### Foreign Agricultural Service

#### Trade Adjustment Assistance for Farmers

**AGENCY:** Foreign Agricultural Service, USDA.

**ACTION:** Notice.

The Administrator of the Foreign Agricultural Service (FAS) today accepted and began a review of a petition for trade adjustment assistance filed under the FY 2011 Program by three wool producers on behalf of wool producers in Montana. The Administrator will determine within 40 days whether increasing imports of wool contributed importantly to a greater than 15-percent decrease in the average annual price of wool, quantity or production, value of production, or cash receipts, compared to the average of the 3 preceding marketing years. If the determination is affirmative, producers who produce and market wool in Montana will be eligible to apply to the Farm Service Agency for free technical assistance and cash benefits.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for review of an extension of a currently approved collection.

The National Oceanic and Atmospheric Administration (NOAA) collects vessel license, vessel registration, catch, and unloading information from operators of United States (U.S.) purse seine vessels fishing within a large region of the central and western Pacific Ocean. This is governed by the Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America, signed in Port Moresby, Papua New Guinea, in 1987, and its annexes, schedules and implementing agreements, as amended (Treaty). The collection of information is required to meet U.S. obligations under the Treaty.

The Treaty authorizes U.S. tuna vessels to fish within fishing zones of a large region of the Pacific Ocean. The South Pacific Tuna Act of 1988 (16 U.S.C. 973-973r) and U.S. implementing regulations (50 CFR Part 300, Subpart D) authorize the collection of information from participants in the Treaty fishery. Vessel operators who wish to participate in the Treaty Fishery must submit annual vessel license and registration (including registration of vessel monitoring system (VMS) units) applications and periodic written reports of catch and unloading of fish from licensed vessels. They are also required to ensure the continued operation of VMS units on board licensed vessels, which is expected to require periodic maintenance of the units. The information collected is submitted to the Pacific Islands Forum Fisheries Agency (FFA) through the U.S. government, NOAA's National Marine Fisheries Service (NMFS). The license and registration application information is used by the FFA to determine the operational capability and financial responsibility of a vessel operator interested in participating in the Treaty fishery. Information obtained from vessel catch and unloading reports is used by the FFA to assess fishing effort and fishery resources in the region and to track the amount of fish caught within each Pacific island state's exclusive economic zone for fair disbursement of Treaty monies. The maintenance of VMS units is needed to ensure the continuous operation of the VMS units, which, as part of the VMS administered by the FFA, are used as an enforcement tool. If the information is not collected, the U.S. government will not meet its obligations under the Treaty, and the lack of fishing information will result in poor management of the fishery resources.
