Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register**, *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 75 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, September 14, 2010
9 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 75, No. 148
Tuesday, August 3, 2010

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF STATE

22 CFR Parts 40 and 42

[Public Notice: 7085]

Visas: Documentation of Immigrants Under the Immigration and Nationality Act, as Amended

AGENCY: State Department.

ACTION: Final rule.

SUMMARY: This final rule amends the Department of State's regulations related to the application for an immigrant visa and alien registration, to offer a completely electronic application procedure as an alternative to submission of Form DS–230, the Application for Immigrant Visa and Alien Registration.

DATES: This rule is effective August 3, 2010.

FOR FURTHER INFORMATION CONTACT: Andrea Lage, Legislative and Regulations Division, Visa Services, 2401 E Street, NW., Department of State, Washington, DC 20520–0106, (202) 663–1399.

SUPPLEMENTARY INFORMATION:

Why is the Department promulgating this rule?

The Government Paperwork Elimination Act (GPEA) requires that, when possible, Federal agencies use electronic forms, electronic filing, and electronic signatures to conduct business with the public. For this reason, the Department of State developed and introduced an electronic application process for immigrant visa applicants to eventually replace the current paper-based application process, which consists of Parts 1 and 2 of Form DS–230, Application for Immigrant Visa and Alien Registration. While the Department will continue to accept the DS–230 when necessary, it proposes to eventually eliminate the DS–230 entirely and replace it with the DS–260, the Electronic Application for Immigrant Visa and Alien Registration, an electronic form designed to be completed and signed electronically.

What effect does the electronic application process have on the immigrant visa applicant?

The procedure is the same for the immigrant visa applicant except that he or she will not be required to print a form to take to the visa interview. All information entered into the DS–260 will be available to the National Visa Center and to the consular officer at the time of application processing and interviewing, thus simplifying the process for the applicant. The applicant is required to sign the DS–260 electronically at the time of submission by clicking a "Sign and Submit Application" box contained within the application. The applicant will also be required to swear under oath at the time of the interview that the information provided on the DS–260 is true and correct to the best of the individual's knowledge and provide a biometric signature in connection with the oath.

How does the applicant sign the form electronically?

The applicant will be required to click on the box designated "Sign and Submit Application" found within the certification section of the application.

How does the consular officer confirm the identity of an applicant who has submitted an electronic application (DS–260)?

Photos, passports, and fingerscans collected as part of the application process will identify the applicant.

How does the applicant certify that the information on the DS–260 is correct?

By signing the DS–260 electronically (*i.e.,* clicking on the "Sign and Submit Application" button), the applicant certifies that the information provided is correct. The applicant will also be required to swear under oath to statements contained on the DS–260 at the time of the interview and to provide a biometric signature in connection with the oath.

Is the electronic signature binding on an immigrant visa applicant?

Yes. The electronic signature indicates that the applicant is familiar with and intends to be bound by the statements contained in the application and has answered all questions truthfully, under penalty of perjury.

Can a third party prepare the DS–260?

A third party may assist the applicant in preparing the DS–260, however the applicant must electronically sign the application himself or herself. The applicant must identify in the application any third party who has assisted in the preparation of the DS–260.

Regulatory Findings

Administrative Procedure Act

This regulation involves a foreign affairs function of the United States and, therefore, in accordance with 5 U.S.C. 553(a)(1), is not subject to the rule making procedures set forth at 5 U.S.C. 553.

Regulatory Flexibility Act

Because this final rule is exempt from notice and comment rulemaking under 5 U.S.C. 553, it is exempt from the regulatory flexibility analysis requirements set forth at sections 603 and 604 of the Regulatory Flexibility Act (5 U.S.C. 603 and 604). Nonetheless, consistent with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Department certifies that this rule will not have a substantial economic impact on a substantial number of small entities. This regulates individual aliens who seek consideration for immigrant visas and does not affect any small entities, as defined in 5 U.S.C. 601(6).

Unfunded Mandates Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995, Public Law 104–4, 109 Stat. 48, 2 U.S.C. 1532, generally requires agencies to prepare a statement before proposing any rule that may result in an annual expenditure of $100 million or more by State, local, or tribal governments, or by the private sector. This rule will not result in any such expenditure, nor will it significantly or uniquely affect small governments.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by 5 U.S.C. 804, for purposes of congressional review of agency

rulemaking under the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121. The rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based companies to compete with foreign-based companies in domestic or import markets.

Executive Order 12866

The Department of State has reviewed this rule to ensure its consistency with the regulatory philosophy and principals set forth in Executive Order 12866 and had determined that the benefits of the proposed regulation justify the costs. The Department does not consider the rule to be an economically significant action within the scope of section 3(f)(1) of the Executive Order since it is not likely to have an annual effect on the economy of $100 million or more or to adversely affect in a material way the economy, a sector of the economy, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities.

Executive Order 12372 and 13132: Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. Nor will the rule have federalism implications warranting the application of Executive Orders No. 12372 and No. 13132.

Executive Order 12988: Civil Justice Reform

The Department has reviewed this regulation in light of sections 3(a) and 3(b)(2) of Executive Order 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burden.

Paperwork Reduction Act

This rule does not impose any new reporting or record-keeping requirements subject to the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

List of Subjects in 22 CFR Parts 40 and 42

Aliens, Foreign Officials, Immigration, Nonimmigrants, Passports and Visas.

■ Accordingly, for the reasons set forth in the preamble, the Department of State amends 22 CFR Part 40 and 41 as follows:

PART 40—[AMENDED]

■ 1. The authority citation for Part 40 continues to read as follows:

Authority: 8 U.S.C. 1104.

■ 2. Section 40.1 is amended by revising paragraph (l)(2) to read as follows:

§ 40.1 Definitions.

* * * * *

(l) * * *

(2) For an immigrant visa applicant, personally appearing before a consular officer and verifying by oath or affirmation the statements contained on Form DS–230 or Form DS–260 and in all supporting documents, having previously submitted all forms and documents required in advance of the appearance and paid the visa application processing fee.

* * * * *

PART 42—[AMENDED]

■ 3. The authority citation for part 42 continues to read as follows:

Authority: 8 U.S.C. 1104; Pub. L. 107–56, sec. 421.

■ 4. Section 42.63 is revised to read as follows:

§ 42.63 Definitions.

(a) *Application Forms.* (1) *Application on Form DS–230 or Form DS–260 Required.*—Every alien applying for an immigrant visa must make application, as directed by the consular officer, on Form DS–230, Application for Immigrant Visa and Alien Registration, or on Form DS–260, Electronic Application for Immigrant Visa and Alien Registration. This requirement may not be waived. Form DS–230 consists of parts I and II which, together, are meant in any reference to this Form.

(2) *Application of alien under 14 or physically incapable.* The application on Form DS–230 or on Form DS–260 for an alien under 14 years of age or one physically incapable of completing an application may be executed by the alien's parent or guardian, or, if the alien has no parent or guardian, by any person having legal custody of, or a legitimate interest in, the alien.

(b) *Preparation of forms.* The consular officer shall ensure that Form DS–230 or Form DS–260 and all other forms an alien is required to submit are fully and properly completed in accordance with the applicable regulations and instructions.

(c) *Additional information as part of application.* The officer may require the submission of additional information or question the alien on any relevant matter whenever the officer believes that the information provided in Form DS–230 or Form DS–260 is inadequate to determine the alien's eligibility to receive an immigrant visa. Additional statements made by the alien become a part of the visa application. All documents required under the authority of § 42.62 are considered papers submitted with the alien's application within the meaning of INA 221(g)(1).

■ 5. Section 42.67 is revised to read as follows:

§ 42.67 Execution of application, registration, and fingerprinting.

(a) *Execution of visa application:* (1) *Application fee.*—A fee is prescribed for each application for an immigrant visa. It shall be collected prior to the execution of the application and a receipt shall be issued.

(2) *Oath and signature on Form DS–230.* The applicant shall be required to read the Form DS–230, Application for Immigrant Visa and Alien Registration, when it is completed, or it shall be read to the applicant in the applicant's language, or the applicant shall otherwise be informed of its full contents. Applicants shall be asked whether they are willing to subscribe thereto. If the applicant is not willing to subscribe to the application unless changes are made in the information stated therein, the required changes shall be made. The application shall then be sworn to or affirmed and signed by or on behalf of the applicant before a consular officer, or a designated officer of the American Institute of Taiwan, who shall then sign the application over the officer's title.

(3) *Oath and signature on Form DS–260.* The applicant shall be required to read the Form DS–260, Electronic Application for Immigrant Visa and Alien Registration, when it has been completed, or it shall be read to the applicant in the applicant's language, or the applicant shall otherwise be informed of its full contents, before the applicant electronically signs and submits the application to the Department. At the time of the applicant's interview the applicant shall be asked whether they are willing to subscribe thereto to the information provided on Form DS–260. If the alien is not willing to subscribe to the application unless changes are made in the information stated therein, the required changes shall be made. The application shall then be sworn to or affirmed and signed, biometrically, by or on behalf of the applicant before a consular officer, or a designated officer

of the American Institute of Taiwan, who shall then electronically sign the application.

(b) *Registration.* The alien shall be considered to be registered for the purposes of INA 221(b) and 203(g) upon the filing of Form DS–230 or Form DS–260, when duly executed, or the transmission by the Department to the alien of a notification of the availability of an immigrant visa, whichever occurs first.

(c) *Fingerprinting.* Every applicant for an immigrant visa must furnish fingerprints prior to the execution of Form DS–230 or Form DS–260.

■ 6. Section 42.81 is amended by revising paragraph (b) to read as follows:

§ 42.81 Procedure in refusing individual visas.

* * * * *

(b) *Refusal procedure.* A consular officer may not refuse an immigrant visa until either Form DS–230, Application for Immigrant Visa and Alien Registration, or Form DS–260, Electronic Application for Immigrant Visa and Alien Registration, has been executed by the applicant. When an immigrant visa is refused, an appropriate record shall be made in duplicate on a form prescribed by the Department. The form shall be signed and dated by the consular officer. The consular officer shall inform the applicant of the provision of law or implementing regulation on which the refusal is based and of any statutory provision of law or implementing regulation under which administrative relief is available. Each document related to the refusal shall then be attached to Form DS–230 for retention in the refusal files. Alternatively, each document related to the refusal shall be electronically scanned and electronically attached to Form DS–260 for retention in the electronic refusal files. Any documents not related to the refusal shall be returned to the applicant. The original copy of a document that was scanned and attached to the DS–260 for the refusal file shall be returned to the applicant. If the ground of ineligibility may be overcome by the presentation of additional evidence and the applicant indicates an intention to submit such evidence, all documents may, with the consent of the alien, be retained in the consular files for a period not to exceed one year. If the refusal as not been overcome within one year, any documents not relating to the refusal shall be removed from the file and returned to the alien.

* * * * *

Dated: July 22, 2010.

Janice L. Jacobs,

Assistant Secretary, Bureau of Consular Affairs, Department of State.

BILLING CODE 4710–06–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2010–0687]

Drawbridge Operation Regulation; Company Canal, Bourg, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the LA 24 vertical lift span bridge across Company Canal, mile 8.1, at Bourg, Terrebonne Parish, Louisiana. The deviation is necessary to perform electrical rehabilitation work on the bridge. This deviation allows the bridge to remain closed to navigation for twelve consecutive days.

DATES: This deviation is effective from 6 a.m. on Monday, October 25 through 10 p.m. on Friday, November 5, 2010.

ADDRESSES: Documents mentioned in this preamble as being available in the docket are part of docket USCG–2010–0687 and are available online by going to *http://www.regulations.gov*, inserting USCG–2010–0687 in the "Keyword" box and then clicking "Search." They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or e-mail Kay Wade, Bridge Administration Branch, Coast Guard; telephone 504–671–2128, e-mail *Kay.B.Wade@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION: The Louisiana Department of Transportation and Development has requested a temporary deviation from the operating schedule of the vertical lift span bridge across Company Canal at mile 8.1 in Bourg, Terrebonne Parish, Louisiana. The vertical clearance of the bridge in the closed-to-navigation position is 5.17 feet above Mean High Water Elevation 3.0 feet Mean Sea Level.

In accordance with 33 CFR 117.438(b), the vertical lift span of the bridge currently opens on signal except that, from 10 p.m. to 6 a.m. the draw opens on signal if at least 4 hours notice is given. This deviation allows the vertical lift span of the bridge to remain closed to navigation for twelve consecutive days from 6 a.m. Monday, October 25 through 10 p.m. Friday, November 5, 2010.

The closure is necessary in order to replace electrical conductors and conduit throughout the bridge structure, including the removal and replacement of all navigation lights on the span and fender system. This maintenance is essential for the continued operation of the bridge. Temporary navigational lighting will be provided during the closure and power outage period. Notices will be published in the Eighth Coast Guard District Local Notice to Mariners and will be broadcast via the Coast Guard Broadcast Notice to Mariners System.

Navigation on the waterway consists of commercial and recreational fishing vessels, small to medium crew boats, and small tugs with and without tows. There are no commercial docks or marine type facilities within one mile of the bridge along Company Canal or Bayou Terrebonne. The bridge opens for the passage of navigation an average of 53 times per month. There are two alternate waterway routes available via the Gulf Intracoastal Waterway east to Bayou Lafourche and west to Navigation Canal. Small vessels may pass under the bridge while in the closed-to-navigation position provided caution is exercised. In an emergency, the bridge can be returned to operation with a 36 hour notice.

Due to prior experience and coordination with waterway users, it has been determined that this closure will not have a significant effect on vessels that use the waterway.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: July 23, 2010.

David M. Frank,

Bridge Administrator.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2010–0706]

RIN 1625–AA00

Safety Zone; Transformers 3 Movie Filming, Chicago River, Chicago, IL

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing two separate temporary safety zones on the Chicago River near Chicago, Illinois. These zones are intended to restrict vessels from a portion of the Chicago River due to the filming of a major motion picture, Transformers 3. These temporary safety zones are necessary to protect the surrounding public and vessels from the hazards associated with the different types of stunts that will be performed during the filming of this movie.

DATES: Effective Date: this rule is effective in the CFR from August 3, 2010 until 9 p.m. on August 8, 2010. This rule is effective with actual notice for purposes of enforcement beginning 7 a.m. on July 27, 2010.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket USCG–2010–0706 and are available online by going to *http://www.regulations.gov,* inserting USCG–2010–0706 in the "Keyword" box, and then clicking "search." They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground floor, Room W12–140, 1200 New Jersey Avenue SE., Washington DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, contact or email BM1 Adam Kraft, U.S. Coast Guard Sector Lake Michigan, at 414–747–7154 or *Adam.D.Kraft@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Regulatory Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when an agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under U.S.C. 553 (b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because the final details for these events were not submitted to the Coast Guard until July 20, 2010. Based on the hazards associated with the filming of this major motion picture, delaying the enactment of this rule to provide for a comment would be against the public interest. Therefore, there was not enough time to solicit the public for comments concerning this temporary final rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest as immediate action is needed to protect the public from the hazards associated with the filming of this major motion picture.

Basis and Purpose

These temporary safety zones are necessary to protect vessels from the hazards associated with the stunts that will be occurring during this filming of the major motion picture, Transformers 3. The Captain of the Port, Sector Lake Michigan, has determined that the stunts associated with the filming of this motion picture do pose significant risks to public safety and property. The likely combination of congested waterways and the stunts that will be performed during the filming of a major motion picture could easily result in serious injuries or fatalities.

Discussion of Rule

The Coast Guard is establishing two temporary safety zones. The first safety zone will be enforced between 7 a.m. and 9 p.m. on July 27, 2010 and encompasses all U.S. navigable waters of the Chicago River between the Lakeshore Drive Bridge, 41°53′19″ N, 087°36′51″ W and the Wabash Street Bridge, 41°53′17″ N, 087°37′36″ W. The second safety zone will be enforced between 7 a.m. and 9 p.m. on August 8, 2010 and encompasses all U.S. navigable waters of the Chicago River between the Dearborn Street Bridge, 41°53′14″ N, 087°37′46″ W and the Wabash Street Bridge, 41°53′17″ N, 087°37′36″ W. [DATUM: NAD 83].

All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port, Sector Lake Michigan, or his or her on-scene representative. Entry into, transiting, or anchoring within the safety zone is prohibited unless authorized by the Captain of the Port, Sector Lake Michigan, or his or her on-scene representative. The Captain of the Port, Sector Lake Michigan, or his or her on-scene representative may be contacted via VHF Channel 16.

Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order.

Although this regulation will restrict access to the area, the effect of the rule will not be significant because: The minimal time that vessels will be restricted from the zone and the zone is an area where the Coast Guard expects insignificant adverse impact to mariners from the zones' ten minute or less activation periods.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule will have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U. S. C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which might be small entities: The owners or operators of vessels intending to transit or anchor in a portion of the Chicago River between 7 a.m. and 9 p.m. on July 27, 2010 and August 8, 2010.

The safety zones will not have a significant economic impact on a substantial number of small entities for the following reasons: This rule will only be enforced while unsafe conditions exist. Traffic will only be prohibited from passing through the

zones when actual filming is being conducted. Traffic will only be stopped for a short duration not to exceed ten minutes during any one closure. In the event that these temporary safety zones affect shipping, commercial vessels may request permission from the Captain of The Port, Sector Lake Michigan, or his or her on scene representative to transit through the safety zone. The Coast Guard will give notice to the public via a Broadcast to Mariners that the regulation is in effect.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this temporary rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies. This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction. This rule involves the establishment of two safety zones and is therefore categorically excluded under paragraph 34(g) of the Instruction.

A final environmental analysis check list and categorical exclusion determination are available in the docket where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation (water), Reporting and record keeping requirements, Security measures, Waterways.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701; 50 U.S.C. 191, 195; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T09–0706 to read as follows

§ 165.T09–0706 Safety Zone; Transformers 3 Movie Filming, Chicago River, Chicago, IL

(a) *Safety Zones.* (1) The first safety zone encompasses all U.S. navigable waters of the Chicago River between the

Lakeshore Drive Bridge, 41°53′19″ N, 087°36′51″ W and the Wabash Street Bridge, 41°53′17″ N, 087°37′36″ W.

(i) *Date.* July 27, 2010.

(2) The second safety zone encompasses all U.S. navigable waters of the Chicago River between the Dearborn Street Bridge, 41°53′14″ N, 087°37′46″ W and the Wabash Street Bridge, 41°53′17″ N, 087°37′36″W. [DATUM: NAD 83].

(i) *Date.* August 8, 2010.

(b) *Enforcement period.* The first safety zone will be enforced between 7 a.m. to 9 p.m. on July 27, 2010. The second safety zone will be enforced between 7 a.m. to 9 p.m. on August 8, 2010. The Captain of the Port, Sector Lake Michigan, or the on-scene representative may suspend and restart the enforcement of the safety zone at anytime within the stated enforcement times.

(c) *Regulations.* (1) In accordance with the general regulations in section 165.23 of this part, entry into, transiting, or anchoring within this safety zone is prohibited unless authorized by the Captain of the Port, Sector Lake Michigan, or his or her on-scene representative.

(2) This safety zone is closed to all vessel traffic, except as may be permitted by the Captain of the Port, Sector Lake Michigan, or his or her on-scene representative.

(3) The "on-scene representative" of the Captain of the Port, Sector Lake Michigan, is any Coast Guard commissioned, warrant or petty officer who has been designated by the Captain of the Port, Sector Lake Michigan, to act on his or her behalf. The on-scene representative of the Captain of the Port, Sector Lake Michigan, will be on land in the vicinity of the safety zone and will have constant communications with the Chicago Marine Unit vessels that will be on-scene as the enforcement vessels.

(4) Vessel operators desiring to enter or operate within the safety zone shall contact the Captain of the Port, Sector Lake Michigan, or his or her on-scene representative to obtain permission to do so. The Captain of the Port, Sector Lake Michigan, or his or her on-scene representative may be contacted via VHF Channel 16. Vessel operators given permission to enter or operate in the safety zone must comply with all directions given to them by the Captain of the Port, Sector Lake Michigan, or his or her on-scene representative.

Dated: July 21, 2010.

L. Barndt,

Captain, U.S. Coast Guard, Captain of the Port, Sector Lake Michigan.

[FR Doc. 2010–18960 Filed 8–2–10; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2010–0450; FRL–9182–2]

Approval and Promulgation of Air Quality Implementation Plans; Minnesota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a request submitted by the Minnesota Pollution Control Agency (MPCA) on May 7, 2010, to revise the Minnesota State Implementation Plan (SIP) for sulfur dioxide (SO_2). The approval revises the Minnesota SIP by updating information regarding the heat and steam distributor facility of United Defense, LP, Inc, located in Fridley, Minnesota. The source has changed its name from United Defense, LP, Inc to ELT Minneapolis, LLC, as a consequence of a change in ownership. The revision replaces the joint Title I/Title V document currently approved in the SIP for the facility to reflect the change in ownership. These revisions do not change any of the SO_2 control requirements and will not result in an increase in SO_2 emissions at the facility because no emission limits were increased.

DATES: This direct final rule will be effective October 4, 2010, unless EPA receives adverse comments by September 2, 2010. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2010–0450, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *E-mail: bortzer.jay@epa.gov.*
3. *Fax:* (312)629–2054.
4. *Mail:* Jay Bortzer, Chief, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.
5. *Hand Delivery:* Jay Bortzer, Chief, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604. Such deliveries are only accepted during the Regional Office normal hours of operation, and special arrangements should be made for deliveries of boxed information. The Regional Office official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m. excluding Federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R05–OAR–2010–0450. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from

8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Charles Hatten, Environmental Engineer, at (312) 886–6031 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Charles Hatten, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6031, *hatten.charles@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

I. General Information
II. What revision did the State request be incorporated into the SIP?
III. What is EPA's analysis of the State submission?
IV. What action is EPA taking?
V. Statutory and Executive Order Reviews.

I. General Information

A. Does this action apply to me?

This action applies only to the ELT Minneapolis, LLC, (ELT) for its River Road Industrial facility located at 4800 East River Road, Fridley, Minnesota (Anoka County).

B. Has public notice been provided?

Minnesota published a public notice of the revisions to the SIP on February 17, 2010. The comment period began on February 26, 2010, and ended on March 29, 2010. In the public notice, Minnesota stated it would hold a public hearing if one were requested during the comment period. This follows the alternative public participation process EPA approved on June 5, 2006 (71 FR 32274). For limited types of SIP revisions that the public has shown little interest in, a public hearing is not automatically required. Because no one requested a public hearing, Minnesota did not hold a public hearing.

C. What is the background to this action?

ELT owns and operates boilers and emergency generators in the city of Fridley, formerly owned and operated by United Defense, LP, Inc. The facility is used as a heat and steam distributor. The facility is located in the Anoka area's non-attainment plan for the SO_2 National Ambient Air Quality Standard (NAAQS). However, the area currently meets the NAAQS for SO_2, and was officially redesignated as attainment on July 31, 1995.

The primary emission units at the facility are three fossil fuel-fired boilers (Nos. 1, 2, and 3), and four emergency generators. Each boiler burns natural gas as fuel with distillate oil as a backup fuel. The generators only burn low sulfur diesel fuel.

II. What revision did the State request be incorporated into the SIP?

To reflect the change in ownership the State has requested that EPA replace the joint Title I/Title V document currently in the Minnesota SIP for United Defense, LP, Inc, with a new joint document for ELT Minneapolis, LLC.

A. What prior SIP actions are pertinent to this action?

The facility has been subject to a federally enforceable permit incorporated into Minnesota's SIP as a joint Title I/Title V document, containing requirements for ensuring the attainment of the NAAQS for SO_2. As a result, the facility is subject to fuel usage limitations to restrict the total facility SO_2 emissions.

B. What are Title I conditions and joint Title I/Title V documents?

SIP control measures were contained in permits issued to culpable sources in Minnesota until 1990 when EPA determined that limits in state-issued permits are not federally enforceable because the permits expire. Minnesota then issued permanent Administrative Orders to culpable sources in nonattainment areas from 1991 to February of 1996.

Minnesota's consolidated permitting regulations, approved into its SIP on May 2, 1995 (60 FR 21447), include the term "Title I condition" which was written, in part, to satisfy EPA requirements that SIP control measures remain permanent. A "Title I condition" is defined as "any condition based on source-specific determination of ambient impacts imposed for the purposes of achieving or maintaining attainment with the national ambient air quality standard and which was part of the state implementation plan approved by EPA or submitted to the EPA pending approval under section 110 of the act * * *." The rule also states that "Title I conditions and the permittee's obligation to comply with them, shall not expire, regardless of the expiration of the other conditions of the permit." Further, "any title I condition shall remain in effect without regard to permit expiration or reissuance, and shall be restated in the reissued permit."

Minnesota has initiated using joint Title I/Title V documents as the enforceable document for imposing emission limitations and compliance requirements in SIPs. The SIP requirements in joint Title I/Title V documents submitted by MPCA are cited as "Title I conditions," therefore ensuring that SIP requirements remain permanent and enforceable. EPA reviewed the State's procedure for using joint Title I/Title V documents to implement site-specific SIP requirements and found it to be acceptable under both Titles I and V of the Clean Air Act (July 3, 1997 letter from David Kee, EPA, to Michael J. Sandusky, MPCA). Further, a June 15, 2006, letter from EPA to MPCA clarifies procedures to transfer requirements from Administrative Orders to joint Title I/Title V documents.

III. What is EPA's analysis of the State submission?

The revision to the Minnesota SIP is solely an administrative change to reference the new name of the facility from United Defense, LP, Inc, to ELT Minneapolis, LLC. On November 22, 2005, the heat and steam distributor facility formerly owned and operated by United Defense, LP, Inc, was purchased by ELT. ELT operates the facility in an area that currently meets the NAAQS for SO_2.

This SIP revision replaces the joint Title I/Title V document, Air Permit No. 00300020–001, currently approved into the SIP for United Defense, LP, Inc with a new joint Title I/Title V document, Air Permit No. 00300245–001, for ELT Minneapolis, LLC. This revision does not involve any substantive changes to the SIP conditions. All fuel restrictions and SO_2 emission limits that apply to the boilers and emergency generators remain the same as those currently approved into the SIP.

IV. What action is EPA taking?

EPA is approving a revision to Minnesota's SIP to replace the joint Title I/Title V document currently approved into the SIP for United Defense, LP, Inc, with a new joint Title I/Title V document, Air Permit No. 00300245–001, for ELT Minneapolis, LLC. These revisions do not change any of the SO_2 control requirements and will not result in an increase in SO_2 emissions because no emission limits were increased.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be

effective October 4, 2010 without further notice unless we receive relevant adverse written comments by September 2, 2010. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. The EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. If we do not receive any comments, this action will be effective October 4, 2010.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 4, 2010. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur dioxide.

Dated: July 19, 2010.

Susan Hedman,

Regional Administrator, Region 5.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R02–OAR–2010–0161; FRL–9175–7]

Approval and Promulgation of Implementation Plans; Implementation Plan Revision; State of New Jersey

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approvinga request from the State of New Jersey to revise its State Implementation Plan (SIP) to incorporate amendments to Subchapter 4 "Control and Prohibition of Particles from Combustion of Fuel," Subchapter 10 "Sulfur in Solid Fuels," Subchapter 16 "Control and Prohibition of Air Pollution by Volatile Organic Compounds," Subchapter 19 "Control and Prohibition of Air Pollution from Oxides of Nitrogen," and related amendments to Subchapter 21 "Emission Statements." The amendments relate to the control of oxides of nitrogen (NO_x), sulfur dioxide (SO_2), particles and volatile organic compounds (VOCs) from stationary sources.

This SIP revision consists of control measures needed to meet the State's commitment to adopt additional reasonably available control technology (RACT) rules that address RACT requirements for the 1997 national ambient air quality standards for ozone. Additionally, the SIP revision includes control measures that will help the State meet the national ambient air quality standards for fine particles.

The intended effect of this action is to approve the State control strategy, which will result in emission reductions that will help achieve attainment of the national ambient air quality standards for ozone and fine particles required by the Clean Air Act (the Act).

DATES: *Effective Date:* This rule is effective on *September 2, 2010.*

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R02–OAR–2010–0161. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *http://www.regulations.gov* or in hard copy at the Environmental Protection Agency, Region II Office, Air Programs Branch, 290 Broadway, 25th Floor, New York, New York 10007–1866. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is 212–637–4249.

FOR FURTHER INFORMATION CONTACT: Paul Truchan (*truchan.paul@epa.gov*) concerning Subchapters 16 and 21, Anthony (Ted) Gardella (*gardella.anthony@epa.gov*) concerning Subchapter 19, and Kenneth Fradkin (*fradkin.kenneth@epa.gov*) concerning Subchapters 4 and 10, at the Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10007–1866, (212) 637–4249.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. What action is EPA taking?
II. What supplemental SIP information did New Jersey submit?
III. What comments did EPA receive in response to its proposal?
IV. What are EPA's conclusions?
V. Statutory and Executive Order Reviews

I. What action is EPA taking?

On April 21, 2009, as supplemented on May 7, 2010, New Jersey submitted a proposed revision to the State Implementation Plan (SIP) that includes amendments to New Jersey Administrative Code, Title 7: Chapter 27 (NJAC 7:27) Subchapter 4 "Control and Prohibition of Particles from Combustion of Fuel;" Subchapter 8 "Permits and Certificates for Minor Facilities (and Major Facilities Without an Operating Permit);" Subchapter 10 "Sulfur in Solid Fuels;" Subchapter 16 "Control and Prohibition of Air Pollution by Volatile Organic Compounds;" Subchapter 19 "Control and Prohibition of Air Pollution from Oxides of Nitrogen;" and Subchapter 21 "Emission Statements."

EPA is approving the State amendments to Subchapter 4 and Subchapter 10 as revisions to the SIP. These amendments relate to the control of particle and sulfur dioxide emissions and will help the State make advances towards reducing regional haze and meeting the national ambient air quality standards (NAAQS) for fine particles.

EPA will review Subchapter 8 and will address the approvability of all Subchapter 8 amendments in a future action.

EPA is approving, as revisions to the New Jersey ozone SIP, the State-adopted amendments to Subchapter 16 and Subchapter 19, and related amendments to Subchapter 21, each adopted by New Jersey on March 20, 2009, and submitted to EPA on April 21, 2009 and as supplemented on May 7, 2010. New Jersey amended Subchapter 16 and Subchapter 19 to meet the State's commitment to adopt additional RACT rules for 12 of 13 source categories (see 74 FR 2945, January 16, 2009), which will result in additional emission reductions of NO_x and VOCs. New Jersey's State-adopted Subchapters 16 and 19, and the related amendments to Subchapter 21, are fully approvable as SIP-strengthening measures for New Jersey's ozone SIP. The amendments to Subchapters 16, 19 and 21 in New Jersey's submittal meet the State's commitment to adopt additional RACT control measures for 12 of 13 source categories to achieve additional emission reductions of NO_x and VOCs to attain the 8-hour ozone standard. The one remaining source category, adhesives and sealants, will be addressed in a separate rulemaking.

For additional details on EPA's analysis and findings the reader is referred to the proposal published in the April 23, 2010 **Federal Register** (75 FR 21197) and a more detailed discussion as contained in the Technical Support Document which is available on line at *http://www.regulations.gov*, Docket number EPA–R02–OAR–2010–0161.

II. What supplemental SIP information did New Jersey submit?

On May 7, 2010, New Jersey submitted to EPA a supplement to the State's proposed SIP revision dated April 21, 2009. The supplement consists of two administrative changes to Subchapter 19 and includes a copy of the changes as published in the New Jersey Register (NJR) and the updated version of Subchapter 19. The specific administrative changes to Subchapter 19 are as follows: (1) At section 7:27–19.1, the definition of "interim period" is changed to correct an erroneous date and now correctly limits the end date of the "interim period" for phased compliance for reasons of practicability pursuant to section 19.22 to no later than May 19, 2010 (41 NJR 2648(c), dated July 6, 2009); and (2) at section 7:27–19.29(b)2, the deadline for owners/operators of High Electric Demand Day (HEDD) units to submit the 2009 HEDD Emission Reduction Compliance Demonstration Protocol ("2009 Protocol") is corrected and shortened to the rule operative date of May 19, 2009 (41 NJR 2470(a), dated June 15, 2009).

The first administrative change regarding the definition of "interim period" addresses EPA's comment in the

April 23, 2010 proposal (see section I.I.5) regarding an inconsistency between two provisions. The second administrative change clarifies when the 2009 Protocol is required to be submitted by owners/operators of HEDD units regulated under section 19.29 of Subchapter 19. EPA agrees with these changes.

This supplement to the SIP is included in the Docket and may be viewed by the reader at *http://www.regulations.gov.*

III. What comments did EPA receive in response to its proposal?

No comments were received on EPA's April 23, 2010 proposal.

IV. What are EPA's conclusions?

EPA has evaluated New Jersey's submittal for consistency with the Act, EPA regulations, and EPA policy. The new control measures will strengthen the SIP by providing additional NO_x, SO_2, fine particulate, and VOC emission reductions that the State committed to achieve. Accordingly, EPA is approving the revisions to Subchapters 4, 10, 16, 19, and related revisions to Subchapter 21, as adopted on March 20, 2009 and July 6, 2009, except that EPA is continuing to not act on the phased compliance plans by repowering and innovative control in sections 19.21 and 19.23, respectively. In addition, EPA has determined that New Jersey has met the requirement to adopt NO_x RACT and EPA is removing 40 CFR 52.1576, relating to a prior finding that NO_x RACT was not included in the New Jersey SIP. At a later date, EPA will act on Subchapter 8, as adopted by New Jersey on March 20, 2009.

With the adoption of Subchapters 16, 19 and 21, New Jersey has fulfilled its commitment to adopt additional RACT control measures for 12 of 13 source categories to achieve additional emission reductions of NO_x and VOCs to attain the 8-hour ozone standard. The one remaining source category, adhesives and sealants, will be addressed in a separate rulemaking.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 4, 2010. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: July 2, 2010.

Judith A. Enck,

Regional Administrator, Region 2.

■ Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart FF—New Jersey

■ 2. Section 52.1570 is amended by adding new paragraph (c)(88) to read as follows:

§ 52.1570 Identification of plan.

* * * * *

(c) * * *

(88) A revision submitted on April 21, 2009, as supplemented on May 7, 2010, by the New Jersey Department of Environmental Protection (NJDEP) that establishes revised control measures for achieving additional reductions of NOx, SO_2, fine particulate, and VOC emissions from stationary sources that will help achieve attainment of the national ambient air quality standard for ozone and fine particles, as well as help to reduce regional haze.

(i) Incorporation by reference:

(A) New Jersey Administrative Code, Title 7, Chapter 27 (NJAC 7:27): Subchapter 4 "Control and Prohibition

of Particles from Combustion of Fuel" with an effective date of April 20, 2009; Subchapter 10 "Sulfur in Solid Fuels" with an effective date of April 20, 2009; Subchapter 16 "Control and Prohibition of Air Pollution by Volatile Organic Compounds" with an effective date of April 20, 2009; Subchapter 19 "Control and Prohibition of Air Pollution from Oxides of Nitrogen" with an effective date of July 6, 2009 (including two Administrative Corrections published in the New Jersey Register on June 15, 2009 and July 6, 2009); and Subchapter 21 "Emission Statements" with an effective date of April 20, 2009.

(ii) Additional information:

(A) Letter dated April 21, 2009 from Acting Commissioner Mark N. Mauriello, NJDEP, to George Pavlou, Acting Regional Administrator, EPA Region 2, submitting the SIP revision for Subchapters 4, 8, 10, 16, 19 and 21.

(B) Letter dated May 7, 2010 from Director William O'Sullivan, NJDEP, to Barbara Finazzo, Director, Division of Environmental Planning and Protection, EPA Region 2, submitting supplemental SIP information for Subchapter 19.

■ 3. Section 52.1605 is amended by revising the table entries, under Title 7, Chapter 27: for Subchapters 4, 10, 16, 19, and 21, to read as follows:

§ 52.1605 EPA-approved New Jersey regulations.

State regulation	State effective date	EPA approved date	Comments
*	*	*	* * * *
Title 7, Chapter 27:			
*	*	*	* * * *
Subchapter 4, "Control and Prohibition of Particles from Combustion of Fuel."	April 20, 2009	August 3, 2010 [Insert Federal Register page citation].	
*	*	*	* * * *
Subchapter 10, "Sulfur in Solid Fuels."	April 20, 2009	August 3, 2010, 2009 [Insert Federal Register page citation].	Notification of "large zone 3 coal conversions" must be provided to EPA (40 CFR 52.1601(b)).
*	*	*	* * * *
Subchapter 16, "Control and Prohibition of Air Pollution by Volatile Organic Compounds."	April 20, 2009	August 3, 2010 [Insert Federal Register page citation].	
*	*	*	* * * *
Subchapter 19, "Control and Prohibition of Air Pollution from Oxides of Nitrogen."	July 6, 2009, as corrected on June 15, 2009 and July 6, 2009.	August 3, 2010 [Insert Federal Register page citation].	Subchapter 19 is approved into the SIP except for the following provisions: (1) phased compliance plan through repowering in §§19.21 that allows for implementation beyond May 1, 1999; and (2) phased compliance plan through the use of innovative control technology in §§19.23 that allows for implementation beyond May 1, 1999.
*	*	*	* * * *
Subchapter 21, "Emission Statements."	April 20, 2009	August 3, 2010 [Insert Federal Register page citation].	Section 7:27–21.3(b)(1) and 7:27–21.3(b)(2) of New Jersey's Emission Statement rule requires facilities to report on the following pollutants to assist the State in air quality planning needs: hydrochloric acid, hydrazine, methylene chloride, tetrachlorethylene, 1, 1, 1 trichloroethane, carbon dioxide and methane. EPA will not take SIP-related enforcement action on these pollutants.
*	*	*	* * * *

§ 52.1576 [Reserved]

■ 4. Section 52.1576 is removed and reserved.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[EPA–R09–OAR–2010–0590; FRL–9184–6]

Determination of Attainment for PM_{10} for the Las Vegas Valley Nonattainment Area, NV

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA has determined that the Las Vegas Valley nonattainment area in Nevada attained the National Ambient Air Quality Standard (NAAQS) for particulate matter with an aerodynamic diameter of less than or equal to a nominal ten micrometers (PM_{10}) by the applicable attainment date (December 31, 2006), and that the Las Vegas Valley nonattainment area is currently attaining the standard.

DATES: This action is effective on *October 4, 2010* without further notice,

unless EPA receives adverse comment by *September 2, 2010.* If EPA receives adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2010–0590, by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions.

2. *E-mail: tax.wienke@epa.gov.*

3. *Mail or Deliver:* Wienke Tax, Air Planning Office, EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *http://www.regulations.gov* or e-mail. *http://www.regulations.gov* is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail directly to EPA, your e-mail address will be automatically captured and included as part of the public comment. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: The index to the docket for this action is available electronically at *http://www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material), and some may not be publicly available in either location (*e.g.,* CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Wienke Tax at telephone number: (415) 947–4192, e-mail address: *tax.wienke@epa.gov,* or the above EPA, Region IX address.

SUPPLEMENTARY INFORMATION: Throughout this document, wherever "we", "us" or "our" are used, we mean EPA. Information is organized as follows:

Table of Contents

I. Background
A. PM_{10} NAAQS
B. Designation and Classification of PM_{10} Nonattainment Areas
C. How does EPA make attainment determinations?
D. What is the attainment date for the Las Vegas Valley PM_{10} nonattainment area?
E. What PM_{10} planning has occurred for the Las Vegas Valley PM_{10} nonattainment area?
II. EPA's Analysis
A. What does the air quality data show as of the December 31, 2006 attainment date?
B. Does more recent air quality data also show attainment?
III. EPA's Final Action
IV. Statutory and Executive Order Reviews

I. Background

A. PM_{10} NAAQS

The NAAQS are levels for certain ambient air pollutants set by EPA to protect public health and welfare. PM_{10}, or particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers, is among the ambient air pollutants for which EPA has established health-based standards. On July 1, 1987 (52 FR 24634), EPA promulgated two primary standards for PM_{10}: A 24-hour standard of 150 micrograms per cubic meter (μg/m^3) and an annual PM_{10} standard of 50 μg/m^3. EPA also promulgated secondary PM_{10} standards that were identical to the primary standards.

Effective December 18, 2006, EPA revoked the annual PM_{10} standard but retained the 24-hour PM_{10} standard. 71 FR 61144 (October 17, 2006). The 24-hour PM_{10} standard is attained when the expected number of days per calendar year with a 24-hour concentration in excess of the standard (referred to herein as "exceedance"), as determined in accordance with 40 CFR part 50, appendix K, is equal to or less than one.[1] 40 CFR 50.6 and 40 CFR part 50, appendix K.

B. Designation and Classification of PM_{10} Nonattainment Areas

Areas meeting the requirements of section 107(d)(4)(B) of the Clean Air Act (CAA or the Act) were designated nonattainment for PM_{10} by operation of law and classified "moderate" upon enactment of the 1990 Clean Air Act Amendments. *See generally* 42 U.S.C. 7407(d)(4)(B). These areas included all former Group I PM_{10} planning areas identified in 52 FR 29383 (August 7, 1987), as further clarified in 55 FR 45799 (October 31, 1990), and any other areas violating the NAAQS for PM_{10} prior to January 1, 1989. A **Federal Register** notice announcing the areas designated nonattainment for PM_{10} upon enactment of the 1990 Amendments, known as "initial" PM_{10} nonattainment areas, was published on March 15, 1991 (56 FR 11101) and a subsequent **Federal Register** document correcting the description of some of these areas was published on August 8, 1991 (56 FR 37654). The Las Vegas Valley[2] was one of these initial moderate PM_{10} nonattainment areas.

All initial moderate PM_{10} nonattainment areas had the same applicable attainment date of December 31, 1994. States containing initial moderate PM_{10} nonattainment areas were required to develop and submit to EPA by November 15, 1991, a state implementation plan (SIP) revision providing for implementation of reasonably available control measures (RACM) for the control of PM_{10}, and either a demonstration that the plan would provide for attainment by the applicable attainment date (December 31, 1994) or a demonstration that attainment by such date was impracticable. See CAA section 189(a).

A moderate PM_{10} area could subsequently be reclassified as "serious" either before the applicable moderate area attainment date if EPA determines the area cannot "practicably" attain the PM_{10} NAAQS by this attainment date, or

[1] An exceedance is defined as a daily value that is above the level of the 24-hour standard (150 μg/m^3) after rounding to the nearest 10 μg/m^3 (*i.e.,* values ending in 5 or greater are to be rounded up). Thus, a recorded value of 154 μg/m^3 would not be an exceedance since it would be rounded to 150 μg/m^3 whereas a recorded value of 155 μg/m^3 would be an exceedance since it would be rounded to 160 μg/m^3. See 40 CFR part 50, appendix K, section 1.0.

[2] Specifically, the Las Vegas Valley PM_{10} nonattainment area is defined by reference to State hydrographic area #212. See 40 CFR 81.329. The Las Vegas Valley encompasses roughly 1,500 square miles within Clark County and includes the cities of Las Vegas, North Las Vegas, and Henderson. Roughly two million people reside in Clark County, mostly within Las Vegas Valley. NDEP is the state agency under state law that is responsible for SIP matters for the State of Nevada. Within Clark County, the Clark County Board of Commissioners, acting through the Department of Air Quality and Environmental Management (DAQEM), is empowered under state law to develop air quality plans and to regulate stationary sources within the county with the exception of certain types of power plants, which lie exclusively within the jurisdiction of NDEP.

following the passage of the applicable moderate area attainment date if EPA determines that the area has failed to attain the standard. Effective February 8, 1993, EPA determined that Las Vegas Valley could not "practicably" attain the PM_{10} NAAQS by December 31, 1994 (*i.e.,* the applicable attainment date for initial moderate PM_{10} nonattainment areas), and reclassified the area as "serious." *See* 58 FR 3334 (January 8, 1993). Reclassification of Las Vegas Valley to "serious" triggered deadlines for additional SIP revisions and established a new applicable attainment date of (no later than) December 31, 2001. See CAA section 188(c)(2).

Section 188(e) of the Act authorizes EPA to extend the applicable attainment date for serious PM_{10} nonattainment areas under certain circumstances. In 2004, EPA approved the PM_{10} attainment plan for Las Vegas Valley and granted the State of Nevada's request to extend the applicable attainment date from December 31, 2001 to December 31, 2006. See 69 FR 32273 (June 9, 2004).

C. How does EPA make attainment determinations?

Section 188(b)(2) of the Act requires EPA to determine within six months of the applicable attainment date whether, based on air quality data, PM_{10} nonattainment areas attained the PM_{10} NAAQS by that date. Generally, EPA determines whether an area's air quality is meeting the PM_{10} NAAQS based upon complete (minimum of 75 percent of scheduled PM_{10} samples recorded), quality-assured data gathered at established state and local air monitoring stations (SLAMS) and national air monitoring stations (NAMS) in the nonattainment area and entered into the EPA Air Quality System (AQS) database. Data from air monitors operated by State/local/tribal agencies in compliance with EPA monitoring requirements must be submitted to AQS. EPA relies primarily on data in AQS when determining the attainment status of an area. *See* 40 CFR 50.6; 40 CFR part 50, appendix J; 40 CFR part 53; 40 CFR part 58, appendix A. EPA will also consider air quality data from other air monitoring stations in the nonattainment area provided that the stations meet the Federal monitoring requirements for SLAMS, including the quality assurance and quality control criteria in 40 CFR part 58, appendix A. 40 CFR 58.14 (2006) and 58.20 (2007); [3] 71 FR 61236, 61242 (October 17, 2006). All valid data are reviewed to determine the area's air quality status in accordance with 40 CFR part 50, appendix K.

Attainment of the 24-hour PM_{10} standard is determined by calculating the expected number of exceedances of the standard in a year. The 24-hour standard is attained when the expected number of exceedances averaged over a three-year period is less than or equal to one at each monitoring site within the nonattainment area. Generally, three consecutive years of air quality data are required to show attainment of the 24-hour PM_{10} standard. See 40 CFR part 50 and appendix K.[4]

D. What is the attainment date for the Las Vegas Valley PM_{10} nonattainment area?

As noted above, the original attainment date for the Las Vegas Valley PM_{10} nonattainment area was December 31, 1994, but was later extended, first to December 31, 2001, and later, to December 31, 2006. *See* 58 FR 3334 (January 8, 1993) and 69 FR 32273 (June 9, 2004).

