reviewing process."

All information in this modification is accurate and replaces information specified in the June 2, 2010 Funding Opportunity Announcement. *Announcement Availability:* To access this Program Announcement please go to the ACF Grant Opportunities webpage at *http://www.acf.hhs.gov/grants/index.html* or to *http://www.Grants.gov.*

FOR FURTHER INFORMATION CONTACT: Victoria Marquez at 202–205–4866 and *Victoria.Marquez@acf.hhs.gov.*

Dated: July 1, 2010.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0274]

Oversight of Laboratory Developed Tests; Public Meeting; Change of Meeting Location

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing a change in location for the upcoming public meeting entitled "Oversight of Laboratory Developed Tests." A new address is given for those attending the public meeting.

DATES: The public meeting will be held on July 19 and 20, 2010, from 8 a.m. to 5 p.m. each day.

ADDRESES: The public meeting will be held at The Marriott Inn & Conference Center, University of Maryland University College, 3501 University Blvd. E, Hyattsville, MD 20783.

FOR FURTHER INFORMATION CONTACT: Katherine Serrano, Center for Devices and Radiological Health, Food and Drug Administration 10903 New Hampshire Ave., Bldg. 66., rm 5613, Silver Spring, MD 20993–0002, 301–796–6652, e-mail: *Katherine.serrano@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 17, 2010 (75 FR 34463), FDA published a notice announcing a public meeting that is intended to create a forum for interested stakeholders to discuss the agency's oversight of laboratory developed tests. FDA announced in the notice that it is seeking input and requesting comments on this topic. The June 17, 2010, notice invited individuals interested in presenting to register by July 12, 2010. Registration to present at the public meeting is closed. All others are welcome to attend on a first-come, first-served basis.

Because of greater than anticipated response for attending the public meeting, FDA is announcing in this notice a new location for the public meeting.

II. New Location for the Public Workshop

The new location will be The Marriott Inn & Conference Center, University of Maryland University College (see **ADDRESSES**). Directions and information on parking, accommodations, and transportation options can be found at: *http://www.marriott.com/hotels/travel/wasum-the-marriott-inn-and-conference-center-university-of-maryland-university-college/*.

Dated: July 7, 2010.

Nancy Stade,

Acting Associate Director for Regulations and Policy, Center for Devices and Radiological Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Office of the Director, National Institutes of Health; Notice of a Conference Call of the NIH Scientific Management Review Board

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a conference call meeting of the Scientific Management Review Board.

The NIH Reform Act of 2006 (Pub. L. 109–482) provides organizational authorities to HHS and NIH officials to: (1) Establish or abolish national research institutes; (2) reorganize the offices within the Office of the Director, NIH including adding, removing, or transferring the functions of such offices or establishing or terminating such offices; and (3) reorganize, divisions, centers, or other administrative units within an NIH national research institute or national center including adding, removing, or transferring the functions of such units, or establishing or terminating such units. The purpose of the Scientific Management Review Board (also referred to as SMRB or Board) is to advise appropriate HHS and NIH officials on the use of these organizational authorities and identify the reasons underlying the recommendations.

Name of Committee: Scientific Management Review Board.

Date: July 26, 2010.

Time: 10:30 a.m. to 12 p.m. (EST)

Agenda: Presentation will include an overview and discussion of a new charge to the SMRB, which entails considering the attributes and functions of a translational medicine program optimized to accelerate therapeutics development. Time will be allotted on the agenda for public comment. To sign up for public comment, please submit your name and affiliation to the contact person listed below by July 25, 2010. Sign up will be restricted to one sign up per email. In the event that time does not allow for all those interested to present oral comments, anyone may file written comments using the contact person address below.

Dial-In Information: The toll-free number to participate in this call is 1–800–779–1545. Indicate to the conference operator that your participant pass code is "NIH".

Contact Person: Dr. Lyric Jorgenson, Office of Science Policy, Office of the Director, NIH, National Institutes of Health, 6705 Rockledge Drive, Suite 750, Bethesda, MD 20892, (301) 496–6837, *smrb@mail.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

The draft agenda, meeting materials, dial-in information, and other information about the SMRB, will be available at *http://smrb.od.nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2010–0042]

Homeland Security Science and Technology Advisory Committee

AGENCY: Science and Technology Directorate, DHS.

ACTION: Committee Management; Notice of Partially Closed Federal Advisory Committee Meeting.

SUMMARY: The Homeland Security Science and Technology Advisory Committee (HSSTAC) will meet July 20–21, 2010 at 4075 Wilson Blvd., Liberty Conference Center, 3rd Floor in Arlington, VA 22203. This meeting will be partially closed to the public.

DATES: The Homeland Security Science and Technology Advisory Committee meeting will be open to the public on July 20th from 8:30 a.m.–9 a.m. and on July 21st from 9 a.m.–10:30 a.m. All other times, the meeting will be closed.

ADDRESSES: The meeting will be held at 4075 Wilson Blvd., Liberty Conference Center, 3rd Floor in Arlington, VA 22203. Comments on this meeting must be identified by DHS–2010–0042 and may be submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *E-mail: HSSTAC@dhs.gov.* Include the docket number in the subject line of the message.
- *Fax:* 202–254–6173.
- *Mail:* Ms. Tiwanda Burse, Science and Technology Directorate, Department of Homeland Security, 245 Murray Lane, Bldg. 410, Washington, DC 20528.

Instructions: All submissions received must include the words "Department of Homeland Security" and the docket number for this action. Comments received will be posted without alteration at www.regulations.gov, including any personal information provided.

Docket: For access to the docket to read background documents or comments received by the HSSTAC, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Ms. Tiwanda Burse, Science and Technology Directorate, Department of Homeland Security, 245 Murray Lane, Bldg. 410, Washington, DC 20528, 202–254–6877.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. App. (Pub. L. 92–463).

At this meeting, the Committee will receive sensitive and classified (Secret-level) briefings and presentations regarding Infrastructure Protection programs in Science & Technology and updates on homeland security sensitive Federally Funded Research and Development Centers (FFRDCs) projects.

Basis for Closure: In accordance with Section 10(d) of the Federal Advisory Committee Act, it has been determined that the aspects of the Homeland Security Science and Technology Advisory Committee meeting concerns sensitive Homeland Security information and classified matters within the meaning of 5 U.S.C. 552b(c)(1), (c)(7)(E) & (F) and (c)(9)(B) which, if prematurely disclosed, would significantly jeopardize national security, not be in the public interest, could reveal investigative techniques and procedures, and the information could be expected to be used to circumvent the law, thereby endangering the life or physical safety of law enforcement personnel and frustrate implementation of proposed agency actions. Specifically, the Committee intends to discuss the applicability of foreign infrastructure protection techniques, technologies, and countermeasures for implementation in the United States. Accordingly, this meeting will be partially closed to the public.

The Federal Advisory Committee Act requires that notices of meetings of advisory committees be announced in the **Federal Register** 15 days prior to the meeting date. The meeting notice is being published late due to unavoidable delays in finalizing the agenda because of the classified material which is to be considered by the committee.

Dated: July 7, 2010.

Tara O'Toole,

Under Secretary for Science and Technology.

[FR Doc. 2010–17032 Filed 7–12–10; 8:45 am]

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–0553]

Certificate of Alternative Compliance for the Offshore Supply Vessel MONICA W CALLAIS

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that a Certificate of Alternative Compliance was issued for the offshore supply vessel MONICA W CALLAIS as required by 33 U.S.C. 1605(c) and 33 CFR 81.18.

DATES: The Certificate of Alternate Compliance was issued on JUNE 8, 2010.

ADDRESSES: The docket for this notice is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2010–0553 in the "Keyword" box, and then clicking "Search."

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call LTJG Christine Dimitroff, District Eight, Prevention Branch, U.S. Coast Guard, telephone 504–671–2176. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background and Purpose

A Certificate of Alternative Compliance, as allowed for under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel MONICA W CALLAIS, O.N. 1226851. The horizontal distance between the forward and aft masthead lights may be 24′4″. Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck where it would interfere with loading and unloading operations.

The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the

requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: June 22, 2010.

By Direction of the Commander, Eighth Coast Guard District.

J.W. Johnson,

Commander, U.S. Coast Guard, Chief, Inspections & Investigations Branch.

[FR Doc. 2010–16958 Filed 7–12–10; 8:45 am]

BILLING CODE 9110–04–P

[Docket No. USCG–2010–0551]

Certificate of Alternative Compliance for the Offshore Supply Vessel CALLAIS SEARCHER

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that a Certificate of Alternative Compliance was issued for the offshore supply vessel CALLAIS SEARCHER as required by 33 U.S.C. 1605(c) and 33 CFR 81.18.

DATES: The Certificate of Alternate Compliance was issued on June 8, 2010.

ADDRESSES: The docket for this notice is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2010–0551 in the "Keyword" box, pressing Enter, and then clicking "Search."

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call LTJG Christine Dimitroff, District Eight, Prevention Branch, U.S. Coast Guard, telephone 504–671–2167. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background and Purpose

A Certificate of Alternative Compliance, as allowed for under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel CALLAIS SEARCHER, O.N. 1226876. The horizontal distance between the forward and aft masthead lights may be 20′-8⅝″. Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck where it would interfere with loading and unloading operations. The offset from centerline of the RAM/NUC lights may be 3′. Offsetting the RAM/NUC lights 2 meters from the centerline as required by Annex I paragraph 3(c) the 72 COLREGS and Annex I, Section 84.05(c) of the Inland rules Act would place them in an exposed position beyond the width of the aft end of the pilothouse.

A Certificate of Alternative Compliance, as allowed for under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel CALLAIS SEARCHER, O.N. 1226876. The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act as well as the offset of the RAM/NUC lights to deviate from the requirements of Annex I, paragraph 3(c) of 72 COLREGS and Annex I, Section 84.05(c) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: June 22, 2010.

J.W. Johnson

Commander, U.S. Coast Guard, Chief, Inspections & Investigations Branch, By Direction of the Commander, Eighth Coast Guard District.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–0554]

Certificate of Alternative Compliance for the Offshore Supply Vessel MARIE ELISE

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that a Certificate of Alternative Compliance was issued for the offshore supply vessel MARIE ELISE as required by 33 U.S.C. 1605(c) and 33 CFR 81.18.

DATES: The Certificate of Alternate Compliance was issued on June 8, 2010.

ADDRESSES: The docket for this notice is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2010–0554 in the "Keyword" box, and then clicking "Search."

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call LTJG Christine Dimitroff, District Eight, Prevention Branch, U.S. Coast Guard, telephone 504–671–2176. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background and Purpose

A Certificate of Alternative Compliance, as allowed for under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel *MARIE ELISE,* O.N. 1223872. Full compliance with 72 COLREGS and the Inland Rules Act would hinder the vessel's ability to conduct loading and unloading operations, and would hinder the vessel's ability to maneuver within close proximity to offshore platforms. Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the aft cargo deck where it would interfere with loading and unloading operations and would make the mast highly susceptible to damage during such operations. The horizontal distance between the forward and aft masthead lights may be 19′11⅜″, placing the aft masthead light over the pilot house.

In addition, due to the design of the vessel it would be difficult and impractical to build a supporting structure that would put the side lights within 10% inboard from the greatest breadth of the vessel, as required by Annex I, paragraph 3(b) of the 72 COLREGS and Annex I, Section 84.05(b), of the Inland Rules Act. Compliance with the rule would cause the side lights to be in a location which will be highly susceptible to damage from offshore platforms. Locating the side lights 7′¼″ inboard from the greatest breadth of the vessel on the pilot house will provide a sheltered

location for the lights and allow maneuvering within close proximity to offshore platforms.

The Certificate of Alternative Compliance allows for the placement of the side lights to deviate from requirements set forth in Annex I, paragraph 3(b) of 72 COLREGS, and Annex I, paragraph 84.05(b) of the Inland Rules Act. In addition the Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: 22 June 2010.

J.W. Johnson,

Commander, U.S. Coast Guard, Chief, Inspections & Investigations Branch, By Direction of the Commander, Eighth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–0555]

Certificate of Alternative Compliance for the Offshore Supply Vessel/Well Stimulation Vessel BLUE TARPON

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that a Certificate of Alternative Compliance was issued for the offshore supply vessel BLUE TARPON as required by 33 U.S.C. 1605(c) and 33 CFR 81.18.

DATES: The Certificate of Alternate Compliance was issued on June 8, 2010.

ADDRESSES: The docket for this notice is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2010–0555 in the "Keyword" box, and then clicking "Search."

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call LTJG Christine Dimitroff, District Eight, Prevention Branch, U.S. Coast Guard, telephone 504–671–2176. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background and Purpose

A Certificate of Alternative Compliance, as allowed under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel BLUE TARPON, O.N. 1226288. The horizontal distance between the forward and aft masthead lights may be 21′10″. Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck where it would interfere with loading and unloading operations.

The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: June 22, 2010.

J.W. Johnson,

Commander, U.S. Coast Guard, Chief, Inspection & Investigations Branch, By Direction of the Commander, Eighth Coast Guard District.

[CIS No. 2491–10; DHS Docket No. USCIS–2010–0002]

RIN 1615–ZA96

Extension of the Initial Registration Period for Haitians Under the Temporary Protected Status Program

AGENCY: U.S. Citizenship and Immigration Services, DHS.

ACTION: Notice.

SUMMARY: On January 21, 2010, the Secretary of the Department of Homeland Security designated Haiti under the Temporary Protected Status (TPS) program for a period of 18 months. DHS established a 180-day registration period (from January 21, 2010, through July 20, 2010). This notice extends the registration period through January 18, 2011. This extension is necessary to provide applicants more time to register for TPS.

DATES: DHS designated Haiti for TPS on January 21, 2010. The registration period that was to expire on July 20, 2010, will be extended for 180 days, with a new filing deadline of January 18, 2011.

FURTHER INFORMATION:

- For further information on TPS, including guidance on the application process and additional information on eligibility, please visit the USCIS Web Site at *http://www.uscis.gov.* Select "Temporary Protected Status" from the homepage under "Humanitarian" benefits. You can find detailed information about Haitian TPS registration on our Web Site at the Haitian Questions & Answers Section under TPS.
- You can also contact the TPS Operations Program Manager, Status and Family Branch, Service Center Operations Directorate, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue, NW., Washington, DC 20529–2060, telephone (202) 272–1533. This is not a toll-free call. Note: The phone number provided here is solely for questions regarding this TPS notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online available at the USCIS Web Site (*http://www.uscis.gov*), or call the USCIS National Customer Service Center at 1–800–375–5283 (TTY 1–800–767–1833).

SUPPLEMENTARY INFORMATION:

When did the Secretary designate Haiti under the TPS program?

On January 21, 2010, the Secretary of Homeland Security (Secretary) designated Haiti under the Temporary Protected Status (TPS) program for a period of 18 months. *See* 75 FR 3476 (January 21, 2010).

What is the Secretary's authority to extend the registration period?

The Immigration and Nationality Act (INA) authorizes the Secretary to provide TPS applicants with a registration period of "not less than 180 days" and requires applicants to register to the extent and in a manner which the Secretary establishes. *See* INA sec. 244(c)(1)(A)(iv), 8 U.S.C. 1254a(c)(1)(A)(iv). DHS initially set the registration period for Haiti for 180 days, from January 21, 2010, through July 20, 2010. The Secretary is extending the registration period for an

additional 180 days, through January 18, 2011.

Why is the Secretary extending the registration period?

The Secretary is extending the registration period to provide additional time to register for TPS. The Secretary has been advised that eligible individuals have not yet applied for several reasons; among them is that, due to the devastation in Haiti, Haitian nationals are having difficulty obtaining documents that establish their nationality and identity and are relevant to the TPS application process. It also takes time for many eligible individuals to gather together the funds needed to apply for TPS or, in the alternative, to learn fully the guidelines and procedures for fee waivers. This extended registration period will allow further time needed for eligible individuals to prepare their applications in light of these circumstances.

What documents do I need to submit with my TPS application?

All TPS applicants must file Form I–821, Application for Temporary Protected Status, and Form I–765, Application for Employment Authorization, regardless of whether they are seeking employment authorization. All TPS applicants must also submit evidence of their Haitian nationality. Applicants who have no nationality, but whose last habitual residence was in Haiti, must submit evidence of such residence in Haiti. Lastly, all TPS applicants must submit evidence of their continuous residence in the United States since January 12, 2010, and continuous physical presence in the United States since January 21, 2010. A discussion of the required fees, supporting documents, and qualifying dates, is found in the **Federal Register** Notice announcing the designation of Haiti for TPS. *See* 75 FR 3476 (January 21, 2010).

When is my TPS application due?

All applications must be received by USCIS on or before January 18, 2011. To be considered properly filed, your application, along with the appropriate fee or a fee waiver request, must be received at the address listed in the **Federal Register** Notice announcing the designation of Haiti for TPS. *See* 75 FR 3476 (January 21, 2010).

What happens to an application that is submitted without the proper fee or the fee waiver request is denied?

Applications submitted without the proper fee will be rejected and returned to the applicants. USCIS will also reject and return any application where it has denied a fee waiver request. The fee waiver denial notice will contain specific instructions about resubmitting your application.

If my TPS application was rejected because my fee waiver request was denied, how long do I have to re-apply?

If USCIS rejected your TPS application because your fee waiver request was denied (including those instructed to re-file within 45 days), you may re-file your application with the required fees or a new fee waiver request at any time so long as it is received no later than the January 18, 2011 deadline.

In addition, if your TPS application package is received on or before January 18, 2011, and your fee waiver request is denied on or after December 3, 2010, you will be given 45 days from the date of the denial to re-file your application package with the required fee or a new fee waiver request. In that case, your application package will be considered timely filed provided the application package is received within 45 days of the date of the fee waiver denial notice. If your resubmitted TPS application package is received after January 18, 2011, and contains a new fee waiver request that is denied, your application will be rejected and you will be ineligible to register for TPS due to the expiration of the registration period.

The 45-day accommodation ensures that applicants who request a fee waiver during the period immediately before the application period closes, but whose fee waiver requests are denied, will have opportunity to amend their fee waiver requests or submit the required fees. Additionally, the 45-day accommodation is consistent with the applicable regulations, which state that a TPS application shall be filed during the registration period established by the Secretary of Homeland Security. *See* 8 CFR 244.7(b). The TPS registration period is prescribed by notice in the **Federal Register**, and this notice serves to extend the registration period.

If my TPS application was rejected due to incomplete information, can I re-apply during the registration extension?

Yes. If your application was rejected due to incomplete information, you may re-file your completed application, addressing all of the deficiencies cited in the rejection notice, and include the proper fees or fee waiver request by January 18, 2011. Please note that a rejected application is different from a TPS application that has been denied on the merits where USCIS has informed the applicant that he or she is not eligible for TPS. If your TPS application was denied, you may seek review of that decision as described in the USCIS denial notice.

Janet Napolitano,

Secretary.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–1920–DR; Docket ID FEMA–2010–0002]

Maine; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Maine (FEMA–1920–DR), dated July 1, 2010, and related determinations.

DATES: *Effective Date:* July 1, 2010.

FOR FURTHER INFORMATION CONTACT: Peggy Miller, Recovery Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3886.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated July 1, 2010, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act"), as follows:

I have determined that the damage in certain areas of the State of Maine resulting from severe storms and flooding during the period of March 12 to April 1, 2010, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq. (the "Stafford Act"). Therefore, I declare that such a major disaster exists in the State of Maine.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved

assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, James N. Russo, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Maine have been designated as adversely affected by this major disaster:

Hancock and York Counties for Public Assistance.

All counties within the State of Maine are eligible to apply for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Alcoholic Beverage Control Ordinance, Salt River Pima-Maricopa Indian Community (SRPMIC)

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the Secretary's certification of the amendment to the Salt River Alcoholic Beverage Control Ordinance, Chapter 14, Articles I, II, and III of the Salt River Pima-Maricopa Indian Community's Code of Ordinances. An amended Chapter 14 of the Code of Ordinance was last published on April 1, 2009 (Vol. 74, No. 61, FR 14813). This amendment repeals Articles I and II of Chapter 14 of the Salt River Pima-Maricopa Indian Community Code of Ordinances in its entirety and adopts revised Articles, I, II and III to update and provide necessary clarifications to the regulated possession, community and to incorporate the January 29, 2009, initiative vote of the people regarding the sale of alcoholic beverages at certain restaurants within the community.

DATES: *Effective Date:* This Code is effective as of August 12, 2010.

FOR FURTHER INFORMATION CONTACT: Sharlot Johnson, Tribal Government Services Officer, Western Regional Office, 2600 North Central Avenue, Phoenix, Arizona 85004–3050, Telephone (602) 379–6786; Fax (602) 379–4100; or Elizabeth Colliflower, Office of Tribal Services, 1849 C Street, NW., Mail Stop 4513–MIB, Washington, DC 20240; Telephone (202) 513–7641; Fax (202) 208–5113.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice* v. *Rehner,* 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted liquor ordinances for the purpose of regulating liquor transactions in Indian country. The Salt River Pima-Maricopa Indian Community Council adopted this amendment to the Salt River Pima-Maricopa Indian Community's Code of Ordinances, Chapter 14, Articles I, II, and III, by Ordinance No. SRO–355–2010 on December 9, 2009.

This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs. I certify that the Salt River Pima-Maricopa Indian Community Council duly adopted this amendment to the Alcoholic Beverage Control Ordinance No. SRO–355–2010 on December 9, 2009.

Dated: *July 2, 2010.*

Donald Laverdure,

Deputy Assistant Secretary—Indian Affairs.

The amendment to Salt River Pima-Maricopa Indian Community's Code of Ordinances, Chapter 14, Articles I, II, and III, reads as follows:

Salt River Pima-Maricopa Indian Community

Ordinance Number: SRO–355–2010.

To Repeal Articles I & II Of Chapter 14 of the Salt River Pima-Maricopa Indian Community Code of Ordinances in Its Entirety and Adopt Revised Articles I, II & III, To Update and Provide Necessary Clarifications to the Regulated Possession, Consumption and Sales of Alcoholic Beverages Within the Community and to Incorporate The January 29, 2009 Initiative Vote of the People Regarding the Sale of Alcoholic Beverages at Certain Restaurants Within the Community.

Be it enacted that:

Chapter 14, Articles I and II of the Salt River Pima-Maricopa Indian Community Code of Ordinances are repealed in their entirety and revised Articles I, II and III are hereby enacted; and Chapter 14, Articles III and IV are also hereby revised to read Articles IV and V (while retaining all text that is included in the existing Articles III and IV):

Article I. In General

Sec. 14–1. Sovereign Immunity.

Nothing in this Chapter 14 of the SRPMIC Code of Ordinances is intended to be or shall be construed as a waiver of the sovereign immunity of the Salt River Pima-Maricopa Indian Community.

Article II. Alcoholic Beverage Control

Sec. 14–2. Title; authority; purpose; etc.

(a) *Title.* This Article shall be known as the Salt River Pima-Maricopa Indian Community Alcoholic Beverage Control Ordinance.

(b) *Authority.* This Article is enacted pursuant to the Act of August 15, 1953 (Pub. L. 83–277, 67 Stat. 588, 18 U.S.C. Section 1161) and Article VII of the Salt River Pima-Maricopa Indian Community Constitution.

(c) *Purpose.* The purpose of this Article II and III is to regulate and control the Possession, consumption, and sale of liquor or Alcoholic Beverages within the boundary of the Community. The enactment of an ordinance governing liquor or Alcoholic Beverages Possession and sale on the reservation will increase the ability of the Community government to control Alcoholic Beverage sale, distribution, and Possession while at the same time providing an important source of revenue for the continued operation and strengthening of the Community government and its delivery of Community government services.

(d) *Application of 18 U.S.C. Section 1161.* All acts and transactions under this Article shall be in conformity with this Article and

in conformity with the laws of the State of Arizona, to the extent required by 18 U.S.C. Section 1161.

(e) *Effective date.* This Article shall be effective as a matter of Community law upon approval by the Community Council and effective as a matter of federal law when the Assistant Secretary of Indian Affairs certifies and publishes this Article in the **Federal Register**.

Sec. 14–3. Scope.

Chapter 14 of the Code of Ordinances of the Salt River Pima-Maricopa Indian Community constitutes the entire statutory law of the Community in regard to the sale, Possession and/or distribution of Alcoholic Beverages within the Community.

Sec. 14–4. Definitions.

Aggrieved Party means a Person, an Applicant, a Community Member or the Community.

Alcoholic Beverage means beer, wine or other spirituous liquor (including but not limited to brandy, whiskey, rum, tequila, mescal, gin, porter, ale, any malt liquor beverage, absinthe, a compound mixture of these or a compound mixture of these with any other substance which produces intoxication, fruits preserved in ardent spirits and beverages containing more than one-half of one percent of alcohol by volume).

Applicant means any partnership, corporation, limited liability company or Community enterprise as well as any natural Person that is or are requesting approval of a Community liquor License.

Broken Package means any container of spirituous liquor on which the United States tax seal has been broken or removed, or from which the cap, cork or seal placed thereupon by the manufacturer has been removed.

Community means the Salt River Pima-Maricopa Indian Community, a federally recognized Indian tribe.

Controlling Person means a Person directly or indirectly Possessing control of an Applicant or Licensee. Control is presumed to exist if a Person has the direct or indirect ownership of or power to vote ten percent (10%) or more of the outstanding voting securities of the Applicant, Licensee or Controlling Person or to control in any manner the election of one or more of the directors of the Applicant, Licensee or Controlling Person. In the case of a partnership, control is presumed to mean the general partner or a limited partner who holds ten percent (10%) or more of the voting rights of the partnership. For the purposes of determining the percentage of voting securities owned, controlled or held by a Person, there shall be aggregated with the voting securities attributed to the Person the voting securities of any other Person directly or indirectly controlling, controlled by or under common control with the other Person, or by an officer, partner, employee or agent of the Person or by a spouse, parent or child of the Person. Control is also presumed to exist if a creditor of the Applicant, Licensee or controlling person holds a beneficial interest in ten percent or more of the liabilities of the Licensee or Controlling Person.

Director means Director of the Community Regulatory Agency who is also the Director.

Gross Revenue means the revenue derived from all the sales of food and Alcoholic Beverages on the Licensed Premises, regardless of whether the sales of Alcoholic Beverages are made under a Restaurant License issued pursuant to this Article.

Hearing Officer means a person designated by the Community Manager to hear an appeal of a decision made by the Director.

License means a License issued pursuant to the provisions of this Article by the Community.

Licensed Premises or *Premises* means a place from which a Licensee is authorized to sell Alcoholic Beverages under the provisions of this Article.

Licensee means any partnership, corporation, limited liability company or Community enterprise, as well as any natural Person who has been authorized to sell Alcoholic Beverages for consumption at a particular Premises by the Community.

Minibar means a closed container, either refrigerated in whole or in part or non-refrigerated, where access to the interior is restricted by means of a locking device which requires the use of a key, magnetic card or similar device.

Office means the alcohol beverage control Office or Persons within the Community Regulatory Agency that regulate Alcoholic Beverage and/or liquor sales and distribution transactions within the Community as created in Section 14–5 of this Article.

Off-Sale Retailer means any Person operating a bona fide regularly established retail liquor store selling Alcoholic Beverages and any established retail store selling commodities other than Alcoholic Beverages that is engaged in the sale of Alcoholic Beverages only in the original unbroken package, to be taken away from the Premises of the retailer and to be consumed off the Premises.

On-Sale Retailer means any Person operating an establishment where spirituous liquors are sold in the original container for consumption on or off the Premises or in individual portions for consumption on the Premises.

Person means any partnership, corporation, limited liability company, or Community enterprise, as well as any natural Person.

Possess means to have any item or substance within the control of a Person or to have any Alcoholic Beverage within a Person's body, regardless of where the consumption may have taken place.

Public Patio Enclosure means a contiguous patio or a patio that is not contiguous to the remainder of the Licensed Premises if the noncontiguous patio is separated from the remainder of the Premises or Licensed Premises by a public or private walkway or driveway not to exceed 30 feet, subject to the rules that the Office may adopt to establish criteria for a noncontiguous Premises.

Private Residence means a place where an individual or a family maintains a habitation.

Public Place means any place that is not a Private Residence, including within operational motor vehicles or non-residential structures, and not Licensed, pursuant to this Article, for the Possession of Alcoholic Beverages.

Restaurant (excluding the provisions in this Article that govern casino or golf course Licenses) means an establishment that derives at least forty percent (40%) of its Gross Revenue from the sale of food, including sales of food for consumption off the Licensed Premises if the amount of these sales included in the calculation of Gross Revenue from the sale of food does not exceed fifteen percent (15%) of all Gross Revenue of the Restaurant.

Sec. 14–5. Office of Alcohol Beverage Control, Director

(a) *Office.* The Office of Alcohol Beverage Control ("Office") is hereby established within the Community's Community Regulatory Agency. The Director of the Community Regulatory Agency is hereby designated as the Alcohol Beverage Control Officer ("Director") who will be responsible to the Community Manager and whose duties may be delegated from time to time to other employees of the Office. All of the positions of the Office will be filled and conducted in accordance with the Community's established policies and procedures.

(b) *Authority of the Office.* The Office shall have the following authority:

1. To grant and deny applications in accordance with this Article;

2. Adopt rules and regulations to implement this Article;

3. Hold hearings and make determinations on whether to grant or deny Licenses;

4. Employ necessary personnel;

5. Maintain a public record open to the public containing the names and addresses of each Licensee and any Person who is a Controlling Person;

6. Liaison between the Office and the Salt River Police Department to ensure enforcement of Articles II and III of Chapter 14 and any relevant regulations issued pursuant to Chapter 14;

7. Investigate and enforce compliance of Articles II and III of Chapter 14 and any relevant regulations that also pertain to the selling of Alcoholic Beverages within the Community; and

8. Inspect, during the hours in which a Premises is occupied, the Premises of a Licensee.

(c) *Inspection of Premises, Enforcement and Investigations.* The Office shall receive complaints of alleged violations of Articles II and III and is also responsible for the investigation of allegations of, violations of, or non-compliance with, the selling of Alcoholic Beverages pursuant to Articles II and III or any relevant regulations issued pursuant to Chapter 14.

1. The Office shall establish a separate investigation unit which has as its responsibility the investigation of compliance within this Article.

2. A complete record of all applications, actions taken thereon, and any Licenses issued shall be maintained by the Office and shall be open for public inspection at the Office.

3. Office staff that are authorized to investigate pursuant to this Article shall have the authority to investigate and issue a notice

of a violation of noncompliance with Chapter 14.

4. The Office or the Salt River Police Department may cite a Licensee to appear before the Hearing Officer for a hearing upon allegations of violations of Articles II and III or any relevant regulations issued pursuant to Chapter 14.

5. The Office or the Director may take evidence, administer oaths or affirmations, issue subpoenas requiring attendance and testimony of witnesses, cause depositions to be taken and require by subpoena duces tecum for the production of books, papers and other documents which are necessary for the enforcement of Article II and III of this Chapter.

6. The Office, including the Director may, in enforcing the provisions of this Article, inspect the Premises.

Sec. 14–6. Lawful Commerce, Possession or Consumption.

(a) Alcoholic Beverages may be possessed and consumed only at Private Residences, and Licensed Premises pursuant to this Chapter 14, and may be transported in unbroken containers to such places.

(b) Wine may be purchased, stored, distributed, and consumed in connection with the bona fide practice of a religious belief or as an integral part of a religious exercise of an organized church and in a manner not dangerous to public health or safety.

(c) The purchase, storage and use of Alcoholic Beverages solely for the purpose of cooking or preparing food and in a manner not dangerous to public health and safety are authorized.

(d) Alcoholic Beverages may also be served and consumed at a Premises licensed pursuant to a Business Ancillary License if the following conditions have been met: (1) A business serves Alcoholic Beverages as part of a cooking demonstration or cooking class, or (2) is an accredited school offering degree programs in the culinary arts.

(e) Alcoholic Beverages may be sold at Licensed Premises only under the conditions under which the License is issued.

Sec. 14–7. Designated Area and Licenses

(a) *Designated area.* The Director may issue a License for Premises located within the designated area identified in the December 9, 2009 Approved SRPMIC Liquor Licensing Area Corridor (attached to this ordinance, and incorporated herein by reference).

(1) The December 9, 2009 Approved SRPMIC Liquor Licensing Area Corridor shall be kept with the official records of the Community in the Office of the Council Secretary.

(2) Upon majority vote by the Community Council and publication in the Community's newspaper, the Community Council may amend the December 9, 2009 Approved SRPMIC Liquor Licensing Area Corridor and any future amendments thereof.

(b) *Premises that may be Licensed.* Licenses may only be issued for Premises as listed and defined below.

(1) *Hotel-Motel License.*

a. The Director may issue a Hotel-Motel License to any hotel or motel that operates either a Restaurant or a bar in the hotel or motel, provided that the Applicant is otherwise qualified to hold a License.

b. The holder of a Hotel-Motel License is authorized to sell and serve Alcoholic Beverages solely for consumption on the Licensed Premises. For the purpose of this section "Licensed Premises" shall include all Minibars located within guest rooms accommodations, public bar rooms, outdoor patio enclosures, outdoor pool areas, public Restaurant rooms, facilities, areas, and private banquet or meeting rooms located within the hotel-motel Premises or connected to the hotel-motel Premises.

(2) *Casino License.*

a. The Director may issue a Casino License to any casino authorized to operate as a casino by the Community.

b. The holder of a Casino License is authorized to sell and serve Alcoholic Beverages solely for consumption on the Licensed Premises. For the purpose of this section, "Licensed Premises" shall include all public bar rooms, gaming areas, private banquet or meeting rooms, restaurants, other food service facilities, outdoor patio enclosures, and land contiguous to the casino facility.

(3) *Golf Course Clubhouse License.*

a. The Director may issue a Golf Course Clubhouse License to any golf course clubhouse.

b. The holder of a Golf Course Clubhouse License is authorized to sell and serve Alcoholic Beverages solely for consumption on the Licensed Premises and only to patrons of the golf course facility. For the purpose of this section, "Licensed Premises" shall include all restaurants and other food service facilities, private banquet or meeting rooms, bar rooms, outdoor patio enclosures, lounge facilities within the golf course clubhouse, and golf course enclosure. For purposes of this section a "golf course clubhouse" means a clubhouse located on a golf course. For purposes of this section a "golf course enclosure" means substantially undeveloped land, including amenities such as landscaping, irrigation systems, paths and golf greens and tees, that may be used for golfing or golfing practice by the public or by members and guests of a private club.

(4) *Restaurant License.*

a. The Director may issue a Restaurant License to any Restaurant that is regularly open for the serving of food to guests for compensation and that has suitable kitchen facilities connected with the Restaurant for keeping, cooking and preparing foods required for ordinary meals .

b. The Restaurant shall be regularly open for the serving of food to guests for compensation and is an establishment which derives at least forty percent (40%) of its Gross Revenue from the sale of food (which includes non-alcoholic beverages), including sales of food for consumption off the Licensed Premises if the amount of these sales included in the calculation of Gross Revenue from the sale of food does not exceed fifteen percent (15%) of all Gross Revenue for the Restaurant. For purposes of meeting the Gross Revenue requirements, a Restaurant License Applicant may request that the License Premises include less than the entire establishment in which the Applicant operates its business; provided that Alcoholic Beverages are restricted to the Licensed Premises.

c. The holder of a Restaurant License may sell and serve Alcoholic Beverages solely for consumption on the Licensed Premises. For the purpose of this subsection, "Licensed Premises" may include rooms, areas or locations in which the Restaurant normally sells or serves Alcoholic Beverages or spirituous liquors pursuant to regular operating procedures and practices and that are contiguous to the Restaurant or a Public Patio Enclosure. For the purposes of this subsection, a Restaurant Licensee must submit proof of tenancy or permission from the landlord for all property to be included in the Licensed Premises.

d. The holder of a Restaurant License shall be required upon request of the Office to submit an audit of the records for the Premises to demonstrate compliance with Section 14–7(b)(4)(b). An establishment that averages at least forty percent (40%) of its Gross Revenue from the sale of food during a twelve (12) month audit period shall be deemed to comply with the Gross Revenue requirements of Section 14–7(b)(4)(b). The twelve (12) month audit period shall fall within the sixteen (16) months immediately preceding the beginning of the audit. The Office shall not require an establishment to submit to such an audit more than once a year after the initial twelve (12) months of operation. When conducting an audit, the Office shall use generally accepted auditing standards.

i. If the audit reveals that the Licensee did not meet the definition of a Restaurant as prescribed in Section14–7(b)(4)(b) and the percentage of food sales was less than thirty-seven (37%) percent, then the Office shall deem the License to have been revoked or the Office may recommend that the Licensee be granted an additional twelve (12) month period to attempt to increase their food percentage to at least thirty-seven percent (37%).

ii. If the audit reveals that the Licensee did not meet the definition of a Restaurant as prescribed in Section14–16–7(b)(4)(b) and the percentage of food sales was more than thirty-seven percent (37%) and less than forty percent (40%), then the Office shall allow the Licensee to continue to operate under the Restaurant License for a period of one (1) year, during which the Licensee shall attempt to increase the food percentage to at least forty percent (40%). If the Licensee does not increase the percentage of food sales to at least forty percent (40%), then the License issued pursuant to this Article shall be revoked or the Office may recommend that the Licensee be granted an additional twelve (12) month period to attempt to increase their food percentage to at least forty percent (40%).

(5) *Government License.*

a. The Director may issue a Government License to any Community governmental entity or commercial enterprise upon application by the governing board of that Community governmental or commercial enterprise entity for the sales of Alcoholic Beverages for consumption.

b. The holder of a Government License may sell and serve Alcoholic Beverages solely for consumption on the Licensed Premises. The holder of the Government License may sell and serve Alcoholic Beverages for consumption on the Premises for which the license is issued, including a stadium.

c. Any agreement entered into by a Community governmental entity to a concessionaire to sell or serve Alcoholic Beverages pursuant to this subsection shall contain the following provisions:

i. A provision that fully indemnifies and holds harmless the Community and any of its agencies, boards, commissions, Officers, and employees against any liability for loss or damage incurred either on or off Community property and resulting from the negligent serving of Alcoholic Beverages by the concessionaire or the concessionaire's agents or employees.

ii. A provision that either posts a surety bond in favor of the Community in an amount determined by the Community to be sufficient to indemnify the Community against the potential liability or that names the Community as an additional insured in a liability policy that provides sufficient coverage to indemnify the Community as determined by the Community.

(6) *Business Ancillary License and/or Special Event License.*

a. The Director may issue a Business Ancillary License to (i) a business that serves Alcoholic Beverages as part of a cooking demonstration or cooking class or (ii) a school offering degree programs in the culinary arts.

i. A Business Ancillary License shall be issued pursuant to the process prescribed in Section 14–8 and 14–9 of this Article. Provided that certain provisions, as determined by the Director (in a written form), may not be applicable as a Business Ancillary Licensee is generally considered a social host and not engaged in the selling of Alcoholic Beverages.

ii. A Business Ancillary License shall only be available to a business that is not in the primary business of selling food or alcohol.

iii. The holder of a Business Ancillary License is authorized to serve Alcoholic Beverages solely for consumption on the Licensed Premises and only to guests of the business or in the case of a school, to students enrolled at the school.

iv. The holder of a Business Ancillary License shall not be authorized to sell Alcoholic Beverages separately or by the drink.

b. The Director may issue a Special Event License for a business for the purpose of holding a bona fide business-related networking function for its customers, clients, employees or business partners; or for the purpose of a bona fide charitable, civic, or religious organization to hold a special fundraising event. Provided that any License issued as a Special Event License meets the following conditions:

i. A Special Event License is only issued for one (1) day for a duration that shall not exceed eight (8) hours;

ii. A Special Event License may only be issued no more than once a year and shall only be issued to an Applicant that has obtained a special event license pursuant to the requirements of the State of Arizona; and

iii. A Special Event License shall only be available to a business that is not in the primary business of selling food or alcohol.

c. A Person applying for a Special Event License must make application to the Office at least forty-five (45) days prior to the special event. The Director in his/her administrative discretion, without a public hearing, shall consider the following factors in determining whether to approve or disapprove the Special Event License:

i. Whether the event will be open to the public;

ii. The criminal history of the Applicant;

iii. The nature of the event;

iv. The security measures taken by the Applicant;

v. The type of Alcoholic Beverages to be sold at the event;

vi. How the Alcoholic Beverages will be served at the event;

vii. Whether the Applicant, within the past three (3) years, has held an event that created a Community disturbance or whether the event site has generated Community disturbance complaints;

viii. The potential for noise, traffic, lack of parking, and other related concerns;

ix. The length of the event;

x. The sanitary facilities available to the participants;

xi. The anticipated amount of participants at the event;

xii. The availability of the Community's police and fire departments to provide coverage at the event (if deemed reasonably necessary by the Community);

xiii. Proof of adequate insurance (as deemed reasonably necessary by the Director) by the Applicant for this event; and

d. The nature of the sound amplification of the event. In addition to the Special Event License issued pursuant to this Article, the Applicant must obtain a Special Use Permit from the Community, and pay for any associated costs, including any overtime costs, for police, fire, or other Community departments whose presence is determined necessary, by the Community, for the special event.

Sec. 14–8. Licensing by the Office.

(a) *Applicant and Licensee Qualifications.*

1. Every Alcoholic Beverage Licensee shall be a citizen of the United States.

2. The Office shall require an Applicant and may require any Controlling Person to furnish background information and to submit a full set of fingerprints to the Office.

3. Each Applicant or Licensee shall designate a Person who shall be responsible for managing the Premises. The manager shall be a natural Person and shall meet all the requirements for licensure pursuant to this Article.

4. No License shall be issued to any Person who, within one (1) year before application, has had a License revoked in any jurisdiction.

5. No License shall be issued to or renewed for any Person who, within five (5) years before the application, has been convicted of a felony in any jurisdiction; provided that for a conviction of a corporation, LLC or partnership to serve as a reason for denial, conduct which constitutes the offense and was the bases for a felony conviction must have been engaged in, authorized, solicited, commanded or recklessly tolerated by the directors of the corporation, LLC or partnership or by a high managerial agent acting within the scope of employment. For purposes of this subsection, "high managerial agent" means an officer, partner or member of a corporation, LLC or partnership in a position of comparable authority with respect to the formulation of company policy.

6. No corporation shall be issued a License or a renewal of that License unless on file with the Office is a list of all of the corporations Officers and directors and any stockholders who owns ten percent (10%) or more of the corporation. The Office shall not issue or renew a License for any Person who at the request of the Director fails to provide the Office with complete financial disclosure statements indicating all financial holdings any Controlling Person. Provided that, publicly traded companies are exempt from the requirements set forth in this paragraph.

7. An Alcoholic Beverage License shall be issued only after a satisfactory showing of the capability, qualifications and reliability of the Applicant; and that the public convenience requires and that the best interest of the Community will be substantially served by the issuance of the License.

8. The License shall be to sell or deal in Alcoholic Beverages only at the place and in the manner provided in the License. A separate License shall be issued for each specific Premises.

9. All applications for an original License, the renewal of a License or the transfer of a License pursuant to this Article shall be filed with and determined by the Director, unless an appeal is filed and then the Hearing Officer will approve or disapprove of such License.

10. A Person who assigns, surrenders, transfers or sells control of a business which has an Alcoholic Beverage License shall notify the Office within fifteen (15) business days after the assignment, surrender, transfer or sale. An Alcoholic Beverage License shall not be leased or subleased. A concessional agreement is not considered a lease or a sublease in violation of this Article.

11. If a Person other than those Persons originally Licensed acquires control of a License or Licensee, the Person shall file notice of the acquisition with the Office within fifteen (15) business days after such acquisition of control. All Officers, directors or other Controlling Persons shall meet the qualifications for licensure as prescribed in this Article. On the request of the Licensee, the Director shall conduct a pre-investigation prior to the assignment, sale or transfer of control of a License or Licensee, the reasonable costs of such investigation shall be borne by the Applicant. The pre-investigation shall determine whether the qualifications for licensure as prescribed by this Article are met.

(b) *Application.* A Person desiring a License to sell or deal Alcoholic Beverages shall make application to the Office on a form prescribed by the Office.

(c) *Notice.* Within thirty (30) days of receipt of the License application, the Office shall hold a hearing on such application. Upon receipt of such application, the Office shall post a copy of the completed application in a conspicuous place on the front of the Premises where the business is proposed to be conducted and in this posting, the notice shall contain the following provisions: "*A hearing on a liquor License application shall be held at the following date, time and location [Insert date, time and address]. Any Person owning or leasing property within a one-mile radius may contact the Office in writing to register as a protestor. To request information regarding procedures before the Office and notice of any Office hearings regarding this application, contact the Office at [Insert Office contact information].*

(d) *Applicant's Burden.* Licenses will be issued by the Director after a hearing and upon a determination by the Director that the following criteria have been met by a satisfactory showing by the Applicant that:

1. the public convenience requires the issuance of the License, and

2. the best interests of the Community will be substantially served by the issuance of the License.

(e) *Evidence.* Evidence that may be considered when determining whether the public convenience requires and the best interest of the Community are substantially served by the issuance of a License are the following:

1. Petitions and testimony from Persons in favor of or opposed to the issuance of a License who reside in the Community, or own or lease property located within the Community that is in close proximity to the proposed Premises.

2. The number and series of Licenses in close proximity.

3. Evidence that all necessary Licenses and permits have been obtained from the state and all other governing bodies.

4. The residential and commercial population of the Community and its likelihood of increasing, decreasing or remaining static.

5. The Community's residential and commercial population density in close proximity.

6. Evidence concerning the nature of the proposed business, its potential market, and its likely customers.

7. Effect on vehicular traffic in close proximity.

8. The compatibility of the proposed business with other activity in close proximity.

9. The effect or impact of the proposed Premises on businesses or the residential neighborhood whose activities might be affected by granting the License.

10. The history for the past five (5) years of liquor violations and reported criminal activity at the proposed Premises provided that the Applicant has received a detailed report(s) of such activity at least twenty (20) days before the hearing.

11. Comparison of the hours of operation of the proposed Premises to the existing businesses in close proximity.

12. Proximity to licensed childcare facilities and k-12 schools.

(f) *Inappropriate Purpose.* In order to prevent the proliferation of Licenses, the Office may deny a License to an Applicant after determining that the Applicant's business is inappropriate for the sale of spirituous liquor. An inappropriate Applicant or business is one that cannot clearly demonstrate that the sale of spirituous liquor is directly connected to its primary purpose and that the sale of liquor is not merely incidental to its primary purpose.

(g) *Public Hearing.* The Director shall determine after a hearing has been held whether and under what conditions a License shall be issued.

1. The hearing shall be announced by notice in the Community newspaper.

2. Notice shall be given no less than ten (10) business days prior to such hearing.

3. The hearing shall be conducted by the Director in an informal manner with rules adopted pursuant to this Article calculated to assure full disclosure of all relevant information.

4. Professional attorneys may be permitted to represent parties at any administrative hearing before the Office, the Director or the Hearing Officer pursuant to this Article.

5. The Director shall hear all relevant issues and, within thirty (30) days after the hearing is concluded, shall issue a written decision.

6. The decision will contain the findings of fact relied on by the Director for the decision as well as the decision.

7. The Applicant shall be provided notice of the hearing via standard and certified mail.

8. The Director shall enter an order recommending approval or disapproval of the License within sixty (60) days after the filing of the application.

(h) *Appeals.* A decision of the Director may be appealed by any Aggrieved Party to the Community Manager. The Community Manager shall appoint a Hearing Officer to hear the appeal. The Hearing Officer shall be a member in good standing of the Arizona State Bar and shall have previous experience serving in a judicial capacity.

1. *Appeal process.* Appeals of any decision of the Director shall follow this process:

a. A notice of appeal shall be filed with the Community Manager within fifteen (15) business days after notice of the decision by the Director.

b. The notice of appeal shall state all the grounds for appeal relied on by the appellant.

c. The appellee may file a short written response to the grounds for appeal within fifteen (15) business days after the notice of appeal is filed.

d. The notice of appeal and response shall be mailed to the opposing party within two (2) business days on which it was filed.

e. If the appellant is the Applicant for the License, the appellee shall in all cases be the Director. If the appellant is a Person who filed a notice of appearance or the Community, the appellee shall in all cases be the Applicant.

f. In the event there is more than one notice of appeal filed, the appeals shall be consolidated and only one response shall be filed to the consolidated appeals.

2. *Status of initial determination.* The decision of the Director shall be suspended until a final determination of the appeal is issued by the Hearing Officer.

3. *Grounds for appeal.* An Aggrieved Party may appeal any final decision of the Director regarding applications or Licenses based on a contention that the decision was any of the following: (1) Founded on or contained errors of law, (2) unsupported by any competent evidence as disclosed by the record, (3) materially affected by unlawful procedures, (4) based on a violation of any SRPMIC constitutional provision, or (5) arbitrary or capricious.

a. The Hearing Officer shall conduct a hearing and may accept any relevant and material evidence and testimony.

b. An official record of the hearing shall be prepared. Persons, at their own costs, may request that the hearing record be transcribed and may be provided a copy of the transcribed record.

c. The Hearing Officer shall determine whether the decision is supported by the findings of fact and the law.

d. The Hearing Officer may affirm, reverse or modify any decision issued by the Director.

e. The Hearing Officer's decision shall be final and not subject to rehearing, review or appeal.

Sec. 14–9. License Terms, Fees, Renewals and Transfers.

(a) *License Terms and Fees.* Licenses shall be issued for a period of one (1) year and are renewable on application to the Office which will renew upon payment of the appropriate fee.

1. A Licensee who fails to renew the License on or before the due date shall pay a penalty of five hundred dollars ($500.00).

2. If the due date falls on a Saturday, Sunday or a legal holiday, the renewal shall be considered timely if it is received by the Office on the next business day.

3. A Licensee who fails to renew the License on or before the due date may not sell, purchase, or otherwise deal in Alcoholic Beverages until the License is renewed.

4. A License that is not renewed within sixty (60) days after its due date is deemed terminated. The Director may renew the terminated License if good cause is shown by the Licensee as to why the License was not renewed on its due date or the sixty (60) days following the due date.

5. Issuances fees for an original License and the renewal thereof shall be the following (excluding applicable surcharges):

a. Hotel-Motel License: Original $2,000.00, renewal $500.00.

b. Golf Course License: Original $2000.00, renewal $500.00.

c. Casino License: Original $2,500.00, renewal $750.00.

d. Restaurant License: Original $2,000.00, renewal $500.00.

e. Government License: Original $200.00, renewal $100.00.

f. Business Ancillary License: Original $200.00, renewal $100.00.

g. Special Event License: Original $200.00.

6. The Office may assess a surcharge on the annual renewals of Licenses to be used to help defray the costs of an auditor and support staff to review compliance of the requirements of the Licensees.

7. The Office may assess a surcharge to assist in the costs of enforcement programs that respond to complaints filed under this Article.

8. For purposes of this Article only, Licensee shall keep records of Licensee's business activity and all Persons employed at the Licensed Premises in a manner and location and for such duration as prescribed by the Director for a period of at least two (2) years. Business Activity shall include invoices, records, bills or other papers and/or documents relating to the purchase, sale and delivery of Alcoholic Beverages, and in the case of a Restaurant or Hotel-Motel Licensee, such documentation shall also be kept for the purchase, sale and delivery of food.

9. Licenses issued under this Article are nontransferable without the prior written approval of the Director after the application process has been completed.

a. The transfer fee of a License from one Person to another Person is $300.00 (excluding an application fee).

b. The transfer fee of License from one location to another location shall be $100.00 (excluding an application fee).

c. The Office may issue an interim permit to the transferee of a transferable License pursuant to regulations established by the Office.

(b) *Beverage restrictions.* Licenses may only be issued for Premises operated under the following classifications as defined herein; and such Licenses may be restricted to the sale of (i) all Alcoholic Beverages, (ii) only beer, (iii) only wine, or (iv) only beer and wine. Licenses may be restricted based on the type of License sought by the Applicant.

(c) *Reasons for Revocation, Suspension and Grounds not to Renew.* After notice and a hearing, the Director may revoke, suspend or refuse to renew any License issued pursuant to this Article for the following reasons:

1. There occurs on the Licensed Premises repeated acts of violence or disorderly conduct.

2. The Licensee fails to satisfactorily maintain the capability, qualifications and reliability requirements of an Applicant for a License prescribed pursuant to this Article.

3. The Licensee or Controlling Person knowingly files with the Office an application or other document which contains material information which is false or misleading or while under oath knowingly gives testimony in an investigation or other proceeding under this Article which is false or misleading.

4. The Licensee or the Controlling Person is habitually intoxicated while on the Premises.

5. The Licensed business is delinquent for more than ninety (90) days in the payment of taxes, penalties or interest to the Community.

6. The Licensee or the Controlling Person obtains, assigns, transfers or sells an Alcoholic Beverage License in a manner that is not compliant with Articles II and III of this Chapter 14.

7. The Licensee fails to keep for two (2) years and make available to the Office upon reasonable request all invoices, records, bills or other papers and/or documents relating to the purchase, sale and delivery of Alcoholic Beverages, and in the case of a Restaurant or Hotel-Motel License, all invoices, records, bills or other papers and/or documents relating to the purchase, sale and delivery of food.

8. The Licensee or Controlling Person violates or fails to comply with Articles II and III, any rule or regulation adopted pursuant to this Chapter 14 or any Alcoholic Beverage law of the Community.

9. The Licensee or an employee of a Licensee fails to take reasonable steps to protect the safety of a customer of the Licensee entering, leaving or remaining on the Licensed Premises when the Licensee knew or reasonably should have known of the danger to such Person, or the Licensee fails to take reasonable steps to intervene by notifying law enforcement officials or otherwise prevent or break up an act of violence or an altercation occurring on the Licensed Premises or immediately adjacent to the Premises when the Licensee knew or reasonably should have known of such acts of violence or altercations.

10. The Licensee or Controlling Person lacks good moral character.

11. The Licensee or Controlling Person knowingly associates with a Person who has engaged in racketeering or has been convicted of a felony, and the association is of such a nature as to create a reasonable risk that the Licensee will fail to conform to the requirements of this Article or of any Community law.

12. The Licensee or Controlling Person is convicted of a felony provided that for a conviction of a corporation, LLC or partnership to serve as a reason for any action by the Office, conduct which constitutes the offense and was the basis for the felony conviction must have been engaged in, authorized, solicited, commanded or recklessly tolerated by the directors of the corporation, LLC or partnership or by a high managerial agent acting within the scope of employment. For purposes of this subsection, "high managerial agent" means an officer, partner or member of a corporation, LLC or partnership or any other agent of the corporation, LLC or partnership in a position of comparable authority with respect to the formulation of company policy.

(d) *Suspension, Revocation, Refusal to Renew or Sanctions.*

1. The Director may suspend, revoke or refuse to issue, transfer or renew a License based solely on the unrelated conduct or fitness of any officer, director, managing agent or other Controlling Person if that officer, director, managing agent or Controlling Person retains any interest in or control of the License after sixty (60) days following a written notice to the Licensee.

2. The Director may refuse to transfer any License or issue a new License at the same location if the Director has filed a complaint against a Licensee or the location which has not been resolved that alleges a violation of any of the grounds identified in Articles II and III of this Chapter until such time as the complaint has been finally adjudicated.

3. The Director may cause a complaint and notice of hearing to be directed to the Licensee setting forth the violations alleged against the Licensee.

e. Upon receipt of a complaint, the Licensee shall have ten (10) business days to respond to the allegations by filing a written response to the Director.

f. Failure by the Licensee to respond to the compliant within ten (10) business days shall be considered an admission by the Licensee of the allegations. The Director may then vacate a hearing and impose appropriate sanctions on the Licensee.

g. In lieu of or in addition to any suspension, revocation or refusal to renew a License, the Director may impose a civil penalty of not less than two hundred ($200.00) dollars and no more than three thousand ($3,000.00) dollars for each violation and/or require the Licensee to attend certain training.

h. The Licensee may appeal the decision by the Director to fine, revoke or not renew their License to the Community Manager who will appoint a Hearing Officer pursuant to the requirements of this Article. The Hearing Officer may affirm, modify or reverse the decision of the Director to impose the civil penalty.

Sec. 14–10. Injunction.

If the Office or the Director has reasonable grounds to believe that a Person owns, operates, leases, manages or is controlling a business establishment or business Premises that is not properly licensed pursuant to this Article, then the Office or the Director may apply to the Community Court for a temporary restraining order or other injunctive relief prohibiting the specific acts complained of by the Office or the Director.

Sec. 14–11. Miscellaneous.

(a) *Severability.* If any provision of this Chapter 14 of the SRPMIC Code of Ordinances shall be determined invalid or unenforceable by a court of competent jurisdiction, such determination shall not be held to invalidate or render unenforceable the remainder of this Chapter 14, and to this end, the provisions of this Chapter are severable.

(b) *Amendment.* This Chapter may be amended by a majority vote of the Community Council or by the Community initiative or referendum process.

Sec. 14–12—12–16. Reserved.

Article III. Unlawful Acts

Sec. 14–17. Violation of Chapter 14.

(a) *Civil sanctions & penalties.* A Person who violates any provision of this Chapter 14 of the SRPMIC Code of Ordinances may have their License revoked, suspended or may be assessed other civil sanctions.

(b) *Criminal penalties.* Persons who come within the criminal jurisdiction of this Community, and are guilty of violations of Chapter 14 of this SRPMIC Code of Ordinances, are subject to criminal penalties and upon conviction shall be sentenced to imprisonment for a period not to exceed six (6) months or to a fine not to exceed five thousand dollars ($5000.00) or both such imprisonment and fine, with costs.

Sec. 14–18. Unlawful Acts.

(a) It shall be unlawful for any Person to buy, sell or distribute Alcoholic Beverages in any manner not allowed by Chapter 14 of the SRPMIC Code of Ordinances

(b) It shall be unlawful to employ a Person under the age of nineteen (19) years in any capacity connected with the handling of Alcoholic Beverages.

(c) It shall be unlawful for a Licensee or other Person to give, sell or cause to be sold or otherwise distribute Alcoholic Beverages to a Person under the age of twenty-one (21) years.

1. If a Licensee, an employee of a Licensee or any other person questions or has reason to question that a person ordering, purchasing, attempting to purchase or otherwise procuring or attempting to procure the serving or delivery of spirituous liquor is under the legal drinking age, the Licensee, employee of the Licensee or other person shall do the following:

a. Demand identification from the person.

b. Examine the identification to determine that the identification reasonably appears to be a valid, unaltered identification that has not been defaced.

c. Examine the photograph in the identification and determine that the person reasonably appears to be the same person in the identification.

d. Determine that the date of birth in the identification indicates the person is not under the legal drinking age.

2. If a Licensee or an employee of a Licensee who follows the procedures prescribed above in Section 14–18(c)(1)(a)–(d), records and retains a record of the person's identification on this particular visit, the Licensee or employee of the Licensee shall not be in violation of Section 14–18(c)–(e).

3. Proof that a Licensee or employee followed the entire procedure proscribed above in Section 14–18(c)(1)(a)–(d), but did not record and retain a record of the identification is an affirmative defense to a violation of this Section 14–8(c)–(e).

4. A Licensee or employee of a Licensee who has not recorded and retained a record of the identification prescribed by Section 14–18(c)(1)(a)–(d), is presumed not to have followed any of the elements of Section 14–18(c)(1)(a)–(d).

(d) It shall be unlawful for a Person under the age of twenty-one (21) years to buy, Possess, or consume Alcoholic Beverages.

(e) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit any Person on or about the Licensed Premises to give or furnish Alcoholic Beverages to any Person under the age of twenty-one (21) or knowingly permit any Person under the age of twenty-one (21) to have in the Person's Possession Alcoholic Beverages on the Licensed Premises.

j. It shall be unlawful for a Licensee or an employee of the Licensee to consume Alcoholic Beverages on or about the Licensed Premises during such periods as when such Person is working at the Licensed Premises, except that:

a. An employee of an On-Sale Retailer, during the employee's working hours in connection with the employment, while the employee is not engaged in waiting on or serving customers, may taste samples of beer or wine not to exceed four (4) ounces per day or distilled spirits not to exceed two (2) ounces per day provided by an employee of a wholesaler or distributor who is present at the time of sampling.

b. An employee of an On-Sale Retailer, under the supervision of a manager as part of the employee's training and education, while not engaged in waiting on or serving customers may taste samples of distilled spirits not to exceed two (2) ounces per educational session or beer/wine not to exceed four (4) ounces per educational session, and provided that a Licensee shall not have more than two (2) educational sessions in any thirty (30) day period.

c. An unpaid volunteer of a special event may purchase and consume Alcoholic Beverages while not engaged in waiting on or serving Alcoholic Beverages to customers at the special event. This subsection does not apply to unpaid volunteers whose responsibilities include verification of a person's legal drinking age, security or the operation of any vehicle or heavy machinery.

d. A Licensee or Employee of a Licensee of a Business Ancillary Licensee may consume Alcoholic Beverages as part of a meal prepared in connection with a cooking demonstration.

(g) It shall be unlawful for a Licensee or an employee of the Licensee to sell Alcoholic Beverages to a disorderly or obviously intoxicated Person, or for a Licensee or employee of a Licensee to allow or permit a disorderly or obviously intoxicated Person to remain on the Premises except that a Licensee or an employee of the Licensee may allow an obviously intoxicated person to remain on the Premises for a period of time of not to exceed thirty (30) minutes after the state of obvious intoxication is known or should have been known to the Licensee in order that a non-intoxicated person may transport the obviously intoxicated person from the Premises. For purposes of this Article, "obviously intoxicated" means inebriated to the extent that a Person's physical faculties are substantially impaired and the impairment is shown by significant uncoordinated physical action or physical dysfunction that would have been obvious to a reasonable Person.

(h) It shall be unlawful for a Licensee or an employee of the Licensee to sell Alcoholic Beverages that are in a Broken Package (all wine and Alcoholic Beverages shall have their seal broken by the Licensee or their employee before serving such Alcoholic Beverage to the customer).

(i) It shall be unlawful for a Licensee or an employee of the Licensee to sell Alcoholic Beverages as an Off-Sale Retailer.

(j) It shall be unlawful for a Licensee or an employee of the Licensee to sell Alcoholic Beverages within the Community without being also licensed by the State of Arizona to sell Alcoholic Beverages.

(k) It shall be unlawful for a Licensee or an employee of the Licensee to sell, dispose of, deliver or give Alcoholic Beverages to a Person between the hours of 2 a.m. and 6 a.m., on weekdays (which shall include Saturday), and 2 a.m. and 10 a.m. on Sundays.

(l) It shall be unlawful for a Licensee or an employee of the Licensee to allow a Person to consume or Possess Alcoholic Beverages on the Premises between the hours of 2:30 a.m. and 6 a.m. on weekdays (which shall include Saturday), and 2:30 a.m. and 10 a.m. on Sundays.

(m) It shall be unlawful for a Person to consume Alcoholic Beverages in a Public Place, thoroughfare or gathering. Any Licensee or employee of the Licensee permitting violations of this paragraph shall be subject to License revocation. This paragraph does not apply to the sale of Alcoholic Beverages on the Premises of and by an On-Sale Retailer.

(n) It shall be unlawful for an On-Sale Retailer or an employee of the Licensee to allow a Person under the age of twenty-one (21) to remain in an area on the Licensed Premises during those hours in which the primary use is the sale, dispensing or consumption of Alcoholic Beverages after the Licensee, or the Licensee's employees know or should have known that the Person is under the age of twenty-one (21). This subsection does not apply if the Person under the legal drinking age is accompanied by a spouse, parent or legal guardian who is of legal drinking age, is an on-duty employee of the Licensee, or to the area of the Premises used primarily for the serving of food when food is being served.

(o) It shall be unlawful for an On-Sale Retailer or employee of the Licensee to conduct drinking contests, to sell or deliver to a Person an unlimited number of Alcoholic Beverages during any set period of time for a fixed price, to deliver more than thirty-two (32) ounces of beer, one (1) liter of wine or four (4) ounces of distilled spirits in any Alcoholic Beverage drink to one Person at one time for that Person's consumption or to advertise any practice prohibited by this paragraph.

(p) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit the unlawful Possession, use, sale or offer for sale of narcotics, dangerous drugs or marijuana on the Premises.

(q) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit prostitution or the solicitation of prostitution on the Premises.

(r) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit unlawful gambling on the Premises.

(s) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit trafficking or attempted trafficking in stolen property on the Premises.

(t) It shall be unlawful for a Licensee or an employee of the Licensee to fail or refuse to make the Premises or records available for inspection and examination as or to comply with a lawful subpoena issued under this Chapter.

(u) It shall be unlawful for any Person other than a law enforcement officer, the Licensee or an employee of the Licensee acting with the permission of the Licensee to be in the Possession of a firearm while on the Licensed Premises of an On-Sale Retailer.

(v) It shall be unlawful for a Licensee or an employee of the Licensee to knowingly permit a Person in Possession of a firearm,

other than a law enforcement officer, the Licensee or the employee of the Licensee (acting with the permission of the Licensee) to remain on the Licensed Premises or to serve, sell or furnish spirituous liquor to a Person in Possession of a firearm while on the Licensed Premises of an On-Sale Retailer.

(w) It shall be unlawful for a Person under the age of twenty-one (21) to drive or be in physical control of a motor vehicle while there is any Alcoholic Beverage in the Person's body.

(x) It shall be unlawful for a Licensee or employee of the Licensee to purposely induce a voter, by means of alcohol, to vote or abstain from voting for or against a particular candidate or issue on Election Day.

(y) It shall be unlawful for a Licensee to fail to report an occurrence of an act of violence, within three (3) business days, to either the Office or the Salt River Police Department.

(z) It shall be unlawful for any Person to consume or be in Possession of any open container of Alcoholic Beverages while operating or while within the passenger compartment of a motor vehicle that is located on any roadways or public parking lots within the SRPMIC. This paragraph does not apply to a passenger on any bus, limousine or a passenger in the living quarters of a mobile home.

(1) Motor vehicle means any vehicle that is driven or drawn by mechanical power and that is designed for primary use on public roadways.

(2) Open container means any bottle, can, jar or other receptacle that contains Alcoholic Beverages and that has been opened, has had its seal broken or the contents of which have been partially removed.

(3) Passenger compartment means the area of a motor vehicle designed for seating of the driver and other passengers of the vehicle. Passenger compartments include an unlocked glove compartment and any unlocked portable devises within the immediate reach of the driver or any passengers.

