#### **SUPPLEMENTARY INFORMATION:**

##### **I. Introduction**

The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide 5.17, "Truck Identification Markings," published in January 1974. Regulatory Guide 5.17 identifies methods acceptable to the NRC staff for complying with the former NRC regulation, 10 CFR 73.31(e) (1973), "Shipment By Road," with regard to markings applied to a road vehicle to enhance its identification from the air.

Specifically, former § 73.31(e) required that vehicles used to transport quantities of special nuclear material by

road be marked on top with identifying letters or numbers which will permit identification of the vehicles under daylight conditions from the air in clear weather at 1,000 feet above ground level. Regulatory Guide 5.17 is no longer needed because the guidance is outdated. Former § 73.31(e) has been deleted (44 FR 68184; November 28, 1979) and the information is now contained in the Department of Transportation (DOT) regulations 49 CFR parts 172 through 180. These DOT regulations specify the shape, color, material, markings, and display locations for all types of hazardous material placards, including radioactive materials. The regulation is prescriptive by nature and these DOT regulations are routinely updated; therefore, reproducing the requirements in a regulatory guide is unnecessarily redundant and could lead to frequently outdated guidance.

##### **II. Further Information**

The withdrawal of Regulatory Guide 5.17 does not alter any prior or existing licensing commitments based on its use. The guidance provided in this regulatory guide is no longer necessary. Regulatory guides may be withdrawn when their guidance is superseded by congressional action or otherwise no longer provides useful information.