E. What PM_{10} planning has occurred for the Las Vegas Valley PM_{10} nonattainment area?

After Las Vegas Valley was designated nonattainment for PM_{10}, Clark County and NDEP began in the early 1990s to prepare the technical elements needed to bring the area into attainment and meet the planning requirements of title I of the CAA. NDEP submitted a moderate area PM_{10} plan for the Las Vegas Valley on December 6, 1991. Based on this submittal, EPA determined on January 8, 1993, that the Las Vegas Valley could not practicably attain the PM_{10} NAAQS by the applicable attainment deadline for moderate areas (December 31, 1994, per section 188(c)(1) of the Act), and reclassified the Las Vegas Valley as serious (58 FR 3334).

In response to the area's reclassification as a "serious" PM_{10} nonattainment area, Clark County prepared and, and NDEP submitted, a serious area PM_{10} plan in 1997 that EPA subsequently proposed to disapprove, along with the previously submitted plan. See 65 FR 37324 (June 14, 2000). However, NDEP submitted a revised serious area PM_{10} plan in July 2001, which EPA later approved. 69 FR 32273 (June 9, 2004). Among the various serious area SIP elements approved by EPA in 2004 are the best available control measures (BACM) demonstration under CAA section 189(b)(1)(B), the most stringent measures (MSM) demonstration under CAA section 188(e), and various Clark County air pollution control rules regulating such fugitive dust sources as open areas, unpaved roads, and construction activities.

II. EPA's Analysis

A. What does the air quality data show as of the December 31, 2006 attainment date?

Clark County DAQEM is responsible for monitoring ambient air quality within Clark County. DAQEM submits monitoring network plan reports to EPA on an annual basis. These reports discuss the status of the air monitoring network, as required under 40 CFR part 58. Beginning in 2007, EPA reviews these annual plans for compliance with the applicable reporting requirements in 40 CFR 58.10. With respect to PM_{10}, we have found DAQEM's annual network plans to meet the applicable requirements under 40 CFR part 58. See EPA letters to DAQEM concerning DAQEM's annual network plan reports for years 2007, 2008, and 2009. Furthermore, we concluded in our *Technical System Audit Report* (February 2010) that Clark County DAQEM's ambient air monitoring network currently meets or exceeds the requirements for the minimum number of monitoring sites designated as SLAMS for all of the criteria pollutants, and that all of the monitoring sites are properly located with respect to monitoring objectives, spatial scales and other site criteria.

Clark County DAQEM currently operates nine PM_{10} SLAMS monitoring sites within Las Vegas Valley: Craig Road (North Las Vegas), Green Valley (Henderson), J.D. Smith School (North Las Vegas), Joe Neal (northwest Las Vegas), Lone Mountain (northwest Las Vegas), Orr School (central-southeast Las Vegas), Paul Meyer Park (southwest Las Vegas), Palo Verde School (west Las Vegas), Sunrise Acres School (central Las Vegas), and Walter Johnson (west Las Vegas). All nine sites monitor PM_{10} concentrations on a continuous basis using Beta Attenuation Monitors (BAMs). *See* Clark County DAQEM's *Annual Network Plan Report* (June 2010). Most of the sites are sited to provide PM_{10} concentration data at a

[3] EPA promulgated amendments to the ambient air monitoring regulations in 40 CFR parts 53 and 58 on October 17, 2006. See 71 FR 61236. The requirements for Special Purpose Monitors were revised and moved from 40 CFR 58.14 to 40 CFR 58.20.

[4] Because the annual PM_{10} standard was revoked effective December 18, 2006, see 71 FR 61144 (October 17, 2006), this document discusses only attainment of the 24-hour PM_{10} standard.

neighborhood scale [5] for the purpose of determining population exposure. The Craig Road site, however, is intended to capture the highest PM_{10} concentrations in Las Vegas Valley (*i.e.,* at the neighborhood scale), and Green Valley and Palo Verde are intended to represent middle scale [6] conditions.

In Table 1, below, we present a summary of AQS data collected at the nine PM_{10} sites currently in operation, as well as two sites (City Center in Las Vegas and Southeast Valley in Henderson), which have closed since 2006, and two sites (East Sahara in central Las Vegas and Walter Johnson in west Las Vegas), which no longer monitor PM_{10}. As shown in Table 1, only one PM_{10} exceedance was measured at any of the monitoring sites over the 2004–2006 period.

TABLE 1—SUMMARY OF LAS VEGAS VALLEY PM_{10} MONITORING DATA, 2004–2006

Monitoring site	Highest 24-hour PM_{10} concentration (μg/m^3)			Expected exceedances per year
	2004	2005	2006	2004–2006
City Center *	84	70	95	0.0
Craig Road	151	149	**157**	0.4
East Sahara *	89	99	93	0.0
Green Valley	84	79	97	0.0
J.D. Smith	122	144	136	0.0
Joe Neal	135	124	122	0.0
Lone Mountain	58	55	82	0.0
Orr	88	75	94	0.0
Paul Meyer	86	70	100	0.0
Palo Verde	65	46	69	0.0
Southeast Valley *	119	84	77	0.0
Sunrise Acres	72	120	113	0.0
Walter Johnson *	64	56	106	0.0

PM_{10}NAAQS = 150 μg/m^3. Exceedances shown in **bold** type.
* Site is no longer in operation or is no longer monitoring PM_{10}

Based on a review of air quality data during the three-year period ending with the December 31, 2006 attainment date (and summarized above in table 1), we find that the expected number of exceedances per year for Las Vegas Valley for 2004–2006 is 0.4 days per year (based on the Craig Road monitoring site, the only one measuring an exceedance). This is less than an annual expected exceedance rate for the 24-hour PM_{10} NAAQS of 1.0 and represents attainment of the standard. EPA has therefore determined that the Las Vegas Valley PM_{10} nonattainment area attained the PM_{10} NAAQS by the applicable attainment date of December 31, 2006.

B. Does more recent air quality data also show attainment?

Although the attainment date for the Las Vegas Valley PM_{10} nonattainment area is December 31, 2006, EPA has also reviewed the air quality data collected at Clark County DAQEM's PM_{10} monitoring sites in Las Vegas Valley from January 2007 through the first quarter of 2010. During this period, the only exceedances of the 150 μg/m^3 24-hour standard occurred at the Craig Road site, which monitored 24-hour concentrations of 203 and 168 μg/m^3 in 2008, but given the continuous nature of PM_{10} monitoring at the site, the annual expected exceedance rate, averaged over three years, has not exceeded 1.0. Thus, the data continue to show attainment of the 24-hour PM_{10} NAAQS in Las Vegas Valley since the end of 2006.

III. EPA's Final Action

Under section 188(b)(2) of the Clean Air Act, and based on complete, quality-assured data, we find that the Las Vegas Valley PM_{10} nonattainment area attained the 24-hour PM_{10} NAAQS by the applicable attainment date (December 31, 2006). We also find that the Las Vegas Valley nonattainment area is currently attaining the PM_{10} standard. This action is not a redesignation to attainment under CAA section 107(d)(3) because we have not yet approved a maintenance plan as meeting the requirements of section 175A of the CAA or determined that the area has met the other CAA requirements for redesignation. The PM_{10} classification and designation status in 40 CFR part 81 will remain serious nonattainment for Las Vegas Valley until such time as the State of Nevada meets the CAA requirements for redesignation of the valley to attainment.

We are publishing this rule without prior proposal because the Agency views this as a noncontroversial action and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal should adverse comments be filed. This action will be effective *October 4, 2010,* without further notice unless the EPA receives relevant adverse comments by *September 2, 2010.*

If we receive such comments, then we will publish a document withdrawing the final rule and informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. We will not institute a second comment period. Parties interested in commenting should so at this time. If no such comments are received, the public is advised that this rule will be effective on *October 4, 2010* and no further action will be taken on the proposed rule.

IV. Statutory and Executive Order Reviews

This action merely makes a determination based on air quality data and does not impose any additional

[5] In this context, "neighborhood scale" refers to conditions throughout some reasonably homogeneous urban sub-region with dimensions of a few kilometers. See 40 CFR part 58, appendix D, section 4.6.

[6] In this context, "middle scale" refers to conditions characteristic of areas from 100 meters to several kilometers.

Federal requirements. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997); is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by *October 4, 2010.* Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2)).

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 272

[EPA–R02–RCRA–2010–0249; FRL–9178–8]

New York: Incorporation by Reference of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Solid Waste Disposal Act, as amended, commonly referred to as the Resource Conservation and Recovery Act (RCRA), allows the Environmental Protection Agency (EPA) to authorize States to operate their hazardous waste management programs in lieu of the Federal program. EPA uses the regulations entitled "Approved State Hazardous Waste Management Programs" to provide notice of the authorization status of State programs and to incorporate by reference those provisions of the State regulations that will be subject to EPA's inspection and enforcement. This rule does not incorporate by reference the New York hazardous waste statutes. The rule codifies in the regulations the prior approval of New York's hazardous waste management program and incorporates by reference authorized provisions of the State's regulations.

DATES: This regulation is effective October 4, 2010, unless EPA receives adverse written comment on this regulation by the close of business September 2, 2010. If EPA receives such comments, it will publish a timely withdrawal of this direct final rule in the **Federal Register** informing the public that this rule will not take effect. The Director of the Federal Register approves this incorporation by reference as of October 4, 2010 in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R02–RCRA–2010–0249, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *E-mail: infurna.michael@epa.gov.*
- *Fax:* (212) 637–4437.
- *Mail:* Send written comments to Michael Infurna, Division of Environmental Planning and Protection, EPA, Region 2, 290 Broadway, 22nd Floor, New York, NY 10007.
- *Hand Delivery or Courier:* Deliver your comments to Michael Infurna, Division of Environmental Planning and Protection, EPA, Region 2, 290 Broadway, 22nd Floor, New York, NY 10007. Such deliveries are only accepted during the Regional Office's normal hours of operation. The public is advised to call in advance to verify the business hours. Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID. No. EPA–R02–RCRA–2010–0249. EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov,* or e-mail. The Federal *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your

identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties, and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters or any form of encryption, and be free of any defects or viruses. (For additional information about EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/dockets/*).

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy. You can inspect the records related to this codification effort in the EPA Region 2 Library by appointment only. To make an appointment please call (212) 637–3185.

FOR FURTHER INFORMATION CONTACT: Michael Infurna, Division of Environmental Planning and Protection, EPA Region 2, 290 Broadway, 22nd Floor, New York, NY 10007; *telephone number:* (212) 637–4177; *fax number:* (212) 637–4377; *e-mail address: infurna.michael@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Incorporation By Reference

A. What is codification?

Codification is the process of including the statutes and regulations that comprise the State's authorized hazardous waste management program into the CFR. Section 3006(b) of RCRA, as amended, allows the Environmental Protection Agency (EPA) to authorize State hazardous waste management programs. The State regulations authorized by EPA supplant the federal regulations concerning the same matter with the result that after authorization EPA enforces the authorized regulations. Infrequently, State statutory language which acts to regulate a matter is also authorized by EPA with the consequence that EPA enforces the authorized statutory provision. EPA does not authorize State enforcement authorities and does not authorize State procedural requirements. EPA codifies the authorized State program in 40 CFR part 272 and incorporates by reference State statutes and regulations that make up the approved program which is federally enforceable. EPA retains the authority to exercise its inspection and enforcement authorities in accordance with sections 3007, 3008, 3013 and 7003 of RCRA, 42 U.S.C. 6927, 6928, 6934 and 6973, and any other applicable statutory and regulatory provisions.

B. What is the history of the authorization and codification of New York's hazardous waste management program?

New York initially received final authorization for its hazardous waste management program, effective on May 29, 1986 (51 FR 17737) to implement its base hazardous waste management program. Subsequently, EPA authorized revisions to the State's program effective July 3, 1989 (54 FR 19184), May 7, 1990 (55 FR 7896), October 29, 1991 (56 FR 42944), May 22, 1992 (57 FR 9978), August 28, 1995 (60 FR 33753), October 14, 1997 (62 FR 43111), January 15, 2002 (66 FR 57679), March 14, 2005 (70 FR 1825, as corrected on April 5, 2005 (70 FR 17286)) and August 31, 2009 (74 FR 31380). EPA codified New York's authorized hazardous waste program effective September 30, 2002 (67 FR 49864) and May 25, 2007 (72 FR 14044). In this action, EPA is revising Subpart HH of 40 CFR part 272 to include the recent authorization revision actions effective August 31, 2009. (Note: Both the Federal and State requirements for the NY State Public Utilities Project XL, which were authorized effective August 31, 2009, will, unless extended, expire on May 24, 2011.)

C. What decisions have we made in this action?

This action codifies EPA's authorization of revisions to New York's hazardous waste management program. This codification reflects the State program in effect at the time EPA authorized revisions to the New York hazardous waste program in a final rule dated July 1, 2009 (74 FR 31380). The rule incorporates by reference the most recent version of the State's authorized hazardous waste management regulations. This action does not reopen any decision EPA previously made concerning the authorization of the State's hazardous waste management program. EPA is not requesting comments on its decisions published in the **Federal Register** notices referenced in section B of this document concerning revisions to the authorized program in New York.

EPA is incorporating by reference the authorized revisions to the New York hazardous waste program by revising Subpart HH to 40 CFR part 272. 40 CFR 272.1651 previously incorporated by reference New York's authorized hazardous waste regulations, as amended effective September 5, 2006, as well as selected provisions as found in the New York regulations dated January 31, 1992. Section 272.1651 also references the demonstration of adequate enforcement authority, including procedural and enforcement provisions, which provide the legal basis for the State's implementation of the hazardous waste management program. In addition, § 272.1651 references the Memorandum of Agreement, the Attorney General's Statements and the Program Description, which were evaluated as part of the approval process of the hazardous waste management program under Subtitle C of RCRA.

D. What is the effect of New York's codification on enforcement?

EPA retains the authority under statutory provisions, including but not limited to, RCRA sections 3007, 3008, 3013 and 7003, and other applicable statutory and regulatory provisions to undertake inspections and enforcement actions and to issue orders in all authorized States. With respect to enforcement actions, EPA will rely on Federal sanctions, Federal inspection authorities, and Federal procedures rather than the State analogs to these provisions. Therefore, the EPA is not incorporating by reference New York's inspection and enforcement authorities nor are those authorities part of New York's approved State program which operates in lieu of the Federal program. 40 CFR 272.1651(c)(2) lists these authorities for informational purposes, and because EPA also considered them in determining the adequacy of New York's procedural and enforcement authorities. New York's authority to inspect and enforce the State's hazardous waste management program requirements continues to operate independently under State law.

E. What State provisions are not part of the codification?

The public is reminded that some provisions of New York's hazardous waste management program are not part

of the federally authorized State program. These non-authorized provisions include:

(1) Provisions that are not part of the RCRA subtitle C program because they are "broader in scope" than RCRA subtitle C (see 40 CFR 271.1(i));

(2) Unauthorized amendments to authorized State provisions;

(3) New unauthorized State requirements; and

(4) State procedural and enforcement authorities which are necessary to establish the ability of the State's program to enforce compliance but which do not supplant the Federal statutory enforcement and procedural authorities.

State provisions that are "broader in scope" than the Federal program are not incorporated by reference in 40 CFR part 272. For reference and clarity, 40 CFR 272.1651(c)(3) lists the New York statutory and regulatory provisions which are "broader in scope" than the Federal program and which are not part of the authorized program being incorporated by reference. This action updates that list of "broader in scope" provisions. While "broader in scope" provisions are not part of the authorized program and cannot be enforced by EPA; the State may enforce such provisions under State law.

Additionally, New York's hazardous waste regulations include amendments which have not been authorized by EPA. Since EPA cannot enforce a State's requirements which have not been reviewed and authorized in accordance with RCRA section 3006 and 40 CFR part 271, it is important to be precise in delineating the scope of a State's authorized hazardous waste program. Regulatory provisions that have not been authorized by EPA include amendments to previously authorized State regulations as well as new State requirements.

State regulations that are not incorporated by reference in this rule at 40 CFR 272.1651(c)(1), or that are not listed in 40 CFR 272.1651(c)(3) ("broader in scope") or 40 CFR 272.1651(c)(2) ("procedural and enforcement authorities"), are considered new unauthorized State requirements. These requirements are not Federally enforceable.

F. What will be the effect of Federal HSWA requirements on the codification?

With respect to any requirement(s) pursuant to the Hazardous and Solid Waste Amendments of 1984 (HSWA) for which the State has not yet been authorized and which EPA has identified as taking effect immediately in States with authorized hazardous waste management programs, EPA will enforce those Federal HSWA standards until the State is authorized for those provisions.

The codification does not affect Federal HSWA requirements for which the State is not authorized. EPA has authority to implement HSWA requirements in all States, including States with authorized hazardous waste management programs, until the States become authorized for such requirements or prohibitions, unless EPA has identified the HSWA requirement(s) as an optional or as a less stringent requirement of the Federal program. A HSWA requirement or prohibition, unless identified by EPA as optional or as less stringent, supersedes any less stringent or inconsistent State provision which may have been previously authorized by EPA (50 FR 28702, July 15, 1985).

Some existing State requirements may be similar to the HSWA requirement implemented by EPA. However, until EPA authorizes those State requirements, EPA enforces the HSWA requirements and not the State analogs.

II. Statutory and Executive Order Reviews

This rule codifies EPA-authorized hazardous waste requirements pursuant to RCRA 3006 and imposes no requirements other than those imposed by State law. Therefore, this rule complies with applicable executive orders and statutory provisions as follows.

1. *Executive Order 12866: Regulatory Planning Review*—The Office of Management and Budget (OMB) has exempted this rule from its review under Executive Order 12866 (58 FR 51735, October 4, 1993).

2. *Paperwork Reduction Act*—This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

3. *Regulatory Flexibility Act*—This rule codifies New York's authorized hazardous waste management regulations in the CFR and does not impose new burdens on small entities. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

4. *Unfunded Mandates Reform Act*—Because this rule codifies pre-existing State hazardous waste management program requirements which EPA already approved under 40 CFR part 271, and with which regulated entities must already comply, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

5. *Executive Order 13132: Federalism*—Executive Order 13132 (64 FR 43255, August 10, 1999) does not apply to this rule because it will not have federalism implications (*i.e.,* substantial direct effects on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government). This action codifies existing authorized State hazardous waste management program requirements without altering the relationship or the distribution of power and responsibilities established by RCRA.

6. *Executive Order 13175: Consultation and Coordination with Indian Tribal Governments*—Executive Order 13175 (65 FR 67249, November 6, 2000) does not apply to this rule because it will not have tribal implications (*i.e.,* substantial direct effects on one or more Indian tribes, or on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes).

7. *Executive Order 13045: Protection of Children from Environmental Health & Safety Risks*—This rule is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant and it is not based on environmental health or safety risks.

8. *Executive Order 13211: Actions that Significantly Affect Energy Supply, Distribution, or Use*—This rule is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

9. *National Technology Transfer Advancement Act*—The requirements being codified are the result of New York's voluntary participation in EPA's State program authorization process under RCRA Subtitle C. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

10. *Executive Order 12988*—As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), EPA has taken the necessary steps in this action to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct.

11. *Congressional Review Act*—EPA will submit a report containing this rule and other information required by the Congressional Review Act (5 U.S.C. 801 *et seq.,* as amended) to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This action will be effective October 4, 2010.

List of Subjects in 40 CFR Part 272

Environmental Protection, Administrative practice and procedure, Confidential business information, Hazardous waste, Hazardous waste transportation, Incorporation by reference, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This action is issued under the authority of Sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act as amended, 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: April 27, 2010.

Judith A. Enck,

Regional Administrator, EPA Region 2.

■ For the reasons set forth in the preamble, 40 CFR part 272 is amended as follows:

PART 272—APPROVED STATE HAZARDOUS WASTE MANAGEMENT PROGRAMS

■ 1. The authority citation for part 272 continues to read as follows:

Authority: Secs. 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6912(a), 6926, and 6974(b).

■ 2. Revise § 272.1651 to read as follows:

§ 272.1651 New York State-Administered Program: final authorization.

(a) Pursuant to section 3006(b) of RCRA, 42 U.S.C. 6926(b), New York has final authorization for the following elements as submitted to EPA in New York's base program application for final authorization which was approved by EPA effective on May 29, 1986. Subsequent program revision applications were approved effective on July 3, 1989, May 7, 1990, October 29, 1991, May 22, 1992, August 28, 1995, October 14, 1997, January 15, 2002, March 14, 2005, and August 31, 2009. (**Note:** Both the Federal and State requirements for the NY State Public Utilities Project XL, which were authorized effective August 31, 2009, will, unless extended, expire on May 24, 2011.)

(b) The State of New York has primary responsibility for enforcing its hazardous waste management program. However, EPA retains the authority to exercise its inspection and enforcement authorities in accordance with sections 3007, 3008, 3013, 7003 of RCRA, 42 U.S.C. 6927, 6928, 6934, 6973, and any other applicable statutory and regulatory provisions, regardless of whether the State has taken its own actions, as well as in accordance with other statutory and regulatory provisions.

(c) *State Statutes and Regulations.*

(1) The New York regulations cited in paragraph (c)(1)(i) of this section are incorporated by reference as part of the hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.* The Director of Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain copies of the New York regulations that are incorporated by reference in this paragraph from West Group, 610 Opperman Drive, Eagan, MN 55123, *Attention:* D3–10 (*Phone #:* 1–800–328–9352). You may inspect a copy at EPA Region 2 Library, 290 Broadway, 16th Floor, New York, NY 10007 (Phone number: (212) 637–3185), or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

(i) The Binder entitled "EPA Approved New York Regulatory Requirements Applicable to the Hazardous Waste Management Program", dated July 2009.

(ii) [Reserved]

(2) EPA considered the following statutes and regulations in evaluating the State program but is not incorporating them herein for enforcement purposes:

(i) Environmental Conservation Laws (ECL), 1997 Replacement Volume, as revised by the 2004 Cumulative Pocket Part: sections 1–0303(18), 3–0301(1) (introductory paragraph); 3–0301(1)(a) and (b); 3–0301(1)(m); 3–0301(1)(o); 3–0301(1)(w); 3–0301(1)(x); 3–0301(1)(cc); 3–0301(2) introductory paragraph; 3–0301(2)(a), (b), (d) through (j), (l), (m) and (q); 3–0301(2)(z); 3–0301(4); 19–0301(1) (except 19–0301(c), (e) and (f)); 19–0303(1) through (3); 19–0304; 27–0105; 27–0701; 27–0703; 27–0705; 27–0707 (except 27–0707(2–c)); 27–0711; 27–0900 through 27–0908; 27–0909 (except 27–0909(5)); 27–0910 through 27–0922; 27–1105; 70–0101; 70–0103; 70–0105 (except 70–0105(3) and 70–0105(6)); 70–0107(1) and (2); 70–0107(3) introductory paragraph; 70–0107(3)(l); 70–0109; 70–0113; 70–0115 (except (2)(c) and (d)); 70–0117 (except 70–0117(5)–(7); 70–0119; 70–0121; 71–0301; 71–1719; 71–2705; 71–2707; 71–2709 through 71–2715; 71–2717; 71–2720; and 71–2727.

(iii) McKinney's Consolidated Laws of New York, Book 1, Executive Law (EL), Article 6: Section 102.

(iv) McKinney's Consolidated Laws of New York, Book 46, Public Officers Law (POL), as amended through 2004: Sections 87 and 89.

(v) McKinney's Consolidated Laws of New York, Book 7B, Civil Practice Law and Rules (CPLR), as amended through 2004: Sections 1013, 6301; 6311; and 6313.

(vi) Title 6, New York Codes, Rules and Regulations (6 NYCRR), Volume A–2A, Hazardous Waste Management System, as amended through September 5, 2006: Sections 372.1(f); 373–1.1(f) and (g); 373–1.4(b); 373–1.4(d) through (f); 373–1.6(c); 621.1 through 621.4; 621.5 (except (d)(5), (d)(6)(i), (d)(7)(i)(a), (d)(7)(i)(c) and (d)(9)); 621.6 (except (b), (d)(4) and (d)(5)); 621.7; 621.8; 621.9 (except (a)(5), (c)(2) and (e)(2)); 621.10; 621.11 (except (d)); 621.12 through 621.15; and 621.16 (except (b), (d) and (e)).

(3) The following statutory and regulatory provisions are broader in scope than the Federal program, are not part of the authorized program, are not incorporated by reference and are not federally enforceable:

(i) Environmental Conservation Laws (ECL), 1997 Replacement Volume, as revised by the 2004 Cumulative Pocket Part: Sections 27–0301; 27–0303; 27–0305; 27–0307; 27–0909(5); 27–0923; 27–0925 and 27–0926.

(ii) Environmental Conservation Laws (ECL), 1997 Replacement Volume, as revised by the 2006 Cumulative Pocket Part: Section 27–1109(6).

(iii) Title 6, New York Codes, Rules and Regulations (6 NYCRR), Volume A–2A, Hazardous Waste Management System, as amended through September 5, 2006: Sections 370.2(b)(92) "Household hazardous waste"; 370.2(b)(93) "Household collection facility"; 371.4(e); 372.1(e)(9); 372.2(b)(5)(ii); 372.3(a)(1); 372.3(a)(4); 372.3(b)(6)(iv); 372.3(d)(3); 373–1.1(d)(1)(x); 373–1.4(c); 373–2.5(b)(3)(ii)(d); 373–2.5(b)(3)(ii)(e); 373–2.15(a)(2); 373–3.5(b)(3)(ii)(d); 373–3.5(b)(3)(ii)(e); 374–3.4(a)(2); and 376.4(f).

(iv) At 371.4(c), New York retains K064, K065, K066, K090 and K091 as

hazardous wastes while EPA has removed them from the table at 40 CFR 261.32 and no longer regulates them as hazardous wastes (64 FR 56469; October 20, 1999).

(v) Throughout New York's hazardous waste regulations, the State cross-references Part 364, which sets forth additional transporter requirements including permit and liability requirements (for examples, see 6 NYCRR sections 372.2(b)(8), 373–1.7(h)(3), 374–3.3(i)(1) and (2), 374–3.4(a), 374–3.6(a)(1) and Appendix 30 Instructions for Generators/Item 8). The transporter permit and liability requirements are broader in scope than the Federal program.

(vi) New York did not adopt an analog to 40 CFR 261.4(g) that excludes certain dredged materials from the State definition of hazardous waste. Instead, the State subjects these materials to full regulation as hazardous wastes.

(vii) New York State regulations do not incorporate the Mineral Processing Secondary Materials Exclusion at 40 CFR 261.4(a)(17) and the related changes affecting 40 CFR 261.2(c)(3) and (c)(4)/Table, and 40 CFR 261.2(e)(1)(iii). Since New York did not adopt the exclusion at 40 CFR 261.4(a)(17) the State has a broader in scope program because the effect is to include materials that are not considered solid waste by EPA.

(viii) At 373–4, New York implements a Household Hazardous Waste program, whereas the Federal program excludes household waste from regulation as hazardous waste at 261.4(b)(1).

(ix) The following New York provisions are broader in scope because they include requirements associated with the regulation of PCB waste as a state-only hazardous waste: 372.1(e)(9) and 376.1(g)(1)(i), 376.4(f). PCB wastes are regulated under the Federal Toxic Substances Control Act (TSCA) at 40 CFR part 761 rather than under the Federal RCRA program.

(4) *Memorandum of Agreement.* The Memorandum of Agreement between EPA Region 2 and the State of New York, signed by the Commissioner of the State of New York Department of Environmental Conservation on July 20, 2001, and by the EPA Regional Administrator on January 16, 2002, although not incorporated by reference, is referenced as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(5) *Statement of Legal Authority.* "Attorney General's Statement for Final Authorization", signed by the Attorney General of New York in 1985 and revisions, supplements and addenda to that Statement dated August 18, 1988, July 26, 1989, August 15, 1991, October 11, 1991, July 28, 1994, May 30, 1997, February 5, 2001, April 2, 2004 and June 13, 2008 (including three certifications), although not incorporated by reference, are referenced as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(6) *Program Description.* The Program Description and any other materials submitted as supplements thereto, although not incorporated by reference, are referenced as part of the authorized hazardous waste management program under subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

■ 3. Appendix A to part 272, State Requirements, is amended by revising the listing for "New York" to read as follows:

Appendix A to Part 272—State Requirements

* * * * *

New York

The regulatory provisions include:

Title 6, New York Codes, Rules and Regulations (6 NYCRR), Volume A–2A, Hazardous Waste Management System, as amended through September 5, 2006.

Please Note: For a few regulations, the authorized regulation is an earlier version of the New York State regulation. For these regulations, EPA authorized the version of the regulations that appear in the Official Compilation of Code, Rules and Regulations dated January 31, 1992. New York State made later changes to these regulations but these changes have not been authorized by EPA. The regulations where the authorized regulation is an earlier version of the regulation are noted below by inclusion in parentheses of January 31, 1992 after the regulatory citations.

Part 370—Hazardous Waste Management System—General: Sections 370.1(a) (except (a)(3)); 370.1(b) through (d); 370.1(e) (except (e)(9)); 370.1(f); 370.2(a); 370.2(b)(1) through (b)(15) "battery"; 370.2(b)(15) "bedrock" (January 31, 1992); 370.2(b)(17) through (b)(91); 370.2(b)(94) through (b)(125); 370.2(b)(127) through (b)(137); 370.2(b)(139) through (b)(213); 370.2(b)(215); 370.2(B)(216); 370.2(b)(217) (except the last sentence); 370.2(b)(218) through (b)(221); 370.3 (except 370.3(c)); 370.4; 370.5 (except (b)).

Part 371—Identification and Listing of Hazardous Waste: Sections 371.1(a) through (c); 371.1(d) (except (d)(1)(ii)(c) and (d)(1)(ii)(e)); 371.1(e) (except 371.1(e)(2)(vi)(b)(21); 371.1(f)(1) through (7); 371.1(f)(8) (except the phrase "or such mixing occurs at a facility regulated under Subpart 373–4 or permitted under Part 373 of this Title"); 371.1(f)(9) and (f)(10); 371.1(g)(1)(i); 371.1(g)(1)(ii) (except (g)(1)(ii)(c)); 371.1(g)(1)(iii); 371.1(g)(2) through (4); 371.1(h) through (j); 371.2; 371.3; 371.4(a) and (b); 371.4(c) (except K064, K065, K066, K090 and K091 entries); 371.4(d), (f) and (i).

Part 372—Hazardous Waste Manifest System and Related Standards for Generators, Transporters and Facilities: Sections 372.1(a) through (d); 372.1(e)(2)(ii)(c) (January 31, 1992); 372.1(e)(2)(iii)(c) (January 31, 1992); 372.1(e)(3) through (e)(8); 372.1(g) and (h); 372.2 introductory paragraph through (b)(4); 372.2(b)(5) (except (b)(5)(ii)); 372.2(b)(6) through (b)(8); 372.2(b)(10); 372.2(c); 372.2(d) [1]; 372.3 (except (a)(1), (a)(4), (a)(7)(i), (a)(8), (b)(3), (b)(5)(ii), (b)(6)(iv), (b)(7)(i)(d), (c)(4) and (d)(3)); 372.5 (except (h) and (i); 372.6; 372.7(a) and (b); 372.7(c) (except (c)(1)(ii)); and 372.7(d).

Part 373, Subpart 373–1—Hazardous Waste Treatment, Storage and Disposal Facility Permitting Requirements: Sections 373–1.1(a) through (c), 373–1.1(d) introductory paragraph through (d)(1)(xx) (except reserved paragraphs, (d)(1)(x) and (d)(1)(xviii); 373–1.1(d)(1)(xxi) [1]; 373–1.1(d)(2); 373–1.1(e); 373–1.1(h) and (i); 373–1.2; 373–1.3; 373–1.4(a); 373–1.4(g) and (h); 373–1.5(a)(1); 373–1.5(a)(2) (except (a)(2)(xviii)); 373–1.5(a)(3) and (4); 373–1.5(b) and (c); 373–1.5(d) through (p) (except reserved paragraphs); 373–1.6 (except (c)); 373–1.7 through 373–1.11.

Part 373, Subpart 373–2—Final Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities: Sections 373–2.1 through 373–2.4; 373–2.5(a); 373–2.5(b) (except (b)(1)(i)(c), (b)(3)(ii)(d) and (b)(3)(ii)(e)); 373–2.5(c) through (g); 373–2.6 through 373–2.11; 373–2.12 (except 373–2.12(a)(1) and (d)); 373–2.12(a)(1) (January 31, 1992); 373–2.13; 373–2.14; 373–2.15 (except (a)(2)); 373–2.19 (except (e)(1)(ii)); 373–2.23; 373–2.24; 373–2.27; 373–2.28; 373–2.29; 373–2.30; and 373–2.31.

Part 373, Subpart 373–3—Interim Status Standards Regulations for Owners and Operators of Hazardous Waste Facilities: Sections 373–3.1 (except 373–3.1(a)(4) and the phrase "or Subpart 374–2 of this Title" in 373–3.1(a)(6)); 373–3.2 through 373–3.4; 373–3.5 (except 373–3.5(b)(1)(i)(c), (b)(3)(ii)(d) and (b)(3)(ii)(e)); 373–3.6 through 373–3.18; 373–3.23; and 373–3.27 through 373–3.31.

Part 374, Subpart 374–1—Standards for the Management of Specific Hazardous Wastes and Specific Types of Hazardous Waste Management Facilities: Sections 374–1.1; 374–1.3; 374–1.6 (except (a)(2)(iii)); 374–1.7; 374–1.8(a)(1); 374–1.8(a)(2) (except the second sentence "Such used oil * * * of this Title" in (a)(2)(i)); 374–1.8(a)(3) through (a)(6); 374–1.8(b) through (m) (except reserved paragraphs); 374–1.9; and 374–1.13.

Part 374, Subpart 374–3—Standards for Universal Waste: Sections 374–3.1 (except (f) and (g)); 374–3.2; 374–3.3; 374–3.4 (except (a)(2)); 374–3.5; 374–3.6; and 374–3.7.

Part 376—Land Disposal Restrictions: Sections 376.1 (except (a)(5), (a)(9), (e), (f), and (g)(1)(ii)(b)); 376.2; 376.3 (except (b)(4) and (d)(2)); 376.4 (except (c)(2), (e)(1)–(7) and (f)); and 376.5.

Appendices: Appendices 19 through 25; Appendices 27 through 30; Appendix 33; Appendix 37; Appendix 38; Appendices 40 through 49 and Appendices 51 through 55.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[WC Docket No. 07–245; GN Docket No. 09–51; FCC No. 10–84]

Implementation of Section 224 of the Act; a National Broadband Plan for Our Future

AGENCY: Federal Communications Commission.

ACTION: Declaratory ruling.

SUMMARY: In this Declaratory Ruling, the Commission clarifies that communications providers have a statutory right to use space- and cost-saving techniques that are consistent with pole owners' use of those techniques. The Commission also establishes that providers have a statutory right to timely access to poles.

DATES: Effective September 2, 2010.

FOR FURTHER INFORMATION CONTACT: Jonathan Reel, Wireline Competition Bureau, Competition Policy Division, 202–418–1580.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Declaratory Ruling in WC Docket No. 07–245, GN Docket No. 09–51, adopted May 20, 2010, and released May 20, 2010. This Declaratory Ruling rules on issues raised in Implementation of Section 224 of the Act; Amendment of the Commission's Rules and Policies Governing Pole Attachments, Notice of Proposed Rulemaking 73 FR 6879, February 6, 2008.

Synopsis of the Declaratory Ruling

1. In this Order, the Commission takes steps to clarify the statute to lower the costs of telecommunications, cable, and broadband deployment and to promote competition, as recommended in the National Broadband Plan. The Commission clarifies that communications providers have a statutory right to use space- and cost-saving techniques that are consistent with pole owners' use of those techniques. The Commission also establishes that providers have a statutory right to timely access to poles.

Background

2. In 1978, Congress first directed the Commission to ensure that the rates, terms, and conditions for pole attachments by cable television systems are just and reasonable when it added section 224 to the Act. The Telecommunications Act of 1996 (1996 Act) expanded the definition of pole attachments to include attachments by providers of telecommunications service, and granted both cable systems and telecommunications carriers an affirmative right of nondiscriminatory access to any pole, duct, conduit, or right-of-way owned or controlled by a utility. However, the 1996 Act permits utilities to deny access where there is insufficient capacity and for reasons of safety, reliability or generally applicable engineering purposes. Besides establishing a right of access, the 1996 Act mandates a rate formula for telecommunications carriers that differs from the rate formula for attachments used solely to provide cable service.

3. The Commission implemented the new section 224 access requirements in the *Local Competition Order.* At that time, the Commission concluded that it would determine the reasonableness of a particular condition of access on a case-by-case basis. Finding that no single set of rules could take into account all attachment issues, the Commission specifically declined to adopt the National Electric Safety Code (NESC) in lieu of access rules. The Commission also recognized that utilities typically develop individual standards and incorporate them into pole attachment agreements, and that, in some cases, federal, state, or local laws also impose relevant restrictions. The *Local Competition Order* acknowledged concerns that utilities might deny access unreasonably, but rather than adopt a set of substantive engineering standards, the Commission decided that procedures for requiring utilities to justify the conditions they placed on access would best safeguard attachers' rights. The Commission did adopt five rules of general applicability and several broad policy guidelines in the *Local Competition Order.* The Commission also stated that it would monitor the effect of the case-specific approach, and would propose specific rules at a later date if conditions warranted.

4. In the *1998 Implementation Order,* the Commission adopted rules implementing the 1996 Act's new pole attachment rate formula for telecommunications carriers. The Commission also concluded that cable television systems offering both cable and Internet access service should continue to pay the cable rate. The Commission further held that the statutory right of nondiscriminatory access includes attachments by wireless carriers. The latter two determinations were challenged but ultimately upheld by the Supreme Court. In particular, the Court held that section 224 gives the Commission broad authority to adopt just and reasonable rates. The Court also deferred to the Commission's conclusion that wireless carriers are entitled by section 224 to attach facilities to poles.

5. On November 20, 2007, the Commission issued the *Pole Attachment Notice* 73 FR 6879, February 6, 2008 in recognition of the importance of pole attachments to the deployment of communications networks, in part in response to petitions for rulemaking from USTelecom and Fibertech Networks. USTelecom argued that incumbent LECs, as providers of telecommunications service, are entitled to just and reasonable pole attachment rates, terms, and conditions of attachment even though, under section 224, they do not count as "telecommunications carriers" and have no statutory right of access. Fibertech petitioned the Commission to initiate a rulemaking to set access standards for pole attachments, including standards for timely performance of make-ready work, use of boxing and extension arms, and use of qualified third-party contract workers, among other concerns. The *Pole Attachment Notice* focused on the effect of disparate pole-attachment rates on broadband competition and arrived at two tentative conclusions: first, that all attachers should pay the same pole attachment rate for all attachments used to provide broadband Internet access service and second, that the rate should be higher than the current cable rate, yet no greater than the telecommunications rate. In addition to the concerns raised by USTelecom and Fibertech, the *Pole Attachment Notice* inquired about application of the telecommunications rate to wireless pole attachments and other pole access concerns.

6. The American Recovery and Reinvestment Act of 2009 included a requirement that the Commission develop a national broadband plan to ensure that every American has access to broadband capability. On March 16, 2010, the National Broadband Plan was released, and identified access to rights-of-way—including access to poles—as having a significant impact on the deployment of broadband networks.

Accordingly, the Plan included several recommendations regarding pole attachment policies to further advance broadband deployment. Among other things, the Plan recommended that:

- The FCC implements rules that will lower the cost of the pole attachment "make-ready" process. For example, the FCC should authorize attachers to use space- and cost-saving techniques, such as boxing or extension arms, where practical and in a way that is consistent with pole owners' use of those techniques; and
- The FCC establish a comprehensive timeline for each step of the section 224 access process and reform the process for resolving disputes regarding infrastructure access.

Discussion

7. The National Broadband Plan recommended a number of actions intended to lower the cost and improve the speed of access to utility poles. The Commission finds that it is in the public interest to implement some of these recommendations immediately to clarify the statutory provisions governing pole attachments and to streamline the pole attachment process. In particular, the Commission clarifies that the statutory nondiscriminatory access requirement allows communications providers to use space- and cost-saving attachment techniques where practical and consistent with pole owners' use of those techniques. The Commission also concludes that the statutory right to just and reasonable access to poles includes the right of timely access.

Nondiscriminatory Use of Attachment Techniques

8. The Commission concludes that the nondiscriminatory access obligation established by section 224(f)(1) of the Act requires a utility to allow cable operators and telecommunications carriers to use the same pole attachment techniques that the utility itself uses. For example, in the 2007 *Pole Attachment Notice,* the Commission sought comment on the use of techniques such as boxing and bracketing. As attachers have explained, boxing and bracketing can help avoid the cost and delay of pole replacement or make-ready work involving electrical facilities, and could be appropriate when practical—for example, when the facilities on the pole can be safely reached by a ladder or bucket truck—and when such techniques previously have been allowed by the pole owner. Similarly, the National Broadband Plan recommends that the Commission give attachers the right to use these techniques "where practical and in a way that is consistent with pole owners' use of [them]."

9. The Commission now clarifies that utilities must allow attachers to use the same attachment techniques that the utility itself uses in similar circumstances, although utilities retain the right to limit their use when necessary to ensure safety, reliability, and sound engineering. Its conclusion here is consistent with the interpretation of the Act in prior bureau orders.

10. Clarifying this application of a utility's nondiscriminatory access obligation provides certainty that will spur competition and promote the deployment of a variety of technologies. As observed in the National Broadband Plan and by commenters, allowing attachers equal use of techniques like boxing and bracketing will encourage competition and advance the deployment of telecommunications, cable, and both wireless and wireline broadband services. Accordingly, any attachment technique that a utility uses or allows to be used will henceforth be presumed appropriate for use by attachers on that utility's poles under comparable circumstances. The Commission believes that this action will promote the deployment of and competition for telecommunications, cable, and broadband services.

11. The Commission's holding is carefully tailored to reflect the legitimate needs of pole owners, as well. Some pole owners contend that the use of boxing and bracketing complicates pole maintenance and replacement, can compromise safety, and may not be consistent with sound engineering practices. Commenters also assert that utilities should be free to prohibit their use or, at the very least, to consider the appropriateness of such techniques on a case-by-case basis. The Commission agrees and emphasizes that its commitment to ensuring this form of nondiscriminatory access is limited by the utility's existing practices. If a utility believes that boxing and bracketing are fundamentally unsafe or otherwise incompatible with proper attachment practice, it can choose not to use or allow them at all. Moreover, even once the presumption that such techniques are appropriate has been triggered, a utility may rebut it with respect to any single pole or class of poles for reasons of safety, reliability and generally applicable engineering purposes.

12. The Commission recognizes that some pole owners employ these techniques sparingly and may be concerned that this clarification will allow attachers to use boxing and attachment arms in situations where the pole owner itself would not. The Commission believes, however, that this framework will allow utilities to limit the use of these techniques whenever appropriate and, thereby, prevent attachers from employing the techniques inappropriately. The Commission's present holding is not designed to broaden the range of circumstances in which these techniques are used. Rather, it is to prevent utilities from denying attachers the benefits of these techniques in situations where the utility itself would, or has, used them.

13. If a utility chooses to allow boxing and bracketing in some circumstances but not others, the limiting circumstances must be clear, objective, and applied equally to the utility and attaching entity. They should also be publicly available—on a website, for instance—with the utility providing examples where helpful. Such *ex ante* guidance will help attachers make informed decisions and should facilitate the attachment process. If a utility denies an attachment technique that it uses for reasons not included in those made publicly available, it must explain its decision in writing to the requesting entity. In an accompanying Further Notice of Proposed Rulemaking (Further NPRM), FR Doc. 2010–17048, the Commission seeks comment on additional considerations regarding boxing and bracketing, including the ability of utilities to prohibit boxing and bracketing going forward, and whether utilities' decisions regarding the use of boxing and bracketing should also be made publicly available.

14. The Commission rejects the argument that its conclusion is inconsistent with section 224(f)(2) of the Act, which allows electric utilities to deny access where there is "insufficient capacity." Although the Commission recognizes that the Eleventh Circuit held in *Southern Co.* v. *FCC* that utilities are not obligated to provide access to a pole when it is agreed that the pole's capacity is insufficient to accommodate a proposed attachment, the Commission does not find that to be the case when boxing and bracketing are able to be used. The Eleventh Circuit held that the term "insufficient capacity" in section 224(f)(2) is ambiguous, and that the Commission has discretion in filling that "gap in the statutory scheme." The court upheld the Commission's finding that "insufficient capacity" means the absence of usable physical space on a pole. Applying that definition here, the Commission finds that a pole does not have "insufficient capacity" if it could accommodate an additional attachment using

conventional methods of attachment that a utility uses in its own operations, such as boxing and bracketing. Unlike requiring a pole owner to replace a pole with a taller pole, these techniques take advantage of usable physical space on the existing pole.

15. The Eleventh Circuit acknowledged in *Southern* that its decision was driven by the need to "construe statutes in such a way to 'give effect, if possible, to every clause and word of a statute.' " By virtue of that decision, however, the statutory language of section 224(f)(2) *is* given effect, in that utilities may deny access for "insufficient capacity" when "it is agreed that capacity on a given pole or other facility is insufficient." Thus, no particular interpretation of section 224(f)(2) is required in the context of boxing and bracketing simply to "give effect" to that statutory language.