(aa) It shall be unlawful for any Person over the age of eighteen (18) who lawfully exercises dominion and control within any Private Residence or the surrounding premises to knowingly permit any Person under the age of twenty-one (21) to Possess or consume Alcoholic Beverages within the private residence or within the immediate surrounding premises.

(bb) It shall be unlawful for a Licensee to sell Alcoholic Beverages in any manner not provided for by Chapter 14 of the SRPMIC Code of Ordinances or any regulations issued pursuant to this Chapter.

Sec. 14–19—14–20. Reserved.

Replace "Article III. Possession in a Public Place" with "Article IV. Possession in a Public Place." [All text to remain in Sections 14–21 through 14–30].

Replace "Article IV. Possession and Use of Narcotics, Hallucinogens or Dangerous Drugs, Seizure of Vehicles" with "Article V. Possession and Use of Narcotics, Hallucinogens or Dangerous Drugs, Seizure of Vehicles." [All text to remain in Sections 14–31 through 14–32].

BILLING CODE 4310–02–C

DEPARTMENT OF THE INTERIOR

National Park Service

National Mall and Memorial Parks, Washington, DC; Final Environmental Impact Statement and National Mall Plan

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Availability of a Final Environmental Impact Statement for the National Mall Plan.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332 (2)(c), the National Park Service announces the availability of a Final Environmental Impact Statement (FEIS) for the National Mall Plan (Plan). The Plan establishes a long-term vision for the use and management of some of the most historic, symbolic, and heavily used public lands in our nation.

DATES: The FEIS for the Plan will remain available for public review for 30 days beginning on the date the U.S. Environmental Protection Agency publishes a Notice of Availability in the **Federal Register**.

ADDRESSES: Copies of the FEIS are available at National Mall and Memorial Parks Headquarters, 900 Ohio Drive, SW., Washington, DC, at local libraries around Washington, DC, and online at *http://www.nps.gov/nationalmallplan.*

FOR FURTHER INFORMATION CONTACT: Susan Spain, Project Executive, National Mall Plan at (202) 245–4692.

SUPPLEMENTARY INFORMATION: The National Mall and Memorial Parks is proposing to manage the National Mall according to the Plan's Preferred Alternative described below. The goals of this Plan are to restore resource conditions on the National Mall; better prepare it for the intense levels of use from First Amendment demonstrations, national celebrations, events, and annual visitation; and provide an enhanced experience for the visitors to this symbolic and historic cultural landscape.

During the preparation of the DEIS, the National Park Service (NPS) issued four newsletters about the Plan, including one which described a preliminary Preferred Alternative. The NPS issued press releases, contacted and worked with media to encourage public involvement, posted the DEIS on the NPS project Web site, sent out over 13,000 e-mail announcements, issued four "tweets," held consultation meetings about historic preservation, and made informational presentations to the U.S. Commission of Fine Arts and the National Capital Planning Commission, which were open to the public. The NPS distributed over 5800 copies of the DEIS on CD and approximately 175 printed copies. The availability of the DEIS was announced on December 18, 2009 (74 FR 67206).

Comments received during the 90-day public comment period (December 18, 2009—March 17, 2010), as well as approximately 30,000 comments received before the DEIS was published, were considered in the preparation of the two-volume FEIS. Volume I of the FEIS includes revisions to the FEIS based on public comments received during review of the Plan. Volume II of the FEIS summarizes and provides the NPS response to public comments received on the Plan.

The National Mall Plan Alternatives

The following elements are common to all alternatives:

- The National Mall and Memorial Parks will fully accommodate demonstrations and special events on a first-come, first-served basis, consistent with the First Amendment and with 36 CFR 7.96.
- Cultural resources will be preserved, protected, and managed in accordance with *The Secretary of the Interior's Standards* and with the general recommendations of cultural landscape reports and inventories.

No-Action Alternative Under the No-Action Alternative, current management of the National Mall would remain unchanged. Existing spaces which have not been designed for the current level of use would continue to experience a high level of wear and tear, affecting the historic landscape, with the large amount of deferred maintenance and aging infrastructure, pedestrian and bicycle circulation issues, and the lack of adequate visitor facilities left unaddressed.

Preferred Alternative The Preferred Alternative is the NPS's proposed course of action. Its intent is to establish a sense of place and an overall identity for the National Mall, combining the most desirable components of each of the alternatives as well as the focused emphasis of Alternatives A, B, and C. Under the Preferred Alternative, the historic landscape of the National Mall, with its memorials and planned vistas, would be protected, and the designed landscape would evolve and be respectfully rehabilitated. The National Mall would be refurbished to become the preeminent civic stage for the Nation, capable of accommodating very high levels of use, with the needs of visitors being met in an energy-efficient and sustainable manner. Also under the Preferred Alternative, the pedestrian environment would be improved and recreational activities would be expanded by redesigning some areas, increasing recreational equipment rentals, and emphasizing connections to the recreational opportunities in adjacent parks, thereby contributing to the concept of healthy lifestyles, healthy parks, and healthy, more sustainable cities.

Alternative A—Focus on the Historic Landscape and Education. Alternative A would focus on restoring and maintaining the resources of the National Mall as a historic landscape. The designed historic landscape would evolve and change over time, reflecting significant national events. Contemporary uses would be accommodated while respecting the planned historic character and visions of the L'Enfant and McMillan Plans.

Alternative B—Focus on a Welcoming National Civic Space for Public Gatherings, Events, and High-Use Levels. Alternative B would focus on improving the National Mall to be the nation's premier civic space. Alternative B would support very high levels of use, emphasizing the National Mall's evolving ceremonial, celebratory, cultural, and visitor uses. Some areas would be redesigned to provide a more sustainable civic forum and a stage for First Amendment demonstrations and other events.

Alternative C—Focus on Urban Open Space, Urban Ecology, Recreation, and Healthy Lifestyles. Alternative C would focus on meeting the evolving recreational needs in the Nation's capital by providing beautiful, enjoyable, and ecologically sustainable open spaces that could be adapted to changing recreational patterns of diverse local and national users.

Dated: June 15, 2010.

Margaret O'Dell,

Regional Director, National Capital Region.

BILLING CODE 4312–39–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Liquor Control Ordinance for the Manchester Band of Pomo Indians of the Manchester-Point Arena Rancheria

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the Liquor Control Ordinance of the Manchester Band of Pomo Indians of the Manchester-Point Arena Rancheria. The

Ordinance regulates and controls the possession, sale and consumption of liquor within the Manchester-Point Arena Rancheria tribal land. The tribal land is located on trust land and this Ordinance allows for the possession and sale of alcoholic beverages. This Ordinance will increase the ability of the tribal government to control the distribution and possession of liquor within their tribal land, and at the same time will provide an important source of revenue and strengthening of the tribal government and the delivery of tribal services.

DATES: *Effective Date:* This Ordinance is effective July 13, 2010.

FOR FURTHER INFORMATION CONTACT: Fred Doka Jr., Tribal Operations Officer, Pacific Regional Office, 2800 Cottage Way, Sacramento, CA 95825, Telephone (916) 978–6067; or Elizabeth Colliflower, Office of Tribal Services, 1849 C Street, NW., Mail Stop 4513–MIB, Washington, DC 20240; Telephone (202) 513–7641; Fax (202)–501–0679.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice* v. *Rehner,* 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted liquor ordinances for the purpose of regulating liquor transactions in Indian country. The Business Committee for the Manchester Band of Pomo Indians adopted this liquor control ordinance on May 30, 2009. The purpose of this Ordinance is to govern the sale, possession and distribution of alcohol within the Manchester-Point Arena Rancheria tribal land. This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary-Indian Affairs. I certify that this Liquor Control Ordinance of the Manchester Band of Pomo Indians of the Manchester-Point Arena Rancheria was duly adopted by Resolution No. 2009–502–30–09 by the Tribe's Business Committee on May 30, 2009.

Dated: July 2, 2010.

Del Laverdure,

Deputy Assistant Secretary—Indian Affairs.

The Liquor Control Ordinance for the Manchester Band of Pomo Indians of the Manchester-Point Arena Rancheria reads as follows:

ORDINANCE GOVERNING THE SALE, CONSUMPTION, AND POSSESSION OF ALCOHOLIC BEVERAGES AT THE TRIBE'S CASINO

Sale, Possession, and Consumption of Alcoholic Beverages

The Business Committee of the Manchester Band of Pomo Indians (hereinafter "Tribe"), hereby enacts this Ordinance to govern the sale and consumption of alcoholic beverages on Rancheria lands in Mendocino County, California.

Preamble

A. Title 18, United States Code, Section 1161, provides Indian tribes with authority to enact ordinances governing the consumption and sale of alcoholic beverages on their Reservations provided such ordinance is certified by the Secretary of the Interior and published in the Federal Register and such activities are in conformity with state law.

B. Pursuant to Article III of the Tribe's Constitution, the Community Council is the governing body of the Tribe. Pursuant to Resolution #0025 of the Community Council, dated 12–17–81, the Community Council delegated to the Business Committee full authority to promulgate ordinances as it finds necessary to the safe and productive environment on the Rancheria and for the Tribe's members, its economic development projects. Pursuant to that delegation of authority, and to the inherent authority of the Tribe and its members, the Business Committee is empowered to promulgate and enforce tribal laws exercising the Tribe's regulatory authority, to manage all economic affairs and enterprises of the Tribe for the protection of public health and safety, to administer all lands and assets and manage all economic affairs, planning and enterprises of the Tribe, and to regulate the conduct of all persons who enter the jurisdiction of the Tribe.

C. Pursuant to Article I of the Tribe's Constitution, the territorial jurisdiction of the Tribe includes the territory within the confines of the Manchester Rancheria, and such other lands as may hereafter be added thereto under any law of the United States.

D. The Casino will be an integral and indispensable part of the Tribe's economy, providing income to the Tribe and training and employment to its members. The Tribe has determined that it is in the Tribe's best interest to offer alcoholic beverages for sale and consumption in the Casino.

E. It is the purpose of this Ordinance to set out the terms and conditions under which the sale and consumption of said alcoholic beverages may take place at the Casino.

General Terms

1. The sale of alcoholic beverages within the Casino, for on-Premises (within the Casino) consumption only, is hereby authorized.

2. No alcoholic beverages may be sold at any location on the Rancheria other than inside the Casino.

3. The sale of said alcoholic beverages authorized by this Ordinance shall be in conformity with all applicable laws of the State of California, and the sale of said beverages shall be subject to state sales tax, federal excise tax and any fees required by the Federal Bureau of Alcohol, Tobacco & Firearms. This includes *but is not limited to* the following examples:

a. No person under the age of 21 years shall consume, acquire or have in his or her possession at the Casino any alcoholic beverage.

b. No person shall sell alcohol to any person under the age of 21 at the Casino.

c. No person shall sell alcohol to a person apparently under the influence of alcohol at the Casino.

4. Where there may be a question of a person's right to purchase alcohol by reason of his or her age, such person shall be required to present any one of the following types of identification which shows his or her correct age and bears his or her signature and photograph: (1) Driver's license or identification card issued by any state Department of Motor Vehicles; (2) United States Active Duty Military card; (3) passport.

5. All alcohol sales within the Casino shall be on a cash only basis and no credit shall be extended to any person, organization or entity, except that this provision does not prevent the use of major credit cards.

Posting

6. This Ordinance shall be conspicuously posted within the Casino at all times it is open to the public.

Enforcement

7. This Ordinance may be enforced by the Business Committee and by any additional tribal government agencies to which the Business Committee or Community Council may from time to time by resolution delegate such enforcement powers. Enforcement sanctions may include, but are not limited to, the assessment of monetary fines not to exceed $500 and revocation of authorization to sell alcohol at the Casino. Prior to any enforcement action, any alleged violator of this Ordinance shall be provided with at least three (3) days notice in writing of an opportunity to be heard during a hearing at which due process is provided. The decision of the Business Committee or other agency with delegated authority after such hearing shall be final.

Severability

8. If any provision or application of this Ordinance is determined by the Business Committee, Community Councilor other agency with delegated authority to be invalid, such adjudication shall not be held to render ineffectual the remaining portions of this Ordinance or to render such provisions inapplicable to other circumstances.

Amendment

9. This Ordinance may only be amended by a majority vote of the Business Committee or Community Council and such amendment shall be subject to the provisions of Title 18, United States Code, Section 1161.

Sovereign Immunity

10. Nothing in this Ordinance in any way limits, alters, restricts or waives the Tribe's sovereign immunity from unconsented suit, claim, or action.

Effective Date

11. This Ordinance shall not be effective until it is certified by the Secretary of the Interior and published in the **Federal Register**.

CERTIFICATION

The foregoing Ordinance was adopted by a vote of 1 for, and 0 against and 0 abstentions, at a duly called meeting of the Business Committee of the Manchester Band of Pomo Indians of the Manchester Rancheria at which a quorum was present, on this 30th day of May, 2009.

Bureau of Land Management

[LLAK910000 L13100000.DB0000 LXSINSSI0000]

Notice of Reestablishment of the North Slope Science Initiative Science Technical Advisory Panel

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act of 1972 (Pub. L. 92–463). Notice is hereby given that the Secretary of the Interior (Secretary) has re-established the Bureau of Land Management's (BLM) North Slope Science Initiative (NSSI) Science Technical Advisory Panel (Panel).

FOR FURTHER INFORMATION CONTACT: Allison Sandoval, BLM Advisory Committee Lead (600), Bureau of Land Management, 1620 L Street, NW., MS–LS–401, Washington, DC 20036, telephone (202) 912–7434.

SUPPLEMENTARY INFORMATION: The purpose of the Panel is to advise the NSSI Executive Director and NSSI Oversight Group on the inventory, monitoring, and research needed on the North Slope of Alaska, including the off-shore environments.

Certification Statement: I hereby certify that the reestablishment of the North Slope Science Initiative Science Technical Advisory Panel is necessary and in the public interest in connection with the Secretary's responsibilities to manage the lands, resources, and facilities administered by the BLM.

Dated: June 28, 2010.

BILLING CODE 1310–JA–P

INTERNATIONAL TRADE COMMISSION

Notice of Delegation of Authority to Secretary to the Commission To Publish Notice of the Receipt of Complaints Under Section 337 of the Tariff Act of 1930 and To Solicit Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to delegate authority to the Secretary to the Commission to publish notice of the receipt of future complaints under section 337 of the Tariff Act of 1930 and to solicit comments relating to the public interest.

DATES: *Effective Date:* July 8, 2010.

FOR FURTHER INFORMATION CONTACT: James A. Worth, Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–3065. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 ("section 337") provides that if the Commission finds a violation it shall exclude the articles concerned from the United States:

> unless, after considering the effect of such exclusion upon the public health and welfare, competition conditions in the United States economy, the production of like or directly competitive articles in the United States consumers, it finds that such articles should not be excluded from entry.

19 U.S.C. 1337(d)(1). The statute contains a similar provision in relation to cease and desist orders. 19 U.S.C. 1337(f)(1).

The Commission has determined to delegate to the Secretary to the Commission the authority to publish notice of receipt of a complaint and, in such a notice, to solicit comments on any public interest issues raised by the complaint.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of sections 201.10 and 210.50(a)(4) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.50(a)(4)).

Issued: July 8, 2010.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–726]

In the Matter of Certain Electronic Imaging Devices; Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on May 13, 2010, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of FlashPoint Technology, Inc. of Peterborough, New Hampshire. An amended complaint was filed on June 16, 2010. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain electronic imaging devices by reason of infringement of certain claims of U.S. Patent No. 6,134,606 ("the '606 patent"); U.S. Patent No. 6,163,816 ("the '816 patent"); and U.S. Patent No. 6,262,769 ("the '769 patent") The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue an

exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Anne M. Goalwin, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2574. *Authority:* The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2010).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on July 7, 2010*, ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain electronic imaging devices that infringe one or more of claims 1, 11, and 21 of the '606 patent; claims 1–14 and 16 of the '816 patent; and claims 1–7, 11–13, 16–23, 26, 30–32, 40, and 41 of the '769 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is:

FlashPoint Technology, Inc., 20 Depot Street, Suite 2A, Peterborough, NH 03458.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Nokia Corp., Keilalahdentie 4, FIN–00045 Espoo, Finland;

Nokia, Inc., 6000 Connection Drive, Irving, TX 75039;

Research In Motion Ltd., 295 Phillip Street, Waterloo, Ontario N2L 3W8, Canada;

Research In Motion Corp., 122 W. John Carpenter Parkway, Suite 430, Irving, TX 75039;

HTC Corporation, 23 Xinghua Road, Taoyuan, 330, Taiwan;

HTC America, Inc., 13920 SE Eastgate Way, Suite 400, Bellevue, WA 98005;

LG Electronics, Inc., LG Twin Towers, 20, Yoido-dong, Youngdungpo-gu, Seoul, 157–721, South Korea;

LG Electronic U.S.A., Inc., 1000 Sylvan Avenue, Englewood Cliffs, NJ 07632;

LG Electronics MobileComm U.S.A., Inc., 10101 Old Grove Road, San Diego, CA 92131.

(c) The Commission investigative attorney, party to this investigation, is Anne M. Goalwin, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Suite 401, Washington, DC 20436; and

(3) For the investigation so instituted, the Honorable Paul J. Luckern, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d)–(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: July 8, 2010.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Justice Management Division

[OMB Number 1103–0016]

Agency Information Collection Activities: Proposed collection; comments requested

ACTION: 60-Day Notice of Information Collection Under Review: Certification of Identity.

The Department of Justice (DOJ), Justice Management Division, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for "sixty days" until September 13, 2010. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Stephen K. Myers, 1331 Pennsylvania Avenue, NW., Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency' estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Certification of Identity.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form DOJ–361. Facilities and Administrative Services Staff, Justice Management Division, U.S. Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* American Citizens. *Other:* Federal Government. The information collection will be used by the Department to identify individuals requesting certain records under the Privacy Act. Without this form an individual cannot obtain the information requested.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 27,000 respondents will complete each form within approximately 30 minutes.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated total of 13,500 annual burden hours associated with this collection.

If additional information is required contact: Lynn Bryant, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street, NE., Suite 2E–502, Washington, DC 20530.

Dated: July 7, 2010.

Lynn Bryant,

Department Clearance Officer, PRA, Department of Justice.

BILLING CODE 4410–CW–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (10–076)]

NASA Advisory Council; Commercial Space Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the Commercial Space Committee to the NASA Advisory Council.

DATES: Thursday, July 29, 2010, 9 a.m.–12 p.m., Eastern.

ADDRESSES: NASA Headquarters, 300 E Street, SW., PRC/Room 9H40, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. John Emond, Innovative Partnerships Program, Office of Chief Technologist, National Aeronautics and Space Administration, Washington, DC 20546, at (202) 358–1686, fax: (202) 358–3878, *john.l.emond@nasa.gov.*

SUPPLEMENTARY INFORMATION: The agenda for the meeting is a deliberative session to reflect on the commercial crew and commercial cargo briefings received by the Committee over the past several months and to provide the Committee Chair with input to bring to the next NASA Advisory Council meeting in August. The meeting will be open to the public up to the seating capacity of the room. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants. Visitors will need to show a valid picture identification such as a driver's license to enter the NASA Headquarters building (West Lobby—Visitor Control Center), and must state that they are attending the NASA Advisory Council Commercial Space Committee meeting in the PRC/Room 9H40, before receiving an access badge. All non-U.S citizens must fax a copy of their passport, and print or type their name, current address, citizenship, company affiliation (if applicable) to include address, telephone number, and their title, place of birth, date of birth, U.S. visa information to include type, number, and expiration date, U.S. Social Security Number (if applicable), and place and date of entry into the U.S., fax to John Emond, NASA Advisory Council Commercial Space Committee Executive Secretary, Fax: (202) 358–3878, by no later than July 20, 2010. To expedite admittance, attendees with U.S. citizenship can provide identifying information 3 working days in advance by contacting John Emond via e-mail at *john.l.emond@nasa.gov* or by telephone at (202) 358–1686 or fax: (202) 358–3878.

Dated: July 7, 2010.

P. Diane Rausch,

Advisory Committee Management Office, National Aeronautics and Space Administration.

NUCLEAR REGULATORY COMMISSION

[NRC–2010–0248]

Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations; Biweekly Notice

I. Background

Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (the Commission or NRC) is publishing this regular biweekly notice. The Act requires the Commission publish notice of any amendments issued, or proposed to be issued and grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from June 17, 2010, to June 30, 2010. The last biweekly notice was published on June 29, 2010 (75 FR 37471).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), § 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period should circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. Should the Commission take action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. Should the Commission make a final No Significant Hazards Consideration Determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules, Announcements and Directives Branch (RADB), TWB–05–B01M, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be faxed to the RADB at 301–492–3446. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland.

Within 60 days after the date of publication of this notice, any person(s) whose interest may be affected by this action may file a request for a hearing and a petition to intervene with respect to issuance of the amendment to the subject facility operating license. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested person(s) should consult a current copy of 10 CFR 2.309, which is available at the Commission's PDR, located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address, and telephone number of the requestor or petitioner; (2) the nature of the requestor's/petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the requestor's/petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the requestor's/petitioner's interest. The petition must also identify the specific contentions which the requestor/petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the requestor/petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the requestor/petitioner intends to rely in proving the contention at the hearing. The requestor/petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the requestor/petitioner intends to rely to establish those facts or expert opinion. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to

matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the requestor/petitioner to relief. A requestor/petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC E-Filing rule (72 FR 49139, August 28, 2007). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least ten (10) days prior to the filing deadline, the participant should contact the Office of the Secretary by e-mail at *hearing.docket@nrc.gov*, or by telephone at (301) 415–1677, to request: (1) A digital ID certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a request or petition for hearing (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/apply-certificates.html.* System requirements for accessing the E-Submittal server are detailed in NRC's "Guidance for Electronic Submission," which is available on the agency's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Meta System Help Desk will not be able to offer assistance in using unlisted software.

If a participant is electronically submitting a document to the NRC in accordance with the E-Filing rule, the participant must file the document using the NRC's online, Web-based submission form. In order to serve documents through EIE, users will be required to install a Web browser plug-in from the NRC Web site. Further information on the Web-based submission form, including the installation of the Web browser plug-in, is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.*

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a request for hearing or petition for leave to intervene. Submissions should be in Portable Document Format (PDF) in accordance with NRC guidance available on the NRC public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. e.t. on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an e-mail notice confirming receipt of the document. The E-Filing system also distributes an e-mail notice that provides access to the document to the NRC Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing request/petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the agency's adjudicatory E-Filing system may seek assistance by contacting the NRC Meta System Help Desk through the "Contact Us" link located on the NRC Web site at *http://www.nrc.gov/site-help/e-submittals.html*, by e-mail at *MSHD.Resource@nrc.gov*, or by a toll-free call at (866) 672–7640. The NRC Meta System Help Desk is available between 8 a.m. and 8 p.m., e.t., Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in NRC's electronic hearing docket which is available to the public at *http://ehd.nrc.gov/EHD_Proceeding/home.asp*, unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in

their filings, unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

Petitions for leave to intervene must be filed no later than 60 days from the date of publication of this notice. Non-timely filings will not be entertained absent a determination by the presiding officer that the petition or request should be granted or the contentions should be admitted, based on a balancing of the factors specified in 10 CFR 2.309(c)(1)(i)–(viii).

For further details with respect to this license amendment application, see the application for amendment which is available for public inspection at the Commission's PDR, located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the ADAMS Public Electronic Reading Room on the Internet at the NRC Web site, *http://www.nrc.gov/reading-rm/adams.html.* Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr.resource@nrc.gov.*

Duke Energy Carolinas, LLC, et al., Docket No. 50–414, Catawba Nuclear Station, Unit 2, York County, South Carolina

Date of amendment request: April 28, 2010.

Description of amendment request: The amendment would revise Technical Specification (TS) 5.5.9 to exclude portions of the Steam Generator (SG) tube from periodic SG tube inspections and plugging or repair. In addition, reporting requirement changes are proposed to TS 5.6.8. This submittal is requesting a one-cycle approval for the Catawba Nuclear Station, Unit 2, End of Cycle 17 Refueling Outage and subsequent Cycle 18 operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Criterion 1: Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No. The proposed changes to TS 5.5.9, TS 5.6.8, and the Facility Operating License have no significant effect upon accident probabilities or consequences. Of the various accidents previously evaluated, the following are limiting with respect to the proposed changes as discussed in this amendment request:

- SG Tube Rupture evaluation
- Steam Line Break/Feed Line Break evaluation
- Locked Rotor evaluation
- Control Rod Ejection evaluation

Loss of Coolant Accident conditions cause a compressive axial load to act on the tube. Therefore, since this accident tends to force the tube into the tubesheet rather than pull it out, it is not a factor in this amendment request. Another faulted load consideration is a safe Shutdown Earthquake; however, the seismic analysis of Model D5 SGs (the SGs at Catawba) has shown that axial loading of the tubes is negligible during this event.

At normal operating pressures, leakage from Primary Water Stress Corrosion Cracking (PWSCC) below 16.95 inches from the top of the tubesheet is limited by both the tube-to-tubesheet crevice and the limited crack opening permitted by the tubesheet constraint. Consequently, negligible normal operating leakage is expected from cracks within the tubesheet region.

For the SG Tube Rupture event, tube rupture is precluded for cracks in the hydraulic expansion region due to the constraint provided by the tubesheet. Therefore, the margin against tube burst/pullout is maintained during normal and postulated accident conditions and the proposed change does not result in a significant increase in the probability of a tube rupture. SG Tube Rupture consequences are not affected by the primary to secondary leakage flow during the event, as primary to secondary leakage flow through a postulated tube that has been pulled out of the tubesheet is essentially equivalent to that from a severed tube. Therefore, the proposed change does not result in a significant increase in the consequences of a tube rupture.

The probability of a Steam Line Break/Feed Line Break, Locked Rotor, and Control Rod Ejection are not affected by the potential failure of a SG tube, as the failure of a tube is not an initiator for any of these events. In WCAP–17072–P, leakage is modeled as flow through a porous medium via the use of the Darcy equation. The leakage model is used to develop a relationship between operational leakage and leakage at accident conditions that is based on differential pressure across the tubesheet and the viscosity of the fluid. A leak rate ratio was developed to relate the leakage at operating conditions to leakage at accident conditions. The fluid viscosity is based on fluid temperature and it has been shown that for the most limiting accident, the fluid temperature does not exceed the normal operating temperature. Therefore, the viscosity ratio is assumed to be 1.0 and the leak rate ratio is a function of the ratio of the accident differential pressure and the normal operating differential pressure.

The leakage factor of 2.65 for Catawba Unit 2 for a postulated Steam Line Break/Feed Line Break has been calculated as shown in WCAP–17072–P, as supplemented. The leakage factor has been increased to 3.27 per additional Westinghouse analysis specific to Catawba. Therefore, Catawba Unit 2 will apply a factor of 3.27 to the normal operating leakage associated with the tubesheet expansion region in the Condition Monitoring assessment and Operational Assessment. Through application of the limited tubesheet inspection scope, the proposed operating leakage limit provides assurance that excessive leakage (i.e., greater than accident analysis assumptions) will not occur. No leakage factor will be applied to the Locked Rotor or Control Rod Ejection due to their short duration, since the calculated leak rate ratio is less than 1.0. Therefore, the proposed change does not result in a significant increase in the consequences of these accidents.

For the Condition Monitoring assessment, the component of leakage from the prior cycle from below the H* distance will be multiplied by a factor of 3.27 and added to the total leakage from any other source and compared to the allowable accident induced leakage limit. For the Operational Assessment, the difference in the leakage between the allowable leakage and the accident induced leakage from sources other than the tubesheet expansion region will be divided by 3.27 and compared to the observed operational leakage.

Based on the above, the performance criteria of NEI 97–06, Revision 2 and RG [Regulatory Guide] 1.121 continue to be met and the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Criterion 2: Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No. The proposed changes to TS 5.5.9, TS 5.6.8, and the Facility Operating License do not introduce any changes or mechanisms that create the possibility of a new or different kind of accident. Tube bundle integrity is expected to be maintained for all plant conditions upon implementation of the one-cycle alternate repair criteria. The proposed change does not introduce any new equipment or any change to existing equipment. No new effects on existing equipment are created nor are any new malfunctions introduced.

Therefore, based on the above evaluation, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Criterion 3: Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No. The proposed changes to TS 5.5.9, TS 5.6.8, and the Facility Operating License maintain the required structural margins of the SG tubes for both normal and accident conditions. NEI 97–06, Revision 2 and RG 1.121 are used as the basis in the development of the limited tubesheet inspection depth methodology for determining that SG tube integrity considerations are maintained within acceptable limits. RG 1.121 describes a

method acceptable to the NRC staff for meeting GDC [General Design Criteria] 14, 15, 31, and 32 by reducing the probability and consequences of a SG Tube Rupture. RG 1.121 concludes that by determining the limiting safe conditions for tube wall degradation, the probability and consequences of a SG Tube Rupture are reduced. This RG uses safety factors on loads for tube burst that are consistent with the requirements of Section III of the ASME [American Society of Mechanical Engineers] Code [Boiler and Pressure Vessel Code].

For axially oriented cracking located within the tubesheet, tube burst is precluded due to the presence of the tubesheet. For circumferentially oriented cracking, WCAP–17072–P defines a length of degradation-free expanded tubing that provides the necessary resistance to tube pullout due to the pressure-induced forces, with applicable safety factors applied. Application of the limited hot and cold leg tubesheet inspection criteria will preclude unacceptable primary to secondary leakage during all plant conditions. The methodology for determining leakage as described in WCAP–17072–P shows that significant margin exists between an acceptable level of leakage during normal operating conditions that ensures meeting the accident induced leakage assumption and the TS leakage limit.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Ms. Kate Nolan, Associate General Counsel and Managing Attorney, Duke Energy Carolinas, LLC, 422 South Church Street, Mail Code—EC07H, P.O. Box 1244, Charlotte, NC 28201–1244.

NRC Branch Chief: Gloria Kulesa.

Florida Power and Light Company, Docket Nos. 50–250 and 50–251, Turkey Point Plant, Units 3 and 4, Miami-Dade County, Florida

Date of amendment request: June 25, 2009, as supplemented May 21, 2010.

Description of amendment request: Revise the licensing bases to adopt the alternative source term as allowed in Title 10 of the Code of Federal Regulations, § 50.67.

An application that addressed similar issues was previously submitted on June 25, 2009, and noticed in the **Federal Register** (FR) on December 29, 2009 (74 FR 68870). Due to certain changes in the specifics stated in the May 21, 2010, supplement, from those proposed in the June 25, 2009, application, this is a renotice that includes those changes. Below is the no significant hazards consideration determination (NSHCD) for the changes in the May 21, 2010 supplemental. The original NSHCD as published in the FR December 29, 2009, still applies to the June 25, 2009 application.

Basis for proposed NSHCD: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes to [technical specification] TS 4.4.8 will only provide for better assurance of required sampling and analysis of the reactor coolant system specific activity during thermal power changes and transient conditions (MODES 1, 2, 3, and 4). This will ensure potential consequences of a [defined-basis accident] DBA are bounded by the approved accident analyses.

The proposed changes to TS 3/4.7.5 itemize the system operability requirements and appropriate actions in the event that those requirements are not satisfied. These actions include actions to be taken during the allowed outage times (AOTs) specified in the actions to bring the system back into compliance with the system operability requirements. The actions also provide for restoration of the inoperable component or in some cases provide for placing and maintaining it in a safe condition until it can be restored. The actions may include compensatory measures that require initiation of mitigating actions involving operator action to manually align and place into service a compensatory filtration unit in the event that the normal filtration train is out-of-service. These compensatory measures are required to be taken within 24 hours compared to the current allowed outage time of 84 hours for system inoperability without any compensatory measures specified. Moreover, consistent with the current Turkey Point TS and TSTF–448 AOTs, manually aligning the compensatory filter within 24 hours to maintain [control room emergency ventilation system] CREVS operability is acceptable in order to ensure control room operations will be protected from analyzed radiological hazards. The other action statements for inoperability of a redundant active component provide for an AOT of 7 days consistent with the Westinghouse Standard Technical Specification. They are based on the low probability of occurrence of a DBA challenging the Control Room Habitability during this time period and the continued capability of the remaining system components to perform the required CREVS safety function.

The proposed changes have no effect on the probability of an accident previously evaluated as they do not affect any accident initiators. The proposed changes have no significant effect on the consequences of an accident previously evaluated as they either provide for better monitoring of plant operating parameters or for compensatory actions to be taken for out-of-service equipment not previously available. Design changes to enhance the system capabilities will be made to the same design and quality standards as the existing CREVS. System modifications required to support these proposed changes are evaluated under the 10 CFR 50.59 program and are enhancements to the mitigation strategies.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes to TS 4.4.8 will only provide for better assurance of required sampling and analysis of the reactor coolant system specific activity during MODES 1, 2, 3, and 4. The proposed modifications to the plant configuration will be fully qualified to the appropriate design requirements to assure their required function is available for accident mitigation. Additionally, functions of other equipment required for accident mitigation are also not adversely impacted. Design changes to enhance the system capabilities will be made to the same design and quality standards as the existing CREVS. The proposed changes to TS 3/4.7.5 will provide for better specification of system operability requirements and appropriate actions in the event that those requirements are not satisfied. The proposed changes have no effect on accident precursors or initiators and only enhance mitigation capabilities with regard to protecting control room personnel from radiological hazards.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed amendment does not involve a significant reduction in the margin of safety.

The proposed changes to TS 4.4.8 will only provide for better assurance of required sampling and analysis of the reactor coolant system specific activity during thermal power changes and transient conditions (MODES 1, 2, 3, and 4). No plant system or component design or operational requirements are affected by these changes.

The proposed changes to TS 3/4.7.5 will provide for better specification of system operability requirements and appropriate actions in the event that those requirements are not satisfied. The proposed increase in the specified AOT for inoperability of CREVS components from 84 hours to 7 days is considered insignificant as it is consistent with the Westinghouse Standard Technical Specification and based on the low probability of occurrence of a DBA challenging the Control Room Habitability during this time period and the continued capability of the remaining system components to perform the required CREVS safety function. Moreover, consistent with the current Turkey Point TS and TSTF-448 AOTs, manually aligning the compensatory filter within 24 hours to maintain CREVS operability is an acceptable margin of safety to ensure control room operations will be protected from analyzed radiological hazards. The proposed changes provide for compensatory actions to be taken for out-of-service equipment that were not previously

available and thus enhance existing mitigation capabilities with regard to protecting control room personnel from radiological hazards.

Therefore, the proposed change does not involve a significant reduction in the margin of safety.

Based on the above discussion, FPL has determined that the proposed change does not involve a significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of § 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: M.S. Ross, Attorney, Florida Power & Light, P.O. Box 14000, Juno Beach, Florida 33408–0420.

NRC Branch Chief: Douglas A. Broaddus.

NextEra Energy Seabrook, LLC Docket No. 50–443, Seabrook Station, Unit No. 1, Rockingham County, New Hampshire

Date of amendment request: May 14, 2010.

Description of amendment request: The proposed changes would revise the Seabrook Station Technical Specifications (TSs) governing the Containment Enclosure Emergency Air Cleanup System. Specifically, the proposed change would insert a requirement that if both trains of the system are inoperable, at least one train must be returned to operable status within 24 hours or begin a shutdown of the reactor. Currently, since there are no limiting conditions for operation proscribed actions in the event two trains are inoperable, TS 3.0.3 requires a shutdown within 6 hours.

Basis for proposed NSHC determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of NSHC, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not impact the physical function of plant structures, systems, or components (SSCs) or the manner in which SSCs perform their design function. The proposed changes neither adversely affect accident initiators or precursors, nor alter design assumptions. The proposed changes do not alter or prevent the ability of operable [SSCs] to perform their intended function to mitigate the consequences of an initiating event within the assumed acceptance limits.

This change is a revision to the technical specifications (TS[s]) for the containment enclosure emergency air cleanup system (CEEACS), which is a mitigation system designed to prevent uncontrolled releases of radioactivity into the environment. The change would allow intermittent opening of the containment enclosure boundary under administrative controls. These controls would ensure that the opening will be quickly sealed to maintain the validity of the licensing basis analyses of accident consequences. The proposed change adds a new action requirement that would allow 24 hours to restore the containment enclosure boundary in the event that both trains of the CEEACS are inoperable due to an inoperable containment enclosure boundary. The proposed 24 hour completion time is reasonable based on the low probability of a design basis accident occurring during this time period and the use of preplanned compensatory measures. The CEEACS is not an initiator or precursor to any accident previously evaluated. Therefore, the probability of any accident previously evaluated is not increased.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change will not impact the accident analysis. The changes will not alter the requirements of the CEEACS or its function during accident conditions, and no new or different accidents result from the proposed changes to the TS[s]. The changes do not involve a physical alteration of the plant (i.e., no new or different type of equipment will be installed) or a significant change in the method of plant operation. The changes do not alter assumptions made in the safety analysis. Therefore, this request does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

Margin of safety is associated with confidence in the ability of the fission product barriers (i.e., fuel cladding, reactor coolant system pressure boundary, and containment structure) to limit the level of radiation dose to the public. The proposed changes do not involve a significant change in the method of plant operation, and no accident analyses will be affected by the proposed changes. Additionally, the proposed changes will not relax any criteria used to establish safety limits, will not relax any safety system settings, and will not relax the bases for any limiting conditions for operation. The safety analysis acceptance criteria are not affected by this change. The proposed change will not result in plant operation in a configuration outside the design bases. The proposed change does not adversely affect systems that respond to safely shutdown the plant and to maintain the plant in a safe shutdown condition. Therefore, these proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, and with the changes noted above, it appears that the three standards of §50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves NSHC.

Attorney for licensee: M.S. Ross, Florida Power & Light Company, P.O. Box 14000, Juno Beach, FL 33408–0420.

NRC Branch Chief: Harold K. Chernoff.

Nine Mile Point Nuclear Station, LLC, (NMPNS) Docket No. 50–220, Nine Mile Point Nuclear Station Unit No. 1 (NMP1), Oswego County, New York

Date of amendment request: March 18, 2010.

Description of amendment request: The proposed amendment would revise the NMP1 Technical Specifications (TSs) for inoperable snubbers by removing TS 3/4.6.4, "Shock Suppressors (Snubbers)," and would also add a new Limiting Condition for Operation (LCO) 3.0.8.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change to relocate TS 3/4.6.4 to station procedures is administrative in nature and does not involve the modification of any plant equipment or affect basic plant operation. Snubber operability and surveillance requirements will be contained in the station procedures to ensure design assumptions for accident mitigation are maintained.

The proposed change to add LCO 3.0.8 allows a delay time for entering a supported system TS when the inoperability is due solely to an inoperable snubber if risk is assessed and managed. Entrance into TS actions or delaying entrance into actions is not an initiator of any accident previously evaluated. Consequently, the probability of an accident previously evaluated is not significantly increased. The consequences of an accident while relying on allowance provided by proposed LCO 3.0.8 are no different than the consequences of an accident while relying on the current TS required actions in effect without the allowance provided by proposed LCO 3.0.8.

Revision of TS Table of Contents to reflect deletion of TS 3/4.6.4 is administrative in nature and therefore does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of

accident from any accident previously evaluated?

Response: No.

The proposed change to relocate TS 3/4.6.4 to station procedures is administrative and does not involve any physical alteration of plant equipment. The proposed change does not change the method by which any safety related system performs its function. As such, no new or different types of equipment will be installed, and the basic operation of installed equipment is unchanged. The methods governing plant operation and testing remain consistent with current safety analysis assumptions. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change to add LCO 3.0.8 does not involve a physical alteration of the plant (no new or different type of equipment will be installed). Allowing delay times for entering supported system TSs when inoperability is due solely to inoperable snubbers, if risk is assessed and managed, will not introduce new failure modes or effects.

Revision of TS Table of Contents to reflect deletion of TS 3/4.6.4 is administrative in nature and therefore does not create the possibility of a new or different kind of accident from any previously evaluated.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed change to relocate TS 3/4.6.4 to station procedures is administrative in nature, does not negate any existing requirement, and does not adversely affect existing plant safety margins or the reliability of the equipment assumed to operate in the safety analysis. As such, there are no changes being made to safety analysis assumptions, safety limits or safety system settings that would adversely affect plant safety as a result of the proposed change. Margins of safety are unaffected by requirements that are retained, but relocated from the TSs to station procedures.

The proposed change to add LCO 3.0.8 to TSs allows a delay time before declaring supported TS systems inoperable when the associated snubber(s) cannot perform the required safety function. The proposed change retains an allowance in the current NMPI TSs while upgrading it to be more conservative for snubbers supporting multiple trains or sub-systems of an associated system. The updated TS will continue to provide an adequate margin of safety for plant operation upon incorporation of LCO 3.0.8. The station design and safety analysis assumptions provide margin in the form of redundancy to account for periods of time when system capability is reduced.

Revision of TS Table of Contents to reflect deletion of TS 3/4.6.4 is administrative in nature and therefore does not involve a significant reduction in a margin of safety.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Carey W. Fleming, Senior Counsel, Constellation Energy Nuclear Group, LLC, 100 Constellation Way, Suite 200C, Baltimore, MD 21202.

NRC Branch Chief: Nancy L. Salgado.

Nine Mile Point Nuclear Station, LLC, (NMPNS) Docket No. 50–220, Nine Mile Point Nuclear Station Unit No. 1 (NMP1), Oswego County, New York

Date of amendment request: March 22, 2010.

Description of amendment request: The proposed amendment would revise the NMP1 Technical Specifications (TSs) section 4.3.7 "Containment Spray System," by modifying the testing frequency for the Surveillance Requirement (SR) 4.3.7.b, "Nozzles," from "at least once per operating cycle * * *" to "following maintenance that could result in nozzle blockage." Additional wording changes would be made to the SR to make it more consistent with the corresponding Standard TS, SR 3.6.1.7.4.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change modifies the SR to verify that the Containment Spray System (CSS) drywell and torus spray nozzles are unobstructed after maintenance that could introduce material resulting in nozzle blockage. The requirement to test the headers will be removed as well as the type of test to be used. Since the opening within the pipes is much larger than the nozzles, they are not likely to become obstructed unless the nozzles become obstructed. The spray nozzles and headers are not assumed to be initiators of any previously analyzed accident. Therefore, the proposed change does not increase the probability of any accident previously evaluated. The spray nozzles are used in the accident analyses to mitigate design basis accidents. The revised SR to verify system operability following maintenance is considered adequate to ensure operability of the CSS. Since the system will still be able to perform its accident mitigation function, the consequences of accidents previously evaluated are not increased.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change revises the SR to verify that the CSS nozzles are unobstructed after maintenance that could result in nozzle blockage. The requirement to test the headers will be removed as well as the type of test to be used. The spray nozzles and headers are not assumed to be initiators of any previously analyzed accident. The change does not introduce a new mode of plant operation and does not involve a physical modification to the plant. The change will not introduce new accident initiators or impact the assumptions made in the safety analysis.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed change revises the frequency for performance of the SR to verify that the CSS nozzles are unobstructed. The frequency is changed from "once per operating cycle" to "following maintenance that could result in nozzle blockage." The requirement to test the headers will be removed as well as the type of test to be used. The revised testing requirement, along with the foreign material exclusion program, the normal environmental conditions for the system, and the remote physical location of the spray nozzles, provide assurance that the spray nozzles and headers will remain unobstructed. As the spray nozzles and headers are expected to remain unobstructed and able to perform their post-accident mitigation function, plant safety is not significantly affected.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Carey W. Fleming, Senior Counsel, Constellation Energy Nuclear Group, LLC, 100 Constellation Way, Suite 200C, Baltimore, MD 21202.

NRC Branch Chief: Nancy L. Salgado.

Nine Mile Point Nuclear Station, LLC, (NMPNS) Docket No. 50–410, Nine Mile Point Nuclear Station Unit No. 2 (NMP2), Oswego County, New York

Date of amendment request: March 30, 2010, as supplemented on June 1, 2010.

Description of amendment request: The proposed amendment would revise the NMP2 Technical Specification (TS) section 3.8.1, "AC Sources—Operating," to extend the Completion Time (CT) for an inoperable Division 1 or Division 2 diesel generator (DG) from 72 hours to 14 days.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed TS change to increase the CT for an inoperable Division 1 or Division 2 DG from 72 hours to 14 days does not affect the design, function, operational characteristics, or reliability of the DGs. The DGs are designed to mitigate the consequences of previously evaluated accidents and, as such, are not accident initiators.

Extending the CT for an inoperable DG will not significantly affect the capability of the DGs to perform their accident mitigation safety functions or adversely affect DG or offsite power availability. The consequences of previously evaluated accidents will not be significantly affected since the remaining DGs supporting the redundant Engineered Safety Feature (ESF) systems will continue to be available to perform the accident mitigation functions as designed.

Both a deterministic evaluation and a risk impact assessment were performed to support the proposed DG CT extension. The deterministic evaluation concluded that the defense-in-depth philosophy will be maintained with the proposed DG CT extension. The current TS and 10 CFR 50.65 (Maintenance Rule) programmatic requirements and additional administrative controls provide assurance that a loss of offsite power occurring concurrent with an inoperable DG will not result in a complete loss of function of critical systems. The duration of the proposed DG CT is determined considering that there is a minimal possibility that an accident will occur while a component is removed from service. A risk impact assessment was performed which concluded that the increase in plant risk due to the increased DG CT is small and consistent with the guidance contained in Regulatory Guide 1.177, "An Approach for Plant-Specific, Risk-Informed Decisionmaking: Technical Specifications."

Based on the above discussion, it is concluded that the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed amendment does not alter the design, configuration, or method of operation of the plant, and does not alter any safety analysis inputs or assumptions. The proposed extended DG CT will not reduce the number of DGs below the minimum required for safe shutdown or accident mitigation. No new component failure modes, system interactions, or accident responses will be created that could result in a new or different kind of accident from any accident previously evaluated.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed extension of the DG CT remains consistent with codes and standards applicable to the onsite alternating current (AC) sources, except that the extension deviates from the recommendations of Regulatory Guide 1.93, "Availability of Electric Power Sources." The proposed amendment is justified based on the results of a deterministic evaluation and a risk impact assessment. These demonstrate that the defense-in-depth philosophy will be maintained and the increase in plant risk is small and consistent with the guidance contained in Regulatory Guide 1.177.

The DG reliability and availability are monitored and evaluated with respect to Maintenance Rule performance criteria to assure DG out of service times do not degrade operational safety over time. Furthermore, extension of the DG CT does not affect any safety analysis inputs or assumptions and will not erode the reduction in severe accident risk that was achieved with implementation of the Station Blackout (SBO) rule (10 CFR 50.63). The SBO coping analysis is unaffected by the CT extension since the DGs are not assumed to be available during the coping period. The assumptions used in the coping analysis regarding DG reliability are unaffected since preventive maintenance and testing will continue to be performed to maintain the reliability assumptions.

Based on the above discussion, it is concluded that the proposed amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Carey W. Fleming, Senior Counsel, Constellation Energy Nuclear Group, LLC, 100 Constellation Way, Suite 200C, Baltimore, MD 21202

NRC Branch Chief: Nancy L. Salgado.

Notice of Issuance of Amendments to Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The applications for amendment; (2) the amendment; and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area 01F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, *http://www.nrc.gov/reading-rm/adams.html*. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the PDR Reference staff at 1 (800) 397–4209, (301) 415–4737 or by e-mail to pdr.resource@nrc.gov.

Carolina Power & Light Company, et al., Docket No. 50–400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: May 29, 2009, as supplemented by letters dated November 14, 2008, December 11, 2008, August 13, 2009, August 28, 2009, October 9, 2009, February 4, 2010, and April 5, 2010.

Brief description of amendment: The proposed amendment transitions the existing fire protection program to a risk-informed, performance-based program based on National Fire Protection Association Standard 805 (NFPA 805), "Performance-Based Standard for Fire Protection for Light Water Reactor Electric Generating Plants," 2001 Edition, in accordance with Title 10 of the Code of Federal Regulations, § 50.48(c). NFPA 805 allows the use of performance-based methods, such as fire modeling and fire risk evaluations, to demonstrate compliance with the nuclear safety performance criteria.

Date of issuance: June 28, 2010.

Effective date: Effective as of the date of issuance and shall be implemented within 180 days, contingent upon completion of the items identified in section 2.9 of the associated NRC Safety Evaluation.

Amendment No.: 133.

Renewed Facility Operating License No. NPF–63: The amendment revises the Technical Specifications and Facility Operating License.

Date of initial notice in **Federal Register:** June 19, 2009 (74 FR 29241). The supplements dated November 14, 2008, December 11, 2008, August 13, 2009, August 28, 2009, October 9, 2009, February 4, 2010, and April 5, 2010 provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

Public comments requested as to proposed no significant hazards consideration (NSHC): No.

The Commission's related evaluation of the amendment and final NSHC determination are contained in a safety evaluation dated June 28, 2010.

Duke Energy Carolinas, LLC, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: October 2, 2008, as supplemented by letters dated August 25, 2009, and October 23, 2009.

Brief description of amendments: The amendments revise the Technical Specifications (TSs) associated with the verification of ice condenser door operability and TS surveillance requirements 3.6.13.5 and 3.6.13.6.

Date of issuance: June 28, 2010.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment Nos.: 256 and 251.

Facility Operating License Nos. NPF–35 and NPF–52: Amendments revised the licenses and the technical specifications.

Date of initial notice in **Federal Register**: March 8, 2010 (75 FR 10513). The supplements dated August 25, 2009, and October 23, 2009, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 28, 2010.

No significant hazards consideration comments received: No.

Duke Energy Carolinas, LLC, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: September 2, 2008, as supplemented by letters dated June 18, 2009, July 8, 2009, August 13, 2009, September 8, 2009, November 10, 2009 and March 8, 2010.

Brief description of amendments: The amendments revised the technical specifications to allow manual operation of the containment spray system and to revise the upper and lower limits of the refueling water storage tank.

Date of issuance: June 28, 2010.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment Nos.: 257 and 252.

Facility Operating License Nos. NPF–35 and NPF–52: Amendments revised the licenses and the Technical Specifications.

Date of initial notice in **Federal Register:** April 7, 2009 (74 FR 15767). The supplements dated June 18, 2009, July 8, 2009, August 13, 2009, September 8, 2009, November 10, 2009, and March 8, 2010, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the NRC staff's original proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 28, 2010.

No significant hazards consideration comments received: No.

Duke Power Company LLC, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: October 2, 2008, as supplemented by letters dated August 25, 2009, and October 23, 2009.

Brief description of amendments: The amendments revised the Technical Specifications (TSs) associated with the verification of ice condenser door operability and TS surveillance requirements 3.6.13.5 and 3.6.13.6.

Date of issuance: June 28, 2010.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment Nos.: 256 and 236.

Renewed Facility Operating License Nos. NPF–9 and NPF–17: Amendments revised the licenses and the technical specifications.

Date of initial notice in **Federal Register:** March 8, 2010 (75 FR 10508). The supplements dated August 25, 2009, and October 23, 2009, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 28, 2010.

No significant hazards consideration comments received: No.

Entergy Nuclear Operations, Inc., Docket No. 50–286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of application for amendment: July 23, 2009.

Brief description of amendment: The amendment removed the local refueling water storage tank level indication from Technical Specification Surveillance Requirement 3.5.4.5.

Date of issuance: June 28, 2010.

Effective date: As of the date of issuance, and shall be implemented within 30 days.

Amendment No.: 241.

Facility Operating License No. DPR–64: The amendment revised the License and the Technical Specifications.

Date of initial notice in **Federal Register**: October 6, 2009 (74 FR 51329).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 28, 2010.

No significant hazards consideration comments received: No.

FirstEnergy Nuclear Operating Company, et al., Docket No. 50–440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of application for amendment: June 30, 2009, as supplemented by letter dated May 24, 2010.

Brief description of amendment: This amendment revises the Surveillance Requirement (SR) regarding the start time tests for the Division 3 Emergency Diesel Generator to provide consistency with existing similar Technical Specification (TS) 3.8.1 "AC Sources—Operating" SRs and the time provided in the licensing basis emergency core cooling system analyses.

Date of issuance: June 30, 2010.

Effective date: As of the date of issuance and shall be implemented within 120 days.

Amendment No.: 154.

Facility Operating License No. NPF–58: This amendment revised the TSs and License.

Date of initial notice in **Federal Register**: November 17, 2009 (74 FR 59261). The supplement dated May 24, 2010 provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 30, 2010.

No significant hazards consideration comments received: No.

Indiana Michigan Power Company (IandM), Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Units 1 and 2 (CNP–1 and CNP–2), Berrien County, Michigan

Date of application for amendment: January 14, 2009 as supplemented by letters dated October 30, 2009, and March 19, 2010.

Brief description of amendment: The amendment modifies the Operating License, Condition 2.C.(2), Appendix B, Environmental Technical Specifications, Part II, "Non-Radiological Environmental Protection Plan." The amendment deletes outdated program information and relieves I&M from preparing and submitting unnecessary or duplicative environmental reports.

Date of issuance: June 24, 2010.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment Nos.: 312 (CNP–1), 295 (CNP–2).

Facility Operating License Nos. DPR–58 and DPR–74: Amendments revised the Renewed Operating Licenses and Technical Specifications.

Date of initial notice in **Federal Register**: May 5, 2009 (74 FR 20749).

The supplemental information dated October 30, 2009, and March 19, 2010, contained clarifying information, did not change the scope of January 14, 2009, application or the initial no significant hazards consideration determination, and does not expand the scope of the original **Federal Register** notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 24, 2010.

No significant hazards consideration comments received: No.

Nine Mile Point Nuclear Station, LLC, Docket No. 50–410, Nine Mile Point Nuclear Station, Unit No. 2 (NMP2), Oswego County, New York

Date of application for amendment: December 18, 2009.

Brief description of amendment: The amendment changes the NMP2 Technical Specifications (TSs) for unavailable barriers by adding Limiting Condition for Operation (LCO) 3.0.9. LCO 3.0.9 establishes conditions under which a supported system would remain operable when required physical barriers are not capable of providing their related support function. The submitted change is consistent with the industry Technical Specifications Task Force (TSTF) Traveler TSTF–427, Revision 2, "Allowance for Non Technical Specification Barrier Degradation on Supported System OPERABILITY." A notice of the TSTF–427, Revision 2 TS improvement was published in the **Federal Register** on October 3, 2006 (71 FR 58444) as part of the Consolidated Line Item Improvement Process.

Date of issuance: June 29, 2010.

Effective date: As of the date of issuance to be implemented within 60 days.

Amendment No.: 135.

Renewed Facility Operating License No. NPF–069: The amendment revises the License and TSs.

Date of initial notice in **Federal Register**: April 6, 2010 (75 FR 17445).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 29, 2010.

No significant hazards consideration comments received: No.

Nine Mile Point Nuclear Station, LLC, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1 (NMP1), Oswego County, New York

Date of application for amendment: July 2, 2009.

Brief description of amendment: The amendment revises the TSs by removing position indication for the relief valves and safety valves from TS 3.6.11, "Accident Monitoring Instrumentation." The amendment would also correct an editorial error in the title of Table 4.6.11, "Accident Monitoring Instrumentation Surveillance Requirement."

Date of issuance: June 29, 2010.

Effective date: As of the date of issuance to be implemented within 60 days.

Amendment No.: 205.

Renewed Facility Operating License No. NPF–069: The amendment revises the License and TSs.

Date of initial notice in **Federal Register**: October 14, 2009 (74 FR 52826).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 29, 2010.

No significant hazards consideration comments received: No.

Northern States Power Company—Minnesota, Docket Nos. 50–282 and 50–306, Prairie Island Nuclear Generating Plant, Units 1 and 2, Goodhue County, Minnesota

Date of application for amendments: November 4, 2008, as supplemented by letters dated August 10, 2009, and March 30, 2010.

Brief description of amendments: The amendments modify the technical specifications (TSs) and facility operating licenses by increasing the 24-month test load for the Unit 1 emergency diesel generators (EDGs) and decrease the 24-month test load for the Unit 2 EDGs in TS Surveillance Requirement 3.8.1.9.

Date of issuance: June 21, 2010.

Effective date: As of the date of issuance and shall be implemented within 90 days.

Amendment Nos.: 196, 185.

Facility Operating License Nos. DPR–42 and DPR–60: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: January 27, 2009 (74 FR 4774).

The supplemental letters contained clarifying information, did not change the initial no significant hazards consideration determination, and did not expand the scope of the original **Federal Register** notice.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 21, 2010.

No significant hazards consideration comments received: No.

PSEG Nuclear LLC, Docket No. 50–354, Hope Creek Generating Station, Salem County, New Jersey

Date of application for amendment: July 30, 2009.

Brief description of amendment: The amendment relocates the Technical Specification (TS) surveillance requirement for the reactor recirculation system motor-generator set scoop tube stop settings to the Technical Requirements Manual.

Date of issuance: June 28, 2010.

Effective date: As of the date of issuance, to be implemented within 60 days.

Amendment No.: 181.

Facility Operating License No. NPF–57: The amendment revised the TSs and the License.

Date of initial notice in **Federal Register**: October 6, 2009 (74 FR 51333).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 28, 2010.

No significant hazards consideration comments received: No.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of application for amendments: August 10, 2009.

Brief description of amendments: The amendment modified Technical Specification 3.7.5, "Auxiliary Feedwater (AFW) System," to allow a 7-day Completion Time for the turbine-driven AFW pump if the inoperability of the pump occurs in MODE 3 following a refueling outage, and if MODE 2 has not been entered. This change is consistent with the U.S. Nuclear Regulatory Commission-approved Technical Specification Task Force (TSTF) traveler, TSTF–340, Revision 3.

Date of issuance: June 30, 2010.

Effective date: As of its date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment Nos.: Unit 2–223; Unit 3–216.

Facility Operating License Nos. NPF–10 and NPF–15: The amendments revised the Facility Operating Licenses and Technical Specifications.

Date of initial notice in **Federal Register**: November 17, 2009 (74 FR 59263).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 30, 2010.

No significant hazards consideration comments received: No.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: May 4, 2009.

Brief description of amendment: The amendment revised Technical Specification (TS) 3.7.3, "Main Feedwater Isolation Valves (MFIVs) and Main Feedwater Regulating Valves (MFRVs) and Main Feedwater Regulating Valve Bypass Valves (MFRVBVs)," so that the Limiting Condition for Operation (LCO) and Applicability more accurately reflect the conditions for when the LCO should be applicable and more effectively provide appropriate exceptions to the Applicability for certain valve configurations. The amendment also changed the title of TS 3.7.3 to "Main Feedwater Isolation Valves (MFIVs), Main Feedwater Regulating Valves (MFRVs), and Main Feedwater Regulating Valve Bypass Valves (MFRVBVs)," and the associated page header to "MFIVs, MFRVs, and MFRVBVs." In addition, the amendment revised footnotes to TS 3.3.2, "Engineered Safety Feature Actuation System (ESFAS) Instrumentation," Table 3.3.2–1, in order to improve application of existing notes and/or incorporate more appropriate notes.

Date of issuance: June 29, 2010.

Effective date: As of its date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment No.: 198.

Facility Operating License No. NPF–30: The amendment revised the Operating License and Technical Specifications.

Date of initial notice in **Federal Register**: August 25, 2009 (74 FR 42932).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 29, 2010.

No significant hazards consideration comments received: No.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: July 10, 2009.

Brief description of amendment: The amendment deletes the Technical Specification (TS) requirements for the containment hydrogen recombiners and relaxes the requirements for hydrogen and oxygen monitors. The TS changes support implementation of the revisions to Title 10 of the Code of Federal Regulations (10 CFR) § 50.44, "Combustible gas control for nuclear power reactors," that became effective on October 16, 2003. The changes are consistent with Revision 1 of the NRC-approved Industry/Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler, TSTF–447, "Elimination of Hydrogen Recombiners and Change to Hydrogen and Oxygen Monitors." This operating license improvement was made available by the NRC on September 25, 2003 (68 FR 55416), as part of the consolidated line item improvement process. In addition, the amendment corrected four typographical errors in the TSs.

Date of issuance: June 29, 2010.

Effective date: As of its date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment No.: 199.

Facility Operating License No. NPF–30: The amendment revised the Operating License and Technical Specifications.

Date of initial notice in **Federal Register**: August 25, 2009 (74 FR 42934).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 29, 2010.

No significant hazards consideration comments received: No.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: June 1, 2009, as supplemented by letters dated August 27, 2009, and March 4, 2010.

Brief description of amendment: The amendment revised the Limiting Condition for Operation (LCO) Applicability Note for Technical Specification (TS) 3.3.9, "Boron Dilution Mitigation System (BDMS)." The LCO Applicability Note was revised to clarify the situations during which the BDMS signal may be blocked in MODES 2 and 3.

Date of issuance: June 29, 2010.

Effective date: As of its date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment No.: 200.

Facility Operating License No. NPF–30: The amendment revised the Operating License and Technical Specifications.

Date of initial notice in **Federal Register**: August 25, 2009 (74 FR

42933). The supplemental letters dated August 27, 2009, and March 4, 2010, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 29, 2010.

No significant hazards consideration comments received: No.

Dated at Rockville, Maryland, this 1st day of July 2010.

For the Nuclear Regulatory Commission.

Joseph G. Giitter,

Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2010–0178; Docket No. 50–228; License No. R–98]

In the Matter of Aerotest Operations, Inc. (Aerotest Radiography and Research Reactor); Order Approving Indirect Transfer of Facility Operating License and Conforming Amendment

I.

Aerotest Operations, Inc., (Aerotest) is the holder of Facility Operating License No. R–98 which authorizes the possession, use and operation of the Aerotest Radiography and Research Reactor (ARRR) located in San Ramon, California, under the provisions of 10 CFR 50.21(c) for research and development purposes. Aerotest is a wholly owned subsidiary of OEA Aerospace, Inc., which is wholly owned by OEA, Inc. OEA, Inc., was purchased by Autoliv ASP, Inc., (Autoliv) on May 9, 2000. Autoliv is owned by Autoliv, Inc., a Delaware corporation with a Board of Directors and Executive Officers the majority of whom are non-U.S. citizens. Pursuant to the May 9, 2000, transfer, and without the consent of the U. S. Nuclear Regulatory Commission (NRC), Aerotest became a subsidiary of Autoliv and Autoliv, Inc.

II.

By application dated January 19, 2010, as supplemented by letters dated February 2, March 23, April 1, and April 19, 2010, (collectively, the application), Aerotest, X-Ray Industries, Inc., (X-Ray), and Autoliv requested that the NRC, pursuant to of Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.80, consent to the proposed indirect transfer of control of Aerotest's license to possess, use, and operate the ARRR, from its current owner, Autoliv to X-Ray. Autoliv, the parent company of OEA, Inc., (which is the parent company of Aerotest) and X-Ray have entered into a Letter of Intent for X-Ray to acquire all of the stock of Aerotest. X-Ray has formed a subsidiary single member LLC, Aerotest Holdings LLC, to be the intermediate parent of Aerotest and a subsidiary of X-Ray. There will be no direct transfer of the license. No changes to ARRR's location, facilities, equipment, operating procedures, operating organization, or personnel will be made in connection with the indirect transfer of control of the license.

The application also requested approval of a conforming amendment to reflect the proposed transfer of ownership of Aerotest, from OEA, Inc., to X-Ray. After completion of the transfer, X-Ray would be the indirect owner of Aerotest, which operates the ARRR.

Notice of request for approval and an opportunity for hearing was published in the **Federal Register** on May 14, 2010; 75 FR 27368. No hearing requests or written comments were received.

Under 10 CFR 50.80, no license or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. Upon review of the information submitted in the application and other information before the Commission, the NRC staff has determined that the indirect license transfer of Facility Operating License R–98, as described above, is otherwise consistent with the applicable provisions of law, regulations, and orders issued by the NRC, pursuant thereto, subject to the conditions set forth below. The NRC staff further finds that the application for the proposed conforming license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I; the facility will operate in conformity with the application, the provisions of the Act and the rules and regulations of the Commission; there is reasonable assurance that the activities authorized by the proposed license amendment can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission's regulations; the issuance of the proposed license amendment will not be inimical to the common defense and security or to the health and safety of the public; and the issuance of the proposed amendment will be in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied. The findings set forth above are supported by a safety evaluation dated July 7, 2010.

III.

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended (the Act), 42 U.S.C. 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 50.80, *it is hereby ordered* that the application regarding the proposed indirect license transfer described above related to the proposed transaction, is approved, subject to the following conditions:

A. By no later than the time the proposed transaction and indirect license transfer occur, $2 million in decommissioning trust funds will be deposited in a Decommissioning Trust established and maintained by Aerotest Operations, Inc. The funds will be segregated from other assets of Aerotest Operations, Inc., and will be outside of the administrative control of Aerotest Operations, Inc.

B. No later than the date of the transaction, the licensee will provide to the Director of the Office of Nuclear Reactor Regulation, a copy of the letter of credit for $300,000 in a form acceptable to the NRC.

C. X-Ray Industries, Inc., shall enter into an $850,000 support agreement with Aerotest Operations, Inc., no later than the time the proposed transaction and indirect license transfer occur. Aerotest Operations, Inc., shall take no action to cause X-Ray Industries, Inc., or its successors and assigns, to void, cancel, or modify the support agreement or cause it to fail to perform, or impair its performance under the support agreement, without the prior written consent of the NRC. The support agreement may not be amended or modified without 30 days prior written notice to the Director of the Office of Nuclear Reactor Regulation or his designee. An executed copy of the support agreement shall be submitted to the NRC no later than 30 days after the completion of the proposed transaction and the indirect license transfer. Aerotest Operations, Inc., shall inform the NRC in writing anytime it draws upon the support agreement.

It is further ordered that consistent with 10 CFR 2.1315(b), the conforming license amendment, reflecting only changes related to the subject indirect transfer, is approved. The amendment shall be issued and made effective at the time the proposed indirect transfer action is completed.

It is further ordered that after receipt of all required regulatory approvals of the proposed indirect transfer action, Aerotest shall inform the Director of the Division of Policy and Rulemaking in

writing of such receipt no later than 7 business days prior to the date of the closing of the indirect transfer. Should the proposed indirect transfer not be completed by September 13, 2010, this Order shall become null and void, provided, however, upon written application and good cause shown, such date may be extended by order.

