on voluntary reporting of unsafe events; and (d) opinions and observations about the operation of C3RS at their work site. It is estimated that the survey will take no more than 30 minutes to complete for a maximum total burden of 1,800 hours (3,600 respondents * 30 minutes / 60 = 1,800 hours). The survey will be administered at three pilot sites within three to four years resulting in an average annual burden of 600 hours (1,800/3).

ADDRESS: The agency seeks public comments on its proposed information collection. Comments should address whether the information will have practical utility; the accuracy of the agency’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street NW., Washington, DC 20503; Attention: RITA/BTS Desk Officer.

Issued in Washington, DC, on this 16th day of July 2010.

Steven D. Dillingham,
Director, Bureau of Transportation Statistics, Research and Innovative Technology Administration.

Airborne Area Navigation Equipment Using Loran-C Inputs

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Notice of cancellation of: (1) Loran-C navigation system Technical Standard Orders (TSO); and (2) the revocation of Loran-C navigation system TSO Authorizations (TSOA), and request for public comment.

SUMMARY: This notice announces the cancellation of Technical Standard Order (TSO) C–60, Airborne Area Navigation Equipment Using Loran-C inputs and all subsequent revisions. The effect of the cancelled TSOs will result in the revocation of all TSOAs issued for the production of those navigational systems. These actions are necessary because the Loran-C Navigation System ceased operation on February 8, 2010.

DATES: Comments must be received on or before August 23, 2010

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Bridges, AIR–130, Federal Aviation Administration, 470 L’Enfant Plaza, Suite 4102, Washington, DC 20024. Telephone (202) 385–4627, fax (202) 385–4651, e-mail to: kevin.bridges@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

You are invited to comment on the cancellation of the TSO and the revocation of the associated TSOAs by submitting written data, views, or arguments to the above address. Comments received may be examined, both before and after the closing date, at the above address, weekdays except federal holidays, between 8:30 a.m. and 4:30 p.m. The Director, Aircraft Certification Service, will consider all comments received on or before the closing date.

Background

The Loran-C navigation system ceased transmitting usable signals on February 8, 2010. Because the Loran-C system ceased operation, the FAA intends to cancel all Loran-C Technical Standard Orders and revoke all associated Technical Standard Order Authorizations (TSOA).

The FAA database contains one (1) specific TSO requiring the Loran-C system as a means of navigation, and numerous TSOAs issued for the design and manufacture of Loran-C avionics equipment. This announcement serves as notice to all Loran-C TSOA holders that the FAA intends to cancel all TSOs (including active historical TSOs) and revoke all TSOAs for Loran-C avionics equipment.

Issued in Washington, DC, on July 13, 2010.

Susan J.M. Cabler,
Assistant Manager, Aircraft Engineering Division, Aircraft Certification Service.

Notice of Availability of a Final Environmental Assessment (Final EA) and Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for the Proposed ORD Airport Surveillance Radar, Model 9, West Chicago, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability of a Final Environmental Assessment (Final EA) and Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for the Proposed ORD Airport Surveillance Radar, Model 9, West Chicago, Illinois.

SUMMARY: The Federal Aviation Administration (FAA) is issuing this notice to advise the public that the FAA has prepared, and approved on May 4, 2010, a Finding of No Significant Impact (FONSI)/Record of Decision (ROD) based on the Final Environmental Assessment (Final EA) for the Proposed ORD Airport Surveillance Radar, Model 9 (ASR–9), in West Chicago, Illinois. The FAA prepared the Final EA in accordance with the National Environmental Policy Act and the FAA’s regulations and guidelines for environmental documents and was signed on April 16, 2010. Copies of the FONSI/ROD and/or Final EA are available by contacting Ms. Virginia Marcks through the contact information provided below.

FOR FURTHER INFORMATION CONTACT: Ms. Virginia Marcks, Manager, Infrastructure Engineering Center, AJW–C14D, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. Telephone number: (847) 294–7494.

SUPPLEMENTARY INFORMATION: The Final EA evaluated the construction and operation of the new ORD ASR–9 at DuPage Airport (DPA) in West Chicago, Illinois. The purpose and need of the ORD West ASR–9 is to enhance air traffic management for ORD to achieve the benefits of providing expanded radar coverage that would allow terminal air traffic control for additional new approach routes (West High and Wide approaches), as evaluated and approved in the O’Hare Modernization Environmental Impact Statement (EIS) and ROD.