16. The Commission finds that its reading of the ambiguous term "insufficient capacity" is a reasonable middle ground. Some utilities have argued that a pole has insufficient capacity—and thus access may be denied under section 224(f)(2)—if *any* make-ready work is needed. At the other extreme, the statute might be read to require a utility to completely replace a pole—an interpretation that some commenters oppose. The Commission sees no reason to adopt either of those extreme positions. Within those extremes is a range of practices, such as line rearrangement, overlashing, boxing, and bracketing that exploit the capacity of existing infrastructure in some way. Although commenters are divided regarding whether a pole has insufficient capacity if techniques such as boxing and bracketing are necessary to accommodate a new attachment, the Commission finds more persuasive the position that a pole does not have insufficient capacity if a new attachment can be added to the existing pole using conventional attachment techniques. Utilization of existing infrastructure, rather than replacing it, is a fundamental principal underlying the Act. As discussed above, the Commission finds that the Commission's interpretation still ensures that "insufficient capacity" is given some meaning, while also, to the greatest extent possible, helping spur competition and promoting the deployment of communications technologies, consistent with the broad "pro competitive" purposes of the 1996 Act, as well as the more specific direction of section 706 of the 1996 Act that the Commission promote the deployment of advanced services "by utilizing, in a manner consistent with the public interest, convenience, and necessity, * * * measures that promote competition in the local telecommunications market, or other regulating methods that remove barriers to infrastructure investment." Accordingly, the Commission concludes that, where a pole can accommodate new attachments through boxing, bracketing, or similar attachment techniques, there is not "insufficient capacity" within the meaning of section 224(f)(2)

Timely Access to Pole Attachments

17. The Commission also holds that access to poles, including the preparation of poles for attachment, commonly termed "make-ready," must be timely in order to constitute just and reasonable access. Section 224 of the Act requires utilities to provide cable television systems and any telecommunications carrier with nondiscriminatory access to any poles, ducts, conduits, and rights-of-way owned or controlled by it, and instructs the Commission to ensure that the terms and conditions for pole attachments are just and reasonable. The Commission previously has recognized the importance of timeliness in the context of specific aspects of the pole attachment process. The National Broadband Plan likewise recognized the importance of timely access to poles. The Commission thus holds that, pursuant to section 224 of the Act, the duty to proceed in a timely manner applies to the entirety of the pole attachment process. Make-ready or other pole access delays not warranted by the circumstances thus are unjust and unreasonable under section 224.

18. Section 224 also provides for the adoption of rules to carry out its provisions, and the Commission seeks comment in the Further NPRM regarding a proposed comprehensive timeline for each step of the pole access process. The Commission clarifies, however, that utilities must perform make-ready promptly and efficiently, consistent with evaluation of capacity, safety, reliability, and generally applicable engineering practices, whether or not a specific rule applies to an aspect of the make-ready process.

Procedural Matters

Paperwork Reduction Act

19. This document does not contain new information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

Ex Parte Procedures

20. This proceeding shall be treated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules. Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentations must contain summaries of the substance of the presentations and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally required. Other requirements pertaining to oral and written presentations are set forth in § 1.1206(b) of the Commission's rules.

Ordering Clauses

21. Accordingly, *it is ordered* that pursuant to sections 1, 4(i), 4(j), 224, 251(b)(4), and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i)–(j), 224, 251(b)(4), 303, this Order in WC Docket No. 07–245 *is adopted.*

22. *It is further ordered* that, pursuant to §§ 1.4(b)(1) and 1.103(a) of the Commission's rules, 47 CFR 1.4(b)(1), 1.103(a), this Order *shall be effective* September 2, 2010.

Federal Communications Commission.

Bulah P. Wheeler,

Deputy Manager.

Endangered and Threatened Wildlife and Plants; Determination of Threatened Status for Five Penguin Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), determine threatened status for five penguins: The yellow-eyed penguin (*Megadyptes antipodes*), white-flippered penguin (*Eudyptula minor albosignata*), Fiordland crested penguin (*Eudyptes pachyrhynchus*), Humboldt penguin (*Spheniscus humboldti*), and erect-crested penguin (*Eudyptes sclateri*) under the Endangered Species Act of 1973, as amended (Act).

DATES: This rule becomes effective September 2, 2010.

ADDRESSES: This final rule is available on the Internet at *http://www.regulations.gov. Comments and materials received, as well as supporting* documentation used in the preparation of this rule, will be available for public inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Suite 420, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Janine Van Norman, Chief, Branch of Foreign Species, Endangered Species Program, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 420, Arlington, VA 22203; telephone 703-358-2171; facsimile 703-358-1735. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Background

On December 18, 2008, we published a proposed rule (73 FR 77303) to list the yellow-eyed penguin (*Megadyptes antipodes*), white-flippered penguin (*Eudyptula minor albosignata*), Fiordland crested penguin (*Eudyptes pachyrhynchus*), Humboldt penguin (*Spheniscus humboldti*), and erect-crested penguin (*Eudyptes sclateri*) under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). That document also served as the 12–month finding on a petition to list these species, which are 5 of 12 penguin species included in the petition. We opened the public comment period on the proposed rule for 60 days, ending February 17, 2009, to allow all interested parties an opportunity to comment on the proposed rule. On March 9, 2010, the Center for Biological Diversity (CBD) filed a complaint (CV-10-992, N.D. Cal) for failure to issue a final listing determination within 12 months of the proposal to list the species. In a court-approved settlement agreement, the Service agreed to submit a final rule to the **Federal Register** by July 30, 2010.

Previous Federal Action

For a detailed history of previous Federal actions involving these five penguin species, please see the Service's proposed listing rule, which published in the **Federal Register** on December 18, 2008 (73 FR 77303).

Summary of Comments and Recommendations

In the proposed rule published on December 18, 2008 (73 FR 77303), we requested that all interested parties submit information that might contribute to development of a final rule. We also contacted appropriate scientific experts and organizations and invited them to comment on the proposed listings. We received 13 comments: 4 from members of the public, and 9 from peer reviewers.

We reviewed all comments received from the public and peer reviewers for substantive issues and new information regarding the proposed listing of these five species, and we have addressed those comments below. Overall, the commenters and peer reviewers supported the proposed listings. One comment from the public included substantive information; other comments simply supported the proposed listing without providing scientific or commercial data.

Peer Review

In accordance with our policy published on July 1, 1994 (59 FR 34270), we requested expert opinions from 14 knowledgeable peer reviewers with scientific expertise that included familiarity with the species, the geographic region in which the species occur, and conservation biology principles. We received responses from nine of the peer reviewers. They generally agreed that the description of the biology and habitat for each species was accurate and based on the best available information. They provided some new or additional information on the biology and habitat of some of these penguin species and their threats, and we incorporated that information into the rulemaking as appropriate. In some cases, it has been indicated in the citations by "personal communication," which could indicate either an email or telephone conversation, while in other cases the research citation is provided.

Peer Reviewer Comments

(1) Comment: Several peer reviewers provided new data and information regarding the biology, ecology, life history, population estimates, and threat factors affecting these penguin species, and requested that we incorporate the new data and information into this final rule and consider it in making our listing determination. With respect to potential threats, one peer reviewer raised the issue of flipper banding of the yellow-eyed penguin. Several peer reviewers provided clarifying information on predation with respect

to the Humboldt and white-flippered penguins. Additionally, some of the peer reviewers provided technical corrections and brought to our attention recent papers discussing taxonomy and genetics.

Our Response: In addition to the critical review provided by species experts, we considered scientific and commercial information regarding these penguin species contained in technical documents, published journal articles, and other general literature documents, including over 30 documents we reviewed since the publication of the proposed rule to list these 5 penguin species. We have incorporated the new information and technical corrections into this final rule. In addition, we address flipper banding of the yellow-eyed penguin, and information on predation of the Humboldt and white-flippered penguins in the threats analyses for those species in this final rule.

(2) Comment: One peer reviewer suggested that the mainland and sub-Antarctic populations of yellow-eyed penguins should be considered separate management units, stating that there was negligible genetic interchange between populations. The peer reviewer cited information from 1989, and indicated that more recent work was in review, although no researcher or paper was cited.

Our Response: We reviewed the best available information, including two papers on the genetics of yellow-eyed penguin published in 2008 and 2009, and found no basis to amend our initial finding. The 2008 and 2009 papers support our finding that the species should be listed as threatened throughout its range. Additional discussion is found later in this document under yellow-eyed penguin.

(3) Comment: One peer reviewer raised the issue that the taxonomy of the white-flippered penguin has long been in debate.

Our Response: We reviewed the best available information regarding the taxonomy of white-flippered penguin (*Eudyptula minor albosignata*), and we found no basis to amend our taxonomic treatment of the species. See the background section below on white-flippered penguin for additional discussion.

Public Comments

(4) Comment: One commenter provided additional information regarding potential threat factors affecting these five species, and requested that we consider the information and incorporate it into the listing determinations. Specifically, the commenter indicated that the Service failed to address anthropogenic climate change and how it will affect penguins, particularly the Humboldt penguin. The commenter also requested that we address the issue of accelerated ocean warming and ocean acidification. The commenter suggested that the pH (acidity) of the ocean is rapidly changing, and may lower by 0.3 to 0.4 units by the year 2100, which would mean the acidity would increase by 100 to 150 percent. The commenter cited Orr *et al.* 2005 and Meehl *et al.* 2007.

Our Response: We thank the commenter who provided this information for our consideration in making this final listing determination. We will first respond to the comment that greenhouse gas emissions will accelerate ocean warming and increase sea level rise. Gille (2002, p. 1276) found that while ocean warming occurred in the 1950s and 1960s, it leveled off in the 1980s and 1990s; overall, there was an increase in ocean water temperature in the Southern Hemisphere over the past 50 years. Looking forward to years 2090-2099, precipitation is predicted to increase across the sub-Antarctic and Antarctic region, with a greater than 20 percent increase predicted for the Antarctic continent (IPCC 2007, p. 10). We acknowledge that ocean warming and sea level rise may occur. Warming of the climate system is unequivocal, as is now evident from observations of increases in global average air and ocean temperatures, widespread melting of snow and ice, and rising global average sea level ((IPCC 2007, p. 30). During the status review, we carefully evaluated threats facing these species. We considered the various threats in part based on their severity. In some cases, the effects of climate change are unpredictable and understudied, and the best available information does not indicate how increased sea level rise and ocean warming may affect these five penguin species. However, we determined what major stressors are affecting the status of the species, and evaluated those stressors based on the best available scientific and commercial information

Secondly, we acknowledge that the issue of ocean acidification was not directly addressed in the proposed rule. Again, with respect to penguins, the best available information does not address how ocean acidity would impact the physiology and food web associated with these five penguin species. We acknowledge that ocean acidification may be a concern, but at this time, any conclusion would be purely speculative regarding how much the oceanic pH may change in the penguins' habitat and how the other changes in the species' environments would interact with other known threats. The manner in which a change in ocean pH may affect penguins is currently unpredictable.

(5) Comment: The same commenter requested that the Service consider listing these five species as endangered instead of threatened based on the two issues noted above.

Our Response: Section 4(b)(1)(A) of the Act requires us to make listing decisions based solely on the best scientific and commercial data available. We have thoroughly reviewed all available scientific and commercial data for these species in preparing this final listing determination. We reviewed historical and recent publications, as well as unpublished reports, concerning these species. In addition, we used peer review to provide a more focused, independent examination of the available scientific information and its application to the current status of the species. As part of our evaluation, we carefully considered the quality and reliability of all data to decide which constitutes the best available data for our consideration in making our final determination. We analyzed the threats in making our determination, and our review of the threat factors indicate that listing these five species as threatened is warranted. After reviewing the peer review and public comments we received, we have no reason to alter our assessment. Based on our analysis, we determined that none of these five penguin species is currently in danger of extinction throughout its entire range, and therefore none of them meet the definition of endangered under the Act (16 U.S.C. 1532(6)).

Summary of Changes from Proposed Rule

We fully considered comments from the public and peer reviewers on the proposed rule to develop this final listing of five foreign penguin species. This final rule incorporates changes to our proposed listing based on the comments that we received that are discussed above and newly available scientific and commercial information. Reviewers generally commented that the proposed rule was very thorough and comprehensive. We made some technical corrections based on new, although limited, information. None of the information, however, changed our determination that listing these five species as threatened is warranted.

Species Information and Factors Affecting the Species

Section 4 of the Act (16 U.S.C. 1533), and its implementing regulations at 50 CFR 424, set forth the procedures for adding species to the Federal Lists of Endangered and Threatened Wildlife and Plants. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1) of the Act. The five factors are: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; and (E) other natural or manmade factors affecting its continued existence.

Below is a species-by-species threats analysis of these five factors. The species are considered in the following order: Yellow-eyed penguin, white-flippered penguin, Fiordland crested penguin, Humboldt penguin, and erect-crested penguin.

Yellow-eyed Penguin (*Megadyptes antipodes*)

Background

The yellow-eyed penguin, also known by its Maori name, hoiho, is the third largest of all penguin species, averaging around 18 pounds (lb) (8 kilograms (kg)) in weight, the males averaging 1 kg more than females at 8.5 kg. It is the only species in the monotypic genus *Megadyptes* (Boessenkool *et al.* 2009, p. 819). Yellow-eyed penguins breed on the southeast coast of New Zealand's South Island, from Banks Peninsula to Bluff at the southern tip; in Fouveaux Strait, and on Stewart and adjacent islands just 18.75 mi (30 km) from the southern tip of the New Zealand mainland; and at the sub-Antarctic Auckland and Campbell Islands, 300 mi (480 km) and 380 mi (608 km), respectively, south of the southern tip of the South Island. The distribution is thought to have moved north since the 1950s (McKinlay 2001, p. 8). The species is confined to the seas of the New Zealand region and forages over the continental shelf (Taylor 2000, p. 93).

Unlike more strongly colonial breeding penguin species, yellow-eyed penguins nest in relative seclusion, out of sight of humans and one another (Ratz and Thompson 1999, p. 205; Seddon and Davis 1989, pp. 653-659; Wright 1998, pp. 9–10). Current terrestrial habitats range from native forest to grazed pasture (McKinlay 2001, p. 10). In some places, they nest in restored areas, and in other places, they nest in areas where livestock are still present (McKinlay 2001, p. 10). Prior to land clearing for agriculture by European settlers, the historic habitat was in coastal forests and shrub margins (Marchant and Higgins 1990, p. 237).

In 2001, the New Zealand Department of Conservation (NZDOC) published the Hoiho (*Megadyptes antipodes)* Recovery Plan (2000–2025) to state the NZDOC's intentions for the conservation of this species, to guide the NZDOC in its allocation of resources, and to promote discussion among the interested public (McKinlay 2001, p. 20). The goal of the Recovery Plan, which updates a 1985–1997 plan previously in place, is to increase yellow-eyed penguin numbers and have active community involvement in their conservation. The primary emphasis over the 25–year period is to "retain, manage and create terrestrial habitat" and to "investigate the mortality of hoiho at sea" (McKinlay 2001, p. 2).

In 2007, the total population estimate was 1,600 breeding pairs (3,200 breeding adults in the population) (Houston 2007, p. 3). As of 2009, the total estimate for this species is 7,000 individuals (Boessenkool *et al.* 2009, p. 815), which is not substantially different from the 2007 estimate.

In the recent past, the number of breeding pairs has undergone dramatic periods of decline and fluctuation in parts of its range on the mainland of the South Island. Records suggest that the mainland populations declined by at least 75 percent from the 1940s to 1988. In 1988, there were 380 to 400 breeding pairs (Darby and Seddon 1990, p. 59). There have been large fluctuations since a low of about 100 breeding pairs in the 1989–90 breeding season to over 600 in the 1995–96 breeding season (McKinlay 2001, p. 10). Current mainland counts indicate 450 breeding pairs on the southeast coast of the mainland of the South Island (Houston 2007, p. 3). As recently as the 1940s, there were reported to be individual breeding areas where penguin numbers were estimated in the hundreds; in 1988, only 3 breeding areas on the whole of the South Island had more than 30 breeding pairs (Darby and Seddon 1990, p. 59).

Just across the Fouveaux Strait at the southern tip of the South Island, at Stewart Island and nearby Codfish Island, yellow-eyed penguin populations numbered a combined estimate of 178 breeding pairs in the early 2000s (Massaro and Blair 2003, p. 110). While these populations are essentially contiguous with the mainland range, this is the first population estimate for this area based on a comprehensive count. This estimate, while lower than previous estimates, may be lower because when the population estimates were done in the 1980s and 1990s, they were partial surveys rather than full surveys. It is unclear whether numbers have declined in the past two decades or whether previous estimates, which extrapolated from partial surveys, were overestimates (Massaro and Blair 2003, p. 110), but evidence points to the latter. For example, Darby and Seddon (1990, p. 58) provided 1988 estimates of 470 to 600 breeding pairs at Stewart Island and nearby Codfish Island, which the researchers extrapolated from density estimates. In the Hoiho Recovery Plan, which reported these 1988 numbers, it is noted that, "In the case of Stewart Island, these figures should be treated with a great deal of skepticism. Only a partial survey was completed in the early 1990s" (McKinlay 2001, p. 8). Darby (2003, p. 148), one of the authors of the 1988 estimate, subsequently reviewed survey data from the decade between 1984 and 1994 and revised the estimates for this region down to 220 to 400 pairs. Houston (2008, p. 1) reported numbers are stable in all areas of Stewart and Codfish Islands, except in the northeast region of Stewart Island where disease and starvation are impacting colonies, as discussed in detail below. While it is reported that the numbers of birds at Stewart and Codfish Islands have declined historically (Darby and Seddon 1990, p. 57), it is unclear to what extent declines are currently under way.

As of 2007, in the sub-Antarctic island range of the yellow-eyed penguin, there were an estimated 400 pairs on Campbell Island (down from 490 to 600 pairs in 1997), and 570 pairs on the Auckland Islands (Houston, 2007, p. 3).

The yellow-eyed penguin is classified as "Endangered" by the International Union for Conservation of Nature (IUCN) criteria (BirdLife International 2007, p. 1). When the New Zealand Action Plan for Seabird Conservation was completed in 2000, the species' IUCN Status was 'Vulnerable,' and it was listed as Category B (second priority) on the Molloy and Davis threat categories employed by the New Zealand Department of Conservation (NZDOC) (Taylor 2000, p. 33). On this basis, the species was placed in the second tier of New Zealand's Action Plan for Seabird Conservation. The species is listed as "acutely threatened—nationally vulnerable" on the New Zealand Threat Classification System

List (Hitchmough *et al.* 2007, p. 45; Molloy *et al.* 2002, p. 20).

Summary of Factors Affecting the Yellow-eyed Penguin

Factor A. The Present or Threatened Destruction, Modification, or Curtailment of the Yellow-eyed Penguin's Habitat or Range

Deforestation and the presence of grazing animals and agricultural activities have destroyed or degraded yellow-eyed penguin habitat throughout the species' range on the mainland South Island of New Zealand. Much of the decline in breeding numbers can be attributed to loss of habitat (Darby and Seddon 1990, p. 60; Taylor 2000, p. 94). The primary historic habitat of the reclusive yellow-eyed penguin on the southeast coast of the South Island of New Zealand was the podocarp hardwood forest. During the period of European settlement of New Zealand, almost all of this forest was cleared for agriculture, with forest clearing activities continuing into at least the 1970s (Sutherland 1999, p. 18). This has eliminated the bulk of the historic mainland breeding vegetation type for this species (Marchant and Higgins 1990, p. 237). With dense hardwood forest unavailable, the breeding range of yellow-eyed penguins has now spread into previously unoccupied habitats of scrubland, open woodland, and pasture (Marchant and Higgins 1990, p. 237). Here the breeding birds are exposed to new threats. In agricultural areas, breeding birds are exposed to the trampling of nests by domestic cattle. For example, on the mainland Otago Peninsula in 1985, cattle destroyed 25 out of 41 nests (60 percent) (Marchant and Higgins 1990, p. 238).

Yellow-eyed penguins are also more frequently exposed to fire in these new scrubland and agricultural habitat, such as a devastating fire in 1995 at the Te Rere Yellow-eyed Penguin Reserve in the southern portion of the mainland of the South Island, which killed more than 60 adult penguins out of a population of 100 adults at the reserve, as well as fledgling chicks on shore (Sutherland 1999, p. 2; Taylor 2000, p. 94). Five years after the fire, there was little evidence of recovery of bird numbers at this reserve (Sutherland 1999, p. 3), although there had been considerable efforts to restore the land habitat through plantings, creation of firebreaks, and predator control.

Habitat recovery efforts, dating as far back as the late 1970s and set out in the 1985–1997 Hoiho Species Conservation Plan (McKinlay 2001, p. 12), have focused on protecting and improving breeding habitats. Habitat has been purchased or reserved for penguins at the mainland Otago Peninsula, North Otago, and Catlins sites, with 20 mainland breeding locations (out of an estimated 32 to 42) reported to be under "statutory" protection against further habitat loss (Ellis 1998, p. 91). New, currently unoccupied areas have been acquired to provide the potential to support increased populations in the future (McKinlay 2001, p. 12). Fencing and re-vegetation projects have been implemented to restore nesting habitat and to exclude grazing animals from breeding habitats (McKinlay 2001, p. 12). In some cases, efforts to fence penguin reserves to reduce trampling by cattle have created more favorable conditions for attack by introduced predators (see Factor C) (Alterio *et al.* 1998, p. 187). In addition, the Yellow-eyed Penguin Trust has been active in the conservation of this species, and has purchased land specifically for the protection of the species (*http://yellow-eyedpenguin.org.nz*). Despite these efforts, yellow-eyed penguin numbers on the mainland have not increased and have continued to fluctuate dramatically at low levels, with no sustained increases over the last 27 years (McKinlay 2001, p. 10). Although we did not rely on future conservation efforts by New Zealand in our analysis of threats, we note that efforts in the second phase of the Hoiho Recovery Plan continue to focus on managing, protecting, and restoring the terrestrial habitat of the yellow-eyed penguin (McKinlay 2001, p. 15).

On the offshore and sub-Antarctic islands of its range, feral cattle and sheep destroyed yellow-eyed penguin nests on Enderby and Campbell Islands (Taylor 2000, p. 94). All feral animals were removed from Enderby Island in 1993, and from Campbell Island in 1984 (cattle) and 1991 (sheep) (Taylor 2000, p. 95). Reports indicate very little change in the quality of terrestrial habitat of the yellow-eyed penguin habitat on these islands (McKinlay 2001, p. 7).

Although individual locations remain susceptible to fire or other localized events, the threat of manmade habitat destruction has been reduced over the dispersed range of the species on the mainland South Island. In our analysis of other threat factors, in particular Factor C, we will further examine why the recovery goals for mainland populations have not been achieved. Specifically, the goal in the 1985–1997 recovery plan of maintaining two managed mainland populations, each with a minimum of 500 pairs, was not achieved (McKinlay 2001, p. 13). Eight years into the 2000–2025 recovery plan, the long-term goal to increase yellow-eyed penguin populations remains elusive. However, significant public and private efforts have been undertaken in New Zealand over past decades to protect and restore yellow-eyed penguin breeding habitat on the mainland South Island. Further, the species' island breeding habitats have either not been impacted or, if historically impacted, the causes of disturbance have been removed. In addition, the Yellow-eyed Penguin Trust has been active in the conservation of this species, and has purchased land specifically for the protection of the species. Because these conservation efforts have been implemented, we find that the present or threatened destruction, modification, or curtailment of its terrestrial habitat or range is not a threat to the species.

In the marine environment, yellow-eyed penguins forage locally around colony sites during the breeding season. Unlike most penguin species, yellow-eyed penguins tend to be benthic (bottom of ocean) rather than pelagic (surface of ocean) feeders (Mattern 2007, p. 295). They are known to feed on a variety of fish and squid species, including opal fish (*Hemerocoetes monopterygius*), blue cod (*Parapercis colias*), sprat (*Sprattus antipodum*), silverside (*Argentina elongata*), red cod (*Pseudophycis bachus*), and arrow squid (*Nototodarus sloani*) (van Heezik 1990b, pp. 209-210). Yellow-eyed penguins that were tracked from breeding areas on the Otago Peninsula on the mainland of the South Island foraged over the continental shelf in waters from 131 to 262 feet (ft) (40 to 80 meters (m)) deep. In foraging trips lasting on average 14 hours, they ranged a median of 8 mi (13 km) from the breeding area (Moore 1999, p. 49). Foraging ranges utilized by birds at the offshore Stewart Island were quite small (ca. 7.9 mi^2 (20.4 km^2)) compared to the areas used by birds at the adjacent Codfish Islands (ca. 208 mi^2 (540 km^2)) (Mattern *et al.* 2007, p. 115).

There is evidence that modification of the marine environment by human activities may reduce the viability of foraging areas for yellow-eyed penguins on a local scale. Mainland population declines in 1986–1987 have been attributed to "changes in the marine environment and failure of quality food" (McKinlay 2001 p. 9), but we have not found evidence attributing recent population changes at either mainland colonies or the more distant Campbell and Auckland Islands' colonies to changes in the marine environment.

Mattern *et al.* (2007, p. 115) concluded that degradation of benthic

habitat by commercial oyster dredging is limiting viable foraging habitat and increasing competition for food for a small portion of Stewart Island penguins breeding in areas on the northeast coast of that island, resulting in chick starvation (King 2007, p. 106). Chick starvation and disease are the two most prevalent causes of chick death at the northeast Stewart Island study colonies (King 2007, p. 106). Poor chick survival and, presumably, poor recruitment of new breeding pairs, is reported to be the main cause of a decline in the number of breeding pairs (King 2007, p. 106). At the adjacent Codfish Island, where food is more abundant and diverse (Browne *et al.* 2007, p. 81), chicks have been found to flourish even in the presence of disease. Browne *et al.* (2007, p. 81) found dietary differences between the two islands. Stewart Island chicks received meals comprised of fewer species and less energetic value than those at Codfish Island. The foraging grounds of these two groups do not overlap, suggesting that local-scale influences in the marine environment (Mattern *et al.* 2007, p. 115) are impacting the Stewart Island penguins. These authors concluded that at Stewart Island, degradation of benthic habitat by commercial oyster dredging is limiting foraging habitat for yellow-eyed penguins. The 178 pairs on Stewart Island and adjacent islands make up 11 percent of the total current population, and only a portion of this number are affected by the reported degradation of benthic habitat by fisheries activities. Therefore, while the present or threatened destruction, modification, or curtailment of its marine habitat or range by commercial oyster dredging is a threat to chick survival for some colonies at Stewart Island, we find that the present or threatened destruction, modification, or curtailment of its marine habitat is not a threat to the species overall.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The yellow-eyed penguin has become an important part of the ecotourism industry on the mainland South Island of New Zealand, particularly around the Otago Peninsula and the Southland areas. Tourism is the primary commercial, recreational, or educational use of the yellow-eyed penguin. Approximately 126,000 tourists viewed penguins in New Zealand in 2006 and 2007 (NZ Ministry of Tourism, 2007).

When the proposed rule was published, we were not aware of tourism activities in the island portions of the range of the yellow-eyed penguin. However, since then, we have learned that tourists are viewing yellow-eyed penguins on Enderby Island, which is the northernmost island of a Subantarctic group known as the Auckland Islands approximately 320 km (199 mi) south of New Zealand. Yellow-eyed penguins are extremely wary of human presence and will not land on the beach if humans are in sight (McClung *et al.* 2004, p. 279). Yellow-eyed penguins select nest sites with dense vegetative cover and a high degree of concealment (Marchant and Higgins 1990, p. 240), and prefer to be shaded from the sun and concealed from their neighbors (Seddon and Davis 1989, p. 653). Given these secretive habits, research has focused on how the potential of increasing tourism impacts yellow-eyed penguins (Seddon and Ellenberg, 2008). In one study, yellow-eyed penguins showed lower breeding success in areas of unregulated tourism than in those areas visited infrequently for monitoring purposes only (McClung *et al.* 2004, p. 279).

In an older study, no obvious impacts of tourist presence were found (Ratz and Thompson 1999, p. 208). Breeding success appeared to be equivalent in both the colony visited by tourists and the colony not visited by tourists; however, the penguins were habituated to a particular noninvasive level of tourism. In newer studies, disturbance was associated with increased heart rate, stress level, energy use, and corticosterone levels (associated with stress) in parents and lower fledgling weights of chicks (Ellenberg *et al.* 2006, p. 95). Yellow-eyed penguins exhibited a stronger initial stress response than other penguin species at a breeding site exposed to unregulated tourism compared to an undisturbed area (Seddon and Ellenberg, 2008p. 171.) These studies have provided information, some of which is being used in the design of visitor management and control procedures at yellow-eyed penguin viewing areas to minimize disturbance to breeding pairs. A key impact from human disturbance described in the Recovery Plan is that yellow-eyed penguins may not come ashore or may leave the shore prematurely after landing. The Hoiho Recovery Plan identified 14 mainland areas where current practices of viewing yellow-eyed penguins already minimize tourism impacts on yellow-eyed penguins and recommends that practices in these areas remain unchanged. Eight additional areas were identified as suitable for development as tourist destinations to observe yellow-eyed penguins where minimization of tourism impacts can be achieved (McKinlay 2001, p. 21). NZDOC is using these existing lists to guide the approval of tourism. Overall, under the plan, tourism is being directed to those sites where impacts of tourism can be minimized. However, unregulated tourism still occurs (McKinlay 2001, p. 8; PenguinSpirit 2009, p. 2, BLI 2010b, p. 2) and affects penguins.

With respect to the impact of research on yellow-eyed penguins, flipper banding for scientific research was identified as having a negative effect on some penguin species. At a 2005 penguin symposium, van Heezik presented findings (pp. 265-266) that flipper banded penguins had a lower survival rate than nonbanded penguins for age class 2 to 11. Another review of scientific research regarding flipper banding found the survival rate of flipper banded penguins compared with nonbanded penguins to be 21 percent less (Froget *et al.* 1998, pp. 409-413). Dugger found a 10 percent reduced survival rate in stainless steel–banded penguins compared with nonbanded penguins (Petersen *et al.* 2006, p. 76). Petersen's review of the effects of flipper banding indicated that there may be negative effects of flipper banding.

Different types of banding have been used, and species appear to be affected differently by them. In addition, there may be coping mechanisms to compensate for any drag that penguins experience when swimming with flipper bands. Other evidence of negative effects of flipper banding include the finding that unbanded King penguin adults were more likely to successfully breed, possibly because they arrived earlier at the colony for courtship. They produced almost twice as many young over four breeding seasons (Gauthier-Clerc *et al.* 2004, p. 424). Researchers hypothesize that the unbanded penguins have a competitive advantage over the banded penguins, which appears to be a reasonable conclusion. This research identified flipper banding as a problem, and the penguin scientific community subsequently modified banding techniques. The detrimental tagging methods were abandoned or modified. Therefore, after evaluating this factor, we find that flipper banding, while it should continue to be monitored, does not constitute a threat to this species. We have found no other reports of impacts on this species from scientific research or any other commercial, recreational, scientific, or educational purposes.

Nature-based tourism has increased in recent decades. The New Zealand DOC, in cooperation with conservation,

tourism, and industry stakeholders, has put measures in place to understand and minimize the impacts of tourism activities on the yellow-eyed penguin through the Hoiho Recovery Plan. A study by Seddon and Ellenberg in 2008 indicates that yellow-eyed penguins are particularly sensitive to human disturbance such as tourism (pp. 169-170). Although yellow-eyed penguins do not always exhibit an obvious alarm reaction, other penguin species have exhibited increased heart rates when humans were within 1 m (3 ft) of nesting penguins (Seddon and Ellenberg, 2008, pp. 167, 170). Yellow-eyed penguins needed more recovery time than other penguins after exposure to a stressor (p. 170), and this stress response carries with it an associated expenditure of energy. Based on this information, we find that overutilization for commercial, recreational, scientific, or educational purposes, particularly unregulated tourism, is a threat to the yellow-eyed penguin.

Factor C. Disease or Predation

Disease has been identified as a factor influencing both adult and chick mortality in yellow-eyed penguins. We have identified reports of one major disease outbreak involving adult penguins and ongoing reports of disease in yellow-eyed penguin chicks.

Initial investigation of a major die-off of adult yellow-eyed penguins at Otago Peninsula in 1990 failed to identify the etiology of the deaths (Gill and Darby 1993, p. 39). This involved mortality of 150 adult birds or 31 percent of a mainland population estimated at the time to include 240 breeding pairs. Subsequent investigation of avian malaria seroprevalence among yellow-eyed penguins found that the mortality features, climatological data, and pathological and serological findings at the time conformed to those known for avian malaria outbreaks (Graczyck *et al.* 1995, p. 404), leading the authors to conclude that avian malaria was responsible for the die-off. These authors associated the outbreak with a period of warmer than usual sea and land temperatures. More recently, Sturrock and Tompkins (2007, pp. 158–160) looked for DNA from malarial parasites in yellow-eyed penguins and found that all samples were negative. This suggests that earlier serological tests were overestimating the prevalence of infection or that infection was transient or occurred in age classes not sampled in their current study. While this raises questions as to the role of avian malaria in the 1990 mortality event, the authors noted, given the spread of avian malaria throughout New Zealand and previous results indicating infection and mortality in yellow-eyed penguins, that continued monitoring of malarial parasites in this species should be considered an essential part of their management until the issue of their susceptibility is resolved. There have been no subsequent disease-related die-offs of adult yellow-eyed penguins at mainland colonies since the 1990s (Houston 2007, p. 3).

The haemoparasite *Leucocytozoon*, a blood parasite spread by blackflies, was first identified in yellow-eyed penguins at the offshore Stewart and Codfish Islands in 2004 (Hill *et al.* 2007, p. 96) and was one contributor to high chick mortality at Stewart Islands in 2006–2007, which involved loss of all 32 chicks at the northeast Anglem Coast monitoring area of the Yellow-eyed Penguin Trust. This parasite may have spread from Fiordland crested penguins, which are known to house this parasite (Taylor 2000, p. 59). Chick mortality was also reported at this area in 2007–2008 (Houston 2008, pers. comm.). It is not clear if the *Leucocytozoon* predisposes animals to succumb from other factors, such as starvation or concurrent infection with other pathogens (such as diphtheritic stomatitis), or if it is the factor that ultimately kills them, but over 40 percent of chick mortality over three breeding seasons at Stewart Island study colonies was attributed to disease (King 2007, p. 106). The survival of infected chicks at nearby Codfish Island, where food is more abundant, indicates that nutrition can make a difference in whether mortality occurs in diseased chicks (Browne *et al.* 2007, p. 81; King 2007, p. 106). Healthy adults who are infected, but not compromised, by this endemic disease provide a reservoir for infection of new chicks through the vector of blackflies. No viable method of treatment for active infections in either chicks or adults has been identified.

At the mainland Otago Peninsula in the 2004–2005 breeding season, an outbreak of *Corynebacterium amycolatum* infection (diptheritic stomatitis) caused high mortality in yellow-eyed penguin chicks (Houston 2005, p. 267) at many colonies there and on Stewart Island (where it may have been a contributing factor to the mortalities discussed above from *Leucocytozoon*). Mortality was not recorded at Codfish Island or at the sub-Antarctic islands (Auckland and Campbell Islands). The disease produced lesions in the chicks' mouths and upper respiratory tract and made it difficult for the chicks to swallow. All chicks at Otago displayed the symptoms, but survival was better in older, larger chicks. Treatment with broad spectrum antibiotics was reported to have achieved "varying results," and it is not known how this disease is triggered (Houston 2005, p. 267).

In summary, disease has seriously impacted both mainland and Stewart Island populations of yellow-eyed penguins over the past two decades. A mainland mortality event in 1990, attributed to avian malaria, killed 31 percent of the mainland adult population of yellow-eyed penguin. While there is lack of scientific certainty over the impact of malaria on yellow-eyed penguins, the overall spread of this disease, the small population size of yellow-eyed penguins, and evidence of its presence in their populations lead us to conclude that this is an ongoing threat. Disease events contributed to or caused mortality of at least 20 percent of chicks at Stewart Island in 2006–2007 and complete mortality in local colonies. The continuing contribution to yellow-eyed penguin chick mortality from *Leucocytozoon* and diptheritic stomatitus at Stewart Island and the recent high mortalities of mainland chicks from diptheritic stomatitis indicate the potential for future emergence or intensified outbreaks of these or new diseases. The emergence of disease at both mainland and Stewart Island populations in similar time periods and the likelihood that Leucocytozoon was spread to the yellow-eyed penguin from the Fiordland crested penguin point out the significant possibility of future transmission of known diseases between colonies or between species, and the possibility of emergence of new diseases at any of the four identified breeding locations of the yellow-eyed penguin.

Predation of chicks and sometimes adults by introduced stoats (*Mustela erminea*) (which are good swimmers), ferrets (*M. furo*), cats (*Felis catus*), and dogs (*Canis domesticus*) is the principal cause of yellow-eyed penguin chick mortality on the South Island with up to 88.5 percent of chicks in any given habitat being killed by predators (Alterio *et al.* 1998, p. 187; Clapperton 2001, p. 187, 195; Darby and Seddon 1990, p. 45; Marchant and Higgins 1990, p. 237; McKinlay *et al.* 1997, p. 31; Ratz *et al.* 1999, p. 151; Taylor 2000, pp. 93–94). In a 6–year study of breeding success of yellow-eyed penguins in mainland breeding areas, predation accounted for 20 percent of chick mortality overall, and was as high as 63 percent overall in one breeding season (Darby and Seddon 1990, p. 53). Proximity to farmland and grazed pastures was found to be a factor accounting for high predator densities

with 88 percent predation at one breeding area adjacent to farmland (Darby and Seddon 1990, p. 57). Of 114 yellow-eyed penguin carcasses found on the South Island mainland between 1996 and 2003, one-quarter of deaths were attributed to predation. Dogs and mustelids were found to be the most common predators (Hocken 2005, p. 4).

In light of this threat, protection of chicks from predators is a primary objective under the 2000–2025 Hoiho Recovery Plan. Approaches to predator control are being established and refined at breeding sites on the mainland (McKinlay *et al.* 1997, pp. 31–35), targeting ferrets, stoats, and cats. The New Zealand DOC has concluded that predation is a threat that may be managed through trapping or other cost-effective methods to protect chicks in nests (McKinlay 2001, p. 18). The recovery plan indicates that a minimum protection of 43 percent of nests would be needed to ensure population growth (McKinlay 2001, p. 18). The recovery plan establishes a goal of protecting 50 percent of all South Island nests from predators between 2000 and 2025. Where intensive predator control regimes have been put in place, they are effective (McKinlay *et al.* 1997, p. 31), capturing 69 to 82 percent of predators present. In a long-term analysis of three closely monitored study colonies, which make up roughly half the nests at the Otago Peninsula and about 10 to 20 percent of the nests on the mainland, Lalas *et al.* (2007, p. 237) found that the threat of predation on chicks by introduced terrestrial mammals had been mitigated by trapping and shooting, and no substantial predation events had occurred between 1984 and 2005. We do not have information on the extent to which anti-predator measures are in place for the remaining 80 to 90 percent of yellow-eyed penguin nests on the mainland of the South Island of New Zealand. Other efforts to remove or discourage predation have not been as successful. A widely applied approach of establishing "vegetation buffers" around yellow-eyed penguin nest sites to act as barriers between predators and their prey was found to actually increase predation rates. Predators preferred the buffer areas and used penguin paths within them to gain easy access to penguin nests (Alterio *et al.* 1998, p. 189). Given these conflicting reports, we cannot evaluate to what extent management efforts are moving toward the goal of protection of 50 percent of all yellow-eyed penguin nests on the mainland.

Offshore, at Stewart and Codfish Islands, there are a number of introduced predators, but mustelids are absent. Research indicated that the presence of feral cats could be depressing the population of yellow-eyed penguins at Stewart Island. (Harper 2004, p. 26; Massaro and Blair 2003, p. 107). Weka (*Gallirallus australis*) have been eradicated from Codfish Island, but may prey on eggs and small chicks in the Fouveaux Strait and some breeding islands in the Stewart Island region at the southern tip of New Zealand (Darby 2003, p. 152; Massaro and Blair 2003, p. 111).

Some islands, including the Codfish and Bravo group, have Norway rats (*Rattus norvegicus,* Pacific rats (*R. exulans),* and ship rats (*R. rattus*), which are thought to prey on small chicks (Massaro and Blair 2003, p. 107). Even though Norway rats are present on Campbell Island, evidence of egg or chick predation by terrestrial mammalian predators was not observed during two breeding seasons (Taylor 2000, pp. 93–94).

At Auckland Island, it is reported that feral pigs (*Sus scrofa*) probably kill adults and chicks (Taylor 2000, pp. 93).

At Otago Peninsula, even as objectives are set to attempt to bring terrestrial predators under more effective control, an emerging threat is predation by the New Zealand sea lion (*Phocarctos hookeri*). Since 1985, sea lions have recolonized the area and predation of yellow-eyed penguins has increased. Penguin remains have been more frequently found in sea lion scat samples. Two penguin breeding sites in close proximity to the founding nursery area of female sea lions have been particularly impacted. The number of nests at these two colonies has declined sharply since predation was first observed and when colonization by female sea lions first took place. As discussed above, these two sites are among those that have been intensively and successfully protected from introduced terrestrial predators between 1984 and 2005 (Lalas *et al.* 2007, p. 237), so declines can be directly attributed to sea lion predation. The predation has been attributed to one female, the daughter of the founding animal. Population modeling of the effect of continued annual kills by sea lions predicts the collapse of small populations (fewer than 100 nests) subject to targeted predation by one individual sea lion. At the current time, none of the 14 breeding sites at Otago Peninsula exceeds 100 nests. No action has been taken to control this predation, although removal of predatory individuals has been suggested (Lalas *et al.* 2007, pp. 235–246). Similar predation by New Zealand sea lions was observed at Campbell Island in 1988 and was considered a probable cause for local declines there (Moore and Moffat 1992, p. 68). Some authors have speculated that New Zealand sea lion may take yellow-eyed penguins at Stewart Island, but there are no documented reports (Darby 2003, p. 152). Because of its continued role in suppressing the recovery of yellow-eyed penguin populations and because of the continued impact of introduced terrestrial and avian predators and native marine predators, we find that predation is a threat to the yellow-eyed penguin.

In summary, on the basis of the best available scientific information, we find that disease and predation, which have impacted both mainland and island populations, threaten the yellow-eyed penguin. New or recurrent disease outbreaks are reasonably likely to occur in the future and may result in further declines throughout the species' range. Although some predator eradication efforts within breeding areas of the yellow-eyed penguin have been successful, predation continues to affect the species, and we do not expect that regulatory mechanisms will be sufficient to address or ameliorate the threats to the species in the foreseeable future. Furthermore, the threat of predation by endemic sea lions is impacting populations on the mainland and at the Campbell Islands, and we have no reason to believe this threat will not continue to reduce population numbers of the yellow-eyed penguin in those areas. We find that disease and predation are threats to this species.

Factor D. Inadequacy of Existing Regulatory Mechanisms

The yellow-eyed penguin is protected under New Zealand's Wildlife Act of 1953, which gives absolute protection to wildlife throughout New Zealand and its surrounding marine economic zone. No one may kill or have in their possession any living or dead protected wildlife unless they have appropriate authority.

The species inhabits areas within Rakiura National Park, which encompasses Stewart and Codfish Islands (Whenua Hou). Under section 4 of New Zealand's National Parks Act of 1980 and Park bylaws, "the native plants and animals of the parks shall as far as possible be preserved and the introduced plants and animals shall as far as possible be eradicated." In addition to national protection, all New Zealand sub-Antarctic islands, including Auckland and Campbell Islands, are inscribed on the World Heritage List (2008, p. 16), although no additional protections are afforded by

this designation. We do not have information to evaluate whether and to what extent these National Park bylaws reduce threats to the yellow-eyed penguin in these areas.

The yellow-eyed penguin is considered a "threatened" species, and measures for its protection are outlined under the New Zealand DOC's Action Plan for Seabird Conservation in New Zealand (Taylor 2000, pp. 93–94) (see discussion of Factor D for Fiordland crested penguin). Ellis *et al.* (1998, p. 91) reported that habitat has been purchased or reserved for penguins at the mainland Otago Peninsula, North Otago and Catlins sites. Twenty mainland breeding locations (out of an estimated 32 to 42 sites) are reported to be under "statutory protection" against further habitat loss. However, we have not found a complete breakdown of the types of legal protection in place for these areas, of the percent of the total mainland population encompassed under such areas, or of the effectiveness, where they are in place, of such regulatory mechanisms in reducing the identified threats to the yellow-eyed penguin.

As a consequence of its threatened designation, a 2000–2025 Recovery Plan for this species was developed. This plan builds on the first phase (1985–1997) of Hoiho Recovery efforts (McKinlay 2001, pp. 12–13). This plan lays out future objectives and actions to meet the long-term goal of increasing yellow-eyed penguin populations and achieving active community engagement in their conservation (McKinlay 2001, pp. 1–24). The Recovery Plan outlines proposed measures to address chronic factors historically affecting individual colonies, such as destruction or damage to colonies due to fire, livestock grazing, and other manmade disturbance; predation by introduced predators; disease; and the impact of human disturbance (especially through tourism activities) (McKinlay 2001, pp. 15–22). Another objective of the plan is to provide enduring legal guarantees of protections for breeding habitat through reservation or covenant (McKinlay 2001, p. 12). The best available information does not allow us to evaluate in detail the progress that has been made in meeting the eight objectives of the 2000–2025 recovery plan, but as discussed elsewhere, the population recovery goals of the original earlier plan continue to be hard to reach for all but the Auckland Islands, and the development of anti-predator measures is an ongoing challenge. We are aware, as discussed in analysis of other threat factors, that concerted public and private efforts on these objectives continue. However, in the absence of concrete information on implementation of the plan and reports on its efficacy, we did not rely on future measures proposed in the Hoiho Recovery Plan in our threats analysis.

New Zealand has in place the New Zealand Marine Oil Spill Response Strategy, which provides the overall framework to mount a response to marine oil spills that occur within New Zealand's area of responsibility. The aim of the strategy is to minimize the effects of oil on the environment and human safety and health. The National Oil Spill Contingency Plan promotes a planned and nationally coordinated response to any marine oil spill that is beyond the capability of a local regional council or outside the region of any local council (Maritime New Zealand 2007, p. 1). As discussed below under Factor E, rapid containment of spills in remote areas and effective triage response under this plan have shown these to be effective regulatory mechanisms (New Zealand Wildlife Health Center 2007, p. 2; Taylor 2000, p. 94).