This Order is effective upon issuance.

For further details with respect to this Order, see the application dated January 19, 2010, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML100490068), as supplemented by letters dated February 2, March 23, April 1, and April 19, 2010, (ADAMS Accession No. ML100880295, ML100880338, ML100980153, and ML101120070, respectively), and the safety evaluation dated July 7, 2010, which are available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area 01 F21, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible electronically from the ADAMS Public Electronic Reading Room on the Internet at the NRC Web site, *http://www.nrc.gov/reading-rm/adams.html*. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail to *pdr.resource@nrc.gov*.

Dated at Rockville, Maryland this 6th day of July, 2010.

For The Nuclear Regulatory Commission.

Timothy J. McGinty,

Director, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 72–75; EA–10–092; NRC–2010–0247]

In the Matter of Entergy Operations, Inc., Waterford Steam Electric Station, Independent Spent Fuel Installation, Order Modifying License (Effective Immediately)

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Order for Implementation of Additional Security Measures and Fingerprinting for Unescorted Access to Entergy Operations, Inc.

FOR FURTHER INFORMATION CONTACT: L. Raynard Wharton, Senior Project Manager, Licensing and Inspection Directorate, Division of Spent Fuel Storage and Transportation, Office of Nuclear Material Safety and Safeguards (NMSS), U.S. Nuclear Regulatory Commission (NRC), Rockville, MD 20852. *Telephone:* (301) 492–3316; *fax number:* (301) 492–3348; *e-mail: Raynard.Wharton@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

Pursuant to 10 CFR 2.106, NRC (or the Commission) is providing notice, in the matter of Waterford Steam Electric Station Independent Spent Fuel Storage Installation (ISFSI) Order Modifying License (Effective Immediately).

II. Further Information

I

NRC has issued a general license to Entergy Operations, Inc. (Entergy), authorizing the operation of an ISFSI, in accordance with the Atomic Energy Act of 1954, as amended, and Title 10 of the *Code of Federal Regulations* (10 CFR) Part 72. This Order is being issued to Entergy because it has identified near-term plans to store spent fuel in an ISFSI under the general license provisions of 10 CFR Part 72. The Commission's regulations at 10 CFR 72.212(b)(5), 10 CFR 50.54(p)(1), and 10 CFR 73.55(c)(5) require licensees to maintain safeguards contingency plan procedures to respond to threats of radiological sabotage and to protect the spent fuel against the threat of radiological sabotage, in accordance with 10 CFR Part 73, Appendix C. Specific physical security requirements are contained in 10 CFR 73.51 or 73.55, as applicable.

Inasmuch as an insider has an opportunity equal to, or greater than, any other person, to commit radiological sabotage, the Commission has determined these measures to be prudent. Comparable Orders have been issued to all licensees that currently store spent fuel or have identified near-term plans to store spent fuel in an ISFSI.

II

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, using large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees, to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. On October 16, 2002, the Commission issued Orders to the licensees of operating ISFSIs, to place the actions taken in response to the Advisories into the established regulatory framework and to implement additional security enhancements that emerged from NRC's ongoing comprehensive review. The Commission has also communicated with other Federal, State, and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has conducted a comprehensive review of its safeguards and security programs and requirements.

As a result of its consideration of current safeguards and security requirements, as well as a review of information provided by the intelligence community, the Commission has determined that certain additional security measures (ASMs) are required to address the current threat environment, in a consistent manner throughout the nuclear ISFSI community. Therefore, the Commission is imposing requirements, as set forth in Attachments 1 and 2 of this Order, on all licensees of these facilities. These requirements, which supplement existing regulatory requirements, will provide the Commission with reasonable assurance that the public health and safety, the environment, and common defense and security continue to be adequately protected in the current threat environment. These requirements will remain in effect until the Commission determines otherwise.

The Commission recognizes that licensees may have already initiated many of the measures set forth in Attachments 1 and 2 to this Order, in response to previously issued Advisories, or on their own. It also recognizes that some measures may not be possible or necessary at some sites, or may need to be tailored to accommodate the specific circumstances existing at Entergy's facility, to achieve the intended objectives and avoid any unforeseen effect on the safe storage of spent fuel.

Although the ASMs implemented by licensees in response to the Safeguards and Threat Advisories have been sufficient to provide reasonable assurance of adequate protection of public health and safety, in light of the continuing threat environment, the Commission concludes that these actions must be embodied in an Order, consistent with the established regulatory framework.

To provide assurance that licensees are implementing prudent measures to achieve a consistent level of protection to address the current threat environment, licenses issued pursuant to 10 CFR 72.210 shall be modified to include the requirements identified in Attachments 1 and 2 to this Order. In addition, pursuant to 10 CFR 2.202, I find that, in light of the common defense and security circumstances described above, the public health, safety, and interest require that this Order be effective immediately.

III

Accordingly, pursuant to Sections 53, 103, 104, 147, 149, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR Parts 50, 72, and 73, *it is hereby ordered, effective immediately, that your general license is modified as follows:*

A. Entergy shall comply with the requirements described in Attachments 1 and 2 to this Order, except to the extent that a more stringent requirement is set forth in the Waterford Steam Electric Station's physical security plan. Entergy shall complete implementation of the requirements in Attachments 1 and 2 to the Order no later than 365 days from the date of this Order or 90 days before the first day that spent fuel is initially placed in the ISFSI, whichever is earlier. Additionally, Entergy must receive written verification from the NRC that the ASMs have been adequately implemented before initially placing spent fuel in the ISFSI.

B. 1. Entergy shall, within twenty (20) days of the date of this Order, notify the Commission: (1) If it is unable to comply with any of the requirements described in Attachments 1 and 2; (2) if compliance with any of the requirements is unnecessary, in its specific circumstances; or (3) if implementation of any of the requirements would cause Entergy to be in violation of the provisions of any Commission regulation or the facility license. The notification shall provide Entergy's justification for seeking relief from, or variation of, any specific requirement.

2. If Entergy considers that implementation of any of the requirements described in Attachments 1 and 2 to this Order would adversely impact the safe storage of spent fuel, Entergy must notify the Commission, within twenty (20) days of this Order, of the adverse safety impact, the basis for its determination that the requirement has an adverse safety impact, and either a proposal for achieving the same objectives specified in Attachments 1 and 2 requirements in question, or a schedule for modifying the facility, to address the adverse safety condition. If neither approach is appropriate, Entergy must supplement its response, to Condition B.1 of this Order, to identify the condition as a requirement with which it cannot comply, with attendant justifications, as required under Condition B.1.

C. 1. Entergy shall, within twenty (20) days of this Order, submit to the Commission, a schedule for achieving compliance with each requirement described in Attachments 1 and 2.

2. Entergy shall report to the Commission when it has achieved full compliance with the requirements described in Attachments 1 and 2.

D. All measures implemented or actions taken in response to this Order shall be maintained until the Commission determines otherwise.

Entergy's response to Conditions B.1, B.2, C.1, and C.2, above, shall be submitted in accordance with 10 CFR 72.4. In addition, submittals and documents produced by Entergy as a result of this order, that contain Safeguards Information as defined by 10 CFR 73.22, shall be properly marked and handled, in accordance with 10 CFR 73.21 and 73.22.

The Director, Office of Nuclear Material Safety and Safeguards, may, in writing, relax or rescind any of the above conditions, for good cause.

IV

In accordance with 10 CFR 2.202, Entergy must, and any other person adversely affected by this Order may, submit an answer to this Order within 20 days of its publication in the **Federal Register**. In addition, Entergy and any other person adversely affected by this Order may request a hearing on this Order within 20 days of its publication in the **Federal Register**. Where good cause is shown, consideration will be given to extending the time to answer or request a hearing. A request for extension of time must be made, in writing, to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and include a statement of good cause for the extension.

The answer may consent to this Order. If the answer includes a request for a hearing, it shall, under oath or affirmation, specifically set forth the matters of fact and law on which Entergy relies and the reasons as to why the Order should not have been issued. If a person other than Entergy requests a hearing, that person shall set forth with particularity the manner in which his/her interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.309(d).

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC E-Filing rule (72 FR 49139, August 28, 2007). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least ten (10) days prior to the filing deadline, the participant should contact the Office of the Secretary by e-mail at *hearing.docket@nrc.gov,* or by telephone at (301) 415–1677, to request (1) a digital ID certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a request or petition for hearing (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/apply-certificates.html.* System requirements for accessing the E-Submittal server are detailed in NRC's "Guidance for Electronic Submission," which is available on the agency's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Meta System Help Desk will not be able to offer assistance in using unlisted software.

If a participant is electronically submitting a document to the NRC in accordance with the E-Filing rule, the participant must file the document using the NRC's online, Web-based submission form. In order to serve documents through Electronic Information Exchange (EIE), users will be required to install a Web browser plug-in from the NRC Web site. Further information on the Web-based submission form, including the installation of the Web browser plug-in, is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html*.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a request for hearing or petition for leave to intervene. Submissions should be in Portable Document Format (PDF) in accordance with NRC guidance available on the NRC public Web site at *http://www.nrc.gov/site-help/e-submittals.html*. A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an e-mail notice confirming receipt of the document. The E-Filing system also distributes an e-mail notice that provides access to the document to the NRC Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing request/petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the agency's adjudicatory E-Filing system may seek assistance by contacting the NRC Meta System Help Desk through the "Contact Us" link located on the NRC Web site at *http://www.nrc.gov/site-help/e-submittals.html*, by e-mail at *MSHD.Resource@nrc.gov,* or by a toll-free call at (866) 672–7640. The NRC Meta System Help Desk is available between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, *Attention:* Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, *Attention:* Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in NRC's electronic hearing docket which is available to the public at *http://ehd.nrc.gov/EHD_Proceeding/home.asp*, unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

If a hearing is requested by Entergy or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

Pursuant to 10 CFR 2.202(c)(2)(i), Entergy may, in addition to requesting a hearing, at the time the answer is filed or sooner, move the presiding officer to set aside the immediate effectiveness of the Order on the grounds that the Order, including the need for immediate effectiveness, is not based on adequate evidence, but on mere suspicion, unfounded allegations, or error.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions as specified in Section III shall be final twenty (20) days from the date this Order is published in the **Federal Register**, without further Order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions as specified in Section III, shall be final when the extension expires, if a hearing request has not been received. *An answer or a request for hearing shall not stay the immediate effectiveness of this order.*

Dated at Rockville, Maryland, this 28th day of June, 2010.

For The Nuclear Regulatory Commission.

Catherine Haney,

Director, Office of Nuclear Material Safety and Safeguards.

Attachment 1—Additional Security Measures (ASMs) for Physical Protection of Dry Independent Spent Fuel Storage Installations (ISFSIs) Contains Safeguards Information and Is Not Included in the Federal Register Notice

Attachment 2—Additional Security Measures for Access Authorization and Fingerprinting at Independent Spent Fuel Storage Installations, dated June 3, 2010

A. General Basis Criteria

1. These additional security measures (ASMs) are established to delineate an independent spent fuel storage installation (ISFSI) licensee's responsibility to enhance security measures related to authorization for unescorted access to the protected area of an ISFSI in response to the current threat environment.

2. Licensees whose ISFSI is collocated with a power reactor may choose to comply with the U.S. Nuclear Regulatory Commission (NRC)-approved reactor access authorization program for the associated reactor as an alternative means to satisfy the provisions of sections B through G below. Otherwise, licensees shall comply with the access authorization and fingerprinting requirements of section B through G of these ASMs.

3. Licensees shall clearly distinguish in their 20-day response which method they intend to use in order to comply with these ASMs.

B. Additional Security Measures for Access Authorization Program

1. The licensee shall develop, implement and maintain a program, or enhance its existing program, designed to ensure that persons granted unescorted access to the protected area of an ISFSI are trustworthy and reliable and do not constitute an unreasonable risk to the public health and safety for the common defense and security, including a potential to commit radiological sabotage.

a. To establish trustworthiness and reliability, the licensee shall develop, implement, and maintain procedures for conducting and completing background investigations, prior to granting access. The scope of background investigations must address at least the past three years and, as a minimum, must include:

i. Fingerprinting and a Federal Bureau of Investigation (FBI) identification and criminal history records check (CHRC). Where an applicant for unescorted access has been previously fingerprinted with a favorably completed CHRC, (such as a CHRC pursuant to compliance with orders for access to safeguards information) the licensee may accept the results of that CHRC, and need not submit another set of fingerprints, provided the CHRC was completed not more than three years from the date of the application for unescorted access.

ii. Verification of employment with each previous employer for the most recent year from the date of application.

iii. Verification of employment with an employer of the longest duration during any calendar month for the remaining next most recent two years.

iv. A full credit history review.

v. An interview with not less than two character references, developed by the investigator.

vi. A review of official identification (*e.g.,* driver's license; passport; government identification; state-, province-, or country-of-birth issued certificate of birth) to allow comparison of personal information data provided by the applicant. The licensee shall maintain a photocopy of the identifying document(s) on file, in accordance with "Protection of Information," in Section G of these ASMs.

vii. Licensees shall confirm eligibility for employment through the regulations of the U.S. Department of Homeland Security, U.S. Citizenship and Immigration Services, and shall verify and ensure, to the extent possible, the accuracy of the provided social security number and alien registration number, as applicable.

b. The procedures developed or enhanced shall include measures for confirming the term, duration, and character of military service for the past three years, and/or academic enrollment and attendance in lieu of employment, for the past five years.

c. Licensees need not conduct an independent investigation for individuals employed at a facility who possess active "Q" or "L" clearances or possess another active U.S. Government-granted security clearance (*i.e.,* Top Secret, Secret, or Confidential).

d. A review of the applicant's criminal history, obtained from local criminal justice resources, may be included in addition to the FBI CHRC, and is encouraged if the results of the FBI CHRC, employment check, or credit check disclose derogatory information. The scope of the applicant's local criminal history check shall cover all residences of record for the past three years from the date of the application for unescorted access.

2. The licensee shall use any information obtained as part of a CHRC solely for the purpose of determining an individual's suitability for unescorted access to the protected area of an ISFSI.

3. The licensee shall document the basis for its determination for granting or denying access to the protected area of an ISFSI.

4. The licensee shall develop, implement, and maintain procedures for updating background investigations for persons who are applying for reinstatement of unescorted access. Licensees need not conduct an independent reinvestigation for individuals who possess active "Q" or "L" clearances or possess another active U.S. Government granted security clearance, *i.e.,* Top Secret, Secret or Confidential.

5. The licensee shall develop, implement, and maintain procedures for reinvestigations of persons granted unescorted access, at intervals not to exceed five years. Licensees need not conduct an independent reinvestigation for individuals employed at a facility who possess active "Q" or "L" clearances or possess another active U.S. Government granted security clearance, *i.e.,* Top Secret, Secret or Confidential.

6. The licensee shall develop, implement, and maintain procedures designed to ensure that persons who have been denied unescorted access authorization to the facility are not allowed access to the facility, even under escort.

7. The licensee shall develop, implement, and maintain an audit program for licensee and contractor/vendor access authorization programs that evaluate all program elements and include a person knowledgeable and practiced in access authorization program performance objectives to assist in the overall assessment of the site's program effectiveness.

C. Fingerprinting Program Requirements

1. In a letter to the NRC, the licensee must nominate an individual who will review the results of the FBI CHRCs to make trustworthiness and reliability determinations for unescorted access to an ISFSI. This individual, referred to as the "reviewing official," must be someone who requires unescorted access to the ISFSI. The NRC will review the CHRC of any individual nominated to perform the reviewing official function. Based on the results of the CHRC, the NRC staff will determine whether this individual may have access. If the NRC determines that the nominee may not be granted such access, that individual will be prohibited from obtaining access.[1] Once the NRC approves a reviewing official, the reviewing official is the only individual permitted to make access determinations for other individuals who have been identified by the licensee as having the need for unescorted access to the ISFSI, and have been fingerprinted and have had a CHRC in accordance with these ASMs. The reviewing official can only make access determinations for other individuals, and therefore cannot approve other individuals to act as reviewing officials. Only the NRC can approve a reviewing official. Therefore, if the licensee wishes to have a new or additional reviewing official, the NRC must approve that individual before he or she can act in the capacity of a reviewing official.

2. No person may have access to Safeguards Information (SGI) or unescorted access to any facility subject to NRC regulation, if the NRC has determined, in accordance with its administrative review process based on fingerprinting and an FBI identification and CHRC, that the person may not have access to SGI or unescorted access to any facility subject to NRC regulation.

3. All fingerprints obtained by the licensee under this Order, must be submitted to the Commission for transmission to the FBI.

4. The licensee shall notify each affected individual that the fingerprints will be used to conduct a review of his/her criminal history record and inform the individual of the procedures for

[1] The NRC's determination of this individual's unescorted access to the ISFSI, in accordance with the process, is an administrative determination that is outside the scope of the Order.

revising the record or including an explanation in the record, as specified in the "Right to Correct and Complete Information," in section F of these ASMs.

5. Fingerprints need not be taken if the employed individual (*e.g.,* a licensee employee, contractor, manufacturer, or supplier) is relieved from the fingerprinting requirement by 10 CFR 73.61, has a favorably adjudicated U.S. Government CHRC within the last five (5) years, or has an active Federal security clearance. Written confirmation from the Agency/employer who granted the Federal security clearance or reviewed the CHRC must be provided to the licensee. The licensee must retain this documentation for a period of three years from the date the individual no longer requires access to the facility.

D. Prohibitions

1. A licensee shall not base a final determination to deny an individual unescorted access to the protected area of an ISFSI solely on the basis of information received from the FBI involving: An arrest more than one (1) year old for which there is no information of the disposition of the case, or an arrest that resulted in dismissal of the charge, or an acquittal.

2. A licensee shall not use information received from a CHRC obtained pursuant to this Order in a manner that would infringe upon the rights of any individual under the First Amendment to the Constitution of the United States, nor shall the licensee use the information in any way that would discriminate among individuals on the basis of race, religion, national origin, sex, or age.

E. Procedures for Processing Fingerprint Checks

1. For the purpose of complying with this Order, licensees shall, using an appropriate method listed in 10 CFR 73.4, submit to the NRC's Division of Facilities and Security, Mail Stop TWB–05B32M, one completed, legible standard fingerprint card (Form FD–258, ORIMDNRCOOOZ) or, where practicable, other fingerprint records for each individual seeking unescorted access to an ISFSI, to the Director of the Division of Facilities and Security, marked for the attention of the Division's Criminal History Check Section. Copies of these forms may be obtained by writing the Office of Information Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, by calling (301) 415–5877, or by e-mail to *forms@nrc.gov.* Practicable alternative formats are set forth in 10 CFR 73.4. The licensee shall establish procedures to ensure that the quality of the fingerprints taken results in minimizing the rejection rate of fingerprint cards because of illegible or incomplete cards.

2. The NRC will review submitted fingerprint cards for completeness. Any Form FD–258 fingerprint record containing omissions or evident errors will be returned to the licensee for corrections. The fee for processing fingerprint checks includes one re-submission if the initial submission is returned by the FBI because the fingerprint impressions cannot be classified. The one free re-submission must have the FBI Transaction Control Number reflected on the re-submission. If additional submissions are necessary, they will be treated as initial submittals and will require a second payment of the processing fee.

3. Fees for processing fingerprint checks are due upon application. The licensee shall submit payment of the processing fees electronically. To be able to submit secure electronic payments, licensees will need to establish an account with Pay.Gov (*https://www.pay.gov*). To request an account, the licensee shall send an e-mail to *det@nrc.gov.* The e-mail must include the licensee's company name, address, point of contact (POC), POC e-mail address, and phone number. The NRC will forward the request to Pay.Gov, who will contact the licensee with a password and user lD. Once the licensee has established an account and submitted payment to Pay.Gov, they shall obtain a receipt. The licensee shall submit the receipt from Pay.Gov to the NRC along with fingerprint cards. For additional guidance on making electronic payments, contact the Facilities Security Branch, Division of Facilities and Security, at (301) 492–3531. Combined payment for multiple applications is acceptable. The application fee (currently $26) is the sum of the user fee charged by the FBI for each fingerprint card or other fingerprint record submitted by the NRC on behalf of a licensee, and an NRC processing fee, which covers administrative costs associated with NRC handling of licensee fingerprint submissions. The Commission will directly notify licensees who are subject to this regulation of any fee changes.

4. The Commission will forward to the submitting licensee all data received from the FBI as a result of the licensee's application(s) for CHRCs, including the FBI fingerprint record.

F. Right to Correct and Complete Information

1. Prior to any final adverse determination, the licensee shall make available to the individual the contents of any criminal history records obtained from the FBI for the purpose of assuring correct and complete information. Written confirmation by the individual of receipt of this notification must be maintained by the licensee for a period of one (1) year from the date of notification.

2. If, after reviewing the record, an individual believes that it is incorrect or incomplete in any respect and wishes to change, correct, or update the alleged deficiency, or to explain any matter in the record, the individual may initiate challenge procedures. These procedures include either direct application by the individual challenging the record to the agency (*i.e.,* law enforcement agency) that contributed the questioned information, or direct challenge as to the accuracy or completeness of any entry on the criminal history record to the Assistant Director, Federal Bureau of Investigation Identification Division, Washington, DC 20537–9700 (as set forth in 28 CFR 16.30 through 16.34). In the latter case, the FBI forwards the challenge to the agency that submitted the data and requests that agency to verify or correct the challenged entry. Upon receipt of an official communication directly from the agency that contributed the original information, the FBI Identification Division makes any changes necessary in accordance with the information supplied by that agency. The licensee must provide at least 10 days for an individual to initiate an action challenging the results of a FBI CHRC after the record is made available for his/her review. The licensee may make a final access determination based on the criminal history record only upon receipt of the FBI's ultimate confirmation or correction of the record. Upon a final adverse determination on access to an ISFSI, the licensee shall provide the individual its documented basis for denial. Access to an ISFSI shall not be granted to an individual during the review process.

G. Protection of Information

1. The licensee shall develop, implement, and maintain a system for personnel information management with appropriate procedures for the protection of personal, confidential information. This system shall be designed to prohibit unauthorized access to sensitive information and to

prohibit modification of the information without authorization.

2. Each licensee who obtains a criminal history record on an individual pursuant to this Order shall establish and maintain a system of files and procedures, for protecting the record and the personal information from unauthorized disclosure.

3. The licensee may not disclose the record or personal information collected and maintained to persons other than the subject individual, his/her representative, or to those who have a need to access the information in performing assigned duties in the process of determining suitability for unescorted access to the protected area of an ISFSI. No individual authorized to have access to the information may re-disseminate the information to any other individual who does not have the appropriate need to know.

4. The personal information obtained on an individual from a CHRC may be transferred to another licensee if the gaining licensee receives the individual's written request to re-disseminate the information contained in his/her file, and the gaining licensee verifies information such as the individual's name, date of birth, social security number, sex, and other applicable physical characteristics for identification purposes.

5. The licensee shall make criminal history records, obtained under this section, available for examination by an authorized representative of the NRC to determine compliance with the regulations and laws.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2009–0403]

Notice of Availability of the Proposed Models For Plant-Specific Adoption of Technical Specifications Task Force (TSTF) Traveler TSTF–446, Revision 3, "Risk Informed Evaluation of Extensions to Containment Isolation Valve Completion Times (WCAP–15791)"

AGENCY: Nuclear Regulatory Commission (NRC)

ACTION: Notice of availability.

SUMMARY: The NRC is announcing the availability of the proposed model application (with model no significant hazards consideration determination) and model safety evaluation (SE) for plant-specific adoption of Technical Specifications Task Force (TSTF) Traveler TSTF–446, Revision 3, "Risk Informed Evaluation of Extensions to Containment Isolation Valve Completion Times (WCAP–15791)." TSTF–446, Revision 3, is available in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML080510164. The proposed changes revise Standard Technical Specifications (TS) with respect to completion times for containment isolation valves. This model SE will facilitate expedited approval of plant-specific adoption of TSTF–446, Revision 3.

You can access publicly available documents related to this notice using the following methods:

NRC's Public Document Room (PDR): The public may examine and have copied for a fee publicly available documents at the NRC's PDR, Public File Area O1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

NRC's Agencywide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/reading-rm/adams.html.* From this page, the public can gain entry into ADAMS, which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's PDR reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr.resource@nrc.gov.*

The proposed model application (with model no significant hazards consideration determination) and model SE for plant-specific adoption of TSTF–

446, Revision 3, are available electronically under ADAMS Accession Number ML101540632. The NRC staff disposition of comments received to the Notice of Opportunity for Public Comment announced in the **Federal Register** on September 15, 2009 (74 FR 47289–47298), is available electronically under ADAMS Accession Number ML101540634.

Federal Rulemaking Web site: Public comments received and supporting materials related to this notice can be found at *http://www.regulations.gov* by searching on Docket ID: NRC–2009–0403.

FOR FURTHER INFORMATION CONTACT: Ravinder Grover, Technical Specifications Branch, Mail Stop: O–7 C2A, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC, 20555–0001; telephone 301–415–2166 or e-mail at *Ravinder.Grover@nrc.gov.*

SUPPLEMENTARY INFORMATION:

TSTF–446, Revision 3, is applicable to all Westinghouse plants. Licensees opting to apply for this TS change are responsible for reviewing the NRC staff's model SE, referencing the applicable technical justifications, and providing any necessary plant-specific information. The NRC will process each amendment application responding to this notice of availability according to applicable NRC rules and procedures.

The proposed models do not prevent licensees from requesting an alternate approach or proposing changes other than those proposed in TSTF–446, Revision 3. However, significant deviations from the approach recommended in this notice or the inclusion of additional changes to the license require additional NRC staff review. This may increase the time and resources needed for the review or result in NRC staff rejection of the license amendment request (LAR). Licensees desiring significant deviations or additional changes should instead submit an LAR that does not claim to adopt TSTF–446, Revision 3.

Dated at Rockville, Maryland, this 24th day of June 2010.

For the Nuclear Regulatory Commission.

John R. Jolicoeur,

Chief, Licensing Processes Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. CP2010–64 and CP2010–65; Order No. 484]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recently-filed Postal Service request to add two additional Global Expedited Package Services 2 (GEPS 2) contracts to the Competitive Product List. This notice addresses procedural steps associated with these filings.

DATES: Comments are due: July 14, 2010.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Commenters who cannot submit their views electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on alternatives to electronic filing.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, *stephen.sharfman@prc.gov* or 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Notice of Filing
III. Ordering Paragraphs

I. Introduction

On July 2, 2010, the Postal Service filed a notice announcing that it has entered into two additional Global Expedited Package Services 2 (GEPS 2) contracts.[1] The Postal Service believes the instant contracts are functionally equivalent to previously submitted GEPS 2 contracts, and are supported by Governors' Decision No. 08–7, attached to the Notice and originally filed in Docket No. CP2008–4. *Id.* at 1, Attachment 3. The Notice also explains that Order No. 86, which established GEPS 1 as a product, also authorized functionally equivalent agreements to be included within the product, provided that they meet the requirements of 39 U.S.C. 3633. *Id.* at 1. In Order No. 290, the Commission approved the GEPS 2 product.[2]

The instant contracts. The Postal Service filed the instant contracts pursuant to 39 CFR 3015.5. In addition, the Postal Service contends that each contract is in accordance with Order No. 86. The term of each contract is 1 year from the date the Postal Service notifies the customer that all necessary regulatory approvals have been received. Notice at 2–3.

In support of its Notice, the Postal Service filed four attachments as follows:

1. Attachments 1A and 1B–redacted copies of the two contracts and applicable annexes;

2. Attachments 2A and 2B–a certified statement required by 39 CFR 3015.5(c)(2) for each contract;

3. Attachment 3–a redacted copy of Governors' Decision No. 08–7 which establishes prices and classifications for GEPS contracts, a description of applicable GEPS contracts, formulas for prices, an analysis and certification of the formulas and certification of the Governors' vote; and

4. Attachment 4–an application for non–public treatment of materials to maintain redacted portions of the contracts and supporting documents under seal.

The Notice advances reasons why the instant GEPS 2 contracts fit within the Mail Classification Schedule language for GEPS 2. The Postal Service identifies customer–specific information, general contract terms, and other differences that distinguish the instant contracts from the baseline GEPS 2 agreement, all of which are highlighted in the Notice. *Id.* at 3–6. These modifications as described in the Postal Service's Notice apply to each of the instant contracts.

The Postal Service contends that the instant contracts are functionally equivalent to previously filed GEPS contracts and are substantially similar to that in Docket No. CP2009–50 in terms of the product being offered, the market in which it is offered, and its cost characteristics. *Id.* at 2–3. *See also id.* at 6. ("[T]he relevant cost and market characteristics are similar, if not the same, for these two contracts and the baseline GEPS 2 contract.")

The Postal Service also contends that its filings demonstrate that each of the new GEPS 2 contracts complies with the requirements of 39 U.S.C. 3633. It requests that the contracts be included within the GEPS 2 product. *Id.* at 7.

II. Notice of Filing

The Commission establishes Docket Nos. CP2010–64 and CP2010–65 for consideration of matters related to the contracts identified in the Postal Service's Notice.

These dockets are addressed on a consolidated basis for purposes of this

[1] Notice of United States Postal Service Filing of Two Functionally Equivalent Global Expedited Package Services 2 Negotiated Service Agreements and Application for Non–Public Treatment of Materials Filed Under Seal, July 2, 2010 (Notice).

[2] Docket No. CP2009–50, Order Granting Clarification and Adding Global Expedited Package Services 2 to the Competitive Product List, August 28, 2009 (Order No. 290).

order. Filings with respect to a particular contract should be filed in that docket.

Interested persons may submit comments on whether the Postal Service's contracts are consistent with the policies of 39 U.S.C. 3632, 3633 or 3642. Comments are due no later than July 14, 2010. The public portions of these filings can be accessed via the Commission's Web site (*http://www.prc.gov*).

The Commission appoints Paul L. Harrington to serve as Public Representative in the captioned proceedings.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. CP2010–64 and CP2010–65 for consideration of matters raised by the Postal Service's Notice.

2. Comments by interested persons in these proceedings are due no later than July 14, 2010.

3. Pursuant to 39 U.S.C. 505, Paul L. Harrington is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.

4. The Secretary shall arrange for publication of this order in the **Federal Register.**

By the Commission.

Shoshana M. Grove,

Secretary.

BILLING CODE 7710–FW–S

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #12220 and #12221]

ILLINOIS Disaster #IL–00024

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Illinois dated 07/06/2010.

Incident: Severe Storms and Tornadoes.

Incident Period: 06/05/2010.

Effective Date: 07/06/2010.

Physical Loan Application Deadline Date: 09/07/2010.

Economic Injury (EIDL) Loan Application Deadline Date: 04/06/2011.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street, SW., Suite 6050, Washington, DC 20416.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: La Salle, Livingston, Peoria.

Contiguous Counties:

Illinois: Bureau, Dekalb, Ford, Fulton, Grundy, Kankakee, Kendall, Knox, Lee, Marshall, Mclean, Putnam, Stark, Tazewell, Woodford.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners With Credit Available Elsewhere	5.500
Homeowners Without Credit Available Elsewhere	2.750
Businesses With Credit Available Elsewhere	6.000
Businesses Without Credit Available Elsewhere	4.000
Non-Profit Organizations With Credit Available Elsewhere	3.625
Non-Profit Organizations Without Credit Available Elsewhere	3.000
For Economic Injury:	
Businesses & Small Agricultural Cooperatives Without Credit Available Elsewhere	4.000
Non-Profit Organizations Without Credit Available Elsewhere	3.000

The number assigned to this disaster for physical damage is 12220C and for economic injury is 122210.

The State which received an EIDL Declaration # is Illinois.

(Catalog of Federal Domestic Assistance Numbers 59002 and 59008)

Dated: July 6, 2010.

Karen G. Mills,

Administrator.

BILLING CODE 8025–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–29338; File No. 812–13686]

AXA Equitable Life Insurance Company, et al.; Notice of Application

July 7, 2010.

AGENCY: Securities and Exchange Commission ("SEC" or the "Commission").

ACTION: Notice of application for an order pursuant to Section 26(c) of the Investment Company Act of 1940 ("1940 Act" or "Act"), approving certain substitutions of securities and for an order of exemption pursuant to Section 17(b) of the Act.

APPLICANTS: AXA Equitable Life Insurance Company ("AXA Equitable"), Separate Account 45 of AXA Equitable ("Separate Account 45"), Separate Account 49 of AXA Equitable ("Separate Account 49"), Separate Account A of AXA Equitable ("Separate Account A"), Separate Account FP of AXA Equitable ("Separate Account FP") (together, "AXA Equitable Separate Accounts"), MONY Life Insurance Company of America ("MLOA") and MONY America Variable Account L ("MLOA Separate Account L") (collectively, the "Section 26 Applicants"), Separate Account 65 of AXA Equitable ("Separate Account 65"), and the AXA Premier VIP Trust (the "Trust") (Separate Account 65 and the Trust, together with the Section 26 Applicants, the "Section 17 Applicants" or "Applicants").

SUMMARY OF APPLICATION: The Section 26 Applicants request an order pursuant to Section 26(c) of the 1940 Act, approving the proposed substitution of securities of the Multimanager Aggressive Equity Portfolio (the "Replacement Portfolio") for securities of the Multimanager Large Cap Growth Portfolio (the "Removed Portfolio") (the "Substitution"). Each of these portfolios currently serves as an underlying investment option for certain variable annuity contracts issued by AXA Equitable ("Annuity Contracts") and/or variable life insurance policies issued by AXA Equitable and MLOA ("Life Insurance Contracts") (collectively, the "Contracts"), as more fully described below.[1] The Section 17 Applicants also request an order pursuant to Section 17(b) of the 1940 Act exempting them

[1] AXA Equitable and MLOA are sometimes referred to herein collectively as the "Insurance Companies" and individually as an "Insurance Company." MLOA Separate Account L and the AXA Equitable Separate Accounts are sometimes referred to herein collectively as the "Separate Accounts" and individually as a "Separate Account."

from Section 17(a) of the 1940 Act to the extent necessary to permit in-kind redemptions of securities issued by the Removed Portfolio and purchases of securities issued by the Replacement Portfolio (the "In-Kind Transactions") in connection with the Substitution.

FILING DATE: The application was filed on August 27, 2009, and amended on December 18, 2009, March 29, 2010, and June 10, 2010. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on July 28, 2010, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090. Applicants, c/o AXA Equitable Life Insurance Company, 1290 Avenue of the Americas, New York, NY 10104, Attn: Steven M. Joenk, Senior Vice President.

FOR FURTHER INFORMATION CONTACT: Sonny Oh, Staff Attorney, or Harry Eisenstein, Branch Chief, Office of Insurance Products, Division of Investment Management at (202) 551–6795.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants' Representations

1. AXA Equitable is a New York stock life insurance company authorized to sell life insurance and annuities in 50 states, the District of Columbia, Puerto Rico and the Virgin Islands. AXA Equitable is an investment adviser registered under the Investment Advisers Act of 1940, as amended, and is a wholly owned subsidiary of AXA Financial, Inc. ("AXA Financial"). AXA Financial is an indirect, wholly owned subsidiary of AXA, which is a publicly traded French holding company.

2. MLOA is an Arizona stock life insurance company licensed to sell life insurance and annuities in 49 states (not including New York), the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. AXA Financial is the parent company of MLOA.

3. AXA Equitable serves as depositor for Separate Account 45, Separate Account 49 and Separate Account A, which fund certain Contracts, and for Separate Account FP, which funds certain Life Insurance Contracts. AXA Equitable also serves as depositor for Separate Account 65, which funds group pension and profit-sharing plans under group Annuity Contracts issued by AXA Equitable (Separate Account 65 is also an "AXA Equitable Separate Account" and may be referred to herein as a "Separate Account" and collectively with MLOA Separate Account L and the AXA Equitable Separate Accounts, the "Separate Accounts").

4. Each AXA Equitable Separate Account is a segregated asset account of AXA Equitable and, except for Separate Account 65, is registered with the Commission as a unit investment trust under the 1940 Act. Separate Account 65 is excluded from registration under the 1940 Act pursuant to Section 3(c)(11) of the 1940 Act. Units of interest in the AXA Equitable Separate Accounts, except Separate Account 65, are registered under the Securities Act of 1933, as amended ("1933 Act"). Units of interest in Separate Account 65 are exempt from registration under the 1933 Act, pursuant to Section 3(a)(2) of the 1933 Act.

5. MLOA serves as depositor for MLOA Separate Account L, which funds variable benefits available under certain Life Insurance Contracts issued by MLOA.

6. MLOA Separate Account L is a segregated asset account of MLOA and is registered with the Commission as a unit investment trust under the 1940 Act. Units of interest in MLOA Separate Account L under the Life Insurance Contracts are registered under the 1933 Act.

7. The Trust is organized as a Delaware statutory trust and is registered as an open-end management investment company under the 1940 Act and its shares are registered under the 1933 Act on Form N–1A. The Trust is a series investment company and currently offers 21 separate series (each a "Portfolio" and collectively, the "Portfolios").

8. The Trust currently offers two classes of shares, Class A and Class B shares. The Class A and Class B shares differ only in that Class B shares are subject to a distribution plan adopted and administered pursuant to Rule 12b–1 under the 1940 Act. The 12b–1 fees with respect to the Class B Shares of each Portfolio of the Trust currently are limited to an annual rate of 0.25% of the average daily net assets attributable to the Class B shares of the Portfolio and may be increased to an annual rate of 0.50% by the Board of Trustees without shareholder approval.

9. AXA Equitable currently serves as investment manager ("Manager") of each of the Portfolios. The Trust has received an exemptive order from the Commission that permits the Manager, or any entity controlling, controlled by, or under common control (within the meaning of Section 2(a)(9) of the 1940 Act) with the Manager, subject to certain conditions, including approval of the Board of Trustees of the Trust, and without the approval of shareholders, to appoint, dismiss, or replace investment sub-advisers ("Advisers") and to amend investment advisory agreements.[2] If a new Adviser is retained for a Portfolio, Contract owners would receive notice of any such action.

10. Each Insurance Company, on its own behalf and on behalf of its Separate Accounts, proposes to exercise its contractual right to substitute a different underlying investment option for one of the current underlying investment options offered as a funding option under the Contracts. In particular, the Section 26 Applicants request an order from the Commission pursuant to Section 26(c) of the 1940 Act approving the proposed substitution ("Substitution") of (i) Class A shares of the Multimanager Aggressive Equity Portfolio for Class A shares of the Multimanager Large Cap Growth Portfolio; and (ii) Class B shares of the Multimanager Aggressive Equity Portfolio for Class B shares of the Multimanager Large Cap Growth Portfolio.

11. The Section 26 Applicants propose the Substitution as part of a continued and overall business plan by each of the Insurance Companies to make its Contracts more attractive to existing Contract owners, Participants or prospective purchasers, as the case may be, and more efficient to administer and oversee.

[2] *See EQ Advisors Trust and EQ Financial Consultants, Inc.,* Investment Company Act Release Nos. 23093 (March 30, 1998) (notice) and 23128 (April 24, 1998) (order).

12. Among the principal purposes of the Substitutions, the Section 26 Applicants assert the proposed Substitution is designed and intended to simplify the prospectuses and related materials with respect to the Contracts and the investment options available through the Separate Accounts. The Section 26 Applicants believe that the Replacement Portfolio and the Removed Portfolio overlap and largely duplicate one another by having substantially similar investment objectives, policies and risks, and that consolidating the Removed Portfolio into the Replacement Portfolio would simplify the Contract prospectuses and related materials provided to Contract owners, thereby reducing the potential for Contract owner confusion.

13. The Section 26 Applicants believe that the deletion of an overlapping investment option should not adversely affect Contract owners and Participants given that a similar investment option will remain available under the Contracts and the Contracts will offer the same number of investment options or, in those cases where the number of investment options is being reduced, continue to offer a significant number of alternative investment options offering a full range of investment objectives, strategies and Advisers (currently expected to range in number from 27 to 66 after the Substitution versus 28 to 67 before the Substitution).

14. The Removed Portfolio and the Replacement Portfolio have identical investment objectives and substantially similar investment policies. Each Portfolio seeks long-term growth of capital as its investment objective. Under normal circumstances, each Portfolio invests at least 80% of its net assets, plus borrowings for investment purposes, in equity securities. Under normal circumstances, the Removed Portfolio invests at least 80% of its net assets in the equity securities of U.S. large capitalization companies, and the Replacement Portfolio invests at least 80% of its net assets in equity securities, primarily investing in the securities of large capitalization growth companies but also investing, to a lesser extent, in the equity securities of small- and mid-capitalization growth companies. Although the Replacement Portfolio may invest in a broader range of companies to a greater extent than the Removed Portfolio, both Portfolios seek to achieve the same long-term investment goal by emphasizing investments in large capitalization U.S. companies.

15. Each Portfolio invests primarily in common stocks, but may invest in other securities that its respective Advisers believe provide opportunities for capital growth, such as preferred stocks, warrants and securities convertible into common stock. In addition, each Portfolio may invest in derivatives: the Removed Portfolio may invest up to approximately 10% of its net assets in futures and options, while the Replacement Portfolio may invest up to 25% of its net assets in derivatives, such as exchange-traded futures and options contracts on indices or other similar instruments.

16. To achieve its investment objectives, each Portfolio combines active and passive management strategies. With respect to each Portfolio, AXA Equitable allocates approximately 50% of the Portfolio's net assets to a portion of the Portfolio that seeks to achieve the total return performance of an index (the Russell 1000 Growth Index in the case of the Removed Portfolio and the Russell 3000 Growth Index for the Replacement Portfolio) while maintaining as minimal tracking error as possible ("Index Allocated Portion"). The Russell 1000 Growth Index includes those Russell 1000 companies (the 1,000 largest companies of the Russell 3000 Index) with higher price-to-book ratios and higher forecasted growth values, while the Russell 3000 Growth Index includes those Russell 3000 companies (the 3,000 largest U.S. securities) with higher price-to-book ratios and higher forecasted growth values. The Russell 3000 Growth Index generally has greater exposure to small- and mid-capitalization companies than the Russell 1000 Growth Index, and thus has greater exposure to the risks of investing in such companies. However, the average weighted market capitalization of each Portfolio is almost the same (approximately $76.3 billion for the Russell 1000 Growth Index and approximately $70.7 billion for the Russell 3000 Growth Index, each as of December 31, 2009).

17. With respect to each Portfolio, AXA Equitable allocates the remaining 50% of the Portfolio's net assets among the other portions of the Portfolio that are actively managed by multiple Advisers (the "Active Allocated Portions") utilizing similar growth style strategies. The Active Allocated Portions of each Portfolio may invest, to a limited extent, in illiquid securities and in securities of foreign companies, including companies based in developing countries. The Replacement Portfolio's Active Allocated Portions may invest up to 25% of their total assets in foreign securities. The Active Allocated Portions of the Removed Portfolio also may invest in foreign securities, to a limited extent, but have no stated limit. Given the similarity between the Portfolios' holdings and investment objectives and strategies, the Trust intends to retain the Advisers to the Active Allocated Portions of the Removed Portfolio to manage the assets of the Active Allocated Portions of the Removed Portfolio that are transferred to the Replacement Portfolio in connection with the Substitution.

18. The Portfolios have substantially similar risk profiles. Each Portfolio is subject to the following principal risks: derivatives risk, equity risk, index strategy risk, large-cap company risk and leverage risk. The primary differences between the principal risks of the Portfolios are that the Replacement Portfolio also is subject to foreign securities risk, which is not a principal risk of the Removed Portfolio, and the Removed Portfolio also is subject to investment style risk, which is not a principal risk of the Replacement Portfolio. However, the Section 26 Applicants do not believe that these differences are significant. While the Replacement Portfolio has the flexibility to invest in foreign securities to a greater extent than the Removed Portfolio, each Portfolio's investments in foreign securities generally have been limited to a relatively small percentage of the Portfolio's assets. For instance, as of May 31, 2010, the Removed and Replacement Portfolios had invested approximately 1.8% and 3.8%, respectively, in foreign securities. In addition, while the Removed Portfolio is subject to investment style risk because its Advisers primarily utilize growth investing styles, both of the Portfolios seek long-term growth of capital, invest in similar types of securities and generally are classified by third party mutual fund rating organizations as aggressive equity portfolios (*e.g.,* Morningstar currently classifies each Portfolio as a large cap growth portfolio).

19. As provided in the chart below, the Section 26 Applicants anticipate that the Replacement Portfolio's total annual operating expense ratio (taking into account any expense waivers or reimbursements) will be lower than that of the Removed Portfolio immediately after the Substitution. The chart below compares the advisory fees and total annual operating expenses of the Class A and Class B shares of the Removed Portfolio and the Replacement Portfolio for the fiscal year ended December 31, 2009. Class A shares of each Portfolio are not subject to plans adopted pursuant to Rule 12b–1 under the 1940 Act.

	Removed portfolio Multimanager large cap growth portfolio (Class A) (percent)	Replacement portfolio Multimanager aggressive equity portfolio (Class A) (percent)
Management Fee [3]	0.75	0.59
Rule 12b–1 Fee	N/A	N/A
Other Expenses	0.32	0.23
Total Expenses	1.07	0.82

	Removed portfolio Multimanager large cap growth portfolio (Class A) (percent)	Replacement portfolio Multimanager aggressive equity portfolio (Class A) (percent)
Management Fee [3]	0.75	0.59
Rule 12b–1 Fee	0.25	0.25
Other Expenses	0.32	0.23
Total Expenses	1.32	1.07

As of December 31, 2009, the assets of the Replacement Portfolio were approximately $1.34 billion, while the assets of the Removed Portfolio were approximately $270 million.

20. The Section 26 Applicants currently expect that the proposed Substitution will be carried out on or about August 1, 2010, or as soon as reasonably practicable thereafter ("Substitution Date") and by supplements to the prospectuses for the Contracts and Separate Accounts, which were delivered to Contract owners and Participants at least thirty (30) days before the proposed Substitution, each Insurance Company will notify all Contract owners and Participants of its intention to take the necessary actions, including seeking the order requested by the application, to substitute shares of the Replacement Portfolio for the Removed Portfolio as described herein. The supplements advised Contract owners and Participants that, from the date of the supplement until the date of the proposed Substitution, Contract owners and Participants are permitted to make transfers of Contract value (or annuity unit value) out of a Removed Portfolio subaccount to one or more other subaccounts without the transfers (or exchanges) being treated as one of a limited number of permitted transfers (or exchanges) or a limited number of transfers (or exchanges) permitted without a transfer charge, as applicable. The supplements also will inform Contract owners and Participants that the Insurance Companies will not exercise any rights reserved under any Contract to impose additional restrictions on transfers until at least 30 days after the proposed Substitution.[4] The supplement also will advise Contract owners and Participants how to instruct the relevant Insurance Company, if so desired in light of the proposed Substitution, to reallocate Contract value from a Removed Portfolio subaccount to any other subaccount available for investment under their Contracts. In addition, the supplements will advise Contract owners and Participants that any Contract value remaining in a Removed Portfolio subaccount on the Substitution Date will be transferred to a Replacement Portfolio subaccount and that the proposed Substitution will take place at relative net asset value. The supplements will also advise Contract owners and Participants that for at least 30 days following the proposed Substitution, the Insurance Companies will permit Contract owners and Participants to make transfers of Contract value (or annuity unit value) out of a Replacement Portfolio subaccount to one or more other subaccounts without the transfers (or exchanges) being treated as one of a limited number of permitted transfers (or exchanges) or a limited number of transfers (or exchanges) permitted without a transfer charge, as applicable.

21. Each Insurance Company also has sent or will send Contract owners and Participants prospectuses for the Replacement Portfolio prior to the Substitution. The Section 26 Applicants have sent or will send the appropriate prospectus supplement (or other notice, in the case of Contracts no longer actively marketed and for which there are a relatively small number of existing Contract owners or Participants), containing this disclosure to all existing Contract owners and Participants. Prospective purchasers and new purchasers of Contracts will be provided with a Contract prospectus and the supplement containing disclosure regarding the proposed Substitution, as well as a prospectus and supplement for the Replacement Portfolio. The Contract prospectus and supplement, and the prospectus and supplement for the Replacement Portfolio will be delivered to purchasers of new Contracts in accordance with all applicable legal requirements.

22. In addition to the prospectus supplements distributed to Contract owners and Participants, within five business days after the Substitution Date, Contract owners and Participants will be sent a written notice of the Substitution informing them that the Substitution was carried out and that they may transfer all Contract value or cash value under a Contract in a subaccount invested in the Replacement Portfolio on the date of the notice to one or more other subaccounts available under their Contract at no cost and without regard to the usual limit on the frequency of transfers among the variable account options. The notice will also reiterate that (other than with respect to implementing policies and procedures designed to prevent

[3] The management fee schedule for the Removed Portfolio on an annual basis is equal to 0.750% on the first $750 million, 0.700% on the next $1 billion, 0.675% on the next $3 billion, 0.650% on the next $5 billion and 0.625% thereafter. The management fee schedule for the Replacement Portfolio on an annual basis is equal to 0.600% on the first $750 million, 0.550% on the next $1 billion, 0.525% on the next $3 billion, 0.500% on the next $5 billion and 0.475% thereafter.

[4] One exception to this is that the Insurance Companies may impose restrictions on transfers to prevent or limit disruptive transfer and other "market timing" activities by Contract owners, Participants or agents of Contract owners or Participants as described in the prospectuses for the Separate Accounts and the Portfolios.

disruptive transfers and other market timing activity) each Insurance Company will not exercise any rights reserved by it under the Contracts to impose additional restrictions on transfers or, to the extent transfer charges apply to a Contract, to impose any charges on transfers until at least 30 days after the Substitution Date. The Insurance Companies will also send each Contract owner and Participant a current prospectus for the Replacement Portfolio if they have not previously received a current version.

23. Each Insurance Company also is seeking approval of the proposed Substitution from any state insurance regulators whose approval may be necessary or appropriate. The proposed Substitution will take place at relative net asset value determined on the Substitution Date pursuant to Section 22 of the 1940 Act and Rule 22c–1 thereunder with no change in the amount of any Contract owner's or Participant's Contract value, cash value, or death benefit or in the dollar value of his or her investment in the Separate Accounts. The proposed Substitution will be effected by redeeming shares of the Removed Portfolio in cash and/or in-kind on the Substitution Date at their net asset value and using the proceeds of those redemptions to purchase shares of the Replacement Portfolio at their net asset value on the same date. All in-kind redemptions will be effected in accordance with the conditions set forth in the no-action letter issued by the staff of the Commission to Signature Financial Group, Inc. (pub. avail. Dec. 28, 1999).

24. Moreover, the Section 26 Applicants state that Contract owners and Participants will not incur any fees or charges as a result of the proposed Substitution, nor will their rights or insurance benefits or the Insurance Companies' obligations under the Contracts be altered in any way. Consequently, all expenses incurred in connection with the proposed Substitution, including any brokerage, legal, accounting, and other fees and expenses, will be paid by the Insurance Companies. In addition, the proposed Substitution will not impose any tax liability on Contract owners or Participants. The proposed Substitution will not cause the Contract fees and charges currently being paid by Contract owners and Participants to be greater after the Substitution than before the Substitution; all Contract-level fees will remain the same after the Substitution. In addition, because the Substitution will not be treated as a transfer for purposes of assessing transfer charges or computing the number of permissible transfers under the Contracts, no fees will be charged on the transfers made at the time of the Substitution.

25. The Section 26 Applicants represent that with respect to those Contract owners or Participants on the date of the Substitution, the Insurance Companies will reimburse the subaccounts investing in the Replacement Portfolio for a period of two years after the date of the Substitution, on the last business day of each fiscal period (not to exceed a fiscal quarter), such that the sum of the Replacement Portfolio's total operating expense ratio (taking into account any expense waivers and reimbursements) and subaccount expense ratio (asset-based fees and charges deducted on a daily basis from subaccount assets and reflected in the calculations of subaccount unit value) for such period will not exceed, on an annualized basis, the sum of the Removed Portfolio's total operating expense ratio (taking into account any expense waivers and reimbursements) and subaccount expense ratio for fiscal year 2009.

Applicants' Legal Analysis

1. Section 26(c) of the 1940 Act prohibits the depositor of a registered unit investment trust that invests in the securities of a single issuer from substituting the securities of another issuer without Commission approval. Section 26(c) provides that "[t]he Commission shall issue an order approving such substitution if the evidence establishes that it is consistent with the protection of investors and the purposes fairly intended by the policy and provisions of this title."

2. The Section 26 Applicants assert that the proposed Substitution involves a substitution of securities within the meaning of Section 26(c) of the 1940 Act and therefore request an order from the Commission pursuant to Section 26(c) approving the proposed Substitutions.

3. The Section 26 Applicants state they have reserved the right under the Contracts to substitute shares of another underlying investment option for one of the current underlying investment options offered as a funding option under the Contracts both to protect themselves and their Contract owners and Participants in situations where either might be harmed or disadvantaged by events affecting the issuer of the securities held by a Separate Account and to preserve the opportunity to replace such shares in situations where a substitution could benefit the Insurance Companies and their respective Contract owners and Participants.

4. The Section 26 Applicants argue that the Removed Portfolio and the Replacement Portfolio have identical investment objectives and substantially similar investment policies and risks. In addition, the Section 26 Applicants clarify that the proposed Substitution retains for Contract owners and Participants the investment flexibility that is a central feature of the Contracts. The Section 26 Applicants assert that any impact on the investment programs of affected Contract owners and Participants, including the appropriateness of the available investment options, should therefore be negligible.

5. Furthermore, the Section 26 Applicants claim that the Substitution will permit the Insurance Companies to present information to their Contract owners and Participants in a simpler and more concise manner. It is anticipated that after the Substitution, Contract owners and Participants will be provided with disclosure documents that contain a simpler presentation of the available investment options under their Contracts.

6. In addition, the Section 26 Applicants point out that as a result of the proposed Substitution, Contract owners and Participants with subaccount balances currently invested in the Removed Portfolio will have a lower total operating expense ratio after the Substitution as Contract owners or Participants with subaccount balances invested in the Replacement Portfolio. In this regard, each Insurance Company has agreed to impose certain expense limits, as discussed earlier in the application, to ensure that Contract owners and Participants do not incur higher expenses as a result of the Substitution for a period of two years after the Substitution.

7. In addition to the foregoing, the Section 26 Applicants generally submit that the proposed Substitution meets the standards that the Commission and its staff have applied to similar substitutions that the Commission previously has approved. The Section 26 Applicants also submit that the proposed Substitution is not of the type that Section 26(c) was designed to prevent. Unlike traditional unit investment trusts where a depositor could only substitute investment securities in a manner that permanently affected all the investors in the trust, the Contracts provide each Contract owner or Participant with the right to exercise his or her own judgment, and transfer Contract values and cash values into and among other investment options available to Contract owners or Participants under their Contracts.

Additionally, the Section 26 Applicants assert that the proposed Substitution will not reduce in any manner the nature or quality of the available investment options.

8. Moreover, the Section 26 Applicants will offer Contract owners and Participants the opportunity to transfer amounts out of the affected subaccounts without any cost or other penalty (other than those necessary to implement policies and procedures designed to prevent disruptive transfer and other market timing activity) that may otherwise have been imposed for a period beginning on the date of the supplement notifying Contract owners and Participants of the proposed Substitution and ending no earlier than thirty (30) days after the Substitution. The proposed Substitution, therefore, will not result in the type of costly forced redemption that Section 26(c) was designed to prevent.

9. The Section 26 Applicants also note that the proposed Substitution is also unlike the type of substitution that Section 26(c) was designed to prevent in that by purchasing a Contract or participating in a group Contract, Contract owners and Participants select much more than a particular underlying fund in which to invest their Contract values; they also select the specific type of insurance coverage offered by the Section 26 Applicants under the applicable Contract, as well as numerous other rights and privileges set forth in the Contract. Contract owners and Participants also may have considered the Insurance Company's size, financial condition, and its reputation for service in selecting their Contract. These factors will not change as a result of the proposed Substitution, nor will the annuity, life or tax benefits afforded under the Contracts held by any of the affected Contract owners or Participants.

10. The Section 17 Applicants request an order pursuant to Section 17(b) of the 1940 Act exempting them from the provisions of Section 17(a) of the 1940 Act to the extent necessary to permit them to carry out the In-Kind Transactions in connection with the proposed Substitution.

11. Section 17(a)(1) of the 1940 Act, in relevant part, prohibits any affiliated person of a registered investment company, or any affiliated person of such a person, acting as principal, from knowingly selling any security or other property to that company. Section 17(a)(2) of the 1940 Act generally prohibits the same persons, acting as principals, from knowingly purchasing any security or other property from the registered investment company.

12. Section 17(b) of the 1940 Act provides that the Commission may, upon application, issue an order exempting any proposed transaction from the provisions of Section 17(a) if: (i) the terms of the proposed transactions are reasonable and fair and do not involve overreaching on the part of any person concerned; (ii) the proposed transactions are consistent with the policy of each registered investment company concerned; and (iii) the proposed transactions are consistent with the general purposes of the 1940 Act.

13. The Removed Portfolio and the Replacement Portfolio may be deemed to be affiliated persons of one another, or affiliated persons of an affiliated person. Shares held by a separate account of an insurance company are legally owned by the insurance company. Thus, the Insurance Companies and their affiliates collectively own substantially all of the shares of the Trust. Accordingly, the Trust and its respective Portfolios may be deemed to be under the control of the Insurance Companies notwithstanding the fact that the Contract owners and Participants may be considered the beneficial owners of those shares held in the Separate Accounts. If the Trust is under the common control of the Insurance Companies, then each Insurance Company is an affiliated person or an affiliated person of an affiliated person of the Trust and its respective Portfolios. If the Trust and its respective Portfolios are under the control of the Insurance Companies, then the Trust and its respective affiliates are affiliated persons of the Insurance Companies.

14. Regardless of whether the Insurance Companies can be considered to control the Trust and its Portfolios, the Insurance Companies may be deemed to be affiliated persons of the Trust and its Portfolios, including the Removed Portfolio and the Replacement Portfolio, because the Insurance Companies (which are under common control) and their affiliates own of record more than 5% of the outstanding shares. Likewise, each of the Trust's Portfolios may be deemed to be an affiliated person of each Insurance Company. As a result of these relationships, the Removed Portfolio may be deemed to be an affiliated person of an affiliated person (the Insurance Companies or the Separate Accounts) of the Replacement Portfolio, and vice versa.

15. The proposed In-Kind Transactions could be seen as the indirect purchase of shares of the Replacement Portfolio with portfolio securities of the Removed Portfolio and the indirect sale of portfolio securities of the Removed Portfolio for shares of the Replacement Portfolio. Pursuant to this analysis, the proposed In-Kind Transactions also could be categorized as a purchase of shares of the Replacement Portfolio by the Removed Portfolio, acting as principal, and a sale of portfolio securities by the Removed Portfolio, acting as principal, to the Replacement Portfolio. In addition, the proposed In-Kind Transactions could be viewed as a purchase of securities from the Removed Portfolio and a sale of securities to the Replacement Portfolio by each Insurance Company (or the Separate Accounts), acting as principal. If categorized in this manner, the proposed In-Kind Transactions may be deemed to contravene Section 17(a) due to the affiliated status of these participants.

16. The Section 17 Applicants assert that the In-Kind Transactions will be effected at the respective net asset values of the Removed Portfolio and the Replacement Portfolio, as determined in accordance with the procedures disclosed in the registration statement for the Trust and as required by Rule 22c–1 under the 1940 Act. The In-Kind Transactions will not change the dollar value of any Contract owner's or Participant's investment in any of the Separate Accounts, the value of any Contract, the accumulation value or other value credited to any Contract, or the death benefit payable under any Contract. Immediately after the proposed In-Kind Transactions, the value of a Separate Account's investment in the Replacement Portfolio will equal the value of its investments in the Removed Portfolio (together with the value of any pre-existing investments in the Replacement Portfolio) immediately before the In-Kind Transactions.

17. Rule 17a–7 under the 1940 Act exempts from the prohibitions of Section 17(a), subject to certain enumerated conditions, a purchase or sale transaction between registered investment companies or separate series of registered investment companies, which are affiliated persons, or affiliated persons of affiliated persons, of each other, between separate series of a registered investment company, or between a registered investment company or a separate series of a registered investment company and a person which is an affiliated person of such registered investment company (or affiliated person of such person) solely by reason of having a common investment adviser or investment advisers which are affiliated persons of

each other, common directors, and/or common officers.

18. However, one of the conditions enumerated in Rule 17a–7 requires that the transaction be a purchase or sale for no consideration other than cash payment against prompt delivery of a security for which market quotations are readily available. If the proposed In-Kind Transactions are viewed as purchases and sales of securities, the consideration in the proposed redemptions of shares of the Removed Portfolio and the proposed purchases of shares of the Replacement Portfolio would not be cash, but rather, the portfolio securities received from the Removed Portfolio.

19. The Section 17 Applicants will ensure that the Trust will carry out the proposed In-Kind Transactions in conformity with the conditions of Rule 17a–7, except that the consideration paid for the securities being purchased or sold will not be cash.

20. For the reasons stated above, the Section 17 Applicants submit that the terms of the proposed In-Kind Transactions, including the consideration to be paid and received, as described in the application, are reasonable and fair and do not involve overreaching on the part of any person concerned. Furthermore, the Section 17 Applicants represent that the proposed In-Kind Transactions will be consistent with the policies of the Removed and corresponding Replacement Portfolios, as recited in their respective current registration statements, and that the proposed In-Kind Transactions are consistent with the general purposes of the 1940 Act and do not present any conditions or abuses that the 1940 Act was designed to prevent.

Conclusion

For the reasons set forth in the application, the Applicants each respectively request that the Commission issue an order of approval pursuant to Section 26(c) of the 1940 Act and an order of exemption pursuant to Section 17(b) of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62441; File No. SR–FINRA–2010–027]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving Proposed Rule Change Relating to the Restated Certificate of Incorporation of Financial Industry Regulatory Authority, Inc.

July 2, 2010.

On May 21, 2010, Financial Industry Regulatory Authority, Inc. ("FINRA") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the Restated Certificate of Incorporation of FINRA ("Certificate of Incorporation") to specify its quorum requirements. The proposed rule change was published for comment in the **Federal Register** on June 1, 2010.[3] The Commission received no comment letters on the proposed rule change. This order approves the proposed rule change.

The proposed rule change would amend FINRA's Certificate of Incorporation to specify the quorum required for a meeting of FINRA members and the quorum required to take action on a matter where a separate vote by a class or group is required.[4] FINRA has represented that it has proposed this rule change in order to preserve FINRA's current quorum requirements in anticipation of amendments to the General Corporation Law of the State of Delaware (the "General Corporation Law") that will take effect on August 1, 2010.

Section 215(c) of the General Corporation Law, as currently in effect, provides that the certificate of incorporation or bylaws of a nonstock corporation may specify the number of members having voting power who shall be present or represented by proxy at any meeting in order to constitute a quorum for the transaction of any business and, that in the absence of such specification, one-third of the members of such corporation shall constitute a quorum at a meeting of such members.[5] FINRA is a nonstock corporation and neither FINRA's Certificate of Incorporation nor its By-Laws specify the quorum required at a meeting of its members. Accordingly, pursuant to Section 215(c) of the General Corporation Law, attendance in person or by proxy of one-third of FINRA's members currently constitutes a quorum at a meeting of such members.[6]

On August 1, 2010, the General Corporation Law will be amended to, among other things, add new Section 215(c)(4), which section will add a new default quorum requirement for instances where a separate vote by a class or group of members is required. Specifically, effective August 1, 2010, unless the certificate of incorporation or bylaws of a nonstock corporation provides otherwise, where a separate vote by a class or group of members is required, a majority of the members of such class or group shall constitute a quorum entitled to take action with respect to the vote on such matter.[7]

In anticipation of the foregoing amendment to the General Corporation Law, FINRA has proposed to amend its Certificate of Incorporation to set forth quorum requirements for its meetings of members, including in instances where a separate vote by a class or group is required. Specifically, FINRA has proposed that, at all meetings of its members, the presence in person or by proxy of one-third of the members entitled to vote at the meeting shall constitute a quorum; provided, however, where a separate vote by a class or group of members is required, the presence in person or by proxy of one-third of the members of such class or group shall constitute a quorum with respect to the vote on that matter. By incorporating these quorum requirements into the Certification of Incorporation, FINRA has represented that the proposed rule change would maintain FINRA's current one-third quorum requirement where a separate vote of classes or groups of members is required instead of resorting to the default requirement in the General Corporation Law.

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association.[8] In particular, the

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 62160 (May 24, 2010), 75 FR 30457.

[4] Pursuant to FINRA's Certificate of Incorporation and By-Laws, FINRA members vote as three distinct classes, based upon firm size, for the election of members to the Board of Governors, *i.e.,* Small Firm Governors, Mid-Size Firm Governor, and Large Firm Governors.

[5] Del. Code Ann. tit. 8 § 215(c) and (c)(1) (2010).

[6] *See id.*

[7] Del. H.B. 341, 145th Gen. Assem. § 19 (2010).

[8] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Commission finds that the proposed rule change is consistent with Section 15A(b)(2) of the Act,[9] which requires, among other things, that FINRA be so organized and have the capacity to be able to carry out the purposes of the Act, to comply with the Act, and to enforce compliance by FINRA members and persons associated with members with the Act, the rules and regulations thereunder, and FINRA rules.

The Commission notes that the proposed rule change would codify FINRA's current quorum requirements. By clearly specifying FINRA's quorum requirements in its Certificate of Incorporation, the Commission believes that the proposed rule change would provide greater transparency about FINRA's deliberative and voting processes, which should facilitate the ability of FINRA's members to conduct business at meetings and exercise their voting rights. Therefore, the Commission believes that the proposed rule change is consistent with the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[10] that the proposed rule change (SR–FINRA–2010–027), be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62451; File No. SR–NASDAQ–2010–083]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by The NASDAQ Stock Market LLC To Expand its $1 Strike Program

July 6, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on July 2, 2010, The NASDAQ Stock Market LLC (the "Exchange" or "NASDAQ") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASDAQ is filing with the Commission a proposal for the NASDAQ Options Market ("NOM" or "Exchange") to amend Chapter IV, Supplementary Material .02 to Section 6 (Series of Options Contracts Open for Trading) to expand the Exchange's $1 Strike Price Program (the "$1 Strike Program" or "Program")[3] to allow the Exchange to select 150 individual stocks on which options may be listed at $1 strike price intervals; and to correct a reference.

