

effectiveness and has requested NRC's approval of the proposed action.

The Need for the Proposed Action

The proposed action is needed to allow an increase in NLO staffing from two to four, allow in-plant protective actions to be performed by personnel assigned other functions, and replace a Mechanical Maintenance person with a NLO. According to the licensee, increasing the number of NLO staffing improves the response of site personnel whose emergency plan role is to assist with operator and maintenance response to the emergency event and provides an increased number of personnel for repair and corrective actions.

Environmental Impacts of the Proposed Action

The NRC has completed its environmental assessment of the proposed changes to the Clinton Power Station Emergency Plan. The staff has concluded that the changes would not significantly affect plant safety and would not have a significant adverse effect on the probability of an accident occurring. The proposed action would not result in an increased radiological hazard beyond those previously analyzed in the updated safety analysis report. There will be no change to radioactive effluents that effect radiation exposures to plant workers and members of the public. The proposed action is an administrative change related to plant personnel work assignments. No changes will be made to plant buildings or the site property. Therefore, no changes or different types of radiological impacts are expected as a result of the proposed action.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity of the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historical and cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or different types of non-radiological environmental impacts are expected as a result of the proposed action. Accordingly, the NRC concludes that there are no significant

environmental impacts associated with the proposed action.

The details of the staff's safety evaluation will be provided as part of the letter to the licensee approving issuance of the license amendment.

Environmental Impacts of the Alternatives to the Purposed Action

As an alternative to the proposed actions, the staff considered denial of the proposed actions (i.e., the "no-action" alternative). Denial of the license amendment request would result in no change in current environmental impacts. The environmental impacts of the proposed license amendment and the "no action" alternative are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those considered in the Final Environmental Statement for the Clinton Power Station, Docket No. 50-461, issued in May, 1982.

Agencies and Persons Consulted

In accordance with its stated policy, on July 7, 2010, the staff consulted with the Illinois State official, Mr. Frank Niziolek of the Illinois Emergency Management Agency, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated April 2, 2010 (ML100950124). Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 1555 Rockville Pike, Rockville, Maryland 20852. NUCLEAR REGULATORY COMMISSION

[NRC-2010-0255]

Office of New Reactors; Proposed Revision 1 to Standard Review Plan; Section 13.5.1.1 on Administrative Procedures—General

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Solicitation of public comment.

SUMMARY: The NRC is soliciting public comment on NUREG-0800, "Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants," on a proposed Revision 1 to Standard Review Plan (SRP), Section 13.5.1.1 on "Administrative Procedures—General," (Agencywide Documents Access and Management System (ADAMS) Accession No. ML101340264). The Office of New Reactors (NRO) is revising SRP Section 13.5.1.1 (Enclosure 1), which updates the initial issuance of this section, dated March 2007, to reflect the changes as shown in the description of changes (ADAMS Accession No. ML101340272). The previous version of this SRP section was published in March 2007 as initial issuance (ADAMS Accession No. ML070550029).

The NRC staff issues notices to facilitate timely implementation of the current staff guidance and to facilitate activities associated with the review of amendment applications and review of design certification and combined license applications for NRO. The NRC staff intends to incorporate the final approved guidance into the next revision of NUREG-0800, SRP Section 13.5.1.1, Revision 1 and Regulatory Guide 1.206, "Combined License Applications for Nuclear Power Plants (LWR Edition)," June 2007.

DATES: Comments must be filed no later than 30 days from the date of publication of this notice in the **Federal Register**. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any one of the following methods.

Please include Docket ID NRC-2010-0255 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site at <http://www.regulations.gov>. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.