A review of the best available information indicates that there are general, or in some cases specific, protective or regulatory measures to address threats to the yellow-eyed penguin. The best available information indicates that despite the existence of these protective or regulatory measures to address the threats to the yellow-eyed penguin, local marine habitat modification through oyster dredging in some areas (Factor A), disease and predation pressure (Factor C), and gillnet fisheries bycatch (Factor E), continue to act as threats to the yellow-eyed penguin. We therefore find that the existing regulatory mechanisms are currently inadequate to protect the yellow-eyed penguin.

Factor E. Other Natural or Manmade Factors Affecting the Continued Existence of the Species

The Action Plan for Seabird Conservation in New Zealand (Taylor 2000, p. 94) reported that there is no evidence that commercial or recreational fishing is impacting prey availability for the yellow-eyed penguin.

Offshore Fisheries Bycatch

Long-line fisheries were indicated as potentially having an effect on yellow-eyed penguins (BLI 2010b, p 2). Long-line fishing uses a long line with baited hooks attached to hanging fishing lines at various intervals. These lines are sometimes set using an anchor, or they can be left to drift. Thousands of hooks can be attached and the lines can be miles long and can alternatively be dragged along the seafloor or the surface of the ocean. Seabirds, particularly petrels, are especially vulnerable to long-line fishing because they take baited hooks. In certain conditions, birds can get hooked and tangled in the line and drown. This type of fishing impacts a number of New Zealand seabird species; however, the Action Plan for Seabird Conservation indicates it is unlikely that yellow-eyed penguins are caught in long-lines. The National Plan of Action to Reduce the Incidental Catch of Seabirds in New Zealand Fisheries does not identify this as a threat to yellow-eyed penguins (Ministry of Fisheries and New Zealand DOC (MOF and NZDOC) 2004, p. 57)).

Coastal Fishing Bycatch

Otago Peninsula

New Zealand's National Plan of Action to Reduce the Incidental Catch of Seabirds in New Zealand Fisheries, prepared by the MOF and NZDOC (2004, p. 57), indicated that yellow-eyed penguins are being incidentally caught in inshore set fishing nets (also known as gill nets). Gill nets are mesh nets, and they can at times be thousands of meters long. A study of bycatch of yellow-eyed penguins along the southeast coast of South Island of New Zealand during the period 1979–1997 identified gill-net entanglement as a significant threat to the species (Darby and Dawson 2000, p. 327). Fishing nets are used in various ways. They may be set as anchored nets in long rows at or near the bottom of the ocean, or sometimes drift with a fishing vessel. Mortality was highest in areas adjacent to the Otago Peninsula (on the east coast of South Island, below Banks Peninsula) breeding grounds. Approximately 55 of 72 gill-netted penguins were found in this particular area (Darby and Dawson 2000, p. 329) as bycatch. An analysis of 185 carcasses collected between 1975 and 1997 found that 42 (23 percent) showed features consistent with mortality from gill-net entanglement. In that period, a further 30 entanglements were reported to officials (Darby and Dawson 2000, p. 327). While these numbers may appear small for the timeframe under study, the authors consider them to be underestimates of actual bycatch mortality (Darby and Dawson 2000, p. 331) because not all fishermen report bycatch.

Most gill-net entanglements reported by Darby and Dawson (2000, p. 331) are from a small geographic area at or near the Otago Peninsula, near the small concentrations of yellow-eyed penguins.

In 1996, for example, there were approximately 350 breeding pairs of yellow-eyed penguin on the Otago Peninsula. Given these small numbers, the authors report that gill-net bycatch may be severe at a local scale. One small colony inside the entrance to Otago harbor suffered seven bycatch mortalities and was subsequently abandoned. The death of 32 birds along the north Otago coast over the period of the study is significant in light of the reported breeding population of only 39 pairs in this region, and, at Banks Peninsula, 7 reported mortalities occurred where there were only 8–10 breeding pairs (Darby and Dawson 2000, p. 331). Given the small sizes of local yellow-eyed penguin concentrations, this mortality rate is significant to the maintenance of breeding colonies and the survival of adults in the population.

Banks Peninsula

In response to bycatch of various species, set net bans have been implemented in the vicinity of the Banks Peninsula on the east coast of South Island, which has been designated as a marine reserve. A 4–month set net ban was primarily designed to reduce entanglements of Hector's dolphin (*Cephalorhynchus hectori*), as well as yellow-eyed penguins and white-flippered penguins (NZ DOC 2007, p. 1). Early reports were that this ban had been widely disregarded (Taylor 2000, p. 70). Based on the best available information, we are unable to conclude that these measures at the Banks Peninsula had been effective in reducing bycatch of yellow-eyed penguins. The Hoiho Recovery Plan states that bycatch is likely the largest source of mortality at sea; the Plan outlines the need for research and liaison with fisheries managers to inform implementation of further measures to reduce the impact of fishing operations on yellow-eyed penguins (McKinlay 2001, p. 19). We do not have information on whether these proposed measures have been implemented. Therefore, for purposes of this analysis, we did not rely on these proposed measures to evaluate incidental take from gill-net entanglement.

Based on the significant gill-net bycatch mortality of yellow-eyed penguins along the southeast coast of the South Island of New Zealand, which has the potential to impact over a quarter of the population, we find that fisheries bycatch is a threat to the yellow-eyed penguin. In spite of efforts to regulate this activity, bycatch in coastal gill net fisheries is a threat to yellow-eyed penguins foraging from mainland breeding areas; therefore, we expect this threat to continue into the foreseeable future.

Under Factor A, we concluded that habitat modification by commercial oyster dredging is a threat to local yellow-eyed penguin colonies at Stewart Island, but we have not found evidence of direct competition for prey between yellow-eyed penguins and human fisheries activities. While following penguins from mainland colonies fitted with Global Positioning System (GPS) dive loggers, Mattern *et al.* (2005, p. 270) noted that foraging tracks of adult penguins were remarkably straight. They hypothesized that individuals were following dredge marks from bottom trawls, but there is no information to indicate that fishery interaction has any impact on the penguins. Therefore, we find that commercial or recreational fishing is not a threat to this species. However, local marine habitat modification through oyster dredging (commercial oyster dredging is a threat to chick survival for some colonies at Stewart Island), and fisheries bycatch from coastal or inshore set net or gillnet fishing, continue to act as threats to the yellow-eyed penguin in some areas of their range.

Oil and chemical spills

We examined the possibility that oil and chemical spills may impact yellow-eyed penguins. Such spills, should they occur and not be effectively managed, can have direct effects on marine seabirds such as the yellow-eyed penguin. In the range of the yellow-eyed penguin, the sub-Antarctic Campbell and Auckland Islands are remote from shipping activity and the consequent risk of oil or chemical spills is low. The Stewart Islands populations at the southern end of New Zealand and the southeast mainland coast populations are in closer proximity to vessel traffic and human industrial activities which may increase the possibility of oil or chemical spill impacts. Much of the range of the yellow-eyed penguin on mainland New Zealand lies near Dunedin, a South Island port city, and a few individuals breed at Banks Peninsula just to the south of Christchurch, another major South Island port. While yellow-eyed penguins do not breed in large colonies, their locally distributed breeding groups are found in a few critical areas on the coast of the South Island and its offshore islands. A spill event near the mainland South Island city of Dunedin and the adjacent Otago Peninsula could have a major impact on the 14 breeding sites documented there. Nonbreeding season distribution along the same coastlines provides the potential for significant numbers of birds to encounter spills at that time as well. Two spills have been recorded in this overall region. In March 2000, the fishing vessel *Seafresh 1*sank in Hanson Bay on the east coast of Chatham Island and released 66 U.S. tons (T) (60 tonnes (t)) of diesel fuel. Rapid containment of the oil at this remote location prevented any wildlife casualties (New Zealand Wildlife Health Center 2007, p. 2). The same source reported that in 1998 the fishing vessel *Don Wong 529*ran aground at Breaksea Islets off Stewart Island. Approximately 331 T (300 t) of marine diesel were spilled along with smaller amounts of lubricating and waste oils.

With favorable weather conditions and establishment of triage response, no casualties of the *Don Wong 529*pollution event were discovered (Taylor 2000, p. 94). There is no doubt that an oil spill near a breeding colony could have a major effect on this species (Taylor 2000, p. 94). However, based on the wide distribution of yellow-eyed penguins around the mainland South Island, offshore, and on sub-Antarctic islands, the low number of previous incidents around New Zealand, and the fact that each was effectively contained under the New Zealand Marine Oil Spill Response Strategy and resulted in no mortality or evidence of impacts on the population, we find that oil and chemical spills are not threats to the yellow-eyed penguin.

Yellow-eyed Penguin Finding

Yellow-eyed penguin populations number approximately 1,600 breeding pairs. After severe declines from the 1940s, mainland yellow-eyed penguin populations have fluctuated at low numbers since the late 1980s. The total mainland population (on the east coast of South Island) of 450 breeding pairs (Houston 2007, p. 3) is well below single-year levels recorded in 1985 and 1997 (600 to 650 pairs) and well below historical estimates of abundance (Darby and Seddon 1990, p. 59). At Stewart Island and its adjacent islands, there are an estimated 180 breeding pairs. There are an estimated 400 pairs at Campbell Island where numbers have declined since 1997, and 570 pairs at the Auckland Islands.

Some of the documented factors affecting yellow-eyed penguin populations are tourism and predation. Predation occurs by introduced (and to a lesser extent native) predators within the species' breeding range. The impact of predators is inferred from the decline of this species during the period of introduced predator invasion and from documentation of continuing predator

presence and predation. New Zealand laws including the bylaws of New Zealand's national parks, which encompass some of the range of the yellow-eyed penguin, provide some protection for this species. New Zealand also has programs for eradication of nonnative invasive species, which includes nonnative predators. However, while complete eradication of predators in isolated island habitats may be possible, permanent removal of the introduced mammalian predators on the mainland has not been achieved, and the ongoing threat of predation remains. Both intensive trapping and physical protection of significant breeding groups through fencing have proven successful for yellow-eyed penguins at local scales in terms of reducing predation, but existing efforts require ongoing commitment, and not all breeding areas have been protected. More recently, local-scale predation by New Zealand sea lions reestablishing a breeding presence at the mainland Otago Peninsula has become a threat to yellow-eyed penguin populations as this rare and endemic Otariid species recovers. This threat has also been documented for Campbell Island. We conclude that predation is still a significant threat to yellow-eyed penguins.

Disease is an ongoing factor negatively influencing yellow-eyed penguin populations. Disease has seriously impacted both mainland and Stewart Island colonies of yellow-eyed penguins in the last two decades. In mainland populations, avian malaria is thought to have led to mortality of 31 percent of the adult population on the mainland of New Zealand in the early 1990s, and an outbreak of *Cornybacterium* infection caused high chick mortality in 2004–2005 and contributed to disease mortality at Stewart Island. Entire cohorts of penguin chicks at one breeding location at Stewart Island have been lost to the pathogen *Leucocytozoon*, especially at times when other diseases and other stress factors, such as food shortages, were present. Given the ongoing history of disease outbreaks at both the island and mainland locations, it is highly likely that new or renewed disease outbreaks will impact this species in the foreseeable future with possible large-scale mortality of adults and chicks and consequent breeding failures and population reductions. Emergence or recurrence of such outbreaks on the mainland, where there are currently 450 breeding pairs, or at island breeding areas could result in severe reductions for a species which totals only 1,600 breeding pairs rangewide.

The yellow-eyed penguin is also impacted by ongoing activities in the marine environment. Local marine habitat modification of the sea floor through oyster dredging has been implicated in food shortages at penguin colonies at Stewart Island, which combined with disease, has led to years of 100 percent mortality of chicks at local breeding sites there. Bycatch in coastal gillnet fisheries is a threat to yellow-eyed penguins foraging around mainland breeding areas despite efforts to regulate this activity. In this case, regulatory mechanisms are currently inadequate and we do not have any information that would lead us to anticipate that this would change in the foreseeable future.

We considered whether pollution from oil or chemicals is a threat to the yellow-eyed penguin. Documented oil spill events have occurred within the range of this species in the last decade, but there have been no documented direct or indirect impacts on this species. Such events are rare and New Zealand oil spill response and contingency plans have been shown to be in place and effective in previous events; therefore, we do not find this to be a threat to the yellow-eyed penguin.

In considering the foreseeable future as it relates to the status of the yellow-eyed penguin, we considered the threats acting on the yellow-eyed penguin, as well as population trends. We considered the historical data to identify any relevant existing trends that might allow for reliable prediction of the future (in the form of extrapolating the trends). The available data indicate that historical declines, which were the result of habitat loss and predation, continue in the face of the current threats of predation from introduced predators, disease, gillnet fisheries bycatch, and the inadequacy of regulatory mechanisms throughout the species' range. Based on our analysis of the best available information, we have no reason to believe that population trends will change in the future, or that the effects of current threats acting on the species will be ameliorated in the foreseeable future.

The yellow-eyed penguin has experienced consistent widespread declines in the past, and declines and low population numbers persist. This species has a relatively high reproductive rate (compared to other penguins) and substantial longevity. Despite these life history traits, which should provide the species with the ability to rebound, and despite public and private efforts undertaken in New Zealand to address the threats to its survival, the species has not recovered. Historical declines resulting from habitat loss and predation are exacerbated by the impacts of predators, disease, and the inadequacy of regulatory mechanisms throughout the species' range. The threat of predation by endemic sea lions is impacting populations on the mainland and at the Campbell Islands. New or recurrent disease outbreaks are likely to cause further declines throughout the range in the foreseeable future. Just offshore of the southern tip of the South Island, local breeding groups at Stewart Island have been impacted by disease in concert with food shortages brought on by alteration of their marine habitat. At the Auckland Islands, the population has remained stable but exists at low numbers and, like all yellow-eyed penguin populations, is susceptible to the emergence of disease and impacts of predation. Increased tourism is taxing the species based on the penguins' increased energy usage due to human presence. Because of the species' low population size (estimated to be approximately 1,600 breeding pairs); its continued decline in three out of four areas, the threats of predation by primarily introduced species, disease, fisheries bycatch, tourism, and the inadequacy of regulatory mechanisms, we find that the yellow-eyed penguin is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Significant Portion of the Range Analysis

To determine whether any portion of the range of the yellow-eyed penguin warrants further consideration as endangered, we evaluated the geographic concentration of threats and the significance of portions of the range to the conservation of the species. Our evaluation was in the context of whether any potential threats are concentrated in one or more areas of the projected range, such that if there were concentrated impacts, those populations might be threatened, and whether any such population or complex might constitute a significant portion of the range. The word "range" is used here to refer to the range in which the species currently exists, and the word "significant" refers to the value of that portion of the range being considered to the conservation of the species. We also considered factors used to determine biological significance of a population, including: the quality, quantity, and distribution of habitat relative to the biological requirements of the species; the historical value of the habitat to the

species; the frequency of use of the habitat; the uniqueness or importance of the habitat for other reasons such as breeding, feeding, or suitability for population expansion; and its genetic diversity (the loss of genetically based diversity may substantially reduce the ability of the species to respond and adapt to future environmental changes). We do not find that any one population is more biologically significant than the other three; however, we did find that the occurrence of certain threats is uneven across the range of the yellow-eyed penguin. On this basis, we determined that some portions of the yellow-eyed penguin's range might warrant further consideration as possibly endangered significant portions of its range.

The yellow-eyed penguin's range can be divided into four areas. The first area consists of the mainland colonies distributed along the southeast coast of the South Island of New Zealand. This mainland area is separated from the three island groups to the south. Just to the south is the Stewart-Codfish Islands group, which lies 18.75 mi (30 km) below the mainland South Island across the Fouveaux Strait. Stewart Island is a large island of 1,091 square mi (mi^2) (1,746 square km (km^2)), and Codfish Island is a small island of 8.75 mi^2 (14 km^2) located 6.25 mi (10 km) west of Stewart Island. The third and fourth areas of yellow-eyed penguin habitat are the sub-Antarctic Auckland Islands and Campbell Island, which lie 300 mi (480 km) and 380 mi (608 km), respectively, south of the southern tip of the South Island. These four groups are clearly isolated from each other and from other portions of the yellow-eyed penguin's range.

We evaluated these four areas of the entire range of the yellow-eyed penguin to determine which areas may warrant further consideration. Under the five-factor analysis, we determined that predation, disease, and inadequacy of regulatory mechanisms are threats to the yellow-eyed penguin throughout all of its range. In addition, we determined that fisheries bycatch and marine habitat modification from oyster dredging are threats to the species in only some portions of its range.

For the first two areas, two unique threats were identified. Fisheries bycatch was identified as a unique threat for the mainland South Island population; and marine habitat modification due to oyster dredging was identified as a unique threat for the Stewart-Codfish Island population. Therefore, we determined that yellow-eyed penguins on the mainland and on the Stewart-Codfish Islands may face a greater level of threat than populations at the Auckland and Campbell Islands. In addition, the mainland population of 450 pairs represents more than a quarter of the overall reported population of 1,600 pairs, indicating that this may be a significant portion of the range. Having met these two initial tests, we analyzed whether this portion of the range is both significant and endangered. There have been large fluctuations in the mainland population of yellow-eyed penguins since at least 1980, with cyclical periods of population decline, followed by some recovery. As described in our threat factor analysis, these larger fluctuations have been tied to changes in the marine environment and the quality of food, as well as to periodic outbreaks of disease. The species is described as inherently robust, but recovery from these fluctuations is hampered by chronic predation threats as well as by the ongoing impact of fisheries bycatch. The combination of these cyclical and chronic factors has kept the mainland population fluctuating within the range of a few hundred to about 600 pairs over the last three decades. We have no evidence that the single factor of fisheries bycatch is driving the species toward extinction. Because the current population trend for the mainland populations is one of decline and fluctuation around low numbers, rather than precipitous decline, and because reproduction and recruitment are still occurring, we have determined the population is not currently in danger of extinction, but is likely to become so within the foreseeable future.

The Stewart-Codfish Islands population represents only 11 percent of the overall population of yellow-eyed penguins and its habitat is small in terms of geographical area. It is only 18.75 mi (30 km) away from the mainland of New Zealand, where the majority of this species resides. Marine habitat modification due to oyster dredging was identified as a unique threat for the Stewart-Codfish Island population. However, due to the proximity of this small population to the more numerous mainland population portion of the range, and because the population is adjacent to colonies at the southern tip of the South Island, we do not find that this portion of the range is significant relative to the conservation of this species. Therefore, we have determined the population is not currently in danger of extinction but is likely to become so within the foreseeable future.

With respect to the Auckland Islands and Campbell Islands populations, there were no additional threats found to be acting on these populations nor did we determine that either of these populations have any unique biological significance to the species as a whole. Therefore, we have determined that the Auckland Islands and Campbell Islands portions of the species population is not currently in danger of extinction, but is likely to become so within the foreseeable future.

In conclusion, we did not find that any one portion of the species' population contributes more substantially than others to the representation, resiliency, or redundancy of the species. At this time, although the different populations face different threats, there is no evidence to suggest that threats affect portions of the range disproportionately, or will in the foreseeable future. Therefore, we are listing the yellow-eyed penguin as threatened throughout all of its range under the Act.

White-flippered Penguin *(Eudyptula minor albosignata)*

Background

Among those researchers who have considered the phylogeny of the *Eudyptula* penguins (little penguins) in detail, Banks *et al.* (2002, p. 35), supported by Peucker *et al.* (2007, p. 126), make a strong case that the white-flippered penguin is part of one of two distinct lineages, or clades, of *Eudyptula* species (the Australian-Otago clade and the New Zealand clade, which includes the white-flippered penguin), each descended from one common ancestor.

Limited evidence for subspeciation within the New Zealand clade is found in some genetic differences, but the taxonomic status of the white-flippered penguin remains somewhat unclear (Peucker *et al.* 2007, p. 126). The New Zealand DOC considers the white-flippered penguin, with its distinct life history and morphological traits, as the southern end of a clinal variation of the little penguin (Houston 2007, p. 3). Consistent with the findings of Banks *et al.* (2002, p. 35), the New Zealand DOC recognizes the white-flippered penguin as an endemic sub-species in its Action Plan for Seabird Conservation in New Zealand (Taylor 2000, p. 69). We recognize the findings of Banks *et al.* (2002, p. 35), and the determination of the New Zealand Department of Conservation, and consider the white-flippered penguin (*Eudyptula minor albosignata*) as one of six recognized subspecies of the little penguin (*Eudyptula minor*). We accept the white-flippered penguin as a subspecies, *Eudyptula minor albosignata*, which follows the

Integrated Taxonomic Information System (ITIS 2010).

The overall population of little penguins, which are found around Australia and New Zealand, numbers 350,000 to 600,000 birds. The total breeding population of the white-flippered subspecies, which is only found in New Zealand, is about 10,460 birds (Challies and Burleigh 2004, p. 1).

It is estimated that the Peninsula-wide population was tens of thousands of pairs at the time of European settlement. White-flippered penguins were "very common" on the Banks Peninsula in the late 1800s (Challies and Burleigh 2004, p. 4). Distribution of colonies was more widespread on the shores of the Banks Peninsula during the 1950s, with penguins nesting from the seaward headlands around to the inshore heads of bays.

At Motunau Island there are an estimated 1,650 breeding pairs or about 4,590 birds (Ellis *et al.* 1998, p. 87). This population is reported to have increased slightly since the 1960s (Taylor 2000, p. 69). On Banks Peninsula, exhaustive counts of all colonies in 2000–2001 and 2001–2002 found 68 colonies with a total of 2,112 nests or about 5,870 birds (Challies and Burleigh 2004, p. 5). This detailed survey increased the previously reported minimum estimates of 550 pairs published in 1998 (Ellis *et al.* 1998, p. 87), which were derived from partial surveys of only easily accessible colonies (Challies and Burleigh 2004, p. 1). While baseline information is lacking, Challies and Burleigh (2004, p. 5) have estimated that the present population is less than 10 percent of the population that was occupied on the Peninsula prior to European settlement. Detailed monitoring of four individual colonies indicated that severe declines continue, with an overall loss of 83 percent of 489 nests monitored over the period from 1981–2000 (Challies and Burleigh 2004, p. 4).

The white-flippered penguin breeds on Motunau Island and the Banks Peninsula of the South Island of New Zealand. Birds disperse locally around the eastern South Island. Breeding adults appear to remain close to nesting colonies in the nonbreeding season (Taylor 2000, p. 69; Challies and Burleigh 2004, p. 5; Brager and Stanley 1999, p. 370). White-flippered penguins feed on small shoaling fish such as pilchards (*Sardinops neopilchardus*) and anchovies (*Engraulis australis*) (Brager and Stanley 1999, p. 370).

The little penguin is classified as a species of "Least Concern" in the IUCN Red List (BirdLife International 2007, p. 1); there is no separate status for the white-flippered subspecies. On New Zealand's Threat Classification system list, the white-flippered subspecies is listed as "acutely threatened—nationally vulnerable," indicating small to moderate population and moderate recent or predicted decline (Hitchmough *et al.* 2007, p. 45; Molloy *et al.* 2002, p. 20). This species was addressed in the Action Plan for Seabird Conservation in New Zealand, and it was ranked as Category B (second priority) on the Molloy and Davis threat categories employed by the New Zealand DOC (Taylor 2000, p. 33).

Summary of Factors Affecting the White-flippered Penguin

Factor A. The Present or Threatened Destruction, Modification, or Curtailment of White-flippered Penguin's Habitat or Range

The terrestrial breeding habitat of the white-flippered penguin comprises the shores of the Banks Peninsula south of Christchurch, New Zealand, and of Motunau Island about 62 mi (100 km) north. Banks Peninsula has a convoluted coastline of approximately 186 mi (300 km), made up of outer coast and deep embayments (Challies and Burleigh 2004, p. 1). Motunau is a small island of less than 0.3 mi (0.5 km) in length. While cattle or sheep sometimes trample nests at Banks Peninsula, white-flippered penguin nest sites are usually in rocky areas or among tree roots where they are inaccessible to such damage (Taylor 2000, p. 69). Fire has also been identified as a factor that could threaten white-flippered penguin habitat, but we are not aware of documented fire incidents (Taylor 2000, p. 69).

On the basis of this information, we find that the present or threatened destruction, modification, or curtailment of its habitat or range is not a threat to the white-flippered penguin.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

White-flippered penguins are the object of privately managed local tourism activities at the Banks Peninsula (Taylor 2000, p. 70). Neither the New Zealand Action Plan for Seabird Conservation nor the IUCN Conservation Assessment and Management Plan provides any evidence that tourism is a factor affecting white-flippered penguin populations (Taylor 2000, p. 69; Ellis *et al.* 1998, p. 87). There is no evidence of use of the species for other commercial, recreational, scientific or educational purposes.

On the basis of this information, we find that overutilization for commercial, recreational, scientific, or educational purposes is not a threat to the white-flippered penguin.

Factor C. Disease or Predation

There is no evidence of disease as a threat to the white-flippered penguin.

The most significant factor impacting white-flippered penguins is predation at Banks Peninsula by introduced mammalian predators. Populations are reported to have declined drastically since 1980 due to predation (Williamson and Wilson 2001, pp. 434–435). Challies and Burleigh reported that predation on white-flippered penguins is mainly by ferrets, feral cats, and possibly stoats (2004, p. 1). We know that introduced predators such as these as well as rats prey on penguins. They have been known to take chicks, eggs, and adults. On one occasion, 50 dead penguins were found with mustelid bite marks on their necks (Challies 2009, pers. comm.). Dogs have also been cited as a potential predator (Taylor 2000, p. 69). In the past 25 years, predators have overrun colonies at the accessible heads and sides of bays at Banks Peninsula, reducing colony distribution to less accessible and more remote headlands and outer coasts (Challies and Burleigh 2004, p. 4). Thirty-four colonies (50 percent) surveyed in 2000 to 2002, containing 1,345 nests (69 percent of the nests at Banks Peninsula), were considered to be vulnerable to predation. Seven of the 12 largest colonies (each containing more than 20 nests) contained either the remains of penguins that had been preyed on or other evidence predators had been there (Challies and Burleigh 2004, p. 4). The five large colonies not considered vulnerable to predation were either protected by bluffs or, in one case, located on an island.

The encroachment of predators destroyed the most accessible colonies first, in a progression from preferred habitat at the heads of bays towards the coast along a gradient of increasing coastal erosion. In the 1950s, penguins were still nesting around the heads of bays. These colonies disappeared soon thereafter (Challies and Burleigh 2004, p. 4). Of four colonies of greater than 50 nests on the sides of bays, one was destroyed between 1981 and 2000, and nest numbers in the other three colonies were reduced by 72 to 77 percent. In these four colonies, the total number of nests decreased 83 percent between 1981 and 2000, from 489 nests down to 85 nests. The surviving colonies are almost all inside the bays close to the headlands or on the peripheral coast (Challies and Burleigh 2004, p. 4), with white-flippered penguins breeding

primarily on rocky sites backed by bluffs. Challies and Burleigh (2004, p. 4) concluded, given the subspecies' historical habitat and the difficulties of landing at these exposed breeding sites, that predation has forced white-flippered penguins into marginal, non-preferred habitat.

At the present time, colonies are largest either on inshore predator-free islands or in places on the mainland where predators are being controlled or which are less accessible to predators. The historic decline in penguin numbers is clearly continuing based on the current evidence of predation in existing recently surveyed colonies and we expect this to continue into the foreseeable future (Challies and Burleigh 2004, p. 5). In addition to documenting direct overland access to colonies by predators, Challies and Burleigh (2004, p. 5) documented predation at colonies thought not to be accessible over land. For example, there is evidence that stoats, which are good swimmers, are reaching colonies at otherwise inaccessible parts of the shoreline, indicating that the spread of predation continues.

The potential for dispersal and establishment of new colonies, which might allow for expansion of white-flippered penguin numbers, is also severely limited by predation. Fifty percent or more of adults attempt to nest away from their natal colony. Historically, such movements led to interchange between colonies and maintenance of colony size even as dispersal took place. With the presence of predators, this dispersal now leads breeding birds to settle in areas accessible to predators where the penguins are eventually killed (Challies and Burleigh 2004, p. 5). One consequence of this pattern of dispersal and predation is that colonies suffer a net loss of breeding adults.

Predator trapping started in 1981 on Godley Head near Christchurch and is carried out by a network of volunteers and private landowners around the Banks Peninsula. Some small, predator-proof fences were erected to protect vulnerable colonies (Taylor 2000, p. 70; Williamson and Wilson 2001, p. 435). It is not clear how widespread such efforts are over the large geographical area of the Banks Peninsula or how successful they are. Williamson and Wilson (2001, p. 435) reported on two predator trapping programs that occurred in 1988 and 1991 at two relic colonies at the heads of Flea and Stony Bays. Predator trapping programs continue today (Challies 2009, pers. comm.). Preliminary results indicated white-flippered penguins numbers were stable at Flea Bay, but Stony Bay populations of white-flippered penguins were in decline. Even though such trapping efforts began in 1981, Challies and Burleigh (2004, p. 5) concluded on the basis of data collected in the 2000–2001 and 2001–2002 breeding seasons that the historic decline in white-flippered penguin numbers was continuing. However, although the numbers are still less than 10 percent of what existed at the time of European settlement, since 2000, most of the penguin colonies have grown by approximately 50 percent (Challies 2009, pers. comm.).

At Motunau Island, the only other breeding area for this subspecies, there are no introduced predators. Rabbits, which could have impacted breeding habitat, were eradicated in 1963 (Taylor 2000, p. 70). The Action Plan for Seabird Conservation in New Zealand lists pest quarantine measures to prevent new animal and plant pest species reaching Motunau Island as a needed future management action (Taylor 2000, p. 70), but we have no reports on whether such measures are now in place, and we cannot discount the current or future risk of predator introduction to Motunau Island.

Predators are present at the larger Banks Peninsula colony (56 percent of the nests for the subspecies), but not currently at the smaller colony at Motunau Island (46 percent of the nests), although the risk of future predator introduction to Motunau Island exists. On the basis of information on the impact of predators, the failure of existing programs to eliminate them, and the possibility of dispersal of predators to current predator-free areas such as Motunau Island, we conclude that predation by introduced mammals is a threat to the white-flippered penguin.

Factor D. Inadequacy of Existing Regulatory Mechanisms

The white-flippered penguin is protected under New Zealand's Wildlife Act of 1953, which gives absolute protection to wildlife throughout New Zealand and its surrounding marine economic zone. No one may kill or have in their possession any living or dead protected wildlife unless they have appropriate authority.

In 1998, the IUCN Conservation Assessment and Management Plan (CAMP) data sheet for white-flippered penguin (Ellis *et al.* 1998, p. 87) concluded that the deteriorating status of this subspecies was not a high priority for the New Zealand DOC due to budgetary constraints. The CAMP noted that activities to date had not been government funded, but self funded by investigators or by grants from non-governmental organizations. Since then, the New Zealand DOC has adopted the Action Plan for Seabird Conservation, which includes recommendations on management of terrestrial threats to the white-flippered penguin as well as threats within the marine environment. We did not rely on these measures in our analysis because we do not have reports on which measures, if any, have been implemented and how they relate, in particular, to efforts to reduce the threat of predation on white-flippered penguins at Banks Peninsula.

The Banks Peninsula marine waters have special protective status as a marine sanctuary, which was established in 1988 and primarily directed at protection of the Hector's dolphin (*Cephelorhynchus hectori*) from bycatch in set nets. The 4–month set net ban, from November to the end of February, which also includes Motunau Island, is designed to reduce entanglements of these dolphins and to reduce the risk of entanglement of white-flippered penguins and yellow-eyed penguins (NZ DOC 2007, p. 1). Ten years ago, in the Action Plan for Seabird Conservation, this ban was reported to have been widely disregarded (Taylor 2000, p. 70). That Action Plan states that restriction on the use of set nets near key white-flippered penguin colonies may be necessary to protect the subspecies and recommends an advocacy program to encourage set net users to adopt practices that will minimize seabird bycatch. We have information indicating that white-flippered penguins are frequently caught in set nets, and no current information to indicate whether, or to what extent, set net restrictions have reduced take at either Banks Peninsula or Motunau Island.

New Zealand has in place The New Zealand Marine Oil Spill Response Strategy, which provides the overall framework to mount a response to marine oil spills that occur within New Zealand's area of responsibility. The aim of the strategy is to minimize the effects of oil on the environment and on human safety and health. The National Oil Spill Contingency Plan promotes a planned and nationally coordinated response to any marine oil spill that is beyond the capability of a local regional council or outside the region of any local council (Maritime New Zealand 2007, p. 1). As discussed below under Factor E, rapid containment of spills in remote areas and effective triage response under this plan have shown these to be effective regulatory mechanisms (New Zealand Wildlife

Health Center 2007, p. 2; Taylor 2000, p. 94). However, because the two major concentrations of white-flippered penguins are near a major South Island port, we conclude under Factor E that oil spills are a threat to this subspecies.

Given that existing programs have failed to eliminate introduced predators and that these predators appear to be spreading, we believe their impact on the white-flippered penguin will continue in the future. There is no information to suggest that the current effects of bycatch will be reduced in the foreseeable future, nor that regulatory mechanisms will become sufficient to address or ameliorate this threat to the subspecies. Based on the occurrence of previous oil spills around New Zealand and the location of the only two breeding populations of white-flippered penguins adjacent to Christchurch, a major South Island port, we find that oil spills will likely occur in the future. Furthermore, because of the low overall numbers of white-flippered penguins, there is a high likelihood that oil spill events, should they occur in this area, will impact white-flippered penguins. On the basis of a review of available information and on the basis of the continued threats of predation, fisheries bycatch (including the use of set nets), and oil spills to this subspecies, we find that inadequacy of existing regulatory mechanisms is a threat to the white-flippered penguin.

Factor E. Other Natural or Manmade Factors Affecting the Continued Existence of the Species

In 2000, Taylor reported that New Zealand's Action Plan notes that white-flippered penguins were frequently caught in nearshore set nets, especially around Motunau Island (p. 69). The number of birds currently caught is not known, but there is a history of "multiple net catches" of penguins around Motunau Island (Ellis *et al*, 1998, p. 87). Restrictions on the use of set nets in the areas of Banks Peninsula and Motunau Island were instituted in 1988 (see discussion under Factor D above), but bans on leaving nets set inshore overnight were reported to be widely disregarded a decade ago (Ellis *et al*. 1998, p. 87). Such impacts interact with the more severe threat of predation at Banks Island, exacerbating declines there. Reports indicate bycatch impacts are most severe at Motunau Island, which is currently predator-free. Although enforcement of all fisheries regulations has increased within the past few years (Challies 2009, pers. comm.), based on the best available information we do not have a basis to conclude that rates of bycatch have in fact declined or will decline in the foreseeable future. We have found no documented information to indicate that net restrictions have reduced take. Therefore, we find that bycatch of the white-flippered penguin by fishing activities is a threat to this subspecies of penguin.

We have examined the possibility that oil and chemical spills may impact white-flippered penguins. Such spills, should they occur and not be effectively managed, can have direct effects on marine seabirds such as the white-flippered penguin. The entire subspecies nests in areas of moderate shipping volume coming to Port Lyttelton at Christchurch, New Zealand. This port lies adjacent to, and just north of, the Banks Peninsula and just south of Motunau Island. On this basis, the Action Plan for Seabird Conservation in New Zealand specifically identifies a large oil spill as a key potential threat to this species (Taylor 2000, pp. 69–70) and recommends that penguin colonies be identified as sensitive areas in oil spill contingency plans (Taylor 2000, pp. 70–71).

Two spills have been recorded in the overall region of the South Island of New Zealand and its offshore islands. These spills did not impact the white-flippered penguin. In March 2000, the fishing vessel *Seafresh 1*sank in Hanson Bay on the east coast of Chatham Island and released 66 T (60 t) of diesel fuel. Rapid containment of the oil at this remote location prevented any wildlife casualties (New Zealand Wildlife Health Center 2007, p. 2). The same source reported that, in 1998, the fishing vessel *Don Wong 529*ran aground at Breaksea Islets, off Stewart Island. Approximately 331 T (300 t) of marine diesel was spilled along with smaller amounts of lubricating and waste oils. With favorable weather conditions and establishment of triage response, no casualties from this oil spill event were discovered (Taylor 2000, p. 94).

While New Zealand has a good record of oil spill response, an oil spill in the vicinity of one of the two breeding colonies of the white-flippered penguin, which lie closely adjacent to the industrial port of Port Lyttelton, could impact a large portion of the individuals of this subspecies if not immediately contained. Previous spills have been in more remote locations, with more leeway for longer term response before oil impacted wildlife. Based on the occurrence of previous spills around New Zealand, the low overall numbers of white-flippered penguins, and the location of their only two breeding populations adjacent to Christchurch, a major South Island port, there is a high likelihood that oil spill events, should they occur in this area, will impact white-flippered penguins. Therefore, we find that oil spills are a threat to the white-flippered penguin.

Based on the analysis above, we find that both fisheries bycatch and the potential for oil spills are threats to the white-flippered penguin now and in the foreseeable future.

White-flippered Penguin Finding

Predation by introduced mammalian predators is the most significant factor threatening white-flippered penguin within the subspecies' breeding range. Predation by introduced species has contributed to the historical decline of this subspecies since the late 1800s and is reducing numbers at the current time. In addition to reducing numbers in existing colonies, the presence of predators has been documented as a barrier to the dispersal of breeding birds and the establishment of new colonies, perhaps indicating larger declines are to be expected. New Zealand laws require protection of this native subspecies. Anti-predator efforts have not stopped declines of white-flippered penguins at Banks Peninsula, although eradication of predators has been achieved at Motunau Island. Removal of introduced mammalian predators on the mainland Banks Peninsula is an extremely difficult, if not impossible, task. Trapping and physical protection of a few local breeding groups through fencing have proven locally successful, but these efforts are not widespread. The Banks Peninsula, with 186 mi (300 km) of coastline and approximately 70 white-flippered penguin colonies, is a very large area to control, and predation impacts will continue. The threat of reinvasion remains, both at Motunau Island and in areas of the Banks Peninsula where predator control has been implemented (Taylor 2000, p. 70; Challies and Burleigh 2004, p. 5). Therefore, we find that predation is a threat to the white-flippered penguin.

The white-flippered penguin is also impacted by threats in the marine environment. While set-net bans have been in place since the 1980s to reduce take of white-flippered penguins and other species, bycatch in coastal gill-net fisheries is known to result in mortality to white-flippered penguins foraging from breeding areas. Although we do not have quantitative data on the extent of bycatch, the best available information indicates that take by set nets is exacerbating the more severe threat of predation at Banks Island, while such impacts are the primary threat at Motunau Island. Based on the best available scientific and commercial

information, we conclude that bycatch is a threat to the white-flippered penguin.

Documented oil spills have occurred in the vicinity of the South Island of New Zealand in the last decade. While such events are rare, future events have the potential to impact white-flippered penguins. If a spill event were to occur near the city of Christchurch and the adjacent Banks Peninsula, and not be immediately contained, it would be very likely to impact either, or both, of the two breeding sites of the white-flippered penguin in a very short time, affecting up to 65 percent of the population at one time. While New Zealand oil spill response and contingency plans have been shown to be effective in previous events, the location of the only two breeding areas of this subspecies near industrial areas and marine transport routes increase the likelihood that spill events will impact the white-flippered penguin.

Major reductions in the numbers of nests in individual colonies and the loss of colonies indicate the population of white-flippered penguin at Banks Peninsula is declining as the threat of predation impacts this subspecies. The subspecies has a low population size (10,460 individuals), with breeding populations concentrated solely in two highly localized breeding areas. Bycatch from fisheries activities is an ongoing threat to members of this subspecies breeding at both Motunau Island and the Banks Peninsula. For both breeding areas, which are close to an industrial port and shipping lanes, oil spills are a threat to the white-flippered penguin in the foreseeable future.

In considering the foreseeable future as it relates to the status of the white-flippered penguin, we considered the threats acting on the subspecies, as well as population trends. We considered the historical data to identify any relevant existing trends that might allow for reliable prediction of the future (in the form of extrapolating the trends).

The available data indicate that the historic decline in penguin numbers is clearly continuing based on the current evidence of predation by introduced species in existing recently surveyed colonies at Banks Island. Based on our analysis of the best available information, we have no reason to believe that population trends will change in the future, nor that the effects of current threats acting on this subspecies will be ameliorated in the foreseeable future. Therefore, we find that the white-flippered penguin is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Significant Portion of the Range Analysis

Having determined that the white-flippered penguin is likely to become in danger of extinction within the foreseeable future throughout all of its range, we also considered whether there are any significant portions of its range where the subspecies is currently in danger of extinction.

White-flippered penguins breed in two areas; one area is on the shores of the Banks Peninsula south of Christchurch on the mainland of New Zealand, and the other area is Motunau Island about 62 mi (100 km) north. Colonization of any possible intermediate breeding range appears to be precluded by predation (Challies and Burleigh 2004, p. 5). The Banks Peninsula colony is larger, consisting of about 2,110 breeding pairs; Motunau Island has about 1,635 breeding pairs. During our analysis, we did not find that there were any significant differences in the quality, quantity, or distribution of habitat relative to the biological requirements of the species. Nor did we find that there was uniqueness of either habitat for reasons such as breeding, feeding, or suitability for population expansion. No genetic differences were found between the populations such that one or the other was found to be significant.

Threats in the marine environment, particularly fisheries bycatch, have similar impacts on the two areas. Given the proximity of each colony to the port of Christchurch, we conclude that oil spills are also an equal threat in both areas. Predation by introduced predators is documented at Banks Peninsula, and introduction of predators is a potential future threat at Motunau Island, where population numbers are stable. Because predation is a current threat in the Banks Peninsula portion of the range, we considered whether the Banks Peninsula portion of the range, where population declines are ongoing, may be currently in danger of extinction. Although the threat of introduced predators is greater at the Banks Peninsula, two other factors offset this: a combination of local management protection of some colonies and the existence of inaccessible refugia from predators for some small colonies on the outer coast and offshore rocks and islands. The threat of predation is somewhat greater at the Banks Peninsula relative to Motunau Island, but as discussed in our analysis under Factor D, the best available scientific and commercial data suggest that this threat is not so disproportionately severe as to place the species in danger of extinction at the Banks Peninsula portion of its range at present. As a result, we have determined that there are no significant portions of the range in which the subspecies is currently in danger of extinction. Therefore, we are listing the white-flippered penguin as threatened throughout all of its range under the Act.

Fiordland Crested Penguin *(Eudyptes pachyrhynchus)*

Background

The Fiordland crested penguin, also known by its Maori name, tawaki, is endemic to the South Island of New Zealand and adjacent offshore islands southwards from Bruce Bay. The species also nests on Solander Island (0.3 mi^2 (0.7 km^2), Codfish Island (5 mi^2 (14 km^2)), and islands off Stewart Island at the south end of the South Island (Taylor 2000, p. 58). Major portions of the range are in Fiordland National Park (4,825 mi^2 (12,500 km^2)) and Rakiura National Park (63 mi^2 (163 km^2)) on Stewart Island and on adjacent islands. Historically, there are reports of breeding north to the Cook Straits and perhaps on the southernmost part of the North Island (Ellis *et al.* 1998, p. 69). The Fiordland crested penguin breeds in colonies situated in inaccessible, dense, temperate rainforest along shores and rocky coastlines, and sometimes in sandy bays. It feeds on fish, squid, octopus, and krill (van Heezik 1989, pp. 151-156).

Outside of the breeding season, the birds have been sighted around the North and South Islands and south to the sub-Antarctic islands, and the species is a regular vagrant to southeastern Australia (Simpson 2007, p. 2; Taylor 2000, p. 58). Houston (2007a, p. 2) of the New Zealand DOC comments that the appearance of vagrants in other locations is not necessarily indicative of the normal foraging range of Fiordland crested penguins; however, he also states that the non-breeding range of this species is unknown.

A five-stage survey effort, conducted during 1990–1995, documented all the major nesting areas of Fiordland crested penguin throughout its known current range (McLean and Russ 1991, pp. 183–190; Russ *et al.* 1992, pp. 113–118; McLean *et al.* 1993, pp. 85–94; Studholme *et al.* 1994, pp. 133–143; McLean *et al.* 1997, pp. 37–47). In these studies, researchers systematically surveyed the entire length of the range of this species, working their way along the coast on foot to identify and count individual nests, and conducting small boat surveys from a few meters offshore

to identify areas to survey on foot. The coastline was also scanned from a support ship, to identify areas to survey (McLean *et al.* 1993, p. 87). A final count of nests for the species resulted in an estimate of between 2,500 and 3,000 nests annually (McLean *et al.* 1997, p. 45) and a corresponding number of 2,500 to 3,000 breeding pairs. The staging of this survey effort reflects the dispersed distribution of small colonies of this species along the convoluted and inaccessible mainland and island coastlines of the southwest portion of the South Island of New Zealand.

Long-term and current data on overall changes in abundance are lacking. The June 2007 Fiordland National Park Management Plan (New Zealand Department of Conservation (NZ DOC) 2007, p. 53) observed that Fiordland crested penguin numbers appear to be stable, and reported on the nesting success of breeding pairs at island (88 percent) versus mainland (50 percent) sites. The Management Plan raises uncertainty as to whether 50 percent nesting success will be sufficient to maintain the mainland population long term. Populations on Open Bay Island decreased by 33 percent between 1988 and 1995 (Ellis *et al.* 1998, p. 70), and a long-term decline may have occurred on Solander Island (Cooper *et al.* 1986, p. 89). Historical data report thousands of individuals in locations where numbers in current colonies are 100 or fewer (Ellis *et al.* 1998, p. 69). The species account in the New Zealand Action Plan for Seabird Conservation states that "the population status of the species throughout its breeding range is still unknown and will require long-term monitoring to assess changes" (Taylor 2000, p. 58).