The text of the proposed rule change is available from NASDAQ's Web site at *http://nasdaq.cchwallstreet.com/Filings/,* at NASDAQ's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASDAQ included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASDAQ has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

This proposed rule change is based on a filing of NASDAQ OMX PHLX, Inc. ("Phlx") that was recently approved by the Commission.[4]

Currently, the $1 Strike Program allows the Exchange to select a total of 55 individual stocks on which option series may be listed at $1 strike price intervals. In order to be eligible for selection into the Program, the underlying stock must close below $50 in its primary market on the previous trading day. If selected for the Program, the Exchange may list strike prices at $1 intervals from $1 to $50, but no $1 strike price may be listed that is greater than $5 from the underlying stock's closing price in its primary market on the previous day. The Exchange may also list $1 strikes on any other option class designated by another securities exchange that employs a similar Program under their respective rules.

The restrictions in the current $1 Strike Program remain and are not proposed to be modified by this filing. The Exchange may not list $1 strike intervals on any issue where the strike price is greater than $50. The Exchange may not list long-term option series ("LEAPS")[5] at $1 strike price intervals for any class selected for the Program, except as specified in Chapter IV, Supplementary Material .02 to Section 6.[6] The Exchange is also restricted from listing series with $1 intervals within $0.50 of an existing strike price in the same series, except that strike prices of $2, $3, and $4 shall be permitted within $0.50 of an existing strike price for classes also selected to participate in the $0.50 Strike Program.[7]

The $1 Strike Program has been extremely successful since it was initiated as a pilot program in 2008,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The $1 Strike Program was initially approved as a pilot on March 12, 2008. *See* Securities Exchange Act Release No. 57478 (March 12, 2008), 73 FR 14521(March 18, 2008)(SR–NASDAQ–2007–004 and SR–NASDAQ–2007–080)(order approving). The program was subsequently made permanent and expanded. *See* Securities Exchange Act Release No. 58093 (July 3, 2008), 73 FR 39756 (July 10, 2008)(SR–NASDAQ–2008–057)(notice of filing and immediate effectiveness). The program was last expanded in 2009. *See* Securities Exchange Act Release No. 59588 (March 17, 2009), 74 FR 12410 (March 24, 2009)(SR–NASDAQ–2009–025)(notice of filing and immediate effectiveness). The $1 Strike Program is in Chapter IV, Section 6.

[4] *See* Securities Exchange Act Release No. 62420 (June 30, 2010)(SR–Phlx–2010–72)(notice of filing).

[5] Long-Term Equity Anticipation Securities (LEAPS) are long term options that generally expire from twelve to thirty-nine months from the time they are listed. Chapter IV, Section 8. Long-term index options are considered separately in Chapter XIV, Section 11. For purposes of the Program, long-term options (LEAPS) are considered to be option series having greater than nine months until expiration. Chapter IV, Supplementary Material .02 to Section 6.

[6] Subsection (c) of Chapter IV, Supplementary Material .02 to Section 6 states that: The Exchange may list $1 strike prices up to $5 in any series having greater than nine months until expiration (LEAPS(R)) in up to 200 option classes on individual stocks. *See* Securities Exchange Act Release No. 61347 (January 13, 2010), 75 FR 3513 (January 21, 2010)(SR–NASDAQ–003)(notice of filing and immediate effectiveness).

[7] Regarding the $0.50 Strike Program, which allows $0.50 strike price intervals for options on stocks trading at or below $3.00, *see* Chapter IV, Supplementary Material .05 to Section 6 and Securities Exchange Act Release No. 60952 (November 6, 2009), 74 FR 59277 (November 17, 2009)(SR–NASDAQ–2009–099)(notice of filing and immediate effectiveness). *See also* Securities Exchange Act Release No. 61736 (March 18, 2010), 75 FR 14229 (March 24, 2010)(SR–NASDAQ–2010–038)(notice of filing and immediate effectiveness allowing concurrent listing of $3.50 and $4 strikes for classes that participate in both the $0.50 Strike Program and the $1 Strike Program).

with no substantive problems attributed to the Program or listing and trading options at $1 strike intervals. This has not changed. Moreover, the number of $1 strike options traded on the Exchange has continued to increase since the inception of the Program such that these options are now among some of the most popular products traded on the Exchange.

The Exchange now proposes to expand the Program to allow the Exchange to select a total of 150 individual stocks on which option series may be listed at $1 strike price intervals. The proposal would expand $1 strike offerings to market participants (*e.g.* traders and retail investors) and thereby enhance their ability to tailor investing and hedging strategies and opportunities in a volatile market place. The $1 Strike Program (including the existing restrictions such as not listing any series that would result in strike prices being $0.50 apart) would otherwise remain unchanged.

As stated in Commission orders approving the initial $1 strike price pilot programs of options exchanges,[8] the Exchange believes that $1 strike price intervals provide investors with significantly greater flexibility in the trading of equity options that overlie lower price stocks by allowing investors to establish equity options positions that are better tailored to meet their investment, trading and risk management objectives.

The Exchange notes that, in addition to options classes that are trading pursuant to the $1 strike programs of options exchanges, there are also options trading at $1 strike intervals on approximately 282 Exchange Traded Fund Shares ("ETFs"),[9] ETF options trading at $1 intervals has not, however, negatively impacted the system capacity of the Exchange or OPRA.

With regard to the impact of this proposal on system capacity, the Exchange has analyzed its capacity and represents that it and OPRA have the necessary systems capacity to handle the potential additional traffic associated with the listing and trading of an expanded number of series in the $1 Strike Program.

The Exchange believes that the $1 Strike Program has provided investors with greater trading opportunities and flexibility and the ability to more closely tailor their investment and risk management strategies and decisions to the movement of the underlying security. Furthermore, the Exchange has not detected any material proliferation of illiquid options series resulting from the narrower strike price intervals. For these reasons, the Exchange requests an expansion of the current Program and the opportunity to provide investors with additional strikes for investment, trading, and risk management purposes.

Finally, the proposal also corrects an internal rule reference in subsection (c) of Chapter IV, Supplementary Material .06 to Section 6, to conform the reference to a re-numbering of Supplementary Material .06 in a previous filing.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act[10] in general, and furthers the objectives of Section 6(b)(5) of the Act[11] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. The Exchange believes that expanding the current $1 Strike Program will result in a continuing benefit to investors by giving them more flexibility to closely tailor their investment decisions in greater number of securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not significantly affect the protection of investors or the public interest, does not impose any significant burden on competition, and, by its terms, does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13]

The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposal is substantially similar to that of another exchange that has been approved by the Commission.[14] Therefore, the Commission designates the proposal operative upon filing.[15]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62457; File No. SR–CBOE–2010–063]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of Proposed Rule Change, as Modified by Amendment No. 1 Thereto, To Amend the CBOE Stock Exchange Fee Schedule

July 6, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 25, 2010, the Chicago Board Options Exchange, Incorporated (the "Exchange" or "CBOE") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. On June 30, 2010, CBOE filed Amendment No. 1 to the proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the CBOE Stock Exchange ("CBSX") Fee Schedule to expand the application of the fee for any trade that is the stock component of a qualified contingent trade. The text of the proposed rule change is available on the Exchange's Web site (*http://www.cboe.org/legal*), at the Exchange's principal office, on the Commission's Web site, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Amendment No. 1 corrected an error in the statutory basis section of the proposed rule change.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The CBSX Fees Schedule currently lists a fee for executions of the stock component of a stock-option cross trade. Stock-option cross trades are only one form of qualified contingent trades. Other forms of qualified contingent trades can include, for example, stock-future trades. CBSX would like to amend its Fees Schedule so that cross trades on CBSX that are the stock component of a larger qualified contingent trade are covered by the $0.0010 per share fee.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act")[4] and the rules and regulations thereunder and, in particular, the requirements of Section 6(b) of the Act.[5] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(4)[6] requirements that the rules of an exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The proposed rule change promotes the equitable allocation of fees by applying a fee on the stock component of all types of qualified contingent cross trades, as opposed to just one form of qualified contingent cross trade.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change is designated by the Exchange as establishing or changing a due, fee, or other charge, thereby qualifying for

[4] 15 U.S.C. 78s(b)(1) (sic).

[5] 15 U.S.C. 78f(b).

[6] 15 U.S.C. 78f(b)(4).

effectiveness on filing pursuant to Section 19(b)(3)(A)(ii) [7] of the Act and subparagraph (f)(2) of Rule 19b–4 [8] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[9]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File No. SR–CBOE–2010–063 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–CBOE–2010–063. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–CBOE–2010–063 and should be submitted on or before August 3, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62455; File No. SR–NYSE–2010–51]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Extending the Pilot Program That Offers Liquidity Takers a Reduced Transaction Fee Structure for Certain Bond Trades Executed on the NYSE Bonds[SM] System to December 31, 2010

July 6, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") [1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on June 30, 2010, the New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the pilot program that offers liquidity takers a reduced transaction fee structure for certain bond trades executed on the NYSE Bonds[SM] system ("NYSE Bonds") to December 31, 2010. The text of the proposed rule change is available at the Exchange's principal office, *http://www.nyse.com,* the Commission's Public Reference Room, and on the Commission's Web site at *http://www.sec.gov.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The New York Stock Exchange LLC (the "Exchange" or the "NYSE") proposes to extend the pilot program that offers liquidity takers a reduced transaction fee structure for certain bond trades executed on the NYSE Bonds[SM] system ("NYSE Bonds") to December 31, 2010.

This pilot program commenced in January 2008 [3] and has been extended several times since that time.[4] It is scheduled to terminate, if not extended, on June 30, 2010.

The pilot program reduces transaction fees charged to liquidity takers for transactions executed on NYSE Bonds with a staggered transaction fee schedule based on the number of bonds purchased or sold in excess of ten (10) bonds. The extended fee filing pilot program provides for the following transaction fee schedule: (1) When the liquidity taker purchases or sells from one to ten (10) bonds, the Exchange will charge an execution fee of $0.50 per bond; (2) when the liquidity taker purchases or sells from eleven (11) to twenty five (25) bonds, the Exchange will charge an execution fee of $0.20 per

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 57176 (January 18, 2008), 73 FR 4929 (January 28, 2008) (SR–NYSE–2008–04).

[4] *See* Securities Exchange Act Release Nos. 57823 (May 15, 2008), 73 FR 29804 (May 22, 2008) (SR–NYSE–2008–38), 59178 (December 30, 2008), 74 FR 748 (January 7, 2009) (SR–NYSE–2008–137) and 61201 (December 18, 2009), 74 FR 68651 (December 28, 2009) (SR–NYSE–2009–127).

bond, and (3) when the liquidity taker purchases or sells twenty-six (26) bonds or more, the Exchange will charge an execution fee of $0.10 per bond.

For example, if a liquidity taker purchases or sells five (5) bonds, the Exchange will charge $.50 per bond, or a total of $2.50 for execution fees. If a liquidity taker purchases or sells twenty (20) bonds, the Exchange will charge $.20 per bond or a total of $4.00 for execution fees. If a liquidity taker purchases or sells thirty (30) bonds, the Exchange will charge $.10 per bond or a total of $3.00 for execution fees.

The Exchange will continue to impose a $100 execution fee cap per transaction.

The Exchange will seek to file with the Commission, a proposal to make this liquidity taker program permanent. Accordingly, the Exchange proposes to extend the pilot program for an additional six (6) months in order to give the Exchange the necessary time to complete the 19b–4 process regarding the program permanency filing.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 [5] of the Securities Exchange Act of 1934 (the "Act") [6] in general and Section 6(b)(4) of the Act [7] in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [8] of the Act and subparagraph (f)(2) of Rule 19b–4 [9] thereunder, because it establishes or changes a due, fee, or other charge imposed on its members by the NYSE.

At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSE–2010–51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2010–51. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2010–51 and should be submitted on or before August 3, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62463; File No. SR–CBOE–2010–043]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Order Granting Approval of Proposed Rule Change To Enable the Listing and Trading of Options on the Sprott Physical Gold Trust

July 7, 2010.

On May 11, 2010, the Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade options on the Sprott Physical Gold Trust ("Sprott Options"). The proposed rule change was published in the **Federal Register** on June 4, 2010.[3] The Commission received no comments on the proposal. This order approves the proposed rule change.

I. Description of Proposal

Recently, the Commission authorized CBOE to list and trade options on the SPDR Gold Trust,[4] the iShares COMEX Gold Trust, the iShares Silver Trust,[5] the ETFS Silver Trust and the ETFS Gold Trust,[6] the ETFS Palladium Trust and the ETFS Platinum Trust.[7] Now, the

Exchange proposes to list and trade options on the Sprott Physical Gold Trust.

Under current Rule 5.3, only Units (also referred to herein as exchange traded fund ("ETFs")) representing (i) interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments including, but not limited to, stock index futures contracts, options on futures, options on securities and indexes, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse purchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") comprising or otherwise based on or representing investments in indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments), or (ii) interests in a trust or similar entity that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency and pays the beneficial owner interest and other distributions on deposited non-U.S. currency, if any, declared and paid by the trust; or (iii) commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool Units"), or (iv) represent interests in the streetTRACKS Gold Trust or the iShares COMEX Gold Trust or the iShares Silver Trust or the ETFS Silver Trust or the ETFS Gold Trust or the ETFS Palladium Trust or the ETFS Platinum Trust; or (v) represents an interest in a registered investment company ("Investment Company") organized as an open-end management investment company or similar entity, that invests in a portfolio of securities selected by the Investment Company's investment adviser consistent with the Investment Company's investment objectives and policies, which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value ("NAV"), and when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV ("Managed Fund Share") are eligible as underlying securities for options traded on the Exchange.[8] This rule change proposes to expand the types of ETFs that may be approved for options trading on the Exchange to include the Sprott Physical Gold Trust.

Apart from allowing the Sprott Physical Gold Trust to be an underlying for options traded on the Exchange as described above, the listing standards for ETFs will remain unchanged from those that apply under current Exchange rules. ETFs on which options may be listed and traded must still be listed and traded on a national securities exchange and must satisfy the other listing standards set forth in Interpretation and Policy .06 to Rule 5.3.

Specifically, in addition to satisfying the aforementioned listing requirements, Units must meet either: (1) The criteria and guidelines under Rule 5.3 and Interpretation and Policy .01 to Rule 5.3, *Criteria for Underlying Securities*; or (2) they must be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue Units in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

The Exchange states that the current continued listing standards for options on ETFs will apply to options on the Sprott Physical Gold Trust. Specifically, under Interpretation and Policy .08 to Rule 5.4, options on Units may be subject to the suspension of opening transactions as follows: (1) In the case of Units listed pursuant to Interpretation and Policy .06(v)(E)(y) to Rule 5.3, following the initial twelve-month period beginning upon the commencement of trading of the Units, if there are fewer than 50 record and/or beneficial holders of the Units for 30 or more consecutive trading days; or (2) in the case of Units listed pursuant to Interpretation and Policy .06(v)(E)(x) to Rule 5.3, in accordance with the terms of paragraphs (a)–(d) of Interpretation and Policy .01 to Rule 5.4; or (3) the value of the index or portfolio of securities, non-U.S. currency, or portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or Financial Instruments and Money Market Instruments on which Units are based is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing on the Exchange inadvisable.

Additionally, the Sprott Physical Gold Trust shall not be deemed to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering the Sprott Physical Gold Trust, if the Sprott Physical Gold Trust ceases to be an "NMS stock" as provided for in paragraph (f) of Interpretation and Policy .01 of Rule 5.4 or the Sprott Physical Gold Trust is halted from trading on its primary market.

The addition of the Sprott Physical Gold Trust to Interpretation and Policy .06 to Rule 5.3 will not have any effect on the rules pertaining to position and exercise limits[9] or margin.[10]

The Exchange represents that its surveillance procedures applicable to trading in options on the Sprott Physical Gold Trust will be similar to those applicable to all other options on other Units currently traded on the Exchange. The Exchange represents that its surveillance procedures applicable to trading in options on the Sprott Physical Gold Trust will be similar to those applicable to all other options on other ETFs currently traded on the Exchange. Also, the Exchange may obtain information from the New York Mercantile Exchange, Inc. ("NYMEX") (a member of the Intermarket Surveillance Group) related to any financial instrument that is based, in whole or in part, upon an interest in or performance of gold.

II. Commission Findings

After careful consideration, the Commission finds that the proposed rule change submitted by CBOE is

[8] *See* Interpretation and Policy .06 to Rule 5.3.

[9] *See* CBOE Rules 4.11 and 4.12.

[10] *See* CBOE Rule 12.3.

consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange [11] and, in particular, the requirements of Section 6 of the Act.[12] Specifically, the Commission finds that the proposal is consistent with Section 6(b)(5) of the Act,[13] which requires, among other things, that the rules of a national securities exchange be designed to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. In accordance with the Memorandum of Understanding entered into between the Commodity Futures Trading Commission ("CFTC") and the Commission on March 11, 2008, and in particular the addendum thereto concerning Principles Governing the Review of Novel Derivative Products, the Commission believes that novel derivative products that implicate areas of overlapping regulatory concern should be permitted to trade in either or both a CFTC- or Commission-regulated environment, in a manner consistent with laws and regulations (including the appropriate use of all available exemptive and interpretive authority).

As a national securities exchange, the CBOE is required under Section 6(b)(1) of the Act [14] to enforce compliance by its members, and persons associated with its members, with the provisions of the Act, Commission rules and regulations thereunder, and its own rules. In addition, brokers that trade Sprott Options will also be subject to best execution obligations and FINRA rules.[15] Applicable exchange rules also require that customers receive appropriate disclosure before trading Sprott Options.[16] Further, brokers opening accounts and recommending options transactions must comply with relevant customer suitability standards.[17]

Sprott Options will trade as options under the trading rules of the CBOE. These rules, among other things, are designed to avoid trading through better displayed prices for Sprott Options available on other exchanges and, thereby, satisfy CBOE's obligation under the Options Order Protection and Locked/Crossed Market Plan.[18] Series of the Sprott Options will be subject to exchange rules regarding continued listing requirements, including standards applicable to the underlying Sprott Physical Gold Trust. Shares of the Sprott Physical Gold Trust must continue to be traded through a national securities exchange or through the facilities of a national securities association, and must be "NMS stock" as defined under Rule 600 of Regulation NMS.[19] In addition, the underlying shares must continue to comply with the Exchange's continued listing standards applicable to Units.[20] If the Sprott Physical Gold Trust shares fail to meet these requirements, the exchanges will not open for trading any new series of the respective Sprott Options.

CBOE has represented that it has surveillance programs in place for the listing and trading of Sprott Options. For example, CBOE may obtain trading information via the ISG from the NYMEX related to any financial instrument traded there that is based, in whole or in part, upon an interest in, or performance of, gold. Additionally, the listing and trading of Sprott Options will be subject to the exchange's rules pertaining to position and exercise limits [21] and margin.[22]

III. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[23] that the propose rule change (SR–CBOE–2010–043) be, and is hereby, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62464; File No. SR–BX–2010–045]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Enable the Listing and Trading on BOX of Options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust

July 7, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2010, NASDAQ OMX BX, Inc. (the "Exchange"), filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Exchange filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASDAQ OMX BX, Inc. (the "Exchange") proposes to amend the Rules of the Boston Options Exchange Group, LLC ("BOX") to enable the listing and trading on BOX of options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at *http://nasdaqomxbx.cchwallstreet.com/NASDAQOMXBX/Filings/.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b-4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b-4(f)(6).

of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Recently, the U.S. Securities and Exchange Commission ("SEC" or "Commission") authorized the listing and trading on BOX of options on the SPDR Gold Trust [5] and the iShares COMEX Gold Trust and the iShares Silver Trust.[6] Now, the Exchange proposes for BOX to list and trade options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust.

Under current Chapter IV, Section 3(i) of the BOX Rules, only Exchange-Traded Fund Shares, or ETFs, that are traded on a national securities exchange and are defined as an "NMS" stock under Rule 600 of Regulation NMS, and that (i) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments, including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") comprising or otherwise based on or representing investments in broad based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments) or (ii) represent interests in a trust that holds a specified non-U.S. currency or currencies deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares") or (iii) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs") or (iv) are issued by the SPDR® Gold Trust or the iShares COMEX Gold Trust or the iShares Silver Trust are eligible as underlying securities for options traded on BOX.[7] This rule change proposes to expand the types of ETFs that may be approved for options trading on BOX to include the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust.

Apart from allowing the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust to be underlying securities for options traded on BOX, as described above, the listing standards for ETFs will remain unchanged from those that apply under current BOX rules. ETFs on which options may be listed and traded must still be listed and traded on a national securities exchange and must satisfy the other listing standards set forth in Chapter IV, Section 3(i) of the BOX Rules.

Specifically, in addition to satisfying the aforementioned listing requirements, ETFs must either (1) meet the criteria and guidelines set forth in paragraphs (a) and (b) of Chapter IV, Section 3 or (2) be available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer of the Exchange-Traded Fund Shares, all as provided in the Exchange-Traded Fund Shares' prospectus.

The Exchange states that the current continued listing standards for options on ETFs will apply to options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust. Specifically, under Chapter IV, Section 4(h) of the BOX Rules, options on Exchange-Traded Fund Shares may be subject to the suspension of opening transactions as follows: (1) Following the initial twelve-month period beginning upon the commencement of trading of the Exchange-Traded Fund Shares, there are fewer than 50 record and/or beneficial holders of the Exchange-Traded Fund Shares for 30 or more consecutive trading days; (2) the value of the underlying silver, gold, palladium or platinum, respectively, is no longer calculated or available; or (3) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing in such options on BOX inadvisable. Additionally, the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust shall not be deemed to meet the requirements for continued approval, and BOX shall not open for trading any additional series of option contracts of the class covering the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust, respectively, if the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust ceases to be an "NMS stock" as provided for in Chapter IV, Section 4(b)(vi) of the BOX Rules or the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust is halted from trading on its primary market. The addition of the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust to Chapter IV, Section 3(i) of the BOX Rules will not have any effect on the rules pertaining to position and exercise limits [8] or margin.[9]

The Exchange represents that its surveillance procedures applicable to trading in options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust will be similar to those applicable to all other options on other ETFs currently traded on BOX. Also, the Exchange may obtain information from the New York Mercantile Exchange, Inc.

[8] *See* Chapter III, Sections 7 and 9 of the BOX Rules.

[9] *See* Chapter XIII of the BOX Rules.

("NYMEX") (a member of the Intermarket Surveillance Group) related to any financial instrument that is based, in whole or in part, upon an interest in or performance of gold, silver, palladium and/or platinum.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act,[10] in general, and Section 6(b)(5) of the Act,[11] in particular, in that it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest. In particular, the Exchange believes that amending the BOX Rules to accommodate the listing and trading of options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust and the ETFS Platinum Trust will benefit investors by providing them with valuable risk management tools.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change: (1) Does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; and (3) by its terms does not become operative for 30 days after the date of this filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative for 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the Exchange can list and trade options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust, and the ETFS Platinum Trust immediately. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest to permit the Exchange to list and trade options on the ETFS Gold Trust, the ETFS Silver Trust, the ETFS Palladium Trust, and the ETFS Platinum Trust without delay.[14] The Commission notes the proposal is substantively identical to proposals that were recently approved by the Commission, and does not raise any new regulatory issues.[15] For these reasons, the Commission designates the proposed rule change as operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–BX–2010–045 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2010–045. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission,[16] all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(5).

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to provide the Commission with written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has fulfilled this requirement.

[14] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[15] *See* Securities Exchange Act Release No. 61483 (February 3, 2010), 75 FR 6773 (February 10, 2010) (Order Granting Approval of Proposed Rule Changes and Notice of Filings and Order Granting Accelerated Approval of a Proposed Rule Change Relating to Listing and Trading of the ETFS Gold Trust and the ETFS Silver Trust) (SR–CBOE–2010–007; SR–ISE–2009–106; SR–NYSEAmex–2009–86; and SR–NYSEArca–2009–110). *See also* Securities Exchange Act Release Nos. 61892 (April 13, 2010), 75 FR 20649 (April 20, 2010) (SR–CBOE–2010–015); 61983 (April 26, 2010), 75 FR 23314 (May 3, 2010) (SR–ISE–2010–19); and 62250 (June 9, 2010), 75 FR 33882 (June 15, 2010) (SR–NYSEArca–2010–25) (SR–NYSEAmex–2010–37) (Orders Granting Approval of Proposed Rule Changes to Enable the Listing and Trading of Options on the ETFS Palladium Trust and the ETFS Platinum Trust on CBOE, ISE, NYSEArca and NYSEAmex, respectively).

[16] The text of the proposed rule change is available on the Commission's Web site at *http://www.sec.gov*.

2010–045 and should be submitted on or before August 3, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62459; File No. SR–NYSEAmex–2010–64]

Self-Regulatory Organizations; NYSE Amex LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule With Respect to Firm Proprietary—Manual Tiered Pricing

July 7, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 25, 2010, NYSE Amex LLC ("NYSE Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Schedule of Fees and Charges for Exchange Services (the "Schedule") effective July 1, 2010. The text of the proposed rule change is available on NYSE Amex's Web site at *http://www.nyse.com,* on the Commission's Web site at *http://www.sec.gov,* at the Exchange's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Currently, the Exchange aggregates all of an ATP Holder's volume at the trading permit level for purposes of the Firm Proprietary Manual tiers. Recently, certain ATP Holders have requested that the Firm Proprietary Manual tiered pricing be calculated at the initiating firm level. By this filing, the Exchange proposes to allow its ATP Holders to elect to have their Firm Proprietary Manual billing calculated at the initiating firm level. The Exchange's default billing will continue to aggregate volume at the trading permit level, and ATP Holders must elect this new billing option. If elected, this option will allow Joint Back Office operations to pass-through the pricing associated with the tiers at NYSE Amex more effectively. The Exchange believes this proposed elective billing option is reasonable and equitable and applies uniformly to all ATP Holders.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Securities Exchange Act of 1934 (the "Act"),[3] in general, and Section 6(b)(4) of the Act,[4] in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities. This proposed elective billing option is reasonable and equitable and applies uniformly to all ATP Holders. If elected, this option will allow Joint Back Office operations to pass-through the pricing associated with the tiers at NYSE Amex more effectively.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[5] of the Act and subparagraph (f)(2) of Rule 19b–4[6] thereunder, because it establishes a due, fee, or other charge imposed by the NYSE Amex. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSEAmex–2010–64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAmex-2010–64. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro/shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62452; File No. SR–NYSEAmex–2010–66]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by NYSE Amex LLC To List Options on Trust Issued Receipts in $1 Strike Intervals

July 6, 2010.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on July 2, 2010, NYSE Amex LLC ("NYSE Amex" or the "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 903 Commentary .05 to establish strike price intervals for options on Trust Issued Receipts. The text of the proposed rule change is attached as Exhibit 5 to the 19b–4 form. A copy of this filing is available on the Exchange's Web site at *http://www.nyse.com,* at the Exchange's principal office, on the Commission's Web site at *http://www.sec.gov,* and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Rule 903 Commentary .05, to establish strike price intervals for options on Trust Issued Receipts ("TIRs"), including Holding Company Depositary Receipts ("HOLDRs"), in $1 or greater strike price intervals, where the strike price is $200 or less, and $5 strike price intervals where the strike price is greater than $200.[3]

Currently, the strike price intervals for options on TIRs are as follows: (1) $2.50 or greater where the strike price is $25.00 or less; (2) $5.00 or greater where the strike price is greater than $25.00; and (3) $10.00 or greater where the strike price is greater than $200.[4]

The Exchange is seeking to permit $1 strikes for options on TIRs where the strike price is less than $200 because TIRS have characteristics similar to exchange traded funds ("ETFs"). Specifically, TIRs are exchange-listed securities representing beneficial ownership of the specific deposited securities represented by the receipts. They are negotiable receipts issued by a trust representing securities of issuers that have been deposited and held on behalf of the holders of the TIRs. TIRs, which trade in round-lots of 100, and multiples thereof, may be issued after their initial offering through a deposit with the trustee of the required number of shares of common stock of the underlying issuers. This characteristic of TIRs is similar to that of ETFs which also may be created on any business day upon receipt of the requisite securities or other investment assets comprising a creation unit. The trust only issues receipts upon the deposit of the shares of the underlying securities that are represented by a round-lot of 100 receipts. Likewise, the trust will cancel, and an investor may obtain, hold, trade or surrender TIRs in a round-lot and round-lot multiples of 100 receipts.

Strike prices for ETF options are permitted in $1 or greater intervals where the strike price is $200 or less and $5 or greater where the strike is greater than $200. Accordingly, the Exchange believes that the rationale for permitting $1 strikes for ETF options equally applies to permitting $1 strikes for options on TIRs.[5]

The Exchange has analyzed its capacity and believes the Exchange and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to handle the additional traffic associated with the listing and trading of $1 strikes where the strike price is less than $200 for options on TIRs.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with section 6(b)[6] of the Securities Exchange Act of 1934 (the "Act"), in general, and furthers the objectives of section 6(b)(5)[7] in particular in that it is designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, to remove impediments to and to perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest by allowing the Exchange to list options on TIRs at $1 strike price intervals. The Exchange believes that the marketplace and investors expect options on TIRs to trade in a similar manner to ETF options. The Exchange further believes that investors will be better served if $1 strike price intervals are available for options on TIRs where the strike price is less than $200.

[7] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] HOLDRs are a type of Trust Issued Receipt and the current proposal would permit $1 strikes for options on HOLDRS (where the strike price is less than $200).

[4] *See* NYSE Amex Rule 903 Commentary .05.

[5] *Id.*

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not significantly affect the protection of investors or the public interest, does not impose any significant burden on competition, and, by its terms, does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposal is substantially similar to a rule of another exchange that has been approved by the Commission.[10] Therefore, the Commission designates the proposal operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires the self-regulatory organization to submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived the five-day pre-filing requirement in this case.

[10] *See* Securities Exchange Release No. 34–62141 (May 20, 2010), 75 FR 29787 (May 27, 2010) (SR–CBOE–2010–036).

[11] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSEAmex–2010–66 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAmex–2010–66. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAmex–2010–66 and should be submitted on or before August 3, 2010.

[12] 17 CFR 200.30–3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62449; File No. SR–NYSEAmex–2010–67]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by NYSE Amex LLC To Expand Its $1 Strike Program

July 2, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on July 2, 2010, NYSE Amex LLC ("NYSE Amex" or the "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 903 Commentary .06 to expand the Exchange's $1 Strike Price Program (the "$1 Strike Program" or "Program") to allow the Exchange to select 150 individual stocks on which options may be listed at $1 strike price intervals. The text of the proposed rule change is attached as Exhibit 5 to the 19b–4 form. A copy of this filing is available on the Exchange's Web site at *http://www.nyse.com,* at the Exchange's principal office, on the Commission's Web site at *http://www.sec.gov,* and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to expand the $1 Strike Program.[3]

The $1 Strike Program currently allows NYSE Amex to select a total of 55 individual stocks on which option series may be listed at $1 strike price intervals. In order to be eligible for selection into the Program, the underlying stock must close below $50 in its primary market on the previous trading day. If selected for the Program, the Exchange may list strike prices at $1 intervals from $1 to $50, but no $1 strike price may be listed that is greater than $5 from the underlying stock's closing price in its primary market on the previous day. The Exchange may also list $1 strikes on any other option class designated by another securities exchange that employs a similar Program under their respective rules. The Exchange may not list long-term option series ("LEAPS") [4] at $1 strike price intervals for any class selected for the Program, except as specified in subparagraph e. to Commentary .06 to Rule 903.[5] The Exchange is also restricted from listing series with $1 intervals within $0.50 of an existing strike price in the same series, except that strike prices of $2, $3, and $4 shall be permitted within $0.50 of an existing strike price for classes also selected to participate in the $0.50 Strike Program.[6]

The Exchange now proposes to expand the Program to allow NYSE Amex to select a total of 150 individual stocks on which option series may be listed at $1 strike price intervals. The existing restrictions on listing $1 strikes would continue, i.e., no $1 strike price may be listed that is greater than $5 from the underlying stock's closing price in its primary market on the previous day, and NYSE Amex is restricted from listing any series that would result in strike prices being $0.50 apart (unless an option class is selected to participate in both the $1 Strike Program and the $0.50 Strike Program).

As stated in the Commission order that initially approved NYSE Amex's Program and in subsequent extensions and expansions of the Program,[7] NYSE Amex believes that $1 strike price intervals provide investors with greater flexibility in the trading of equity options that overlie lower price stocks by allowing investors to establish equity options positions that are better tailored to meet their investment objectives.

During the time that the $1 Strike Program was a pilot, the Exchange submitted three pilot reports to the Commission in which the Exchange discussed, among other things, the strength and efficacy of the Program based upon the steady increase in volume and open interest of options traded on the Exchange at $1 strike price intervals; and that the Program had not and, in the future, should not create capacity problems for NYSE Amex or the Options Price Reporting Authority ("OPRA") systems.[8] This has not changed. Moreover, the number of $1 strike options traded on the Exchange has continued to increase since the inception of the Program such that these options are now among some of the most popular products traded on the Exchange.

The Exchange believes that market conditions have led to an increase in the number of securities trading below $50 warranting the proposed expansion of the $1 Strike Program.[9] In addition, the Exchange notes that this filing is based on a filing previously submitted by NASDAQ OMX PHLX, Inc ("PHLX") that the Commission recently noticed.[10] With regard to previous expansions of the Program, the Commission has approved proposals from the options exchanges that employ a $1 Strike Program in lockstep.

The Exchange notes that, in addition to options classes that are trading pursuant to the $1 strike programs of options exchanges, there are also options trading at $1 strike intervals on the Exchange on over 150 exchange-traded fund shares ("ETFs") and exchange-traded notes ("ETNs"),[11] ETF and ETN options trading at $1 intervals have not, however, negatively impacted the system capacity of the Exchange or OPRA.

With regard to the impact of this proposal on system capacity, NYSE Amex has analyzed its capacity and represents that it and OPRA have the necessary systems capacity to handle the potential additional traffic associated with the listing and trading of an expanded number of series in the $1 Strike Program.

The Exchange believes that the $1 Strike Program has provided investors with greater trading opportunities and flexibility and the ability to more closely tailor their investment and risk management strategies and decisions to the movement of the underlying security. Furthermore, the Exchange has not detected any material proliferation of illiquid options series resulting from the narrower strike price intervals. For these reasons, the Exchange requests an expansion of the current Program and the opportunity to provide investors with additional strikes for investment, trading, and risk management purposes.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section

[3] The Commission approved the Program on June 12, 2003. *See* Securities Exchange Act Release No. 48024 (June 12, 2003), 68 FR 36617 (June 18, 2003) (SR–Amex–2003–36). The Commission subsequently approved, through June 5, 2008, four (4) one-year extensions of the Program. *See* Securities Exchange Act Release Nos. 49813 (June 4, 2004), 69 FR 33088 (June 14, 2004) (SR–Amex–2004–45) (extending the Program through June 5, 2005); 51770 (May 31, 2005), 70 FR 33226 (June 7, 2005) (SR–Amex–2005–040) (extending the Program through June 5, 2006); 53843 (May 19, 2006), 71 FR 30455 (May 26, 2006) (SR–Amex–2006–49) (extending the Program through June 5,2007); and 55714 (May 7, 2007), 72 FR 26853 (May 11, 2007) (SR–Amex–2007–43) (extending the Program through June 5, 2008). The Program was subsequently expanded and permanently approved in 2008. *See* Exchange Act Release 571110 (January 8, 2008) 73 FR 2292 (January 14, 2008). The Program was last expanded in 2009. *See* Exchange Act Release No. 59587 (March 17, 2009) 74 FR 12414 (March 24, 2009).

[4] LEAPS are long-term options that generally have up to thirty-nine months from the time they are listed until expiration. *See* Rule 903 Commentary .03 Long-Term Equity Option Series (LEAPS).

[5] Commentary .06 e. states that the Exchange may list $1 strike prices up to $5 in LEAPS in up to 200 option classes in individual stocks. *See* Securities Exchange Act Release No. 61036 (November 19, 2009) 74 FR 62370 (November 27, 2009).

[6] Regarding the $0.50 Strike Program, which allows $0.50 strike price intervals for options on stocks trading at or below $3.00, *see* Commentary .06 d. to Rule 903 and Securities Exchange Act Release No. 60720 (September 25, 2009), 74 FR 51205 (October 5, 2009). *See also* Securities Exchange Act Release No. 61921 (April 15, 2010), 75 FR 21074 (April 22, 2010) (allowing concurrent listing of $3.50 and $4 strikes for classes that participate in both the $0.50 Strike Program and the $1 Strike Program).

[7] *See supra* Note 1.

[8] *See* Securities Exchange Act Release Nos. 49813 (June 4, 2004), 69 FR 33088 (June 14, 2004); 51770 (May 31, 2005), 70 FR 33226 (June 7, 2005); 53843 (May 19, 2006), 71 FR 30455 (May 26, 2006); and 55714 (May 7, 2007), 72 FR 26853 (May 11, 2007).

[9] *See e.g.,* Exchange Act Release No. 59587 (March 17, 2009) 74 FR 12414 (March 24, 2009) (SR–NYSEAltr–2009–11) (more than five-fold increase in the number of individual stocks on which options may be listed at $1 intervals).

[10] *See* Securities Exchange Act Release No. 62151 (May 21, 2010), 75 FR 30078 (May 28, 2010) (SR–Phlx–2010–72).

[11] *See* Commentary .05 to Rule 903 allowing $1 strike price intervals for ETF and ETN options where the strike price is $200 or less.

6(b)[12] of the Securities Exchange Act of 1934 (the "Act"), in general, and furthers the objectives of Section 6(b)(5)[13] in particular in that it is designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, to remove impediments to and to perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that expanding the current $1 Strike Program will result in a continuing benefit to investors by giving them more flexibility to closely tailor their investment decisions in a greater number of securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not significantly affect the protection of investors or the public interest, does not impose any significant burden on competition, and, by its terms, does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15]

The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposal is substantially similar to that of another exchange that has been approved by the Commission.[16] Therefore, the Commission designates the proposal operative upon filing.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSEAmex–2010–67 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAmex–2010–67. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAmex–2010–67 and should be submitted on or before August 3, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Florence E. Harmon,

Deputy Secretary.

SOCIAL SECURITY ADMINISTRATION

Privacy Act of 1974, as Amended; Proposed System of Records and Routine Use Disclosures

AGENCY: Social Security Administration (SSA).

ACTION: Proposed System of Records and Routine Uses.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e)(4) and (e)(11)) we are issuing public notice of our intent to establish a system of records and routine use disclosures. The system of records is the *Economic Recovery List (ERL) Database (60–0372),* hereinafter referred to as the *ERL Database.* We will use information covered by the system of records to:

- Determine persons eligible for the one-time payment under provisions of the American Recovery and Reinvestment Act of 2009 (ARRA) or any similar subsequent payments authorized under the ARRA or other legislation;
- Prevent duplicate payments to those who qualify under more than one criterion;
- Record post-payment actions for Title II and Title XVI of the Social Security Act Economic Recovery Payments (ERP); and
- Provide management information (MI) for the Title II and Title XVI ERPs.

We discuss the system of records and routine use disclosures in the **SUPPLEMENTARY INFORMATION** section below. We invite public comments on this proposal.

DATES: We filed a report of the system of records and routine use disclosures with the Chairman of the Senate Committee on Homeland Security and Governmental Affairs, the Chairman of the House Committee on Oversight and Government Reform, and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on June 30, 2010. The system of records and routine uses will become effective on August 8, 2010, unless we receive comments before that date that would result in a contrary determination.

ADDRESSES: Interested persons may comment on this publication by writing to the Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, 3–A–6 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, or through the Federal e-Rulemaking Portal at *http://www.regulations.gov.* All comments we receive will be available for public inspection at the above address and will be posted to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Matthew Olsen, Senior Analyst, Disclosure Policy Development and Services Division I, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, 3–A–6 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, telephone: (410) 965–6213, e-mail: *matthew.olsen@ssa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Purpose of the *ERL Database* System of Records

A. General Background

A provision of the ARRA of 2009 authorizes a one-time ERP of $250 to persons receiving benefits under Title II or Title XVI of the Social Security Act, as well as persons receiving benefits from the Railroad Retirement Board (RRB) or the Department of Veterans Affairs, Veterans Benefits Administration (VBA). Persons entitled under multiple programs may receive only one payment.

The *ERL Database* will create a list of persons eligible for an ERP under Title II or Title XVI, eliminating any duplicate payments. We will then receive data from RRB on potential persons eligible in their system, and match these to the *ERL Database* based on the Clients' Own Social Security Number (COSSN) file.

Based on the match of the RRB-eligible COSSN file, we will identify the person as eligible for a unique RRB payment, or as duplicating a payment made by either Title II or Title XVI. We will update the *ERL Database* identifying the additional subset of those receiving RRB benefits.

We will use the updated *ERL Database* in subsequent matching processes for persons eligible from the VBA. We will send a one-for-one response back to the RRB identifying each RRB eligible person as already paid by Title II/Title XVI, or a person eligible for whom RRB should submit to the Department of the Treasury (DOT), for payment. We will repeat this process with data provided by the VBA.

The *ERL Database* will contain a record for each Title II, Title XVI, RRB, and VBA person eligible for the ERP, including the agency under which each person qualified. SSA, RRB, and VBA will each submit its own subset(s) of persons eligible to DOT to issue the ERP. If, between when a person is determined eligible and issuance of the payment that person has died, the *ERL Database* may contain information identifying a reissuance was made in care of the estate of the deceased.

B. Collection and Maintenance of the Data Covered by the ERL Database System of Records

We will collect and maintain information that will be housed in the *ERL Database* from existing internal systems that maintain information on persons receiving benefits under Title II and Title XVI of the Social Security Act. We will add additional information from RRB and VBA systems which similarly maintain information on persons receiving those respective benefits. We will maintain the information in this system of records in electronic format.

We will collect information for Title II and Title XVI beneficiaries such as: SSN; claim account number; beneficiary identification code; reason for non-payment; and post-payment information such as DOT Offset Payment (TOP), returned payment, non-receipt claims, reclamation claims, limited payability data, and the name of an executor or other person qualified to receive payment, tax identification number, and mailing address for reissuance of payment to the estate of the deceased if, between the determination that a person is eligible and the issuance of payment that person has died. For payments made by RRB or VBA, we will collect the SSN in the system. For all payments we will collect in the system the agency that qualified the person to receive the payment. We will retrieve information covered by the system of records by using the beneficiary's SSN, claim account number, or beneficiary identification code. As a result, the *ERL Database* information collection is a system of records as defined by the Privacy Act.

II. Routine Use Disclosures of Data Covered by the *ERL Database* System of Records

A. Routine Use Disclosures

We propose to establish the following routine uses of information that will be covered by the *ERL Database* system of records.

1. To the Department of the Treasury (DOT) To Prepare Checks or Payments It Will Send to Those Persons Eligible for the One-Time Payment, or Similar Payments Subsequently Authorized Under the ARRA or Other Legislation

We will disclose information under this routine use to allow DOT to prepare the checks and payments to those persons receiving an ERP.

2. To the DOT To Allow the Department To Recover Debts to the Federal Government Under the Treasury Offset Program

We will disclose information under this routine use to allow for the recovery of debt to the Federal government under the Treasury Offset Program, as mandated in the ARRA

3. To the Internal Revenue Service (IRS) To Allow for the Administration of the Make Work Pay Credit

We will disclose information under this routine use to the IRS to allow the Service to administer the Make Work Pay credit, specifically to ensure proper offset of the credit when a person also receives an ERP, as mandated by the ARRA

4. To the Office of the President in Response to an Inquiry From That Office Made at the Request of the Subject of the Record or a Third Party on That Person's Behalf

We will disclose information under this routine use only when the Office of the President makes an inquiry relating to information contained in this system of records and indicates that it is requesting the record on behalf of the person

5. To a Congressional Office in Response to an Inquiry From That Office Made at the Request of the Subject of a Record or a Third Party on That Person's Behalf

We will disclose information under this routine use only when a member of Congress, or member of his or her staff,

makes an inquiry relating to information contained in this system of records and indicates that it is requesting the record on behalf of the person.

6. To the Department of Justice (DOJ), a Court, Other Tribunal, or Another Party Before Such Court or Tribunal When:

(a) The agency or any of our components; or

(b) Any agency employee in his or her official capacity; or

(c) Any agency employee in his or her individual capacity when DOJ (or the agency when we are authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof when we determine that the litigation is likely to affect our operations or any of its components, is party to the litigation or has an interest in such litigation, and we determine that the use of such records by DOJ, a court, other tribunal, or another party before such court or tribunal is relevant and necessary to the litigation. In each case, however, we must determine that such disclosure is compatible with the purpose for which we collected the records.

We will disclose information under this routine use only as necessary to enable DOJ to defend us, our components, or our employees in litigation when the use of information covered by this system of records is relevant and necessary to the litigation and compatible with the purpose of the information collection. We will also disclose information to ensure that courts, other tribunals, and parties before such courts or tribunals, have appropriate information when relevant and necessary.

7. To Contractors and Other Federal Agencies, as Necessary, To Assist Us in Efficiently Administering Our Programs

We will disclose information under this routine use only in situations where we enter into a contractual agreement or similar agreement with a third party to assist in accomplishing an agency function relating to information covered by the *ERL Database* system of records.

8. To Student Volunteers, Persons Working Under a Personal Services Contract, and Others Who Are Not Technically Federal Employees, When They Are Performing Work for Us as Authorized by Law, and They Need Access to Information in Our Records in order To Perform Their Assigned Agency Duties

We will disclose information under this routine use only when we use the services of student volunteers and participants in certain educational, training, employment, and community service programs when they need access to information covered by this system of records to perform their assigned agency duties.

9. To the Railroad Retirement Board (RRB) and the Department of Veterans Affairs, Veterans Benefits Administration (VBA), To Identify Persons Who Qualify for a Payment as a Beneficiary From More Than One Agency

We will disclose information under this routine use to the RRB and VBA so that they have a list of those persons eligible for a payment, and who have not already qualified as a beneficiary of another agency's programs.

10. To the Appropriate Federal, State, and Local Agencies, Entities, and Persons When:

(a) We suspect or confirm that the security or confidentiality of information in this system of records has been compromised;

(b) We determine that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, risk of identity theft or fraud, or harm to the security or integrity of this system or our other systems or programs that rely upon the compromised information; and

(c) We determine that disclosing the information to such agencies, entities, and persons is necessary to assist in our efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm. We will use this routine use to respond only to those incidents involving an unintentional release of our records.

We will disclose information under this routine use specifically in connection with response and remediation efforts in the event of an unintentional release of agency information, otherwise known as a "data security breach." This routine use will protect the interests of the people whose information is at risk by allowing us to take appropriate steps to facilitate a timely and effective response to a data breach. The routine use will also help us improve our ability to prevent, minimize, or remedy any harm that may result from a compromise of data covered by this system of records.

11. To Federal, State, and Local Law Enforcement Agencies and Private Security Contractors, as Appropriate, Information Necessary:

(a) To enable them to ensure the safety of our employees and customers, the security of our workplace, and the operation of our facilities; or

(b) To assist investigations or prosecutions with respect to activities that affect such safety and security or activities that disrupt the operation of our facilities.

We will disclose information under this routine use to law enforcement agencies and private security contractors when information is needed to respond to, investigate, or prevent activities that jeopardize the security and safety of the public, employees, or workplaces, or that otherwise disrupt the operation of our facilities. Information will also be disclosed to assist in the prosecution of persons charged with violating a Federal, State, or local law in connection with such activities.

12. To the General Services Administration (GSA) and the National Archives and Records Administration (NARA) Under 44 U.S.C. 2904 and 2906, as Amended by the NARA Act, Information That Is Not Restricted From Disclosure by Federal Law, for Their Use in Conducting Records Management Studies

We will disclose information under this routine use only when it is necessary for GSA and NARA to have access to the information covered by this system of records. The administrator of GSA and the Archivist of NARA are authorized by Title 44 U.S.C. 2904, as amended, to promulgate standards, procedures, and guidelines regarding records management and to conduct records management studies. Title 44 U.S.C. 2906, as amended, provides that GSA and NARA are authorized to inspect Federal agencies' records for records management purposed and that agencies are to cooperate with GSA and NARA.

B. Compatibility of Proposed Routine Uses

We can disclose information when the disclosure is required by law (20 CFR 401.120). We can also disclose information when the purpose is compatible with the purpose for which we collect the information and the disclosure is supported by a published routine use (20 CFR 401.150). The disclosures under our routine uses (numbers one through twelve) will ensure that we efficiently perform our functions relating to the purpose and administration of the *ERL Database* system of records. Federal law requires the disclosures that we make under routine use numbers ten and eleven. We will disclose information under these two routine uses to the extent another

Federal law does not prohibit the disclosure. For example, the Internal Revenue Code generally prohibits us from disclosing tax return information that we receive to maintain a person's earnings records. Therefore, all routine uses are appropriate and meet the relevant statutory and regulatory criteria.

III. Records Storage Medium and Safeguards for the Information Covered by the *ERL Database* System of Records

We will maintain information in the *ERL Database* system of records in electronic form. We will safeguard the security of the electronic information covered by the *ERL Database* system of records by requiring the use of access codes to enter the computer system that will house the data. We will permit only our authorized employees and contractors who require the information to perform their official duties to access the information covered by the *ERL Database* system of records.

We annually provide all our employees and contractors with appropriate security awareness and training that includes reminders about the need to protect personally identifiable information and the criminal penalties that apply to unauthorized access to, or disclosure of, personally identifiable information. *See* 5 U.S.C. 552a(i)(1). Furthermore, employees and contractors with access to databases maintaining personally identifiable information must sign a sanction document annually, acknowledging their accountability for inappropriately accessing or disclosing such information.

IV. Effects of the *ERL Database* System of Records on the Rights of Individuals

We will maintain information in the *ERL Database* only that is necessary to carry out our official functions under the Social Security Act and other applicable Federal statutes. We will use security measures that protect access to, and preclude unauthorized disclosure of, records in this system of records. Additionally, we will adhere to all statutory requirements, including those under the Social Security Act and the Privacy Act, in carrying out our responsibilities. We employ safeguards to protect all personal information in our possession as well as the confidentiality of the information. We will disclose information under the routine uses discussed above only as necessary to accomplish the stated purposes. Therefore, we do not anticipate that this system of records and its routine use disclosures will have any unwarranted adverse effect on the privacy or other rights of persons.

Dated: June 30, 2010.

Michael J. Astrue,

Commissioner.

SYSTEM NUMBER: 60–0372

SYSTEM NAME:

Economic Recovery List (ERL) Database, Social Security Administration.

SYSTEM CLASSIFICATION:

None.

SYSTEM LOCATION:

Social Security Administration, Office of Retirement and Survivors Insurance Systems, 6401 Security Boulevard, Baltimore, Maryland 21235.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons receiving benefits under Title II and XVI of the Social Security Act, as well as those covered by the Railroad Retirement Board (RRB) and the Department of Veterans Affairs, Veterans Benefits Administration (VBA). Executors or other persons qualified to receive a decedent's payment in the event that, between when a person is determined eligible and issuance of the payment, that person has died.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system will contain information regarding the payees and payments made under provisions of the American Recovery and Reinvestment Act of 2009 (ARRA) or other similar legislation. For Title II and Title XVI beneficiaries, this system will contain the person's Social Security number (SSN), claim account number, beneficiary identification code, reason for non-payment, and post-payment information such as the Treasury Offset Payment (TOP), returned payment, non-receipt claims, reclamation claims, limited payability data, and the name of an executor or other person qualified to receive payment, tax identification number, and mailing address for reissuance of payment to the estate of the deceased if, between the determination that a person is eligible and the issuance of payment that person has died. For payments made by RRB and VBA, the system will contain the person's SSN. For all payments the system will contain the agency that qualified the person to receive the payment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title II, Section 2201, Subtitle C of the ARRA.

PURPOSE(S):

We will use data in this system to determine persons eligible for a one-time payment under the ARRA, or any subsequent payments authorized under an amendment to or legislation similar to the ARRA, and to prevent duplicate payments to those who qualify under more than one criterion.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Routine use disclosures are as indicated below.

1. To the Department of the Treasury (DOT) to prepare checks or payments it will send to those persons eligible for the one-time payment, or similar payments subsequently authorized under the ARRA or other legislation.

2. To the DOT to allow the Department to recover debts to the Federal government under the Treasury Offset Program.

3. To the Internal Revenue Service to allow for administration of the Make Work Pay credit.

4. To the Office of the President in response to an inquiry from that office made at the request of the subject of the record or a third party on that person's behalf.

5. To a congressional office in response to an inquiry from that office made at the request of the subject of a record or a third party on that person's behalf.

6. To the Department of Justice (DOJ), a court, other tribunal, or another party before such court or tribunal when:

(a) The agency or any of our components; or

(b) Any agency employee in his or her official capacity; or

(c) Any agency employee in his or her individual capacity when DOJ (or the agency when we are authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof when we determine that the litigation is likely to affect our operations or any of its components, is party to the litigation or has an interest in such litigation, and we determine that the use of such records by DOJ, a court, other tribunal, or another party before such court or tribunal is relevant and necessary to the litigation. In each case, however, we must determine that such disclosure is compatible with the purpose for which we collected the records.

7. To our contractors and other Federal agencies, as necessary, to assist us in efficiently administering our programs.

8. To student volunteers, persons working under a personal services

contract, and others who are not technically Federal employees, when they are performing work for us as authorized by law, and they need access to information in our records in order to perform their assigned agency duties.

9. To the Railroad Retirement Board and Department of Veterans Affairs, Veterans Benefits Administration, to identify persons who qualify for a payment as a beneficiary from more than one agency.

10. To the appropriate Federal, State, and local agencies, entities, and persons when:

(a) We suspect or confirm that the security or confidentiality of information in this system of records has been compromised;

(b) We determine that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, risk of identity theft or fraud, or harm to the security or integrity of this system or our other systems or programs that rely upon the compromised information; and

(c) We determine that disclosing the information to such agencies, entities, and persons is necessary to assist in our efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm. We will use this routine use to respond only to those incidents involving an unintentional release of our records.

11. To Federal, State, and local law enforcement agencies and private security contractors, as appropriate, information necessary:

a. To enable them to ensure the safety of our employees and customers, the security of our workplace, and the operation of our facilities; or

b. To assist investigations or prosecutions with respect to activities that affect such safety, security, or activities that disrupt the operation of our facilities.

12. To the General Services Administration and the National Archives and Records Administration (NARA) under 44 U.S.C. 2904 and 2906, as amended by the NARA Act, information that is not restricted from disclosure by Federal law for their use in conducting records management studies.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

We maintain and store records in this system in electronic form.

RETRIEVABILITY:

We retrieve records by beneficiary Social Security number, claim account number, or beneficiary identification code.

SAFEGUARDS:

We retain electronic files with personal identifiers in secure storage areas accessible only to our authorized employees and contractors who have a need for the information when performing their official duties. Security measures include the use of access codes (personal identification number (PIN) and password) to enter our computer systems that house the data.

We annually provide all our employees and contractors with appropriate security awareness and training that includes reminders about the need to protect personally identifiable information and the criminal penalties that apply to unauthorized access to, or disclosure of, personally identifiable information (5 U.S.C. 552a(i)(l)). Furthermore, employees and contractors with access to databases maintaining personally identifiable information must sign a sanction document annually, acknowledging their accountability for inappropriately accessing or disclosing such information.

RETENTION AND DISPOSAL:

We maintain records in SSA headquarters within the Office of Retirement and Survivors Insurance Systems. We will maintain these records for seven years, pending application of an appropriate General Records Schedule, or approval by NARA, of the proposed retention.

SYSTEM MANAGER(S) AND ADDRESS:

Project Manager, Office of Retirement and Survivors Insurance Systems, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235–6401.

NOTIFICATION PROCEDURES:

Persons can determine if this system contains a record about them by writing to the system manager at the above address and providing their name, SSN, or other information in this system of records that will identify them. Persons requesting notification by mail must include a notarized statement to us to verify their identity or must certify in the request that they are the person they claim to be and that they understand that the knowing and willful request for, or acquisition of, a record pertaining to another person under false pretenses is a criminal offense.

Persons requesting notification of records in person must provide the same information, as well as provide an identity document, preferably with a photograph, such as a driver's license. Persons lacking identification documents sufficient to establish their identity must certify in writing that they are the person they claim to be and that they understand that the knowing and willful request for, or acquisition of, a record pertaining to another person under false pretenses is a criminal offense.

Persons requesting notification by telephone must verify their identity by providing identifying information that parallels the information in the record about which they are requesting notification. If we determine that the identifying information the person provides by telephone is insufficient, we will require the person to submit a request in writing or in person. If a person requests information by telephone on behalf of another person, the subject person must be on the telephone with the requesting person and us in the same phone call. We will establish the subject person's identity (his or her name, SSN, address, date of birth, and place of birth, along with one other piece of information such as mother's maiden name) and ask for his or her consent to provide information to the requesting person. These procedures are in accordance with our regulations at 20 CFR 401.40 and 401.45.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Persons also should reasonably specify the record contents they are seeking. These procedures are in accordance with our regulations (20 CFR 401.40(c)).

CONTESTING RECORD PROCEDURES:

Same as notification procedures. Persons also should reasonably identify the record, specify the information they are contesting, and state the corrective action sought and the reasons for the correction with supporting justification showing how the record is incomplete, untimely, inaccurate, or irrelevant. These procedures are in accordance with our regulations (20 CFR 401.65(a)).

RECORD SOURCE CATEGORIES:

We obtain data covered by this system of records from information in our existing systems of records (*e.g.,* the *Master Beneficiary Record, 60–0090* and *Supplemental Security Income Record and Special Veterans Benefits, 60–0103*), as well as from systems of records of the Railroad Retirement Board and Veterans Benefits Administration. We may also obtain data from an executor or other person qualified to receive a decedent's payment in the event that, between when a person is determined eligible

and the issuance of payment, that person has died.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE PRIVACY ACT:

None.

[FR Doc. 2010–17021 Filed 7–12–10; 8:45 am]

BILLING CODE P

DEPARTMENT OF STATE

[Public Notice: 7086]

In the Matter of the Review of the Designation of the Communist Party of the Philippines/New People's Army (aka CPP/NPA and Other Aliases) as a Foreign Terrorist Organization Pursuant to Section 219 of the Immigration and Nationality Act, as Amended

Based upon a review of the Administrative Record assembled in this matter pursuant to Section 219(a)(4)(C) of the Immigration and Nationality Act, as amended (8 U.S.C. 1189(a)(4)(C)) ("INA"), and in consultation with the Attorney General and the Secretary of the Treasury, I conclude that the circumstances that were the basis for the 2004 re-designation of the aforementioned organization as a foreign terrorist organization have not changed in such a manner as to warrant revocation of the designation and that the national security of the United States does not warrant a revocation of the designation.

Therefore, I hereby determine that the designation of the aforementioned organization as a foreign terrorist organization, pursuant to Section 219 of the INA (8 U.S.C. 1189), shall be maintained.

This determination shall be published in the **Federal Register**.

Dated: June 30, 2010.

James B. Steinberg,

Deputy Secretary of State.

[FR Doc. 2010–17014 Filed 7–12–10; 8:45 am]

BILLING CODE 4710–10–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Generalized System of Preferences (GSP): Notice of the Results of the 2009 Annual Product Reviews

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: This notice announces the results of 2009 GSP Annual Product Review with respect to: (1) Disposition of the product petitions accepted for review, including petitions to add and remove products; (2) waivers of the Competitive Need Limitations (CNL); (3) revocation of CNL waivers; and (4) *de minimis* waivers and redesignations. This notice also announces the continuation of the 2009 Country Practices Review.

FOR FURTHER INFORMATION CONTACT: Tameka Cooper, GSP Program, Office of the United States Trade Representative, 1724 F Street, NW., Room 601, Washington, DC 20508. The telephone number is (202) 395–6971, the fax number is (202) 395–2961, and the e-mail address is *Tameka_Cooper@ustr.eop.gov.*

SUPPLEMENTARY INFORMATION: The GSP program provides for the duty-free importation of designated articles when imported from beneficiary developing countries. The GSP program is authorized by Title V of the Trade Act of 1974 (19 U.S.C. 2461 *et seq.*), as amended, and is implemented in accordance with Executive Order 11888 of November 24, 1975, as modified by subsequent Executive Orders and Presidential Proclamations.

In the 2009 Annual Review, the Trade Policy Staff Committee reviewed a number of petitions to change product coverage of the GSP, and evaluated the 2009 value of U.S. imports of each GSP-eligible article to determine whether imports of an article from a GSP beneficiary developing country exceeded the CNLs. The results of the 2009 GSP Annual Review, comprising eight lists, are available for public viewing at *http://www.regulations.gov* in docket USTR–2009–0037, Supporting and Related Materials. These lists are also available at: *http://www.ustr.gov/trade-topics/trade-development/preference-programs/generalized-system-preference-gsp/current-review-1.*

Petitions to add certain frozen mixed beans (HTS 0710.22.40) and frozen mixtures of vegetables (HTS 0710.90.91) to the list of products eligible for duty-free treatment under GSP were granted. Petitions to add three other products were denied. Additional information about the disposition of the petitions to add products is described in List I (Decisions on Petitions to Add Products to the List of Eligible Products for the Generalized System of Preferences).

A petition to remove GSP eligibility for gold mixed link necklaces and neck chains (HTS 7113.19.25) from India was granted. These articles are no longer eligible for duty-free treatment under GSP when imported from India. Additional information about the disposition of all requests to remove products is described in List II (Decisions on Petitions to Remove Duty-Free status from a Beneficiary Developing Country for a Product on the List of Eligible Articles for the Generalized System of Preferences).

A petition to grant a waiver of the CNLs for imports of certain pneumatic radial tires (HTS 4011.10.10) from Thailand was denied, as reflected in List III (Decisions on Petitions to Grant a Waiver to the Competitive Need Limitation).

Existing CNL waivers were not revoked for miniature carnations (HTS 0603.12.30) from Columbia and certain silver jewelry articles (HTS 7113.11.50) from Thailand, and revoked for gold mixed link necklaces and neckchains (HTS 7113.19.25) from India, as reflected in List IV (Decisions on Competitive Need Limitation Waiver Revocations).

Articles that exceeded the CNLs in 2009 and that, effective July 1, 2010, are excluded from GSP eligibility when imported from a specific beneficiary country are described in List V (Products Newly Subject to Exclusion by Competitive Need Limitation), and include certain shrimp and prawn products (HTS 1605.20.05) from Thailand, certain pneumatic radial tires (HTS 4011.10.10) from Thailand, certain wood products (HTS 4409.29.05) from Brazil, and gold rope necklaces and neckchains (HTS 7113.19.21) from India.

De minimis waivers were granted to all articles that exceeded the 50-percent import-share CNL, but for which the aggregate value of all U.S. imports of that article was below the 2009 *de minimis* level of $19.5 million. List VI (Decisions on Products Eligible for *De Minimis* Waivers) provides the list of the articles and the associated countries granted *de minimis* waivers. The articles included on this list will continue to be eligible for duty-free treatment under GSP when imported from the associated countries.

No products were redesignated as eligible for GSP. List VII (Decisions on Products Eligible for GSP Redesignation) provides the list of the articles and the associated countries reviewed for redesignation.

The status of petitions considered in the 2009 Country Practices Review is described in List VIII. This list includes the status of petitions that had previously been accepted for review, as well petitions where the decision to accept for further review or reject was pending. The beneficiaries that will continue to be under review for GSP eligibility include: Lebanon, Russia and Uzbekistan regarding intellectual

property rights, and Bangladesh, Niger, the Philippines and Uzbekistan regarding worker rights. The Trade Policy Staff Committee has determined to accept petitions to review GSP eligibility for Argentina regarding arbitral awards and Sri Lanka regarding worker rights, and has deferred a decision on a petition regarding Iraq worker rights.

The announcement of the 2010 annual review and solicitation of new petitions for consideration in that review will be announced in a later **Federal Register** notice.

Seth Vaughn,

Director, Generalized System of Preferences (GSP) Program; Chairman, GSP Subcommittee of the Trade Policy Staff Committee; Office of the U.S. Trade Representative.

BILLING CODE 3190–WO–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration, DOT

[Docket No. FRA–2010–0005–N–16]

Agency Information Collection Activities; Proposals, Submissions, and Approvals

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICRs describes the nature of the information collections and their expected burdens. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collections of information was published on May 4, 2010 (75 FR 23839).

DATES: Comments must be submitted on or before August 12, 2010.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Safety, Planning and Evaluation Division, RRS–21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 17, Washington, DC 20590 (telephone: (202) 493–6292), or Ms. Kimberly Toone, Office of Information Technology, RAD–20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493–6132). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, § 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On May 4, 2010, FRA published a 60-day notice in the **Federal Register** soliciting comment on ICRs that the agency was seeking OMB approval. 75 FR 23839. FRA received no comments after issuing this notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The revised requirements are being submitted for clearance by OMB as required by the PRA.

Title: Foreign Railroads' Foreign-Based (FRFB) Employees Who Perform Train or Dispatching Service in the United States.

OMB Control Number: 2130–0555.

Type of Request: Extension without change of a currently approved collection.

Affected Public: Railroads.

Form(s): None.

Abstract: The collection of information is used by FRA to determine compliance of FRFB train and dispatching service employees and their employers with the prohibition against the abuse of alcohol and controlled substances. Because of the increase in cross-border train operations and the increased risk posed to the safety of train operations in the United States, FRA seeks to apply all of the requirements of 49 CFR 219 to FRFB train and dispatching service employees. The basic information—evidence of unauthorized use of drugs and alcohol—is used by FRA to help prevent accidents/incidents by screening FRFB who perform safety-sensitive functions for unauthorized drug or alcohol use. FRFB train and dispatching service employees testing positive for unauthorized use of alcohol and drugs are removed from service, thereby enhancing safety and serving as a deterrent to other FRFB train and dispatching service employees who might be tempted to engage in the unauthorized use of drugs or alcohol.

Annual Estimated Burden: 28 hours.

Title: Special Notice for Repairs.

OMB Control Number: 2130–0504.

Type of Request: Extension without change of a currently approved collection.