The proposed ASR–9 would be constructed at a 200 foot (ft) × 200 ft area located west of the intersection of Kress Road and Western Drive on land leased from DPA. The total height of the ASR–9 tower structure would be 116 ft above ground level. The ASR–9 system consists of a tower, a rotating radar sail that transmits and receives the radio signals, an equipment building housing radar equipment, and an emergency generator with an aboveground storage tank for diesel fuel. One moving target indicator reflector and two Calibration and Performance Monitoring Equipment modules would be located at least 1 nautical mile from the preferred ASR–9 site. The FAA would construct a 24 ft wide × 400 ft long access road to the
ASR–9 site from Kress Road. The access road would be within a 30 ft wide access easement that would also contain underground utility lines. The access road and radar site together comprise 1.2 acres total land needed to construct the ASR–9 facility.

The Final EA has been prepared in accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, and FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures.” In addition, FAA Order 5050.4B, “National Environmental Policy Act (NEPA) Implementing Instructions for Airport Actions” has been used as guidance in the preparation of the environmental analysis.

Virginia Marcks,
Manager, Infrastructure Engineering Center, Chicago, AJW–C14D, Federal Aviation Administration.

Notice of Availability of a Final Environmental Assessment (Final EA) and a Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for a Proposed Airport Traffic Control Tower and Base Building at Kalamazoo/Battle Creek International Airport, Portage City, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability of a Final Environmental Assessment (Final EA) and Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for a Proposed Airport Traffic Control Tower and Base Building at Kalamazoo/Battle Creek International Airport, Portage City, Michigan.

SUMMARY: The Federal Aviation Administration (FAA) is issuing this notice to advise the public that the FAA has prepared, and approved on April 9, 2010, copies of the FONSI/ROD and/or Final EA are available by contacting Ms. Virginia Marcks through the contact information provided below.

FOR FURTHER INFORMATION CONTACT: Ms. Virginia Marcks, Manager, Infrastructure Engineering Center, AJW–C14D, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. Telephone number: (847) 294–7494.

SUPPLEMENTARY INFORMATION: The Final EA evaluated the construction and operation of a new ATCT at AZO. The ATCT would be located on vacant land in the northeast quadrant of AZO, east of Runway 17/35 and between Runways 23 and 27. The ATCT site will occupy approximately 9.28 acres, and is 857 feet above mean sea level. The new ATCT will be a Low Activity Level facility with a 395-square-foot cab accommodating two operational positions and two support positions. The new ATCT will improve visibility of airport surfaces, have the capability to meet future operational and administrative expansion requirements, and increase the efficient functionality of the facility. In addition to the ATCT, the Final EA evaluated the construction and operation of a new 20,000-square-foot standard design Terminal Radar Approach Control Facility/Base Building conforming to the guidelines of the Terminal Facilities Design Standards for Base Building and Environmental Support Buildings with modified space designations and minor room sizing. The Base Building would meet current and future administrative space requirements. The project also includes, and the Final EA evaluated, construction of a paved parking area next to the Base Building, relocation of a portion of the existing airport perimeter road approximately 40 feet to the west of its current location, construction of a new paved access drive from East Kilgore Road to the ATCT site, construction of a 10-foot fence around the entire facility and a new fence from East Kilgore Road to the facility, Dopplerization of the Very High Frequency Omni-Directional Range facility, lease of the ATCT parcel from the airport, approval of Federal funding for the project, and update of the Airport Layout Plan.

The Final EA has been prepared in accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, and FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures.” In addition, FAA Order 5050.4B, “National Environmental Policy Act (NEPA) Implementing Instructions for Airport Actions” has been used as guidance in the preparation of the environmental analysis.

Virginia Marcks,
Manager, Infrastructure Engineering Center, Chicago, AJW–C14D, Federal Aviation Administration.

Notice of Availability of a Final Environmental Assessment (Final EA) and a Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for the Proposed Airport Development at Sawyer County Airport, Hayward, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability of a Final Environmental Assessment (Final EA) and Finding of No Significant Impact (FONSI)/Record of Decision (ROD) for the Proposed Airport Development at Sawyer County Airport, Hayward, Wisconsin.

SUMMARY: The Federal Aviation Administration (FAA) is issuing this notice to advise the public that the FAA has prepared, and approved on May 16, 2010, a Finding of No Significant Impact (FONSI)/Record of Decision (ROD) based on the Final Environmental Assessment (Final EA) for the Proposed Airport Development at Sawyer County Airport, Hayward, Wisconsin. The FAA prepared the Final EA in accordance with the National Environmental Policy Act and the FAA’s regulations and guidelines for environmental documents. The Final EA was reviewed and evaluated by the FAA, and was accepted on February 16, 2010 as a Federal document by the FAA’s Responsible Federal Official. Copies of the FONSI/ROD and/or Final EA are available by contacting Ms. Virginia Marcks through the contact information provided below.

FOR FURTHER INFORMATION CONTACT: Ms. Virginia Marcks, Manager, Infrastructure Engineering Center, AJW–C14D, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. Telephone number: (847) 294–7494.

SUPPLEMENTARY INFORMATION: The Final EA evaluated the Proposed Airport Development at Sawyer County Airport