The IUCN Red List (BirdLife International 2010, p. 1) classifies this species as "Vulnerable" because it has a small population assumed to have been undergoing a rapid reduction of at least 30 percent over the last 29 years. This classification is based on trend data from a few sites. For example, at Open Bay Island there was a 33 percent decrease for the time period 1988–1995. The Fiordland crested penguin is listed as Category B (second priority) on the Molloy and Davis threat categories employed by the New Zealand DOC (Taylor 2000, p. 33) and placed in the second tier in New Zealand's Action Plan for Seabird Conservation. The species is listed as "acutely threatened—nationally endangered" on the New Zealand Threat Classification System list (Hitchmough *et al.* 2007, p. 38; Molloy *et al.* 2003, pp. 13–23). Under this classification system, which is nonregulatory, species experts assess the placement of species into threat categories according to both status criteria and threat criteria. Relevant to the Fiordland crested penguin evaluation are its low population size and reported declines of greater than or equal to 60 percent of the total population in the last 100 years (Molloy *et al.* 2003, p. 20).

Summary of Factors Affecting the Fiordland Crested Penguin

Factor A. The Present or Threatened Destruction, Modification, or Curtailment of the Fiordland Crested Penguin's Habitat or Range

The Fiordland crested penguin has a patchy breeding distribution from Jackson Bay on the west coast of the South Island of New Zealand southward to the southwest tip of South Island and southern offshore islands, including Stewart Island. A major portion of this range is encompassed by the Fiordland National Park on South Island and Solander Island and Rakiura National Park on Stewart Island and on adjacent islands at the southern tip of New Zealand. The majority of the breeding range of the Fiordland crested penguin lies within national parks and is currently protected from destruction and modification. The only reported instance of terrestrial habitat modification comes from the presence of deer (no species name provided) in some colonies that may trample nests or open up habitat for predators (Taylor 2000, p. 58). Therefore, we find that the present destruction, modification, or curtailment of the terrestrial habitat or range of the Fiordland crested penguin is not a threat to the species.

The marine foraging range of the Fiordland crested penguin is poorly documented. Recent observations on the foraging behavior of the species around Stewart and Codfish Islands found birds foraging very close to shore and in shallow water (Houston 2007a, p. 2), indicating the species may not be a pelagic (open ocean) feeder. The species is a vagrant to more northerly areas of New Zealand and to southeastern Australia, but that is not considered indicative of its normal foraging range (Houston 2007a, p. 2).

"Prey shortage due to sea temperature change" while foraging at sea has been cited as a threat to Fiordland crested penguins because of possible changes in prey distribution as a result of warming sea temperatures. ((Ellis *et al.* 2007, p. 6; Taylor 2000, p. 59). However, the Action Plan for Seabird Conservation in New Zealand concluded that the effects of oceanic changes or marine perturbations such as El Nino events on this species are unknown (Taylor 2000, p. 59). The plan identified the need for future research on distribution and movements of this species in the marine environment (Taylor 2000, p. 61).

Based on this analysis, we find that the present or future destruction, modification, or curtailment of the terrestrial and marine habitat or range is not a threat to the Fiordland crested penguin.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Although human disturbance of colonies is rare because the birds generally nest in inaccessible sites, this species exhibits high nest fidelity, and their ability to reproduce may be significantly impacted by a small amount of human disturbance (St. Clair 1999, pp. 37-41). In more accessible areas, such as the northern portion of the range at South Westland, large concentrations of nests occur in areas accessible to people. In addition, tourism may disturb breeding (McLean *et al.* 1997, p. 46; Taylor 2000, p. 58). The 2000 Action Plan for Seabird Conservation in New Zealand stated that guidelines are needed to control visitor access to mainland penguin colonies and accessible sites should be protected as wildlife refuges (Taylor 2000, p. 60). It is unclear whether such measures have been implemented based on the information available. Research activities, particularly handling penguins for purposes such as insertion of transponders and weighing, may also disturb breeding birds. Houston (2007a, p. 1) reported that monitoring of breeding success at Jackson's Head has been abandoned due to concerns of adverse effects of the research on breeding success and recruitment. There is no evidence of use of the species for other commercial, recreational, scientific, or educational purposes.

The threat of human disturbance could increase as tourism activities become more widespread in the region, and we have no information that indicates this threat will be alleviated for the Fiordland crested penguin in the foreseeable future. Because this species is so sensitive to human disturbance and exhibits high nest fidelity, we find that the present overutilization for commercial, recreational, scientific, or educational purposes, particularly human disturbance from tourism, is a threat to the survival of the Fiordland crested penguin.

Factor C. Disease or Predation

Reports from 1976 documented that Fiordland crested penguin chicks have

been infected by the sandfly-borne protozoan blood parasite (*Leucocytozoon tawaki)* (Taylor 2000, p. 59) (see discussion under Factor C for the yellow-eyed penguin). Diseases such as avian cholera, which has caused the deaths of southern rockhopper penguin adults and chicks at the Campbell Islands, are inferred to be a potential problem in Fiordland crested penguin colonies (Taylor 2000, p. 59). However, with no significant disease outbreaks reported, the best available information leads us to conclude that disease is not a threat to this species.

Predation from introduced mammals and birds is a threat to the Fiordland crested penguin (Taylor 2000, p. 58; Ellis *et al.* 1998, p. 70). Comments received from the New Zealand DOC link historical declines of Fiordland crested penguins to the time of arrival of mammalian predators, particularly stoats, to the area (Houston 2007a, p. 1). Only Codfish Island, where 144 nests have been observed, is fully protected from introduced mammalian and avian predators (Studholme *et al.* 1994, p. 142). This island lies closely adjacent to Stewart Island, so the future possibility of predator reintroduction is possible. Mustelids, especially stoats, are reported to take eggs and chicks in mainland colonies and may occasionally attack adult penguins (Taylor 2000, p. 58). The Norway rat, ship rat, and Pacific rat are also likely predators, but there is no direct evidence of rat predation of Fiordland crested penguins. Feral cats and pigs are also potential predators, but they are not common in nesting areas. Recent observations since the development of the Action Plan (Taylor 2000, p. 58), which originally discounted the impact of the introduced possum (*Trichosurus vulpecula*), indicate that this species has now colonized the mainland range of the Fiordland crested penguin in South Westland and Fiordland. Initially thought to be vegetarians, it is now documented that possums eat birds, eggs, and chicks and also compete for burrows with native species. It is not yet known if they compete for burrows or eat the eggs of Fiordland crested penguins, as they do other native species, but it is likely (Houston 2007b, p. 1). Domestic dogs are also known to kill adult penguins and disturb colonies near human habitation (Taylor 2000, p. 58).

Weka, which are omnivorous, flightless rails about the size of chickens and native to other regions of New Zealand, have been widely introduced onto offshore islands of New Zealand. At Open Bay Islands and Solander Islands, this species has been observed destroying the eggs and killing the chicks of Fiordland crested penguins. At Open Bay Island colonies, weka caused 38 percent of egg mortality observed and 20 percent of chick mortality (St. Clair and St. Clair 1992, p. 61). The decline in numbers of Fiordland crested penguin on the Solander Islands from "plentiful" to a few dozen since 1948 has also been attributed to egg predation by weka (Cooper *et al.* 1986, p. 89). Among the future management actions identified as needed in New Zealand's Action Plan for Seabird Conservation are eradicating weka from Solander Island and addressing the problem of weka predation at Open Bay Islands (Taylor 2000, p. 60).

The available data indicate that historical declines have been linked to introduced predators on the South Island of New Zealand, and recently documented declines have been attributed to introduced predators. Given the remote and widely dispersed range of the Fiordland crested penguin, especially on the mainland of the South Island, significant anti-predator efforts are largely impractical for this species. We are unaware of any time-bound plan to implement anti-predator protection for Fiordland crested penguins or of any significant efforts to stem ongoing rates of predation. Therefore, we find that predation by introduced species is reasonably likely to continue in the foreseeable future. Predator control programs have been undertaken on only a few islands in a limited portion of the Fiordland crested penguin's range and are not practicable in the inaccessible mainland South Island strongholds of the species (Taylor 2000, p. 59).

Predation by introduced mammalian species is the primary threat facing the Fiordland crested penguin on the mainland South Island of New Zealand. On breeding islands free of mammalian predators, for example, on Open Bay Islands and Solander Island, an introduced bird, the weka, is a predator of Fiordland penguin eggs and chicks. Only Codfish Island is fully protected from introduced mammalian and avian predators. Therefore, we find that although predation by introduced species is not a threat to the Fiordland crested penguin on Codfish Island, it is a threat to this species in other portions of its range.

Factor D. Inadequacy of Existing Regulatory Mechanisms

The Fiordland crested penguin is protected under New Zealand's Wildlife Act of 1953, which gives absolute protection to wildlife throughout New Zealand and its surrounding marine economic zone. No one may kill or have in their possession any living or dead wildlife unless they have appropriate authority.

The majority of the range of the Fiordland crested penguin is within the Fiordland National Park (which includes Solander Island) and adjacent parks, including Rakiura National Park on Stewart Island. Fiordland National Park covers 15 percent of public conservation land in New Zealand. Under section 4 of New Zealand's National Parks Act of 1980 and Park bylaws, "the native plants and animals of the parks shall as far as possible be preserved and the introduced plants and animals shall as far as possible be eradicated" (NZ DOC 2007, p. 24). The June 2007 Fiordland National Park Management Plan (NZ DOC 2007, pp. 1–4) contains, in its section on Preservation of Indigenous Species and Habitats, a variety of objectives aimed at maintaining biodiversity by preventing the further loss of indigenous species from areas where they were previously known to exist. The Fiordland crested penguin is specifically referenced in the audit of biodiversity values to be preserved in the Park (NZ DOC 2007, p. 53). In addition, the Fiordland Marine Management Act of 2005 establishes the Fiordland Marine area and 8 marine reserves within that area, which encompass more than 2.18 million ac (882,000 ha) extending from the northern boundary of the Park to the southern boundary (excluding Solander Island) (NZ DOC 2007, p. 29). The species also inhabits Rakiura National Park on Stewart Island and Whenua Hou (Codfish Island) and is protected by New Zealand's National Parks Act of 1980 and Park bylaws.

The Fiordland National Park is encompassed in the Te Wahipounamu—South West New Zealand World Heritage Area. World Heritage areas are designated under the World Heritage Convention because of their outstanding universal value (NZ DOC 2007, p. 44). Such designation does not confer additional protection beyond that provided by national laws.

Despite these designations and the possibility of future efforts, we have no information to indicate that measures have been implemented that reduce the threats to the Fiordland crested penguin.

The Fiordland crested penguin has been placed in the group of birds ranked as second tier threat status in New Zealand's Action Plan for Seabird Conservation on the basis of its being listed as 'Vulnerable' by IUCN Red List Criteria and as Category B (second priority) on the Molloy and Davis threat categories employed by the New

Zealand DOC (Taylor 2000, p. 33). The Action Plan, while not a legally binding document, outlines actions and priorities intended to define the future direction of seabird management in New Zealand. High-priority future management actions identified are eradication of weka from Big Solander Island and development of a management plan for the Open Bay Islands to address the problem of weka predation on Fiordland crested penguins and other species. We do not have information to allow us to evaluate whether any of these proposed actions and priorities have been carried out and, therefore, have not relied on this information in our threat analysis.

New Zealand has in place the New Zealand Marine Oil Spill Response Strategy, which provides the overall framework to mount a response to marine oil spills that occur within New Zealand's area of responsibility. The aim of the strategy is to minimize the effects of oil on the environment and on human safety and health. The National Oil Spill Contingency Plan promotes a planned and nationally coordinated response to any marine oil spill that is beyond the capability of a local regional council or outside the region of any local council (Maritime New Zealand 2007, p. 1). As discussed below under Factor E, rapid containment of spills in remote areas and effective triage response under this plan have shown these to be effective regulatory mechanisms (New Zealand Wildlife Health Center 2007, p. 2; Taylor 2000, p. 94).

Major portions of the coastal and marine habitat of the Fiordland crested penguin are protected under a series of laws, and the species itself is covered under the New Zealand Wildlife Act. New Zealand's National Parks Act specifically calls for controlling and eradicating introduced species. While there has been limited success in controlling some predators of Fiordland crested penguins at isolated island habitats comprising small portions of the overall range, the comprehensive legal protection of this species has not surmounted the logistical and resource constraints that stand in the way of limiting or eradicating predators on larger islands and in inaccessible mainland South Island habitats. Furthermore, we are not able to evaluate whether efforts to reduce the threats of human disturbance discussed in Factor B have been implemented or achieved results.

On the basis of this information, we find that inadequacy of existing regulatory mechanisms is a threat to the Fiordland crested penguin.

Factor E. Other Natural or Manmade Factors Affecting the Continued Existence of the Species

Commercial fishing in much of the species' range is a comparatively recent development and is considered unlikely to have played a significant role in historic declines (Houston 2007a, p. 1). New Zealand's Seabird Action Plan noted that Fiordland crested penguins could potentially be caught in set nets near breeding colonies and that trawl nets are also a potential risk. Competition with squid fisheries is also noted as a potential threat (Taylor 2000, p. 59; Ellis *et al.* 1998, p. 70; Ellis *et al.* 2007, p. 7). The 1998 CAMP recommended research on foraging ecology to identify potential competition with commercial fisheries and effects of climatic variation (Ellis *et al.* 1998, pp. 70–71), but we are not aware of the results of any such studies. The New Zealand DOC (Houston 2007a, p. 1), in its comments on our 90–day petition finding (73 FR 77303), noted that the "assessment of threats overstates the threat from fisheries" to the Fiordland crested penguin. The distribution and behavior of this species may reduce the potential impact of bycatch. The Fiordland crested penguin is distributed widely along the highly convoluted, sparsely populated, and legally protected South Island coastline for a linear distance of over 155 mi (250 km), as well as along the coasts of several offshore islands. These marine reserves are granted protection under the Marine Reserves Act of 1971 (NZ DOC 2010, pp. 1-3). The Act, in part, states that the reserves shall be preserved as far as possible in their natural state, marine life of the reserves shall as far as possible be protected and preserved, the public shall have freedom of access and entry to the reserves, and no person shall fish in a marine reserve [unless specifically authorized]. Significant feeding concentrations of the species, which might be susceptible to bycatch, have not been described. Given the absence of documentation of actual impacts of fisheries bycatch on the Fiordland crested penguin, we conclude that this is a not threat to the species.

We have examined the possibility that oil and chemical spills may impact Fiordland crested penguins. Such spills, should they occur and not be effectively managed, can have direct effects on marine seabirds such as the Fiordland crested penguin. The range of the Fiordland crested penguin on the southwest coast of the South Island of New Zealand is remote, far from shipping activity and away from any major human population centers. Thus the consequent risk of oil or chemical spills is low. The Stewart Islands populations at the southern end of New Zealand are in closer proximity to vessel traffic and human industrial activities, which may increase the possibility of oil or chemical spill impacts. Two spills have been recorded in this overall region. In March 2000, the fishing vessel *Seafresh 1*sank in Hanson Bay on the east coast of Chatham Island and released 66 T (60 t) of diesel fuel. Rapid containment of the oil at this remote location prevented any wildlife casualties (New Zealand Wildlife Health Center 2007, p. 2). The same source reports that, in 1998, the fishing vessel *Don Wong 529*ran aground at Breaksea Islets off Stewart Island. Approximately 331 T (300 t) of marine diesel was spilled along with smaller amounts of lubricating and waste oils. With favorable weather conditions and establishment of triage response, no casualties from this pollution event were discovered (Taylor 2000, p. 94). There is no doubt that an oil spill near a breeding colony could have a major effect on this species (Taylor 2000, p. 94). However, based on the remote distribution of Fiordland penguins around the mainland South Island, and on offshore islands at the southern tip of the South Island, the low number of previous incidents around New Zealand, and the fact that each was effectively contained under the New Zealand Marine Oil Spill Response Strategy and resulted in no mortality or evidence of impacts on the population, we find that oil and chemical spills are not a threat to the Fiordland crested penguin.

In summary, while fisheries bycatch has been suggested as a potential source of mortality to the Fiordland crested penguin, the best available information leads us to conclude that this is not a threat to this species. There is a low-level potential for oil spill events to impact this species, but the wide dispersal of this species along inaccessible and protected coastlines leads us to conclude that potential oil spills are not a threat to the Fiordland crested penguin. Therefore, we find that other natural or manmade factors are not a threat to the species.

Fiordland Crested Penguin Finding

The primary documented threat to the Fiordland crested penguin is predation by introduced mammalian and avian predators within the species' breeding range. We are only aware of one small breeding location that is known to be free of predators. The impact of predators is evidenced by the major

historical decline of the Fiordland crested penguin during the period of invasion by these predators of the South Island of New Zealand. Historical data from about 1890 cites thousands of Fiordland crested penguins in areas where current surveys find colonies of only 100 or fewer. Even though this species is poorly known, an exhaustive multi-year survey effort documented current low population numbers. Recent declines at Open Bay and Solander Islands have been documented as resulting from weka predation. The Fiordland crested penguin is a remote and hard-to-study species. However, in observing the impact of predators on other similar naïve, New Zealand penguins, such as the yellow-eyed (Darby and Seddon 1990, p. 45) and the white-flippered penguin (Challies and Burleigh 2004, p. 4), one can assume that predators would have a similar impact on Fiordland crested penguins.

In considering the foreseeable future as it relates to the status of the Fiordland crested penguin, we considered the threats acting on the species, as well as population trends. We considered the historical data to identify any relevant existing trends that might allow for reliable prediction of the future (in the form of extrapolating the trends).

New Zealand laws and the bylaws of its national parks, which encompass the majority of the range of the Fiordland crested penguin, institute provisions to "as far as possible" protect this species and to seek eradication of nonnative invasive species. Unfortunately, while complete eradication of predators, such as weka, in isolated island habitats (e.g., Solander Island), may be possible, removal of the introduced mammalian predators now known to be widespread in mainland Fiordland National Park is an extremely difficult, if not impossible, task. Similarly, physical protection of some breeding groups from predation, as has been done for species such as the yellow-eyed and white-flippered penguins, is impractical for the Fiordland crested penguin. For other penguin species located in more accessible and more restricted ranges, the task of predator control has been undertaken at levels of effort meaningful to the protection of those species. For this remote and widely dispersed species, predator control has only been undertaken on a limited basis, and we have no reason to believe this threat to the Fiordland crested penguin will be ameliorated in the foreseeable future.

The threat of human disturbance is present in those areas of the range most accessible to human habitation, but could increase as tourism activities become more widespread in the region. While efforts to control this threat have been undertaken, we have no information that allows us to conclude this threat will be alleviated for the Fiordland crested penguin in the foreseeable future.

The overall population of the Fiordland crested penguin is small (2,500–3,000 pairs) and reported to be declining (Ellis *et al.* 2007, p. 6). The ongoing pressure of predation by introduced mammalian and avian species on this endemic species over the next few decades, with little possibility of significant anti-predator intervention, and the potential for human disturbance to impact breeding populations, leads us to find that the Fiordland crested penguin is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Significant Portion of the Range Analysis

Having determined that the Fiordland crested penguin is likely to become in danger of extinction within the foreseeable future throughout all of its range, we must consider whether there are any significant portions of its range where the species is in danger of extinction now.

Fiordland crested penguins breed in widely dispersed small colonies along the convoluted and inaccessible southwest coast of the western side of South Island, New Zealand, and adjacent offshore islands southwards from Bruce Bay, including Stewart Island, Solander Island, and Codfish Island. There are a total of 2,500 to 3,000 breeding pairs throughout its range. In our previous five-factor analyses, we found that threats from human disturbance and inadequacy of regulatory mechanisms have similar impacts on both island and mainland portions of the range. We also found that a primary threat to the Fiordland crested penguin is predation by introduced birds on islands and introduced mammals on the mainland. Major portions of this species' range are in Fiordland National Park and Rakiura National Park, and on Stewart Island and adjacent islands. The Fiordland National Park Management Plan reported that nesting success of breeding pairs at island sites was greater than at mainland sites (88 and 55 percent, respectively). This led us to consider whether the threats in the mainland portion of the range may cause this portion of the range to be in danger of extinction now. While the eradication of predators, such as weka, in isolated island habitats may be possible, removal of the widespread introduced mammalian predators on the mainland may be extremely difficult, if not impossible. However, on the mainland, the nests are widely distributed, and we believe therefore are somewhat buffered from predators. Although the predation rate is greater than that of other species (Gustafson 2005, p. 2), the mainland population has been able to persist and is not currently in danger of extinction. While the threat of introduced predators is greater on the mainland, the population is being managed to some extent, and the threats do not rise to the level that the mainland population is in imminent danger of extinction. Due to the ability of the mainland population to persist, we find that there is not substantial information to conclude that the species in the mainland portion of its range may currently be in danger of extinction.

As a result, while the best scientific and commercial data available allows us to make a determination as to the rangewide status of the Fiordland crested penguin, we have determined that there are no significant portions of the range in which the species is currently in danger of extinction. The species is widely distributed throughout its range and current threats do not put the species in immediate danger of extinction. In conclusion, we have determined that there are no significant portions of the range in which the species is currently in danger of extinction. Therefore, we are listing the Fiordland crested penguin as threatened throughout all of its range under the Act.

Humboldt Penguin *(Spheniscus humboldti)*

Background

The Humboldt penguin is endemic to the west coast of South America from Foca Island (5°12'0"S) in northern Peru to the Puñihuil Islands near Chiloe, Chile (42 °S) (Araya *et al.* 2000, p. 1). It breeds on islands off the coasts of both Peru and Chile. It is a congener (within the same genus) of the African penguin and has similar life history and ecological traits.

Humboldt penguins historically bred on guano islands off the coast of Peru and Chile (Araya *et al.* 2000, p. 1). Prior to human mining of guano for fertilizer, the Humboldt penguin's primary nesting habitat was in burrows tunneled into the deep guano substrate on offshore islands. While the guano is produced primarily by three other species (the Guanay cormorant (*Phalacrocorax bouganvillii*), the Peruvian booby (*Sula variegate*), and Peruvian pelican (*Pelecanus thagus*)),

Humboldt penguins depend on these burrows for shelter from the heat and from predators. With the intensive harvest of guano over the last century and a half in both countries, Humboldt penguins have been forced to nest out in the open or seek shelter in caves or under vegetation (Paredes and Zavalga 2001, pp. 199–205).

The distribution of the Humboldt penguin is very closely associated with the Humboldt (Peruvian) current. The upwelling of cold, highly productive waters off the coast of Peru provides a continuous food source to vast schools of fish and large seabird populations (Hays 1986, p. 170). In the Chilean system to the south, upwelling is lighter and occurs more seasonally than in the Peruvian system (Simeone *et al.* 2002, p. 44). In all regions, Humboldt penguins feed primarily on schooling fish such as the anchovy (*Engraulis ringens*), Auracanian herring (*Strangomera bentincki*), silversides (*Odontesthes regia*), garfish (*Scomberesox saurus)* (Herling *et al.* 2005, p. 21), and Pacific sardine (*Sardinops sagax*) (Simeone *et al.* 2002, p. 47). Depending on the location and the year, the proportion of each of these species in the diet varies.

Periodic failure of the upwelling and its impact on schooling fish and fisheries off Peru and Ecuador were the first recorded and signature phenomena of El Niño Southern Oscillation events (ENSO). El Niño events occur irregularly every 2–7 years (National Oceanic and Atmospheric Administration (NOAA) 2007, p. 4). This periodic warming of sea surface temperatures and consequent upwelling failure affects primary productivity and the entire food web of the coastal ecosystem. Anchovy and sardine populations are especially impacted, and these are the major diet of Humboldt penguins. During El Niño events, seabirds, fish, and marine mammals experience reduced survival and reproductive success, as well as population crashes (Hays 1986, p. 170).

Given the north-south distribution of the Humboldt penguin along the Peruvian and Chilean coasts, researchers have looked for variation in breeding and foraging along this climatic gradient (Simeone *et al.* 2002, pp. 43–50). In dry Peruvian breeding areas, where upwelling provides a constant food source, penguins nest throughout the year with two well-defined peaks in breeding in the autumn and spring. Adults remain near the colony all year. Further south, in northern and north-central Chile, the birds follow the same pattern, despite stronger seasonal differences in weather (Simeone *et al.* 2002, pp. 48–49). They also attempt to breed twice a year, but the autumn breeding event is regularly disrupted by rains more typical at that latitude, and there is high reproductive failure. Adults in the southern extent of the range (south-central Chile) leave the colonies in winter, presumably after abandoning nesting efforts (Simeone *et al.* 2002, p. 47). Peruvian and northern Chilean colonies are only impacted by rains and flooding during El Niño years, and during those years, nesting attempts are reduced as food supplies shift and adults forage farther away from nesting sites (Culik *et al.* 2000, p. 2317).

The distribution of colonies within the breeding range of the Humboldt penguin in Peru has shifted south in recent years. This shift may be in response to a number of factors:

(1) El Niño events in which prey distribution has been shown to move to the south (Culik *et al.* 2000, p. 2311);

(2) Increasing human pressure in central coastal areas;

(3) Long-term changes in prey distribution (Paredes *et al.* 2003, p. 135); or

(4) Overall increases in sea surface temperature.

Modinger (1998, p. 67) estimated that historically there may have been a million Humboldt penguins in the Humboldt Current. By 1936, there was already evidence of major population declines and of breeding colonies made precarious by the harvest of guano from over 100 Peruvian islands (Araya *et al.* 2000, p. 1, Modinger *et al.* 1998, p. 1; Ellis *et al.* 2007, p. 7).

Estimates of the population in Peru have fluctuated in recent history. They were estimated to be between 3,500 and 7,000 in 1981, with a subsequent reported decrease to 2,100 to 3,000 individuals after the 1982–1983 El Niño event. In 1996, there were reported to be 5,500 individuals, and after the strong 1997–1998 El Niño event, fewer than 5,000. In Peru, population surveys in the southern portion of the range in 2006 found 41 percent more penguins than in 2004, increasing estimates for that area from 3,100 individuals to 4,390 and supporting an overall population estimate for Peru of 5,000 individuals (Instituto Nacional de Recursos Naturales (INRENA) 2007, p. 1; IMARPE 2007, p. 1).

In Chile, researchers estimated there were 7,500 breeding Humboldt penguins in Chile in 1995–1996 (Ellis *et al.* 1998, p. 99; Luna-Jorguera *et al.* 2000, p. 508). This estimate for Chile was significantly revised following surveys conducted in 2002 and 2003 at Isla Chanaral, one of the most important breeding islands for the Humboldt penguin (Mattern *et al.* 2004, p. 373). Mattern *et al.* counted 22,000 adult penguins, 3,600 chicks, and 117 juveniles at that island in 2003 (2004, p. 373). While 6,000 breeding birds had been recorded in the 1980s, counts after 1985 had never exceeded 2,500 breeding birds (Ellis *et al.* 1998, p. 99). The authors indicated that rather than representing a sudden population increase, the discrepancy may be a result of systematic underestimates in eight previous counts at Isla Chanaral, which were all conducted using a uniform methodology, but may not have considered the absence of penguins due to breeding versus nonbreeding season in conducting the population estimate. Just to the south of this study area in the Coquimbo region, Luna-Jorguera *et al.* counted a total of 10,300 penguins in on-land and at-sea counts conducted in 1999 (2000, p. 506). They found numbers higher than the most recent previous census, which had estimated only 1,050 individuals in the Coquimbo region (Luna-Jorguera *et al.* 2000, p. 508). In 2007, Ellis *et al.* (2007, p. 7), estimated that there were approximately 30,000 to 35,000 individuals in the Chilean population. Other than the overall rangewide figures for the species presented by Ellis *et al.* (2007, p. 7), no current comprehensive estimate of the total number of penguins in Chile exists.

There are varied total population estimates for this species. As recently as 2007, Ellis *et al.* (p. 7) reported a total population of 41,000 to 47,000 individuals. However, BirdLife International currently indicates that there is an estimated total population of 3,000 to 12,000 (2009, p. 2). BLI is the official IUCN Red List Authority for birds. BLI supplies information for all of the world's birds to the IUCN Red List each year. The 2007 IUCN Red List (BirdLife International 2007, p. 1) categorizes the Humboldt penguin as "Vulnerable" on the basis of 30 to 49 percent declines over the past three generations and predicted over three generations into the future. Thus, because BLI is the accepted authority for IUCN's Red List for birds, we accept the estimate of the total population to be between 3,000 and 12,000 birds.

Summary of Factors Affecting the Humboldt Penguin

Factor A. The Present or Threatened Destruction, Modification, or Curtailment of Humboldt Penguin's Habitat or Range

The habitat of the Humboldt penguin consists of terrestrial breeding and molting sites and the marine environment, which serves as a foraging range year-round.

Terrestrial Habitat

Modification of their terrestrial breeding habitat is a continuing threat to Humboldt penguins. Humboldt penguin breeding islands were, and continue to be, a source of guano for the fertilizer industry and have been exploited since 1840 in both Peru and Chile. Between 1840 and 1880, Peru exported an estimated 12.7 million T (11.5 t) of guano from its islands (Cushman 2007, p. 1). Throughout the past century, Peru has managed the industry through a variety of political and ecological conflicts, including the devastating impacts of El Niño on populations of guano-producing birds and the competition between the fishing industry and the seabird populations that are so valuable to guano production. After 1915, caretakers of the islands routinely hunted penguins for food even as their guano nesting substrate was removed, which resulted in penguins being virtually eliminated from the guano islands (Cushman 2007, p. 11). Harvest of guano continues on a small scale today and is managed by Proyecto Especial de Promocion del Aprovechamiento de Abonos Provenientes de Aves (PROABONOS), a small government company that produces fertilizer for organic farming (Cushman 2007, p. 24).

Reports from 1936 described completely denuded guano islands and indicated that by 1936, Humboldt penguin populations had undergone a vast decline throughout the range (Ellis *et al.* 1998, p. 97). Guano, which was historically many meters deep, was initially harvested down to the substrate level. Then, once the primary guano-producing birds had produced another ankle-deep layer, it was harvested again. The Humboldt penguins, which formerly burrowed into the abundant guano, were deprived of their primary nesting substrate and forced to nest in the open, where they are more susceptible to heat stress. In addition, their eggs and chicks are more vulnerable to predators. Alternatively, they can be forced to resort to more precarious nesting sites (Ellis *et al.* 1998, p. 97).

Paredes and Zavalga (2001, pp. 199–205) investigated the importance of guano as a nesting substrate and found that Humboldt penguins at Punta San Juan, Peru, where guano harvest has ceased, preferred to nest in high-elevation sites where there was adequate guano available for burrow excavation. As guano depth increased in the absence of harvest, the number of penguins nesting in burrows increased. Penguins using burrows on cliff tops had higher breeding success than penguins breeding in the open, illustrating the impact of loss of guano substrate on the survival of Humboldt penguin populations.

Guano harvesting continues on Peruvian points and islands under government control. The fisheries agency, Instituto del Mar del Peru (IMARPE), is working with the parastatal (government-owned) guano extraction company, PROABONOS, to limit the impacts of guano extraction on penguins at certain colonies to ensure that harvest is conducted outside the breeding season and that workers are restricted from disturbing penguins (IMARPE 2007, p. 2). In 1998, the Wildlife Conservation Society and PROABONOS fenced off penguin rookeries, which successfully prevented guano harvesters from harming wildlife (Paredes *et al.* p. 136).

Two major penguin colonies at Punta San Juan and Pachacamac Island are in guano bird reserves. They are under the management and protection of the guano extraction agency, which has built walls to keep out people and predators (UNEP World Conservation Monitoring Center (UNEP WCMC) 2003, p. 9). However, guano extraction is still listed as a moderate threat to some island populations within the Reserva Nacional de Paracas (Lleellish *et al.* 2006, p. 4), and illegal guano extraction is listed by the Peruvian natural resource agency, Instituto Nacional de Recursos Naturales (INRENA), as one of three primary threats to the Humboldt penguin in Peru (INRENA 2007, p. 2). The penguin Conservation Assessment and Management Plan (CAMP) (Ellis *et al.* 1998, p. 101) recommended that the harvest of guano in Peru be regulated in order to preserve nesting habitat and reduce disturbance during the nesting seasons. Although guano harvest is still a concern in Peru, guano harvest is reported to have ceased in Chile (UNEP WCMC 2003, p. 6).

Historical declines have resulted from the destruction of Humboldt penguin's nesting substrate by guano collection, and this loss of nesting habitat continues to impact the breeding success of the species in Peru. Although guano harvest is being managed to some extent, we have no reason to believe the level of guano collection will change in the foreseeable future. We conclude, on the basis of the extent and severity of habitat modification and exploitation throughout the range of the Humboldt penguin in both countries over the past 170 years, and on the basis of ongoing guano extraction in Peru, that modification of the terrestrial breeding habitat is a threat to the survival of the Humboldt penguin.

Marine Habitat

With respect to modification of the marine habitat of the Humboldt penguin, periodic El Niño events have been shown to have significant effects on the marine environment on which Humboldt penguins depend, because they reduce the available food sources for this species. These El Niño events are considered to be the main marine perturbation for the Humboldt penguin impacting penguin colonies in Peru (Hays 1986, pp. 169–180; Ellis *et al.* 1998, p. 101; INRENA 2007, p. 1) and Chile (Simeone *et al.* 2002, p. 43). The strength and duration of El Nino events has increased since the 1970s. The 1997–1998 event was the most extreme on record (Trenberth *et al.* 2007, p. 288). The Humboldt Penguin Population and Habitat Viability Assessment (Araya *et al.* 2000, pp. 7–8) concluded that, even without El Nino and other impacts, documented rates of reproductive success and survival would cause declines in the Chilean populations. In the absence of other human impacts, El Nino events in Chile alone were projected to lead to 2.3 to 4.4 percent annual population declines. Peruvian population data for this species found an overall population decline of 65 percent during the 1982–83 El Niño event (Hays 1986, p. 169).

While we have not found comparable documentation of the impact of the 1997–1998 event in Peru, few birds were recorded breeding at guano bird reserves in 1998. At one colony, Punta San Juan, the number of breeding individuals appears to have declined by as much as 75 percent between 1996 and 1999 before a subsequent rebound (Paredes *et al.* 2003, p. 135). This suggests that a similar level of impact from a single El Niño event in the future could reduce current Peruvian populations from 5,000 birds to 1,250 - 1,750 birds. Cyclical El Nino events cause high mortality among seabirds, but there is also high selection pressure on Humboldt Current seabird populations such as the Humboldt penguin to increase rapidly in numbers after each event (Ellis *et al.* 1998, p. 101). Nonetheless, with strengthening El Nino events, reduced Humboldt penguin population numbers, and the compounding influence of other threat factors, such as ongoing competition with commercial fisheries for food sources which are discussed below under Factor E, the resiliency of Humboldt penguins to recover from cyclical El Nino events is highly likely

to be reduced from historical times (Ellis *et al.* 1998, p. 101).

On the basis of this analysis, we find that the present and threatened destruction, modification, or curtailment of both its terrestrial and marine habitats, primarily due to El Niño events and guano extraction, are threats to the Humboldt penguin.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

While hunting of Humboldt penguins for food and bait and harvesting of their eggs have been long established on the coasts of Chile and Peru, it is not clear how much hunting persists today. At Pajaros Island in Chile, Humboldt penguins are sometimes hunted for human consumption or for use as bait in the crab fishery. At the Puñihuil Islands farther south, they have also been hunted on occasion for use as crab bait (Simeone *et al.* 2003, p. 328; Simeone and Schlatter 1998, p. 420). Paredes *et al.* reported that as fishing occurs more frequently in the proximity of penguin rookeries, fishermen have begun to take penguins for food in Peru (2003, p. 136). Cheney (UNEP WCMC 2003, p. 6) reported an observation of a fisherman taking 150 penguins to feed a party. In 1995, egg harvest was listed as the primary threat to Chilean populations (UNEP WCMC 2003, p. 6), but recent information does not indicate whether that practice continues today. Paredes *et al.* (2003, p. 136) also reported that guano harvesters supplement their meager incomes and diets through the collection of eggs and chicks, although the fisheries agency, IMARPE, is working with PROABONOS to restrict workers from disturbing penguins (IMARPE 2007, p. 2). On the basis of this information, we conclude that localized intentional harvest may be ongoing. We have no basis to evaluate the effectiveness of reported efforts to control this harvest.

In 1981, the Humboldt penguin was listed on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in order to ensure that trade of the species is compatible with the species' survival. International trade in specimens of Appendix-I species is authorized through permits or certificates under certain circumstances, including verification that trade will not be detrimental to the survival of the species in the wild. It also must be determined that the specimen (live animal, part, or product) was legally acquired, and that the activity is not for primarily commercial purposes. (UNEP-WCMC 2010, p. 1). Prior to 1985, it was estimated that 9,264 Humboldt penguins had been exported to several zoos around the world within a period of 32 years. Between the time the species was listed under CITES in 1981 and 2008, there were 937 live CITES-permitted Humboldt penguin international shipments (UNEP-WCMC 2010, p. 1). Only one of these live shipments (from Peru to Venezuela) indicated that its origin was from the wild; the other shipments all indicated that they were of captive origin. Chile and Peru's exports are included in these numbers. Peru exported 48 live animals for educational and zoological purposes; Chile exported 10 live animals in 1981 and none since then. We believe that this limited amount of international trade, controlled via valid CITES permits, is not a threat to the species. Because commercial exportation of Humboldt penguins from Peru or Chile is now prohibited (Ellis *et al.* 1998, p. 101, UNEP 2003, p. 8), export is no longer a threat to the species.

Tourism has been identified as a potential threat to the Humboldt penguin. Since the 1990 designation of the Humboldt National Reserve, which includes the islands of Damas, Choros, and Chanaral in Chile, tourism has increased rapidly but with little regulation (Ellenberg *et al.* 2006, p. 97). Ellenberg *et al.* (2006, p. 99) found that Humboldt penguin breeding success varied with levels of tourism on these three islands. Breeding success was very low at Damas Island, the most tourist accessible island, which saw over 10,000 visitors in 2003. Better breeding success was observed at Choros Island, a less accessible island which saw fewer than 1,000 visitors. The highest breeding success was observed at the remote and largest Chanaral Island colony, where tourist access was negligible. Unlike their congener (species within the same genus) the Magellanic penguin (*Spheniscus magellanicus*), Humboldt penguins reacted to human presence and displayed little habituation potential. Their reactions indicate that there is a strong need for tourism guidelines for this species (Ellenberg *et al.* 2006, p. 103). Researchers described nest destruction by tourists at Puñihuil Island, a popular unregulated tourist destination in southern Chile (Simeone and Schlatter 1998, p. 420). Both the attractiveness of the penguins for tourism and the potential for increased impacts from human disturbance stem from the coincidence of the prime tourist season with the Humboldt penguin's spring and summer breeding season.

Tourism has increased rapidly and with little regulation in the Humboldt National Reserve and has caused nest destruction at Puñihuil Island in Chile. In Peru, tourism is reported to be a minimal to mid-level threat at Reserva Nacional de Paracas (Lleellish *et al.* 2006, p. 4). Because Humboldt penguins are extremely sensitive to the presence of humans, the species' breeding success is impacted by increased levels of tourism. Since the prime tourist season coincides with the species' spring and summer breeding season, we conclude that insufficiently regulated tourism is a threat to the species.

Other human activities may disturb penguins. For example, fishermen hunting European rabbits (*Oryctolagus cuniculus*) disturbed penguins at Choros Island (Simeone *et al.* 2003, p. 328), but we do not conclude that this activity has occurred at a scale that represents a threat to the Humboldt penguin.

We have identified intentional take (hunting of Humboldt penguins for food and bait and harvesting of their eggs) and unregulated tourism as threats to Humboldt penguins. Therefore, we find that overutilization for commercial, recreational, scientific, or educational purposes is a threat to the Humboldt penguin.

Factor C. Disease or Predation

There is no information to indicate that disease is a threat to the Humboldt penguin.

Various types of predation on Humboldt penguins have been documented. Simeone *et al.* (2003, p. 331) reported that the presence of rats, rabbits, goats, and cats have been documented on islands along the Chilean coast, but their actual impacts on the Humboldt penguin population are unknown. In Chile, "rats were observed at Pájaros, Cachagua, and Pájaros Niño [Islands]. At Pájaros Island, rats were present in large numbers and were observed to prey on penguin eggs and chicks" (Simeone *et al.* 2003, p. 328). Rats and cats are a significant threat because they eat eggs and chicks. Luna-Jorquera *et al.* observed vampire bats preying upon juvenile Humboldt penguins (1995, p. 471); however, there have been no other similar reports since 1995. Foxes were reported to prey on Humboldt penguins at Pan de Azucar National Park in Chile (Culik 2009 pers. comm.). Limited conclusive data are available for the Humboldt penguin; however, based on studies of other species, it is very likely that predation is a significant threat to the species. Simeone and Schlatter found that the

threat of predation has been shown to result in rapid population declines in the past and that this threat is likely to continue in the foreseeable future due to the lack of control efforts to eradicate these predators (UNEP 2003, p. 7). Therefore, on the basis of the best available information, we conclude that predation is a threat to the Humboldt penguin.

Factor D. Inadequacy of Existing Regulatory Mechanisms

The Humboldt penguin is listed as "endangered" in Peru, the highest threat category under Peruvian legislation. Take, capture, transport, trade, and export are prohibited except for scientific or cultural purposes (IMARPE 2007, p. 1; UNEP WCMC 2003, p. 8). Most breeding sites are protected by designated areas. The principal breeding colonies are legally protected by PROABONOS, the institute which manages guano extraction. The Reserva Nacional de Paracas protects an area of 1,293 mi^2 (3,350 km^2) of the coastal marine ecosystem. In 2006, 1,375 penguins were observed in this reserve (Lleellish *et al.* 2006, pp. 5–6). However, patrols of this area are inadequate to police illegal activities such as dynamite fishing (Lleellish *et al.* 2006, p. 4).

In 2008, the Chilean National Commission for the Environment (CONAMA) listed this species as vulnerable. Other protections include a 30–year moratorium on hunting and capture of Humboldt penguins; and at least four major colonies are protected by Federal law. In fact, most terrestrial sites where the species occurs are within the national system of protected areas (UNEP WCMC 2003, p. 8).

The species is listed in Appendix I of CITES and in Appendix I of the Convention on Migratory Species. Refer to the discussion of the application of CITES under Factor B with respect to international trade. Because commercial exportation of Humboldt penguins from Peru or Chile is not only prohibited (Ellis *et al.* 1998, p. 101, UNEP 2003, p. 8), but also regulated under CITES, export is not a threat to the species.

While legal protections are in place for the Humboldt penguin in both Chile and Peru, in general it is reported that enforcement of such laws is limited due to inadequate resources and the remote location of penguin colonies (UNEP WCMC 2003, p. 8). The UNEP WCMC Report on the Status of Humboldt Penguins concluded that little has been done to establish fishing-free zones and that there has been slow progress in preventing penguins from being caught in fishing nets. Majluf *et al.* (2002, p. 1342) stated, "There is currently no management of artesanal [sic] gill-net fisheries in Peru, except for restrictions on retaining cetaceans and penguins. Even these regulations are difficult to enforce in remote and isolated ports such as San Juan." Therefore, regulation is still inadequate with respect to fisheries bycatch.

Both countries have national authorities and national contingency plans for oil spill responses. Chile has the capability to respond to Tier One (small spills with no outside intervention) and Tier Two oil spill events (larger spills requiring additional outside resources and manpower) (International Tankers Owners Pollution Federation Limited (ITOPF) 2003, p. 2). Although Peru responded well to an oil spill in 2008 near Paracas National Reserve, as of 2009, Peru was not listed as having significant capability to respond to oil spill events (ITOPF 2009, p. 1). Based on the ability of Chile to respond to threats, Peru's successful response in 2008, and the location of Humboldt penguins in an area where they are not likely to be exposed to many oil spills, we find that oil spills are not a threat to the Humboldt penguin.

As indicated under factor B, tourism has been identified as a threat to the Humboldt penguin. Since the 1990 designation of the Humboldt National Reserve in Chile, tourism has increased rapidly with little regulation (Ellenberg *et al.* 2006, p. 97). Humboldt penguin breeding success varied based on levels of tourism on these three islands. Breeding success was very low at Damas Island, the most tourist accessible island, which saw over 10,000 visitors in 2003. Better breeding success was observed at Choros Island, a less accessible island which saw fewer than 1,000 visitors. The highest breeding success was observed at the remote and largest Chanaral Island colony, where tourist access was negligible. Humboldt penguins reacted to human presence and displayed little habituation potential. Their reactions indicate that there is a strong need for tourism guidelines for this species (Ellenberg *et al.* 2006, p. 103). Researchers described nest destruction by tourists at Puñihuil Island, a popular unregulated tourist destination in southern Chile (Simeone and Schlatter 1998, p. 420). Both the attractiveness of the penguins for tourism and the potential for increased impacts from human disturbance stem from the coincidence of the prime tourist season with the Humboldt penguin's spring and summer breeding season.

Tourism has increased rapidly and with little regulation in the Humboldt National Reserve and has caused nest destruction at Puñihuil Island in Chile. In Peru, tourism is reported to be a minimal to mid-level threat at Reserva Nacional de Paracas (Lleellish *et al.* 2006, p. 4). Because Humboldt penguins are extremely sensitive to the presence of humans, the species' breeding success is impacted by increased levels of tourism. Since the prime tourist season coincides with the species' spring and summer breeding season, we conclude that insufficiently regulated tourism is a threat to the species.

We find that inadequacy of existing regulatory mechanisms, particularly due to the lack of enforcement of existing prohibitions related to fishing methods and management of fisheries bycatch, and to insufficiently regulated tourism, is a threat to the Humboldt penguin.