Affected Public: Railroads.

Form(s): FRA F 6180.8; FRA F 6180.8a.

Abstract: The Special Notice For Repairs is issued to notify the carrier in writing of an unsafe condition involving a locomotive, car, or track. The carrier must return the form after repairs have been made. The collection of information is used by State and Federal inspectors to remove freight cars or locomotives until they can be restored to a serviceable condition. It is also used by State and Federal inspectors to reduce the maximum authorized speed on a section of track until repairs can be made.

Annual Estimated Burden: 10 hours.

ADDRESSES: Send comments regarding these information collections to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street, NW., Washington, DC 20503, Attention: FRA Desk Officer.

Comments are invited on the following: Whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimates of the burden of the proposed information collections; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collections of information on respondents, including the use of

automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC on *July 7, 2010.*

Kimberly Coronel,

Director, Office of Financial Management, Federal Railroad Administration.

[FR Doc. 2010–17008 Filed 7–12–10; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA 2010–0005–N–17]

Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration, DOT.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and its implementing regulations, the Federal Railroad Administration (FRA) hereby announces that it is seeking renewal of the following information collection activities that were previously approved by OMB. Before submitting these information collection requirements for clearance by the Office of Management and Budget (OMB), FRA is soliciting public comment on specific aspects of the activities identified below.

DATES: Comments must be received no later than September 13, 2010.

ADDRESSES: Submit written comments on any or all of the following proposed activities by mail to either: Mr. Robert Brogan, Office of Safety, RRS–21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 17, Washington, DC 20590, or Ms. Kimberly Toone, Office of Information Technology, RAD–20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, "Comments on OMB control number 2130–____." Alternatively, comments may be transmitted via facsimile to (202) 493–6216 or (202) 493–6497, or via e-mail to Mr. Brogan at *Robert.Brogan@dot.gov*, or to Ms. Toone at *Kimberly.Toone@dot.gov*. Please refer to the assigned OMB control number and the title of the information collection in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Safety, RRS–21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 17, Washington, DC 20590 (telephone: (202) 493–6292) or Ms. Kimberly Toone, Office of Information Technology, RAD–20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493–6132). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR Part 1320, require Federal agencies to provide 60-days notice to the public for comment on information collection activities before seeking approval of such activities by OMB. 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested respondents to comment on the following summary of proposed information collection activities regarding (i) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (ii) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (iii) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (iv) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submission of responses). *See* 44 U.S.C. 3506(c)(2)(A)(I)–(iv); 5 CFR 1320.8(d)(1)(I)–(iv). FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information mandated by Federal regulations. In summary, FRA reasons that comments received will advance three objectives: (i) Reduce reporting burdens; (ii) ensure that it organizes information collection requirements in a "user friendly" format to improve the use of such information; and (iii) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

Below is a brief summary of the information collection activities that FRA will submit for renewed clearance by OMB as required under the PRA:

Title: Causal Analysis and Countermeasures to Reduce Rail-related Suicides.

OMB Control Number: 2130–0572.

Abstract: Pedestrian trespassing on railroad property resulting in serious injury or death is one of the two most serious safety problems (the second being grade crossing collisions) facing the railroad industry and its regulators not only in the United States but also in other countries. It is widely believed in this country that the reported prevalence and incidence of railway suicide vastly under-represents the nature and extent of the problem. There is no central reporting system within the railroad industry or the suicide prevention field that provides verifiable information about how many trespass deaths are accidental vs. intentional. Therefore, there are no verifiable measures of the extent of rail-related suicides in the United States.

While railroad companies must report trespass incidents resulting in serious injury or death to the U.S. Federal Railroad Administration (FRA), injuries or deaths that are ruled by a medical examiner or coroner to be intentional are not reported. Preliminary figures from 2006 indicate there were approximately 500 deaths and 360 injuries reported to the FRA—an increase of 100 incidents over the previous year—but suicides are not represented in these numbers. Unverifiable estimates from a number of sources range from 150 to more than 300 suicides per year on the U.S. railways.

Like any other incident on the rail system, a suicide on the tracks results in equipment and facility damage, delays to train schedules, and trauma to railroad personnel involved in the incidents. As a result, FRA last year awarded a grant for the first phase of a 5-year project to reduce suicides on the rail system to the Railroad Research Foundation (part of the Association of American Railroads) and its subcontractor, the American Association of Suicidology (AAS).

In the course of five years, the research project's goals include:

- A prevalence assessment to determine verifiable numbers of suicides on the rail system,
- Development of a standardized reporting tool for industry use,
- A causal analysis and root cause analysis of suicide incidents that occur during the grant cycle, and

• Design and implementation of suicide prevention measures for the nation's rail system to reduce suicide injuries and deaths.

This request to the Office of Management and Budget is for re-approval in order to complete Phase II of the project, the causal analysis. In order to understand as much as possible about people who intend to die by placing themselves in the path of a train, and therefore to design prevention strategies, AAS has been conducting 60 psychological autopsies over the course of two years on people who die by rail-related suicide.

Psychological autopsy is a recognized and accepted method for obtaining information about physical, emotional and circumstantial contributors to a person's death. The 60 psychological autopsies for the FRA project involve interviews with informants to these incidents including family members and friends, employers and co-workers, and rail personnel involved in the incidents.

After conducting a root cause analysis of this data, AAS will then work with the industry to design, pilot test and implement effective countermeasures with the goal of reducing deaths, injuries and psychological trauma.

Form Number(s): FRA F 6180.125A; FRA F 6180.125B.

Affected Public: Individuals.

Respondent Universe: 280 Railroad Personnel/Members of the Public/ Affected Families and Friends.

Frequency of Submission: On occasion.

Reporting Burden:

Collection instrument	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
Form FRA F 6180.125A	280 Individuals	5,600 responses/ forms	5 minutes	467 hours.
Form FRA F 6180.125B	280 Individuals	35 forms	2 hours	70 hours.

Total Responses: 5,670.

Estimated Total Annual Burden: 537 hours.

Status: Re-Approval under Regular Clearance Procedures.

Title: Confidential Close Call Reporting System Evaluation-Related Interview Data Collection.

OMB Control Number: 2130–0574.

Abstract: In the U.S. railroad industry, injury rates have been declining over the last 25 years. Indeed, the industry incident rate fell from a high of 12.1 incidents per 100 workers per year in 1978 to 3.66 in 1996. As the number of incidents has decreased, the mix of causes has also changed toward a higher proportion of incidents that can be attributed to human and organizational factors. This combination of trends—decrease in overall rates but increasing proportion of human factors-related incidents—has left safety managers with a need to shift tactics in reducing injuries to even lower rates than they are now.

In recognition of the need for new approaches to improving safety, FRA has instituted the Confidential Close Call Reporting System (C^3RS). The operating assumption behind C^3RS is that by assuring confidentiality, employees will report events which, if dealt with, will decrease the likelihood of accidents. C^3RS, therefore, has both a confidential reporting component, and a problem analysis/solution component. C^3RS is expected to affect safety in two ways. First, it will lead to problem solving concerning specific safety conditions. Second, it will engender an organizational culture and climate that supports greater awareness of safety and a greater cooperative willingness to improve safety.

If C^3RS works as intended, it could have an important impact on improving safety and safety culture in the railroad industry. While C^3RS has been developed and implemented with the participation of FRA, railroad labor, and railroad management, there are legitimate questions about whether it is being implemented in the most beneficial way, and whether it will have its intended effect. Further, even if C^3RS is successful, it will be necessary to know if it is successful enough to implement on a wide scale. To address these important questions, FRA is implementing a formative evaluation to guide program development, a summative evaluation to assess impact, and a sustainability evaluation to determine how C^3RS can continue after the test period is over. The evaluation is needed to provide FRA with guidance as to how it can improve the program, and how it might be scaled up throughout the railroad industry.

Program evaluation is an inherently data driven activity. Its basic tenet is that as change is implemented, data can be collected to track the course and consequences of the change. Because of the setting in which C^3RS is being implemented, that data must come from the railroad employees (labor and management) who may be affected. Critical data include beliefs about safety and issues related to safety, and opinions/observations about the operation of C^3RS.

The current study is a five-year demonstration project to improve rail safety, and is designed to identify safety issues and propose corrective action based on voluntary reports of close calls submitted to the Bureau of Transportation Statistics. Because of the innovative nature of this program, FRA is implementing an evaluation to determine whether the program is succeeding, how it can be improved and, if successful, what is needed to spread the program throughout the railroad industry. Interviews to evaluate the close call reporting system are being conducted with two groups: (1) Key stakeholders to the process (*e.g.,* FRA officials, industry labor, and carrier management within participating railroads); and (2) Employees in participating railroads who are eligible to submit close call reports to the Confidential Close Call Reporting System. Different questions are addressed to each of these two groups. Interviews are semi-structured, with follow-up questions asked as appropriate depending on the respondent's initial answer.

The confidentiality of the interview data is protected by the Privacy Act of 1974. FRA fully complies with all laws pertaining to confidentiality, including the Privacy Act. Thus, information obtained by or acquired by FRA's contractor, the Volpe Center, from key stakeholders and railroad employees will be used strictly for evaluation purposes. None of the information that might be identifying will be disseminated or disclosed in any way. In addition, the participating railroad sites involved will require Volpe to establish a non-disclosure agreement that prohibits disclosure of company confidential information without the carrier's authorization. Also, the data is protected under the Department of Transportation regulation Title 49 CFR Part 9, which is in part concerned with the Department involvement in proceedings between private litigants. According to this statute, if information is subpoenaed, Volpe and Volpe

contractors cannot "provide testimony or produce any material contained in the files of the Department, or disclose any information or produce any material acquired as part of the performance of that employee's official duties or because of that employee's official duty status" unless authorized by agency counsel after determining that, in legal proceedings between private litigants, such testimony would be in the best interests of the Department or that of the United States Government if disclosed. Finally, the name of those interviewed will not be requested.

Form Number(s): FRA F 6180.126A; FRA F 6180.126B.

Affected Public: Railroad Employees and Key Non-railroad Stakeholders.

Respondent Universe: 300 Select Railroad Employees/Non-railroad Stakeholders.

Frequency of Submission: On occasion.

Collection instrument	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
Form FRA F 6180.126A	300 Individuals	133.5 forms	60 minutes	133.5 hours.
Form FRA F 6180.126B	300 Individuals	133.5 forms	60 minutes	133.5 hours.

Total Responses: 267.

Estimated Annual Burden: 267 hours.

Status: Re-Approval under Regular Clearance Procedures.

Pursuant to 44 U.S.C. 3507(a) and 5 CFR 1320.5(b), 1320.8(b)(3)(vi), FRA informs all interested parties that it may not conduct or sponsor, and a respondent is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC, on July 7, 2010.

Kimberly Coronel,

Director, Office of Financial Management, Federal Railroad Administration.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[FMCSA Docket No. FMCSA–2010–0212]

Notice of Fiscal Year 2011 Safety Grants and Solicitation for Applications

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice; request for comments.

SUMMARY: This notice is to inform the public of the Federal Motor Carrier Safety Administration's (FMCSA) anticipated Fiscal Year (FY) 2011 safety grant opportunities. At present, FMCSA is operating under an extension of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy of Users (Pub. L. 109–59) which will expire December 31, 2010, unless extended further by Congress. While the Agency expects new authorization to make changes to its grant programs, the Agency is preparing for FY 2011 using the assumption that the following grant programs will continue in the new authorization.

The FMCSA invites comments on the proposed application deadlines for its FY 2011 safety grants programs. The 11 safety programs include the Motor Carrier Safety Assistance Program (MCSAP) Basic grants; MCSAP Incentive grants; MCSAP New Entrant Safety Audit grants; MCSAP High Priority grants; Commercial Motor Vehicle (CMV) Operator Safety Training grants; Border Enforcement grants (BEG); Commercial Driver's License Program Improvement (CDLPI) grants; Commercial Driver's License Information System (CDLIS) Modernization grants; Performance and Registration Information Systems Management (PRISM) grants; Safety Data Improvement Program grants (SaDIP); and the Commercial Vehicle Information Systems and Networks (CVISN) grants. The purpose of this notice is to provide grantees with information well in advance of the Agency's proposed FY 2011 safety grant application deadlines and to request comments on the deadlines and other changes in the Agency's safety grant programs.

DATES: Comments must be received on or before September 13, 2010.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2010–0212, using any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the online instructions for submitting comments.

Mail: Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery or Courier: West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.

Fax: 202–493–2251.

Instructions: All submissions must include the Agency name and docket number. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please *see* the Privacy Act heading for further information.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* and follow the online instructions for accessing the docket or physically go to the street address listed above.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System published in the **Federal Register** on January 17, 2008 (73 FR 3316), or you may visit *http://edocket.access.gpo.gov/2008/pdf/E8-785.pdf.*

Public Participation: The Federal eRulemaking Portal is available 24 hours each day, 365 days each year. You can get electronic submission and retrieval help and guidelines under the "help" section of the Federal eRulemaking Portal Web site. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments online.

Comments received after the comment closing date will be included in the docket, and we will consider late comments to the extent practicable. FMCSA may, however, issue a final determination at any time after the close of the comment period.

FOR FURTHER INFORMATION CONTACT: Please contact the following FMCSA staff with questions or needed information on the Agency's grant programs:

New Entrant Safety Audits Grants—

Arthur Williams,

arthur.williams@dot.gov, 202–366–3695

Border Enforcement Grants—Carla Vagnini, *carla.vagnini@dot.gov,* 202–366–3771

MCSAP Basic/Incentive Grants—Deborah Snider, *deborah.snider@dot.gov,* 202–366–2941

MCSAP High Priority Grants—Cim Weiss, *cim.weiss@dot.gov,* 202–366–0275

CMV Operator Safety Training Grants—Julie Otto, *julie.otto@dot.gov,* 202–366–0710

CDLPI Grants—Brandon Poarch, *brandon.poarch@dot.gov,* 202–366–3030

SaDIP Grants—Cim Weiss, *cim.weiss@dot.gov,* 202–366–0275

PRISM Grants—Tom Lawler, *tom.lawler@dot.gov,* 202–366–3866

CVISN Grants—Julie Otto, *julie.otto@dot.gov,* 202–366–0710.

All staff may be reached at FMCSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 9 a.m. to 5 p.m., EST, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The FMCSA recognizes that State and local governments and other grantees are dependent on its safety grants to develop and maintain important commercial motor vehicle (CMV) safety programs. The FMCSA further acknowledges that delays in awarding grant funds may have an adverse impact on these important safety programs. As a result, FMCSA completed a grants process review to identify ways to streamline the application, award, and grants management processes, and to award grant funds earlier each fiscal year. In addition, FMCSA made changes in the grants application, award and oversight processes to standardize application forms, increase the use of electronic documents, standardize quarterly reports and reduce the number of needed grant amendments.

The FMCSA continues to enter into grant agreements beginning October 1 or as soon thereafter as administratively practicable. FMCSA intends to enter into grant agreements no later than 90 days from the date the application is due.

The FMCSA is using a standard grant application form and a new quarterly reporting process. The FMCSA requires the Standard Form 424 (“Application for Federal Assistance”) and its attachments for all grant program applications. While each grant program may request different data in some of the data fields on the form, the use of the Standard Form 424 is mandatory. FMCSA adopted the Standard Form—Project Progress Report (SF–PPR) as its required form for quarterly reporting. Again, each grant program may, in certain instances, request different data be submitted in some of the fields or boxes on the form but SF–PRR is mandatory for quarterly reporting.

The number of original copies of grant agreements required to be submitted to FMCSA was reduced from three copies to two. In addition, FMCSA will provide most grant agreement documents electronically to its financial processing office. Grantees will, however, be required to submit the completed Automated Clearing House (ACH) Vendor Payment Form (SF–3881) directly to FMCSA’s financial processing office by U.S. Postal Service, courier service or secure fax. We request information on any impacts of these proposed changes.

The FMCSA continues to request comments and suggestions from grantees concerning improvement of the application, award and grants management processes. Additional information is provided below for each individual grant program.

MCSAP Basic and Incentive Grants

Sections 4101 and 4107 of SAFETEA–LU authorize FMCSA’s Motor Carrier Safety Grants. MCSAP Basic and Incentive *formula* grants are governed by 49 U.S.C. 31102–31104 and 49 CFR Part 350. Under the Basic and Incentive grants programs, a State lead MCSAP agency, as designated by its Governor, is eligible to apply for Basic and Incentive grant funding by submitting a commercial vehicle safety plan (CVSP). See 49 CFR 350.201 and 350.205. The following jurisdictions are not eligible for Incentive funds: The Virgin Islands, American Samoa, Guam, Puerto Rico, and the Commonwealth of the Northern Mariana Islands. Pursuant to 49 U.S.C. 31103 and 49 CFR 350.303, FMCSA will reimburse each lead State MCSAP agency 80 percent of eligible costs incurred in a fiscal year. Each State will provide a 20 percent match to qualify for the program. The FMCSA Administrator waives the requirement for matching funds for the Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. See 49 CFR 350.305. In accordance with 49 CFR 350.323, the Basic grant funds will be distributed proportionally to each State’s lead MCSAP agency using the following four, equally weighted (25 percent) factors:

(1) 1997 road miles (all highways) as defined by the FMCSA;

(2) All vehicle miles traveled (VMT) as defined by the FMCSA;

(3) Population—annual census estimates as issued by the U.S. Census Bureau; and

(4) Special fuel consumption (net after reciprocity adjustment) as defined by the FMCSA.

A State’s lead MCSAP agency may qualify for Incentive Funds if it can demonstrate that the State’s CMV safety program has shown improvement in any or all of the following five categories:

(1) Reduction in the number of large truck-involved fatal accidents;

(2) Reduction in the rate of large-truck-involved fatal accidents or maintenance of a large-truck-involved fatal accident rate that is among the lowest 10 percent of such rates for MCSAP recipients and is not higher than the rate most recently achieved;

(3) Upload of CMV accident reports in accordance with current FMCSA policy guidelines;

(4) Verification of Commercial Driver’s Licenses during all roadside inspections; and

(5) Upload of CMV inspection data in accordance with current FMCSA policy guidelines.

Incentive funds will be distributed in accordance with 49 CFR 350.327(b).

Prior to the start of each fiscal year, FMCSA calculates the amount of Basic and Incentive funding each State is expected to receive. This information is provided to the States and is made available on the Agency’s Web site. The FY 2011 information is available at *www.fmcsa.dot.gov.*

It should be noted that MCSAP Basic and Incentive formula grants are awarded based on the State’s submission of the CVSP. The evaluation factors described in the section below titled “Application Information for FY 2011 Grants” will not be considered. MCSAP Basic and Incentive grant applications must be submitted electronically through grants.gov (*http://www.grants.gov*).

New Entrant Safety Audit Grants

Sections 4101 and 4107 of SAFETEA–LU also authorize the Motor Carrier Safety Grants to enable grant recipients to conduct interstate New Entrant safety audits consistent with 49 CFR Parts 350.321 and 385.301. Eligible recipients are State agencies, local governments, and organizations representing government agencies that use and train qualified officers and employees in coordination with State motor vehicle safety agencies. The FMCSA’s share of these grant funds will be 100 percent. New Entrant grant applications must be submitted electronically through grants.gov (*http://www.grants.gov*).

MCSAP High Priority Grants

Section 4107 of SAFETEA–LU also authorizes the Motor Carrier Safety Grants to enable recipients to carry out activities and projects that improve CMV safety and compliance with CMV regulations. Funding is available for projects that are national in scope, increase public awareness and education, demonstrate new technologies and reduce the number and rate of CMV accidents. Eligible recipients are State agencies, local governments, and organizations representing government agencies that use and train qualified officers and employees in coordination with State motor vehicle safety agencies.

For grants awarded for public education activities, the Federal share will be 100 percent. For all High Priority grants other than those awarded in support of public education activities, FMCSA will provide reimbursements for no more than 80 percent of all eligible costs, and recipients will be required to provide a 20 percent match. FMCSA may reserve High Priority funding exclusively for innovative traffic enforcement projects, with particular emphasis on work zone enforcement and rural road safety. Also, FMCSA may reserve funding for an innovative traffic enforcement initiative known as "Ticketing Aggressive Cars and Trucks" or TACT. TACT provides a research-based safety model that can be replicated by States when conducting a high-visibility traffic enforcement program to promote safe driving behaviors among car and truck drivers. The objective of this program is to reduce the number of commercial truck and bus related crashes, fatalities and injuries resulting from improper operation of motor vehicles and aggressive driving behavior. More information regarding TACT can be found at *http://www.fmcsa.dot.gov/safety-security/tact/abouttact.htm.*

High Priority grant applications must be submitted electronically through grants.gov.

CMV Operator Safety Training Grants

Section 4134 of SAFETEA–LU established a grant program which enables recipients to train current and future drivers in the safe operation of CMVs, as defined in 49 U.S.C. 31301(4). Eligible awardees include State governments, local governments and accredited post-secondary educational institutions (public or private) such as colleges, universities, vocational-technical schools and truck driver training schools. Funding priority for this discretionary grant program will be given to regional or multi-state educational or nonprofit associations serving economically distressed regions of the United States. The Federal share of these funds will be 80 percent, and recipients will be required to provide a 20 percent match. CMV Operator Safety Training grant applications must be submitted electronically through grants.gov.

Border Enforcement Grants (BEG)

Section 4110 of SAFETEA–LU established the BEG program. The purpose of this discretionary program is to provide funding for border CMV safety programs and related enforcement activities and projects. An entity or a State that shares a land border with another country is eligible to receive this grant funding. Eligible awardees include State governments, local governments, and entities (i.e., accredited post-secondary public or private educational institutions such as universities). Requests from entities must be coordinated with the State lead CMV inspection agency. Applications must include a Border Enforcement Plan and meet the required maintenance of expenditure requirement. BEG funding decisions take into consideration the State or entity's performance on previous BEG awards; its ability to expend the awarded funds with the BEG performance year; and activities meeting the BEG national criteria established by FMCSA. As established by SAFETEA–LU, the Federal share of these funds will be 100 percent. As a result, there is no matching requirement. BEG grant applications must be submitted electronically through grants.gov.

CDLPI Grants

Section 4124 of SAFETEA–LU established a discretionary grant program that provides funding for improving States' implementation of the Commercial Driver's License (CDL) program, including expenses for computer hardware and software, publications, testing, personnel, and training. Funds may not be used to rent, lease, or buy land or buildings. The agency designated by each State as the primary driver licensing agency responsible for the development, implementation, and maintenance of the CDL program is eligible to apply for grant funding. State grant proposals must include the State's assessment of its CDL program and a detailed budget explaining how the funds will be used. The Federal share of funds for projects awarded under this grant is established by SAFETEA–LU as 100 percent; therefore, there is no State matching requirement. The funding opportunity announcement on grants.gov will provide more detailed information on the application process; national funding priorities for FY 2011; evaluation criteria; required documents and certifications; State maintenance of expenditure requirements; and additional information related to the availability of funds. CLDPI grant applications must be submitted electronically through grants.gov.

SaDIP Grants

Section 4128 of SAFETEA–LU established a Safety Data Improvement Program (SaDIP) grant program to improve the quality of crash and inspection truck and bus data reported by the States to FMCSA, as described 49 U.S.C. 31102. Eligible recipients are State agencies, local governments, and organizations representing government agencies that are involved with highway traffic safety activities and must demonstrate a capacity to work with highway traffic safety stakeholders. The State's SaDIP proposal must focus on a project that enhances the accuracy, timeliness, and completeness of the collection and reporting of Commercial Motor Vehicle crash information in all components of the State's record system. An applicant's proposed SaDIP project must address the seven (7) application requirements plus the overriding indicator established for the State Safety Data Quality (SSDQ) program. The FMCSA will provide reimbursements for no more that 80 percent of all eligible costs and recipients are required to provide a 20 percent match.

PRISM Grants

Section 4109 of SAFETEA–LU authorizes FMCSA to award financial assistance funds to States to implement the Performance and Registration Information Systems Management (PRISM) requirements that link Federal motor carrier safety information systems with State CMV registration and licensing systems. This program enables a State to determine the safety fitness of a motor carrier or registrant when licensing or registering or while the license or registration is in effect. PRISM grant applications must be submitted electronically through grants.gov. No matching funds are required.

CVISN Grants

Section 4126 of SAFETEA–LU authorizes FMCSA to award financial assistance to States to deploy, operate, and maintain elements of their Commercial Vehicle Information Systems and Networks (CVISN)

Program, including commercial vehicle, commercial driver, and carrier-specific information systems and networks. The agency in each State designated as the primary agency responsible for the development, implementation, and maintenance of a CVISN-related system is eligible to apply for grant funding.

Section 4126 of SAFETEA–LU distinguishes between two types of CVISN projects: Core and Expanded. To be eligible for funding of Core CVISN deployment project(s), a State must have its most current Core CVISN Program Plan and Top-Level Design approved by FMCSA and the proposed project(s) should be consistent with its approved Core CVISN Program Plan and Top-Level Design. If a State does not have a Core CVISN Program Plan and Top-Level Design, it may apply for up to $100,000 in funds to either compile or update a Core CVISN Program Plan and Top-Level Design.

A State may also apply for funds to prepare an Expanded CVISN Program Plan and Top-Level Design if FMCSA acknowledged the State as having completed Core CVISN deployment. In order to be eligible for funding of any Expanded CVISN deployment project(s), a State must have its most current Expanded CVISN Program Plan and Top-Level Design approved by FMCSA and any proposed Expanded CVISN project(s) should be consistent with its Expanded CVISN Program Plan and Top-Level Design. If a State does not have an existing or up-to-date Expanded CVISN Program Plan and Top-Level Design, it may apply for up to $100,000 in funds to either compile or update an Expanded CVISN Program Plan and Top-Level Design.

CVISN grant applications must be submitted electronically through grants.gov. Awards for approved CVISN grant applications are made on a first-come, first-served basis. States must provide a match of 50 percent.

Application Information for FY 2011 Grants

General information about the FMCSA grant programs is available in the Catalog of Federal Domestic Assistance (CFDA) which can be found on the internet at *http://www.cfda.gov.* To apply for funding, applicants must register with grants.gov at *http://www.grants.gov/applicants/get—registered.jsp* and submit an application in accordance with instructions provided.

Evaluation Factors: The following evaluation factors will be used in reviewing the applications for all FMCSA discretionary grants:

(1) Prior performance—Completion of identified programs and goals per the project plan.

(2) Effective Use of Prior Grants—Demonstrated timely use and expensing of available funds.

(3) Cost Effectiveness—Applications will be evaluated and prioritized on the basis of expected impact on safety relative to the investment of grant funds. Where appropriate, costs per unit will be calculated and compared with national averages to determine effectiveness. In other areas, proposed costs will be compared with historical information to confirm reasonableness.

(4) Applicability to announced priorities—If national priorities are included in the grants.gov notice, those grants that specifically address these issues will be given priority consideration.

(5) Ability of the applicant to support the strategies and activities in the proposal for the entire project period of performance.

(6) Use of innovative approaches in executing a project plan to address identified safety issues.

(7) Feasibility of overall program coordination and implementation based upon the project plan.

(8) Any grant-specific evaluation factors, such as program balance or geographic diversity, will be included in the grants.gov application information.

Proposed Application Due Dates: For the following grant programs, FMCSA will consider funding complete applications or plans submitted by the following dates:

MCSAP Basic and Incentive Grants—August 1, 2010

Border Enforcement Grants—September 15, 2010

MCSAP High Priority Grants—September 15, 2010

CMV Operator Safety Training Grants—October 1, 2010

New Entrant Safety Audit Grants—October 15, 2010

CVISN Grants—October 15, 2010

CDLPI Grants—November 1, 2010

PRISM Grants—November 1, 2010

SaDIP Grants—November 1, 2010

Applications submitted after due dates may be considered on a case-by-case basis and are subject to availability of funds.

Issued on: July 6, 2010.

William A. Quade,

Associate Administrator for Enforcement and Program Delivery.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance from certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

City of Mishawaka, Indiana

[Waiver Petition Docket Number FRA–2010–0110]

The City of Mishawaka, IN (City), and the Norfolk Southern Corporation (NS) jointly seek a temporary waiver of compliance from certain provisions of the Use of Locomotive Horns at Highway-Rail Grade Crossings, 49 CFR part 222. The City intends to establish a Pre-Rule Quiet Zone that it had previously continued under the provisions of 49 CFR 222.41(c)(1). The City is seeking a waiver for the requirement to construct and complete a Pre-Rule Quiet Zone by June 24, 2010, as required by 49 CFR 222.41(c)(2), and for an extension of such date to October 31, 2010.

There are 19 crossings in the existing Pre-Rule Quiet Zone extending from Elder Road (MP 429.21) to Russell Avenue (MP 434.21) on the NS Dearborn Division, Chicago Line Subdivision. 3 of these crossings will be treated with Supplementary Safety Measures (SSM) and Alternative Safety Measures (ASM) as follows: 1 crossing closure (SSM), 1 crossing with gates and traffic channelization devices (SSM), and 1 crossing with a modified SSM consisting of gates and channelization (ASM). The 2 SSMs will be completed by June 24, 2010, and the ASM will be completed within 45 working days of receipt of the ASM approval from FRA. In the future, 2 other crossings will be modified as part of an Indiana Department of Transportation project resulting in 1 grade separation and 1 closure. The City requests that the existing Pre-Rule Quiet Zone be allowed to continue until October 31, 2010, by which time the 2 SSMs and 1 ASM improvements will have been completed.

The City states that it has had its pre-rule quiet zone since 1974, and that its residents and others have become accustomed to its existence. It asserts

that the proposed extension would not pose any additional risk to public health or safety. There have been only 2 crossing collisions involving property damage at the Russell Avenue crossing over the past 11 years. The City also notes that it has worked diligently since the final rule was released in 2005, to take the necessary steps to retain its pre-rule quiet zone. This includes the retaining of a consulting firm to assist with the project and to ensure compliance with all regulatory requirements. Throughout the process, the City and NS have worked diligently and cooperatively to implement this project. The City and NS are requesting that the June 24, 2010, deadline be extended to October 31, 2010, so that the Pre-Rule Quiet Zone can remain consistently active.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.,* Waiver Petition Docket Number FRA–2010–0110) and may be submitted by any of the following methods:

- *Web site: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue, SE., Room W12–140, Washington DC. 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at *http://www.regulations.gov.*

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Page 19477) or at *http://www.dot.gov/privacy.html.*

Issued in Washington, DC, on July 7, 2010.

Robert C. Lauby,

Deputy Associate Administrator for Regulatory and Legislative Operations.

BILLING CODE 4910–06–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[INTL–941–86; INTL–656–87; INTL–704–87]

Proposed Collection; Comment Request For Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning an existing final Regulation, INTL–941–86; INTL–656–87; and INTL–704–87, Treatment of Shareholders of Certain Passive Foreign Investment Companies (§ 1.1291–1, 1.1291–2, 1.1291–3, 1.1291–6, 1.1291–8).

DATES: Written comments should be received on or before September 13, 2010 to be assured of consideration.

ADDRESSES: Direct all written comments to Gerald J. Shields, Internal Revenue Service, room 6129, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for copies of the regulations should be directed to Joel Goldberger at Internal Revenue Service, room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or at (202) 927–9368, or through the Internet at *Joel.P.Goldberger@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Treatment of Shareholders of Certain Passive Foreign Investment Companies.

OMB Number: 1545–1304.

Regulation Project Number: INTL–941–86; INTL–656–87; and INTL–704–87.

Abstract: This regulation concerns the taxation of shareholders of certain passive foreign investment companies (PFICs) upon payment of distributions by such companies or upon disposition of the stock of such companies. The reporting requirements affect U.S. persons that are direct and indirect shareholders of PFICs. The information is required by the IRS to identify PFICs and their shareholders, administer shareholder elections, verify amounts reported, and track transfers of stock of certain PFICs.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals and business or other for-profit organizations.

Estimated Number of Respondents: 2,500.

Estimated Time Per Respondent: 1 hour.

Estimated Total Annual Burden Hours: 2,500.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation,

maintenance, and purchase of services to provide information.

Approved: July 1, 2010.

Gerald J. Shields,

IRS Supervisory Tax Analyst.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Form 8283–V]

Proposed Collection; Comment Request for Form 8283–V

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8283–V, Payment Voucher for Filing Fee Under Section 170(f)(13).

DATES: Written comments should be received on or before September 13, 2010 to be assured of consideration.

ADDRESSES: Direct all written comments to Gerald Shields, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Elaine Christophe, (202) 622–3179, or at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet, at *Elaine.H.Christophe@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Payment Voucher for Filing Fee Under Section 170(f)(13).

OMB Number: 1545–2069.

Form Number: 8283–V.

Abstract: The Pension Protection Act of 2006 (Pub. L. 109–280) provides in section 1213(c) of the Act that taxpayers claiming a deduction for a qualified conservation contribution with respect to the exterior of a building located in a registered historic district in excess of $10,000, must pay a $500 fee to the Internal Revenue Service or the deduction is not allowed.

Current Actions: There are no changes being made to Form 8283–V.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 1,500.

Estimated Time per Respondent: 28 minutes.

Estimated Total Annual Burden Hours: 690.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. SUPPLEMENTARY INFORMATION:

Title: Treatment of Disregarded Entities Under Section 752.

OMB Number: 1545–1905.

Regulation Project Number: REG–128767–04, (T.D. 9289).

Abstract: Generally, the regulation recognizes that only the assets of a disregarded entity that limits its member's liability are available to satisfy creditors' claims under local law. The regulation provides rules under section 752 for taking into account the net value of a disregarded entity owned by a partner or related person for purposes of allocating partnership liabilities. Specifically, it provides that in determining the extent to which a partner bears the economic risk of loss for a partnership liability, payment obligations of a disregarded entity are taken into account only to the extent of the net value of the disregarded entity.

Current Actions: There are no changes to these existing regulations.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, individuals or households and not-for-profit institutions.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 6, 2010.

Gerald Shields,

IRS Tax Supervisory Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[REG–124405–03, TD 9168 (final)]

Proposed Collection: Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning an existing final regulation. TD 9168, Optional 10-Year Write-off of Certain Tax Preferences.

DATES: Written comments should be received on or before September 13, 2010 to be assured of consideration.

ADDRESSES: Direct all written comments to Gerald Shields, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Elaine Christophe, (202) 622–3179, or at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or through the Internet, at *Elaine.H.Christophe@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Optional 10–Year Write-off of Certain Tax Preferences.

OMB Number: 1545–1903.

Regulation Project Number: REG–124405–03 [TD 9168 (final)].

Abstract: This collection of information is required by the IRS to verify compliance with section 59(e). This information will be used to determine whether the amount of tax has been calculated correctly.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, Businesses and other for-profit organizations.

Estimated Number of Respondents: 10,000.

Estimated Time per Respondent: 1 hour.

Estimated Total Annual Hours: 10,000.

The following paragraph applies to all of the collections of information covered by this notice.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 6, 2010.

Gerald Shields,

IRS Tax Supervisory Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 3800

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 3800, General Business Credit.

DATES: Written comments should be received on or before September 13, 2010 to be assured of consideration.

ADDRESSES: Direct all written comments to Gerald Shields, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Elaine Christophe, (202) 622–3179, or at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington DC 20224, or through the internet, at *Elaine.H.Christophe@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: General Business Credit.

OMB Number: 1545–0895.

Form Number: Form 3800.

Abstract: Internal Revenue Code section 38 permits taxpayers to reduce their income tax liability by the amount of their general business credit, which is an aggregation of their investment credit, work opportunity credit, welfare-to-work credit, alcohol fuel credit, research credit, low-income housing credit, disabled access credit, enhanced oil recovery credit, etc. Form 3800 is used to figure the correct credit.

Current Actions:

The following new credits are added:

1. Line 1t—Credits for affected Midwestern disaster area employers.
2. Line 1v—Agricultural chemicals security credit.
3. Line 1w—Credit for employer differential wage payments.
4. Line 1x—Carbon dioxide sequestration credit.
5. Line 1y—Qualified plug-in electric drive motor vehicle credit.
6. Line 1z—Qualified plug-in electric vehicle credit.
7. Line 18b—Extension property.

The following new credits are removed:

1. The Hurricane Katrina housing credit from pass-through entities, because it can no longer be claimed.

We are making this submission to renew the OMB approval:

Type of Review: Revision of a currently approved collection.

Affected Public: Business or other for-profit organizations, farms and individuals.

Estimated Number of Respondents: 250,000.

Estimated Time per Respondent: 26 hours, 57 minutes.

Estimated Total Annual Burden Hours: 6,740,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 6, 2010.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 1023

July 7, 2010.

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 1023, Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code.

DATES: Comments must be received by September 13, 2010 to be assured of consideration.

The Department of the Treasury is piloting the collaborative tool, *http://www.PRAComment.Gov,* to increase public participation and collaboration for the Paperwork Reduction Act information collection activities. The Department is partnering with the Internal Revenue Service (IRS) to test the information collection, 1545–0056, *Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code.* The information collection takes an estimated 96 hours to complete and places more than 3M paperwork burden hours on the public annually.

The information collection expires on January 31, 2011. The collaboration tool will maintain the official comments in which the Internal Revenue Service will use to determine potential changes to the form and/or to the estimated burden and costs associated with the collection. The Department believes the public comments received through the collaboration tool will reduce the paperwork burden on the public for Form 1023.

ADDRESSES: Submit comments by one of the following methods:

- *http://www.PRAComment.gov.*
- Gerald J. Shields, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Joseph R. Durbala

at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or at (202) 622–3634, or through the Internet at *RJDurbala@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code.

OMB Number: 1545–0056.

Form Number: Form 1023.

Abstract: Form 1023 is filed by applicants seeking Federal income tax exemption as organizations described in section 501(c)(3) of the Internal Revenue Code. IRS uses the information to determine if the applicant is exempt and whether the applicant is a private foundation.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Not-for-profit institutions.

Estimated Number of Respondents: 29,409.

Estimated Time per Respondents: 106 hours, 4 minutes.

Estimated Total Annual Burden Hours: 3,138,550.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 7, 2010.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[REG–118926–97; T.D. 8817]

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning an existing final regulation, REG–118926–97 (TD 8817), Notice of Certain Transfers to Foreign Partnerships and Foreign Corporations (§ 1.6038B–1, 1.6038B–2).

DATES: Written comments should be received on or before September 13, 2010 to be assured of consideration.

ADDRESSES: Direct all written comments to Gerald J. Shields, Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to Joel Goldberger at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or at (202) 927–9368, or through the Internet at *Joel.P.Goldberger@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Notice of Certain Transfers to Foreign Partnerships and Foreign Corporations.

OMB Number: 1545–1615.

Regulation Project Number: REG–118926–97. (T.D. 8817).

Abstract: Section 6038B requires U.S. persons to provide certain information when they transfer property to a foreign partnership or foreign corporation. This regulation provides reporting rules to identify United States persons who contribute property to foreign partnerships and to ensure the correct reporting of items with respect to those partnerships.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profit organizations, and individuals or households.

Estimated Number of Respondents: 1.

Estimated Time per Respondent: 1.

Estimated Total Annual Burden Hours: 1.

The collections of information contained in these final regulations are in § 1.6038B–1(b) and 1.6038B–2. The burden of complying with the collection of information required to be reported on Form 8865 is reflected in the burden for Form 8865. The burden of complying with the collection of information required to be reported on Form 926 is reflected in the burden for Form 926.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments Are Invited On: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 2, 2010.

Gerald J. Shields,

IRS Supervisory Tax Analyst.

SUPPLEMENTARY INFORMATION:

Title: Foreign Management and Foreign Economic Processes Requirements of a Foreign Sales Corporation.

OMB Number: 1545–0904.

Regulation Project Number: INTL–45–86. (Final) (T.D. 8125).

Abstract: This regulation provides rules for complying with foreign management and foreign economic process requirements to enable foreign sales corporations to produce foreign trading gross receipts and qualify for reduced tax rates. Section 1.924(d)–1(b)(2) of the regulation requires that records must be kept to verify that the necessary activities were performed outside the United States.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 11,001.

Estimated Time Per Respondent: 2 hours.

Estimated Total Annual Burden Hours: 22,001.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. BILLING CODE 4830–01–P

TENNESSEE VALLEY AUTHORITY

Northeastern Tributary Reservoirs Land Management Plan, Beaver Creek, Clear Creek, Boone, Fort Patrick Henry, South Holston, Watauga, and Wilbur Reservoirs, Tennessee and Virginia

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Issuance of Record of Decision.

SUMMARY: This notice is provided in accordance with the Council on Environmental Quality's regulations (40 CFR 1500 to 1508) and TVA's procedures for implementing the National Environmental Policy Act (NEPA). TVA has prepared the Northeastern Tributary Reservoirs Land Management Plan (NTRLMP) for the 4,933 acres of TVA-managed public land on Beaver Creek, Clear Creek, Boone, Fort Patrick Henry, South Holston, Watauga, and Wilbur reservoirs in northeast Tennessee and southwest Virginia. On June 10, 2010, the TVA Board of Directors (TVA Board) approved the NTRLMP, implementing the preferred alternative (Alternative C, Modified Proposed Land Use Alternative) identified in the final environmental impact statement (FEIS). Under the plan adopted by the TVA Board, TVA-managed public land on the seven tributary reservoirs has been allocated into broad use categories or "zones", including Project Operations (Zone 2), Sensitive Resource Management (Zone 3), Natural Resource Conservation (Zone 4), Industrial (Zone 5), Developed Recreation (Zone 6), and Shoreline Access (Zone 7). Zone 1 is applied to reservoir lands that TVA does not own in fee, typically flowage easements, which are not included in the land planning process. Allocations to zones 2 through 7 were made in a manner consistent with TVA's 2006 Land Policy.

FOR FURTHER INFORMATION CONTACT: Amy Henry, NEPA Specialist, Environmental Permits and Compliance, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 11D, Knoxville, Tennessee 37902–1499; telephone (865) 632–4045 or e-mail *abhenry@tva.gov.*

SUPPLEMENTARY INFORMATION: TVA manages public lands to protect the integrated operation of TVA reservoir and power systems, to provide for appropriate public use and enjoyment of the reservoir system, and to provide for continuing economic growth in the Tennessee Valley.

The seven northeastern tributary reservoirs (NTRs) are located in the northeast corner of Tennessee and southwest corner of Virginia. Boone, Fort Patrick Henry, and South Holston reservoirs are along the South Fork Holston River. Watauga and Wilbur reservoirs are along the Watauga River. Beaver Creek and Clear Creek reservoirs are on tributaries within the South Fork Holston River watershed.

TVA originally acquired nearly 11,000 acres of land on the seven reservoirs. About half of that land has been sold for private use or transferred to State and other federal agencies for public use. TVA presently manages approximately 451 miles of shoreline along these reservoirs. Existing land uses around the reservoirs include TVA project operations, developed and dispersed recreation, private residences, and undeveloped areas. Reservoir properties on Fort Patrick Henry, South Holston, Watauga, and Wilbur reservoirs previously were planned in 1965 utilizing a Forecast System. A reservoir land management plan was prepared for Boone Reservoir in 1999. Beaver Creek and Clear Creek reservoirs have never been planned.

The NTRLMP is designed to guide future decision-making and the management of these reservoir properties in a manner consistent with the 2006 TVA Land Policy and other relevant TVA policies.

Public Involvement

TVA published a notice of intent (NOI) to prepare an EIS in the **Federal Register** on May 5, 2008. Between May 5 and June 5, 2008, TVA sought input from individuals, various State and Federal agencies, elected officials, and local organizations. Forty-two participants attended a public scoping meeting held on May 20, 2008, in Blountville, Tennessee. TVA received 24 scoping comments, the majority of which involved management of natural and recreation resources and reservoir water levels. Individuals expressed their interest in additional recreational opportunities and the U.S. Forest Service expressed interest in increased access to some of the reservoirs. TVA used these comments to develop three alternatives for assessment in the EIS: Alternative A—No Action Alternative; Alternative B—Proposed Land Use Alternative; and Alternative C—Modified Proposed Land Use Alternative.

The notice of availability (NOA) of the NTRLMP draft EIS (DEIS) was published in the **Federal Register** on October 9, 2009. TVA accepted comments on the DEIS until November 23, 2009. Approximately 40 people attended a public meeting on October 27, 2009, in Johnson City, Tennessee. TVA received a total of 37 comments from individuals; interested organizations; and Federal, State, and local government agencies.

Several individuals expressed appreciation for the opportunity to be involved in the planning process and supported Alternatives B and/or C. Other comments addressed a need for recreation opportunities, various land uses, and questions about water access rights. Comments also included concern about shoreline erosion and trash, interest in public access to the William Bean Historical Monument near Boone Reservoir, and the protection of historic resources. Comments from Federal and

State agencies were largely informational; several agencies encouraged continued interagency coordination when specific land uses are proposed for reservoir lands.

TVA reviewed and prepared responses to all of these comments. In some cases, the FEIS was revised to reflect the information or issues presented. After considering all of the comments, the FEIS was completed and distributed to commenting agencies and the public. In the FEIS, TVA selected Alternative C as the preferred alternative. The NOA of the FEIS was published in the **Federal Register** on March 12, 2010, when the FEIS was distributed.

Alternatives Considered

TVA considered three alternatives for managing 254 parcels of public land, comprising approximately 4,933 acres, under its management around the reservoirs. Under all alternatives, TVA would continue to conduct an environmental review to address site- and project-specific issues prior to the approval of any proposed development or activity on an NTR parcel. Future activities and land uses would be guided by the TVA Land Policy. About 95 percent of NTR lands (4,679 acres) had previous commitments specified in land use agreements (*e.g.,* license, easement, contract) or existing plans. No changes to committed lands are proposed under any alternative. TVA land use allocations are not intended to supersede deeded land rights or land ownership.

No Action (Alternative A): TVA would not implement an NTRLMP and would continue using current land plans if they exist. The reservoir lands would be managed according to TVA policies and, respectively, any existing land use agreement (Clear Creek and Beaver Creek), previous forecast (Fort Patrick Henry, South Holston, Watauga, Wilbur), or plan (Boone) for the relevant reservoir. Reservoir lands would not be allocated according to TVA's current land use planning zones and would not be in complete alignment with current TVA policies.

Proposed Land Use (Alternative B) and Modified Proposed Land Use (Alternative C): Under both Action Alternatives, TVA would implement an NTRLMP. TVA-managed lands would be allocated to one of the seven land use zones according to current land use, existing data, and newly collected data. Under Alternative C, allocations would be based upon public comments and other information obtained during the scoping process, in addition to information considered under Alternative B.

Under Alternatives B and C, the proportion of lands allocated to each zone is similar. About half of the land would be allocated to Natural Resource Conservation (Zone 4) or Sensitive Resource Management (Zone 3). About one-third would be allocated to Project Operations (Zone 2), and the remainder would be allocated to Developed Recreation (Zone 6), Shoreline Access (Zone 7), or Industrial (Zone 5) uses. Compared to Alternative B, zone allocations under Alternative C differ on 19 of the 254 parcels. Alternative C includes slightly more land in Zone 6, and slightly less land in Zones 3 and 4. Under Alternative C, parcels on Fort Patrick Henry, South Holston, and Watauga reservoirs that contain rare plants and plant communities, cultural resources, and high-quality wetlands would be allocated to Zone 3, which allows the least opportunity for development, and is, therefore, the most protective of sensitive resources. Those parcels would be allocated to Zone 4 under Alternative B. Additionally, six parcels on South Holston and Watauga reservoirs would be allocated to Zone 6 under Alternative C, which would provide additional recreational opportunities.

In the FEIS, TVA considered the environmental consequences of the alternatives on a wide variety of environmental resources. No significant direct, indirect or cumulative impacts are expected to occur to any resource under any of the alternatives. Under any alternative, potential impacts to sensitive resources, such as species Federally listed as endangered or threatened, cultural resources, and wetlands would be identified during project-specific evaluations.

Comments on the FEIS

TVA received comments on the FEIS from the U.S. Environmental Protection Agency (USEPA); the U.S. Department of Agriculture, Natural Resources Conservation Service (NRCS); and the Virginia Department of Transportation (VDOT). The Tennessee Department of Transportation and Virginia State Historic Preservation Officer (SHPO) acknowledged receipt of the FEIS but offered no comments.

USEPA expressed preference for Alternative B, based upon a finding that Alternative B would result in a reservoir land plan with minimum opportunity for land disturbance. However, the comments acknowledged that Alternative C incorporates public comments and other scoping information into the planning process and that the differences between Alternatives B and C are small. USEPA rated the FEIS as "Lack of Objections."

Additionally, USEPA offered comments regarding the Beaver Creek watershed in Knox County, Tennessee. USEPA encouraged TVA to continue coordinating efforts and participating with the Beaver Creek Task Force. USEPA recommended that future TVA watershed activities remain in compliance with all approved Federal Emergency Management Agency flood studies completed within the Beaver Creek watershed. The agency also recommended that TVA coordinate efforts with the Knox County Stormwater Program, the USEPA Region 4 Total Maximum Daily Load Program, and the Tennessee Nonpoint Source Management Program.

While the Knox County Beaver Creek watershed is outside the area addressed in the FEIS, TVA acknowledges USEPA's emphasis on water quality in the Tennessee Valley. Water quality is a major consideration in the management of TVA land and reservoirs. TVA is currently a participating member of the task force and, together with the Beaver Creek Watershed Association, is implementing a grant that addresses pathogens and sediment in the impaired streams. TVA has hosted members of USEPA Region 4 and Washington offices to tour the Beaver Creek watershed. Additionally, TVA is working with the task force to implement a pilot project in the Knox County Beaver Creek watershed.

In other agency comments, the NRCS indicated it had no significant comments on the FEIS, but noted that future land use requests on the reservoirs may require interagency coordination to ensure compliance with the Farmland Protection Policy Act. TVA currently implements the NRCS recommendation as part of standard environmental review procedures. The environmental review conducted by TVA prior to approving a proposed use of reservoir land would include a review of the potential effects on prime or unique farmland and subsequent coordination with the NRCS, as appropriate.

Similarly, VDOT cited a statute and guidance for analyzing and mitigating traffic impacts to the highway system, indicating that any proposed new development on TVA-managed land around NTRs would need to adhere to the statute. The environmental review conducted by TVA prior to approving a proposed use of reservoir lands would include an evaluation of effects to transportation systems.

Decision

On June 10, 2010, the TVA Board approved the NTRLMP as described in preferred Alternative C of the FEIS. TVA believes that implementation of Alternative C provides suitable opportunities for developed recreation, conservation of natural resources, and management of sensitive resources. This decision incorporates mitigation measures that would further minimize the potential for adverse impacts to the environment. These measures are listed below.

Environmentally Preferred Alternative

The environmentally preferred alternative is Alternative C, under which approximately half of NTR lands are allocated to natural resource conservation (Zone 4) and sensitive resource management (Zone 3) uses, and all parcels with identified sensitive resources are allocated to Zone 3, which allows the least opportunity for land disturbance and is, therefore, the most protective land use zone.

Mitigation Measures

TVA is adopting the following measures to minimize environmental impacts:

- All activities will be conducted in accordance with the stipulations defined in the programmatic agreement (PA) between TVA, the Tennessee SHPO, and the Advisory Council on Historic Preservation. Until a similar PA is executed with the Virginia SHPO, TVA will incorporate the identification, evaluation, and treatment procedures established under Section 106 of the National Historic Preservation Act to effectively mitigate any adverse effects to historic properties.
- Invasive plants listed as Rank 1 (Severe Threat), Rank 2 (Significant Threat), or Rank 3 (Lesser Threat) on the Tennessee Exotic Plant Pest Council list of Invasive Exotic Pest Plants in Tennessee will not be used in landscaping activities on the reservoir lands.
- Revegetation and erosion-control measures will utilize seed mixes comprised of native species or noninvasive nonnative species.

With the implementation of the above measures, TVA has determined that adverse environmental impacts of future land development proposals on the TVA-managed reservoir lands would be substantially reduced. Before taking actions that could result in adverse environmental effects or before authorizing such actions to occur on properties it controls, TVA would perform a site-specific environmental review to determine the need for other necessary mitigation measures or precautions. These protective measures represent all of the practicable measures to avoid or minimize environmental harm associated with the alternative adopted by the TVA Board.

Dated: July 7, 2010.

Anda A. Ray,

Senior Vice President, Environment and Technology.

BILLING CODE 8120–08–P

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Disability Compensation; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 (Federal Advisory Committee Act) that the Advisory Committee on Disability Compensation will meet on July 26–27, 2010, at the St. Regis Washington DC, 923 16th and K Streets, NW., from 8:30 a.m. to 5 p.m. each day. The meeting will be held in the Carlton Ballroom. The meeting is open to the public.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on the maintenance and periodic readjustment of the VA Schedule for Rating Disabilities. The Committee is to assemble and review relevant information relating to the nature and character of disabilities arising from service in the Armed Forces, provide an ongoing assessment of the effectiveness of the rating schedule and give advice on the most appropriate means of responding to the needs of veterans relating to disability compensation.

On both days, the Committee will receive briefings on issues related to compensation for Veterans with service-connected disabilities and other Veteran benefits programs. Time will be allocated for receiving public comments on the afternoon of July 26. Public comments will be limited to three minutes each. Individuals wishing to make oral statements before the Committee will be accommodated on a first-come, first-served basis. Individuals who speak are invited to submit 1–2 page summaries of their comments at the time of the meeting for inclusion in the official meeting record.

The public may submit written statements for the Committee's review to Ms. Ersie Farber, Designated Federal Officer, Department of Veterans Affairs, Veterans Benefits Administration (211A), 810 Vermont Avenue, NW., Washington, DC 20420. Any member of the public wishing to attend the meeting or seeking additional information should contact Ms. Farber at (202) 461–9728 or *Ersie.farber@va.gov.*

Dated: July 7, 2010.

By Direction of the Secretary.

Vivian Drake,

Acting Committee Management Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

Rehabilitation Research and Development Service Scientific Merit Review Board; Notice of Meeting

The Department of Veterans Affairs gives notice under Public Law 92–463 (Federal Advisory Committee Act) that the Rehabilitation Research and Development Service Scientific Merit Review Board will meet on August 16–18, 2010, at the Hyatt Regency Washington on Capitol Hill, 400 New Jersey Avenue, NW., Washington, DC, and on August 24–26, 2010, at The Fairfax at Embassy Row, 2100 Massachusetts Avenue, NW, Washington, DC, from 8 a.m. to 5:30 p.m. each day. Various subcommittees of the Board will meet. Each subcommittee meeting of the Board will be open to the public the first day for approximately one half hour from 8.a.m. to 8:30 a.m. to cover administrative matters, the general status of the program and the administrative details of the review process. The remaining portion of the meetings will be closed for the Board's review of research and development applications.

The purpose of the Board is to review rehabilitation research and development applications for scientific and technical merit and to make recommendations to the Director, Rehabilitation Research and Development Service, regarding their funding.

The reviews involve oral comments, discussion of site visits, staff and consultant critiques of proposed research protocols, and similar analytical documents that focus on the consideration of the personal qualifications, performance and competence of individual research investigators. Disclosure of such information would constitute a clearly unwarranted invasion of personal privacy. Disclosure would also reveal research proposals and research underway which could lead to the loss of these projects to third parties and thereby frustrate future agency research

efforts. As provided by subsection 10(d) of Public Law 92–463, as amended, closing portions of the meeting is in accordance with 5 U.S.C. 552b(c)(6), and (c)(9)(B).

Those who plan to attend the open sessions should contact Tiffany Asqueri, Federal Designated Officer, Rehabilitation Research and Development Service (122P), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, at (202) 461–1740, or e-mail at *Tiffany.Asqueri@va.gov.*

Dated: July 6, 2010.

By Direction of the Secretary.

Vivian Drake,

Acting Committee Management Officer.

Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2011

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule addresses proposed changes to the physician fee schedule and other Medicare Part B payment policies to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. It also addresses, implements or discusses certain provisions of both the Affordable Care Act and the Medicare Improvements for Patients and Providers Act of 2008. In addition, this proposed rule discusses payments under the Ambulance Fee Schedule, Clinical Laboratory Fee Schedule, payments to ESRD facilities, and payments for Part B drugs. Finally, the proposed rule includes a discussion regarding the Chiropractic Services Demonstration program, the Competitive Bidding Program for Durable Medical Equipment and Provider and Supplier Enrollment Issues associated with Air Ambulances. (See the Table of Contents for a listing of the specific issues addressed in this proposed rule.)

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on August 24, 2010.

ADDRESSES: In commenting, please refer to file code CMS–1503–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the instructions for "submitting a comment."

2. *By regular mail.* You may mail written comments to the following address only:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1503–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address only:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1503–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–9994 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT:

Rebecca Cole, (410) 786–4497, for issues related to physician payment and for all other issues not identified below.

Cheryl Gilbreath, (410) 786–5919, for issues related to payment for covered outpatient drugs and biologicals.

Roechel Kujawa, (410) 786–9111, for issues related to ambulance services.

Glenn McGuirk, (410) 786–5723, for clinical laboratory issues.

Randall Ricktor, (410) 786–4632, for Federally Qualified Health Center Issues.

Pauline Lapin, (410) 786–6883, for issues related to the chiropractic services demonstration BN issue.

Troy Barsky, (410)786–8873, or Kristin Bohl, (410)786–8680, for issues related to physician self-referral.

Troy Barsky, (410)786–8873, or Fred Grabau (410)786–0206, for issues related to timely filing rules.

Henry Richter, (410)786–4562, or Lisa Hubbard, (410)786–5472, for issues related to renal dialysis provisions and payments for end-stage renal disease facilities.

Diane Stern, (410)786–1133, for issues related to the physician quality reporting initiative and incentives for e-prescribing.

Sheila Roman, 410–786–6004, or Pamela Cheetham, 410–786–2259, for issues related to the Physician Resource Use Feedback Program and value-based purchasing.

Joel Kaiser, (410)786–4499, for issues related to the DME provisions.

Jim Bossenmeyer, (410)786–9317, for issues related to provider and supplier enrollment issues.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

Table of Contents

To assist readers in referencing sections contained in this preamble, we are providing a table of contents. Some of the issues discussed in this preamble affect the payment policies, but do not require changes to the regulations in the *Code of Federal Regulations* (CFR). Information on the regulation's impact appears throughout the preamble, and therefore, is not discussed exclusively in section V. of this proposed rule.

I. Background

A. Development of the Relative Value System

1. Work RVUs
2. Practice Expense Relative Value Units (PE RVUs)
3. Resource-Based Malpractice (MP) RVUs
4. Refinements to the RVUs
5. Adjustments to RVUs Are Budget Neutral
B. Components of the Fee Schedule Payment Amounts
C. Most Recent Changes to Fee Schedule
II. Provisions of the Proposed Rule for the Physician Fee Schedule
A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)
1. Overview
2. Practice Expense Methodology
a. Direct Practice Expense
b. Indirect Practice Expense per Hour Data
c. Allocation of PE to Services
(i) Direct Costs
(ii) Indirect Costs
d. Facility and Nonfacility Costs
e. Services with Technical Components (TCs) and Professional Components (PCs)
f. Alternative Data Sources and Public Comments on Final Rule for 2010
g. PE RVU Methodology
(i) Setup File
(ii) Calculate the Direct Cost PE RVUs
(iii) Create the Indirect Cost PE RVUs
(iv) Calculate the Final PE RVUs
(v) Setup File Information
(vi) Equipment Cost per Minute
3. Proposed PE Revisions for CY 2011
a. Equipment Utilization Rate
b. HCPCS Code-Specific PE Proposals
(1) Biohazard Bags
(2) PE Inputs for Professional Component (PC) Only and Technical Component (TC) Only Codes Summing to Global Only Codes
(3) Equipment Time Inputs for Certain Diagnostic Tests
(4) Cobalt-57 Flood Source
(5) Venom Immunotherapy
(6) Equipment Redundancy
(7) Equipment Duplication
(8) Establishing Overall Direct PE Supply Price Inputs Based on Unit Prices and Quantities
c. AMA RUC Recommendations in CY 2010 for Changes to Direct PE Inputs
(1) Electrogastrography and Esophageal Function Test
(2) 64-Slice CT Scanner and Software
(3) Cystometrogram
(4) Breath Hydrogen Test
(5) Radiographic Fluoroscopic Room
d. Referral of Existing CPT Codes for AMA RUC Review
e. Updating Equipment and Supply Price Inputs for Existing Codes
B. Malpractice Relative Value Units (RVUs)
1. Background
2. Malpractice RVUs for New and Revised Services Effective Before the Next 5-Year Review
3. Revised Malpractice RVUs for Selected Disc Arthroplasty Services
C. Potentially Misvalued Codes Under the Physician Fee Schedule
1. Valuing Services Under the PFS
2. Identifying, Reviewing, and Validating the RVUs of Potentially Misvalued Services Under the PFS
a. Background

(H) Postage
(I) All Other Labor-Intensive Services
(J) Fixed Capital
(K) Moveable Capital
(L) Professional Liability Insurance
(M) Medical Equipment
(N) Other Professional Expenses
(2) Productivity Adjustment to the MEI
e. Results of Rebasing
f. Adjustments to the RVU Shares to Match the Proposed Rebased MEI Weights
III. Code-Specific Issues for the PFS
A. Therapy Services
1. Outpatient Therapy Caps for CY 2011
2. Alternatives to Therapy Caps
a. Background
b. Current Activities
c. Potential Short-Term Approaches to Therapy Caps
B. Diabetes Self-Management Training (DSMT) Services (HCPCS Codes G0108 and G0109)
1. Background
2. Proposed Payment for DSMT Services
C. End-State Renal Disease Related Services for Home Dialysis (CPT Codes 90963, 90964, 90965, and 90966)
1. End-Stage Renal Disease Home Dialysis Monthly Capitation Payment Services (CPT Codes 90963, 90964, 90965, and 90966)
2. Daily and Monthly ESRD-Related Services (CPT Codes 90951 Through 90970)
D. Portable X-Ray Set-Up (HCPCS Code Q0092)
E. Pulmonary Rehabilitation Services (HCPCS Code G0424)
F. Application of Tissue-Cultured Skin Substitutes to Lower Extremities (HCPCS Codes GXXX1 and GXXX2)
G. Canalith Repositioning (CPT Code 95992)
H. Intranasal/Oral Immunization Codes (CPT Codes 90467, 90468, 90473, and 90474)
I. Refinement Panel Process
J. Remote Cardiac Monitoring Services (CPT Codes 93012, 93229, 93268, and 93271)
IV. Medicare Telehealth Services for the Physician Fee Schedule
A. Billing and Payment for Telehealth Services
1. History
2. Current Telehealth Billing and Payment Policies
B. Requests for Adding Services to the List of Medicare Telehealth Services
C. Submitted Requests for Addition to the List of Telehealth Services for CY 2011
(1) Individual KDE Services
(2) Individual DSMT Services
(3) Group KDE, MNT, DSMT, and HBAI Services
(4) Initial, Subsequent, and Discharge Day Management Hospital Care Services
(5) Initial, Subsequent, Discharge Day Management, and Other Nursing Facility Care Services
(6) Neuropsychological Testing Services
(7) Speech-Language Pathology Services
(8) Home Wound Care Services
D. Summary of CY 2011 Telehealth Proposals
V. Provisions of the Patient Protection and Affordable Care Act of 2010
A. Section 3002: Improvements to the Physician Quality Reporting System

B. Section 3003: Improvements to the Physician Feedback Program and Section 3007: Value-Based Payment Modifier Under the Physician Fee Schedule
1. Background
2. Effect of the Patient Protection and Affordable Care Act on the Program
3. Implementation of Sections 3003 and 3007 of the Affordable Care Act
4. Comments Sought on Specific Policy Topics Related to Both PPACA Sections 3003 and 3007
a. Risk Adjustment
b. Attribution
c. Benchmarking and Peer Groups
d. Cost and Quality Measures and Composite Measurement
C. Section 3102: Extension of the Work Geographic Index Floor and Revisions to the Practice Expense Geographic Adjustment Under the Medicare Physician Fee Schedule, and Protections for Frontier States as Amended by Section 10324 of the Affordable Care Act
D. Section 3103: Extension of Exceptions Process for Medicare Therapy Caps
E. Section 3104: Extension of Payment for Technical Component of Certain Physician Pathology Services
F. Section 3105: Extension of Ambulance Add-On
G. Section 3107: Extension of Physician Fee Schedule Mental Health Add-On
H. Section 3108: Permitting Physician Assistants to Order Post-Hospital Extended Care Services
I. Section 3111: Payment for Bone Density Tests
J. Section 3114: Improved Access for Certified Nurse Midwife Services
K. Section 3122: Extension of Medicare Reasonable Costs Payments for Certain Clinical Diagnostic Laboratory Tests Furnished to Hospital Patients in Certain Rural Areas
L. Section 3134: Misvalued Codes Under the Physician Fee Schedule
M. Section 3135: Modification of Equipment Utilization Factor for Advanced Imaging Services
1. Adjustment in Practice Expense to Reflect Higher Presumed Utilization
2. Adjustment in Technical Component "Discount" on Single-Session Imaging to Consecutive Body Parts
N. Section 3136: Revision for Payment for Power-Driven Wheelchairs
a. Payment Rules for Power Wheelchairs
b. Elimination of Lump Sum Payment for Standard Power Wheelchairs
c. Revision of Payment Amounts for Power Wheelchairs
O. Section 3139: Payment for Biosimilar Biological Products
P. Section 3401: Revision of Certain Market Basket Updates and Incorporation of Productivity Improvements Into Market Basket Updates That Do Not Already Incorporate Such Improvements
1. ESRD Market Basket Discussion
2. Productivity Adjustment Regarding Ambulance and Clinical Laboratory Fee Schedules
a. Ambulatory Surgery Centers (ASCs)
b. Ambulance Fee Schedule (AFS)
c. Clinical Lab Fee Schedule
Q. Section 4103: Medicare Coverage of Annual Wellness Visit Providing a Personalized Prevention Plan
1. Background
a. Medicare Coverage of Preventive Physical Examinations and Routine Checkups
b. Requirements for Coverage of an Annual Wellness Visit
2. Proposed Revisions
a. Proposed Revisions to § 411.15, Particular Services Excluded From Coverage
b. Proposed Revisions to Part 410, Subpart B—Medical and Other Health Services
(1) Definitions
(2) Requirements of the First Visit for Personalized Prevention Plan Services
(3) Requirements of Subsequent Visits for Personalized Prevention Plan Services
3. Payment for the Annual Wellness Visit Providing Personalized Prevention Plan Services (PPPS)
R. Section 4104: Removal of Barriers to Preventive Services in Medicare
1. Definition of "Preventive Services"
2. Deductible and Coinsurance for Preventive Services
3. Extension of Waiver of Deductible to Services Furnished in Connection With or in Relation to a Colorectal Cancer Screening Test that Becomes Diagnostic or Therapeutic

I. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), "Payment for Physicians' Services." The Act requires that payments under the physician fee schedule (PFS) are based on national uniform relative value units (RVUs) based on the relative resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense (PE), and malpractice expense. Before the establishment of the resource-based relative value system, Medicare payment for physicians' services was based on reasonable charges. We note that throughout this proposed rule, unless otherwise noted, the term "practitioner" is used to describe both physicians and eligible nonphysician practitioners (such as physician assistants, nurse practitioners, clinical nurse specialists, certified nurse midwives, psychologists, or social workers) that are permitted to furnish and bill Medicare under the PFS for the services under discussion.

