**McGinnis, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

July 6, 2010.

On September 29, 2009, McGinnis, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Wilson Hydrokinetic Project, to be located on the Tennessee River downstream of the Tennessee Valley Authority (TVA) and the Corps of Engineers' (COE) existing Wilson Lock & Dam in Lauderdale and Colbert County, Alabama. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary

permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Wilson Hydrokinetic Project consists of: (1) 10 proposed 35 kilowatt axial flow turbine generating units having a total installed capacity of 350 kilowatts; (2) a 700-foot-long, 13.2 kilovolt transmission line; and (3) appurtenant facilities. The proposed Wilson Hydrokinetic Project would have an average annual generation of 1.533 gigawatt-hours.