Factor E. Other Natural or Manmade Factors Affecting Its Continued Existence

Both large-scale commercial fisheries and small local fisheries compete for the primary food of the Humboldt penguin throughout its range (BirdLife International 2007, p. 4; Ellis *et al.* 1998, p. 100; Herling *et al.* 2005, p. 23; Hennicke and Culik 2005, p. 178). While El Niño events (see Factor A) cause severe fluctuations in Humboldt penguin numbers, overfishing and entanglement (see Factor E) are identified as steady contributors to underlying long-term declines (BirdLife International 2007, p. 4). Anchovies are a primary component of Humboldt penguins' diet. The anchovy fishery in Peru collapsed in the 1970s due to a high number of catches and the overcapacity of fishing fleets, factors that were exacerbated by the effects of the 1972–1973 El Niño event. Twenty years passed before it became clear that this fishery had recovered (Food and Agriculture Organization (FAO) 2007, p. 2). These recovered stocks continue to be significantly impacted by major El Niño events, but have rebounded more quickly recently. Peru reported anchovy catches of 8.64 million T (9.6 million t) in 2000, and 5.76 million T (6.4 million t) in 2001 (FAO 2007, p. 2). El Niño events have caused periodic crashes of the food supply of Humboldt penguins in Peru and Chile in both the historic and recent past. El Niño events, which occur irregularly every 2–7 years, have increased in frequency and intensity in recent years. Commercial fishing in combination with El Niño events has contributed to the historic declines of Humboldt penguins, and the identified threat of El Niño will interact with fisheries during future El Niño episodes. These events in combination with

competition for prey from fisheries are likely to impact Humboldt penguins more frequently and more severely in the foreseeable future. Chile reported fish catches of 1.25 million T (1.4 million t) in 2004 (FAO 2006, p. 4). In Chile, local-level commercial extraction of specific fish species has reduced those species in the diet of penguins, and fisheries' extraction has the potential to harm Humboldt penguins if overfishing occurs (Herling *et al.* 2005, p. 23). Researchers tracking the foraging effort of penguins in northern Chile concluded that even small variations in food supply, related to small changes in sea-surface temperature, led to increased foraging time (Culik and Luna-Jorquera (1997, p. 555) and Hennicke and Culik (2005, p. 178). They concluded that Humboldt penguins have high energetic costs to obtain food even in non-El Niño years. The synergistic actions of these fisheries with El Niño events can be devastating to the Humboldt penguin, since anchovies are one of the primary food sources for the species. The establishment of no-fishing zones encompassing the foraging range around the breeding area at Pan de Azucar Island has been recommended to buffer the species from possible catastrophic effects of future El Niño events. Competition between local fishermen (both for commercial and noncommercial consumption) and penguins for local pelagic fish, particularly anchovies (Herling *et al.* 2005, p. 21) exists. The farther penguins have to travel for food, the more energy they expend (Davis 2001, p. 9) which leads to a reduced ability to survive. Herling *et al.* calculated that 1,400 T (1,272 t) of fish are required in a breeding season for 40,000 penguins. If fish are unavailable due to competition from fisheries, this could lead to decreased reproductive capabilities and starvation. (Herling *et al.* 2005, p. 21). Chile is monitoring the fisheries in relation to El Niño episodes and Humboldt penguins. However, on the basis of the best available information we conclude that competition for prey from commercial or local fisheries is currently a threat to the Humboldt penguin.

We find that the synergistic effects of El Niño combined with competition for prey from commercial or local fisheries is likely to be a threat to the Humboldt penguin within the foreseeable future by causing a reduction in food availability for the penguins and an increase in energy expenditure.

Incidental take by fishing operations has been identified to be one of the most significant threat to Humboldt penguins (BLI 2010, p. 1). The Government of Peru lists incidental take by fisheries in fishing nets as one of the major sources of penguin mortality (IMARPE 2007, p. 2). Paredes *et al.* (2003, p. 135) attribute increased human disturbance to the changes in distribution of penguin colonies southward in Peru. There are now fewer penguins on the central coastal area and more to the south. Reports from Chile indicated a similar level of impact on the species (Majluf *et al.* 2002, pp. 1338–1343). In Peru, the expansion of local-scale fisheries and the switching to new areas and fish species is occurring. Local fisheries are unable to compete with larger commercial operations, bringing humans and penguins into increasing contact, and subsequently increasing penguin mortality due to entanglement in fishing nets (Paredes *et al.* 2003, p. 135). Between 1991 and 1998, Majluf *et al.* (2002, pp. 1338–1343) recorded 922 deaths in fishing nets out of a population of approximately 4,000 breeding Humboldt penguins at Punta San Juan, Peru. Take was highly variable between years, with the greatest incidental mortality occurring when surface set drift gill nets were being used to catch cojinovas (*Seriolella violace),* a species that declined during the course of the study. A subsequent study found that the risk of entanglement is highest when surface nets are set at night (Taylor *et al.* 2002, p. 706). This level of incidental take was found to be unsustainable even without factoring in periodic El Niño impacts.

In Chile, Simeone *et al.* (1999, pp. 157–161) recorded that 605 Humboldt penguins drowned in drift gill nets set for corvina (*Cilus gilberti*) in the Valparaiso region of central Chile between 1991 and 1996. Birds pursuing anchovies and sardines were apparently unable to see the transparent nets in their path and were entangled and drowned. These mortalities occurred outside of the breeding season when penguins forage in large aggregations and probably involved birds originating from beyond small, local colonies. The deaths recorded represent underestimates of rangewide mortality—the authors only studied one of four major regions where corvina fishing occurred. Incidental mortality from such fishing operations is thought to affect Humboldt penguins throughout the species' range (Wallace *et al.* 1999, p. 442). Therefore, we conclude that fisheries bycatch is a threat to the Humboldt penguin.

Fishing with explosives, such as dynamite, is listed by INRENA as one of three major threats to Humboldt penguins in Peru (INRENA 2007, p. 2). The use of explosives is recurrent in the marine area around Reserva Nacional de Paracas, the primary center of population for penguins in Peru. Explosives use is especially prevalent in the southern zone, an area that contains more than 73 percent of the population, but does not receive as thorough patrolling as the north (Lleellish *et al.* 2006, p. 4).

Oil and chemical spills can have direct effects on the Humboldt penguin. The range of the species encompasses major industrial ports along the coast of both Chile and Peru. Approximately 100,000 barrels per day of crude oil pass through the coastal waters from the tip of South America to Panama (ITOPF 2003, p. 1), with over 1,000 tankers calling annually at ports in the entire region. Major spill events in Chile have been limited to the area from the Straits of Magellan to the south of the range of the Humboldt penguin, and no major events have been recorded for Peru (ITOPF 2000a, p. 2; ITOPF 2000b, p. 2). On May 25, 2007, about 92,400 gallons (350,000 liters) of crude oil leaked into San Vicente Bay in Talcuhuano, near Concepcion, Chile, during offloading of fuel by the vessel *New Constellation*, with impacts on sea lions and seabirds, including Humboldt penguins (Equipo Ciudano 2007, p. 1). A similar spill of 2,206 T (2,000 t) of crude oil occurred at an oil terminal off Lima in 1984, severely polluting beaches there (ITOPF 2000b, p. 3). As noted in Factor D, Chile and Peru have limited ability to handle spill cleanup.

While there is a possibility of oil spill impacts as a result of incidents along the Peruvian or Chilean coast, we find a number of factors mitigate against a finding that oil spills are a threat to the species. There is little history of spill events in the region, and the breeding colonies of Humboldt penguin are widely dispersed along a very long coastline. In addition, the Humboldt penguin's distribution does not encompass the southern tip of South America where the risk of oil spill is greatest. On this basis, we conclude that oil spill impacts are not a threat to the survival of the Humboldt penguin in any portion of its range.

Other than El Niño events, which were identified as a threat factor and discussed under factor A, the best available information does not indicate that climate change is likely to cause this species to become in danger of extinction now or in the foreseeable future. We rely primarily on synthesis documents (e.g., IPCC 2007) that present the consensus view of a very large number of experts on climate change from around the world. We have found

that these synthesis reports, as well as the scientific papers used in those reports or resulting from those reports, represent the best available scientific information we can use to inform our decision. Gille (2002, p. 1276) found that ocean warming did occur in the 1950s and 1960s, but that it leveled off in the 1980s and 1990s. Climate-change scenarios estimate that the mean air temperature could increase by more than 3 °C (5.4 °F) by 2100 (IPCC 2007, p. 46). Overall, there was an increase in ocean water temperature in the Southern Hemisphere over the past 50 years. Additionally, during 2090-2099, precipitation is predicted to increase across the sub-Antarctic and Antarctic region, with a greater than 20 percent increase predicted for the Antarctic continent. Ocean warming and sea level rise may occur based on increases in global average air and ocean temperatures, widespread melting of snow and ice, and rising global average sea level ((IPCC 2007, p. 30). However, although the models above make general predictions at a large scale, we know of no climate change models currently available that make meaningful predictions of climate change at a smaller scale that includes the range of the Humboldt penguin. Given this lack of information, we are unable to conclude that climate change, sea level rise, or ocean warming other than El Nino events, are a threat to the species.

The Humboldt penguin is vulnerable to various threats under Factor E. In summary, we find that the synergistic effects of El Niño combined with competition for prey from commercial or local fisheries (competition with fishermen in times of reduced food availability), fisheries bycatch (catch in gillnets), and fishing with explosives are threats to the survival of the Humboldt penguin.

Humboldt Penguin Finding

The Humboldt penguin has decreased historically from what was believed by some to be more than a million birds in the 19th century to 41,000 to 47,000 birds today (Ellis *et al.* 1997, pp. 96-97; Ellis *et al.* 2007, p. 7.). Since 1981, the Peruvian population has fluctuated between 3,500 and 7,000 individuals, with the most recent estimate at 5,000 individuals. Estimates of the population in Chile (30,000 to 35,000 individuals) have been recently updated with improved documentation of a colony at Isla Chanaral. The increase in the population estimate is believed to be a correction of systematic undercounting that occurred for 20 years; we cannot conclude that it signifies recent population increases in Chile.

Under Factor A, we find that the present or threatened destruction, modification, or curtailment of the Humboldt penguin's habitat or range is occurring. Historical threats to terrestrial habitat, in particular the destruction of Humboldt penguin nesting substrate by guano collection, have in part been responsible for the massive historical decline of the species, and this loss of nesting habitat continues to impact the breeding success of the species. Effects of guano extraction on the current populations appear to have been reduced by designation of protected areas and management of the limited guano harvesting that still occurs. However, at guano islands the availability and quality of nesting habitat is still impacted by ongoing harvest.

The impact of El Niño events, which have caused periodic crashes of the food sources of Humboldt penguins in Peru and Chile in the historic and recent past, is a threat factor leading to declines of this species. Given reduced population sizes and the existence of other significant threats, the resiliency of the Humboldt penguin to respond to these cyclical El Nino events is greatly reduced. Such events, which occur irregularly every 2–7 years, have increased in frequency and intensity in recent years and are likely to impact Humboldt penguins more severely in the foreseeable future.

Under Factor B, we find that the species is being overutilized for commercial, recreational, scientific, or educational purposes. Harvest of Humboldt penguins for food, eggs and bait is a threat to the survival of the Humboldt penguin throughout its range. We have no reason to believe this threat will be ameliorated in the future. Tourism, if not properly managed or regulated, has the potential to impact individual colonies; therefore, we conclude that inadequately managed tourism is currently a threat to the species.

Under Factor C, on the basis of the best available information, we conclude that predation is a threat to the Humboldt penguin.

Under Factor D, there is evidence of lack of enforcement and lack of significant measures to reduce the impacts of bycatch and inadequately regulated tourism. Therefore, we find that inadequacy of existing regulatory mechanisms, particularly due to the lack of enforcement of existing prohibitions related to fishing methods and management of fisheries bycatch, along with insufficiently regulated tourism, is a threat to the Humboldt penguin.

Under Factor E, we find that other natural or manmade factors are affecting the continued existence of this species. First, the range of the Humboldt penguin along the coast of Chile and Peru does not have the same history of major spills or the same level of shipping traffic as ranges of other penguin species. Therefore, we conclude that oil spill impacts are not a threat to the survival of the Humboldt penguin. Industrial fisheries' extraction, which in conjunction with El Niño caused collapse of anchovy stocks in the 1970s, has had a historical influence on the species and contributed to its long-term decline. The recovery of fish stocks since the 1970s, however, has improved the food base of this species. Large-scale commercial fisheries and local-scale fisheries' extraction are targeting the same prey as the Humboldt penguin, which is a current threat to the species. More importantly, incidental take by fisheries operations has emerged as the most significant human-induced threat to Humboldt penguins in both Chile and Peru. Entanglement in gill nets caused significant documented mortality of Humboldt penguins in both countries in the 1990s. We have no reason to believe this will be ameliorated in the foreseeable future. Therefore, we find that ongoing threat of incidental take from fisheries bycatch and fishing with explosives are threats to the Humboldt penguin.

In summary, we find that the Humboldt penguin is likely to become in danger of extinction within the foreseeable future due to : (1) Destruction of its habitat by guano extraction; (2) high likelihood of El Niño events impacting the prey of Humboldt penguins in cyclical 2- to 7–year timeframes; (3) intentional harvest of this species for meat, eggs, and bait, and improperly managed tourism; (4) inadequacy of existing regulatory mechanisms, particularly in the area of enforcement of existing prohibitions related to fishing methods and management of fisheries bycatch and inadequately regulated tourism; (5) predation by rats and cats; and (6) incidental take from fisheries bycatch and fishing with explosives.

Distinct Population Segment (DPS)

Section 3(15) of the Act defines "species" to include "any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature." To interpret and implement the DPS provisions of the Act, the Service and National Marine Fisheries Service published a Policy Regarding the Recognition of Distinct Vertebrate Population Segments

in the **Federal Register** (DPS Policy) on February 7, 1996 (61 FR 4722). Under the DPS policy, three factors are considered in a decision concerning the establishment and classification of a possible DPS. These are applied similarly to both endangered and threatened wildlife.

We determine: (1) The discreteness of a population in relation to the remainder of the taxon to which it belongs; (2) the significance of the population segment to the taxon to which it belongs; and (3) the population segment's conservation status in relation to the Act's standards for listing (addition to the list), delisting (removal from the list), or reclassification (i.e., whether the population segment is endangered or threatened).

The policy first requires the Service to determine that a vertebrate population is discrete in relation to the remainder of the taxon to which it belongs. Discreteness refers to the ability to delineate a population segment from other members of a taxon based on either (1) physical, physiological, ecological, or behavioral factors, or (2) international governmental boundaries that result in significant differences in control of exploitation, management, or habitat conservation status, or regulatory mechanisms that are significant in light of section 4(a)(1)(D) of the Act—the inadequacy of existing regulatory mechanisms.

Second, if we determine that the population is discrete under one or more of the discreteness conditions, then a determination is made as to whether the population is significant to the larger taxon to which it belongs. In carrying out this examination, we consider available scientific evidence of the population's importance to the taxon to which it belongs. This consideration may include, but is not limited to the following: (1) The persistence of the population segment in an ecological setting that is unique or unusual for the taxon; (2) evidence that loss of the population segment would result in a significant gap in the range of the taxon; (3) evidence that the population segment represents the only surviving natural occurrence of a taxon that may be more abundant elsewhere as an introduced population outside of its historic range; and (4) evidence that the discrete population segment differs markedly from other populations of the species in its genetic characteristics from other populations of the species. A population segment needs to satisfy only one of these conditions to be considered significant.

Lastly, if we determine that the population is both discrete and significant, then the policy requires an analysis of the population segment's conservation status in relation to the Act's standards for listing (addition to the list), delisting (removal from the list), or reclassification (i.e., whether the population segment is endangered or threatened).

Humboldt penguins have a continuous range from northern Peru to mid-southern Chile. We analyzed this species to determine if a DPS existed because its range spans two countries.

Discreteness Analysis

Under the DPS policy, a population segment of a vertebrate taxon may be considered discrete if it satisfies either of the following conditions: (1) It is markedly separated from other populations of the same taxon as a consequence of physical, physiological, ecological, or behavioral factors, or (2) it is delimited by international boundaries within which differences in control of exploitation, management of habitat, conservation status, or regulatory mechanisms exist that are significant in light of section 4(a)(1)(D) of the Act.

With respect to discreteness criterion 1, we did not identify any marked biological boundaries between populations within that range or any differences in physical, physiological, ecological, or behavioral factors among any groups within that range. We found no reports of genetic or morphological discontinuity between any discrete segments of the population.

The range of the Humboldt penguin crosses the international boundary between Peru and Chile, which leads to evaluation of the second discreteness factor. However, in our analysis of differences between Peru and Chile in conservation status, habitat management, and regulatory mechanisms, we have found no significant differences between the two countries. In both countries, intentional take of penguins is prohibited, but some illegal take occurs. Measures to address fisheries bycatch are similar, but fisheries bycatch remains widespread. Both countries provide protection to major breeding colonies of the species. The Chilean population is more numerous, but the extent of their range is greater. Given the fact that problems in census data have only recently been corrected, we cannot conclude that Chilean Humboldt penguin population trends are different from the Peruvian trends or that conservation concerns are different. In fact, the impacts of habitat loss, the effects of El Niño, intentional take, inadequacy of regulatory mechanisms, and fisheries bycatch are concerns throughout the species' range in both countries.

Based on our analysis, we do not find that differences in conservation status or management for Humboldt penguins across the range countries are sufficient to justify the use of international boundaries to satisfy the discreteness criterion of the DPS Policy. Therefore, we have concluded that there are no population segments that satisfy the discreteness criterion of the DPS Policy. As a consequence, we could not identify any geographic areas or populations that would qualify as a DPS under our 1996 DPS Policy (61 FR 4722).

Significant Portion of the Range Analysis

Given the continuous linear range of the Humboldt penguin, which breeds from northern Peru to south-central Chile, and the distribution of colonies along that coast, no specific geographic portions of concern were immediately apparent. Recent research found that long-term gene flow is occurring between populations in Peru and Chile, but, as would be expected, it is affected by geographic distance (Schlosser *et al.* 2009, p. 839). The researchers further suggest that this species should be managed as a metapopulation rather than as separate populations.

Overall, for each factor identified as a threat, we found that threats occurred throughout the range. Terrestrial and marine habitat loss, which included the impacts of guano extraction and the effects of El Niño, intentional harvest, insufficiently regulated tourism, the inadequacy of regulatory mechanisms, and fisheries bycatch were determined to be threats throughout the Humboldt penguin's range.

In reviewing our findings, one difference within threat Factor A relates to the ongoing limited harvest of guano in Peru, while such harvest has stopped in Chile. In our finding, we indicated that both the historic and present impacts of guano extraction were a threat to the Humboldt penguin. On the basis of this difference, we considered whether the Peruvian population of Humboldt penguin may be in danger of extinction in a significant portion of its range. The information available on local harvest patterns or population trends in specific areas where guano harvest is documented does not allow us to divide the range further. The most recent 2006 estimate of the Peruvian population of the Humboldt penguin is approximately 5,000 individuals. This count includes an increase of 41 percent since 2004 in the southern portion of the range, where 80 percent of the birds are found. The overall population has

fluctuated between 2,100 and 7,000 individuals since 1981, with fluctuations attributed to response to El Niño events. While the population of Humboldt penguins in Peru has fluctuated at low numbers for many years, current evidence of increases over the last few years reflects continued reproduction and resiliency of this population. Therefore, we find that the Humboldt penguin is not currently in danger of extinction in the Peruvian portion of the range.

As a result, while the best available scientific and commercial data allow us to make a determination as to the rangewide status of the Humboldt penguin, we have determined that there are no significant portions of the range in which the species is currently in danger of extinction. Therefore, we are listing the Humboldt penguin as a threatened species throughout its range under the Act.

Erect-Crested Penguin (*Eudyptes sclateri*)

Background

The erect-crested penguin, a New Zealand endemic, breeds on the Bounty Islands and Antipodes Islands, located approximately 437 mi (700 km) and 543 mi (870 km), respectively, southeast of the South Island of New Zealand (NZ DOC 2006, pp. 27, 30). Its habitat consists of 8 of the 20 Bounty islands, with a total area of 0.5 mi^2 (1.3 km^2). The Antipodes Islands consist of two main islands and some minor islands. The largest is Antipodes Island, consisting of 2,025 hectares (ha) (5,004 acres (ac)), and the second island, Bollons, consists of 50 ha (124 ac). Erect-crested penguins nest in large, dense, conspicuous colonies, numbering thousands of pairs, on rocky terrain (BirdLife International 2007, p. 3). Winter distribution at sea is largely unknown.

The Action Plan for Seabird Conservation of New Zealand lists the total world breeding population of erect-crested penguin at 81,000 pairs +/- 4,000 pairs (Taylor 2000, p. 65). In 1978, counts of erect-crested penguins at Bounty Islands estimated 115,000 breeding pairs (Robertson and van Tets 1982, p. 315), but these counts are considered overestimations (Houston 2007, p. 3). While the data were not directly comparable, 1997 counts found 27,956 pairs (Taylor 2000, p. 65), suggesting that a large decline in numbers may have occurred at the Bounty Islands (BirdLife International 2007, p. 2). There have been no complete surveys of the species since 1997–1998; however, a 2004 survey found numbers on Proclamation Island (2,788 breeding pairs) (De Roy and Amey 2005) to be similar to the numbers found in 1998, suggesting a stable population, at least at that breeding site.

In 1978, the population on the Antipodes was thought to be similar in size to that of the Bounty Islands (about 115,000 breeding pairs). Surveys in 1995 indicated a population of 49,000 to 57,000 pairs in the Antipodes (Taylor 2000, p. 65). Tennyson (2002) estimated a population of 52,000 pairs in 1995. Comparisons of photographs of nesting areas from the Antipodes show a constriction of colonies at some sites during the period 1978–1995. There have been no subsequent formal counts of erect-crested penguins at either the Bounty Islands or the Antipodes, and visits to the islands are rare. Both observations and photographs taken by researchers visiting these islands for other purposes have provided anecdotal information that erect-crested penguin colony sizes continue to decrease (Davis 2001, p. 8; Houston 2008, pers. comm.).

A few hundred birds formerly bred at Campbell Island farther to the southwest in the 1940s (Bailey and Sorensen 1962); in 1986–1987, a small number of birds (20 to 30 pairs) were observed there, but no breeding was seen (Taylor 2000, p. 65). Breeding on the Auckland Islands, also to the southwest, was considered a possibility, with one pair found breeding there in 1976 (Taylor 2000, p. 65). The most recent penguin conservation assessment (Ellis *et al.* 2007, p. 6) reported erect-crested penguins are no longer present at Campbell or Auckland Islands. There is one record of breeding on the mainland of the South Island of New Zealand at Otago Peninsula, but it is unlikely there was ever widespread breeding there (Richdale 1950, pp. 152-166; Houston 2007, p. 3). Based on this information, we do not consider these areas to be part of the erect-crested penguin's current range, and have not included them in our analysis of the status of this species.

On the basis of declines of at least 50 percent in the past 45 years and a breeding range constricted to two locations, the IUCN has listed the species as "Endangered" on the IUCN Red List (BirdLife International 2007, p. 1). It is ranked as Category B (second priority) on the Molloy and Davis threat categories used by the New Zealand DOC (Taylor 2000, p. 33). On that basis, it was placed in the second category of highest priority in the New Zealand Action Plan for Seabird Conservation (Taylor 2000, p. 33). The species is listed as "acutely threatened—nationally endangered" on the New Zealand Threat Classification System list (Hitchmough *et al.* 2007, p. 38; Molloy *et al.* 2002, pp. 13–23). Under this classification system, which is nonregulatory, species experts assess the placement of species into threat categories according to both status criteria and threat criteria.

Summary of Factors Affecting the Erect-Crested Penguin

Factor A. The Present or Threatened Destruction, Modification, or Curtailment of Erect-crested Penguin Habitat or Range

There is little evidence of destruction, modification, or curtailment of erect-crested penguin breeding habitat on land at the Bounty and Antipodes Islands. Feral animals such as sheep and cattle, which could trample nesting habitat, are absent. Competition for breeding habitat with fur seals is reported to be minimal (Houston 2007, p. 1).

The New Zealand sub-Antarctic islands have been inscribed on the World Heritage List (World Heritage List 2008, p. 16). All islands are protected as National Nature Reserves and are State-owned (World Heritage Committee Report 1998, p. 21). We find that the present or threatened destruction, modification, or curtailment of the terrestrial habitat or range of the erect-crested penguin is not a threat to the species.

Given the lack of terrestrial predators at the majority of erect-crested penguin colony sites, the absence of direct competition with other species, and the lack of physical habitat destruction at these sites, recent declines in erect-crested populations have been attributed to changes in the marine habitat. Penguins are susceptible to local ecosystem perturbations because they are constrained by how far they can swim from the terrestrial habitat in search of food (Davis 2001, p. 9). It has been hypothesized that slight warming of sea temperatures, which is attributed to El Niño events, coupled with change in distribution of prey species due to a change in the ocean environment, is having an impact on erect-crested penguin colonies (Taylor 2000, p. 66; Ellis *et al.* 2007, p. 6). With respect to modification of the marine habitat of this species, periodic El Niño events have been shown to have significant effects on the marine environment on which species such as the erect crested penguins depend. El Niño events are known to reduce the available food sources such as fish species on which penguins rely heavily. These El Niño events are considered to be the main marine perturbation for the erect-crested

penguins. The primary basis for this inference comes from studies of a closely related species, the southern rockhopper penguin at Campbell Island (Cunningham and Moors 1994, p. 27), where the population declined by 94 percent between the early 1940s and 1985, from an estimated 800,000 breeding pairs to 51,500 (Cunningham and Moors 1994, p. 34). The majority of this decline appears to have coincided with a period of warmed sea surface temperatures between 1946 and 1956. It is widely inferred that warmer waters most likely affected southern rockhopper penguins through changes in the abundance, availability, and distribution of their food supply (Cunningham and Moors 1994, p. 34). Recent research suggests they may have had to work harder to find the same food (Thompson and Sagar 2002, p. 11).

The suggestion that erect-crested penguins may have been similarly impacted by changes in the marine habitat during this time period is strengthened by the fact that erect-crested penguin breeding colonies are now absent from Campbell Island (Ellis *et al.* 2007, p. 6); they disappeared from the island during the same time period (1940s to 1987) as the southern rockhopper's decline. In the 1940s, a few hundred erect-crested penguins bred on the island (Taylor 2000, p. 65). The latest IUCN assessment of the erect-crested penguin found that oceanic warming is a continuing threat, resulting in a "very rapid decline" in more than 90 percent of the population, and thus is a threat of high impact to this species (BirdLife International 2007, p. 2 of "additional data"). Therefore, based on the best available information, we find that the present or threatened destruction, modification, or curtailment of the erect-crested penguin's marine habitat is a threat to the species.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Aside from periodic surveys and the possibility of a future research program focused on the diet and foraging of the species, we are unaware of any purpose for which the erect-crested penguin is currently being utilized. Therefore, we conclude that overutilization for commercial, recreational, scientific, or educational purposes is not a threat to this species.

Factor C. Disease or Predation

Avian disease has not been recorded in erect-crested penguins, although disease vectors of ticks and bird fleas are found in colonies (Taylor 2000, p. 66).

The only known mammalian predators within the current range of the erect-crested penguin are mice, which are present only on the main Antipodes Island. Although their eradication from this island is recommended as a future management action in the Action Plan for Seabird Conservation in New Zealand, we have found no reference to these mice impacting the erect-crested penguins on this one island in their range (Taylor 2000, p. 67). At the other islands in the Antipodes group (Bollons, Archway, and Disappointment) and at the Bounty Islands, mammalian predators are not present. Feral cats, sheep, and cattle are also no longer present (Taylor 2000, p. 66). The threat of future introduction of invasive species is being managed by the New Zealand DOC, which has measures in place for quarantine of researchers working on sub-Antarctic islands (West 2005, p. 36). These quarantine measures are an important step toward controlling the introduction of invasive species. At this time, however, we have no means to measure their effectiveness.

On the basis of this information, we find that neither disease nor predation is a threat to the erect-crested penguin.

Factor D. Inadequacy of Existing Regulatory Mechanisms

All breeding islands of the erect-crested penguin are protected by New Zealand as National Nature Reserves. The marine areas are managed under fisheries legislation (World Heritage Committee Report 1998, p. 21).

The Action Plan for Seabird Conservation in New Zealand is in place and outlines previous conservation actions, future management actions needed, future survey and monitoring needs, and research priorities. Among the most relevant recommendations are pest quarantine measures to keep new animal and plant pest species from reaching offshore islands and eradication of mice from the main Antipodes Island (Taylor 2000, p. 67). At least one of these recommendations has been put into place; as mentioned under Factor C, strict required quarantine measures are now in place for researchers and expeditions to all New Zealand sub-Antarctic islands to prevent the introduction or re-introduction of animal and plant pest species (West 2005, p. 36). At this time, we have no means to measure the effectiveness of these quarantine measures.

In addition to national protection, all of New Zealand sub-Antarctic islands are inscribed on the World Heritage List (World Heritage List 2008, p. 16). World Heritage designation places an obligation on New Zealand to "take appropriate legal, scientific, technical, administrative and financial measures necessary for the identification, protection, conservation, presentation and rehabilitation of this heritage" (World Heritage Convention 1972, p. 3). At the time of inscription of this site onto the World Heritage List in 1998, human impacts were described as "limited to the effects of introduced species at Auckland and Campbell Islands" (World Heritage Convention Nomination Documentation 1998, p. 1).

New Zealand has in place the New Zealand Marine Oil Spill Response Strategy, which provides the overall framework to mount a response to marine oil spills that occur within New Zealand's area of responsibility. The aim of the strategy is to minimize the effects of oil on the environment and human safety and health. The National Oil Spill Contingency Plan promotes a planned and nationally coordinated response to any marine oil spill that is beyond the capability of a local regional council or outside the region of any local council (Maritime New Zealand 2007, p. 1). As discussed below under Factor E, rapid containment of spills in remote areas and effective triage response under this plan have shown these to be effective regulatory mechanisms (New Zealand Wildlife Health Center 2007, p. 2; Taylor 2000, p. 94).

On the basis of national and international protections in place, we find that inadequacy of existing regulatory mechanisms is not a threat to the erect-crested penguin.

Factor E. Other Natural or Manmade Factors Affecting the Continued Existence of the Species

New Zealand's Action Plan for Conservation of Seabirds notes that, while there is a possibility that erect-crested penguins could be caught in trawl nets or by other fishing activity, there are no records of such (Taylor 2000, p. 66). The IUCN noted that the New Zealand DOC has limited legal powers to control commercial harvesting in waters around the sub-Antarctic islands and recommended that the New Zealand Ministry of Fisheries should be encouraged to address fisheries bycatch and squid fishery impacts (World Heritage Nomination—IUCN Technical Evaluation 1998, p. 25). As noted in the discussion under Factor A, the Action Plan for Conservation of New Zealand Seabirds outlines research efforts that would provide more data on the diet

and activities and distribution of erect-crested penguins at sea. Such research will assist in evaluating whether competition for prey with fisheries or bycatch from fisheries' activities is a factor in declines of the erect-crested penguin. However, in the absence of such research results, we have found no evidence that erect-crested penguins are subject to fisheries bycatch.

We have examined the possibility that oil and chemical spills may impact erect-crested penguins. Such spills, should they occur and not be effectively managed, can have direct effects on marine seabirds. A large proportion of erect-crested penguin populations are found on two isolated, but widely separated, island archipelagos during the breeding season. While the 138-mi (221-km) distance between the two primary breeding areas reduces the likelihood of impacts affecting the entire population, the limited number of breeding areas is a concern relative to the potential of oil spills or other catastrophic events. As a gregarious, colonial nesting species, erect-crested penguins are potentially susceptible to mortality from local oil spill events during the breeding season. A significant spill at either the Antipodes or Bounty Islands could jeopardize more than one-third of the population of this species. The nonbreeding season distribution of erect-crested penguins is not well-documented, but there is the potential for birds to encounter spills within the immediate region of colonies or, if they disperse more widely, elsewhere in the marine environment.

Based on previous incidents of oil and chemical spills around New Zealand, we might have concluded that this is a threat to this species, were it not for New Zealand's successful Oil Spill Response and Contingency Plan. For example, in March 2000, the fishing vessel *Seafresh 1*sank in Hanson Bay on the east coast of Chatham Island and released 66 T (60 t) of diesel fuel. Rapid containment of the oil at this very remote location prevented any wildlife casualties (New Zealand Wildlife Health Center 2007, p. 2). The same source reported that, in 1998, the fishing vessel *Don Wong 529*ran aground at Breaksea Islets, off Stewart Island, outside the range of the erect-crested penguin. Approximately 331 T (300 t) of marine diesel was spilled along with smaller amounts of lubricating and waste oils. With favorable weather conditions and establishment of triage response, no casualties from this pollution event were discovered (Taylor 2000, p. 94). The potential threat of oil or chemical spills to the erect-crested penguin is mitigated by New Zealand's oil spill response and contingency plans, which have been shown to be effective in previous events even at remote locations. The remoteness of Antipodes and Bounty Islands and their extreme distance from major shipping routes or shipping activity further lessen the chance that oil and chemical spills would affect this species. On the basis of the best available information, we find that oil and chemical spills are not a threat to the erect-crested penguin.

Erect-crested Penguin Finding

Significant declines in numbers have been documented for the erect-crested penguin between 1978 and 1997 at their two primary breeding grounds on the Bounty and Antipodes Islands. The latest population estimates from the late 1990s indicated there were approximately 81,000 pairs of erect-crested penguins in these two primary breeding grounds. The declines are reported to be largest at Bounty Island, although the extent of the decline is uncertain due to the differing methodologies between the surveys conducted there in 1978 and those conducted in 1997–1998. At the Antipodes Islands, declines of 50 to 58 percent have been estimated between 1978 and 1995, with photographic evidence from those 2 years showing obvious contraction in colony areas at some sites (Taylor 2000, p. 65). Formal surveys have not been conducted since the 1995 and 1997–1998 surveys referenced above for the Antipodes and Bounty Islands, respectively. The only further information for this primary portion of the range is qualitative photographic evidence and observations suggesting that declines continue.

The most recent detailed information, from a decade ago, indicated populations were in decline, with more recent qualitative information suggesting declines continue. We have no recent population assessments for the erect-crested penguin. Although this qualitative data is currently the best information available, its use in establishing a reliable population trend is limited. Despite the relatively high population numbers of this species estimated in 1998, the population numbers at the time showed a very high rate of decline.

The weight of evidence of available information suggests that the changes in the marine environment due to El Niño events may be the most likely cause of this species' decline. This species' breeding colonies have been reduced to only two breeding island groups, separated from one another by 138 mi (221 km). Lower population numbers, combined with the limited number of breeding areas, make this species even more vulnerable to the threats from changes in the marine habitat. El Niño events can have an effect on the marine environment by causing changes in ocean currents. Warmer waters will not contain the fish species normally preyed upon by penguins. Ocean areas used by penguins to forage for fish species may be warmer during El Niño years, which decreases food availability for the penguins. Because the normal prey base is unavailable for the erect crested penguins, they have to travel farther and expend more energy to obtain food.

We are unsure the exact mechanism causing the decline of the erect-crested penguin populations, however data indicate that the population is in a declining trend. Although changes in the marine environment (Factor A) have been hypothesized to be responsible for the species' decline, the cause of the decline are not definitively known. It is not necessary to identify the causes of the decline with certainty to warrant listing of a species under the Act. At this time, NZDOW can monitor any threats to the species, but they currently have no management tools to reduce any suspected threats. Therefore, it is reasonably likely that these threats will continue in the future. We have no reason to believe that population trends will change in the future, nor that the effects of current threats acting on the species will be ameliorated in the foreseeable future. Therefore, on the basis of our analysis of the best available scientific and commercial information, we conclude that, due to changes in the marine environment, the erect-crested is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Significant Portion of the Range Analysis

Erect-crested penguins breed on two primary island groups, Bounty and Antipodes Islands, which lie about 138 mi (221 km) from one another in the South Pacific Ocean to the southwest of the South Island of New Zealand. The erect-crested penguin is documented as in decline at these two islands. Our rangewide threats analysis found that changes in the marine habitat—slight warming of sea surface temperatures and their possible impact on prey availability—have the same impact on the two areas. No information is available that suggests this threat is disproportionate between these two areas. The overall population number of the erect-crested penguins is not low—27,956 pairs at Bounty Island and 49,000 to 57,000 pairs at the Antipodes Islands. Although the population

numbers have declined at a very high rate and appear to be continuing to decline, the most recent population estimates indicate that the populations of both island groups are not currently in danger of extinction.

As a result, while the best scientific and commercial data allow us to make a determination as to the rangewide status of the erect-crested penguin, we have determined that there are no significant portions of the range in which the species is currently in danger of extinction. Because we find that the erect-crested penguin is not currently in danger of extinction in these two portions of its range, we need not address the question of significance for these populations.

Therefore, we are listing the erect-crested penguin as a threatened species throughout all of its range under the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness, and encourages and results in conservation actions by Federal governments, private agencies and groups, and individuals.

Section 7(a) of the Act, as amended, and as implemented by regulations at 50 CFR part 402, requires Federal agencies to evaluate their actions within the United States or on the high seas with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. However, given that the yellow-eyed penguin, white-flippered penguin, Fiordland crested penguin, Humboldt penguin, and erect-crested penguin are not native to the United States, critical habitat is not being designated for these species under section 4 of the Act.

Section 8(a) of the Act authorizes financial assistance for the development and management of programs that the Secretary of the Interior determines to be necessary or useful for the conservation of endangered and threatened species in foreign countries. Sections 8(b) and 8(c) of the Act authorize the Secretary to encourage conservation programs for foreign endangered species and to provide assistance for such programs in the form of personnel and the training of personnel.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered and threatened wildlife. As such, these prohibitions would be applicable to yellow-eyed penguin, white-flippered penguin, Fiordland crested penguin, Humboldt penguin, and erect-crested penguin. Regulations governing permits are codified at 50 CFR 17.22 for endangered species, and at 17.32 for threatened species. The prohibitions for threatened species state that most of the prohibitions for endangered species also apply to threatened species. The prohibitions under 50 CFR 17.21 make it illegal for any person subject to the jurisdiction of the United States to "take" (take includes to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or to attempt any of these) within the United States or upon the high seas, import or export, deliver, receive, carry, transport, or ship in interstate or foreign commerce in the course of a commercial activity, or to sell or offer for sale in interstate or foreign commerce, any endangered wildlife species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act.

We may issue permits to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. A permit must be issued for the following purposes: for scientific purposes, to enhance the propagation or survival of the species, and for incidental take in connection with otherwise lawful activities.

Required Determinations

National Environmental Policy Act (NEPA)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), need not be prepared in connection with regulations adopted under section 4(a) of the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

RIN 0648–AX90

Taking and Importing Marine Mammals; Military Training Activities and Research, Development, Testing and Evaluation Conducted Within the Mariana Islands Range Complex

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS, upon application from the U.S. Navy (Navy) on behalf of the Department of Defense (including the Navy, the U.S. Air Force (USAF), and the U.S. Marine Corps (USMC)), is issuing regulations to govern the unintentional taking of marine mammals incidental to activities conducted in the Mariana Islands Range Complex (MIRC) study area for the period of July 2010 through July 2015. The Navy's activities are considered military readiness activities pursuant to the Marine Mammal Protection Act (MMPA), as amended by the National Defense Authorization Act for Fiscal Year 2004 (NDAA). These regulations, which allow for the issuance of "Letters of Authorization" (LOAs) for the incidental take of marine mammals during the described activities and specified timeframes, prescribe the permissible methods of taking and other means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat, as well as requirements pertaining to the monitoring and reporting of such taking.

DATES: Effective August 3, 2010 through August 3, 2015.

ADDRESSES: A copy of the Navy's application (which contains a list of the references used in this document), NMFS' Record of Decision (ROD), and other documents cited herein may be obtained by writing to Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3225 or by telephone via the contact listed here (*see* **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Jolie Harrison, Office of Protected Resources, NMFS, (301) 713–2289, ext. 166.

SUPPLEMENTARY INFORMATION:

Availability of Supporting Information

Extensive Supplementary Information was provided in the proposed rule for this activity, which was published in the **Federal Register** on October 20, 2009 (74 FR 53796). This information will not be reprinted here in its entirety; rather, all sections from the proposed rule will be represented herein and will contain either a summary of the material presented in the proposed rule or a note referencing the page(s) in the proposed rule where the information may be found. Any information that has changed since the proposed rule was published will be addressed herein. Additionally, this final rule responds to the comments received during the public comment period.

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of marine

mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) during periods of not more than five consecutive years each if certain findings are made and regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses, and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth. NMFS has defined "negligible impact" in 50 CFR 216.103 as:

> An impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The National Defense Authorization Act of 2004 (NDAA) (Pub. L. 108–136) modified the MMPA by removing the "small numbers" and "specified geographical region" limitations and amended the definition of "harassment" as it applies to a "military readiness activity" to read as follows (Section 3(18)(B) of the MMPA):

> (i) Any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild [Level A Harassment]; or
>
> (ii) Any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where such behavioral patterns are abandoned or significantly altered [Level B Harassment].

Summary of Request

In August 2008, NMFS received an application from the Navy requesting authorization for the take of individuals of 26 species of marine mammals incidental to upcoming Department of Defense (including Navy, USMC, and USAF) training and research, development, testing, and evaluation (RDT&E) activities to be conducted from June 2010 through June 2015 within the MIRC study area, which encompasses a 501,873-square-nautical mile (nm^2) area around the islands, including Guam, Tinian, Saipan, Rota, Farallon de Medinilla, and also includes ocean areas in both the Pacific Ocean and the Philippine Sea. These training activities are military readiness activities under the provisions of the NDAA. The Navy states, and NMFS concurs, that these military readiness activities may incidentally take marine mammals present within the MIRC study area by exposing them to sound from mid-frequency or high frequency active sonar (MFAS/HFAS) or underwater detonations. After submitting supplemental applications, the Navy requested authorization to take individuals of 26 species of marine mammals by Level B Harassment, 2 individuals of 2 species by Level A Harassment annually, and 10 individual beaked whales by mortality over the course of the 5-year regulations. The Navy's model, which did not factor in any potential benefits of mitigation measures, predicted that 2 individual marine mammals would be exposed to levels of sound or pressure that would result in injury; thus, NMFS is authorizing the take, by Level A Harassment of 2 individuals per year. However, NMFS and the Navy have determined that injury can most likely be avoided through the implementation of the Navy's proposed mitigation measures. Further, although it does not anticipate that it will occur, the Navy requested, and NMFS is authorizing the take, by injury or mortality, up to 10 beaked whales over the course of the 5-year regulations.

Background of Request

The proposed rule contains a description of the Navy's mission, their responsibilities pursuant to Title 10 of the United States Code, and the specific purpose and need for the activities for which they requested incidental take authorization. The description contained in the proposed rule has not changed (74 FR 53795, pages 53796–53797).

Overview of the MIRC Study Area

The proposed rule contains a description of the MIRC study area. It also includes a discussion of the Marianas Trench Marine National Monument (MTMNM), where the MTMNM overlaps with the MIRC study area, and protected resources within the MTMNM. These descriptions have not changed (74 FR 53795, pages 53797–53798).

Description of Specified Activities

The proposed rule contains a complete description of the Navy's specified activities that are covered by these final regulations, and for which the associated incidental take of marine mammals will be authorized in the related LOAs. The proposed rule describes the nature and number of anti-submarine warfare (ASW) training exercises and RDT&E activities, involving both mid- and high-frequency active sonar (MFAS and HFAS), explosive detonations, and vessel movement. It also describes the sound sources and explosive types used (74 FR 53795, pages 53798–53807). It also briefly describes the limited use of low frequency active (LFA) sonar in conjunction with the MIRC training, which has also been analyzed in a separate MMPA rule and EIS. The narrative description of the action contained in the proposed rule has not changed, with the exception of a few clarifications, which have been indicated in italics in tables 1 and 2, which list the types of sonar sources and the estimated yearly use and summarize the characteristics of the exercise types. Of note, the Navy indicated in the proposed rule that they will conduct one multi-strike group type exercise in the summer each calendar year. This fact remains true, however, if NMFS' annual LOAs for this action are issued in July (as currently planned), it is possible that 2 multi-strike group exercises could occur within the coverage period of one LOA (for example if a multi-strike group exercise occurred in early August one year and late June the next). The Navy would still not conduct more than 5 of these multi-strike group exercises within the life of the 5-year regulations, however, and this clerical issue does not impact our analyses of the effects on marine mammals.

The Navy has carefully characterized the training activities planned for the MIRC over the 5 years covered by these regulations; however, evolving real-world needs necessitate flexibility in annual activities. NMFS has attempted to bound this flexibility with updated language in the regulatory text (see § 218.100(d) and § 218.102(c)). This language allows for flexibility in activities, as long as the resulting impacts to marine mammals do not vary beyond those contemplated in the effects analysis, which has been also been updated accordingly in this document.

Table 2. Summary of exercises in MIRC Study Area

* Note that one multi-strike group exercise may occur once per summer in every calendar year. Due to potential summer issuance of LOAs, though, two multi-strike group exercises could occur under the coverage of one LOA, though no more than 5 would occur over the course of the rule.

Description of Marine Mammals in the Area of the Specified Activities

Thirty-two marine mammal species or populations/stocks have confirmed or possible occurrence within the MIRC, including seven species of baleen whales (mysticetes), 22 species of toothed whales (odontocetes), two species of seals and sea lions (pinnipeds), and the dugong (sirenian). Table 3 summarizes their abundance, Endangered Species Act (ESA) status, population trends, and occurrence in the area. Eight of the species are ESA-listed and considered depleted under

the MMPA: Blue whale; fin whale; humpback whale; sei whale; sperm whale; North Pacific right whale; Hawaiian monk seal; and dugong. The dugong is managed by the U.S. Fish and Wildlife Service and will not be addressed further here. The proposed rule contains a discussion of five species that are not considered further in the analysis because of their rarity in the MIRC (North Pacific right whale, Hawaiian monk seal, Hubb's beaked whale, Indo-Pacific bottlenose dolphin, and northern elephant seal). The proposed rule also contains a discussion of important spinner dolphin resting areas. The proposed rule also includes a discussion of marine mammal vocalizations. Last, the proposed rule includes a discussion of the methods used to estimate marine mammal density in the MIRC. The Description of Marine Mammals in the Area of the Specified Activities section has not changed from what was in the proposed rule (74 FR 53795, pages 53807–53813).