A. Development of the Relative Value System

1. Work RVUs

The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 (Pub. L. 101–239), and OBRA 1990, (Pub. L. 101–508). The final rule, published on November 25, 1991 (56 FR 59502), set forth the fee schedule for payment for physicians' services beginning January 1, 1992. Initially, only the physician work RVUs were resource-based, and the PE and malpractice RVUs were based on average allowable charges.

The physician work RVUs established for the implementation of the fee schedule in January 1992 were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original physician work RVUs for most codes in a cooperative agreement with the Department of Health and Human Services (DHHS). In constructing the code-specific vignettes for the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the Federal government, and obtained input from numerous physician specialty groups.

Section 1848(b)(2)(B) of the Act specifies that the RVUs for anesthesia services are based on RVUs from a uniform relative value guide, with appropriate adjustment of the

conversion factor (CF), in a manner to assure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. We established a separate CF for anesthesia services, and we continue to utilize time units as a factor in determining payment for these services. As a result, there is a separate payment methodology for anesthesia services.

We establish physician work RVUs for new and revised codes based on our review of recommendations received from the American Medical Association's (AMA) Specialty Society Relative Value Update Committee (RUC).

2. Practice Expense Relative Value Units (PE RVUs)

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, amended section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physician's service beginning in 1998. We were to consider general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising PEs.

Section 4505(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), amended section 1848(c)(2)(C)(ii) of the Act to delay implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4-year transition period from charge-based PE RVUs to resource-based RVUs.

We established the resource-based PE RVUs for each physicians' service in a final rule, published November 2, 1998 (63 FR 58814), effective for services furnished in 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, resource-based PE RVUs did not become fully effective until 2002.

This resource-based system was based on two significant sources of actual PE data: the Clinical Practice Expert Panel (CPEP) data; and the AMA's Socioeconomic Monitoring System (SMS) data. The CPEP data were collected from panels of physicians, practice administrators, and nonphysicians (for example, registered nurses (RNs)) nominated by physician specialty societies and other groups. The CPEP panels identified the direct inputs required for each physician's service in both the office setting and out-of-office setting. We have since refined and revised these inputs based on recommendations from the RUC. The AMA's SMS data provided aggregate specialty-specific information on hours worked and PEs.

Separate PE RVUs are established for procedures that can be performed in both a nonfacility setting, such as a physician's office, and a facility setting, such as a hospital outpatient department. The difference between the facility and nonfacility RVUs reflects the fact that a facility typically receives separate payment from Medicare for its costs of providing the service, apart from payment under the PFS. The nonfacility RVUs reflect all of the direct and indirect PEs of providing a particular service.

Section 212 of the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the **Federal Register** (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the calendar year (CY) 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating direct PE RVUs from the top-down to the bottom-up methodology beginning in CY 2007 and provided for a 4-year transition for the new PE RVUs under this new methodology. This transition ended in CY 2010 and direct PE RVUs are calculated in CY 2011 using this methodology, unless otherwise noted.

In the CY 2010 PFS final rule with comment period, we updated the PE/hour (HR) data that are used in the calculation of PE RVUs for most specialties (74 FR 61749). For this update, we used the Physician Practice Information Survey (PPIS) conducted by the AMA. The PPIS is a multispecialty, nationally representative, PE survey of both physicians and nonphysician practitioners (NPPs) using a survey instrument and methods highly consistent with those of the SMS and the supplemental surveys used prior to CY 2010. We note that in CY 2010, for oncology, clinical laboratories, and independent diagnostic testing facilities (IDTFs), we continued to use the supplemental survey data to determine PE/HR values (74 FR 61752).

3. Resource-Based Malpractice (MP) RVUs

Section 4505(f) of the BBA amended section 1848(c) of the Act requiring us to implement resource-based malpractice (MP) RVUs for services furnished on or after 2000. The resource-based MP RVUs were implemented in the PFS final rule published November 2, 1999 (64 FR 59380). The MP RVUs were based on malpractice insurance premium data collected from commercial and physician-owned insurers from all the States, the District of Columbia, and Puerto Rico.

4. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review all RVUs no less often than every 5 years. The first Five-Year Review of the physician work RVUs was published on November 22, 1996 (61 FR 59489) and was effective in 1997. The second Five-Year Review was published in the CY 2002 PFS final rule with comment period (66 FR 55246) and was effective in 2002. The third Five-Year Review of physician work RVUs was published in the CY 2007 PFS final rule with comment period (71 FR 69624) and was effective on January 1, 2007. (**Note:** Additional codes relating to the third Five-Year Review of physician work RVUs were addressed in the CY 2008 PFS final rule with comment period (72 FR 66360).) The fourth Five-Year Review of physician work RVUs was initiated in the CY 2010 PFS final rule with comment period where we solicited candidate codes from the public for this review (74 FR 61941). Changes due to the fourth Five-Year Review of physician work RVUs will be effective January 1, 2012.

In 1999, the AMA's RUC established the Practice Expense Advisory Committee (PEAC) for the purpose of refining the direct PE inputs. Through March 2004, the PEAC provided recommendations to CMS for over 7,600 codes (all but a few hundred of the codes currently listed in the AMA's Current Procedural Terminology (CPT) codes). As part of the CY 2007 PFS final rule with comment period (71 FR 69624), we implemented a new bottom-up methodology for determining resource-based PE RVUs and transitioned the new methodology over a 4-year period. A comprehensive review of PE was undertaken prior to the 4-year transition period for the new PE methodology from the top-down to the bottom-up methodology, and this transition was completed in CY 2010. In

CY 2010, we also incorporated the new PPIS data to update the specialty-specific PE/HR data used to develop PE RVUs. Therefore, the next Five-Year Review of PE RVUs will be addressed in CY 2014.

In the CY 2005 PFS final rule with comment period (69 FR 66236), we implemented the first Five-Year Review of the MP RVUs (69 FR 66263). Minor modifications to the methodology were addressed in the CY 2006 PFS final rule with comment period (70 FR 70153). The second Five-Year Review and update of resource-based malpractice RVUs was published in the CY 2010 PFS final rule with comment period (74 FR 61758) and was effective in CY 2010.

5. Adjustments to RVUs Are Budget Neutral

Section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs for a year may not cause total PFS payments to differ by more than $20 million from what they would have been if the adjustments were not made. In accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if revisions to the RVUs cause expenditures to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million.

As explained in the CY 2009 PFS final rule with comment period (73FR 69730), as required by section 133(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), the separate budget neutrality (BN) adjustor resulting from the third Five-Year Review of physician work RVUs is being applied to the CF beginning in CY 2009 rather than to the work RVUs.

For CY 2010, we adopted a number of new payment policies for which we estimated the potential for a redistributive effect under the PFS, including the use of the new PPIS data to develop the specialty-specific PE/HR used for the PE RVUs (74 FR 61749 through 61752) and the elimination of the reporting of all CPT consultation codes in order to allow for correct and consistent coding and appropriate payment for evaluation and management services under the PFS (74 FR 61767 through 61775). We recognize that clinical experience with these new PFS policies has been growing over the first 6 months of CY 2010 and, as we seek to improve future PFS payment accuracy for services, we are interested in public comments on the perspectives of physicians and nonphysician practitioners caring for Medicare beneficiaries under the current PFS coding and payment methodologies for physicians' services.

B. Components of the Fee Schedule Payment Amounts

To calculate the payment for every physicians' service, the components of the fee schedule (physician work, PE, and MP RVUs) are adjusted by a geographic practice cost index (GPCI). The GPCIs reflect the relative costs of physician work, PE, and malpractice expense in an area compared to the national average costs for each component.

RVUs are converted to dollar amounts through the application of a CF, which is calculated by CMS' Office of the Actuary (OACT).

The formula for calculating the Medicare fee schedule payment amount for a given service and fee schedule area can be expressed as:

$$\text{Payment} = [(\text{RVU work} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU malpractice} \times \text{GPCI malpractice})] \times \text{CF}$$

C. Most Recent Changes to the Fee Schedule

The CY 2010 PFS final rule with comment period (74 FR 61738) implemented changes to the PFS and other Medicare Part B payment policies. It also finalized some of the CY 2009 interim RVUs and implemented interim RVUs for new and revised codes for CY 2010 to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. The CY 2010 PFS final rule with comment period also addressed other policies, as well as certain provisions of the MIPPA.

As required by the statute at the time of its issuance on October 30, 2009, the CY 2010 PFS final rule with comment period announced the following for CY 2010: The PFS update of −21.2 percent; the initial estimate for the sustainable growth rate of −8.8 percent; and the CF of $28.4061.

On December 10, 2009, we published a correction notice (74 FR 65449) to correct several technical and typographical errors that occurred in the CY 2010 PFS final rule with comment period. This correction notice announced a revised CF for CY 2010 of $28.3895.

On December 19, 2009, the Department of Defense Appropriations Act, 2010 (Pub. L. 111–118) was signed into law. Section 1011 of Pub. L. 111–118 provided a 2-month zero percent update to the CY 2010 PFS effective only for dates of service from January 1, 2010 through February 28, 2010.

On March 2, 2010, the Temporary Extension Act of 2010 (Pub. L. 111–144) was signed into law. Section 2 of Pub. L. 111–144 extended the zero percent update to the PFS through March 31, 2010 that was in effect for claims with dates of service from January 1, 2010 through February 28, 2010.

In addition, on April 15, 2010, the Continuing Extension Act of 2010 (Pub. L. 111–157) was signed into law. Section 4 of Public Law 111–157 extended through May 31, 2010 the zero percent update to the PFS that was in effect for claims with dates of services from January 1, 2010 through March 31, 2010. The law is retroactive to April 1, 2010.

In the May 11, 2010 **Federal Register** (75 FR 26350), we published a subsequent correction notice to correct several technical and typographical errors that occurred in the CY 2010 PFS final rule with comment period and the December 10, 2009 correction notice. The May 11, 2010 correction notice announced a revised CF for CY 2010 of $28.3895.

Finally, on March 23, 2010 the Patient Protection and Affordable Care Act (Pub. L. 111–148) was signed into law. Shortly thereafter, on March 30, 2010, the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) was signed into law. These two laws are discussed in this proposed rule and are collectively referred to as the "Affordable Care Act" (ACA) throughout this proposed rule.

II. Provisions of the Proposed Rule for the Physician Fee Schedule

A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)

1. Overview

Practice expense (PE) is the portion of the resources used in furnishing the service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages but excluding malpractice expenses, as specified in section 1848(c)(1)(B) of the Act. Section 121 of the Social Security Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, required CMS to develop a methodology for a resource-based system for determining PE RVUs for each physician's service. We develop PE RVUs by looking at the direct and indirect physician practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more

detailed information about the methodology for translating the resources involved in furnishing each service into service-specific PE RVUs. In addition, we note that section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs for a year may not cause total PFS payments to differ by more than $20 million from what they would have been if the adjustments were not made. Therefore, if revisions to the RVUs cause expenditures to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million. We refer readers to the CY 2010 PFS final rule with comment period (74 FR 61743 through 61748) for a more detailed history of the PE methodology.

2. Practice Expense Methodology

a. Direct Practice Expense

We use a bottom-up approach to determine the direct PE by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically required to provide each service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are based on our review of recommendations received from the American Medical Association's (AMA's) Relative Value Update Committee (RUC). For a detailed explanation of the bottom-up direct PE methodology, including examples, we refer readers to the Five-Year Review of Work Relative Value Units Under the PFS and Proposed Changes to the Practice Expense Methodology proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

b. Indirect Practice Expense per Hour Data

We use survey data on indirect practice expenses incurred per hour worked (PE/HR) in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the practice expense per hour (PE/HR) by specialty that was obtained from the AMA's Socioeconomic Monitoring Surveys (SMS). These surveys were conducted from 1995 through 1999. For several specialties that collected additional PE/HR data through supplemental surveys, we incorporated these data in developing the PE/HR values used annually.

While the SMS was not specifically designed for the purpose of establishing PE RVUs, we found these data to be the best available at the time. The SMS was a multispecialty survey effort conducted using a consistent survey instrument and method across specialties. The survey sample was randomly drawn from the AMA Physician Masterfile to ensure national representativeness. The AMA discontinued the SMS survey in 1999. As required by the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113), we also established a process by which specialty groups could submit supplemental PE data. In the May 3, 2000 **Federal Register**, we issued the Medicare Program; Criteria for Submitting Supplemental Practice Expense Survey Data interim final rule (65 FR 25664) in which we established criteria for acceptance of supplemental data. The criteria were modified in the CY 2001 and CY 2003 PFS final rules with comment period (65 FR 65380 and 67 FR 79971, respectively). In addition to the SMS, we previously used supplemental survey data for the following specialties: Cardiology; dermatology; gastroenterology; radiology; cardiothoracic surgery; vascular surgery; physical and occupational therapy; independent laboratories; allergy/immunology; independent diagnostic testing facilities (IDTFs); radiation oncology; medical oncology; and urology.

Because the SMS data and the supplemental survey data were from different time periods, we historically inflated them by the Medicare Economic Index (MEI) to put them on as comparable a time basis as we could when calculating the PE RVUs. This MEI proxy was necessary in the past due to the lack of contemporaneous, consistently collected, and comprehensive multispecialty survey data.

The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Expense Information Survey (PPIS), which was expanded (relative to the SMS) to include nonphysician practitioners (NPPs) paid under the PFS. The PPIS was designed to update the specialty-specific PE/HR data used to develop PE RVUs. The AMA and the CMS contractor, The Lewin Group (Lewin), analyzed the PPIS data and calculated the PE/HR for physician and nonphysician specialties, respectively. The AMA's summary worksheets and Lewin's final report are available on the CMS Web site at *http://www.cms.gov/PhysicianFeeSched/PFSFRN/itemdetail.asp?filterType=none&filterByDID=-99&sortByDID=4&sortOrder=descending&itemID=CMS1223902&intNumPerPage=10*. (*See* downloads labeled AMA PPIS Worksheets 1–3 and Physician Practice Expense non MDDO Final Report)

The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs using a consistent survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and healthcare professional groups.

We believe the PPIS is the most comprehensive source of PE survey information available to date. Therefore, we used the PPIS data to update the PE/HR data for almost all of the Medicare-recognized specialties that participated in the survey for the CY 2010 PFS. When we changed over to the PPIS data beginning in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we finalized a 4-year transition (75/25 for CY 2010, 50/50 for CY 2011, 25/75 for CY 2012, and 0/100 for CY 2013) from the previous PE RVUs to the PE RVUs developed using the new PPIS data.

Section 303 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173) added section 1848(c)(2)(H)(i) of the Act, which requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

We do not use the PPIS data for reproductive endocrinology, sleep medicine, and spine surgery since these specialties are not separately recognized by Medicare, and we do not know how to blend these data with Medicare-recognized specialty data.

Supplemental survey data on independent labs, from the College of American Pathologists, were implemented for payments in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing IDTFs, were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments in CY 2007. Neither IDTFs nor independent labs participated in the PPIS. Therefore, we continue to use the PE/HR that was

developed from their supplemental survey data.

Finally, consistent with our past practice, the previous indirect PE/HR values from the supplemental surveys for medical oncology, independent laboratories, and IDTFs were updated to CY 2006 using the MEI to put them on a comparable basis with the PPIS data. In the CY 2010 PFS final rule with comment period (74 FR 61753), we miscalculated the indirect PE/HR for IDTFs as part of this update process. Therefore, for CY 2011, we are proposing to use a revised indirect PE/HR of $479.81 for IDTFs, consistent with our final policy to update the indirect PE/HR values from prior supplemental survey data that we are continuing to use in order to put these data on a comparable basis with the PPIS data. This revision changes the IDTF indirect percentage from 51 percent to 50 percent.

Previously, CMS has established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead use the PPIS-based PE/HR. We continue previous crosswalks for specialties that did not participate in the PPIS. However, beginning in CY 2010 we changed the PE/HR crosswalk for portable x-ray suppliers from radiology to IDTF, a more appropriate crosswalk because these specialties are more similar to each other with respect to physician time.

In the CY 2010 PFS final rule with comment period (74 FR 61752), we agreed that, under the current PE methodology, the PPIS data for registered dieticians should not be used in the calculation of PE RVUs since these dieticians are paid 85 percent of what a physician would be paid for providing the service. To include their survey data in the PE calculation would influence the ratesetting by incorporating what the services would be paid if performed by registered dieticians and not strictly what the payment rates would be if provided by physicians. We further stated that we would utilize the "All Physicians" PE/HR, as derived from the PPIS, in the calculation of resource-based PE RVUs in lieu of the PE/HR associated with registered dieticians. In the resource-based PE methodology for CY 2010, while we removed the specialty of registered dieticians from the ratesetting step we did not assign the "All Physicians" PE/HR to services furnished by registered dieticians. Instead, we allowed the PE/HR for those services to be generated by a weighted average of all the physician specialties that also furnished the services. This method was consistent with our policy to not use the registered dietician PPIS PE/HR in calculating the PE RVUs for services furnished by registered dieticians but we did not actually crosswalk the specialty of registered dietician to the "All Physicians" PE/HR data as we had intended according to the final policy. Nevertheless, we are affirming for CY 2011 that the proposed resource-based PE RVUs have been calculated in accordance with the final policy adopted in the CY 2010 PFS final rule with comment period (74 FR 61752) for registered dietician services that crosswalks the specialty to the "All Physicians" PE/HR data.

As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), CY 2011 is the second year of the 4-year transition to the PE RVUs calculated using the PPIS data. Therefore, in general, the CY 2011 PE RVUs are a 50/50 blend of the previous PE RVUs based on the SMS and supplemental survey data and the new PE RVUS developed using the PPIS data as described above. Note that the reductions in the PE RVUs for expensive diagnostic imaging equipment attributable to the change to an equipment utilization rate assumption of 75 percent (*see* 74 FR 61753 through 61755 and section II.A.3. of this proposed rule) are not subject to the transition.

c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(i) *Direct costs.* The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, equipment, and supplies) typically required to provide the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of $400 from our PE database and another service has a direct cost sum of $200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

(ii) *Indirect costs.* Section II.A.2.b. of this proposed rule describes the current data sources for specialty-specific indirect costs used in our PE calculations. We allocate the indirect costs to the code level on the basis of the direct costs specifically associated with a code and the greater of either the clinical labor costs or the physician work RVUs. We also incorporate the survey data described earlier in the PE/HR discussion. The general approach to developing the indirect portion of the PE RVUs is described below.

- For a given service, we use the direct portion of the PE RVUs calculated as described above and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that perform the service to determine an initial indirect allocator. For example, if the direct portion of the PE RVUs for a given service were 2.00 and direct costs, on average, represented 25 percent of total costs for the specialties that performed the service, the initial indirect allocator would be 6.00 since 2.00 is 25 percent of 8.00.
- We then add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had work RVUs of 4.00 and the clinical labor portion of the direct PE RVUs was 1.50, we would add 6.00 plus 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.
- We next incorporate the specialty-specific indirect PE/HR data into the calculation. As a relatively extreme example for the sake of simplicity, assume in our example above that, based on the survey data, the average indirect cost of the specialties performing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties performing the second service with an indirect allocator of 5.00. In this case, the indirect portion of the PE RVUs of the first service would be equal to that of the second service.

d. Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a hospital or facility setting, we establish two PE RVUs: facility and nonfacility.

The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. Because Medicare makes a separate payment to the facility for its costs of furnishing a service, the facility PE RVUs are generally lower than the nonfacility PE RVUs.

e. Services With Technical Components (TCs) and Professional Components (PCs)

Diagnostic services are generally comprised of two components: a professional component (PC) and a technical component (TC), each of which may be performed independently or by different providers, or they may be performed together as a "global" service. When services have PC and TC components that can be billed separately, the payment for the global component equals the sum of the payment for the TC and PC. This is a result of using a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global components, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global components, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global under the bottom-up methodology.)

f. Alternative Data Sources and Public Comments on Final Rule for 2010.

In the CY 2010 PFS final rule with comment period (74 FR 61749 through 61750), we discussed the Medicare Payment Advisory Commission's (MedPAC's) comment that in the future, "CMS should consider alternatives to collecting specialty-specific cost data or options to decrease the reliance on such data." We agreed with MedPAC that it would be appropriate to consider the future of the PE RVUs moving forward. We sought comments from other stakeholders on the issues raised by MedPAC for the future. In particular, we requested public comments regarding MedPAC's suggestion that we consider alternatives for collecting specialty-specific cost data or options to decrease the reliance on such data. We noted MedPAC's comment that, "CMS should consider if Medicare or provider groups should sponsor future data collection efforts, if participation should be voluntary (such as surveys) or mandatory (such as cost reports), and whether a nationally representative sample of practitioners would be sufficient for either a survey or cost reports." MedPAC also stated that one option for decreasing the reliance on specialty-specific cost data would be the elimination of the use of indirect PE/HR data in the last step of establishing the indirect cost portion of the PE RVUs as described previously.

Almost all of the commenters on the CY 2010 PFS final rule with comment period that addressed this issue expressed a general willingness to work with CMS on methodological improvements or future data collection efforts. Although no commenters detailed a comprehensive overall alternative methodology, several commenters did provide suggestions regarding future data collection efforts and specific aspects of the current methodology.

The commenters that addressed the issue of surveys supported the use of surveys if they yielded accurate PE information. The few commenters that addressed the issue of cost reports were opposed to physician cost reports. The commenters varied with respect to their opinions regarding whether data collection efforts should be led by organized medicine, individual specialty societies, or CMS. Several commenters that addressed the issue of voluntary versus mandatory data collection efforts supported voluntary data collection efforts and opposed mandatory data collection efforts.

Some commenters recommended no changes to the methodology or PE data in the near future. Other commenters indicated that the methodology and data changes needed to be made for CY 2011. Although most commenters did not directly address the use of the indirect PE/HR data, those that did predominately opposed the elimination of the use of these data.

Many commenters addressed specifics of the PE methodology (as further described in section II.A.2.c. of this proposed rule). Some were opposed to the scaling factor applied in the development of the direct PE portion of the PE RVUs so that in the aggregate the direct portion of the PE RVUs do not exceed the proportion indicated by the survey data (*See* Step 4 in g.(ii) below). Several of these commenters advocated the elimination of this direct scaling factor, while others indicated that the issue should be examined more closely.

A few commenters recommended that physician work not be used as an allocator in the development of the indirect portion of the PE RVUs as described earlier in this section. A few indicated that physician time, but not physician work, should be used in the allocation. Other commenters suggested that indirect costs should be allocated solely on the basis of direct costs.

We note that many of the issues raised by commenters on the CY 2010 PFS final rule with comment period are similar to issues raised in the development of the original resource-based PE methodology and in subsequent revisions to the methodology, including the adoption of the bottom-up methodology. While we are not proposing a broad methodological change or broad data collection effort in this CY 2011 PFS proposed rule, we invite comments on our summary of the issues raised by the commenters on the CY 2010 PFS final rule with comment period, as presented above. The complete public comments on that final rule are available for public review at *http://www.regulations.gov* by entering "CMS–1413–FC" in the search box on the main page.

g. PE RVU Methodology

For a more detailed description of the PE RVU methodology, we refer readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746).

(i) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty-specific PE/HR data from the surveys.

(ii) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service. Apply a scaling adjustment to the direct inputs.

Step 2: Calculate the current aggregate pool of direct PE costs. This is the product of the current aggregate PE (aggregate direct and indirect) RVUs, the CF, and the average direct PE percentage from the survey data.

Step 3: Calculate the aggregate pool of direct costs. This is the sum of the product of the direct costs for each service from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3 calculate a direct PE scaling adjustment so that the aggregate direct cost pool does not exceed the current aggregate direct cost pool and apply it to the direct costs from Step 1 for each service.

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs, as long as the same CF is used in Step 2 and Step 5. Different CFs will result

in different direct PE scaling factors, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling factors offset one another.

(iii) Create the Indirect Cost PE RVUs

Create indirect allocators.

Step 6: Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global components.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: the direct PE RVUs, the clinical PE RVUs, and the work RVUs.

For most services the indirect allocator is:

indirect percentage * (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the indirect allocator is: indirect percentage * (direct PE RVUs/direct percentage) + clinical PE RVUs + work RVUs.
- If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: indirect percentage * (direct PE RVUs/direct percentage) + clinical PE RVUs.

(**Note:** For global services, the indirect allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs will be allocated using the work RVUs, and for the TC service, indirect PEs will be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes in the examples in the Table 2, the formulas were divided into two parts for each service. The first part does not vary by service and is the: indirect percentage * (direct PE RVUs/direct percentage). The second part is either the work RVUs, clinical PE RVUs, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the current aggregate pool of PE RVUs by the average indirect PE percentage from the survey data.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the physician time for the service, and the specialty's utilization for the service across all services performed by the specialty.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (*Note:* For services with TCs and PCs, we calculate the indirect practice cost index across the global components, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global component.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(iv) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 6 to the indirect PE RVUs from Step 17 and apply the final PE budget neutrality (BN) adjustment, MEI rebasing adjustment, and multiple procedure payment reduction (MPPR) adjustment.

The final PE BN adjustment is calculated by comparing the results of Step 18 (prior to the MEI rebasing and MPPR adjustments) to the current pool of PE RVUs. This final BN adjustment is required primarily because certain specialties are excluded from the PE RVU calculation for ratesetting purposes, but all specialties are included for purposes of calculating the final BN adjustment. (*See* "Specialties excluded from ratesetting calculation" below in this section.)

As discussed in section II.E.1. of this proposed rule, we are proposing to rebase and revise the Medicare Economic Index (MEI) for CY 2011. As discussed in section II.C.4. of this proposed rule, section 1848(c)(2)(K) of the Act (as added by section 3134 of the ACA) specifies that the Secretary shall identify potentially misvalued codes by examining multiple codes that are frequently billed in conjunction with furnishing a single service. There is inherent duplication in the PE associated with those services which are frequently furnished together, so reducing PFS payment for the second and subsequent services to account for the efficiencies in multiple service sessions may be appropriate. Consistent with this provision of the ACA, we are proposing a limited expansion of the current MPPR policy for imaging services for CY 2011 and a new MPPR policy for therapy services.

(v) Setup File Information

- Specialties excluded from ratesetting calculation: For the purposes of calculating the PE RVUs, we exclude certain specialties, such as certain nonphysician practitioners paid at a percentage of the PFS and low volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 1.

TABLE 1—SPECIALTIES EXCLUDED FROM RATESETTING CALCULATION

Specialty code	Specialty description
42	Certified nurse midwife.
49	Ambulatory surgical center.
50	Nurse practitioner.
51	Medical supply company with certified orthotist.
52	Medical supply company with certified prosthetist.
53	Medical supply company with certified prosthetist-orthotist.
54	Medical supply company not included in 51, 52, or 53.
55	Individual certified orthotist.
56	Individual certified prosthetist.
57	Individual certified prosthetist-orthotist.
58	Individuals not included in 55, 56, or 57.
59	Ambulance service supplier, *e.g.,* private ambulance companies, funeral homes, etc.
60	Public health or welfare agencies.
61	Voluntary health or charitable agencies.
73	Mass immunization roster biller.
74	Radiation therapy centers.
87	All other suppliers (*e.g.,* drug and department stores).
88	Unknown supplier/provider specialty.
89	Certified clinical nurse specialist.
95	Competitive Acquisition Program (CAP) Vendor.
96	Optician.
A0	Hospital.
A1	SNF.
A2	Intermediate care nursing facility.
A3	Nursing facility, other.
A4	HHA.
A5	Pharmacy.
A6	Medical supply company with respiratory therapist.
A7	Department store.
1	Supplier of oxygen and/or oxygen related equipment.
2	Pedorthic personnel.
3	Medical supply company with pedorthic personnel.

• Crosswalk certain low volume physician specialties: Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• Physical therapy utilization: Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.

• Identify professional and technical services not identified under the usual TC and 26 modifiers: Flag the services that are PC and TC services, but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), is associated with the global service, CPT code 93000 (Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report).

• Payment modifiers: Payment modifiers are accounted for in the creation of the file. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier.

• Work RVUs: The setup file contains the work RVUs from this proposed rule.

(vi) Equipment Cost per Minute

The equipment cost per minute is calculated as:

(1/(minutes per year * usage)) * price * ((interest rate/(1 − (1/((1 + interest rate) * life of equipment)))) + maintenance)

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); generally 150,000 minutes.

usage = equipment utilization assumption; 0.75 for certain expensive diagnostic imaging equipment (*see* 74 FR 61753 through 61755 and section II.A.3. of this proposed rule) and 0.5 for others.

price = price of the particular piece of equipment.

interest rate = 0.11.

life of equipment = useful life of the particular piece of equipment.

maintenance = factor for maintenance; 0.05.

Note: The use of any particular conversion factor (CF) in Table 2 to illustrate the PE calculation has no effect on the resulting RVUs.

Note: PE RVUs in Table 2, row 27, may not match Addendum B due to rounding.
* The direct adj = [current pe rvus * CF * avg dir pct]/[sum direct inputs] = [Step 2]/[Step 3].
** The indirect adj = [current pe rvus * avg ind pct]/[sum of ind allocators] = [Step 9]/[Step 10].

3. Proposed PE Revisions for CY 2011

a. Equipment Utilization Rate

As part of the PE methodology associated with the allocation of equipment costs for calculating PE RVUs, we currently use an equipment utilization rate assumption of 50 percent for most equipment, with the exception of expensive diagnostic imaging equipment (which is equipment priced at over $1 million, for example, computed tomography (CT) and magnetic resonance imaging (MRI) scanners), for which we adopted a 90 percent utilization rate assumption and provided for a 4-year transition beginning in CY 2010 (74 FR 61755). Therefore, CY 2010 is the first transitional payment year. Payment is made in CY 2010 for the diagnostic services listed in Table 3 (those that include expensive diagnostic imaging equipment in their PE inputs) based on 25 percent of the new PE RVUs and 75 percent of the prior PE RVUs for those services.

Section 1848(b)(4)(C) of the Act (as added by section 3135(a) of the ACA) requires that with respect to fee schedules established for CY 2011 and subsequent years, in the methodology for determining PE RVUs for expensive diagnostic imaging equipment under the CY 2010 PFS final rule with comment period, the Secretary shall use a 75 percent assumption instead of the utilization rates otherwise established in that rule. The provision also requires that the reduced expenditures attributable to this change in the utilization rate for CY 2011 and subsequent years shall not be taken into account when applying the budget neutrality limitation on annual adjustments described in section 1848(c)(2)(B)(ii)(II) of the Act.

As a result, the 75 percent equipment utilization rate assumption will be applied to expensive diagnostic imaging equipment in a nonbudget neutral manner for CY 2011, and the changes to PE RVUs will not be transitioned over a period of years. We will apply the 75 percent utilization rate assumption in CY 2011 to all of the services to which we currently apply the transitional 90 percent utilization rate assumption in CY 2010. These services are listed in a file on the CMS Web site that is posted under downloads for the CY 2010 PFS final rule with comment period at: (*http://www.cms.gov/physicianfeesched/downloads/CODES_SUBJECT_TO_90PCT_USAGE_RATE.zip*). These codes are also displayed in Table 3.

TABLE 3—CURRENT CPT CODES SUBJECT TO FIRST YEAR (CY 2010) OF 4-YEAR TRANSITION TO 90 PERCENT EQUIPMENT UTILIZATION RATE ASSUMPTION AND THAT WILL BE SUBJECT TO THE 75 PERCENT EQUIPMENT UTILIZATION RATE ASSUMPTION IN CY 2011

CPT code	Short descriptor
70336	Mri, temporomandibular joint(s).
70450	Ct head/brain w/o dye.
70460	Ct head/brain w/dye.

73721	Mri joint of lwr extr w/o dye.
73722	Mri joint of lwr extr w/dye.
73723	Mri joint of lwr extr w/o & w/dye.
74150	Ct abdomen w/o dye.
74160	Ct abdomen w/dye.
74170	Ct abdomen w/o & w/dye.
74181	Mri abdomen w/o dye.
74182	Mri abdomen w/dye.
74183	Mri abdomen w/o and w/dye.
74261	Ct colonography, w/o dye.
74262	Ct colonography, w/dye.
75557	Cardiac mri for morph.
75559	Cardiac mri w/stress img.
75561	Cardiac mri for morph w/dye.
75563	Cardiac mri w/stress img & dye.
75571	Ct hrt w/o dye w/ca test.
75572	Ct hrt w/3d image.
75573	Ct hrt w/3d image, congen.
77058	Mri, one breast.
77059	Mri, both breasts.
77078	Ct bone density, axial.
77084	Magnetic image, bone marrow.

Additionally, for CY 2011, we are proposing to expand the list of services to which the higher equipment utilization rate assumption applies to all other diagnostic imaging services that utilize similar expensive CT and MRI scanners. The additional 24 CPT codes (listed in Table 4) to which we are proposing to apply the 75 percent equipment utilization rate assumption also have expensive diagnostic imaging equipment (priced at over $1 million) included in their PE inputs. These services are predominantly diagnostic computed tomographic angiography (CTA) and magnetic resonance angiography (MRA) procedures that include similar expensive CT and MRI scanners in their direct PE inputs. We indicated in the CY 2010 PFS final rule with comment period (74 FR 61754) that we were persuaded by PPIS data on angiography that the extrapolation of MRI and CT data (and their higher equipment utilization rate) may be inappropriate. However, this reference was limited to those procedures that include an angiography room in the direct PE inputs, such as CPT code 93510 (Left heart catheterization, retrograde, from the brachial artery, axillary artery or femoral artery; percutaneous). In contrast, CTA and MRA procedures include a CT room or

MRI room, respectively, in the direct PE inputs, and the PPIS data confirm that a higher assumed utilization rate than 50 percent would be appropriate. The PPIS angiography room data that reflected a 56 percent equipment utilization rate would not specifically apply to CTA and MRA procedures. Thus, on further review, we believe it is appropriate to include CTA and MRA procedures in the list of procedures for which we assume a 75 percent equipment utilization rate, and we are proposing to do so beginning in CY 2011.

Consistent with section 1848(c)(2)(B)(v)(III) of the Act (as amended by section 3135 of the ACA), the reduced expenditures attributable to this change in the utilization rate assumption applicable to CY 2011 shall not be taken into account when applying the budget neutrality limitation on annual adjustments described in section 1848(c)(2)(B)(ii)(III) of the Act.

As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), CY 2011 is the second year of the 4-year transition to the PE RVUs calculated using the PPIS data. The reductions in the PE RVUs for expensive diagnostic imaging equipment attributable to the change to an equipment utilization rate assumption of 75 percent for CY 2011 are not subject to the transition.

TABLE 4—PROPOSED CPT CODE ADDITIONS TO THE 75 PERCENT EQUIPMENT UTILIZATION RATE ASSUMPTION CY 2011

CPT code	Short descriptor
70496	Ct angiography, head.
70498	Ct angiography, neck.
70544	Mr angiography head w/o dye.
70545	Mr angiography head w/dye.
70546	Mr angiography head w/o & w/ dye.
70547	Mr angiography neck w/o dye.
70548	Mr angiography neck w/dye.

75574	Ct angio hrt w/3d image.
75635	Ct angio abdominal arteries.
76380	CAT scan follow up study.
77079	Ct bone density, peripheral.

b. HCPCS Code-Specific PE Proposals

In this section, we discuss other specific CY 2011 proposals and changes related to direct PE inputs. The proposed changes that follow are included in the proposed CY 2011 direct PE database, which is available on the CMS Web site under the downloads for the CY 2011 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/.*

(1) Biohazard Bags

We have identified 22 codes for which the supply item "biohazard bag" (SM004) is currently considered a direct PE input. The item is already properly accounted for in the indirect PE because it is not attributable to an individual patient service. Therefore, we are proposing to remove the biohazard bag from the CY 2011 direct PE database and the changes in direct PE inputs for the associated services are reflected in the proposed CY 2011 direct PE database.

(2) PE Inputs for Professional Component (PC) Only and Technical Component (TC) Only Codes Summing to Global Only Codes

In the case of selected diagnostic tests, different but related CPT codes are used to describe global, professional, and technical components of a service. These codes are unlike the majority of other diagnostic test CPT codes where modifiers may be used in billing a single CPT code in order to differentiate professional and technical components. When different but related CPT codes are used to report the components of these services, the different CPT codes are referred to as "global only," "professional (PC) only," and "technical (TC) only" codes. Medicare payment systems are programmed to ensure that the PE RVUs for global only codes equal the sum of the PE RVUs for the PC and TC only codes. However, it has come to our attention that the direct PE inputs for certain global only codes do not reflect the appropriate summation of their related TC only and PC only component code PE inputs as they appear in the direct PE database. While the PFS payment calculations have been programmed to apply the correct PE RVUs for the global only code based on a summation of component code PE RVUs, the direct PE database has reflected incorrect inputs that are overridden by the payment system. Therefore, we are proposing to correct the direct PE inputs for the global only codes so that the inputs reflect the appropriate summing of the PE inputs for the associated PC only and TC only codes. The proposed CY 2011 direct PE database includes PE corrections to the 14 CPT codes listed in Table 5.

TABLE 5—GROUPS OF RELATED CPT CODES WITH PROPOSED CHANGES TO PE INPUTS SO THAT INPUTS FOR PROFESSIONAL COMPONENT (PC) ONLY AND TECHNICAL COMPONENT (TC) ONLY CODES SUM TO GLOBAL ONLY CODES

CPT code	Long descriptor
93224	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage, with visual superimposition scanning; includes recording, scanning analysis with report, physician review and interpretation.
93225	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage, with visual superimposition scanning; recording (includes connection, recording, disconnection).
93226	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage, with visual superimposition scanning; scanning analysis with report.
93230	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage without superimposition scanning utilizing a device capable of producing a full miniaturized printout; including recording, microprocessor-based analysis with report, physician review and interpretation.
93231	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage without superimposition scanning utilizing a device capable of producing a full miniaturized printout; recording (includes connection, recording, and disconnection.

TABLE 5—GROUPS OF RELATED CPT CODES WITH PROPOSED CHANGES TO PE INPUTS SO THAT INPUTS FOR PROFESSIONAL COMPONENT (PC) ONLY AND TECHNICAL COMPONENT (TC) ONLY CODES SUM TO GLOBAL ONLY CODES—Continued

CPT code	Long descriptor
93232	Wearable electrocardiographic rhythm derived monitoring for 24 hours by continuous original waveform recording and storage without superimposition scanning utilizing a device capable of producing a full miniaturized printout; microprocessor-based analysis with report.
93268	Wearable patient activated electrocardiographic rhythm derived event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; includes transmission, physician review and interpretation.
93270	Wearable patient activated electrocardiographic rhythm derived event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; recording (includes connection, recording, and disconnection).
93271	Wearable patient activated electrocardiographic rhythm derived event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; monitoring, receipt of transmissions, and analysis.
93720	Plethysmography, total body; with interpretation and report.
93721	Plethysmography, total body; tracing only, without interpretation and report.
93784	Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; including recording, scanning analysis, interpretation and report.
93786	Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; recording only.
93788	Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; scanning analysis with report.

(3) Equipment Time Inputs for Certain Diagnostic Tests

We have recently identified incorrect equipment time inputs for four CPT codes associated with certain diagnostic tests (each is displayed in Table 5):

- CPT code 93225 is the TC only code that includes the connection, recording, and disconnection of the holter monitor (CMS Equipment Code EQ127) used in 24 hour continuous electrocardiographic rhythm derived monitoring. The current equipment time input for the holter monitor is 42 minutes, which parallels the intra-service clinical labor input time for the CPT code. However, the equipment time should reflect the 24 hours of continuous monitoring in which the device is used exclusively by the patient. Therefore, we are proposing to change the monitor equipment time for CPT code 93225 to 1440 minutes, the number of minutes in 24 hours.
- CPT code 93226 is the TC only code that includes the scanning analysis with report. The number of minutes the monitor (CMS Equipment Code EQ127) is used in this service should parallel the intra-service clinical labor input time of 52 minutes during which the monitor is in use, instead of the current equipment time of 1440 minutes, because this code does not represent 24 hours of device use. Therefore, we are proposing to change the monitor equipment time for CPT code 93226 to 52 minutes.
- CPT 93224 is the global only code that includes the connection, recording, and disconnection of the monitor (CMS Equipment Code EQ127) and the scanning analysis with report, as well as the physician review and interpretation. Under our proposal, its direct PE inputs have been appropriately summed to include the 1492 total minutes of time for the holter monitor that are included in CPT codes 93225 and 93226.
- CPT code 93788 is the TC only code that describes the scanning analysis with report for ambulatory blood pressure monitoring. The equipment time input for the blood pressure monitor should parallel the 10 minutes of clinical labor input for the CPT code since that is the time during which the monitor is in use. Currently, the equipment time input for the monitor is 1440 minutes, which is appropriate only for CPT code 93786, the code that describes the 24 hours of ambulatory blood pressure monitoring recording. In this case, CPT code 93786's direct PE inputs are correct. Therefore, we are proposing to correct the equipment time input for the ambulatory blood pressure monitor in CPT code 93788 to 10 minutes.
- CPT code 93784 is the global only code that includes the recording, the scanning analysis with report, and the physician interpretation and report for ambulatory blood pressure monitoring. Under our proposal, its direct PE inputs have been appropriately summed to include the 1450 total minutes of time for the ambulatory blood pressure monitor that are included in CPT codes 93786 and 93788.

We have modified the proposed CY 2011 direct PE database to reflect these changes.

(4) Cobalt-57 Flood Source

Stakeholders have requested that CMS reevaluate the useful life of the Cobalt-57 flood source (CMS Equipment Code ER001), given their estimate of approximately 271 days for the source's half-life. The current useful life input for the Colbalt-57 flood source is 5 years. Using publicly available catalogs, we found that the Cobalt-57 flood source is marketed with a useful life of 2 years. Therefore, we are proposing to change the useful life input from the current 5 years to 2 years. The Cobalt-57 flood source is included with the revised useful life input for 96 HCPCS codes in the proposed CY 2011 direct PE database.

(5) Venom Immunotherapy

One stakeholder provided updated price information for the venoms used for the five venom immunology CPT codes, specifically 95145 (Professional services for the supervision of preparation and provision of antigens for allergen immunotherapy (specify number of doses); single stinging insect venom); 95146 (Professional services for the supervision of preparation and provision of antigens for allergen immunotherapy (specify number of doses); 2 single stinging insect venoms); 95147 (Professional services for the supervision of preparation and provision of antigens for allergen immunotherapy (specify number of doses); 3 single stinging insect venoms); 95148 (Professional services for the supervision of preparation and provision of antigens for allergen immunotherapy (specify number of doses); 4 single stinging insect venoms); 95149 (Professional services for the supervision of preparation and provision of antigens for allergen immunotherapy (specify number of doses); 5 single stinging insect venoms).

In the CY 2004 PFS final rule with comment period (68 FR 63206), we

adopted a pricing methodology that utilizes the average price of a 1 milliliter dose of venom and adds that price per dose as direct PE inputs for CPT codes 95145 and 95146. When a patient requires three stinging insect venoms, as for CPT code 95147, the price input for a 3-vespid mix is used. This 3-vespid mix price is also used to value CPT codes 95148 (four venoms) and 96149 (five venoms), with the single venom price added once to CPT code 97148 and twice to CPT code 97149.

As requested by the stakeholder, we are updating the price inputs for the 1-milliliter dose of venom to $16.67 and for the 3-vespid mix to $30.22 in the proposed CY 2011 direct PE database.

(6) Equipment Redundancy

Stakeholders have recently brought to our attention that the ECG, 3-channel (with SpO2, NIBP, temp, resp) (CMS Equipment Code EQ011) incorporates all of the functionality of the pulse oximeter with printer (CMS Equipment Code EQ211). Therefore, in HCPCS codes where CMS Equipment Code EQ011 is present, CMS Equipment Code EQ211 is redundant. On this basis, we are proposing to remove the pulse oximeter with printer (CMS Equipment Code EQ211) as an input for the 118 codes that also contain the ECG, 3-channel (with SpO2, NIBP, temp, resp) (CMS Equipment Code EQ011). We have made these adjustments in the proposed CY 2011 direct PE database.

(7) Equipment Duplication

We recently identified a number of CPT codes with duplicate equipment inputs in the PE database. We are proposing to remove the duplicate equipment items and have modified the proposed CY 2011 direct PE database accordingly as detailed in Table 6.

TABLE 6—CPT CODES WITH PROPOSED REMOVAL OF DUPLICATE EQUIPMENT ITEMS IN THE DIRECT PE DATABASE

CPT code		CMS equipment code for duplicate equipment	Description of equipment
19302	P-mastectomy w/ln removal	EF014	light, surgical.
19361	Breast reconstr w/lat flap	ED005	camera, digital system, 12 megapixel (medical grade).
		EF031	table, power.
		EQ168	light, exam.
44157	Colectomy w/ileoanal anast	EF031	table, power.
		EQ168	light, exam.
44158	Colectomy w/neo-rectum pouch	EF031	table, power.
		EQ168	light, exam.
56440	Surgery for vulva lesion	EF031	table, power.
		EQ170	light, fiberoptic headlight w-source.
57296	Revise vag graft, open abd	EF031	table, power.
		EQ170	light, fiberoptic headlight w-source.
58263	Vag hyst w/t/o & vag repair	EF031	table, power.
59610	Vbac delivery	EF031	table, power.
67228	Treatment of retinal lesion	EL005	lane, exam (oph).
		EQ230	slit lamp (Haag-Streit), dedicated to laser use.
76813	Ob us nuchal meas, 1 gest	ED024	film processor, dry, laser.
77371	Srs, multisource	EQ211	pulse oximeter w-printer.
93540	Injection, cardiac cath	ED018	computer workstation, cardiac cath monitoring.
		EL011	room, angiography.
		EQ011	ECG, 3-channel (with SpO2, NIBP, temp, resp).
		EQ032	IV infusion pump.
		EQ088	contrast media warmer.
		EQ211	pulse oximeter w-printer.
93542	Injection for heart x-rays	ED018	computer workstation, cardiac cath monitoring.
		EL011	room, angiography.
		EQ011	ECG, 3-channel (with SpO2, NIBP, temp, resp).
		EQ032	IV infusion pump.
		EQ088	contrast media warmer.
		EQ211	pulse oximeter w-printer.

(8) Establishing Overall Direct PE Supply Price Inputs Based on Unit Prices and Quantities

We have identified minor errors in total price inputs for a number of supply items due to mathematical mistakes in multiplying the item unit price and the quantity used in particular CPT codes for the associated services. We are proposing to modify the direct PE database to appropriately include the overall supply price input for a supply item as the product of the unit price and the quantity of the supply item used in the CPT code. Most of the overall supply price input changes are small, and we have adjusted the proposed CY 2011 direct PE database accordingly. The CPT and Level II HCPCS codes and associated supplies for nonfacility and facility settings that are subject to these corrections are displayed in Tables 7 and 8, respectively.

TABLE 7—OVERALL SUPPLY PRICE CALCULATION CORRECTIONS FOR NONFACILITY SETTINGS

CPT/HCPCS code	Short descriptor	CMS Supply code with overall price corrections	Description of supply
11952	Therapy for contour defects	SC029	needle, 18–27g.
11954	Therapy for contour defects	SC029	needle, 18–27g.
15820	Revision of lower eyelid	SA082	pack, ophthalmology visit (w-dilation).

TABLE 7—OVERALL SUPPLY PRICE CALCULATION CORRECTIONS FOR NONFACILITY SETTINGS—Continued

CPT/HCPCS code	Short descriptor	CMS Supply code with overall price corrections	Description of supply
15821	Revision of lower eyelid	SA082	pack, ophthalmology visit (w-dilation).
15822	Revision of upper eyelid	SA082	pack, ophthalmology visit (w-dilation).
17311	Mohs, 1 stage, h/n/hf/g	SG078	tape, surgical occlusive 1in (Blenderm).
17312	Mohs addl stage	SG078	tape, surgical occlusive 1in (Blenderm).
17313	Mohs, 1 stage, t/a/l	SG078	tape, surgical occlusive 1in (Blenderm).
17314	Mohs, addl stage, t/a/l	SG078	tape, surgical occlusive 1in (Blenderm).
21011	Exc face les sc < 2 cm	SH046	lidocaine 1% w-epi inj (Xylocaine w-epi).
21013	Exc face tum deep < 2 cm	SH046	lidocaine 1% w-epi inj (Xylocaine w-epi).
21073	Mnpj of tmj w/anesth	SG079	tape, surgical paper 1in (Micropore).
21076	Prepare face/oral prosthesis	SL047	dental stone powder.
21081	Prepare face/oral prosthesis	SK024	film, dental.
21310	Treatment of nose fracture	SB034	mask, surgical, with face shield.
23075	Exc shoulder les sc < 3 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
		SH021	bupivacaine 0.25% inj (Marcaine).
24075	Exc arm/elbow les sc < 3 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
		SH021	bupivacaine 0.25% inj (Marcaine).
25075	Exc forearm les sc < 3 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
		SH021	bupivacaine 0.25% inj (Marcaine).
26115	Exc hand les sc < 1.5 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
		SH021	bupivacaine 0.25% inj (Marcaine).
27327	Exc thigh/knee les sc < 3 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
27618	Exc leg/ankle tum < 3 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
28039	Exc foot/toe tum sc > 1.5 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
28043	Exc foot/toe tum sc < 1.5 cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
28045	Exc foot/toe tum deep < 1.5cm	SG056	gauze, sterile 4in x 4in (10 pack uou).
28306	Incision of metatarsal	SA048	pack, minimum multi-specialty visit.
28307	Incision of metatarsal	SA048	pack, minimum multi-specialty visit.
28310	Revision of big toe	SA048	pack, minimum multi-specialty visit.
28312	Revision of toe	SA048	pack, minimum multi-specialty visit.
28313	Repair deformity of toe	SA048	pack, minimum multi-specialty visit.
28315	Removal of sesamoid bone	SA048	pack, minimum multi-specialty visit.
28340	Resect enlarged toe tissue	SA048	pack, minimum multi-specialty visit.
28344	Repair extra toe(s)	SA048	pack, minimum multi-specialty visit.
28345	Repair webbed toe(s)	SA048	pack, minimum multi-specialty visit.
28496	Treat big toe fracture	SA048	pack, minimum multi-specialty visit.
28755	Fusion of big toe joint	SA048	pack, minimum multi-specialty visit.
28820	Amputation of toe	SA048	pack, minimum multi-specialty visit.
28890	High energy eswt, plantar f	SC051	syringe 10–12ml.
29870	Knee arthroscopy, dx	SG079	tape, surgical paper 1in (Micropore).
32553	Ins mark thor for rt perq	SB034	mask, surgical, with face shield.
36475	Endovenous rf, 1st vein	SC074	iv pressure infusor bag.
36592	Collect blood from picc	SG050	gauze, non-sterile 2in x 2in.
41530	Tongue base vol reduction	SD009	canister, suction.
41805	Removal foreign body, gum	SD134	tubing, suction, non-latex (6ft) with Yankauer tip (1).
41806	Removal foreign body, jawbone	SD134	tubing, suction, non-latex (6ft) with Yankauer tip (1).
42107	Excision lesion, mouth roof	SD009	canister, suction.
46505	Chemodenervation anal musc	SD009	canister, suction.
49411	Ins mark abd/pel for rt perq	SB034	mask, surgical, with face shield.
49440	Place gastrostomy tube perc	SK089	x-ray developer solution.
49441	Place duod/jej tube perc	SK089	x-ray developer solution.
49442	Place cecostomy tube perc	SK089	x-ray developer solution.
49446	Change g-tube to g-j perc	SK089	x-ray developer solution.
49450	Replace g/c tube perc	SK089	x-ray developer solution.
49451	Replace duod/jej tube perc	SK089	x-ray developer solution.
49452	Replace g-j tube perc	SK089	x-ray developer solution.
49460	Fix g/colon tube w/device	SK089	x-ray developer solution.
49465	Fluoro exam of g/colon tube	SK089	x-ray developer solution.
50382	Change ureter stent, percut	SB034	mask, surgical, with face shield.
50384	Remove ureter stent, percut	SB034	mask, surgical, with face shield.
50385	Change stent via transureth	SB034	mask, surgical, with face shield.
50386	Remove stent via transureth	SB034	mask, surgical, with face shield.
50387	Change ext/int ureter stent	SB034	mask, surgical, with face shield.
50389	Remove renal tube w/fluoro	SB034	mask, surgical, with face shield.
51100	Drain bladder by needle	SH047	lidocaine 1%–2% inj (Xylocaine).
51101	Drain bladder by trocar/cath	SH047	lidocaine 1%–2% inj (Xylocaine).
51727	Cystometrogram w/up	SC051	syringe 10–12ml.
51728	Cystometrogram w/vp	SC051	syringe 10–12ml.
51729	Cystometrogram w/vp&up	SC051	syringe 10–12ml.
52649	Prostate laser enucleation	SA048	pack, minimum multi-specialty visit.
53855	Insert prost urethral stent	SB024	gloves, sterile.

TABLE 7—OVERALL SUPPLY PRICE CALCULATION CORRECTIONS FOR NONFACILITY SETTINGS—Continued

27618	Exc leg/ankle tum < 3 cm	SA048	pack, minimum multi-specialty visit.
28307	Incision of metatarsal	SA048	pack, minimum multi-specialty visit.
28340	Resect enlarged toe tissue	SA048	pack, minimum multi-specialty visit.
28345	Repair webbed toe(s)	SA048	pack, minimum multi-specialty visit.
28820	Amputation of toe	SA048	pack, minimum multi-specialty visit.
33516	Cabg, vein, six or more	SA052	pack, post-op incision care (staple).
34510	Transposition of vein valve	SA054	pack, post-op incision care (suture).
35013	Repair artery rupture, arm	SA048	pack, minimum multi-specialty visit.
41150	Tongue, mouth, jaw surgery	SA048	pack, minimum multi-specialty visit.
41153	Tongue, mouth, neck surgery	SA048	pack, minimum multi-specialty visit.
41155	Tongue, jaw, & neck surgery	SA048	pack, minimum multi-specialty visit.
41805	Removal foreign body, gum	SD134	tubing, suction, non-latex (6ft) with Yankauer tip (1).
41806	Removal foreign body, jawbone	SD134	tubing, suction, non-latex (6ft) with Yankauer tip (1).
42160	Treatment mouth roof lesion	SD122	suction tip, Yankauer.
51925	Hysterectomy/bladder repair	SB006	drape, non-sterile, sheet 40in x 60in.
56620	Partial removal of vulva	SA048	pack, minimum multi-specialty visit.
57284	Repair paravag defect, open	SA051	pack, pelvic exam.
		SB006	drape, non-sterile, sheet 40in x 60in.
57285	Repair paravag defect, vag	SA051	pack, pelvic exam.
		SB006	drape, non-sterile, sheet 40in x 60in.
57423	Repair paravag defect, lap	SA051	pack, pelvic exam.
		SB006	drape, non-sterile, sheet 40in x 60in.
58660	Laparoscopy, lysis	SB006	drape, non-sterile, sheet 40in x 60in.
58662	Laparoscopy, excise lesions	SJ046	silver nitrate applicator.
58670	Laparoscopy, tubal cautery	SJ046	silver nitrate applicator.
58940	Removal of ovary(s)	SA052	pack, post-op incision care (staple).
58952	Resect ovarian malignancy	SB006	drape, non-sterile, sheet 40in x 60in.
64632	N block inj, common digit	SA048	pack, minimum multi-specialty visit.
65112	Remove eye/revise socket	SA050	pack, ophthalmology visit (no dilation).
65114	Remove eye/revise socket	SA050	pack, ophthalmology visit (no dilation).
65235	Remove foreign body from eye	SA082	pack, ophthalmology visit (w-dilation).
65265	Remove foreign body from eye	SA082	pack, ophthalmology visit (w-dilation).
65272	Repair of eye wound	SA082	pack, ophthalmology visit (w-dilation).
65273	Repair of eye wound	SA082	pack, ophthalmology visit (w-dilation).
65280	Repair of eye wound	SA082	pack, ophthalmology visit (w-dilation).
65285	Repair of eye wound	SA082	pack, ophthalmology visit (w-dilation).
65286	Repair of eye wound	SA082	pack, ophthalmology visit (w-dilation).
65290	Repair of eye socket wound	SA082	pack, ophthalmology visit (w-dilation).
65770	Revise cornea with implant	SA050	pack, ophthalmology visit (no dilation).
65850	Incision of eye	SA082	pack, ophthalmology visit (w-dilation).
65865	Incise inner eye adhesions	SA082	pack, ophthalmology visit (w-dilation).
65870	Incise inner eye adhesions	SA082	pack, ophthalmology visit (w-dilation).
66180	Implant eye shunt	SA082	pack, ophthalmology visit (w-dilation).
66185	Revise eye shunt	SA082	pack, ophthalmology visit (w-dilation).
66220	Repair eye lesion	SA082	pack, ophthalmology visit (w-dilation).
66250	Follow-up surgery of eye	SA082	pack, ophthalmology visit (w-dilation).
66500	Incision of iris	SA082	pack, ophthalmology visit (w-dilation).
66600	Remove iris and lesion	SA082	pack, ophthalmology visit (w-dilation).
66605	Removal of iris	SA082	pack, ophthalmology visit (w-dilation).
66625	Removal of iris	SA082	pack, ophthalmology visit (w-dilation).
66630	Removal of iris	SA082	pack, ophthalmology visit (w-dilation).
66635	Removal of iris	SA082	pack, ophthalmology visit (w-dilation).
66682	Repair iris & ciliary body	SA082	pack, ophthalmology visit (w-dilation).
66820	Incision, secondary cataract	SA082	pack, ophthalmology visit (w-dilation).

TABLE 8—OVERALL SUPPLY PRICE CALCULATION CORRECTIONS FOR FACILITY SETTINGS—Continued

CPT/HCPCS Code	Short descriptor	CMS supply code with overall price corrections	Description of supply
66850	Removal of lens material	SA082	pack, ophthalmology visit (w-dilation).
66852	Removal of lens material	SA082	pack, ophthalmology visit (w-dilation).
66930	Extraction of lens	SA082	pack, ophthalmology visit (w-dilation).
66940	Extraction of lens	SA082	pack, ophthalmology visit (w-dilation).
66983	Cataract surg w/iol, 1 stage	SA082	pack, ophthalmology visit (w-dilation).
67015	Release of eye fluid	SA082	pack, ophthalmology visit (w-dilation).
67031	Laser surgery, eye strands	SA082	pack, ophthalmology visit (w-dilation).
67036	Removal of inner eye fluid	SA082	pack, ophthalmology visit (w-dilation).
67040	Laser treatment of retina	SA082	pack, ophthalmology visit (w-dilation).
67105	Repair detached retina	SA082	pack, ophthalmology visit (w-dilation).
67107	Repair detached retina	SA082	pack, ophthalmology visit (w-dilation).
67110	Repair detached retina	SA082	pack, ophthalmology visit (w-dilation).
67115	Release encircling material	SA082	pack, ophthalmology visit (w-dilation).
67120	Remove eye implant material	SA082	pack, ophthalmology visit (w-dilation).
67228	Treatment of retinal lesion	SA082	pack, ophthalmology visit (w-dilation).
67400	Explore/biopsy eye socket	SA082	pack, ophthalmology visit (w-dilation).
67412	Explore/treat eye socket	SA082	pack, ophthalmology visit (w-dilation).
67440	Explore/drain eye socket	SA082	pack, ophthalmology visit (w-dilation).
67908	Repair eyelid defect	SG008	applicator, cotton-tipped, non-sterile 6in.
88356	Analysis, nerve	SL108	pipette.

c. AMA RUC Recommendations in CY 2010 for Changes to Direct PE Inputs

In a March 2010 letter, the AMA RUC made specific PE recommendations that we consider below. As stated earlier, the proposed changes that follow are included in the proposed CY 2011 direct PE database, which is available on the CMS Web site under the downloads for the CY 2011 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/*.

(1) Electrogastrography and Esophageal Function Test

We are accepting the AMA RUC recommendations for the CY 2011 PE inputs for the following CPT codes: 91132 (Electrogastrography, diagnostic, transcutaneous); 91133 (Electrogastrography, diagnostic, transcutaneous; with provocative testing); 91038 (Esophageal function test, gastroesophageal reflux test with nasal catheter intraluminal impedance electrode(s) placement, recording, analysis and interpretation; prolonged (greater than 1 hour, up to 24 hours)). For CPT code 91038, we have assumed a useful life of 5 years for the equipment item "ZEPHR impedance/pH reflux monitoring system with data recorder, software, monitor, workstation and cart," based on its entry in the AHA's publication, "Estimated Useful Lives of Depreciable Hospital Assets," which we use as a standard reference. The proposed CY 2011 direct PE database has been changed accordingly.

(2) 64-Slice CT Scanner and Software

The AMA RUC submitted an updated recommendation regarding the correct pricing of the 64-slice CT scanner and its accompanying software. Based on the documentation accompanying the recommendation, we are accepting this recommendation and updating the price input for the 64-slice scanner and software. This affects the following four CPT codes that use either the scanner, the software, or both: 75571 (computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium); 75572 (Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology (including 3D image postprocessing, assessment of cardiac function, and evaluation of venous structures, if performed)); 75573 (Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3D image postprocessing, assessment of LV cardiac function, RV structure and function and evaluation of venous structures, if performed)); and 75574 (Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structure, if performed)). The proposed CY 2011 direct PE database has been modified accordingly.

(3) Cystometrogram

The AMA RUC recently identified a rank order anomaly regarding CPT code 51726 (Complex cystometrogram (i.e., calibrated electronic equipment)). Currently, this procedure has higher PE RVUs, despite being less resource-intensive than the three CPT codes for which it serves as the base: 51727 (Complex cystometrogram *(i.e.,* calibrated electronic equipment); with urethral pressure profile studies (*i.e.,* urethral closure pressure profile), any technique); 51728 (Complex cystometrogram (*i.e.,* calibrated electronic equipment); with voiding pressure studies (*i.e.,* bladder voiding pressure), any technique); and 51729 (Complex cystometrogram (*i.e.,* calibrated electronic equipment); with voiding pressure studies (*i.e.,* bladder voiding pressure) and urethral pressure profile studies (*i.e.,* urethral closure pressure profile), any technique).

Since usual AMA RUC policy is that CPT codes with a 0-day global period do not have pre-service time associated with the code, the AMA RUC recommended removing the nonfacility pre-service clinical staff time from the PE inputs for 51726. Additionally, the AMA RUC recommended that the nonfacility clinical intra-service staff time for CPT code 51276 be reduced from the 118 minutes of intra-service clinical staff time currently assigned to the code to 85 minutes of intra-service clinical staff time. These changes would resolve the rank order anomaly and bring the PE inputs for CPT code 51726 into alignment with the other three codes. Finally, and for the reasons

stated above, the AMA RUC recommended that CMS remove the 23 minutes of pre-service nonfacility clinical staff time from CPT code 51725 (Simple cystometrogram (CMG) (*e.g.,* spinal manometer)). We are accepting these recommendations and, therefore, have changed the direct PE inputs for CPT codes 51725 and 51726 in the nonfacility setting in the proposed CY 2011 direct PE database.

(4) Breath Hydrogen Test

The AMA RUC provide recommendations regarding the PE inputs for CPT code 91065 (breath hydrogen test (*e.g.,* for detection of lactase deficiency, fructose intolerance, bacterial overgrowth, or oro-cecal gastrointestinal transit). We are accepting the recommendations with two modifications. We have folded the two pieces of equipment listed as "quinGas Table-Top Support Stand, 3 Tank" and "Drying Tube, Patient Sample" into the "BreathTrackerDigital SC Instrument" and summed their inputs into one equipment line-item, since these equipment items are used together specifically for the service in question. We have increased the useful life input of the "BreathTrackerDigital SC Instrument" from 7 to 8 years based on our use of the American Hospital Association (AHA)'s publication entitled, "Estimated Useful Lives of Depreciable Hospital Assets" as a standard reference. Additionally, because the AMA RUC did not include equipment times in their recommendations for this CPT code, we have used 53 minutes as the total time for all equipment items based on the total intra-service period for the clinical labor, consistent with our general policy for establishing equipment times. These modifications are reflected in the proposed CY 2011 direct PE database.

(5) Radiographic Fluoroscopic Room

A recent AMA RUC review of services that include the radiographic fluoroscopic room (CMS Equipment Code EL014) as a direct PE revealed that the use of the item is no longer typical for certain services in which it is specified within the current direct cost inputs. The AMA RUC recommended to CMS that the radiographic fluoroscopic room be deleted from CPT codes 64420 (Injection, anesthetic agent; intercostal nerve, single); 64421 (Injection, anesthetic agent; intercostal nerves, multiple, regional block); and 64620 (Destruction by neurolytic agent, intercostal nerve).

We are accepting these recommendations and, therefore, these changes are included in the proposed CY 2011 direct PE database.

