Background

Section 9 of the ESA and Federal regulations prohibit the “take” of fish and wildlife species listed as endangered or threatened. Under the ESA, the following activities are defined as take: To harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect listed animal species, or to attempt to engage in such conduct (16 U.S.C. 1538). However, under section 10(a) of the ESA, we may issue permits to authorize “incidental take” of listed species. Incidental take is defined by the ESA as that which is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing permits for threatened and endangered species are at 50 CFR 13 and 50 CFR 17.

On December 8, 2009, the U.S. District Court of Maryland ruled that Beech Ridge Energy LLC was in violation of section 9 of the ESA for its potential to take endangered Indiana bats (Myotis sodalis) and its failure to file an application for an incidental take permit related to its wind energy project located in West Virginia. The Court determined that take of Indiana bats was likely over the life of the project via collision with turbines or barotrauma (i.e., hemorrhaging of bats’ lungs in low-pressure areas surrounding operating turbine blades).

The District Court ruled that Beech Ridge Energy LLC’s construction and operation of wind turbines (40 in construction at the time, with a total of 124 hoped for by the end of 2010) would violate section 9 of the ESA unless and until the defendants, Beech Ridge Energy LLC, obtained an incidental take permit. The Court enjoined Beech Ridge Energy LLC from building additional turbines beyond the 40 already under construction, and restricted turbine operation to the bat hibernation season (November 15 to March 31) until Beech Ridge Energy LLC obtains an incidental take permit. The Court also invited the parties to confer on whether they could agree on terms for further turbine operation while Beech Ridge Energy LLC pursued an incidental take permit.