* Density derived from 2007 Mariana Islands Survey (MISTCS Report - DoN 2007)

**Density derived from Hawaii Offshore Report (Barlow 2006)

*** Density derived from Eastern Tropical Pacific (Ferguson and Barlow 2001, 2003)

E = Endangered under the ESA; T = Threatened under the ESA; D = Depleted under the MMPA; S = Strategic Stock under the MMPA;

V = Vulnerable under the International Union for the Conservation of Nature (ICUN) Red List (Reeves et al. 2003)

Extralimital: Species that has occurred rarely in the past, may be only one or several documented sightings or may occur based on genera distribution patterns.

BILLING CODE 3510–22–C

Brief Background on Sound

The proposed rule contains a section that provides a brief background on the principles of sound that are frequently referred to in this rulemaking (74 FR 53795, pages 53813–53814). This section also includes a discussion of the functional hearing ranges of the different groups of marine mammals (by frequency) as well as a discussion of the two main sound metrics used in NMFS analysis (sound pressure level (SPL) and sound energy level (SEL)). The information contained in the proposed rule has not changed.

Potential Effects of Specified Activities on Marine Mammals

With respect to the MMPA, NMFS' effects assessment serves four primary purposes: (1) To prescribe the permissible methods of taking (*i.e.,* Level B Harassment (behavioral harassment), Level A Harassment (injury), or mortality, including an identification of the number and types of take that could occur by Level A or B harassment or mortality) and to prescribe other means of effecting the least practicable adverse impact on such species or stock and its habitat (*i.e.,* mitigation); (2) to determine whether the specified activity will have a negligible impact on the affected species or stocks of marine mammals (based on the likelihood that the activity will adversely affect the species or stock through effects on annual rates of recruitment or survival); (3) to determine whether the specified activity will have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (however, there are no subsistence communities that would be affected in the MIRC, so this determination is inapplicable for this rulemaking); and (4) to prescribe requirements pertaining to monitoring and reporting.

In the Potential Effects of Specified Activities on Marine Mammals section of the proposed rule NMFS included a qualitative discussion of the different ways that MFAS/HFAS and underwater explosive detonations may potentially affect marine mammals (some of which NMFS would not classify as harassment), as well as a discussion of the potential effects of vessel movement and collision. It also briefly describes the anticipated impacts of limited use of low frequency active (LFA) sonar in conjunction with the MIRC training, which has also been analyzed in a separate MMPA rule and EIS. Marine mammals may experience direct physiological effects (such as threshold shift), acoustic masking, impaired communications, stress responses, and behavioral disturbance. This section also included a discussion of some of the suggested explanations for the association between the use of MFAS and marine mammal strandings (such as behaviorally-mediated bubble growth) that have been observed a limited number of times in certain circumstances (the specific events are also described). The information contained in Potential Effects of Specified Activities on Marine Mammals section from the proposed rule has not changed. *See* 74 FR 53795, pages 53814–53831.

Later, in the Estimated Take of Marine Mammals Section of this final rule, NMFS relates and quantifies the potential effects to marine mammals from MFAS/HFAS and underwater detonation of explosives discussed here to the MMPA definition of take, which includes Level A and Level B Harassment, as well as mortality.

Mitigation

In order to issue an incidental take authorization (ITA) under Section 101(a)(5)(A) of the MMPA, NMFS must set forth the "permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance." The NDAA of 2004 amended the MMPA as it relates to military-readiness activities and the ITA process such that "least practicable adverse impact" shall include consideration of personnel safety, practicality of implementation, and impact on the effectiveness of the "military readiness activity." The training activities described in the MIRC application are considered military readiness activities.

NMFS reviewed the proposed MIRC activities and the proposed MIRC mitigation measures as described in the Navy's LOA application to determine if they would result in the least practicable adverse effect on marine mammals, which includes a careful balancing of the likely benefit of any particular measure to the marine mammals with the likely effect of that measure on personnel safety, practicality of implementation, and impact on the effectiveness of the "military-readiness activity." NMFS determined that further discussion was necessary regarding the potential relationship between the operation of MFAS/HFAS and marine mammal strandings.

NMFS worked with the Navy to identify potential additional practicable and effective mitigation measures, which included a careful balancing of the likely benefit of any particular measure to the marine mammals with the likely effect of that measure on personnel safety, practicality of implementation, and impact on the "military-readiness activity." NMFS and the Navy developed a Stranding Response Plan to address the concern listed above.

NMFS' proposed rule includes a list of the Navy's proposed mitigation measures (74 FR 53795, pages 53831–53836), which have been included in the regulatory text of this document. Some of the measures have been refined for increased clarity, but without a change in substance. Additionally, in the interest of further minimizing the likelihood of vessel collision, the following mitigation measure has been added since the publication of the proposed rule:

> Naval vessels will maneuver to keep at least 1,500 ft (500 yds) away from any observed whale in the vessel's path and avoid approaching whales head-on. These requirements do not apply if a vessel's safety is threatened, such as when change of course will create an imminent and serious threat to a person, vessel, or aircraft, and to the extent vessels are restricted in their ability to maneuver. Restricted maneuverability includes, but is not limited to, situations when vessels are engaged in dredging, submerged activities, launching and recovering aircraft or landing craft, minesweeping activities, replenishment while underway and towing activities that severely restrict a vessel's ability to deviate course. Vessels will take reasonable steps to alert other vessels in the vicinity of the whale. Given rapid swimming speeds and maneuverability of many dolphin species, naval vessels would maintain normal course and speed on sighting dolphins unless some condition indicated a need for the vessel to maneuver.

Based on our evaluation of the proposed measures and other measures considered by NMFS or recommended by the public, NMFS has determined that the Navy's proposed mitigation measures, including the Adaptive Management component (see Adaptive Management below), are adequate means of effecting the least practicable adverse impacts on marine mammals species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, while also considering personnel safety, practicality of implementation, and impact on the effectiveness of the military readiness activity. The proposed rule contains further support for this finding in the

Mitigation Conclusion section (74 FR 53795, pages 53836–53837). During the public comment period, a few mitigation measures not previously considered were recommended and NMFS' analysis of these measures is included in the Response to Public Comment section.

Research

The Navy provides a significant amount of funding and support to marine research. In the past five years the agency funded over $100 million ($26 million in FY08 alone) to universities, research institutions, federal laboratories, private companies, and independent researchers around the world to study marine mammals. The U.S. Navy sponsors 70 percent of all U.S. research concerning the effects of human-generated sound on marine mammals and 50 percent of such research conducted worldwide. Major topics of Navy-supported research include the following:

- Better understanding of marine species distribution and important habitat areas,
- Developing methods to detect and monitor marine species before and during training,
- Understanding the effects of sound on marine mammals, sea turtles, fish, and birds, and
- Developing tools to model and estimate potential effects of sound.

This research is directly applicable to Fleet training activities, particularly with respect to the investigations of the potential effects of underwater noise sources on marine mammals and other protected species. Proposed training activities employ active sonar and underwater explosives, which introduce sound into the marine environment.

The Marine Life Sciences Division of the Office of Naval Research currently coordinates six programs that examine the marine environment and are devoted solely to studying the effects of noise and/or the implementation of technology tools that will assist the Navy in studying and tracking marine mammals. The six programs are as follows:

- Environmental Consequences of Underwater Sound,
- Non-Auditory Biological Effects of Sound on Marine Mammals,
- Effects of Sound on the Marine Environment,
- Sensors and Models for Marine Environmental Monitoring,
- Effects of Sound on Hearing of Marine Animals, and
- Passive Acoustic Detection, Classification, and Tracking of Marine Mammals.

The Navy has also developed the technical reports referenced within this document, which include the Marine Resource Assessments and the Mariana Islands Sea Turtle and Cetacean Survey density report. Furthermore, research cruises by NMFS and by academic institutions have received funding from the U.S. Navy.

The Navy has sponsored several workshops to evaluate the current state of knowledge and potential for future acoustic monitoring of marine mammals. The workshops brought together acoustic experts and marine biologists from the Navy and other research organizations to present data and information on current acoustic monitoring research efforts and to evaluate the potential for incorporating similar technology and methods on instrumented ranges. However, acoustic detection, identification, localization, and tracking of individual animals still requires a significant amount of research effort to be considered a reliable method for marine mammal monitoring. The Navy supports research efforts on acoustic monitoring and will continue to investigate the feasibility of passive acoustics as a potential mitigation and monitoring tool.

Overall, the Navy will continue to request funding for ongoing marine mammal research, and is implementing long term monitoring/studies of marine mammals on various established ranges and operating areas. The Navy will continue to request funding for research and contribute to university/external research to improve the state of the science regarding marine species biology and acoustic effects. These efforts include mitigation and monitoring programs; data sharing with NMFS and via the literature for research and development efforts; and future research as described previously.

Memorandum of Agreement (MOA) for Navy Assistance With Stranding Investigations

The Navy and NMFS are currently developing a nationwide Memorandum of Understanding (MOU) (or other mechanism consistent with Federal fiscal law requirements and all other applicable laws), that will establish a framework whereby the Navy can assist NMFS with stranding investigations in certain circumstances.

Long-Term Prospective Study

Apart from this final rule, NMFS, with input and assistance from the Navy and several other agencies and entities, will perform a longitudinal observational study of marine mammal strandings to systematically observe for and record the types of pathologies and diseases and investigate the relationship with potential causal factors (*e.g.,* active sonar, seismic, weather). The study will not be a true "cohort" study, because NMFS will be unable to quantify or estimate specific active sonar or other sound exposures for individual animals that strand. However, a cross-sectional or correlational analyses, a method of descriptive rather than analytical epidemiology, can be conducted to compare population characteristics, *e.g.,* frequency of strandings and types of specific pathologies between general periods of various anthropogenic activities and non-activities within a prescribed geographic space. In the long-term study, NMFS will more fully and consistently collect and analyze data on the demographics of strandings in specific locations and consider anthropogenic activities and physical, chemical, and biological environmental parameters. This approach in conjunction with true cohort studies (tagging animals, measuring received sounds, and evaluating behavior or injuries) in the presence of activities and non-activities will provide critical information needed to further define the impacts of major training exercises (MTEs) and other anthropogenic and non-anthropogenic stressors. In coordination with the Navy and other Federal and non-Federal partners, the comparative study will be designed and conducted for specific sites during intervals of the presence of anthropogenic activities such as active sonar transmission or other sound exposures and absence to evaluate demographics of morbidity and mortality, lesions found, and cause of death or stranding. Additional data that will be collected and analyzed in an effort to control potential confounding factors include factors such as average sea temperature (or just season), meteorological or other environmental variables (*e.g.,* seismic activity), fishing activities, etc. All efforts will be made to include appropriate controls (*i.e.,* no active sonar or seismic sounds); environmental variables may complicate the interpretation of "control" measurements. The Navy and NMFS along with other partners are evaluating mechanisms for funding this study.

Monitoring

In order to issue an ITA for an activity, Section 101(a)(5)(A) of the MMPA states that NMFS must set forth "requirements pertaining to the monitoring and reporting of such taking." The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for LOAs must

include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present.

Proposed Monitoring Plan for the MIRC

The Navy's final Monitoring Plan for the MIRC may be viewed at NMFS' Web site: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications.* Based on input received during the public comment period, the Navy has refined the goals of the monitoring plan to include more effort put towards obtaining better density and distribution information for the marine mammals present in the MIRC study area. Primarily, the Navy plans to conduct summer and winter visual surveys using a small boat and/or plane with Marine Mammal Observers (MMOs) around Guam, Tinian, and Saipan in cooperation with NMFS' Pacific Islands Fisheries Science Center or Guam's Division of Aquatic Wildlife and Resources (DAWR). Visual surveys would integrate methods such as photographic ID to provide additional data to be used for distribution and abundance estimates.

The research elements in the modified plan include:

—Passive acoustic monitoring (PAM) including both the deployment of 4 new PAM devices as well as the analysis of an existing dataset that was collected during the 2007 MISTCS survey.

—Visual monitoring utilizing marine mammal observers (MMOs) in small boats and/or planes.

Table 5 contains a general summary of the Monitoring effort planned for each year and has been refined since the draft Monitoring Plan. The amount of each type of monitoring may vary from the summary table or Monitoring Plan based on annual discussions between NMFS and the Navy regarding previous monitoring results and effectiveness and in accordance with the Adaptive Management component of this rule, but, the overall effort over the 5-year period will remain approximately equal to that laid out in the table and monitoring plan.

Visual surveys would integrate methods such as photo ID that provide data that can be used for distribution and abundance. 45 days total.

Table 4. Planned monitoring effort in MIRC

BILLING CODE 3510–22–C

In addition to the Monitoring Plan for MIRC, the Navy has completed an Integrated Comprehensive Monitoring Program (ICMP) Plan.

The ICMP will be used both as: (1) A planning tool to focus Navy monitoring priorities (pursuant to ESA/MMPA requirements) across Navy Range Complexes and Exercises; and (2) an adaptive management tool, through the consolidation and analysis of the Navy's monitoring and watchstander data, as well as new information from other Navy programs (*e.g.,* R&D), and other appropriate newly published information. The Navy finalized a 2009 ICMP Plan outlining the program on December 22, 2009, as required by the 2009 LOAs for the Hawaii Range Complex, the Southern California

Range, and Atlantic Fleet Active Sonar Training. The ICMP may be viewed at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm.*

The ICMP is a developing program that will be in place for the length of this rule, and beyond, and NMFS and Navy will evaluate it annually to determine if it needs to be updated in order to keep pace with advances in science and technology and the collection of new data. In the 2009 ICMP Plan, the Navy outlines three areas of targeted development for 2010, including:

- Identifying more specific monitoring sub-goals under the major goals that have been identified.
- Characterizing Navy Range Complexes and Study Areas within the context of the prioritization guidelines described here.
- Continuing to Develop Data Management, Organization and Access Procedures.

The Navy shall comply with the 2009 ICMP Plan and continue to improve the program in consultation with NMFS. Changes and improvements to the program made during 2010 (as prescribed in the 2009 ICMP and otherwise deemed appropriate by the Navy and NMFS) will be described in an updated 2010 ICMP and submitted to NMFS by October 31, 2010, for review. An updated 2010 ICMP will be finalized by December 31, 2010.

Monitoring Workshop

The Navy, with guidance and support from NMFS, will convene a Monitoring Workshop, including marine mammal and acoustic experts as well as other interested parties, in 2011. The Monitoring Workshop participants will review the monitoring results from previous monitoring pursuant to the MIRC rule as well as monitoring results from other Navy rules and LOAs (*e.g.,* the Southern California Range Complex (SOCAL), Hawaii Range Complex (HRC), etc.). The Monitoring Workshop participants will provide their individual recommendations to the Navy and NMFS on the monitoring plan(s) after also considering the current science (including Navy research and development) and working within the framework of available resources and feasibility of implementation. NMFS and the Navy will then analyze the input from the Monitoring Workshop participants and determine the best way forward from a national perspective. Subsequent to the Monitoring Workshop, modifications would be applied to monitoring plans as appropriate.

Adaptive Management

Our understanding of the effects of MFAS/HFAS and explosives on marine mammals is still in its relative infancy, and yet the science in this field is evolving fairly quickly. These circumstances make the inclusion of an adaptive management component both valuable and necessary within the context of 5-year regulations for activities that have been associated with marine mammal mortality in certain circumstances and locations (though not the MIRC in the Navy's over 60 years of use of the area for testing and training). NMFS has included an adaptive management component in the regulations, which will allow NMFS to consider new data from different sources to determine (in coordination with the Navy) on an annual basis if mitigation or monitoring measures should be modified or added (or deleted) if new data suggest that such modifications are appropriate (or are not appropriate) for subsequent annual LOAs.

Following are some of the possible sources of new data:

- Results from the Navy's monitoring from the previous year (either from MIRC or other locations).
- Findings of the Workshop that the Navy will convene in 2011 to analyze monitoring results to date, review current science, and recommend modifications, as appropriate to the monitoring protocols to increase monitoring effectiveness.
- Compiled results of Navy funded research and development (R&D) studies (presented pursuant to the ICMP, which is discussed elsewhere in this document).
- Results from specific stranding investigations (either from MIRC or other locations, and involving coincident MFAS/HFAS of explosives training or not involving coincident use).
- Results from the Long Term Prospective Study described above.
- Results from general marine mammal and sound research (funded by the Navy (described above) or otherwise).
- Any information which reveals that marine mammals may have been taken in a manner, extent or number not anticipated by these regulations or subsequent Letters of Authorization.

Mitigation measures could be modified or added (or deleted) if new data suggest that such measures would have (or do not have) a reasonable likelihood of accomplishing the goals of mitigation laid out in this final rule and if the measures are practicable. NMFS would also coordinate with the Navy to modify or add to (or delete) the existing monitoring requirements if the new data suggest that the addition of (or deletion of) a particular measure would more effectively accomplish the goals of monitoring laid out in this final rule. The reporting requirements associated with this final rule are designed to provide NMFS with monitoring data from the previous year to allow NMFS to consider the data and issue annual LOAs. NMFS and the Navy will meet annually, prior to LOA issuance, to discuss the monitoring reports, Navy R&D developments, and current science and whether mitigation or monitoring modifications are appropriate.

Reporting

In order to issue an ITA for an activity, Section 101(a)(5)(A) of the MMPA states that NMFS must set forth "requirements pertaining to the monitoring and reporting of such taking." Effective reporting is critical both to compliance as well as ensuring that the most value is obtained from the required monitoring. The proposed rule contains the reporting requirements for the Navy (74 FR 53795, pages 53843–53845), and these requirements remain unchanged with the following exception. The requirements as written in the proposed rule include specific due dates for each of the reports. NMFS and the Navy are coordinating a workload plan to determine the best times during every year to submit all of the reports that Navy is responsible for under multiple final rules for multiple Range Complexes and training exercises. Although the reports described will always be submitted every year at a time that allows for adequate analysis by NMFS prior to the issuance of the subsequent LOA, we want to allow flexibility to change those dates yearly. Therefore, the regulatory text below will not specify the specific dates that the reports are due, but each annual LOA will.

Comments and Responses

On October 20, 2009 (74 FR 53795), NMFS published a proposed rule in response to the Navy's request to take marine mammals incidental to military readiness training, maintenance, and RDT&E activities in the MIRC and requested comments, information and suggestions concerning the request. During the 30-day public comment period, NMFS received comments from 4 private individuals, the Marine Mammal Commission (MMC) and the Natural Resources Defense Council (NRDC). NMFS has responded to those comments below.

Comment 1: The MMC recommended that the MIRC final rule and any Letter of Authorization issued under that rule include all marine mammal species that may be taken as a result of the proposed activities. Specifically, the MMC suggested that NMFS and/or the Navy should consult with the U.S. Fish and Wildlife Service (USFWS) to determine if authorization also is needed to take dugongs, which, according to the proposed rule, could occur within the Mariana Islands Range Complex.

Response: The Navy has consulted on the MIRC action under Section 7 of the ESA with the USFWS, which has jurisdiction over dugongs. The Navy and the USFWS coordinated regarding the list of species, and dugongs were not included. Dugongs have not been observed in the action area since 1985. Palau, over 1000 miles away, is the closest location that they have been seen recently.

Comment 2: The MMC notes that the Navy, in its applications and related documents, generally has done a commendable job of reviewing the existing literature on marine mammal density, distribution, behavior, and habitat use for the areas under consideration, but expressed concern that the manner in which the Navy is using that information to form conclusions about density, distribution, behavior, and habitat use has not been subjected to the normal scientific review process. The MMC recommends that NMFS require the Navy to conduct an external peer review of its marine mammal density estimates, the data upon which those estimates are based, and the manner in which those data are being used.

Response: Both NMFS and the Navy use peer-reviewed science whenever it is available and applicable, and NMFS has encouraged the Navy to get the models they use and data they gather peer-reviewed. However, neither the NEPA, the MMPA, nor the ESA require that data or calculations used in the analyses pursuant to these statutes be peer-reviewed prior to making a decision. Rather, NMFS and the Navy are required to use the best available science to inform our analyses.

The Navy proactively funded a baseline survey for the Mariana Islands in 2007 (the "Mariana Islands Sea Turtle and Cetacean Survey" or MISTCS) to gather data on the distribution and density of marine mammals and sea turtles. This survey is the first and only systematic survey to be conducted in the region and not only generated density estimates but added sei whales to the confirmed species in the area. Because it is the only data of this kind collected specifically around the Mariana Islands, it is considered the best available science. The Navy primarily used that data to derive their density estimates, and laid out a systematic approach for using other existing Pacific data when there was not enough MISTCS data to calculate a density for a particular species. Most of the densities estimated in the MIRC are not notably different than those estimated in Hawaii or the Eastern Tropical Pacific.

Also, while it is not the same as a peer review, both the NEPA and MMPA processes include a comment period in which the public can specifically recommend better ways to use the data to estimate density, and which the Navy and NMFS would need to address.

While it will not be published until after this final rule is complete, the Navy is preparing for publication an article presenting the MISTCS data that was used to inform their density estimates, and it will be peer-reviewed. Additionally, the Navy is developing a new systematic framework (that includes a hierarchy of preferred methodologies based on the data available in an area) to estimate density in the analyses for the rule renewals that will follow the expiration of the rules issued in 2009, 2010, and 2011 (*i.e.,* rules that would, if appropriate, be issued in 2014 and later). The Navy has indicated that they may pursue a peer review of this framework and NMFS has encouraged them to do so.

Comment 3: The MMC recommends that NMFS require that a sufficient level of monitoring be conducted during all training activities to ensure that marine mammals are not being taken in unanticipated ways and numbers. They further note that, according to the Navy's monitoring plan, "major exercises may undergo significant schedule changes in reaction to higher-priority commitments and such changes may limit monitoring opportunities * * * [or] extreme weather precludes effective sampling." The plan further states that, in case of such monitoring delay(s), "monitoring will be re-scheduled to the next available opportunity * * * [and] * * * may have to be made up in the subsequent year." The MMC further states that they assume that, although it is not clear in either the monitoring plan or the proposed rule, if monitoring associated with the focused studies cannot take place during a major training exercise, other standard types of monitoring will be conducted for mitigation and documentation purposes.

Response: The Commission's assumption is correct. There are two different types of monitoring required pursuant to the MIRC training exercises. One type is the monitoring outlined in the Monitoring Plan (which has been modified since the proposed rule, see Comment 10 below), which consists of different study methods designed to collect density and distribution data and is conducted by MMOs. This monitoring includes systematic sampling conducted at a different time and place than the training exercises. The Navy feels this monitoring may need to be rescheduled as appropriate. This is the monitoring that the Navy may need to reschedule.

Separately, monitoring is routinely conducted by watchstanders on surface vessels (and opportunistically by personnel on other platforms). This monitoring is used to detect animals so the necessary mitigation can be implemented. Behavioral data which allow for a general assessment of impacts are collected with other information (such as the status of sonar sources) that help verify the Navy's mitigation implementation. This data-gathering requirement is described in § 218.105 Requirements for monitoring and reporting.

Comment 4: The MMC requested that NMFS require that, upon its completion, the plan for the Navy's Integrated Comprehensive Monitoring Program (ICMP) be made available for Commission review and comment.

Response: The 2009 ICMP was completed and is posted on NMFS' Web site at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications.* The ICMP is an iterative outline of an ongoing program, and NMFS and the Navy will evaluate the potential need to update it annually. NMFS made some specific recommendations on how to improve the 2009 ICMP, which are outlined in Section 6 of that document. Pursuant to the AFAST, HRC and SOCAL 2010 LOAs, the Navy will submit an updated version addressing those recommended improvements and any others, as appropriate, to NMFS at the end of 2010. NMFS has provided the MMC with a copy of the 2009 ICMP and notified them that NMFS and the Navy will consider any comments provided by August 15, 2010 in the development of the 2010 ICMP.

Comment 5: The MMC recommends that NMFS advise the Navy and specify in the final rule and Letter of Authorization that any and all data that the Navy collects as part of monitoring and reporting requirements are essential for documenting compliance with the requirements of the Marine Mammal Protection Act, the incidental take regulations, and the terms and conditions of the Letter of Authorization

and, unless subject to national security restrictions, should be considered as public information. The MMC further notes that the draft Monitoring Plan indicated that "[a]ll data will be considered "pre-decisional" and proprietary and will be shared among the Navy and NMFS (at a minimum) during the five-year period of the LOA."

Response: NMFS concurs with the MMC and clarified this point with the Navy. The language the MMC cited has been removed in the Final Monitoring Plan. As specified in the final regulations (and in the LOAs), the Navy includes all of the information specified as part of the monitoring and reporting requirements in their annual reports (which are posted on NMFS Web site) unless the information is classified or the analysis has not been completed (*i.e.,* passive acoustic data).

Comment 6: The MMC recommends that NMFS require that, in the event of the death or serious injury of a marine mammal during activities associated with any of the training exercises or other activities covered by this authorization, those activities be suspended, pending an investigation and determination that further serious injuries or deaths are unlikely or until authorization for such taking has been obtained. The MMC specifically notes that there is no shutdown measure in place for non-major sonar activities. The MMC further recommends that NMFS require that the Navy, in conjunction with the NMFS, investigate any injury or death of a marine mammal to determine the cause, assess the full impact of the activity or activities (*e.g.,* the total number of animals involved), and determine how activities should be modified to avoid future injuries or deaths. If the death or serious injury involves a marine mammal not included in the authorization for such takes, NMFS should allow the activity to proceed only if it has reviewed the circumstances and determined that additional serious injuries or deaths are unlikely or the Navy has obtained authorization for such taking. Lastly, the MMC recommends that prior to issuing the final regulations, NMFS ensure that it can provide oversight of and response to an uncommon stranding event in the Mariana Islands Range Complex Study Area sufficient to meet in full the monitoring and reporting requirements of the Marine Mammal Protection Act.

Response: NMFS and the Navy have developed a detailed Stranding Response Plan for MIRC that outlines protocols for, and describes the underlying rationale for, shutdown (in very specific circumstances) and investigation in the event that dead or stranded animals are found in the vicinity of major sonar exercises. The regulations also include a provision for "General notification of injured or dead marine mammals," under which Navy personnel shall ensure that NMFS is notified immediately (or as soon as clearance procedures allow) if an injured, stranded, or dead marine mammal is found during or shortly after, and in the vicinity of, any Navy training exercise (including non-major ones) utilizing MFAS, HFAS, or underwater explosive detonations. The provision further requires the Navy to provide NMFS with species or description of the animal(s), the condition of the animal(s) (including carcass condition if the animal is dead), location, time of first discovery, observed behaviors (if alive), and photo or video of the animals (if available).

All but one of the small number of strandings that have been associated with MFAS exercises occurred concurrent to exercises that would be considered "major", which typically involve multiple surface vessels and last for a much longer duration than non-major exercises. It can take months to years to complete the necessary tests and analyses required to determine, with a reasonable amount of certainty, the cause of a marine mammal death—and sometimes it is not possible to determine it. In consideration of these facts, NMFS (with input from the Navy) determined that it was beneficial and practicable to preemptively outline an explicit plan (that includes a shutdown requirement in certain circumstances) for how to deal with a stranding that occurs during a major exercise. Alternatively, for non-major exercises, the general stranding provisions apply, which means that the Navy would contact NMFS as soon as clearance procedures allow and we would determine how best to proceed then. In light of the fact that so few strandings have been definitively associated with MFAS training in the 60+ years that the U.S. and other countries that share information have been conducting MFAS training, it is not reasonable or practicable to require the Navy to shut down pending the results of an investigation that could take years to conduct.

However, NMFS and the Navy will implement the Stranding Response Plan as written and, as in the past, will work together on a case-by-case basis within the constraints of our available resources to investigate the causes should a stranding or death occur during a non-major exercise. Once investigations are completed and determinations made (as feasible), NMFS would use the available information to help reduce the likelihood that a similar event would recur and would work with the Navy on the necessary steps to ensure compliance by the Navy with the MMPA. NMFS and the Navy are near finalizing an MOU that will streamline and improve the way that the Navy is able to assist NMFS during a stranding investigation. Lastly, the Stranding Response Plan includes a provision for stranding debriefs/lessons learned meetings between NMFS and the Navy following a stranding response, and the MIRC rule includes an adaptive management provision that allows for the modification of mitigation or monitoring measures based on new information (like that which might be gathered during a stranding response/investigation), as appropriate.

Comment 7: The MMC recommended that NMFS work with the Navy to analyze the cumulative effects of adding LFA sonar to the other activities planned for the Mariana Islands Range Complex before using LFA sonar as a component of the proposed training exercises and, if appropriate, add authorization for the use of LFA to the final rule and Letter of Authorization. The NRDC had similar concerns, including the fact that the mitigation used with LFA sonar was not discussed.

Response: As noted, the impacts of LFA sonar (alone) have been analyzed in the Navy's SURTASS LFA Sonar EISs and take of marine mammals incidental to that activity has been authorized in LOAs pursuant to NMFS' Final Rule for LFA Sonar, both of which include required mitigation measures. As described in the proposed rule, the military intends to conduct three exercises (multi-strike group exercises) during the five-year duration of the rule that may include both SURTASS LFA and MFA sonar sources. The expected duration of these combined exercises is approximately 14 days. Based on an exercise of this length, an LFA sonar system would be active (*i.e.,* actually transmitting) for no more than approximately 25 hours. Tactical and technical considerations dictate that the LFA sonar ship would typically be tens of miles from the MFA sonar ship when using active sonar. It is unlikely, but possible, that both LFA and MFA sonar would be active at exactly the same time during a major exercise. In the unlikely event that both systems were operating simultaneously, the likelihood of more than a relatively small number of individual marine mammals being physically present at a time, location, and depth to be able to receive both LFA and MFA sonar signals at levels of

concern at the same time is even smaller as the sound from both signals would have attenuated when they reached the marine mammal in question, so even a simultaneous exposure would not be at the full signal of either system. Additionally, few species have maximum sensitivity to both the low and middle frequencies.

That said, pursuant to this rule, NMFS worked with the Navy to more specifically analyze impacts that might result from animals being exposed to both the LFAS and the MFAS at the same time. The Navy developed a model to evaluate the likelihood of an animal being exposed to both sources based on the operational parameters of the two systems and the propagation characteristics of the two sound sources. Assuming an LFA and MFA sonar source transmitting at the same time over a 25-hour period and based on the fact that the two sources transmit at very different duty cycles, the overlap of the actual signals would be approximately 3.2%, or 0.8 hours (assuming that there is only one MFA sonar ship transmitting). But the possibility of even that overlap must consider the other factors discussed above.

Based on the fact that an LFA sonar ship would be tens of miles away from an MFA ship when using active sonar and that the overlap of the signals would only be about 50 minutes at attenuated levels, as well as the other information discussed above, the exposure of marine mammals simultaneously to both MFA and LFA sonars would be limited, and the impacts would not be expected to result in a detectable increase in the number or severity of the takes already analyzed and estimated in this rule.

Comment 8: The MMC recommended that NMFS limit the authorization to avoid Navy operations within the Marianas Trench Marine National Monument (MTMNM) to the extent possible. Further, if the Navy must conduct activities within the Monument, the Service should include in the final rule and Letter of Authorization a description of the measures that the Navy will adopt to minimize adverse impacts and to comply with the intent of the presidential proclamation establishing the Monument.

Response: The MTMNM was established to protect the submerged lands and waters of the Mariana Archipelago and was designated with the purpose of protecting the submerged volcanic areas of the Mariana Ridge (which include chemosynthetic features and hydrothermal vents), the coral reef ecosystem of the waters of surrounding islands, and the Marianas Trench. The Monument includes the submerged lands of the "Volcano Unit" and the water column and submerged lands within the "Island Unit". The MTMNM contains no areas specifically designated as important to marine mammal protection in the MTMNM. The presidential proclamation establishing the Monument indicates that the prohibitions required by the proclamation shall not apply to activities and exercises of the Armed Forces, but also indicates the Armed Forces shall ensure, by the adoption of appropriate measures not impairing operations or operational capabilities, that its vessels and aircraft act in a manner consistent, so far as is reasonable and practicable, with the proclamation.

Pursuant to the MMPA, NMFS makes decisions regarding required mitigation based on biological information pertaining to the potential impacts of an activity on marine mammals and their habitat (and the practicability of the measure), not management designations intended for the broad protection of various other marine resources. A portion of the MTMNM overlaps with the MIRC Study Area; however, there are no areas within this area of special importance to marine mammals for which restricting sonar use would afford a notable benefit. If training or exercises occur in this area, the Navy would be required to follow the general mitigation protocols established in the final rule and LOA. For example, powering or shutting down sonar when marine mammals are detected within ranges where the received sound level is likely to result in temporary threshold shift (TTS) or injury and using exclusion zones that avoid exposing marine mammals to levels of explosives likely to result in injury or death of marine mammals. NMFS expects the mitigation measures employed in the MTMNM will reduce the number of marine mammals exposed to levels of sound expected to result in TTS or more severe behavioral responses in these areas.

Comment 9: The NRDC suggests that NMFS should not issue an MMPA authorization because the information on species densities and distributions of marine mammals in the Marianas region is inadequate for NMFS to be able to effectively analyze the environmental impacts, and that the Navy should have obtained the information before requesting an MMPA authorization. They further suggest that because of this lack of information, the NEPA analysis is inadequate both for the Navy and for NMFS to adopt. They note that there has only been one comprehensive survey conducted in the area (during one single season) and that the sea states were high during this survey (making detection difficult), which, combined with the detection probabilities used, likely resulted in an underestimate of the density of animals in the area. They further noted that off-shore data were used to estimate density across both the inshore and offshore areas, even though there are often density differences across inshore and offshore areas (some species are more dense inshore).

Response: Both NMFS and the Navy have a responsibility to use the best available science to support our analysis and decisions under both NEPA and the MMPA. In 2007, the Navy funded a baseline survey for the Mariana Islands (the "Mariana Islands Sea Turtle and Cetacean Survey" or MISTCS) to gather data on the distribution and density of marine mammals and sea turtles. This survey is the first and only systematic survey to be conducted in the region and not only generated density estimates, but also added sei whales to the confirmed species in the area. In this case, the Navy has generated the best available science and both NMFS and the Navy are using it. The limitations of the data were acknowledged by the Navy in the MISTCS report, and the Navy plans to improve upon this information moving forward as more data are gathered. The sea states in the MIRC are comparatively higher than in other areas, so scientists will continue to deal with this challenge. As more surveys are conducted, data will be collected across more seasons and areas (inshore and offshore), which will allow for the calculation of more spatially and temporally explicit density estimates. The collection of additional data will allow scientists to determine whether the development of MIRC-specific detection probabilities is appropriate. In the meantime, the density estimates from the MISTCS surveys are not unexpected and are similar to those for the Hawaii offshore areas and the eastern tropical Pacific and will allow NMFS to make reasonable predictions regarding the number of marine mammals that might be exposed to particular levels of sound.

Regarding the comment that take estimates are likely underestimates, for comparison we use data collected in Hawaii, where surveys are more robust. For naval exercises in Hawaii, there are more survey data, across different seasons, incorporating both inshore and offshore data, and using specific detection probability factors. The Navy estimated approximately 28,000 Level B harassment takes for a total of about 1670 hours of hull-mounted MFAS (the

most powerful source, which accounts for the vast majority of takes). In MIRC, the Navy estimated approximately 80,000 Level B harassment takes to result from the operation of approximately 2320 hours of hull-mounted MFAS. At a broad level, these estimates (the ratio of the two) do not suggest the Navy is likely underestimating take in MIRC. Similarly, below is an overview of the watchstander data collected during major exercises in Hawaii and MIRC, which, while not a systematic comparison, broadly suggests the number of animals encountered in the vicinity of an exercise in MIRC is not much different than the numbers encountered in Hawaii.

Location	hours sonar	# sightings	# animals sighted
MIRC (August, 2007)	1208	25	235
Hawaii (RIMPAC, July 2006)	472	26	70 individuals + 8 pods
Hawaii (April, 2007)	265	0	0
Hawaii (April, 2007)	50	1	1
Hawaii (November, 2007)	77	0	0
Hawaii (January, 2009)	918	24	135

Table 5. Marine mammal sightings by watchstanders during major exercises in MIRC and Hawaii since 2006.

Lastly, the animals that watchstanders have detected during exercises have not exhibited any observable behavioral effects. In summary, using the density estimates generated from the Navy's survey and the take estimates modeled by the Navy, NMFS has considered the best available science. Additionally, taking into consideration other data/literature related to the likely impacts of MFAS exposure on marine mammals (see proposed rule) combined with data from the Navy regarding the number of marine mammal detections and observed behaviors that have been recorded during other Navy exercises, NMFS has sufficient information to make the findings required under the MMPA.

Comment 10: The NRDC recommends that to meet its responsibilities under the MMPA and NEPA, NMFS should require the Navy, as a condition of any future permit, to sponsor a multiyear survey effort within the Marianas Islands Range Complex that can serve as a reasonable basis of both geographic mitigation and improved environmental assessment. NRDC recommends (1) that NOAA scientists participate in the survey design, including the design of tracklines and the determination of detection probabilities; (2) that surveys are conducted consistently and across multiple seasons, given the presence of migratory species, and for more than 1 year, given the potential for interannual variability and the typically high sea states around the Marianas; and (3) that surveys are designed, at least in part, to aid in identifying areas of importance to marine mammals (*e.g.,* gathering oceanographic data relevant to marine mammal distribution). Finally, (4) the survey results should be integrated into habitat suitability models available for other regions, such as Hawaii or the Eastern Tropical Pacific (NMFS interprets this to mean that habitat suitability models from these other areas should be used in conjunction with MIRC data to predict density in the MIRC).

Response: NMFS agrees with NRDC regarding the importance of gathering more density, distribution, and abundance data in the MIRC and has recommended the Navy refocus their Monitoring Plan. In response to this recommendation, the Navy has modified their draft Monitoring Plan to focus completely on gathering density and distribution data that can be used to better inform our analyses of the impacts of the action as well as to inform decisions regarding the development of areas of special protection and, further, the Navy has increased the amount of survey effort that they had committed to in the draft Monitoring Plan. The Navy has now committed to conduct 45 days of visual surveys annually (over the 5 years of the rule) using a small boat and/or airplane around Guam, Tinian, Rota and Saipan. These surveys will be conducted over both summer and winter and will be developed in coordination with NMFS scientists and conducted in cooperation with NMFS and/or DAWR. Visual surveys will integrate methods such as photo ID which provide data that can be used for estimating distribution and abundance. Additionally, as already discussed in the proposed rule, the Navy will deploy four passive acoustic devices to collect data throughout the years. Lastly, the Navy has also committed to additional analysis of acoustic data gathered during the 2007 MISTCS survey that have not yet been analyzed.

Earlier this year, NMFS's Pacific Islands Fisheries Science Center (PIFSC) and the Navy collaborated to conduct cetacean observations in conjunction with an oceanographic survey aboard NOAA Research Vessel Oscar Elton Sette. Coverage was between Honolulu and Guam and within the Exclusive Economic Zones (EEZs) of Guam and the Commonwealth of the Northern Marianas between January and May 2010. The goal was to monitor the presence and distribution of cetaceans on the high seas and within the Guam/Commonwealth of the Northern Mariana Islands EEZs. PIFSC performed four data collection projects during the outward bound and early arrival portion of the survey:

(1) Cetacean visual and acoustic observations during daylight hours on the high seas survey between Honolulu and Guam, 20 January–4 February.

(2) Cetacean visual and acoustic observations conducted from small boats chartered in Guam, Rota, Tinian, and/or Saipan, 10 February–4 March.

(3) Cetacean visual observations during daylight hours during an oceanography survey around Guam and southern CNMI, 18 March–14 April.

(4) Cetacean visual and acoustic observations during daylight hours on the high seas survey between Guam and Honolulu, 18 April–4 May.

The goal of the vessel-based visual surveys was to monitor cetacean presence, distribution and diversity in Hawaii, Marianas and the high seas. These surveys were conducted by experienced marine mammal observers aboard a capable vessel using established NMFS PIFSC protocols for conducting and recording sighting data. The observers recorded marine mammal sightings as well as environmental data (Beaufort Sea sea state, wind speed/direction, swell height/direction, visibility, etc.). Digital photographs were taken to assist in species

identification. In addition to visual sightings, a towed acoustic array was used to detect animal calls. Using both visual and acoustic methods provides a more complete assessment for the presence of marine mammals in the survey area.

The MIRC rule has an adaptive management provision that requires the Navy and NMFS to review new information (such as monitoring results) on an annual basis and allows that mitigation or monitoring measures could be modified, if appropriate. NMFS and the Navy will consider the results of any required monitoring, as well as the voluntary 2010 monitoring, in our annual assessment of mitigation and monitoring measures. Additionally, NOAA has committed to convene a workshop of marine mammal experts in 2010/2011 to identify cetacean hotspots (areas of specifically important use or high density) using both field data and habitat modeling, as appropriate. The data that the Navy gathers this year in MIRC pursuant to their modified monitoring plan (see above) will inform the cetacean hotspot workshop. The workshop results, in turn, could potentially support the need to designate protected areas in which Navy activities could potentially be limited, depending on NMFS' analysis of the benefit to the species of limiting activities in the area, the likely effectiveness of the measure, and the practicability of implementation. The adaptive management provisions would allow for the application of these protected areas, if appropriate.

With respect to using habitat suitability models from other regions in conjunction with the MIRC data to inform density estimates, while habitat suitability models can be helpful in predicting marine mammal presence/density in an area, the less actual information that is available to inform a model, the less robust the model is likely to be—especially if one extrapolates from one region to another where there is not necessarily a basic understanding of the regional ecological processes in play (*e.g.,* sea surface temperature or salinity can mean completely different things in different areas). Additionally, it is very difficult to validate a model in areas with little information. In short, a model would not necessarily increase the accuracy of the density estimates in the MIRC area, given the amount of data that is currently available in the MIRC. That said, the Navy is exploring (and NMFS supports this exploration) incorporating habitat modeling into their density estimates, as appropriate, as they develop the environmental analysis for their training actions moving forward.

Comment 11: NRDC states that within the scientific community, there is general consensus that protecting important habitat represents the most effective means currently available to reduce the impacts of mid-frequency sonar on marine mammals. They further state that "Nonetheless, no portion of this vast 501,000 nm^2 range was excluded by the Pacific Fleet from sonar training, and neither the Navy's DEIS nor its take application—nor NMFS' Proposed Rule—considers establishing any protection areas in which sonar training would be limited or excluded." NRDC then recommends that certain protection areas, in which sonar training should not be conducted, should be established. Those areas include:

(1) Waters surrounding Saipan and Tinian Islands to the 1000m isobath (particularly but not exclusively the northwest coast of Saipan)—for humpback whales.

NRDC notes that the Navy's MISTCS identified waters around Saipan and Tinian Islands as "probable" humpback whale breeding grounds, based on both acoustic and sighting data. Singing males were detected acoustically, and social interactions between individuals were detected visually. Concentrations were especially high around the northwest coast of Saipan.

They further note that the MISTCS report indicates that whaling data from the 1700s and 1800s indicate concentrations of humpback whales around the Northern Mariana Islands and it is likely that the area around Saipan and Tinian represents a formerly important breeding ground now being recolonized as the population slowly recovers from whaling.

(2) West Mariana Ridge—for False killer whale; Short-finned pilot whales; Mesoplodon spp.; Bryde's whale.

NRDC notes that a chain of conical seamounts (extinct volcanoes) comprises the West Mariana Ridge, on the far side of the Mariana Basin. Some seamounts (including the Pathfinder, Arakane, and Suruga Seamounts between 142°–143°E) rise to summits less than 50m below sea level (Miller *et al.* 2008). These seamounts support a rich diversity of coral reef and continental slope species, and previous surveys have shown dense concentrations of biological productivity (high planktonic production, large schools of small and predatory fishes including skipjack and other species of tuna) (Miller *et al.* 2008; Tsukomoto 2006). Consistent with this, multiple sightings of several cetacean species known to prefer high bathymetric relief were made by the MISTCS on or near the West Mariana Ridge, including two of the survey's three beaked whale sightings.

(3) Western edge of the Mariana Trench with high bathymetric relief (roughly 4000–8000m)—for Sei and Bryde's whale; minke whale, and

(4) Western side of the main Mariana Islands to 5000m—for Sperm whales.

NRDC indicates that the potential for concentrations of species exists in these areas (3 and 4), but also that systematic analysis is needed.

Response: NMFS acknowledges protecting important habitat (i.e., areas where there is robust evidence animals are predictably gathering in higher densities, or are known to display important behaviors such as breeding and calving and could potentially be disrupted by the proximity of MFAS activities), can be one of the more effective ways to minimize impacts (both in number and severity) to marine mammals.

The first paragraph of NRDC's comment seems to express surprise that, despite the importance of habitat protection, no protective areas have been established in MIRC. Before discussing the specific areas that NRDC has recommended, NMFS must explain that we do not begin with the assumption that any particular area contains areas that warrant special protection for marine mammals. Rather, we analyze the existing data to determine whether there is suitable evidence indicating that conditions exist in which the limitation of activity in an area would afford a notable reduction (either in quantity or potential severity) in the take of marine mammals. If there is suitable evidence indicating that a protective measure of this nature is, in fact, warranted, then we must review the measure in the context of personnel safety, practicality of implementation, and impact on the effectiveness of the "military readiness activity" to determine whether it would result in the "least practicable adverse impact."

Unfortunately, the supporting data do not support the recommendations that NRDC proposes, specifically:

(1) Waters surrounding Saipan and Tinian Islands to the 1000m isobaths—During the MISTCS survey, over the course of approximately 2 months, the survey had 11 acoustic detections of singing humpback whales (primarily to the north and west of Saipan) and sighted one group of approximately 8 animals. The acoustic detections were of singing males and the visually detected group was exhibiting behaviors consistent with a group of males

competing for females. Although the detected behaviors were consistent with breeding behaviors, the number of animals observed is too small to draw a robust conclusion, and also does not seem indicative of the high density of humpbacks seen in other known breeding/calving areas. By contrast, in Hawaii (where a protective area was designated for the Navy), humpback whales and calves concentrate in densities up to 3.6 animals/mile^2.