The AMA RUC also informed us that it has convened a workgroup to examine the inclusion of the fluoroscopic room across a broader range of codes. We will consider any future recommendations from the AMA RUC on this topic when they are submitted.

d. Referral of Existing CPT Codes for AMA RUC Review

As part of our review of high cost supplies, we conducted a clinical review of the procedures associated with high cost supplies to confirm that those supplies currently are used in the typical case described by the CPT codes. While we confirmed that most high cost supplies could be used in the procedures for which they are currently direct PE inputs, we noted that one of the high cost supplies, fiducial screws (CMS Supply Code SD073) with a current price of $558, is included as a direct PE input for two CPT codes, specifically 77301 (Intensity modulated radiotherapy plan, including dose-volume histograms for target and critical structure partial tolerance specifications) and 77011 (Computed tomography guidance for stereotactic localization). The documentation used in the current pricing of the supply item describes a kit that includes instructions, skull screws, a drill bit, and a collar for the TALON® System manufactured by Best nomos. Best nomos' literature describes the insertion of the screws into the patient's skull to ensure accurate set-up. When CPT codes 77301 and 77011 were established in CY 2002 and CY 2003, respectively, we accepted the AMA RUC recommendations to include fiducial screws in the PE for these services. Upon further review, while we understand why this supply may be considered a typical PE input for CPT code 77011, we do not now believe that fiducial screws, as described in the Best nomos literature, would typically be used in CPT code 77301, where the most common clinical scenario would be treatment of prostate cancer.

Therefore, in order to ensure that CPT codes 77301 and 77011 are appropriately valued for CY 2011 through the inclusion or exclusion of fiducial screws in their PE, we are asking the AMA RUC to review these CPT codes with respect to the inclusion of fiducial screws in their PE. We are requesting that the AMA RUC make recommendations to us regarding whether this supply should be included in the PE or removed from the PE for CPT codes 77301 and 77011 in a timeframe that would allow us to adopt interim values for these codes for CY 2011, should the AMA RUC recommend a change. If the AMA RUC continues to recommend the inclusion of fiducial screws in the PE for CPT code 77301 and/or 77011 for CY 2011, we are requesting that the AMA RUC provide us with a detailed rationale for the inclusion of this specialized supply in the PE for the typical case reported under the relevant CPT code. We would also request that the AMA RUC furnish updated pricing information for the screws if they continue to recommend the screws as a PE input for one or both of these CPT codes in CY 2011.

e. Updating Equipment and Supply Price Inputs for Existing Codes

Historically, we have periodically received requests to change the PE price inputs for supplies and equipment in the PE database. In the past, we have considered these requests on an *ad hoc* basis and updated the price inputs as part of quarterly or annual updates if we believed them to be appropriate. In this proposed rule, we are proposing to establish a regular and more transparent process for considering public requests for changes to PE database price inputs for supplies and equipment used in existing codes.

We are proposing to act on public requests to update equipment and supply price inputs annually through rulemaking by following a regular and consistent process as discussed in the following paragraphs. We are proposing to use the annual PFS proposed rule released in the summer and the final rule released on or about November 1 each year as the vehicle for making these changes.

We will accept requests for updating the price inputs for supplies and equipment on an ongoing basis; requests must be received no later than December 31 of each CY to be considered for inclusion in the next proposed rule. In that next proposed rule, we would present our review of submitted requests to update price inputs for specific equipment or supplies and our proposals for the subsequent calendar year. We would then finalize changes in the final rule for the upcoming calendar year. Our review of the issues and consideration of public comments may result in the following outcomes that would be presented in the final rule with comment period:

- Updating the equipment or supply price inputs, as requested.
- Updating the equipment or supply price inputs, with modifications.
- Rejecting the new price inputs.

• Declining to act on the request pending a recommendation from the AMA RUC.

To facilitate our review and preparation of issues for the proposed rule, at a minimum, we would expect that requesters would provide the following information:

• Name and contact information for the requestor.

• The name of the item exactly as it appears in the direct PE file under downloads for the most recent PFS final rule with comment period, available on the CMS Web site at *http://www.cms.gov/PhysicianFeeSched/PFSFRN/list.asp#TopOfPage*.

In order to best evaluate the requests in the context of our goal of utilizing accurate market prices for these items as direct PE inputs, we also would expect requestors to provide multiple invoices from different suppliers/manufacturers. In some cases, multiple sources may not be available, whereupon a detailed explanation should be provided to support the request. When furnishing invoices, requestors should take into consideration the following parameters:

++ May be either print or electronic but should be on supplier and/or manufacturer stationery (for example, letterhead, billing statement, *etc.*)

++ Should be for the typical, common, and customary version of the supply or equipment that is used to furnish the services.

++ Price should be net of typical rebates and/or any discounts available, including information regarding the magnitude and rationale for such rebates or discounts.

++ If multiple items are presented on the same invoice, relevant item(s) should be clearly identified.

We are soliciting public comments on this proposed process, including the information that requestors should furnish to facilitate our full analysis in preparation for the next calendar year's rulemaking cycle.

B. Malpractice Relative Value Units (RVUs)

1. Background

Section 1848(c) of the Act requires that each service paid under the PFS be comprised of three components: work, PE, and malpractice. From 1992 to 1999, malpractice RVUs were charge-based, using weighted specialty-specific malpractice expense percentages and 1991 average allowed charges. Malpractice RVUs for new codes after 1991 were extrapolated from similar existing codes or as a percentage of the corresponding work RVU. Section 4505(f) of the BBA required us to implement resource-based malpractice RVUs for services furnished beginning in 2000. Therefore, initial implementation of resource-based malpractice RVUs occurred in 2000.

The statute also requires that we review, and if necessary adjust, RVUs no less often than every 5 years. The first review and update of resource-based malpractice RVUs was addressed in the CY 2005 PFS final rule with comment period (69 FR 66263). Minor modifications to the methodology were addressed in the CY 2006 PFS final rule with comment period (70 FR 70153). In the CY 2010 PFS final rule with comment period, we implemented the second review and update of malpractice RVUs. For a discussion of the second review and update of malpractice RVUs see the CY 2010 PFS proposed rule (74 FR 33537) and final rule with comment period (74 FR 61758).

2. Malpractice RVUs for New and Revised Services Effective Before the Next 5-Year Review

Currently, malpractice RVUs for new and revised codes effective before the next 5-Year Review (for example, effective CY 2011 through CY 2014) are determined by a direct crosswalk to a similar "source" code or a modified crosswalk to account for differences in work RVUs between the new/revised code and the source code. For the modified crosswalk approach, we adjust the malpractice RVUs for the new/revised code to reflect the difference in work RVUs between the source code and the AMA RUC's recommended work value (or the work value we are applying as an interim final value under the PFS) for the new code. For example, if the interim final work RVUs for the new/revised code are 10 percent higher than the work RVUs for the source code, the malpractice RVUs for the new/revised code would be increased by 10 percent over the source code RVUs. This approach presumes the same risk factor for the new/revised code and source code but uses the work RVUs for the new/revised code to adjust for risk-of-service. The assigned malpractice RVUs for new/revised codes effective between updates remain in place until the next 5-Year Review.

We will continue our current approach for determining malpractice RVUs for new/revised codes that become effective before the next 5-Year Review and update. Under this approach we will crosswalk the new/revised code to the RVUs of a similar source code and adjust for differences in work (or, if greater, the clinical labor portion of the fully implemented PE RVUs), between the source code and the new/revised code. Additionally, we will publish a list of new/revised codes and the analytic crosswalk(s) used for determining their malpractice RVUs in the final rule with comment period, which we have not previously done. The CY 2011 malpractice RVUs for new/revised codes will be implemented as interim final values in the CY 2011 PFS final rule with comment period, where they will be subject to public comment. They will then be finalized in the CY 2012 PFS final rule with comment period.

3. Revised Malpractice RVUs for Selected Disc Arthroplasty Services

As discussed in the CY 2010 PFS proposed rule (74 FR 33539), we assign malpractice RVUs to each service based upon a weighted average of the risk factors of all specialties that furnish the service. For the CY 2010 review of malpractice RVUs, we used CY 2008 Medicare payment data on allowed services to establish the frequency of a service by specialty. CPT code 22856 (Total disc arthroplasty (artificial disc), anterior approach, including discectomy with end plate preparation (includes osteophytectomy for nerve root or spinal cord decompression and microdissection), single interspace, cervical) had zero allowed services for CY 2008. Therefore, our contractor initially set the level of services to 1, and assigned a risk factor according to the average risk factor for all services that do not explicitly have a separate technical or professional component. We proposed to adopt our contractor's initial malpractice RVUs for CPT code 22856 in the CY 2010 proposed rule. Application of the average physician risk factor would have resulted in a significant decrease in malpractice RVUs for CPT code 22856 in CY 2010.

Several commenters on the CY 2010 PFS proposed rule expressed concern regarding the proposed malpractice RVUs for CPT code 22856, which represented a proposed reduction of more than 77 percent. The commenters stated that this service is predominantly furnished by neurosurgeons and orthopedic surgeons. Given the high risk factors associated with these specialty types and the changes in malpractice RVUs for comparable services, the commenters stated that a reduction in the malpractice RVUs of this magnitude for CPT code 22856 could not be correct.

After consideration of the public comments, for CY 2010, we set the risk factor for CPT code 22856 as the weighted average risk factor of six comparable procedures mentioned by

the commenters: CPT code 22554 (Arthrodesis, anterior interbody technique, including minimal discectomy to prepare interspace (other than for decompression); cervical below C2); CPT code 22558 (Arthrodesis, anterior interbody technique, including minimal discectomy to prepare interspace (other than for decompression); lumbar); CPT code 22857 (Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression), single interspace, lumbar); CPT code 22845 (Anterior instrumentation; 2 to 3 vertebral segments (list separately in addition to code for primary procedure)); CPT code 63075 (Discectomy, anterior, with decompression of spinal cord and/or nerve root(s), including osteophytectomy; cervical, single interspace); and CPT code 20931 (Allograft for spine surgery only; structural (list separately in addition to code for primary procedure)). The weighted average risk factor for these services is 8.4.

Since publication of the CY 2010 PFS final rule with comment period, stakeholders have mentioned that we made significant changes to the malpractice RVUs for CPT code 22856 in CY 2010. The commenters also brought to our attention that other services are clinically similar to CPT code 22856 and have similar work RVUs, and therefore, some stakeholders believe these services should all have similar malpractice RVUs. Services mentioned by the stakeholders that are clinically similar to CPT code 22856 include CPT code 22857; CPT code 22861 (Revision including replacement of total disc arthroplasty (artificial disc), anterior approach, single interspace; cervical); CPT code 22862 (Revision including replacement of total disc arthroplasty (artificial disc) anterior approach, lumbar); CPT code 22864 (Removal of total disc arthroplasty (artificial disc), anterior approach, single interspace; cervical); and CPT code 22865 (Removal of total disc arthroplasty (artificial disc), anterior approach, single interspace; lumbar).

After further review of this issue, we are proposing to apply the same risk factor used for CPT code 22856 to certain other services within this family of services (CPT codes 22857 through 22865) for which there were no allowed services in CY 2008. CPT codes 22861 and 22864 had zero allowed services in CY 2008 and our contractor initially set their malpractice RVUs in the same way as it did for CPT code 22856. Therefore, we will assign the weighted average risk factor we use for CPT code 22856 (that is, the weighted average of the risk factors for CPT codes 20931, 22554, 22558, 22845, 22857, and 63075) to CPT codes 22861 and 22864. However, CPT codes 22857, 22862, and 22865 are low volume services (allowed services under 100). Our policy for low volume services is to apply the risk factor of the dominant specialty as indicated by our claims data. We will continue to apply our policy for low volume services to CPT codes 22857, 22862, and 22865.

C. Potentially Misvalued Services Under the Physician Fee Schedule

1. Valuing Services Under the PFS

As discussed in section I. of this proposed rule, in order to value services under the PFS, section 1848(c) of the Act requires the Secretary to determine relative values for physicians' services based on three components: the work, practice expense (PE), and malpractice components. Section 1848(c)(1)(A) of the Act defines the work component to include "the portion of the resources used in furnishing the service that reflects physician time and intensity in furnishing the service." Additionally, the statute provides that the work component shall include activities that occur before and after direct patient contact. Furthermore, the statute specifies that with respect to surgical procedures, the valuation of the work component for the code would reflect a "global" concept in which pre-operative and post-operative physicians' services related to the procedure would also be included.

In addition, section 1848(c)(2)(C)(i) of the Act specifies that "the Secretary shall determine a number of work relative value units (RVUs) for the service based on the relative resources incorporating physician time and intensity required in furnishing the service." As discussed in detail in sections I.A.2. and I.A.3 of this proposed rule, the statute also defines the PE and malpractice components and provides specific guidance in the calculation of the RVUs for each of these components. Section 1848(c)(1)(B) of the Act defines the PE component as "the portion of the resources used in furnishing the service that reflects the general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising practice expenses."

Section 1848(c)(2)(C)(ii) of the Act specifies that the "Secretary shall determine a number of practice expense relative value units for the services for years beginning with 1999 based on the relative practice expense resources involved in furnishing the service." Furthermore, section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the RVUs established under the PFS. Finally, on March 23, 2010, the Affordable Care Act was enacted, further requiring the Secretary to periodically review and identify potentially misvalued codes and make appropriate adjustments to the relative values of those services identified as being potentially misvalued. Section 3134(a) of the ACA added a new section 1848(c)(2)(K) of the Act which requires the Secretary to periodically identify potentially misvalued services using certain criteria, and to review and make appropriate adjustments to the relative values for those services. Section 3134(a) of the ACA also added a new section 1848(c)(2)(L) which requires the Secretary to develop a validation process to validate the RVUs of potentially misvalued codes under the PFS and make appropriate adjustments.

As discussed in section I.A.1. of this proposed rule, we establish physician work RVUs for new and revised codes based on our review of recommendations received from the AMA RUC. The AMA RUC also provides recommendations to CMS on the values for codes that have been identified as potentially misvalued. To respond to concerns expressed by MedPAC, the Congress, and other stakeholders regarding accurate valuation of services under the PFS, the AMA RUC created the Five-Year Review Identification Workgroup. In addition to providing recommendations to CMS for work RVUs, the AMA RUC's Practice Expense Subcommittee reviews direct PE (clinical labor, medical supplies, and medical equipment) for individual services and examines the many broad and methodological issues relating to the development of PE RVUs.

In accordance with section 1848(c) of the Act, we determine appropriate adjustments to the RVUs, taking into account the recommendations provided by the AMA RUC and MedPAC, and publish the explanation for the basis of these adjustments in the PFS proposed and final rules. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available, in addition to taking into account the results of consultations with organizations representing physicians.

2. Identifying, Reviewing, and Validating the RVUs of Potentially Misvalued Services Under the PFS

a. Background

In its March 2006 Report to Congress, MedPAC noted that "misvalued services can distort the price signals for physicians' services as well as for other health care services that physicians order, such as hospital services." In that same report MedPAC postulated that physicians' services under the PFS can become misvalued over time for a number of reasons: "For example, when a new service is added to the physician fee schedule, it may be assigned a relatively high value because of the time, technical skill, and psychological stress that are required to perform it. Over time, skill, and stress involved may decline as physicians become more familiar with the service and more efficient at providing it. The amount of physician work needed to furnish an existing service may decrease when new technologies are incorporated. Services can also become overvalued when practice expenses decline. This can happen when the costs of equipment and supplies fall, or when equipment is used more frequently, reducing its cost per use. Likewise, services can become undervalued when physician work increases or practice expenses rise." In the ensuing years since MedPAC's 2006 report, additional groups of potentially misvalued services have been identified by Congress, CMS, MedPAC, the AMA RUC, and other stakeholders.

In recent years CMS and the AMA RUC have taken increasingly significant steps to address potentially misvalued codes. As MedPAC noted in its March 2009 Report to Congress, in the intervening years since MedPAC made the initial recommendations, "CMS and the AMA RUC have taken several steps to improve the review process." Most recently, section 1848(c)(2)(K)(ii) of the Act (as added by section 3134 of the ACA) directed the Secretary to specifically examine potentially misvalued services in seven categories.

(1) Codes and families of codes for which there has been the fastest growth.

(2) Codes or families of codes that have experienced substantial changes in practice expenses.

(3) Codes that are recently established for new technologies or services.

(4) Multiple codes that are frequently billed in conjunction with furnishing a single service.

(5) Codes with low relative values, particularly those that are often billed multiple times for a single treatment.

(6) Codes which have not been subject to review since the implementation of the RBRVS (the so-called 'Harvard-valued codes').

(7) Other codes determined to be appropriate by the Secretary.

Section 1848(c)(2)(K)(iii) of the Act (as added by section 3134 of the ACA) also specifies that the Secretary may use existing processes to receive recommendations on the review and appropriate adjustment of potentially misvalued services. In addition, the Secretary may conduct surveys, other data collection activities, studies, or other analyses as the Secretary determines to be appropriate to facilitate the review and appropriate adjustment of potentially misvalued services. This section authorizes the use of analytic contractors to identify and analyze potentially misvalued codes, conduct surveys or collect data, and make recommendations on the review and appropriate adjustment of potentially misvalued services. Finally, section 1848(c)(2)(K)(iii)(V) of the Act (as added by section 3134 of the ACA) specifies that the Secretary may make appropriate coding revisions (including using existing processes for consideration of coding changes) which may include consolidation of individual services into bundled codes for payment under the physician fee schedule.

b. Progress in Identifying and Reviewing Potentially Misvalued Codes

Over the last several years, CMS, in conjunction with the AMA RUC, has identified and reviewed numerous potentially misvalued codes in all seven of the categories specified in section 1848(c)(2)(K)(ii) (as added by section 3134 of the ACA), and we plan to continue our work examining potentially misvalued codes in these areas over the upcoming years, consistent with the new legislative mandate on this issue. In the current process, the AMA RUC reviews potentially misvalued codes that are identified either by CMS or through its own processes and recommends revised work RVUs and/or direct PE inputs for those codes to CMS. CMS then assesses the recommended revised work RVUs and/or direct PE inputs and, in accordance with section 1848(c) of the Act, we determine if the recommendations constitute appropriate adjustments to the RVUs under the PFS. Since CY 2009, CMS and the AMA RUC have identified over 700 potentially misvalued codes.

For example, in regards to the first category (codes and families of codes for which there has been the fastest growth), for CY 2009 CMS identified over 100 potentially misvalued codes for which an analysis of the utilization data showed an annual growth in allowed services of 10 percent (or more) for 3 consecutive years (73 FR 38586). Each of these codes had allowed charges of $1 million or more in CY 2007. We published this list in the CY 2009 proposed rule (73 FR 38586 through 38589) and requested that the AMA RUC immediately begin a review of the codes on this list. Meanwhile, in parallel with CMS' efforts, the AMA RUC also initiated processes to identify and review potentially misvalued codes on an ongoing basis using certain screens, including screens for "CMS fastest growing procedures" and "high volume growth." Both of these AMA RUC screens are applicable to the first category of potentially misvalued codes specified in ACA. We plan to continue to analyze Medicare claims data over future years to identify additional services that exhibit rapid growth and high Medicare expenditures for referral to the AMA RUC for review as potentially misvalued codes.

Pertaining to the second category specified in section 1848(c)(2)(K)(ii) of the Act (as added by section 3134 of ACA) (codes or families of codes that have experienced substantial changes in practice expenses), in CY 2009 we requested that the AMA RUC continue its review of direct PE inputs, focusing particularly on high-volume codes where the PE payments are increasing significantly under the transition to the new PE methodology (73 FR 38589). The AMA RUC has responded by sending CMS recommendations for revised direct PE inputs for codes identified for PE review on an ongoing basis.

Additionally in CY 2009, we began an initiative to review and update the prices for high-cost supplies in order to ensure the accuracy and completeness of the direct PE inputs. We discuss our most recent efforts in refining the process to update the prices of high-cost supplies in section II.C.5. of this proposed rule.

For the third category of potentially misvalued codes identified in section 1848(c)(2)(K)(ii) (as added by section 3134 of the ACA) (codes that are recently established for new technologies or services), the AMA RUC routinely identifies such codes through a screen based on 3 years of Medicare claims data, and sends CMS recommendations for revised work RVUs and/or direct PE inputs for these codes on an ongoing basis. The AMA RUC may determine that a code for a new service requires reevaluation or does not require reevaluation, or it may conclude, on a case-by-case basis, that more than 3 years of claims data are

necessary before the code can be reviewed. In that case, it would determine the appropriate future timeframe for review.

We also note that in its June 2008 Report to Congress entitled "Reforming the Health Care System" and in the context of a discussion about primary care, MedPAC acknowledges, "* * * Efficiency can improve more easily for other types of services, such as procedures, with advances in technology, technique, and other factors. Ideally, when such efficiency gains are achieved, the fee schedule's relative value units (RVUs) for the affected services should decline accordingly, while budget neutrality would raise the RVUs for the fee schedule's primary care services." (page 27). Section III.C.5. of this proposed rule includes a discussion regarding periodic updates to the costs of high cost supplies. This discussion is highly relevant to new technology services, where growth in volume of a service as it diffuses into clinical practice may lead to a decrease in the cost of expensive supplies. We also expect that other efficiencies in physician work and PE may be achieved after an initial period of relative inefficiency that reflects the "learning curve." We plan to pay particular attention to the work values and direct PE inputs for these new services and the AMA RUC's periodic review process to ensure that any efficiencies are captured under the PFS over time, recognizing that the appropriate timing for revaluing these services needs to be considered on a case-by-case basis depending on the growth rate in service volume.

We have also addressed the fourth category (multiple codes that are frequently billed in conjunction with furnishing a single service) in rulemaking prior to the enactment of the ACA. As discussed in the CY 2009 PFS proposed rule (73 FR 38586), we have a longstanding policy of reducing payment for multiple surgical procedures performed on the same patient, by the same physician, on the same day. Over the ensuing years, the multiple procedure payment reduction (MPPR) policy has been extended to a number of nuclear diagnostic and diagnostic imaging procedures. We continue our work to recognize efficiencies in this area with a proposal to expand the MPPR policy to additional combinations of imaging services and to therapy services for CY 2011 as described in section II.C.4. of this proposed rule.

We note the AMA RUC has also established a screen to identify services performed by the same physician on the same date of service 95 percent of the time or more. Over the past 2 years, the CPT Editorial Panel has established new bundled codes to describe a comprehensive service for certain combinations of these existing services that are commonly furnished together, and the AMA RUC has recommended work values and direct PE inputs to CMS for these comprehensive service codes that recognize the associated efficiencies. CMS looks forward to working with the AMA RUC in this joint effort to examine codes commonly reported together and more appropriately value common combinations services.

We address the fifth category of potentially misvalued codes (codes with low relative values, particularly those that are often billed multiple times for a single treatment) in section II.C.3.b. of this proposed rule. That is, we are providing a list of services with low work RVUs that are commonly reported with multiple units in a single encounter and requesting that the AMA RUC review these codes that we have identified as potentially misvalued.

The sixth category (codes which have not been subject to review since the implementation of the RBRVS (the so-called 'Harvard-valued codes')) also continues to be addressed by CMS and the AMA RUC on an ongoing basis. As we noted in the CY 2009 PFS proposed rule (73 FR 38589), there were at that time approximately 2900 codes, representing $5 billion in annual spending, that were originally valued using Harvard data and have not subsequently been evaluated by the AMA RUC. Consequently, in CY 2009, we requested that the AMA RUC engage in an ongoing effort to review the remaining Harvard-valued codes, focusing first on the high-volume, low intensity codes (73 FR 38589). In response to our request, the AMA RUC initially conducted an analysis of Harvard-valued services with utilization above 10,000 services per year, which resulted in a list of 296 distinct services (73 FR 69883). The AMA RUC, in its public comment on the CY 2009 proposed rule, stated that it believes it would be effective to limit any review to these 296 services and also noted that of the 296 services identified, 23 had already been identified by another screen and were in the process of being reviewed (73 FR 69883). To date, the AMA RUC has reviewed and submitted to CMS recommendations for revised work RVUs and/or direct PE inputs for a number of Harvard-valued codes, prioritizing those codes with utilization of over 1 million services. The AMA RUC and CMS intend to continue our ongoing assessment of Harvard-valued codes, next targeting codes with utilization of over 100,000 services.

Finally, the seventh category of potentially misvalued codes mentioned in section 1848(c)(2)(K)(ii) (as added by section 3134 of the ACA) is all other codes determined to be appropriate by the Secretary. In this category, CMS has previously proposed policies and requested that the AMA RUC review codes for which there have been shifts in the site-of-service (site-of-service anomalies), as well as codes that qualify as "23-hour stay" outpatient services. The policies for valuation of both the site-of-service anomaly codes and the "23-hour stay" codes are developed further in sections II.C.3.d. and e., respectively, of this proposed rule. For CY 2011, we are also identifying codes with low work RVUs but are high volume based on claims data as another category of potentially misvalued codes and are referring these codes to the AMA RUC for review, as discussed in section II.C.3.b. of this proposed rule. In addition, for CY 2011 we are newly targeting key codes that the AMA RUC uses as reference services for valuing other services, termed "multispecialty points of comparison" services, and referring these to the AMA RUC for review as potentially misvalued codes as described in section II.C.3.a. of this proposed rule. Finally, we note the AMA RUC has also established screens to identify potentially misvalued codes in additional categories, including codes with a high intra-service work per unit of time (IWPUT) and codes representing services that had been surveyed by one specialty, but are now performed by a different specialty. We will continue to review AMA RUC recommendations for revised work RVUs and/or direct PE inputs for codes that fall into these categories.

As a result of the combined efforts of CMS and the AMA RUC to address potentially misvalued codes, for CY 2009 the AMA RUC recommended revised work values and/or PE inputs for 204 misvalued services (73 FR 69883). For CY 2010, an additional 113 codes were identified as misvalued and the AMA RUC provided new recommendations for revised work RVUs and/or PE inputs to CMS as discussed in the CY 2010 PFS final rule with comment period (74 FR 61778). Upon review of the AMA RUC-recommended work RVUs, CMS accepted the majority of the values as appropriate adjustments to the RVUs under the PFS, in accordance with section 1848(c) of the Act. However, for a number of codes, mainly the site-of-service anomaly codes, we indicated

that although we would accept the AMA RUC valuations for these site-of-service anomaly codes on an interim basis through CY 2010, we had ongoing concerns about the methodology used by the AMA RUC to review these services (73 FR 69883 and 74 FR 61776 through 61778, respectively). In the CY 2010 PFS final rule with comment period, we requested that the AMA RUC reexamine the site-of-service anomaly codes and use the building block methodology to revalue the services (74 FR 61777). In that same rule, we also stated that we would continue to examine these codes and consider whether it would be appropriate to propose additional changes in future rulemaking. We discuss our CY 2011 proposal with respect to these codes in section II.C.3.d. of this proposed rule.

c. Validating RVUs of Potentially Misvalued Codes

In addition to identifying and reviewing potentially misvalued codes, section 1848(c)(2)(L) (as added by section 3134 of the ACA) specifies that the Secretary shall establish a formal process to validate relative value units under the PFS. The validation process may include validation of work elements (such as time, mental effort and professional judgment, technical skill and physical effort, and stress due to risk) involved with furnishing a service and may include validation of the pre, post, and intra-service components of work. The Secretary is directed to validate a sampling of the work RVUs of codes identified through any of the seven categories of potentially misvalued codes specified by section 1848(c)(2)(K)(ii) (as added by section 3134 of the ACA). Furthermore, the Secretary may conduct the validation using methods similar to those used to review potentially misvalued codes, including conducting surveys, other data collection activities, studies, or other analyses as the Secretary determines to be appropriate to facilitate the validation of RVUs of services. Currently, while CMS does assess the AMA RUC- recommended work RVUs to determine if the recommendations constitute appropriate adjustments to the RVUs under the PFS, we intend to establish a more extensive validation process of RVUs in the future in accordance with the requirements of section 1848(c)(2)(L) (as added by section 3134 of the ACA). Therefore, we are soliciting public comments on this proposed rule on possible approaches and methodologies that we should consider for a validation process. We are especially interested in public comments regarding approaches, including the use of time and motion studies, to validate estimates of physician time and intensity that are factored into the work RVUs for services with rapid growth in Medicare expenditures, one of the categories that the statute specifically directs CMS to examine. We plan to discuss the validation process in a future PFS rule once we have considered the matter further in conjunction with any public comments and other input from stakeholders that we receive.

3. CY 2011 Identification and Review of Potentially Misvalued Services

In this section, we discuss codes that may be misvalued according to five different criteria:

- Codes on the multi-specialty points of comparison list;
- Codes with low work RVUs commonly billed in multiple units per single encounter;
- Codes with high volume and low work RVUs;
- Codes with site-of-service anomalies; and
- Codes that qualify as "23-hour stay" outpatient services.

a. Codes on the Multispecialty Points of Comparison List

The AMA RUC uses a scale referred to as the multispecialty points of comparison (MPC) to evaluate the reasonableness of a specialty society's recommended RVU value for a service. The MPC list contains reference codes of established comparison services that are used in the valuation of new codes. The current MPC list consists of 316 codes which the AMA RUC may use to compare and contrast the relativity of codes under review to existing relative values. Since the AMA RUC may use the values on the MPC list as a basis for relativity when determining the values for new, revised, and newly reviewed codes (including potentially misvalued codes), it is essential that the services on the MPC list be appropriately valued since any codes misvalued on the MPC list could contribute to the misvaluing of other codes under review. While we believe that the entire MPC list should be assessed to ensure that services are paid appropriately under the PFS, we have prioritized the review of the MPC list, ranking the codes by allowed service units and charges based on CY 2009 claims data. We are proposing to refer the codes in Table 9 to the AMA RUC for review.

TABLE 9—CODES ON THE MPC LIST REFERRED FOR AMA RUC REVIEW

CPT Code	Short descriptor
66984	Cataract surg w/iol, 1 stage.
97110	Therapeutic exercises.
43239	Upper GI endoscopy, biopsy.
20610	Drain/inject, joint/bursa.
78815	Pet image w/ct, skull-thigh.
45385	Lesion removal colonoscopy.
45380	Colonoscopy and biopsy.
11721	Debride nail, 6 or more.
17000	Destruct premalg lesion.
92980	Insert intracoronary stent.
74160	Ct abdomen w/dye.
71020	Chest x-ray.
11100	Biopsy, skin lesion.
66821	After cataract laser surgery.
52000	Cystoscopy.
92083	Visual field examination(s).
73721	Mri jnt of lwr extre w/o dye.
93010	Electrocardiogram report.
77334	Radiation treatment aid(s).
92250	Eye exam with photos.
95810	Polysomnography, 4 or more.
77003	Fluoroguide for spine inject.
11056	Trim skin lesions, 2 to 4.
76700	Us exam, abdom, complete.
77290	Set radiation therapy field.
77300	Radiation therapy dose plan.
43235	Uppr gi endoscopy, diagnosis.
71275	Ct angiography, chest.
95900	Motor nerve conduction test.
31231	Nasal endoscopy, dx.
95165	Antigen therapy services.
94060	Evaluation of wheezing.
31575	Diagnostic laryngoscopy.

b. Codes With Low Work RVUs Commonly Billed in Multiple Units per Single Encounter

Consistent with section 1848(c)(2)(K)(ii) (as added by section 3134 of the ACA) which identifies categories of potentially misvalued codes for our review, we believe services with low work RVUs that are commonly billed with multiple units in a single encounter are an additional appropriate category for identifying potentially misvalued codes. An example of a high multiple/low work RVU service is CPT code 95004 (Percutaneous tests (scratch, puncture, prick) with allergenic extracts, immediate type reaction, including test interpretation and report by a physician, specify number of tests). For purposes of compiling a list of the high multiple/low work RVU services, we defined a high multiple service as one that is commonly performed in multiples of 5 or more per day. Then, we selected from high multiple services with work RVUs of less than or equal to 0.5 RVUs. We note that in selecting 5 per day as the minimum threshold for the number of common services performed in a multiple service encounter, we intended to establish a meaningful threshold which, in conjunction with the

threshold for work RVUs of 0.5 RVUs or less, would produce a reasonable number of services for the RUC to review that have substantial total work RVUs for the comprehensive service furnished during a single treatment. That is, as a general example, with a work RVU threshold of 0.5 RVUs and a multiple threshold of 5 per day, the total work RVUs for a typical treatment would equate to 2.5 RVUs, which is approximately comparable to a high level office visit, an interpretation of a complex imaging procedure, or a minor surgical procedure.

We are asking the AMA RUC to review the codes in Table 10.

TABLE 10—CODES WITH LOW WORK RVUS THAT ARE COMMONLY BILLED IN MULTIPLE UNITS REFERRED FOR AMA RUC REVIEW

CPT Code	Short descriptor
95904	Sense nerve conduction test.
17003	Destruct premalg les, 2–14.
95004	Percut allergy skin tests.
11101	Biopsy, skin add-on.
95024	Id allergy test, drug/bug.
76000	Fluoroscope examination.
95144	Antigen therapy services.
95010	Percut allergy titrate test.
88300	Surgical path, gross.
95027	Id allergy titrate-airborne.
95015	Id allergy titrate-drug/bug.
95148	Antigen therapy services.

c. Codes With High Volume and Low Work RVUs

We believe that codes that have low work RVUs but are high volume based on claims data are another category of potentially misvalued codes. Although these codes have low work RVUs (less than or equal to 0.25 RVUs), the high utilization of these codes represents significant expenditures under the PFS such that their appropriate valuation is especially important. Table 11 contains a list of such codes and we are requesting that the AMA RUC review these codes.

TABLE 11—CODES WITH LOW WORK RVUS THAT ARE HIGH VOLUME REFERRED FOR AMA RUC REVIEW

CPT Code	Short descriptor
71010	Chest x-ray.
73510	X-ray exam of hip.
97035	Ultrasound therapy.
88313	Special stains group 2.
73630	X-ray exam of foot.
72100	X-ray exam of lower spine.
73030	X-ray exam of shoulder.
73562	X-ray exam of knee, 3.
73560	X-ray exam of knee, 1 or 2.
94010	Breathing capacity test.
77052	Comp screen mammogram add-on.
88304	Tissue exam by pathologist.
73564	X-ray exam, knee, 4 or more.
72170	X-ray exam of pelvis.
74000	X-ray exam of abdomen.
73610	X-ray exam of ankle.
11719	Trim nail(s).
73620	X-ray exam of foot.
92567	Tympanometry.
73110	X-ray exam of wrist.
73130	X-ray exam of hand.
93701	Bioimpedance, cv analysis.
72040	X-ray exam of neck, spine.
92543	Caloric vestibular test

d. Codes With Site-of-Service Anomalies

In previous years, we requested that the AMA RUC review codes that, according to the Medicare claims database, have experienced a change in the typical site of service since the original valuation of the code. For example, we have found services that originally were provided in the inpatient setting but for which current claims data show the typical case has shifted to being furnished outside the inpatient setting. Since the procedures were typically performed in the inpatient setting when the codes were originally valued, the work RVUs for these codes would have been valued to include the inpatient physician work provided, as well as to reflect the intensive care and follow-up normally associated with an inpatient procedure. If the typical case for the procedure has shifted from the inpatient setting to an outpatient or physician's office setting, it is reasonable to expect that there have been changes in medical practice, and that such changes would represent a decrease in physician time or intensity or both. The AMA RUC reviewed and recommended to CMS revised work RVUs for 29 codes for CY 2009 and 11 codes for CY 2010 that were identified as having site-of-service anomalies.

In the CY 2010 PFS proposed and final rules with comment period (74 FR 33556 and 74 FR 61777, respectively), we encouraged the AMA RUC to utilize the building block methodology when revaluing services with site-of-service anomalies. Specifically, where the AMA RUC has determined in its review that changes in the inclusion of inpatient hospital days, office visits, and hospital discharge day management services (that is, the "building blocks" of the code) are warranted in the revaluation of the code, we asked the AMA RUC to adjust the site-of-service anomaly code for the work RVUs associated with those changes.

Additionally, we suggested that in cases where the AMA RUC has adjusted the pre-service, intra-service and post-service times of the code under review, the AMA RUC should also make associated work RVU adjustments to account for those changes. However, we remain concerned that in the AMA RUC's recommendations of the work RVUs for the CYs 2009 and 2010 site-of-service anomaly codes, the AMA RUC may have determined that eliminating or reallocating pre-service and post-service times, hospital days, office visits, and hospital discharge day management services was appropriate to reflect the typical case that is now occurring in a different setting, but the work RVUs associated with those changes may not have been systematically extracted or reallocated from the total work RVU value for the service.

In the CYs 2009 and 2010 PFS final rules with comment period (73 FR 69883 and 74 FR 61776 through 61778, respectively), we indicated that although we would accept the AMA RUC valuations for these site-of-service anomaly codes on an interim basis through CY 2010, we had ongoing concerns about the methodology used by the AMA RUC to review these services. We requested that the RUC reexamine the site-of-service anomaly codes and use the building block methodology to revalue the services (74 FR 61777). We also stated that we would continue to examine these codes and consider whether it would be appropriate to propose additional changes in future rulemaking.

Accordingly, in preparation for CY 2011 rulemaking, we conducted a comprehensive analysis of the codes that the AMA RUC reviewed for CYs 2009 and 2010 due to site-of-service anomaly concerns. We systematically applied the reverse building block methodology to the 29 codes from CY 2009 and 11 codes from CY 2010 as follows:

- First, we obtained the original work RVU value assigned to the code (this is the "starting value") and made a list of the building block services with RVUs that were originally associated with the code (that is, before the AMA RUC reviewed the code for site-of-service anomalies).
- Next, we examined the AMA RUC-recommended changes to the building blocks of the code.

• We then deducted the RVUs associated with the AMA RUC's recommended eliminations from the code's starting RVU value.

Generally, the AMA RUC eliminated inpatient hospital visit building blocks from the value of the code since the site-of-service for the code has shifted from the inpatient setting to another setting. We note in some cases, the AMA RUC left an inpatient hospital visit in the valuation of the code. We believe this is inconsistent with the change in the site of service to non-inpatient settings. Accordingly, we adhered to the methodology and deducted the RVUs associated with all inpatient hospital visits from the starting value. In cases where the AMA RUC recommended adding or substituting outpatient visits, we also added or substituted the RVUs associated with those changes to the starting value. If the AMA RUC recommended changes to the pre-, intra-, or post-service times, we calculated the incremental change in RVUs associated with that time and either added or deducted that RVU amount from the starting value. We note that the RVU values associated with the incremental time change are calculated using the intensity associated with the particular pre-, intra-, or post period. For the intensity of the intra-service period, we utilized the original IWPUT associated with the code. The AMA RUC generally recommended allowing only half of a hospital discharge day management service for the site-of-service anomaly codes. That is, CPT code 99238 (Hospital discharge day management; 30 minutes or less) has a work RVU value of 1.28; therefore, half the value associated with CPT code 99238 is 0.64. Accordingly, if a code had one CPT code 99238 listed as part of the original valuation, we deducted 0.64 RVUs from the starting value.

We standardized the methodology so that each of the site-of-service anomaly codes has half of a hospital discharge day management service value accounted in the valuation. Finally, we note that while we eliminated the RVUs associated with all inpatient hospital visits built into the code's starting value, because the typical case no longer occurs in the inpatient setting, we allowed for the possibility that in some cases, some part of the work which had been performed in the inpatient setting may continue to be provided even in the outpatient setting. Therefore, to be conservative in our deductions of work RVUs associated with the inpatient hospital codes from the starting values, we allowed the intra-time of any inpatient hospital visits included in the original valuation to migrate to the post-service period of the code. Accordingly, while we deducted the full RVUs of an inpatient hospital visit from the starting value, we added the intra-service time of the inpatient hospital visit to the post-service time of the code and accounted for the incremental change in RVUs. The following description provides an example of our methodology.

CPT code 21025 (Excision of bone (*e.g.,* for osteomyelitis or bone abscess); mandible) has a starting value of 11.07 RVUs. Table 12 shows the building blocks that are included in the original valuation of the code.

TABLE 12

Pre-service time	Median intra-service time	Immediate post-service time	99231	99232	99238	99211	99212	99213	Original IWPUT
75 min	120 min	43 min	1 visit (0.76 RVUs).	1 visit (1.39 RVUs).	1 visit (1.28 RVUs).	2 visits (0.36 RVUs).	2 visits (0.96 RVUs).	2 visits (1.94 RVUs).	0.0145

The AMA RUC removed two inpatient hospital visits and reduced the outpatient visits from 6 to 4 visits. Table 13 shows the building blocks that were recommended for CY 2009 by the AMA RUC after its review of the code for site-of-service anomalies.

TABLE 13

Pre-service time	Median intra-service time	Immediate post-service time	99231	99232	99238	99211	99212	99213	Revised IWPUT
85 min	90 min	30 min	.....	.....	.....	.....	2 visits	2 visits	0.0530

Next we calculated the RVUs associated with the changes to the building blocks recommended by the AMA RUC. We note that the immediate post-service value of 0.38 RVUs (Table 14) includes 30 minutes of intra-service time from inpatient hospital CPT code 99231 (Level 1 subsequent hospital care, per day). Also, the median intra-service value of 0.44 RVUs (Table 14) was determined using the starting IWPUT value of 0.0145. Additionally, our methodology accounted for a half of a hospital discharge day management service (CPT code 99238) for the site-of-service anomaly code. Table 14 shows the RVU changes to the building blocks that were calculated based on the methodology discussed above.

TABLE 14

Pre-service time	Median intra-service time	Immediate post-service time	99231	99232	99238	99211	99212	99213
0.22 RVUs	−0.44 RVUs	0.38 RVUs ...	−0.76 RVUs	−1.39 RVUs	−0.64 RVUs	−0.36 RVUs.		

In the final step, the RVUs associated with the changes to the building blocks recommended by the AMA RUC (Table 14) were deducted from or added to the starting value of 11.07 RVUs, which resulted in the CY 2011 reverse building

block value of 8.08 RVUs (11.07+0.22 − 0.44+0.38 − 0.76 − 1.39 − 0.64 − 0.36=8.08).

The methodology discussed above was applied to each of the site-of-service anomaly codes from CYs 2009 and 2010 and the results are summarized in Tables 15 and 16.

TABLE 15—CY 2009 SITE-OF-SERVICE ANOMALY CODES [1]

CPT code	Short descriptor	CY 2008 RVUs ("starting value")	RUC Recommended value for CY 2009	CY 2011 Reverse building block value
21025	Excision of bone, lower jaw	11.07	9.87	8.09
23415	Release of shoulder ligament	10.09	9.07	10.63
25116	Remove wrist/forearm lesion	7.38	7.38	7.21
42440	Excise submaxillary gland	7.05	7.05	6.52

[2] We note that in this table, we have not adjusted the RVUs for these codes for the RVU changes to the evaluation and management codes that resulted from the CY 2010 elimination of the consultation codes (74 FR 61775). However, we note that we may, if appropriate, adjust the RVUs for services with global periods to account for relevant changes in the RVUs for evaluation and management services as necessary.

For most codes in Tables 15 and 16, the CY 2011 reverse building block methodology produced a value that is somewhat lower than the AMA RUC-recommended value. While our results suggest that the majority of the codes with site-of-service anomalies continue to be overvalued under the AMA RUC's most recent recommendations, we also found that the methodology may produce a result that is considerably reduced or, in several cases, a negative value. We understand that in previous years, stakeholders have expressed confusion as to why the application of a building block methodology would produce negative values. We believe in some cases, the starting value, that is,

the original work RVU, may have been misvalued using building block inputs that were not consistent with the service, although the overall work value of the code may have been consistent with the values for other similar services. Moreover, a number of these services are the Harvard-valued codes, for which the RVUs were established many years ago based on historical inputs that may no longer be appropriate for the code. An attempt to extract the RVUs associated with these inappropriate inputs through the reverse building block methodology could produce aberrant results. Furthermore, in some cases, we noticed that the original IWPUT of the code was negative even before the code was reviewed by the AMA RUC for a site-of-service anomaly. A negative value for the IWPUT is counterintuitive to the IWPUT concept, indicating that the code was originally misvalued at the building block level. At a minimum, we believe that in cases where the reverse building block methodology produces aberrant results, and where clinical review indicates a need for further analysis, the codes should be referred back to the AMA RUC for review and new valuation should be performed based on the building block methodology.

We note the application of the reverse building block methodology is an objective way to account for changes in the resources resulting from the change in the site-of-service in which the typical service is provided. However, because relative values under the PFS are "relative," that is, where work relative value units for a code are established relative to work relative value units for other codes, the recommended methodology of valuing services based on input building blocks is best applied within the context of the AMA RUC discussion. For example, we recognize that the AMA RUC looks at families of codes and may assign RVUs based on a particular code ranking within the family. This method of valuing services preserves relativity within the relative value scale for that code family. However, we have stated that we believe the relative value scale requires each service to be valued based on the resources used in furnishing the service as specified in section 1848(c)(1)(A) of the Act, which defines the physician work component to include "the portion of the resources used in furnishing the service that reflects physician time and intensity in furnishing the service." Furthermore, section 1848(c)(2)(C)(i) of the Act specifies that "the Secretary shall determine a number of work relative value units (RVUs) for the service based on the relative resources incorporating physician time and intensity required in furnishing the service." Read together, these two sections of the statute support our intention to rely on the building block methodology to determine appropriate work RVUs for codes.

We note that we continue to rely on the extensive expertise provided by the AMA RUC to recommend appropriate input building blocks for codes. Additionally, the AMA RUC's unique infrastructure and broad perspective permits the valuation of a code within the context of relativity to the entire relative value system. Therefore, we believe that the recommended methodology of valuing services based on input building blocks is best applied within the context of the AMA RUC discussion.

Accordingly, we are requesting that the AMA RUC review the CPT codes displayed in Tables 15 and 16. In addition, where the application of the CY 2011 reverse building block methodology produces an aberrant result that is clearly not a reflection of physician work for the service, we are requesting that the AMA RUC review the input building blocks and recommend an appropriate RVU value that is both consistent with the building blocks of the code and appropriate relative to the values for other codes in the family. For other codes where the application of the CY 2011 reverse building block methodology produces a result that is consistent with the physician work for the service, we encourage the AMA RUC to confirm the values and recommend these work values for CY 2011. In this way, we would hope to receive new AMA RUC recommendations for all of the codes in Tables 15 and 16 for CY 2011. Furthermore, if the recommendations that we receive from the AMA RUC are not consistent with the building block methodology and not appropriate relative to the values of other services, and the application of the CY 2011 reverse building block methodology produces a result that CMS medical advisors believe is consistent with the work for the service, we are proposing to adopt the CY 2011 reverse building block methodology values that are listed in Tables 15 and 16 for CY 2011. In cases where the reverse building block methodology produces a negative work value, we are suggesting that the AMA RUC review and revise the building blocks of the code so that a new valuation can be determined based on the building block methodology. For such codes, if the revised recommendations that we would hope to receive from the AMA RUC are still not consistent with the building block methodology upon revision, because we cannot pay for these services based on negative work RVUs, we are proposing to modify the AMA RUC-recommended values for these codes as CMS determines clinically appropriate and adopt the CMS-modified RVUs on a interim final basis for CY 2011.

In their future work, we urge the AMA RUC to use the building block methodology when valuing services or provide CMS with extensive rationale for cases where the AMA RUC believes the building block methodology is inappropriate for a specific code. Since section 1848(c)(2)(L) (as added by section 3134 of the ACA) specifies that the Secretary shall establish a process to validate work RVUs of potentially misvalued codes under the PFS, as we have discussed earlier in this section, we believe codes that are valued using the building block methodology would be more likely to meet the standards of a systematic RVU validation process that could be developed in accordance with the requirements of the statute.

e. Codes With "23-hour" Stays

In the CY 2010 PFS proposed rule (74 FR 33557), we requested that the AMA RUC review services that are typically performed in the outpatient setting and require a hospital stay of less than 24 hours. We stated in the proposed rule that we believed these to be primarily outpatient services and expressed concern that the value of evaluation and management (E/M) visits for inpatients was inappropriately included in the valuation of codes that qualify as "23-hour stay" outpatient services.

We received a number of comments in response to the discussion in the CY 2010 proposed rule. The AMA RUC stated that it already values stays of less than 23 hours appropriately by reducing the hospital discharge day management service (that is, CPT code 99238), from 1 day to a half day. The AMA RUC also explained that when the AMA RUC refers to 23-hour stay services in discussions at AMA RUC meetings, it is referring primarily to services that are reported in the Medicare claims database as typically outpatient services, but where the patient is kept overnight and, on occasion, even longer in the hospital. Because the AMA RUC believes the patient stays overnight in the hospital, it believes the inclusion of inpatient E/M visits to be appropriate in the valuation of this category of codes.

We believe that the 23-hour stay issue encompasses several scenarios. The typical patient is commonly in the

hospital for less than 24 hours, which often means the patient may indeed stay overnight in the hospital. On occasion, the patient may stay longer than a single night in the hospital; however, in both cases, the patient is considered for Medicare purposes to be a hospital outpatient, not an inpatient, and our claims data support that the typical 23-hour stay service is billed as an outpatient service. Accordingly, we believe that the valuation of the codes that fall into the 23-hour stay category should not reflect work that is typically associated with an inpatient service. For example, inpatient E/M visit codes such as CPT codes 99231 (Level 1 subsequent hospital care, per day); 99232 (Level 2 subsequent hospital care, per day); and 99233 (Level 3 subsequent hospital care, per day), should not be included at the full value in the valuation of 23-hour stay services.

Currently, the valuation of 23-hour stay services is conducted in a nonuniform manner by the AMA RUC. The AMA RUC has indicated that it currently includes a half hospital discharge day management service and no hospital inpatient visits for outpatient services with expected hospital stays of 23 hours or less. In contrast, for those outpatient services where the AMA RUC believes that the recovery period could be longer than 23 hours, the AMA RUC stated in its comment on the CY 2010 PFS proposed rule that it currently includes a full hospital discharge day management service and one or more inpatient E/M visits in the code's value. However, we note the typical 23-hour stay service is billed as an outpatient service and so long as the typical case continues to be billed as an outpatient service, we believe the code should not incorporate physician work values for services that are typically associated with an inpatient service. In the 2010 PFS proposed and final rule with comment period (74 FR 33556 and 74 FR 61777, respectively), we stated that we believed the use of inpatient E/M visit codes for services rendered in the post-service period for outpatient 23-hour stay procedures would result in overpayment for pre- and post-service work that would not be provided. Accordingly, we proposed in the CY 2010 proposed rule (74 FR 33556 through 33557) not to allow any additional inpatient E/M service to be billed for care furnished during the post-procedure period when care is furnished for an outpatient service requiring less than a 24-hour hospital stay.

However, we find it is plausible that while the patient receiving the 23-hour stay service remains a hospital outpatient, the patient would typically be cared for by the physician furnishing the procedure during that post-procedure period. While we do not believe that post-procedure hospital "visits" would be at the inpatient level since the typical case is an outpatient who would be ready to be discharged from the hospital in 23 hours or less, we agree that the intra-service time of the inpatient hospital visit may be included in the valuation for the 23-hour stay code.

Accordingly, we are modifying our proposed CY 2010 approach and suggesting that in the future, when the AMA RUC reviews new and potentially misvalued codes that are identified as 23-hour stay services, the AMA RUC would apply the following methodology:

(1) Begin with the starting RVU value of the 23-hour stay code under review and decrease the hospital discharge day management service from one day to a half day.

(2) Deduct the RVUs of inpatient hospital visits from the starting RVU value.

(3) Reallocate the time associated with the intra-service portion of the inpatient hospital visits to the immediate post-service time of the 23-hour stay code under review.

Example: A 23-hour stay code is currently valued at 15 RVUs and has 1 hospital discharge day management service and 1 level 3 subsequent hospital care visit incorporated in this value.

- Applying step (1): $15 - 0.64^{*} = 14.36$
- Applying step (2): $14.36 - 2^{**} = 12.36$
- Applying step (3): $12.36 + (30 \text{ minutes} \times 0.0224)^{***} = 13.032$ RVUs

*Value associated with ½ hospital discharge day management service.

**Value associated with an inpatient hospital visit, CPT code 99233.

***Value associated with the reallocated intra-service time multiplied by the post-service intensity of the 23-hour stay code.

Finally, we note that since work relative value units are established by the Secretary in the context of relativity to other codes in the system, the recommended methodology for the evaluation of 23-hour stay codes is best applied within the context of relativity. We appreciate that the AMA RUC has the ability to assess the 23-hour stay code after application of the recommended methodology to ensure appropriate relativity of this code and other codes within the system. We strongly encourage the AMA RUC to apply the recommended methodology to ensure the consistent and appropriate valuation of the physician work for these services.

4. Expanding the Multiple Procedure Payment Reduction (MPPR) Policy to Additional Nonsurgical Services

a. Background

Medicare has a longstanding policy to reduce payment by 50 percent for the second and subsequent surgical procedures furnished to the same patient by the same physician on the same day, largely based on the presence of efficiencies in the PE and pre- and post-surgical physician work. Effective January 1, 1995, the multiple procedure payment reduction (MPPR) policy, with the same percentage reduction, was extended to nuclear medicine diagnostic procedures (CPT codes 78306, 78320, 78802, 78803, 78806, and 78807). In the CY 1995 PFS final rule with comment period (59 FR 63410), we indicated that we would consider applying the policy to other diagnostic tests in the future.

Consistent with recommendations of MedPAC in its March 2005 Report to Congress on Medicare Payment Policy, under the CY 2006 PFS, the MPPR policy was extended to the technical component (TC) of certain diagnostic imaging procedures performed on contiguous areas of the body in a single session (70 FR 70261). The reduction recognizes that, for the second and subsequent imaging procedures, there are some efficiencies in clinical labor, supplies, and equipment time. In particular, certain clinical labor activities and supplies are not duplicated for subsequent procedures and, because equipment time and indirect costs are allocated based on clinical labor time, those would also be reduced accordingly.

The imaging MPPR policy currently applies to computed tomography (CT) and computed tomographic angiography (CTA), magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA), and ultrasound services within 11 families of codes based on imaging modality and body region. When we adopted the policy in CY 2007, we stated that we believed efficiencies were most likely to occur when contiguous body areas are the focus of the imaging because the patient and equipment have already been prepared for the second and subsequent procedures, potentially yielding resource savings in areas such as clerical time, technical preparation, and supplies (70 FR 45850). Therefore, the MPPR policy currently applies only to procedures involving contiguous body

areas within a family of codes, not across families, and to those procedures that are provided in a single session. Additionally, while the MPPR policy applies to TC-only services and to the TC of global services, it does not apply to professional component (PC) services.

Under the current imaging MPPR policy, full payment is made for the TC of the highest-paid procedure, and payment is reduced by 25 percent of the TC for each additional procedure when an MPPR scenario applies. We had originally planned to phase in the MPPR policy over a 2-year period, with a 25 percent reduction in CY 2006 and a 50 percent reduction in CY 2007 (70 FR 70263). However, the Deficit Reduction Act of 2005 (Pub. L. 109–171) (DRA) capped the PFS payment amount for most imaging procedures at the amount paid under the hospital Outpatient Prospective Payment System (OPPS). In view of the DRA, we determined that it would be prudent to retain the MPPR at 25 percent while we continued to examine the appropriate payment levels (71 FR 69659). The DRA also exempted reduced expenditures attributable to the MPPR policy from the PFS budget neutrality provision. Most recently, effective July 1, 2010, section 3135(b) of the ACA increased the MPPR on the TC of imaging services under the policy established in the CY 2006 PFS final rule with comment period from 25 to 50 percent and exempted the reduced expenditures attributable to this further change from the PFS budget neutrality provision.

In the July 2009 GAO report entitled, "Medicare Physician Payments: Fees Could Better Reflect Efficiencies Achieved when Services are Provided Together," the GAO recommended that we take further steps to ensure that fees for services paid under the PFS reflect efficiencies that occur when services are performed by the same physician on the same beneficiary on the same day. The GAO recommended the following: (1) Expanding the existing MPPR policy to the PC to reflect efficiencies in physician work for certain imaging services; and (2) expanding the MPPR to reflect PE efficiencies that occur when certain nonsurgical, nonimaging services are provided together. The GAO also encouraged us to focus on service pairs that have the most impact on Medicare spending.

In the March 2010 report, MedPAC noted its concerns about mispricing of services under the PFS. MedPAC indicated that it would explore whether expanding the unit of payment through packaging or bundling would improve payment accuracy and encourage more efficient use of services.

In the CYs 2009 and 2010 PFS proposed rules (73 FR 38586 and 74 FR 33554, respectively), we stated that we planned to analyze nonsurgical services commonly furnished together (for example, 60 to 75 percent of the time) to assess whether an expansion of the MPPR policy could be warranted. MedPAC encouraged us to consider duplicative physician work, as well as PE, in any expansion of the MPPR policy.

b. Proposed CY 2011 Expansion of the Imaging Technical Component MPPR Policy to Additional Combinations of Imaging Services

Over the past 2 years, the AMA RUC has examined several services billed 90 percent or more of the time together as part of the potentially misvalued service initiative and, in several cases, created one code to describe the complete service, with a value that reflects the expected efficiencies. Notwithstanding the bundling work of the RUC, there may be additional imaging and other diagnostic services that are furnished together less than 90 percent of the time where we could still expect efficiencies in the TC, and in some cases in the PC, resulting in potential overpayment for these services under current policy when furnished together.

Section 1848(c)(2)(K) of the Act (as added by section 3134 of the ACA) specifies that the Secretary shall identify potentially misvalued codes by examining multiple codes that are frequently billed in conjunction with furnishing a single service, and review and make appropriate adjustments to their relative values. As a first step in applying this provision, we are proposing a limited expansion of the current imaging MPPR policy for CY 2011. We will continue to review other possible expansions of the MPPR policy to the TC and/or PC of imaging procedures or other diagnostic tests for the future. Any further changes would be addressed in future rulemaking.

In a related policy for hospital outpatient payment of imaging services, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569), the OPPS adopted a policy to pay for two or more CT and CTA, MRI and MRA, or ultrasound procedures furnished in the same session through a single composite ambulatory payment classification (APC) group. These composite APC payments were based on the 11 families of codes subject to the MPPR under the PFS that were collapsed into 3 imaging families for the OPPS according to their modality—1 for ultrasound, 1 for CT and CTA, and 1 for MRI and MRA services.

At that time, we stated our belief that the contiguous body area concept that was incorporated in the PFS imaging families was not necessary for potential efficiencies to be achieved in an imaging session. We provided examples to illustrate that we would not expect second and subsequent imaging services of the same modality involving noncontiguous body areas to require duplicate facility resources (comparable to the TC under the PFS) for clinical labor activities such as greeting the patient, providing education and obtaining consent, retrieving prior exams, setting up an intravenous infusion, and preparing and cleaning the room, any more than second and subsequent imaging procedures of the same modality involving contiguous body areas. While we noted that multiple imaging claims under the OPPS are generally within the same imaging modality and involve contiguous body areas the vast majority of the time, we estimated that the collapsed 3 families, as opposed to the 11 PFS families, would add 12 percent additional claims to those eligible for a single composite APC payment under the OPPS based on the provision of 2 or more imaging services in a single session, allowing us to capture additional claims with efficiencies.

Taking into consideration the OPPS policy that was adopted in the CY 2009 OPPS/ASC final rule with comment period, in this proposed rule, we are proposing to apply the MPPR regardless of family, that is, the policy would apply to multiple imaging services furnished within the same family of codes or across families. This proposal would simplify the current imaging MPPR policy in a way that is consistent with the standard PFS MPPR policy for surgical procedures that does not group procedures by body region. Therefore, the MPPR would apply to CT and CTA, MRI and MRA, and ultrasound procedures services furnished to the same patient in the same session, regardless of the imaging modality, and not limited to contiguous body areas.

Because of the different pieces of equipment used for CT/CTA, MRI/MRA, and ultrasound procedures, it would be highly unlikely that a single practitioner would furnish more than one imaging procedure involving 2 different modalities to one patient in a single session where the proposed MPPR policy would apply. On the other hand, while most multiple procedures furnished with a single modality in one session would involve procedures currently assigned to one of the 11

imaging families, it would not be uncommon for more than one imaging procedure of the same modality to be furnished across families and, like the scenario for hospital outpatient imaging services, we would expect efficiencies to occur in these cases. Therefore, we believe that an expansion of the current imaging MPPR policy to account for efficiencies in such situations would allow us to pay more appropriately for these multiple imaging procedure sessions, consistent with our ongoing efforts to address misvalued services.

The proposed expansion of the imaging MPPR policy to include all of the current codes in a single family to which the standard 50 percent reduction for second and subsequent procedures would apply would reduce payment for 20 percent more services than the current MPPR policy under the PFS. Thus, under the CY 2011 proposal, we would capture additional efficiencies and pay more appropriately in these cases. We note that, as indicated above, section 3135(b)(2) of the ACA specifies that reduced expenditures attributable to the increase in the imaging MPPR from 25 to 50 percent in CY 2011 are excluded from the PFS budget neutrality adjustment. However, the reduced payment for code combinations that would newly be subject to the imaging MPPR policy under this proposal would be made in a budget neutral manner under the PFS, as these new combinations are not included under section 1848(b)(4)(D) (added by section 3135(b) of the ACA), which addresses "single-session imaging to consecutive body parts" under the established imaging MPPR policy.

Finally, we are also proposing to add the codes displayed in Table 17 to the list of imaging services subject to the MPPR policy in CY 2011. These codes were newly created for CY 2010 and are similar to codes currently in imaging family 2, titled CT and CTA (Chest/Thorax/Abdomen/Pelvis).

We further note that new CY 2010 CPT codes 74261 (Computed tomography (CT) colonography, diagnostic, including image postprocessing; without contrast material) and 74262 (Computed tomography (CT) colonography, diagnostic, including image postprocessing; with contrast material(s) including non-contrast images, if performed) were added to the CY 2010 MPPR policy through the July 2010 PFS quarterly update, with a retroactive effective date of January 1, 2010. These codes replaced CPT code 0067T (Computed tomographic (CT) colonography (*i.e.,* virtual colonoscopy); diagnostic) in CY 2010, which was on the list of procedures subject to the imaging MPPR policy prior to CY 2010.

As discussed earlier in this section, reduced expenditures attributable to the increase in the MPPR for multiple imaging procedures to consecutive body parts (that is, those previously designated in the same family of codes) are exempt from the budget neutrality provision of the PFS. However, the reduced expenditures attributable to the MPPR for combinations of multiple imaging procedures that we are proposing for CY 2011 (the MPPR for multiple imaging procedures not involving consecutive body parts) would be subject to budget neutrality adjustment under the PFS. We note that this formulation for whether reduced expenditures are exempt from budget neutrality applies both to procedures currently subject to the imaging MPPR and to new codes that are subject to the policy in CY 2011 and in future years. To the extent that imaging procedures described by the new codes are furnished in combination with other procedures that are subject to the imaging MPPR on consecutive body areas, the reduced expenditures attributable to the MPPR for these combinations would be exempt from the PFS budget neutrality adjustment.

The complete list of codes subject to the proposed CY 2011 MPPR policy for diagnostic imaging services is included in Addendum F to this proposed rule.

c. Proposed CY 2011 Expansion of the MPPR Policy to Therapy Services

In the July 2009 GAO report entitled, "Medicare Physician Payments: Fees Could Better Reflect Efficiencies Achieved when Services are Provided Together," the GAO found efficiencies when multiple physical therapy services were furnished in one session and concluded that an MPPR policy could be appropriate for these services. In the report, the GAO noted that officials from the AMA RUC explained that time spent on pre-service and post-service therapy activities is spread across the number of services in a typical session in order to avoid duplication of the PE for the services. Nevertheless, the GAO found that there was duplication of certain activities in the intra-service period, and provided the example of time spent testing range of motion or muscle flexibility that was duplicated in commonly observed code pairs.

In the typical clinical scenario for therapy services, we believe that therapy services are misvalued for PFS payment when multiple services are furnished to a patient in a single session because duplicate clinical labor and supplies are included in the PE of the services furnished. We believe this duplication should be accounted for under the PFS, as we currently account for efficiencies in multiple surgical and multiple diagnostic imaging procedures furnished in a single session. Over the past 2 years, the AMA RUC has examined several services billed 90 percent or more of the time together as part of its potentially misvalued service initiative and, in several cases, created one code to describe the complete service, with a value that reflects the expected efficiencies. Notwithstanding the AMA RUC's analyses, in most cases it has not created one code to describe a complete therapy service, in part because many of the core therapy CPT codes are timed codes based on increments of treatment time.

Therefore, we are proposing a further step to implement section 1848(c)(2)(K) of the Act (as added by section 3134 of the ACA) that specifies that the Secretary shall identify potentially misvalued codes by examining multiple codes that are frequently billed in conjunction with furnishing a single service. For CY 2011 we are proposing an MPPR policy for the HCPCS codes listed in Table 18, specifically the separately payable "always therapy" services that are only paid by Medicare when furnished under a therapy plan of care. These services are designated "always therapy" services regardless of who furnishes them and always require therapy modifiers to be reported, specifically –GP (Services rendered under outpatient physical therapy plan of care); –GO (Services rendered under outpatient occupational therapy plan of care); or –GN (Services rendered under outpatient speech pathology plan of care). The therapy codes are available in a file on the CMS Web site at: *http://www.cms.gov/TherapyServices/.* We have excluded both contractor-priced and bundled codes from Table 18 because, under our proposal, an MPPR would not be applicable for "always therapy" services furnished in combination with these codes. In the case of bundled codes that are not separately paid, there are no explicit efficiencies in the direct PE to be reflected in payment for the second and subsequent therapy services furnished

to the patient on the same day. In the case of contractor-priced codes, there is no nationally established pricing that could be uniformly adjusted to reflect the expected efficiencies when multiple therapy services are furnished.

TABLE 18—SEPARATELY PAYABLE "ALWAYS THERAPY" SERVICES SUBJECT TO THE PROPOSED CY 2011 MPPR POLICY*

CPT/ HCPCS code	Short descriptor
92506	Speech/hearing evaluation.
92507	Speech/hearing therapy.
92508	Speech/hearing therapy.
92526	Oral function therapy.
92597	Oral speech device eval.
92607	Ex for speech device rx, 1hr.
92608	Ex for speech device rx addl.
92609	Use of speech device service.
96125	Cognitive test by hc pro.
97001	Pt evaluation.
97002	Pt re-evaluation.
97003	Ot evaluation.
97004	Ot re-evaluation.
97010	Hot or cold packs therapy.
97012	Mechanical traction therapy.
97016	Vasopneumatic device therapy.
97018	Paraffin bath therapy.
97022	Whirlpool therapy.
97024	Diathermy eg, microwave.

G0281	Elec stim unattend for press.
G0283	Elec stim other than wound.
G0329	Electromagntic tx for ulcers.

*Excludes contractor-priced and bundled codes.

At this time, we are not proposing an MPPR policy for "sometimes therapy" services, specifically those services that may be furnished under a therapy plan of care or otherwise by physicians or NPPs as medical services. We believe that the care patterns are different for the latter group of services that may sometimes be furnished as therapy services, and note that they are less commonly furnished with multiple services in a single session than the "always therapy" services. In the discussion that follows, our reference to therapy services means those HCPCS codes designated annually as "always therapy" services by CMS.

Based on CY 2009 PFS claims data, we identified over 500 therapy service code pairs billed for the same patient in a single session. We then reviewed a sample of the most common therapy code pairs, specifically those high volume code pairs with more than 250,000 combined services per year, to examine the potential for duplication in the PE. These codes pairs represented more than half of the occurrences of therapy services billed together. While we acknowledge that the PE inputs per service for some therapy services were included in the direct PE database based on one-half of the total PE inputs required for two services provided in a single session, which would account for some duplication, this was not the case for all combinations of therapy services. Of the high volume therapy services examined, approximately one-fourth of the code pairs were not valued based on two services. In addition, we note that the CY 2009 PFS claims data show that when multiple therapy services are billed on a claim for the same date of service, the median number is four services per day. Therefore, even for those clinical labor times that may reflect the allocation of total time across two units of therapy services, we believe that some elements of the current PE inputs are duplicated based on current patterns of therapy service delivery where most multiple service claims involve delivery of more than 2 services in a session.

Duplicate labor activities currently included in the PE for the service period for these high volume pairs of therapy services are as follows: clean room/equipment; education/instruction/counseling/coordinating home care; greet patient/provide gowning; obtain measurements, for example, ROM/strength/edema; and post-treatment patient assistance. The most common duplicate supply item included in the PE was the multispecialty visit pack. Examples of duplicated and unduplicated labor activities and supplies for two sample therapy code pairs and our estimates of potential clinically appropriate time and quantity reductions for multiple service sessions are displayed in Table 19. We note that CY 2009 PFS claims data for these sample code pairs include over 3.4 million pairs of CPT codes 97112 (Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities) and 97110 (Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility) furnished by the same practitioner on the same day and over 500,000 pairs of CPT codes 97001 (Physical therapy evaluation) and 97140 (Manual therapy techniques (*e.g.,* mobilization/manipulation, manual lymphatic drainage, manual traction), 1 or more regions, each 15 minutes).

Table 19: Examples of Duplicate PE Inputs for Therapy Services That Should Be Accounted for When Multiple Services Are Furnished in One Session

Example 1: CPT code 97112 (Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities) and CPT code 97110 (Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility)

We did not remove minutes for clinical labor tasks that were not duplicated. For example, for CPT code pair 97001 and 97140 the following tasks were not duplicated: Post treatment patient assistance; prep and position patient; and prepare room, equipment, and supplies. In addition, we did not remove any supply items that would be required for only one of the separate services because these would not be duplicated in the PE applicable to the combination of services. We estimated no reduction for equipment time, even though efficiencies would be expected for equipment that is used in both services when they are furnished together. Finally, a corresponding reduction to the indirect expenses is appropriate since indirect costs are allocated partially based on direct costs. For five high volume therapy code pairs that each occur over 2 million time in PFS claims for multiple therapy services and account for almost half of such claims, we estimated that the resulting reduction in the PE for the lower paying code would range from 28 to 56 percent.

In summary, given the duplicative clinical labor activities and supplies as shown in the code combination examples, we believe it would be appropriate to extend the 50 percent MPPR policy that is currently applied to surgical services and the TC of imaging services, to the PE component of certain therapy services. Specifically, we are proposing to apply a 50 percent payment reduction to the PE component of the second and subsequent therapy services for multiple "always therapy" services furnished to a single patient in a single day. Because it would be difficult to determine the precise beginning and end of therapy sessions and we do not believe that beneficiaries would typically have more than one therapy session in a single day, we are proposing to apply the 50 percent MPPR policy to the PE component of subsequent therapy services provided to the same patient on the same day, rather than in the same session.

We note that many therapy services are time-based CPT codes, so multiple units of a single code may be billed for a single session that lasts for a longer period of time than one unit of the code. The proposed MPPR policy would apply to multiple units of the same therapy service, as well as to multiple different services, when furnished to the same patient on the same day. Full payment would be made for the service or unit with the highest PE and payment would be made at 50 percent of the PE component for the second and subsequent procedures or units of the service. The work and malpractice components of the therapy service payment would not be reduced. For therapy services furnished by a group practice or "incident to" a physician's service, the MPPR would apply to all "always therapy" services furnished to a patient on the same day, regardless of whether the services are provided in one therapy discipline or multiple disciplines, for example, physical therapy, occupational therapy, or speech-language pathology. The proposed CY 2011 MPPR policy would apply to both those services paid under the PFS that are furnished in the office setting and those services paid at the PFS rates that are furnished by outpatient hospitals, home health agencies, comprehensive outpatient rehabilitation facilities (CORFs), and other entities that are paid by Medicare for outpatient therapy services. Table 20 provides a sample calculation of the current and proposed CY 2011 payment for multiple therapy services furnished on the same day. For those services paid under the PFS, the PFS budget neutrality provision would apply so that the estimated reduced expenditures for therapy services would be redistributed to increase payment for other PFS services.

TABLE 20—SAMPLE PROPOSED PAYMENT CALCULATION FOR MULTIPLE THERAPY SERVICES FURNISHED TO A SINGLE PATIENT ON THE SAME DAY

	Procedure 1 Unit 1	Procedure 1 Unit 2	Procedure 2	Current total payment	Proposed CY 2011 total payment	Proposed payment calculation
Work	$7.00	$7.00	$11.00	$25.00	$25.00	no reduction.
PE	10.00	10.00	8.00	28.00	19.00	$10 + (0.5 × $10) + (0.5 × $8).
Malpractice	1.00	1.00	1.00	3.00	3.00	no reduction.
Total	18.00	18.00	20.00	56.00	47.00	$18 + $7 + (0.5 × $10) + $1 + $11 + (0.5 × $8) + $1.

We believe this proposed therapy MPPR policy would provide more appropriate payment for therapy services that are commonly furnished together by taking into account the duplicative clinical labor activities and supplies in the PE that are not furnished more than once in the single therapy session. This approach is consistent with the statutory requirement for the Secretary to identify, review, and adjust the relative values of potentially misvalued services under the PFS as specified by section 3134 of the ACA. We also believe this proposed policy is responsive to Congressional concerns about significant growth in therapy spending and to MedPAC and GAO recommendations regarding the expansion of MPPR policies under the PFS to account for additional efficiencies. We note that paying more appropriately for therapy services based on PE relative values that are adjusted for the clinical scenario under which the services are furnished would result in reduced therapy expenditures, and beneficiaries would be able to receive more medically necessary outpatient therapy services before reaching the therapy cap. For a further discussion of potential alternatives to the therapy caps, we refer readers to section III.A.2. of this proposed rule.

5. High Cost Supplies

a. Background

MedPAC and the AMA RUC have long recommended that CMS establish a frequent price update process for high-cost supplies that are direct PE inputs in the PE database for services paid under the PFS because of their speculation that prices for these items may decrease over time as competition increases and new technologies disseminate into medical practice. MedPAC in particular has perennially noted that it is important for CMS to update the prices of high-priced supplies on a regular basis as inaccurate prices can distort PE RVUs over time,

contributing to the misvaluing of established services under the PFS.

Most of the current prices for high-cost supplies included in the direct PE database are from 2004 or earlier. There are currently 62 unique supplies with prices of $150 or more in the proposed CY 2011 PE database, which is available on the CMS Web site under the supporting data files for the CY 2011 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/.* Finally, we note that we do not actually pay the supply prices included in the PE database but, instead, use them to develop the PE RVUs according to our standard PE methodology as described in section II.A.2. of this proposed rule. Payment for a procedure that uses a supply is based upon the PE RVUs that result from the PE methodology, and supplies are among the direct PE inputs for procedures. Therefore, it is the relativity of high-cost supply prices to prices for other PE items (equipment, low-cost supplies, and clinical labor) that is important.

Accordingly, in the CY 2009 PFS proposed rule (73 FR 38582), we proposed a process to update the prices for high-cost supplies priced at $150 or more that are included in the PE inputs for procedures paid under the PFS PE methodology. The CY 2009 proposed rule described a publicly transparent process in which CMS would publish a list of the high-cost supplies in the PFS proposed rule (65 supplies were included in the CY 2009 PFS proposed rule), and specialty societies or other relevant organizations would provide acceptable documentation supporting the pricing for the supplies during the 60-day public comment period. Furthermore, in that same proposed rule (73 FR 38582), we provided guidance on what constitutes valid, reliable documentation that reflects the typical price of the high-cost item in the marketplace. We outlined examples of acceptable documentation, such as a detailed description (including system components), sources, and current pricing information, confirmed by copies of catalog pages, invoices, and quotes from manufacturers, vendors, or distributors. We indicated that documentation that does not include specific pricing information such as phone numbers and addresses of manufacturers, vendors, or distributors or Web site links without pricing information would not be acceptable. We also noted that if acceptable documentation was not received within the proposed rule's 60-day public comment period, we would use prices from the Internet, retail vendors, and supply catalogs to determine the appropriate cost, and that we would use the lowest price identified by these sources (73 FR 38582). Finally, we solicited public comments on alternatives that could be used to update pricing information in the absence of acceptable documentation provided by specialty societies or other interested organizations.

In the CY 2009 PFS final rule with comment period (73 FR 69882), we indicated that we received many comments on the proposed process and, while some commenters expressed support, others believed the proposed process was flawed and burdensome. Moreover, although we received some data in response to our request for information on the 65 high-cost supplies with prices of $150 or more, much of what we received was not complete or did not represent typical market prices. In particular, we expressed concern that the submitted data often represented manufacturer list prices for the premier models of many supplies, while we believed there were less expensive alternatives. Therefore, we were unable to determine the most appropriate, typical supply prices for our PFS payment methodology that prices the typical service described by a HCPCS code. Rather than finalizing the proposed process for updating high-cost supplies and revising the prices for the 65 supplies based on inadequate pricing information, we stated in the CY 2009 PFS final rule with comment period (73 FR 69882) that we would research the possibility of using an independent contractor to assist us in obtaining accurate pricing information. Furthermore, we informed the public that we planned to study the limitations of available pricing data and determine how to revise our proposed process to elicit better data.

In the CY 2010 PFS proposed rule and final rule with comment period (74 FR 33554 and 61776, respectively), we stated that we were continuing to examine ways to obtain accurate pricing information for high-cost supplies. We noted again in the CY 2010 PFS proposed rule that we would depend upon the cooperation of the medical community to obtain typical prices in the marketplace, and we provided stakeholders with another opportunity to submit public comments on the process. In the CY 2010 PFS final rule with comment period, we acknowledged commenters' general support for an initiative to ensure accurate pricing of high-cost supplies. In general, the commenters strongly preferred a transparent and public process, and we stated that we would consider this perspective as we explore the best way to ensure that accurate supply pricing information is used in the PFS payment methodology.

b. Future Updates to the Prices of High-Cost Supplies

In working towards refining a process to update the prices of high-cost supplies and consistent with our intention expressed in the CY 2009 PFS final rule with comment period (73 FR 69882), we contracted with an independent contractor during CY 2009 to help us study the availability of accurate pricing information. We requested that the independent contractor, L&M Policy Research, research pricing information for the 65 high-cost supplies listed in the CY 2009 proposed rule (73 FR 38583 through 38585) and determine what, if any, pricing information reflecting typical market prices could be obtained for these high-cost supplies.

We first requested that the contractor explore publicly available sources to obtain typical market prices for these supplies. The contractor utilized supply vendor catalogs and Web sites and directly contacted vendors, manufacturers, group purchasing organizations (GPOs), and any other suppliers that the contractor identified in their research in order to identify prices for each of the supplies. Where more than one version of a supply item appeared to match a description of a high-cost supply and/or more than one possible vendor or manufacturer was identified, the contractor attempted to obtain prices from the multiple sources.

Upon review of the high-cost supply list, the contractor refined the list to 62 unique high-cost items with prices of $150 or more for the study. The original list only consisted of 64 items but included one item inadvertently listed twice (CMS Supply Code SD207 (suture device for vessel closure (Perclose A–T)) and one item (CMS Supply Code SH079 (collagen implant)) that was deleted from the PE database after CY 2007 because it was no longer used as an input for any codes. While the contractor was able to obtain prices for 37 of the 62 unique supplies, the contractor was unable to obtain pricing information for the remaining 25 supplies. Documentation of these prices, a requirement we discussed in the CY 2009 PFS proposed rule (73 FR 38582), was only obtained for 25 of the 36 supplies with new pricing information. For the remainder, while the contractor was given price quotes over the phone, the sales agents or customer service representatives declined to provide any form of written documentation, in some cases because company policies

restricted providing pricing documentation to prospective customers without an account. Moreover, information on typical discounts was obtained for only seven products, and only one discount was documented. In the case of these products, companies disclosed the maximum available discounts, ranging from 18 percent to 45 percent. Relative to prices currently included in the PE database, the contractor found higher prices for the majority of the medical supplies that were researched, specifically 23 supplies with higher prices, 8 with lower prices, and 3 with the same price. The high-cost supplies studied by the contractor and their current database prices are displayed in Table 20.

TABLE 20—HIGH-COST SUPPLIES WITH PRICES OF $150 OR GREATER IN THE PFS DIRECT PE DATABASE THAT WERE STUDIED BY THE CMS CONTRACTOR

CMS supply code	Supply description	Current database unit price	Associated CPT codes
	stent, ureteral, wguidewire, 3cm flexible tip	$235	52332

[1] Six pack.
[2] Set of 4.
[3] 10 pack.

Next, we directed the contractor to access the United States General Services Administration (GSA) medical supply schedule to augment the results obtained through review of vendor materials and direct contact with vendors, manufacturers, and GPOs. We note that the GSA establishes long-term government-wide contracts with commercial firms for many products, negotiating contracts and determining prices to be fair and reasonable prior to placing them on schedule. Included on the schedule are thousands of medical supplies at prices that, in most cases, are established through competition. The GSA schedule is an open solicitation and a business of any size, if it is stable and financially sound, can request to be included on the schedule. GSA's vendors usually are nationwide vendors with substantial non-government sales, and products on the schedule must be manufactured in the U.S. or in a nation with a trade agreement with the United States. Submissions for the schedule are received 365 days per year, vendor contracts can be of varying lengths, and vendors can add or delete products from the schedule. Depending on the aggregate cost estimate associated with the vendor's supply items, the time to achieve inclusion on the schedule can vary from as short as several months to as long as 2 years. The GSA has delegated authority to the Department of Veterans Affairs (VA) to procure medical supplies under the VA Federal Supply Schedules Program.

Using the GSA general search engine under the category "Laboratory, Scientific, & Medical" available at *https://www.gsaadvantage.gov/advgsa/advantage/main/start_page.do* the contractor obtained nine prices for items similar to the high-cost supplies in the PE database and that are displayed in Table 20 from the publicly available information on the Internet, including pricing for one product for which its prior work did not yield an updated price. We believe that additional items that are similar to the high-cost supplies in the PE database and that may be used with the same procedures may be on the GSA schedule but we are still working through the crosswalk between our supplies and the way the supplies are presented on the GSA schedule. Examples of high-cost supplies in the PE database that the contractor located on the GSA schedule include: (1) Kit, capsule, ESO, endoscopy w-application supplies (ESO), priced at $450 in the PE database and $444 on the GSA schedule; and (2) tube, jejunostomy, priced at $195 in the PE database and $60 to $83 on the GSA schedule, depending on the characteristics of the tube.

Since the GSA medical supply schedule is a source for pricing information that is public and transparent and reflects the best government contract price for a product, we believe it is a desirable resource for us to use in a refined process for updating the prices of high-cost

supplies. For historical context, CMS has previously proposed to use VA prices that result from the competitive marketplace as comparison points to limit the Medicare prices for oxygen and certain items of durable medical equipment and prosthetic devices (62 FR 38100 through 38107, and 64 FR 44227 through 44231) in 1997 and 1999, respectively. These prior proposals were based on our determination that the Medicare payment amounts for these items as durable medical equipment or prosthetics (not as physicians' services) were not inherently reasonable. We note, however, that our current interest in the GSA schedule for pricing high-cost supplies for payment of physicians' services is not based on considerations of inherent reasonableness, and we do not actually pay the prices in the PE database for supplies under the PFS.

We further note that public commenters on pricing high-cost supplies have consistently requested that CMS ensure that the pricing information used to update the prices is provided publicly. The commenters have observed that this transparency would enable stakeholders to evaluate and provide feedback to the agency on pricing accuracy (74 FR 61776). We also acknowledge that our past attempts over several years to identify typical market prices for the high-cost supplies have been inhibited by the limited availability of public data that meet the documentation requirements we have previously established. Individual vendors do not always publish their product prices or provide typical discounts. Moreover, discounts may vary depending on suppliers and the volume of supplies purchased. Our understanding of the GSA medical supply schedule is that the publicly listed fair and reasonable prices on the schedule generally do not include volume and or certain other discounts that may be subsequently negotiated by the buyer. Consequently, we would consider the prices available on the GSA schedule to represent the "individual item ceiling" price for a single item purchase, which we believe would be appropriate to estimate the high-cost supply prices for physicians' office purchases. We are soliciting public comments regarding the high-cost supplies in the direct PE database for the CY 2011 PFS proposed rule, available on the CMS Web site as noted earlier in this section, and the corresponding supplies or alternative items that could be used for the same function that are currently on the GSA supply schedule. We encourage commenters to provide a detailed analysis of the current relationships between the items in the PE database and those on the GSA schedule.

At this time, we would like to describe a refined process for regularly updating prices for high-cost supplies under the PFS and solicit comments on how we could improve on this process. The process could occur every 2 years beginning as soon as CY 2013, although we note that we would propose the refined process through rulemaking before revising the prices for any high-cost supply item based on the GSA schedule. We could also consider establishing a different price update period depending on whether a high-cost supply was a new supply in the PE database or had been in use for some time, in which case we might expect that the price would have stabilized and, therefore, could be updated less frequently. In general, we would expect that the periodicity of updating prices for high-cost supplies that we eventually adopted would balance the associated administrative burden with the rate of price changes, to ensure that the associated procedures remain appropriately valued, rather than increasingly misvalued, over time.

We envision that we would base high-cost supply price inputs on the publicly available price listed on the GSA medical supply schedule. Since the medical community would have several years to examine the GSA medical supply schedule before the refined process would be adopted, and we have found no apparent limitations on vendors placing products on the GSA schedule, beyond the schedule's interest in competitive, best value procurements, stakeholders would have the opportunity to ensure that any high-cost direct PE input for a PFS service that may currently be missing from the GSA medical supply schedule would be included before CMS needs to access the publicly available price for the item. If a supply price were not publicly available on the GSA medical supply schedule by the time CMS needs to access the price, we would propose to reduce the current price input for the supply by a percentage that would be based on the relationship between GSA prices at that time and the existing PE database prices for similar supplies (currently an average 23 percent reduction). We believe that this refined process is desirable because it is consistent with commenters' repeated requests for the updating methodology to be transparent and predictable.

Moreover, the VA (with responsibility delegated by the GSA) determines whether prices are fair and reasonable by comparing the prices and discounts that a company offers the government with the prices and discounts that the company offers to commercial customers. Therefore, using the GSA medical supply schedule as a source for publicly available prices would also better account for product-specific market dynamics than the alternative of an across-the-board percentage reduction for supplies not on the GSA schedule based on general price trends for the high-cost supplies on the schedule. That is, if the market price of a particular supply were not to drop according to broad trends for other high-cost supplies, suppliers would have the opportunity to provide their price to the public on the GSA schedule in order to preclude any reduction in Medicare payment for procedures associated with that supply.

Finally, we would like to reiterate that we are interested in receiving detailed public comments on the refined process discussed above, including all aspects of the price update methodology that we have presented. Moreover, we believe a similar approach could potentially be appropriate to update the prices for other supplies in the PE database that would not fall under our definition of high-cost supplies, and we welcome further public comments on that possible extension. We also invite further suggestions for alternative approaches to updating high-cost supply prices, specifically those that would result in a predictable, public, and transparent methodology that would ensure that the prices in the PE database reflect typical market prices. These principles are particularly important in order to ensure that the services that utilize the high-cost supplies when provided in the physician's office are appropriately valued under the PFS and continue to be appropriately valued over time.

D. Geographic Practice Cost Indices (GPCIs)

1. Background

Section 1848(e)(1)(A) of the Act requires us to develop separate Geographic Practice Cost Indices (GPCIs) to measure resource cost differences among localities compared to the national average for each of the three fee schedule components (that is, work, PE, and malpractice). While requiring that the PE and malpractice GPCIs reflect the full relative cost differences, section 1848(e)(1)(A)(iii) of the Act requires that the physician work GPCIs reflect only one-quarter of the relative cost differences compared to the national average. In addition, section 1848(e)(1)(G) of the Act sets a

permanent 1.5 work GPCI floor in Alaska for services furnished beginning January 1, 2009. Section 1848(e)(1)(C) of the Act requires us to review and, if necessary, adjust the GPCIs at least every 3 years. This section also specifies that if more than 1 year has elapsed since the last GPCI revision, we must phase in the adjustment over 2 years, applying only one-half of any adjustment in each year. As discussed in the CY 2009 PFS final rule with comment period (73 FR 69740), the CY 2009 adjustment to the GPCIs reflected the fully implemented fifth comprehensive GPCI update. CY 2010 would have typically included no adjustments to the GPCIs. However, section 3102(a) of the ACA amends section 1848(e)(1)(E) of the Act to extend the 1.0 work GPCI floor for services furnished through December 31, 2010. Additionally, section 3102(b) of the ACA adds a new subparagraph 1848(e)(1)(H) to the Act, which specifies that for CY 2010 and CY 2011, the employee compensation and rent portions of the PE GPCI must reflect only one-half of the relative cost differences for each locality compared to the national average. The new subparagraph also includes a "hold harmless" provision for CY 2010 and CY 2011 for any PFS locality that would otherwise receive a reduction to its PE GPCI resulting from the limited recognition of cost differences. Additionally, section 1848(e)(1)(I) of the Act (as added by section 10324(c) of ACA) establishes a 1.0 PE GPCI floor for services furnished in frontier States effective January 1, 2011. In May 2010, we provided our Medicare contractors with an updated CY 2010 payment file that included the 1.0 work GPCI floor and the PE GPCIs calculated according to the methodology required by section 1848(e)(1)(H) of the Act (as added by section 3102(b) of ACA) for CY 2010, to be used for payment of services furnished on or after January 1, 2010.

For the CY 2011 PFS proposed rule, we have completed the sixth review of the GPCIs and are proposing new GPCIs. We note that section 1848(e)(1)(E) of the Act (as amended by section 3102(a) of ACA) extends the 1.0 work GPCI floor only through December 31, 2010. Under current statute, the 1.0 work GPCI floor will expire on January 1, 2011. Therefore, the CY 2011 physician work GPCIs and summarized geographic adjustment factors (GAFs) do not reflect the 1.0 work floor. However, section 1848(e)(1)(G) of the Act (as amended by section 134(b) of the MIPPA) set a permanent 1.5 work GPCI floor in Alaska for services furnished beginning January 1, 2009; and, as noted above, section 1848(e)(1)(I) of the Act (as added by section 10324(c) of ACA) provides for a permanent 1.0 PE GPCI floor for frontier States effective January 1, 2011. Therefore, as required by the statute, the 1.5 work GPCI floor for Alaska and the 1.0 PE GPCI floor for frontier States will be in effect for CY 2011. In addition to the limited recognition of certain cost differences for the PE GPCIs, section 1848(e)(1)(H) of the Act (as added by section 3102(b) of ACA) also requires us to complete an analysis of the data sources used and cost share weights assigned to the PE GPCIs. Implementation of ACA provisions related to the CY 2011 PE GPCIs is discussed in more detail in the GPCI update section below.

See Addenda D and E to this proposed rule for the proposed CY 2011 GPCIs and summarized GAFs.

2. GPCI Update

The proposed updated GPCI values were developed by Acumen, LLC (Acumen) under contract to CMS. As mentioned above, there are three GPCI components (physician work, PE, and malpractice), and all GPCIs are developed through comparison to a national average for each component. Additionally, each of the three GPCIs relies on its own data source(s) and methodology for calculating its value as described below.

a. Physician Work GPCIs

The physician work GPCIs are designed to capture the relative cost of physician labor by Medicare PFS locality. Previously, the physician work GPCIs were developed using the median hourly earnings from the 2000 Census of workers in seven professional specialty occupation categories which we used as a proxy for physicians' wages and calculated to reflect one-quarter of the relative cost differences for each locality compared to the national average. Physicians' wages are not included in the occupation categories because Medicare payments are a key determinant of physicians' earnings. Including physicians' wages in the physician work GPCIs would, in effect, have made the indices dependent upon Medicare payments.

The physician work GPCIs were updated in CYs 2001, 2003, 2005, and 2008 using professional earnings data from the 2000 Census. However, wage and earnings data are no longer available from the Census long form and the 2000 data are outdated. Therefore, for the proposed sixth GPCI update, we used the 2006 through 2008 Bureau of Labor Statistics (BLS) Occupational Employment Statistics (OES) data as a replacement for the 2000 Census data. The use of BLS OES data as a replacement for the 2000 Census data is discussed in more detail in the update of the PE GPCIs section. As noted above, the 1.0 work GPCI floor is set to expire under current statute on December 31, 2010. Therefore, the CY 2011 proposed physician work GPCIs reflect the removal of this floor.

b. Practice Expense GPCIs

(1) The Affordable Care Act Requirements for PE GPCIs

General Methodology for the CY 2011 GPCIs

ACA added a new subparagraph 1848(e)(1)(H) to the Act which revises the methodology for calculating the PE GPCIs for CY 2010 and CY 2011 so that the employee compensation and rent portions of the PE GPCIs reflect only one-half of the relative cost differences for each locality compared to the national average. Additionally, under section 1848(e)(1)(H)(iii) of the Act (as added by section 3102(b) of the ACA), each PFS locality is held harmless so that the PE GPCI will not be reduced as a result of the change in methodology for PE GPCIs. In accordance with section 1848(e)(1)(H)(ii) of the Act (as added by section 3102(b) of ACA), the employee compensation and rent components of the proposed CY 2011 PE GPCIs were calculated to reflect one-half of the cost differences for each PFS locality relative to the national average cost. Additionally, as required by the statute, physicians' services furnished in each PFS locality would be adjusted by the higher of the locality's PE GPCI calculated with the limited recognition of employee compensation and rent cost differences or the PE GPCI calculated without the limited recognition of cost differences.

Phase-In of PE GPCIs

Section 1848(e)(1)(C) of the Act requires us to phase in GPCI adjustments over 2 years if there was more than 1 year between GPCI adjustments. In accordance with the statute, we are proposing to phase in the updated PE GPCIs using one-half of the CY 2010 values and one-half of the fully implemented values (as described in this section). To apply the phase-in and hold harmless provisions of the Act, we calculated transitional PE GPCIs based on two scenarios. Under the first scenario, we calculated transitional CY 2011 PE GPCIs using the full recognition of employee compensation and rent cost differences for each locality as compared to the national average. The

CY 2011 transitional PE GPCI values with full recognition of cost differences were calculated using one-half of the CY 2010 PE GPCI values *with* full recognition of cost differences and one-half of the updated PE GPCIs with full recognition of cost differences. The first scenario represents the transitional PE GPCI values prior to the limited recognition of cost differences. In other words, this scenario does not include the effects of sections 1848(e)(1)(H)(i) and (ii) of the Act (as added by section 3102(b) of ACA).

For the second scenario, we calculated transitional CY 2011 PE GPCIs with the limited recognition of cost differences for the employee compensation and rent components (as required by sections 1848(e)(1)(H)(i) and (ii) of the Act (as added by section 3102(b) of ACA)). The CY 2011 transitional PE GPCI values with the limited recognition of cost differences were calculated using one-half of the CY 2010 PE GPCIs with the limited cost differences and one-half of the updated PE GPCIs with the limited cost differences. The hold harmless provision under section 1848(e)(1)(H)(iii) of the Act (as added by section 3102(b) of ACA) was applied by selecting the greater of the CY 2011 transitional PE GPCI value calculated with the limited recognition of cost differences or the CY 2011 transitional PE GCPI value calculated *with full recognition of cost differences*. The phase-in of the CY 2011 PE GPCIs and application of the hold harmless provision are illustrated in Table 21 below.

TABLE 21—PHASE-IN OF THE CY 2011 PE GPCIS

	CY 2010	Updated GPCIs	CY 2011 (transitional year)	Hold harmless
File 1				
PE GPCI *Without* 3102(b) of ACA.	Without ACA ..	Without ACA (Updated Data)	(½ of 2010) + (½ Updated GPCI).	Greater of File 1 Transitional Value.
File 2				
PE GPCI *With* 3102(b) of ACA.	With ACA	With ACA (Updated Data)	(½ of 2010 w/ACA) + (½ Updated GPCI w/ACA).	or File 2 Transitional Value.

*ACA in this table means the Affordable Care Act.

Data Analysis

Section 1848(e)(1)(H)(iv) of the Act (as added by section 3102(b) of ACA) also requires the Secretary to "analyze current methods of establishing practice expense adjustments under subparagraph (A)(i) and evaluate data that fairly and reliably establishes distinctions in the cost of operating a medical practice in different fee schedule areas." This section also requires the Secretary to make appropriate adjustments to the PE GPCIs no later than by January 1, 2012. To implement this statutory requirement, we are proposing to implement changes in PE data sources and cost share weights discussed herein effective beginning in CY 2011.

In accordance with section 1848(e)(1)(H)(iv) of the Act (as added by section 3102(b) of ACA), we have analyzed the current methods and data sources used in the establishment of the PE GPCIs. With respect to the method used, we began with a review of the GAO's March 2005 Report entitled, "MEDICARE PHYSICIAN FEES: Geographic Adjustment Indices Are Valid in Design, but Data and Methods Need Refinement" (GAO–05–119). While we have raised concerns in the past about some of the GAO's GPCI recommendations, we note that with respect to the PE GPCIs, the GAO did not indicate any significant issues with the *methods* underlying the PE GPCIs. Rather, the report focused on some of the *data* sources used in the method. For example, the GAO stated that the wage data used for the PE GPCIs are not current. Similarly, upon our reexamination of public comments we have received on the PE GPCIs for previous updates, we note that the commenters predominately focused on either the data sources used in the method or raised issues such as incentivizing the provision of care in different geographic areas. However, the latter issue (incentivizing the provision of care) is outside the scope of the statutory requirement that the PE GPCIs reflect the relative costs of the mix of goods and services comprising practice expenses in the different fee schedule areas relative to the national average.

One key component of the PE GPCI method that our analysis identified involved the office expense portion of the PE GPCIs and the cost share weight assigned to this component. Most significantly, we are proposing that the weight for the office rent component be revised from 12.209 percent to 8.410 percent to reflect our more detailed breakout of the types of office expenses that are determined in local markets instead of national markets. For example, for previous GPCI updates, we used the office expenses cost category as the cost share weight for office rent and, therefore, all individual components previously included in the office expenses category were adjusted for local area cost differences by the GPCIs. As discussed in section II.E.1. of this proposed rule, we are proposing to disaggregate the broader office expenses component into 9 new cost categories as part of the proposed CY 2011 MEI rebasing. The disaggregation of the office expenses category indicates that the fixed capital cost category, for which the consumer price index (CPI) for owner's equivalent rent is the price proxy, is the office expense category applicable to the office rent component of the PE GPCI. Therefore, the fixed cost capital cost category is the only component of office expenses that we are proposing to adjust for local area cost differences beginning in CY 2011. We are proposing to assign other newly defined components of the office expenses category (for example, utilities, chemicals, paper, rubber and plastics, telephone, postage, and moveable capital) to the medical equipment, supplies, and other miscellaneous expenses cost component of the PE GPCIs. As discussed later in this section, the medical equipment, supplies, and other miscellaneous expenses component of the PE GPCIs is assumed to have a national market and, therefore, this component is not adjusted for local area cost differences.

The proposed expense categories for the PE GPCIs, along with their respective cost share weights, are primarily derived from the 2006 American Medical Association (AMA) Physician Practice Information Survey (PPIS) for self-employed physicians and selected self-employed non-medical doctor specialties. The PPIS is the most comprehensive, multispecialty, contemporaneous, and consistently collected PE data source available. It

was developed by medical organizations and captures the costs of operating a medical practice, including office rents and nonphysician staff wages.

Moreover, we also examined the feasibility of using the American Community Survey (ACS) and the Bureau of Labor and Statistics (BLS) Occupational Employment Statistics (OES) data for the employee compensation component of the PE GPCI. For previous updates, the employee compensation component was based on the 2000 Decennial Census long form data. Since the Census data are significantly outdated and the 2010 Census no longer includes occupational wage data, we believed the ACS or BLS OES data might be viable alternatives. While the ACS 3-year public use microsample (PUMS) is currently available, it reflects only about 3 percent of households and the data exhibit significant variation due to the small sample. In particular, the ACS PUMS has fewer than 10 observations of pharmacists in the Manhattan, Beaumont Texas, and Southern Maine localities. Therefore, we believe it would be premature to use the ACS data for determining GPCI values. The 2006, 2007, and 2008 panels from the BLS OES represent a larger sample than the ACS PUMS and more recent data than the 2000 Census. As such, we are proposing to use the BLS OES data for updating the GPCIs. We look forward to exploring the use of the full ACS data when they become available.

Additionally, we explored other sources of rent data (including commercial rental data and survey data) for use in calculating the PE GPCIs. We could not identify a reliable alternative rental data source available on a national basis with coverage of non-metropolitan areas.

We do not believe there is a national data source better than the Housing and Urban Development (HUD) data for determining the relative cost differences in office rents. Therefore, based on our review of the available data sources, we are proposing to use the 2010 apartment rental data produced by HUD at the 50th percentile as a proxy for the relative cost difference in physician office rents.

We believe our analysis of the current methods of establishing PE GPCIs and our evaluation of data that fairly and reliably establish distinctions in the cost of operating a medical practice in the different fee schedule areas meet the statutory requirements of section 1848(e)(1)(H)(iv) of the Act (as added by section 3102(b) of ACA). A more detailed discussion of our analysis of current methods of establishing PE GPCIs and evaluation of data sources is included in Acumen's draft report. Acumen's draft report and associated analysis of the sixth GPCI update, including the PE GPCIs, will be posted on the CMS Web site after display of this CY 2011 PFS proposed rule. The draft report may be accessed from the PFS Web site at: *http://www.cms.gov/PhysicianFeeSched/* under the "Downloads" section of the CY 2011 PFS proposed rule web page.

Determining the Proposed PE GPCI Cost Share Weights

To determine the cost share weights for the proposed CY 2011 GPCIs, we used the proposed 2006-based Medicare Economic Index (MEI) as discussed in section II.E.1. of this proposed rule. The proposed MEI was rebased and revised to reflect the weighted-average annual price change for various inputs needed to provide physicians' services. As discussed in detail in that section, the proposed expense categories in the MEI, along with their respective weights, are primarily derived from data collected in the 2006 AMA PPIS for self-employed physicians and selected self-employed non-medical doctor specialties.

For the cost share weight for the PE GPCIs, we used the 2006-based MEI weight for the PE category of 51.734 percent minus the professional liability insurance category weight of 4.295 percent. Therefore, the proposed cost share weight for the PE GPCIs is 47.439 percent. For the employee compensation portion of the PE GPCIs, we used the nonphysician employee compensation category weight of 19.153 percent. The fixed capital category weight of 8.410, for which the CPI for owner's equivalent rent is the price proxy, was used for the office rent component. To determine the medical equipment, supplies, and other miscellaneous expenses component, we removed professional liability (4.295 percent), nonphysician employee compensation (19.153 percent), and fixed capital (8.410 percent) from the PE category weight (51.734 percent). Therefore, the proposed cost share weight for the medical equipment, supplies, and other miscellaneous expenses component is 19.876 percent.

Furthermore, the physician compensation cost category and its weight of 48.266 percent reflect the proposed work GPCI cost share weight and the professional liability insurance weight of 4.295 percent was used for the malpractice GPCI cost share weight. We believe our analysis and evaluation of the weights assigned to each of the categories within the PE GPCIs meets the statutory requirements of section 1848(e)(1)(H)(iv) of the Act (as added by section 3102(b) of ACA).

The proposed cost share weights for the CY 2011 GPCIs are displayed in Table 22 below.

TABLE 22—PROPOSED COST SHARE WEIGHTS FOR CY 2011 GPCI UPDATE

Expense category	Current cost share weight (percent)	Proposed cost share weight (percent)
Physician Work	52.466	48.266
Practice Expense	43.669	47.439
—Employee Compensation	18.654	19.153
—Office Rent	12.209	8.410
—Equipment, Supplies, Other	12.806	19.876
Malpractice Insurance	3.865	4.295
Total	100	100

PE GPCI Floor for Frontier States

Section 10324(c) of ACA added a new subparagraph (I) under section 1848(e)(1) of the Act to establish a 1.0 PE GPCI floor for physicians' services furnished in frontier States. In accordance with section 1848(e)(1)(I) of the Act (as added by section 10324(c) of ACA), beginning in CY 2011, we will apply a 1.0 PE GPCI floor for physicians' services furnished in States determined to be frontier States. The statute requires us to define any State as a frontier State if at least 50 percent of the State's counties are determined to be frontier

counties, which the statute defines as counties that have a population density less than 6 persons per square mile. However, section 1848(e)(1)(I) of the Act (as added by section 10324(c) of ACA) also specifies that this provision shall not apply to States receiving a non-labor related share adjustment under section 1886(d)(5)(H) of the Act (which excludes Alaska and Hawaii from qualifying as a frontier State).

Consistent with the proposed FY 2011 hospital inpatient prospective payment system (IPPS) 1.0 wage index floor for frontier States (as required by section 10324(a) of the ACA) (75 FR 30920 through 30921), we are proposing to identify frontier counties by analyzing population data and county definitions based upon the most recent annual population estimates published by the U.S. Census Bureau. We divide each county's population total by each county's reported land area (according to the decennial census) in square miles to establish population density. We also are proposing to update this analysis from time to time, such as upon publication of a subsequent decennial census, and if necessary, add or remove qualifying States from the list of frontier States based on the updated analysis.

For a State that qualifies as a frontier State, in accordance with section 1848(e)(1)(I) of the Act (as added by section 10324(c) of the ACA), we are proposing that physicians' services furnished within that State would receive the higher of the applicable PE GPCI value calculated according to the standard CY 2011 methodology or a minimum value of 1.00. Furthermore, in accordance with section 1848(e)(1)(I) of the Act (as added by section 10324(c) of the ACA), the frontier State PE GPCI floor is not subject to budget neutrality and would only be extended to physicians' services furnished within a frontier State.

For determining the proposed CY 2011 PFS PE GPCI values, the frontier States are the following: Montana; Wyoming; North Dakota; Nevada; and South Dakota (as reflected in Table 23).

TABLE 23—FRONTIER STATES UNDER SECTION 1848(E)(1)(I) OF THE ACT (AS ADDED BY SECTION 10324(c) OF THE AFFORDABLE CARE ACT)

State	Total counties	Frontier counties	Percent frontier counties
Montana	56	45	80
Wyoming	23	17	74
North Dakota	53	36	68
Nevada	17	11	65
South Dakota	66	34	52

(2) Summary of CY 2011 Proposed PE GPCIs

The PE GPCIs include three components: employee compensation, office rent, and medical equipment, supplies and miscellaneous expenses as discussed below:

(i) Employee Compensation: We used the 2006 through 2008 BLS OES data to determine the proposed employee compensation component of the PE GPCIs. Employee compensation accounts for 40.4 percent of the total PE GPCIs.

(ii) Office Rents: Consistent with the previous GPCI update, we used the most recent residential apartment rental data produced by HUD (2010) at the 50th percentile as a proxy for the relative cost differences in physician office rents. Office rent accounts for 17.7 percent of the PE GPCIs.

(iii) Medical Equipment, Supplies, and other Miscellaneous Expenses: We assumed that items such as medical equipment and supplies have a national market and that input prices do not vary among geographic areas. As discussed in previous GPCI updates in the CY 2005 and CY 2008 PFS proposed rules, specifically the fourth GPCI update (69 FR 47503) and fifth GPCI update (72 FR 38138), respectively, some price differences may exist, but we believe these differences are more likely to be based on volume discounts rather than on geographic market differences. Medical equipment, supplies, and miscellaneous expenses are factored into the PE GPCIs with a component index of 1.000. The medical equipment, supplies, and other miscellaneous expense component are 41.9 percent of the PE GPCIs.

c. Malpractice GPCIs

The malpractice GPCIs are calculated based on insurer rate filings of premium data for $1 million to $3 million mature claims-made policies (policies for claims made rather than services furnished during the policy term). The proposed CY 2011 malpractice GPCI update reflects 2006 and 2007 premium data.

d. General GPCI Update Process

The periodic review and adjustment of GPCIs is mandated by section 1848(e)(1)(C) of the Act. At each update, the proposed GPCIs are published in the PFS proposed rule the year before they would take effect in order to provide an opportunity for public comment and further revisions in response to comments prior to implementation. As mentioned above, the proposed CY 2011 updated GPCIs for the first year of the 2-year transition and summarized GAFs are displayed in Addenda D and E to this proposed rule.

3. Payment Localities

The current PFS locality structure was developed and implemented in 1997. There are currently 89 localities; 34 localities are Statewide areas. There are 52 localities in the other 18 States, with 10 States having 2 localities, 2 States having 3 localities, 1 State having 4 localities, and 3 States having 5 or more localities. The District of Columbia, Maryland, and Virginia suburbs, Puerto Rico, and the Virgin Islands are additional localities that make up the remainder of the total of 89 localities. The development of the current locality structure is described in detail in the CY 1997 PFS proposed rule (61 FR 34615) and the subsequent final rule with comment period (61 FR 59494).

As we have previously noted in the CYs 2008 and 2009 proposed rules (72 FR 38139 and 73 FR 38513), any changes to the locality configuration must be made in a budget neutral manner within a State and can lead to significant redistributions in payments. For many years, we have not considered making changes to localities without the support of a State medical association in order to demonstrate consensus for the change among the professionals whose payments would be affected (with some increasing and some decreasing). However, we have recognized that, over time, changes in demographics or local economic conditions may lead us to conduct a more comprehensive

examination of existing payment localities.

For the past several years, we have been involved in discussions with physician groups and their representatives about recent shifts in relative demographics and economic conditions, most notably within the current California payment locality structure. We explained in the CY 2008 PFS final rule with comment period that we intended to conduct a thorough analysis of potential approaches to reconfiguring localities and would address this issue again in future rulemaking. For more information, we refer readers to the CY 2008 PFS proposed rule (72 FR 38139) and subsequent final rule with comment period (72 FR 66245).

As a follow-up to the CY 2008 PFS final rule with comment period, we contracted with Acumen to conduct a preliminary study of several options for revising the payment localities on a nationwide basis. The contractor's interim report was posted on the CMS Web site on August 21, 2008, and we requested comments from the public. The report entitled, "Review of Alternative GPCI Payment Locality Structures," remains accessible from the CMS PFS Web page under the heading "Interim Study of Alternative Payment Localities under the PFS." The report may also be accessed directly from the following link: *http://www.cms.hhs.gov/PhysicianFeeSched/10_Interim_Study.asp#TopOfPage.*

We accepted public comments on the interim report through November 3, 2008. The alternative locality configurations discussed in the report are described briefly below in this section.

Option 1: CMS Core-Based Statistical Area (CBSA) Payment Locality Configuration

This option uses the Office of Management and Budget (OMB's) Metropolitan Statistical Area (MSA) designations for the payment locality configuration. MSAs would be considered as urban CBSAs. Micropolitan Areas (as defined by OMB) and rural areas would be considered as non-urban (rest of State) CBSAs. This approach would be consistent with the IPPS pre-reclassification CBSA assignments and with the geographic payment adjustments used in other Medicare payment systems. This option would increase the number of PFS localities from 89 to 439.

Option 2: Separate High-Cost Counties From Existing Localities (Separate Counties)

Under this approach, higher cost counties are removed from their existing locality structure and they would each be placed into their own locality. This option would increase the number of PFS localities from 89 to 214, using a 5 percent GAF differential to separate high-cost counties.

Option 3: Separate MSAs From Statewide Localities (Separate MSAs)

This option begins with statewide localities and creates separate localities for higher cost MSAs (rather than removing higher cost counties from their existing locality as described in Option 2). This option would increase the number of PFS localities from 89 to 130, using a 5 percent GAF differential to separate high-cost MSAs.

Option 4: Group Counties Within a State Into Locality Tiers Based on Costs (Statewide Tiers)

This option creates tiers of counties (within each State) that may or may not be contiguous but share similar practice costs. This option would increase the number of PFS localities from 89 to 140, using a 5 percent GAF differential to group similar counties into statewide tiers.

As discussed in Acumen's interim report, all four studied alternative locality configurations would increase the number of localities and separate higher cost areas from rural "rest of state" areas. As a result, payments to urban areas would increase, while rural areas would see a decrease in payment because they would no longer be grouped with higher cost "urbanized" areas. A number of public commenters on the draft report expressed support for Option 3 (separate MSAs from Statewide localities) because the commenters believed this alternative would improve payment accuracy over the current locality configuration and could mitigate possible payment reductions to rural areas as compared to Option 1 (CMS CBSAs). Therefore, Acumen is conducting a more in-depth analysis of the dollar impacts that would result from the application of Option 3.

For a detailed discussion of the public comments on the contractor's interim locality study report, we refer readers to the CY 2010 PFS proposed rule (74 FR 33534) and subsequent final rule with comment period (74 FR 61757).

E. PFS Update for CY 2010

1. Rebasing and Revising of the Medicare Economic Index (MEI)

a. Background

The Medicare Economic Index (MEI) is required by section 1842(b)(3) of the Act, which states that prevailing charge levels beginning after June 30, 1973 may not exceed the level from the previous year except to the extent that the Secretary finds, on the basis of appropriate economic index data, that such higher level is justified by year-to-year economic changes. Beginning July 1, 1975, and continuing through today, the MEI has met this requirement by reflecting the weighted-average annual price change for various inputs needed to provide physicians' services. The MEI is a fixed-weight input price index, with an adjustment for the change in economy-wide, private nonfarm business multifactor productivity. This index is comprised of two broad categories: (1) Physician's own time; and (2) physician's practice expense (PE).

The current form of the MEI was detailed in the November 25, 1992 **Federal Register** (57 FR 55896) and was based in part on the recommendations of a Congressionally-mandated meeting of experts held in March 1987. Since that time, the structure of the MEI has remained essentially unchanged, with three exceptions. First, the MEI was rebased in 1998 (63 FR 58845), which moved the cost structure of the index from 1992 data to 1996 data. Second, the methodology for the productivity adjustment was revised in the CY 2003 PFS final rule (67 FR 80019) to reflect the percentage change in the 10-year moving average of economy-wide private nonfarm business multifactor productivity. Third, the MEI was rebased in 2003 (68 FR 63239), which moved the cost structure of the index from 1996 data to 2000 data.

We are proposing to rebase and revise the MEI and incorporate it into the CY 2011 PFS update. The terms "rebasing" and "revising", while often used interchangeably, actually denote different activities. Rebasing refers to moving the base year for the structure of costs of an input price index, while revising relates to other types of changes such as changing data sources, cost categories, or price proxies used in the input price index. As is always the case with a rebasing and revising exercise, we have attempted to use the most recently available, relevant, and appropriate information to develop the proposed MEI cost category weights and price proxies. In the following sections

of this proposed rule, we detail our proposals regarding the updated cost weights for the MEI expense categories, our rationale for selecting the price proxies in the MEI, and the results of the proposed rebasing and revising of the MEI.

b. Use of More Current Data

The MEI was last rebased and revised in 2003 in the CY 2004 PFS final rule with comment period (68 FR 63239). The current base year for the MEI is 2000, which means that the cost weights in the index reflect physicians' expenses in 2000. However, we believe it is desirable to periodically rebase and revise the index so that the expense shares and their associated price proxies reflect more current conditions. For this reason, we propose to rebase the MEI to reflect appropriate physicians' expenses in 2006.

We are proposing several changes to the expenses that are eligible to be included in the MEI. For instance, we are proposing to remove all costs related to drug expenses as drugs are not paid for under the PFS nor are they included in the definition of "physicians' services" for purposes of the Sustainable Growth Rate (SGR) system that is used to update the PFS. The details of the decision regarding the removal of physician-administered drugs from the SGR system can be found in the CY 2010 PFS proposed rule and finalized in the CY 2010 final rule with comment period (74 FR 33651 and 74 FR 61961, respectively). Additionally, we are proposing to remove costs associated with separately billable supplies. The rationale for removing the separately billable supplies is discussed further below in section III.E.1.X of this proposed rule.

We are proposing to revise the cost categories in the MEI by expanding the Office Expense category into nine detailed categories with additional price proxies associated with these categories. Additionally, we will continue to adjust the MEI for economy-wide multifactor productivity based on the 10-year moving average of total private nonfarm business multi-factor productivity.

c. Rebasing and Revising Expense Categories in the MEI

The MEI is used in conjunction with the SGR system to update the PFS and represents the price component of that update. The proposed expense categories in the index, along with their respective weights, are primarily derived from data collected in the 2006 AMA Physician Practice Information Survey (PPIS) for self-employed physicians and selected self-employed non-Medical Doctor (non-MD) specialties. We included data from the following specialties in the MEI cost weight calculations (optometrists, oral surgeons, podiatrists, and chiropractors) consistent with the definition of the term "physician" in section 1861(r) of the Act. In summary, the term "physician" when used in connection with the performance of functions or actions an individual is legally authorized to perform means the following: (1) A doctor of medicine or osteopathy; (2) a doctor of dental surgery or of dental medicine; (3) a doctor of podiatric medicine; (4) a doctor of optometry; or (5) a chiropractor. For a complete definition, please see section 1861(r) of the Act. We weighted the expense data from the above-referenced specialties with the self-employed physician expense data using physician counts by specialty.

The AMA data from the PPIS were used to determine expenditure weights for total expenses, physicians' earnings, physicians' benefits, employed physician payroll, nonphysician compensation, office expenses, professional liability insurance (PLI), medical equipment, medical supplies, and all other expenses. To further disaggregate into subcategories reflecting more detailed expenses, we used data from the 2002 Bureau of Economic Analysis (BEA) Benchmark Input-Output table (I/O), the 2006 Bureau of the Census Current Population Survey (CPS), the 2006 Bureau of Labor Statistics (BLS) Occupational Employment Survey (OES) and Employment Cost for Employee Compensation Survey (ECEC), and the 2006 Internal Revenue Service (IRS) Statistics of Income (SOI) data. The development of each of the cost categories using these sources is described in detail below.

(1) Developing the Weights for Use in the MEI

Developing a rebased and revised MEI requires selecting a base year and determining the appropriate expense categories. We are proposing to rebase the MEI to CY 2006. We choose CY 2006 as the base year for two primary reasons: (1) CY 2006 is the most recent year for which data were available; and (2) we believe that the CY 2006 data provide a representative distribution of physicians' compensation and PEs.

Compared to the 2000-based MEI, we are proposing to include 9 new cost categories (along with their respective weights) that disaggregate the costs under the broader Office Expenses cost category. The 2000-based MEI did not break these expenses into individual categories. A more detailed discussion is provided below in this section. In addition, we are proposing to exclude the Pharmaceutical cost category as pharmaceuticals are neither paid for under the PFS nor are they included in the definition of "physicians' services" for purposes of calculating the physician update via the SGR system (for more details see the CY 2010 PFS final rule with comment period (74 FR 61961 through 61962)). Lastly, we are proposing to exclude the expenses associated with separately billable supplies since these items are not paid for under the PFS.

We determined the number and composition of expense categories based on the criteria used to develop the current MEI and other CMS input price index expenditure weights. These criteria are timeliness, reliability, relevance, and public availability. Table 24 lists the set of mutually exclusive and exhaustive cost categories that make up the proposed rebased and revised MEI.

TABLE 24—PROPOSED 2006 MEI COST CATEGORIES, WEIGHTS, AND PRICE PROXIES COMPARED TO THE 2000 MEI COST CATEGORIES AND WEIGHTS

Cost category	Proposed 2006–expense weights [1] [2]	2000 Expense weights	Proposed 2006 price proxies
Total	100.00	100.000	
Physician's Own Time [3]	48.266	52.466	
Wages and Salaries	43.880	42.730	AHE Total Nonfarm Private.[5]

TABLE 24—PROPOSED 2006 MEI COST CATEGORIES, WEIGHTS, AND PRICE PROXIES COMPARED TO THE 2000 MEI COST CATEGORIES AND WEIGHTS—Continued

Cost category	Proposed 2006–expense weights [1] [2]	2000 Expense weights	Proposed 2006 price proxies
Benefits [3] [4]	4.386	9.735	ECI–Benefits Total Nonfarm Private.[6]
Physician's Practice Expense	51.734	47.534	
Nonphysician Employee Compensation	19.153	18.654	
Nonphysician Employee Wages and Salaries	13.752	13.809	
Prof/Tech Wages	6.006	5.887	ECI–Wages/Salaries: Private Professional &Technical.
Managerial Wages	1.446	3.333	ECI–Wages/Salaries: Private Managerial.
Clerical Wages	4.466	3.892	ECI–Wages/Salaries: Private Clerical.
Services Wages	1.834	0.696	ECI–Wages/Salaries: Private Service.
Nonphysician Employee Benefits [4]	5.401	4.845	ECI–Ben: Private Blend.
Office Expenses	20.035	12.209	
Utilities	1.139	.....	CPI Fuel & Utilities.[7]
Chemicals	0.679	.....	PPI for Other Basic Organic Chemical Manufacturing PPI325190.[8]
Paper	0.616	.....	PPI for converted paper.
Rubber & Plastics	0.563	.....	PPI for rubber and plastics.
Telephone	1.415	.....	CPI for Telephone Services.
Postage	0.661	.....	CPI for Postage.
All Other Labor-Related	4.718	.....	ECI Compensation Services Occupations (ECIPCSONS).
Fixed Capital	8.410	.....	CPI for Owner's Equivalent Rent.
Moveable Capital	1.834	.....	PPI for Machinery and Equipment.
PLI	4.295	3.865	CMS–Prof. Liab. Phys. Premiums.
Medical Equipment	1.978	2.055	PPI–Medical Instruments & Equip.
Pharmaceuticals and Medical Materials and Supplies	1.760	4.320	
Pharmaceuticals	.....	2.309	
Medical Materials and Supplies	1.760	2.011	PPI Surg. Appliances and Supplies/CPI(U) Med Supplies.
Other Professional Expenses	4.513	6.433	CPI–U All Items Less Food and Energy.

(1) Due to rounding, weights may not sum to 100.000 percent.
(2) Sources: 2006 Physician Practice Information Survey (PPIS), Center for Health Policy Research, American Medical Association; 2006 Employment Cost for Employee Compensation, U.S. Department of Labor, Bureau of Labor Statistics; 2006 Occupational Employment Statistics (OES), BLS; U.S. Department of Commerce, Bureau of Economic Analysis 2002 Benchmark Input Output Tables, and U.S. Department of Commerce, Bureau of the Census, 2006 Current Population Survey.
(3) Includes employed physician payroll.
(4) Includes paid leave.
(5) Average Hourly Earnings (AHE).
(6) Employment Cost Index (ECI).
(7) Consumer Price Index (CPI).
(8) Producer Price Index (PPI).

The development of each of the cost categories in the proposed 2006 MEI is described, in detail, below.

(2) Physician's Own Time

The component of the MEI that reflects the physician's own time is represented by the net income portion of business receipts. The proposed 2006 cost weight associated with the physician's own time (otherwise referred to as the Physician's Compensation cost weight) is based on 2006 AMA PPIS data for mean physician net income (physician compensation) for self-employed physicians and for the selected self-employed specialties referenced previously in this rule.

We are proposing to continue to add employed physician compensation to self-employed physician compensation in order to calculate an aggregate Physician Compensation cost weight. By including the compensation of employed physicians in the physician compensation expense category, these expenses will be adjusted by the appropriate price proxies for a physician's own time. The proposed 2006 Physician Compensation cost weight is 48.266 percent as compared to a 52.466 percent share in the 2000-based MEI. We split the physician compensation component into subcategories: Wages & Salaries and Benefits. For Physician Compensation, the ratio for Wages & Salaries and Benefits was calculated using data from the PPIS. Self-employed physician wages & salaries accounted for 92.3 percent of physician earnings while physician benefits accounted for the remaining 7.8 percent. For employed physician payroll, the distribution for wages & salaries and benefits for 2006 was 85.8 percent and 14.2 percent, respectively. This ratio was determined by calculating a weighted average of available SOI data for partnerships, corporations, and S-corporations specific to physicians and outpatient care centers. Based on these proposed methods, the proposed 2006 Physician Wages & Salaries cost weight is 43.880 percent and the proposed 2006

Physician Benefits cost weight is 4.386 percent.

(3) Physician's Practice Expenses

To determine the remaining individual Practice Expenses cost weights, we use mean expense data from the 2006 PPIS survey. The detailed explanations for the derivation of the individual weights under Practice Expenses are listed below.

(A) Nonphysician Employee Compensation

The cost weight for Nonphysician Employee Compensation was developed using the 2006 AMA PPIS mean expenses for these costs. We further divided this cost share into Wages & Salaries and Benefits using 2006 BLS Employer Costs for Employee Compensation (ECEC) data for the Health Care and Social Assistance (private industry). Although this survey does not contain data specifically for offices of physicians, data are available to help determine the shares associated with wages & salaries and benefits for private industry health care and social assistance services (which include hospitals, nursing homes, offices of physicians, and offices of dentists). We believe these data provide a reasonable estimate of the split between wages and benefits for employees in physicians' offices. Data for 2006 in the ECEC for Health Care and Social Assistance indicate that wages and benefits are 71.8 percent and 28.2 percent of compensation, respectively. The 2000-based MEI included a wage and benefit split of 74.0 percent and 26.0 percent of compensation.

As in the 2000-based MEI, we are proposing to use 2006 Current Population Survey (CPS) data and 2006 BLS Occupational Employment Statistics (OES) data to develop cost weights for wages for nonphysician occupational groups. We determined total annual earnings for offices of physicians using employment data from the CPS and mean annual earnings from the OES. To arrive at a distribution for these separate categories, we determined annual earnings for each of the four categories (which are Professional & Technical workers, Managers, Clerical workers, and Service workers), using the Standard Occupational Classification (SOC) system. We then determined the overall share of the total for each. The proposed distribution, as well as the distribution from the 2000-based MEI are presented in Table 25.

TABLE 25—PERCENT DISTRIBUTION OF NONPHYSICIAN PAYROLL EXPENSE BY OCCUPATIONAL GROUP: 2006 AND 2000

BLS Occupational Group	2006 Expenditure shares	2000 Expenditure shares
Total	100.000	100.000
Professional & Technical Workers	43.671	42.635
Managers	10.517	24.138
Clerical Workers	32.477	28.187
Service Workers	13.336	5.040

Values may not sum to 100 due to rounding.

The decrease in the Management expenditure share is directly related to a decrease in the total number of employees in Management occupations in physicians' offices, in particular, "Medical and health service managers." The decrease in expenditure share may also be due, in part to the methods used in this rebasing. That is, for the 2006-based MEI, we are using data limited to "Offices of physicians." In the 2000-based version of the index, the only data that were available to inform these estimates were inclusive of physician offices and clinics ("Offices of physicians and clinics"). An examination of 2006 CPS and OES data comparing "Outpatient care centers" to "Offices of physicians" indicates that there is a higher share of management occupations in the "Outpatient care centers" than in "Offices of physicians."

The increase in the Service Workers expenditures share is attributable to a substantive increase in the number of employees in service occupations, particularly, "Medical assistants and other health care support occupations".

(B) Office Expenses

The aggregate Office Expenses cost weight was derived using the 2006 AMA PPIS and is explained in more detail below in this section. This calculation resulted in a 20.035 percent share of total costs in 2006 compared to a 12.209 percent share in the 2000-based index.

For the 2006-based MEI, we propose to further disaggregate the Office Expenses into more detailed cost categories using the BEA 2002–Benchmark I/O data for Offices of physicians, dentists, and other health practitioners (NAICS 621A00). We used this data to develop the nine detailed 2002 costs weights as a percent of total office expenses, as measured by the BEA I/O data. The total Office Expenses cost category was calculated by matching the BEA I/O data as closely as possible to the AMA survey data, the latter of which defined office expenses as "office (non-medical) equipment and office (non-medical) supplies, as well as rent, mortgage, interest, maintenance, refrigeration, storage, security, janitorial, depreciation on medical buildings used in your practice, utilities, or other office computer systems (including information management systems/electronic medical record systems) and telephone."

We then aged the 2002 weights forward to 2006 to derive the 2006 detailed office expense cost weights as a percent of total Office Expenses. The methodology we used to age the data forward involved applying the annual price changes from each respective price proxy to the appropriate cost categories. We repeated this practice for each year of the interval. We then applied the resulting 2006 distributions to the aggregate 2006 AMA Office Expenses weight to yield the detailed 2006 Office Expenses' weights as a percent of total expenses.

We are proposing to introduce these new, more detailed weights for the 2006-based index based on our intent to derive an increased level of precision while maintaining appropriate levels of aggregation in the market basket. The proposed proxies are described in section X. of this proposed rule. The following is a description of what is included in each of the detailed cost categories.

- *Utilities:* The Utilities cost weight includes expenses classified in the fuel,

oil and gas, water and sewage, and electricity industries. The proposed cost weight for utilities is 1.139 percent.

• *Paper:* The Paper cost weight includes expenses classified in the paper (including but not limited to paper, paperboard, and sanitary paper products) and printing industries. The proposed cost weight for paper is 0.616 percent.

• *Chemicals:* The Chemicals cost weight includes expenses classified in the basic organic and inorganic chemical manufacturing industry (accounting for about 45 percent of the chemical expenses), as well as other chemical industries including but not limited to industrial gas manufacturing and all other chemical product manufacturing. The proposed cost weight for chemicals is 0.679 percent.

• *Rubber and Plastics:* The Rubber and Plastics cost weight includes expenses classified in the rubber and plastic industries, including but not limited to, urethane and other foam product manufacturing and other plastic and rubber manufacturing industries. The proposed cost weight for Rubber and Plastics is 0.563 percent.

• *Telephone:* The telephone cost weight includes expenses classified in the telecommunications (accounting for the majority of the telephone expenses) and cable industries. The proposed cost weight for Telephone services is 1.415 percent.

• *Postage:* The Postage cost weight includes postal service expenses. The proposed cost weight for Postage is 0.661 percent.

• *All Other Services:* The All Other Services cost weight includes other service expenses including, but not limited to, nonresidential maintenance and repair, machinery repair, janitorial, and security services. This cost weight does not include expenses associated with professional services such as accounting, billing, legal and marketing which are included in the All Other Expenses cost weight derived using the AMA PPIS survey. The proposed cost weight for All Other Services is 4.718 percent.

• *Fixed Capital:* The Fixed Capital cost weight includes expenses for building leases and depreciation. The proposed cost weight for Fixed Capital is 8.410 percent.

• *Moveable Capital:* The Moveable Capital cost weight includes expenses for non-medical equipment including but not limited to, computer equipment and software, as well as the rental and leasing of automotive and industrial machinery equipment. The proposed cost weight for Moveable Capital is 1.834 percent.

(C) Professional Liability Insurance (PLI) Expense

The weight for PLI expense was derived from the 2006 AMA survey and was calculated as the mean PLI expense expressed as a percentage of total expenses. This calculation resulted in a 4.513 percent share of total costs in 2006 compared to a 3.865 percent share in the 2000-based index. The increase in the weight for PLI reflects the current prices of premiums, as well as an update to the level of coverage purchased by physicians in 2006 compared to 2000.

(D) Medical Equipment Expenses

The proposed weight for Medical Equipment was calculated using the 2006 AMA PPIS mean expense data. This calculation resulted in a 1.978 percent share of total costs in 2006 compared to a 2.055 percent share in the 2000-based index. By definition, this category includes the expenses related to depreciation, maintenance contracts, leases/rental of medical equipment used in diagnosis or treatment of patients. The category would also include the tax-deductible portion of the purchase price or replacement value of medical equipment, if not leased.

(E) Medical Supplies Expenses

The proposed weight for Medical Supplies was calculated using the 2006 AMA PPIS mean expense data. This calculation resulted in a 1.760 percent share of total costs in 2006 compared to a 2.011 percent share in the 2000-based index. By definition, this category includes the expenses related to medical supplies such as sterile gloves, needles, bandages, specimen containers, and catheters. Additionally, we are proposing to exclude the expenses related to separately billable supplies as these expenses are not paid for under the PFS. The Medical Supply cost category does not include expenses related to drugs.

(F) All Other Professional Expenses

The proposed weight for All Other Professional expenses was calculated using the 2006 AMA PPIS mean expense data. This calculation resulted in a 4.513 percent share of total costs in 2006 compared to a 6.433 percent share in the 2000-based index. By definition, this category includes the expenses related to tax-deductible expenses for any other expenses not reported in another category from the PPIS. These expenses would include fees related to legal, marketing, accounting, billing, office management services, professional association memberships, maintenance of certification or licensure, journals and continuing education, professional car upkeep and depreciation, and any other professional expenses not reported elsewhere on the PPIS.

d. Selection of Price Proxies for Use in the MEI

After the proposed 2006 cost weights for the rebased and revised MEI were developed, we reviewed all of the price proxies to evaluate their appropriateness. As was the case in the development of the 2000-based MEI (68 FR 63239), most of the proxy measures we considered are based on BLS data and are grouped into one of the following five categories:

• *Producer Price Indices (PPIs):* PPIs measure price changes for goods sold in markets other than retail markets. These fixed-weight indexes are a measure of price change at the intermediate or final stage of production. They are the preferred proxies for physician purchases as these prices appropriately reflect the product's first commercial transaction.

• *Consumer Price Indices (CPIs):* CPIs measure change in the prices of final goods and services bought by consumers. Like the PPIs, they are fixed-weight indexes. Since they may not represent the price changes faced by producers, CPIs are used if there are no appropriate PPIs or if the particular expenditure category is likely to contain purchases made at the final point of sale.