(2) West Mariana Ridge—While these sea mounts may be generally associated with higher productivity, there is not enough evidence to suggest the area will predictably have a higher density of marine mammals, or that it is a specifically important feeding area, such that it is appropriate to limit activities in the area. During MISTCS, only one false killer whale, 3 short-finned pilot whales, 2 beaked whales, and 4 Brydes whales were sighted on the Western Mariana Ridge.

For (3) Western Edge of Mariana Trench and (4) Western Side of Main Mariana Islands, NRDC acknowledges that systematic analysis is needed before recommending these areas as protected areas, and NMFS concurs that there is not enough information to support protected areas in these spots. That said, as noted in NMFS' response to Comment 10, the Navy has modified their monitoring plan to collect exactly the sort of density and distribution data that we have noted above is limited in MIRC. Further, as noted above, the adaptive management provision in this rule will allow NMFS to use this new information (or other information, such as that generated from the cetacean hotspot workshop) to inform modifications to mitigation or monitoring measures, as appropriate.

Comment 12: NRDC included a copy of their comments on the Navy's EIS and suggested that some of those comments also pertained to the MMPA authorization.

Response: NMFS has addressed the issues that apply to our issuance of the MMPA authorization below:

(1) Additional Mitigation—NRDC recommends a suite of additional mitigation measures for the Navy to consider to protect various resources, including marine mammals. NMFS and the Navy have previously discussed either the specific measures listed in NRDC's comments on the Navy's EIS, or the general class of mitigation contemplated and have developed a section for the EIS that discusses the benefits of the proposed measure to marine mammals, the likely effectiveness of the measure, and the practicability of the measure for Navy implementation. Section 5.1.8 (begin page 5–18) of the MIRC EIS, entitled Alternative Mitigation Measures Considered But Eliminated, explains why these measures are not included in NMFS MMPA regulations and is hereby incorporated by reference.

(2) Dr. Bain's Critique of Risk Function—NRDC includes a comprehensive critique of the risk function that the Navy (and NMFS) uses to calculate takes. NMFS responded to Dr. Bain's comments in the Atlantic Fleet Active Sonar Training final rule (74 FR 4865) and hereby incorporates those comments by reference.

Comment 13: A few commenters expressed general opposition to Navy activities and NMFS' issuance of an MMPA authorization, because of the danger to marine mammals, and one suggested a proposed alternative to MFAS that would be less impactful and involved replacing the current technology with the use of a transponder.

Response: NMFS appreciates the commenters' concern for the marine mammals that live in the area of the proposed activities. The MMPA directs NMFS to issue an incidental take authorization if certain findings can be made. Under the MMPA, NMFS must make the decision of whether or not to issue an authorization based on the specified activity that the applicant submits; the MMPA does not contain a mechanism for NMFS to question the need for the action that the applicant has proposed. Similarly, any U.S. citizen (including the Navy) can request and receive a MMPA authorization as long as all of the necessary findings can be made. NMFS has determined that the Navy's MIRC training activities will have a negligible impact on the affected species or stocks and, therefore, we are issuing the necessary governing regulations and plan to issue the requested MMPA authorization.

Estimated Take of Marine Mammals

As mentioned previously, one of the main purposes of NMFS' effects assessments is to identify the permissible methods of taking: What caused the take (*e.g.,* exposure to anthropogenic noise vs. ship strike); the regulatory level of take (*i.e.,* mortality vs. Level A or Level B harassment) and the amount of take. In the Potential Effects of Exposure of Marine Mammal to MFAS/HFAS and Underwater Detonations section of the proposed rule, NMFS identified the lethal responses, physical trauma, sensory impairment (permanent and temporary threshold shifts and acoustic masking), physiological responses (particular stress responses), and behavioral responses that could potentially result from exposure to MFAS/HFAS or underwater explosive detonations. In this section, we will relate the potential effects to marine mammals from MFAS/HFAS and underwater detonation of explosives to the MMPA statutory definitions of Level A and Level B Harassment and attempt to quantify the effects that might occur from the specific training activities that the Navy is proposing in the MIRC study area.

In the Estimated Take of Marine Mammals section of the proposed rule, NMFS relates the potential effects to marine mammals from MFAS/HFAS and underwater detonations (discussed in the Potential Effects of Specified Activities on Marine Mammals Section) to the MMPA regulatory definitions of Level A and Level B Harassment and quantified (estimated) the effects on marine mammals that could result from the specific activities that the Navy intends to conduct. The subsections of that analysis are discussed individually below.

Definition of Harassment

The Definition of Harassment section of the proposed rule contains the definitions of Level A and Level B Harassment, and a discussion of which of the previously discussed potential effects of MFAS/HFAS or explosive detonations fall into the categories of Level A Harassment (permanent threshold shift (PTS), acoustically mediated bubble growth, behaviorally mediated bubble growth, and physical disruption of tissues resulting from explosive shock wave) or Level B Harassment (temporary threshold shift (TTS), acoustic masking and communication impairment, and behavioral disturbance rising to the level of harassment). See (74 FR 53795, page 53846). No changes have been made to the discussion contained in this section of the proposed rule.

Acoustic Take Criteria

In the Acoustic Take Criteria section of the proposed rule, NMFS described the development and application of the acoustic criteria for both MFAS/HFAS and explosive detonations (74 FR 53795, pages 53846–53852). No changes have been made to the discussion contained in this section of the proposed rule.

Estimates of Potential Marine Mammal Exposure

The proposed rule describes in detail how the Navy estimated the take that will result from their proposed activities (74 FR 53795, pages 53836–53837), which entails the following three

general steps: (1) A propagation model using marine mammal densities estimates animals exposed to sources at different levels; (2) further modeling determines number of exposures to levels indicated in criteria above (*i.e.,* number of takes); and (3) post-modeling corrections refine estimates to make them more accurate. More information regarding the models used, the assumptions used in the models, and the process of estimating take is available in Appendix F of the Navy's DEIS for MIRC.

Table 4 which is identical to the take table (Table 8) in the proposed rule with a few minor corrections (indicated in italics—differences of less than 7 Level B harassment, non-TTS, takes in all cases), indicates the number of takes that were modeled and that are being authorized yearly incidental to the Navy's activities, with the following allowances. The Navy has carefully characterized the training activities planned for the MIRC study area over the 5 years covered by these regulations; however, evolving real-world needs necessitate flexibility in annual activities, which in turn is reflected in annual variation in the potential take of marine mammals. Where it was mentioned more generally in the proposed rule, NMFS has now included language bounding this flexibility in the regulatory text (*see* § 218.102(c)). These potential annual variations were considered in the negligible impact analysis and the analysis in the proposed rule remains applicable. The new language indicates the following:

- That modeled annual takes (which must be provided with annual LOA applications) of any individual species may not exceed the annual amount indicated in the rule (*i.e.,* in Table 4, below) by more than 25% in any year;
- That modeled takes over the course of 5 years will not ultimately exceed the indicated 5-year total for that species indicated by the rule (Table 4) by more than 10%; and
- That modeled total annual take of all species combined may vary but will not exceed the combined amount for all species indicated in the rule (Table 4) by more than 10%.

BILLING CODE 3510–22–C

Mortality

Evidence from five beaked whale strandings, all of which have taken place outside the MIRC study area, and have occurred over approximately a decade, suggests that the exposure of beaked whales to MFAS in the presence of certain conditions (*e.g.,* multiple units using active sonar, steep bathymetry, constricted channels, strong surface ducts, etc.) may result in strandings, potentially leading to mortality. Although these physical factors believed to have contributed to the likelihood of beaked whale strandings are not present, in the aggregate, in the MIRC study area, scientific uncertainty exists regarding what other factors, or combination of factors, may contribute to beaked whale strandings. Accordingly, to allow for scientific uncertainty regarding contributing causes of beaked whale strandings and the exact behavioral or physiological mechanisms that can lead to the ultimate physical effects (stranding and/or death), NMFS is authorizing take, by injury or mortality, of 10 beaked whales over the course of the 5-year regulations. Although the Navy has requested take by injury or mortality, the Navy's model did not predict injurious takes of beaked whales and neither NMFS nor the Navy anticipates that marine mammal strandings or mortality will result from the operation of MFAS during Navy exercises within the MIRC study area.

Effects on Marine Mammal Habitat

NMFS' proposed rule includes a section that addresses the effects of the Navy's activities on Marine Mammal Habitat (74 FR 53795, pages 53855–53857). The analysis preliminarily concluded that the Navy's activities would have minimal effects on marine mammal habitat. No changes have been made to the discussion contained in this section of the proposed rule and NMFS has concluded there would be minimal effects on marine mammal habitat.

Analysis and Negligible Impact Determination

Pursuant to NMFS' regulations implementing the MMPA, an applicant is required to estimate the number of animals that will be "taken" by the specified activities (*i.e.,* takes by Level B harassment only, Level A harassment, and/or death). This estimate informs the analysis that NMFS must perform to determine whether the activity will have a "negligible impact" on the affected species or stock. Level B (behavioral) harassment occurs at the level of the individual(s) and does not assume any resulting population-level consequences, though there are known avenues through which behavioral disturbance of individuals can result in population-level effects (for example: pink-footed geese (*Anser brachyrhynchus*) in undisturbed habitat gained body mass and had about a 46-percent reproductive success compared with geese in disturbed habitat (being consistently scared off the fields on which they were foraging), which did not gain mass and had 17-percent reproductive success). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of Level B harassment takes, alone, is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be "taken" through behavioral harassment, NMFS must consider other factors, such as the likely nature of any responses (their intensity, duration, etc.), the context of any responses (critical reproductive time or location, migration, etc.), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and effects on habitat. Generally speaking, and especially with other factors being equal, the Navy and NMFS anticipate more severe effects from takes resulting from exposure to higher received levels (though this is in no way a strictly linear relationship throughout species, individuals, or circumstances) and less severe effects from takes resulting from exposure to lower received levels.

In the Analysis and Negligible Impact Determination section of the proposed rule, NMFS addressed the issues identified in the preceding paragraph in combination with additional detailed analysis regarding the severity of the anticipated effects, and including species (or group)-specific discussions, to determine that Navy training will have a negligible impact on the marine mammal species and stocks present in MIRC study area. No changes have been made to the discussion contained in this section of the proposed rule (74 FR 33828, pages 33884–33892), with the following exception.

As mentioned previously in the Estimated Take section, to allow for more flexibility in operations, NMFS has added language bounding the flexibility in annual variation of potential take of individual marine mammal species into the regulatory text (see § 218.102(c)). The new language indicates that modeled annual takes (which must be provided with annual LOA application) of any individual species may vary but will not ultimately exceed the indicated 5-year total for that species (indicated by Table 6) by more than 10% and will not exceed the indicated annual total by more than 25% in any given year; and that modeled total yearly take of all species combined may vary but will not exceed the combined amount indicated below in any given year by more than 10%. NMFS has considered these limitations in our negligible impact determination and the findings described in the proposed rule remain applicable.

Determination

Negligible Impact

Based on the analysis contained here and in the proposed rule (and other related documents) of the likely effects of the specified activity on marine mammals and their habitat and dependent upon the implementation of the mitigation and monitoring measures, NMFS finds that the total taking from Navy training exercises utilizing MFAS/HFAS and underwater explosives in the MIRC study area will have a negligible impact on the affected species or stocks. NMFS has proposed regulations for these exercises that prescribe the means of effecting the least practicable adverse impact on marine mammals and their habitat and set forth requirements pertaining to the monitoring and reporting of that taking.

Subsistence Harvest of Marine Mammals

There is no subsistence harvest of marine mammals in the Mariana Islands and, therefore, NMFS has determined that the issuance of 5-year regulations and subsequent LOAs for Navy training exercises in the MIRC would not have an unmitigable adverse impact on the availability of the affected species or stocks for subsistence use.

ESA

There are five marine mammal species and two sea turtle species that are listed as endangered under the ESA with confirmed or possible occurrence in the study area: Humpback whale, sei whale, fin whale, blue whale, sperm whale, hawksbill sea turtle and leatherback sea turtle. An additional three species of sea turtles are also listed as threatened under the ESA: green sea turtle, loggerhead sea turtle, and olive ridley sea turtle.

Pursuant to Section 7 of the ESA, the Navy has consulted with NMFS on this action. NMFS has also consulted internally on the issuance of regulations

under section 101(a)(5)(A) of the MMPA for this activity. In a Biological Opinion (BiOp), NMFS concluded that the Navy's activities in the MIRC and NMFS' issuance of these regulations are not likely to jeopardize the continued existence of threatened or endangered species or destroy or adversely modify any designated critical habitat.

Because of the difference between the statutes, it is possible that ESA analysis of the applicant's action could produce a take estimate that is different than the takes requested by the applicant (and analyzed for authorization by NMFS under the MMPA process), despite the fact that the same proposed action (i.e. number of sonar hours and explosive detonations) was being analyzed under each statute. When this occurs, NMFS staff coordinate to ensure that the most appropriate number of takes are authorized. For the Navy's proposed MIRC training, coordination with the Endangered Species Division indicates that they will likely allow for a lower level of take of ESA-listed marine mammals than were requested by the applicant (because their analysis indicates that fewer will be taken than estimated by the applicant). Therefore, the number of authorized takes in NMFS' LOA(s) will reflect the lower take numbers from the ESA consultation, though the specified activities (*i.e.,* number of sonar hours, etc.) will remain the same. Alternately, these regulations indicate the maximum number of takes that may be authorized under the MMPA.

The ITS(s) issued for each LOA will contain implementing terms and conditions to minimize the effect of the marine mammal take authorized through the 2010 LOA (and subsequent LOAs in 2011, 2012, 2013, and 2014). With respect to listed marine mammals, the terms and conditions of the ITSs will be incorporated into the LOAs.

NEPA

NMFS has participated as a cooperating agency on the Navy's Draft Environmental Impact Statement (DEIS) for MIRC, which was published on January 30, 2009. NMFS subsequently adopted the Navy's EIS for the purpose of complying with the MMPA.

Classification

This action does not contain any collection of information requirements for purposes of the Paperwork Reduction Act.

The Office of Management and Budget has determined that this final rule is not significant for purposes of Executive Order 12866.

Pursuant to the Regulatory Flexibility Act, the Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this final rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The Regulatory Flexibility Act requires Federal agencies to prepare an analysis of a rule's impact on small entities whenever the agency is required to publish a notice of proposed rulemaking. However, a Federal agency may certify, pursuant to 5 U.S.C. 605 (b), that the action will not have a significant economic impact on a substantial number of small entities. Because the action described in this rule involves the tactical use of mid-frequency active sonar sources and explosives on Navy ranges, and the Navy is the sole entity that may conduct these activities on the MIRC, only the Navy will be directly affected by this rulemaking, not small governmental jurisdictions, small organizations, or small businesses, as defined by the Regulatory Flexibility Act (RFA). Any requirements imposed by a Letter of Authorization issued pursuant to these regulations, and any monitoring or reporting requirements imposed by these regulations, will be applicable only to the Navy. NMFS does not expect the issuance of these regulations or the associated LOAs to result in any impacts to small entities pursuant to the RFA. Because this action, if adopted, would directly affect the Navy and not a small entity, NMFS concludes the action would not result in a significant economic impact on a substantial number of small entities.

The Assistant Administrator for Fisheries has determined that there is good cause under the Administrative Procedure Act (5 U.S.C. 553(d)(3)) to waive the 30-day delay in the effective date of the measures contained in the final rule. Navy, as the permittee, has informed NMFS that any delay of enacting the final rule would result in either: (1) A suspension of ongoing or planned naval training (including a major exercise currently scheduled for 2010 within the MIRC), which would disrupt vital training essential to national security; or (2) the Navy's procedural non-compliance with the MMPA (should the Navy conduct training/exercises without an LOA), thereby resulting in the potential for unauthorized takes of marine mammals. Moreover, the Navy is ready to implement the rule immediately. Accordingly, these measures will become effective upon publication.

List of Subjects in 50 CFR Part 218

Exports, Fish, Imports, Incidental take, Indians, Labeling, Marine mammals, Navy, Penalties, Reporting and recordkeeping requirements, Seafood, Sonar, Transportation.

Dated: July 20, 2010.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

■ For reasons set forth in the preamble, 50 CFR part 218 is amended as follows:

PART 218—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

■ 1. The authority citation for part 218 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*

Subparts D through K [Reserved]

■ 2. Add and reserve Subparts D through K to part 218.

■ 3. Subpart L is added to part 218 to read as follows:

Subpart L—Taking and Importing Marine Mammals; U.S. Navy's Mariana Islands Range Complex (MIRC)

Sec.

218.100 Specified activity and geographical area.
218.101 Effective dates.
218.102 Permissible methods of taking.
218.103 Prohibitions.
218.104 Mitigation.
218.105 Requirements for monitoring and reporting.
218.106 Applications for Letters of Authorization.
218.107 Letters of Authorization.
218.108 Renewal of Letters of Authorization and adaptive management.
218.109 Modifications to Letters of Authorization.

Subpart L—Taking and Importing Marine Mammals; U.S. Navy's Mariana Islands Training Range Complex (MIRC)

§ 218.100 Specified activity and specified geographical area.

(a) Regulations in this subpart apply only to the U.S. Navy for the taking of marine mammals that occurs in the area outlined in paragraph (b) of this section and that occur incidental to the activities described in paragraph (c) of this section.

(b) The taking of marine mammals by the Navy may be authorized in a Letter of Authorization (LOA) if it occurs within the Mariana Islands Range Complex (MIRC) Study Area (as

depicted in Figure 1–1 in the Navy's application for MIRC), which is bounded by a pentagon with the following five corners: 16°46′29.3376″ N. lat., 138°00′59.835″ E. long.; 20°02′24.8094″ N. lat., 140°10′13.8642″ E. long.; 20°3′27.5538″ N. lat., 149°17′41.0388″ E. long.; 7°0′30.0702″ N. lat., 149°16′14.8542″ E. long; and 6°59′24.633″ N. lat, 138°1′29.7228″ E. long.

(c) The taking of marine mammals by the Navy may be authorized in an LOA if it occurs incidental to the following activities within the designated amounts of use:

(1) The use of the following mid-frequency active sonar (MFAS) and high frequency active sonar (HFAS) sources for U.S. Navy anti-submarine warfare (ASW) training, maintenance, and research, development, testing and evaluation (RDT&E):

(i) AN/SQS–53 (hull-mounted active sonar)—up to 10865 hours over the course of 5 years (an average of 2173 hours per year);

(ii) AN/SQS–56 (hull-mounted active sonar)–up to 705 hours over the course of 5 years (an average of 141 hours per year);

(iii) AN/SSQ–62 (Directional Command Activated Sonobuoy System (DICASS) sonobuoys)–up to 8270 sonobuoys over the course of 5 years (an average of 1654 sonobuoys per year);

(iv) AN/AQS–22 (helicopter dipping sonar)—up to 2,960 dips over the course of 5 years (an average of 592 dips per year);

(v) AN/BQQ–10 (submarine hull-mounted sonar)—up to 60 hours over the course of 5 years (an average of 12 hours per year);

(vi) MK–48, MK–46, or MK–54 (torpedoes)—up to 200 torpedoes over the course of 5 years (an average of 40 torpedoes per year);

(vii) AN/SSQ–110 (IEER)—up to 530 buoys deployed over the course of 5 years (an average of 106 per year);

(viii) AN/SSQ–125 (AEER)—up to 530 buoys deployed over the course of 5 years (an average of 106 per year);

(ix) Range Pingers—up to 1,400 hours over the course of 5 years (an average of 280 hours per year); and

(x) PUTR Transponder—up to 1,400 hours over the course of 5 years (an average of 280 hours per year).

(2) The detonation of the underwater explosives indicated in this paragraph (c)(2)(i) conducted as part of the training events indicated in this paragraph (c)(2)(ii):

(i) Underwater Explosives (Net Explosive Weight (NEW)):

(A) 5″ Naval Gunfire (9.5 lbs NEW);

(B) 76 mm rounds (1.6 lbs NEW);

(C) Maverick (78.5 lbs NEW);

(D) Harpoon (448 lbs NEW);

(E) MK–82 (238 lbs NEW);

(F) MK–83 (574 lbs NEW);

(G) MK–84 (945 lbs NEW);

(H) MK–48 (851 lbs NEW);

(I) Demolition Charges (10 lbs NEW);

(J) AN/SSQ–110A (IEER explosive sonobuoy—5 lbs NEW);

(K) Hellfire (16.5 lbs NEW);

(L) GBU 38/32/31.

(ii) Training Events:

(A) Gunnery Exercises (S–S GUNEX)—up to 60 exercises over the course of 5 years (an average of 12 per year);

(B) Bombing Exercises (BOMBEX)—up to 20 exercises over the course of 5 years (an average of 4 per year);

(C) Sinking Exercises (SINKEX)—up to 10 exercises over the course of 5 years (an average of 2 per year);

(D) Extended Echo Ranging and Improved Extended Echo Ranging (EER/IEER) Systems—up to 530 deployments over the course of 5 years (an average of 106 per year);

(E) Demolitions—up to 250 over the course of 5 years (an average of 50 per year); and

(F) Missile exercises (A–S MISSILEX)—up to 10 exercises over the course of 5 years (an average of 2 per year).

(d) The taking of marine mammals may also be authorized in an LOA for the activities and sources listed in § 218.100(c) should the amounts (*i.e.,* hours, dips, number of exercises) vary from those estimated in § 218.100(c), provided that the variation does not result in exceeding the amount of take indicated in § 218.102.

§ 218.101 Effective dates.

Regulations are effective August 3, 2010 through August 3, 2015.

§ 218.102 Permissible methods of taking.

(a) Under Letters of Authorization issued pursuant to §§ 216.106 and 218.107 of this chapter, the Holder of the Letter of Authorization (hereinafter "Navy") may incidentally, but not intentionally, take marine mammals within the area described in § 218.100(b), provided the activity is in compliance with all terms, conditions, and requirements of these regulations and the appropriate Letter of Authorization.

(b) The activities identified in § 218.100(c) must be conducted in a manner that minimizes, to the greatest extent practicable, any adverse impacts on marine mammals and their habitat.

(c) The incidental take of marine mammals under the activities identified in § 218.100(c) is limited to the species listed in this paragraph (4), (5), and (6) of this section (c) by the indicated method of take and the indicated number of times (estimated based on the authorized amounts of sound source operation), but with the following allowances for annual variation in activities:

(1) In any given year, annual take, by harassment, of any species of marine mammal may not exceed the amount identified in paragraphs (b)(4) and (b)(5) of this section, for that species by more than 25% (a post-calculation/estimation of which must be provided in the annual LOA application);

(2) In any given year, annual take by harassment of all marine mammal species combined may not exceed the estimated total of all species combined, indicated in paragraphs (b)(4) and (b)(5) of this section, by more than 10%; and

(3) Over the course of the effective period of this subpart, total take, by harassment, of any species may not exceed the 5-year amounts indicated in paragraphs (b)(4) and (b)(5) of this section by more than 10%. A running calculation/estimation of takes of each species over the course of the years covered by the rule must be maintained.

(4) Level B Harassment:

(i) Mysticetes:

(A) Humpback whale (*Megaptera novaeangliae*)—4,025 (an average of 805 annually);

(B) Fin whale (*Balaenoptera physalus*)—910 (an average of 182 annually);

(C) Blue whale (*Balaenoptera musculus*)—650 (an average of 130 annually);

(D) Sei whale (*Balaenoptera borealis)*—1,625 (an average of 325 annually);

(E) Minke whale (*Balaenoptera acutorostrata*)—2,225 (an average of 445 annually);

(F) Bryde's whale (*Balaenoptera edeni*)—2,285 (an average of 457 annually); and

(G) Unidentified Baleanopterid whales—360 (an average of 72 annually).

(ii) Odontocetes:

(A) Sperm whales (*Physeter macrocephalus*)—4,120 (an average of 824 annually);

(B) Killer whale (*Orcinus orca*)- 1,150 (an average of 230 annually);

(C) Pygmy or dwarf sperm whales (*Kogia breviceps or Kogia sima*)—33,530 (an average of 6,706 annually);

(D) Blainville's beaked whales (Mesoplodon densirostris);—3,850 (an average of 770 annually);

(E) Cuvier's beaked whales (*Ziphius cavirostris*)—18,140 (an average of 3,628 annually);

(F) Ginkgo-toothed beaked whales (*Mesoplodon ginkgodens*)—2,150 (an average of 430 annually);

(G) Longman's beaked whale (Indopacetus pacificus)—1,030 (an average of 206 annually);

(H) Short-finned pilot whale (*Globicephala macrorynchus*)—11,370 (an average of 2,274 annually);

(I) Melon-headed whale (*Peponocephala electra*)—14,315 (an average of 2,863 annually);

(J) Pygmy killer whale (*Feresa attenuata*)—800 (an average of 160 annually);

(K) False killer whale (*Pseudorca crassidens*)—6,445 (an average of 1,289 annually);

(L) Striped dolphin (*Stenella coeruleoalba*)—44,290 (an average of 8,858 annually);

(M) Short-beaked common dolphin (*Delphinus delphis*)—4,715 (an average of 943 annually);

(N) Risso's dolphin (*Grampus griseus*)—33,865 (an average of 6,773 annually);

(O) Bottlenose dolphin (*Tursiops truncates*)—855 (an average of 171 annually);

(P) Fraser's dolphin (*Lagenodelphis hosei*)—23,075 (an average of 4,615 annually);

(Q) Pantropical spotted dolphin (*Stenella attenuata*)—162,495 (an average of 32,499 annually);

(R) Rough-toothed dolphin (*Steno bredanensis*)—1,205 (an average of 241 annually);

(S) Spinner dolphin (*Stenella longirostris*)—10,720 (an average of 2,144 annually); and

(T) Unidentified delphinid—7,690 (an average of 1,538 annually).

(5) Level A Harassment:

(i) Sperm whale—5 (an average of 1 annually);

(ii) Pantropical spotted dolphin—5 (an average of 1 annually);

(6) Level A Harassment and/or mortality of no more than 10 beaked whales (total), of any of the species listed in § 218.102(c)(4)(ii)(D) through (G) over the course of the 5-year regulations.

§ 218.103 Prohibitions.

No person in connection with the activities described in § 218.100 may:

(a) Take any marine mammal not specified in § 218.102(c);

(b) Take any marine mammal specified in § 218.102(c) other than by incidental take as specified in §§ 218.102(c)(1) and (c)(2);

(c) Take a marine mammal specified in § 218.102(c) if such taking results in more than a negligible impact on the species or stocks of such marine mammal; or

(d) Violate, or fail to comply with, the terms, conditions, and requirements of these regulations or a Letter of Authorization issued under §§ 216.106 and 218.107 of this chapter.

§ 218.104 Mitigation.

(a) When conducting training and utilizing the sound sources or explosives identified in § 218.100(c), the mitigation measures contained in a Letter of Authorization issued under §§ 216.106 and 218.107 of this chapter must be implemented. These mitigation measures include, but are not limited to:

(1) Personnel Training:

(i) All commanding officers (COs), executive officers (XOs), lookouts, Officers of the Deck (OODs), junior OODs (JOODs), maritime patrol aircraft aircrews, and Anti-submarine Warfare (ASW)/Mine Warfare (MIW) helicopter crews shall complete the NMFS-approved Marine Species Awareness Training (MSAT) by viewing the U.S. Navy MSAT digital versatile disk (DVD). All bridge lookouts shall complete both parts one and two of the MSAT; part two is optional for other personnel.

(ii) Navy lookouts shall undertake extensive training in order to qualify as a watchstander in accordance with the Lookout Training Handbook (Naval Education and Training Command [NAVEDTRA] 12968–D).

(iii) Lookout training shall include on-the-job instruction under the supervision of a qualified, experienced lookout. Following successful completion of this supervised training period, lookouts shall complete the Personal Qualification Standard Program, certifying that they have demonstrated the necessary skills (such as detection and reporting of partially submerged objects). Personnel being trained as lookouts can be counted among required lookouts as long as supervisors monitor their progress and performance.

(iv) Lookouts shall be trained in the most effective means to ensure quick and effective communication within the command structure in order to facilitate implementation of protective measures if marine species are spotted.

(v) All lookouts onboard platforms involved in ASW training events will review the NMFS-approved Marine Species Awareness Training material prior to use of MFAS.

(vi) All COs, XOs, and officers standing watch on the bridge will review the Marine Species Awareness Training material prior to a training event employing the use of MFAS/HFAS.

(2) General Operating Procedures (for all training types):

(i) Prior to major exercises, a Letter of Instruction, Mitigation Measures Message or Environmental Annex to the Operational Order shall be issued to further disseminate the personnel training requirement and general marine species protective measures.

(ii) COs shall make use of marine species detection cues and information to limit interaction with marine mammals to the maximum extent possible consistent with safety of the ship.

(iii) While underway, surface vessels shall have at least two lookouts with binoculars; surfaced submarines shall have at least one lookout with binoculars. Lookouts already posted for safety of navigation and man-overboard precautions may be used to fill this requirement. As part of their regular duties, lookouts will watch for and report to the OOD the presence of marine mammals.

(iv) On surface vessels equipped with a multi-function active sensor, pedestal mounted "Big Eye" (20x110) binoculars shall be properly installed and in good working order to assist in the detection of marine mammals in the vicinity of the vessel.

(v) Personnel on lookout shall employ visual search procedures employing a scanning methodology in accordance with the Lookout Training Handbook (NAVEDTRA 12968–D).

(vi) After sunset and prior to sunrise, lookouts shall employ Night Lookouts Techniques in accordance with the Lookout Training Handbook (NAVEDTRA 12968–D).

(vii) While in transit, naval vessels shall be alert at all times, use extreme caution, and proceed at a "safe speed", which means the speed at which the CO can maintain crew safety and effectiveness of current operational directives, so that the vessel can take action to avoid a collision with any marine mammal.

(viii) When marine mammals have been sighted in the area, Navy vessels shall increase vigilance and take all reasonable actions to avoid collisions and close interaction of naval assets and marine mammals. Such action may include changing speed and/or direction and are dictated by environmental and other conditions (*e.g.,* safety, weather).

(ix) Navy aircraft participating in exercises at-sea shall conduct and maintain surveillance for marine mammals as long as it does not violate safety constraints or interfere with the accomplishment of primary operational duties.

(x) All marine mammal detections shall be immediately reported to assigned Aircraft Control Unit for

further dissemination to ships in the vicinity of the marine species as appropriate when it is reasonable to conclude that the course of the ship will likely result in a closing of the distance to the detected marine mammal.

(xi) Naval vessels will maneuver to keep at least 1,500 ft (500 yds) away from any observed whale in the vessel's path and avoid approaching whales head-on. These requirements do not apply if a vessel's safety is threatened, such as when change of course will create an imminent and serious threat to a person, vessel, or aircraft, and to the extent vessels are restricted in their ability to maneuver. Restricted maneuverability includes, but is not limited to, situations when vessels are engaged in dredging, submerged activities, launching and recovering aircraft or landing craft, minesweeping activities, replenishment while underway and towing activities that severely restrict a vessel's ability to deviate course. Vessels will take reasonable steps to alert other vessels in the vicinity of the whale. Given rapid swimming speeds and maneuverability of many dolphin species, naval vessels would maintain normal course and speed on sighting dolphins unless some condition indicated a need for the vessel to maneuver.

(3) Operating Procedures (for Anti-submarine Warfare (ASW) Operations):

(i) On the bridge of surface ships, there shall always be at least three people on watch whose duties include observing the water surface around the vessel.

(ii) All surface ships participating in ASW training events shall have, in addition to the three personnel on watch noted in (i), at least two additional personnel on watch as lookouts at all times during the exercise.

(iii) Personnel on lookout and officers on watch on the bridge will have at least one set of binoculars available for each person to aid in the detection of marine mammals.

(iv) Personnel on lookout shall be responsible for reporting all objects or anomalies sighted in the water (regardless of the distance from the vessel) to the Officer of the Deck, since any object or disturbance (*e.g.,* trash, periscope, surface disturbance, discoloration) in the water may be indicative of a threat to the vessel and its crew or indicative of a marine mammal that may need to be avoided.

(v) All personnel engaged in passive acoustic sonar operation (including aircraft, surface ships, or submarines) shall monitor for marine mammal vocalizations and report the detection of any marine mammal to the appropriate watch station for dissemination and appropriate action.

(vi) During MFAS operations, personnel shall utilize all available sensor and optical systems (such as night vision goggles) to aid in the detection of marine mammals.

(vii) Aircraft with deployed sonobuoys shall use only the passive capability of sonobuoys when marine mammals are detected within 200 yds (183 m) of the sonobuoy.

(viii) Helicopters shall observe/survey the vicinity of an ASW exercise for 10 minutes before the first deployment of active (dipping) sonar in the water.

(ix) Helicopters shall not dip their sonar within 200 yards of a marine mammal and shall cease pinging if a marine mammal closes within 200 yards after pinging has begun.

(x)(A) Safety Zones—When marine mammals are detected by any means (aircraft, shipboard lookout, or acoustically) the Navy shall ensure that sonar transmission levels are limited to at least 6 dB below normal operating levels if any detected marine mammals are within 1000 yards (914 m) of the sonar dome (the bow) (*i.e.,* limit to at most 229 dB for AN/SQS–53 and 219 dB for AN/SQS–56, etc.). Ships and submarines shall continue to limit maximum transmission levels by this 6-dB factor until the animal has been seen to leave the 1000-yd safety zone, has not been detected for 30 minutes, or the vessel has transited more than 2,000 yds (1829 m) beyond the location of the last detection.

(B) When marine mammals are detected by any means (aircraft, shipboard lookout, or acoustically) the Navy shall ensure that sonar transmission levels are limited to at least 10 dB below normal operating levels if any detected marine mammals are within 500 yards (457 m) of the sonar dome (the bow). Ships and submarines shall continue to limit maximum ping levels by this 10-dB factor until the animal has been seen to leave the 500-yd safety zone, has not been detected for 30 minutes, or the vessel has transited more than 2,000 yds (1829 m) beyond the location of the last detection.

(C) When marine mammals are detected by any means (aircraft, shipboard lookout, or acoustically) the Navy shall ensure that sonar transmission ceases if any detected marine mammals are within 200 yards (183 m) of the sonar dome (the bow). Sonar shall not resume until the animal has been seen to leave the 200-yd safety zone, has not been detected for 30 minutes, or the vessel has transited more than 2,000 yds (457 m) beyond the location of the last detection.

(D) Special conditions applicable for dolphins and porpoises only: If, after conducting an initial maneuver to avoid close quarters with dolphins or porpoises, the OOD concludes that dolphins or porpoises are deliberately closing to ride the vessel's bow wave, no further mitigation actions are necessary while the dolphins or porpoises continue to exhibit bow wave riding behavior.

(xi) Prior to start up or restart of active sonar, operators will check that the 1000-m Safety Zone radius around the sound source is clear of marine mammals.

(xii) Active sonar levels (generally)—Navy shall operate active sonar at the lowest practicable level, not to exceed 235 dB, except as required to meet tactical training objectives.

(xiii) Submarine sonar operators will review detection indicators of close-aboard marine mammals prior to the commencement of ASW training events involving MFAS.

(E) If the need for power-down should arise (as detailed in 218.114(a)(3)(x)) when the Navy is operating a hull-mounted or sub-mounted source above 235 dB (infrequent), the Navy shall follow the requirements as though they were operating at 235 dB—the normal operating level (*i.e.,* the first power-down will be to 229 dB, regardless of at what level above 235 dB active sonar was being operated).

(4) Operating Procedures for Underwater Detonations (up to 10-lb charges):

(i) Exclusion Zones—All demolitions and ship mine countermeasures training exercises involving the use of explosive charges must include exclusion zones for marine mammals to prevent physical and/or acoustic effects to those species. These exclusion zones shall extend in a 700-yard arc radius around the detonation site. Should a marine mammal be present within the the surveillance area, the explosive event shall not be started until the animal leaves the area.

(ii) Pre-Exercise Surveys—For Demolition and Ship Mine Countermeasures Operations, pre-exercise surveys shall be conducted for 30 minutes prior to the commencement of the scheduled explosive event. The survey may be conducted from the surface, by divers, and/or from the air, and personnel shall be alert to the presence of any marine mammal. Should such an animal be present within the survey area, the explosive event shall not be started until the animal voluntarily leaves the area. The

Navy will ensure the area is clear of marine mammals for a full 30 minutes prior to initiating the explosive event. Personnel will record any marine mammal observations during the exercise as well as measures taken if species are detected within the exclusion zone.

(iii) Post-Exercise Surveys—Surveys within the same exclusion zone radius shall also be conducted within 30 minutes after the completion of the explosive event.

(iv) Reporting—If there is evidence that a marine mammal may have been stranded, injured or killed by the action, Navy training activities shall be immediately suspended and the situation immediately reported by the participating unit to the Officer in Charge of the Exercise (OCE), who will follow Navy procedures for reporting the incident to Commander, Pacific Fleet, Commander, Navy Region Marianas, Environmental Director, and the chain-of-command. The situation shall also be reported to NMFS (see Stranding Plan for details).

(5) Sinking Exercise:

(i) All weapons firing shall be conducted during the period 1 hour after official sunrise to 30 minutes before official sunset.

(ii) An exclusion zone with a radius of 1.0 nm (1.9 km) will be established around each target. An additional buffer of 0.5 nm (0.9 km) will be added to account for errors, target drift, and animal movements. Additionally, a safety zone, which will extend beyond the buffer zone by an additional 0.5 nm (0.9 km), shall be surveyed. Together, the zone extends out 2 nm (3.7 km) from the target.

(iii) A series of surveillance over-flights shall be conducted within the 2-nm zone around the target, prior to and during the exercise, when feasible. Survey protocol shall be as follows:

(A) Overflights within the 2-nm zone around the target shall be conducted in a manner that optimizes the surface area of the water observed. This may be accomplished through the use of the Navy's Search and Rescue Tactical Aid, which provides the best search altitude, ground speed, and track spacing for the discovery of small, possibly dark objects in the water based on the environmental conditions of the day. These environmental conditions include the angle of sun inclination, amount of daylight, cloud cover, visibility, and sea state.

(B) All visual surveillance activities shall be conducted by Navy personnel trained in visual surveillance. At least one member of the mitigation team will have completed the Navy's marine mammal training program for lookouts.

(C) In addition to the overflights, the 2-nm zone around the target shall be monitored by passive acoustic means, when assets are available. This passive acoustic monitoring would be maintained throughout the exercise. Additionally, passive sonar onboard submarines may be utilized to detect any vocalizing marine mammals in the area. The OCE will be informed of any aural detection of marine mammals and will include this information in the determination of when it is safe to commence the exercise.

(D) On each day of the exercise, aerial surveillance of the 2-nm zone around the target shall commence 2 hours prior to the first firing.

(E) The results of all visual, aerial, and acoustic searches shall be reported immediately to the OCE. No weapons launches or firing may commence until the OCE declares this 2-nm zone around the target is free of marine mammals.

(F) If a marine mammal is observed within the 2-nm zone around the target, firing will be delayed until the animal is re-sighted outside the 2-nm zone around the target, or 30 minutes have elapsed. After 30 minutes, if the animal has not been re-sighted it can be assumed to have left the 2-nm zone around the target. The OCE will determine if the marine mammal is in danger of being adversely affected by commencement of the exercise.

(G) During breaks in the exercise of 30 minutes or more, the 2-nm zone around the target shall again be surveyed for any marine mammal. If marine mammals are sighted within the 2-nm zone around the target, the OCE shall be notified, and the procedures described in this section shall be followed.

(H) Upon sinking of the vessel, a final surveillance of the 2-nm zone around the target shall be monitored for 2 hours, or until sunset, to verify that no marine mammals were harmed.

(iv) Aerial surveillance shall be conducted using helicopters or other aircraft based on necessity and availability. The Navy has several types of aircraft capable of performing this task; however, not all types are available for every exercise. For each exercise, the available asset best suited for identifying objects on and near the surface of the ocean shall be used. These aircraft shall be capable of flying at the slow safe speeds necessary to enable viewing of marine vertebrates with unobstructed, or minimally obstructed, downward and outward visibility. The exclusion and safety zone surveys may be cancelled in the event that a mechanical problem, emergency search and rescue, or other similar and unexpected event preempts the use of one of the aircraft onsite for the exercise.

(v) Every attempt shall be made to conduct the exercise in sea states that are ideal for marine mammal sighting, Beaufort Sea State 3 or less. In the event of a 4 or above, survey efforts shall be increased within the 2-nm zone around the target. This shall be accomplished through the use of an additional aircraft, if available, and conducting tight search patterns.

(vi) The exercise shall not be conducted unless the 2-nm zone around the target could be adequately monitored visually. Should low cloud cover or surface visibility prevent adequate visual monitoring as described previously, the exercise would be delayed until conditions improved, and all of the above monitoring criteria could be met.

(vii) In the event that any marine mammals are observed to be harmed in the area, a detailed description of the animal shall be taken, the location noted, and if possible, photos taken of the marine mammal. This information shall be provided to NMFS via the Navy's regional environmental coordinator for purposes of identification (see the Stranding Plan for detail).

(viii) An after action report detailing the exercise's time line, the time the surveys commenced and terminated, amount, and types of all ordnance expended, and the results of survey efforts for each event shall be submitted to NMFS.

(6) Surface-to-Surface Gunnery (up to 5-inch Explosive Rounds):

(i) For exercises using targets towed by a vessel, target-towing vessels shall maintain a trained lookout for marine mammals when feasible. If a marine mammal is sighted in the vicinity, the tow vessel will immediately notify the firing vessel, which will suspend the exercise until the area is clear.

(ii) A 600 yard (585 m) radius buffer zone will be established around the intended target.

(iii) From the intended firing position, trained lookouts will survey the buffer zone for marine mammals prior to commencement and during the exercise as long as practicable. Due to the distance between the firing position and the buffer zone, lookouts are only expected to visually detect breaching whales, whale blows, and large pods of dolphins and porpoises.

(iv) The exercise will be conducted only when the buffer zone is visible and marine mammals are not detected within it.

(7) Surface-to-Surface Gunnery (non-explosive rounds):

(i) A 200-yd (183 m) radius buffer zone shall be established around the intended target.

(ii) From the intended firing position, trained lookouts shall survey the buffer zone for marine mammals prior to commencement and during the exercise as long as practicable.

(iii) If available, target towing vessels shall maintain a lookout (unmanned towing vessels will not have a lookout available). If a marine mammal is sighted in the vicinity of the exercise, the tow vessel shall immediately notify the firing vessel in order to secure gunnery firing until the area is clear.

(iv) The exercise shall be conducted only when the buffer zone is visible and marine mammals are not detected within the target area and the buffer zone.

(8) Surface-to-Air Gunnery (Explosive and Non-explosive Rounds):

(i) Vessels will orient the geometry of gunnery exercises in order to prevent debris from falling in the area of sighted marine mammals.

(ii) Vessels will attempt to recover any parachute deploying aerial targets to the extent practicable (and their parachutes if feasible) to reduce the potential for entanglement of marine mammals.

(iii) Target towing aircraft shall maintain a lookout if feasible. If a marine mammal is sighted in the vicinity of the exercise, the tow aircraft will immediately notify the firing vessel in order to secure gunnery firing until the area is clear.

(9) Air-to-Surface Gunnery (Explosive and Non-explosive Rounds):

(i) A 200 yard (183 m) radius buffer zone will be established around the intended target.

(ii) If surface vessels are involved, lookout(s) will visually survey the buffer zone for marine mammals to and during the exercise.

(iii) Aerial surveillance of the buffer zone for marine mammals will be conducted prior to commencement of the exercise. Aerial surveillance altitude of 500 feet to 1,500 feet (152–456 m) is optimum. Aircraft crew/pilot will maintain visual watch during exercises. Release of ordnance through cloud cover is prohibited; aircraft must be able to actually see ordnance impact areas.

(iv) The exercise will be conducted only if marine mammals are not visible within the buffer zone.

(10) Small Arms Training (Grenades, Explosive and Non-explosive Rounds)—Lookouts will visually survey for marine mammals. Weapons will not be fired in the direction of known or observed marine mammals.

(11) Air-to-Surface At-sea Bombing Exercises (explosive bombs and rockets):

(i) If surface vessels are involved, trained lookouts shall survey for marine mammals. Ordnance shall not be targeted to impact within 1,000 yds (914 m) of known or observed marine mammals.

(ii) A 1,000 yd (914 m) radius buffer zone shall be established around the intended target.

(iii) Aircraft shall visually survey the target and buffer zone for marine mammals prior to and during the exercise. The survey of the impact area shall be made by flying at 1,500 ft (152 m) or lower, if safe to do so, and at the slowest safe speed. When safety or other considerations require the release of weapons without the releasing pilot having visual sight of the target area, a second aircraft, the "wingman," will clear the target area and perform the clearance and observation functions required before the dropping plane may release its weapons. Both planes must have direct communication to assure immediate notification to the dropping plane that the target area may have been fouled by encroaching animals or people. The clearing aircraft will assure it has visual site of the target area at a maximum height of 1500 ft. The clearing plane will remain within visual sight of the target until required to clear the area for safety reasons. Survey aircraft shall employ most effective search tactics and capabilities.

(iv) The exercise will be conducted only if marine mammals are not visible within the buffer zone.

(12) Air-to-Surface At-Sea Bombing Exercises (Non-explosive Bombs and Rockets):

(i) If surface vessels are involved, trained lookouts will survey for marine mammals. Ordnance shall not be targeted to impact within 1,000 yards (914 m) of known or observed or marine mammals.

(ii) A 1,000 yard (914 m) radius buffer zone will be established around the intended target.

(iii) Aircraft will visually survey the target and buffer zone for marine mammals prior to and during the exercise. The survey of the impact area will be made by flying at 1,500 feet (456 m) or lower, if safe to do so, and at the slowest safe speed. When safety or other considerations require the release of weapons without the releasing pilot having visual sight of the target area, a second aircraft, the "wingman," will clear the target area and perform the clearance and observation functions required before the dropping plane may release its weapons. Both planes must have direct communication to assure immediate notification to the dropping plane that the target area may have been fouled by encroaching animals or people. The clearing aircraft will assure it has visual site of the target area at a maximum height of 1500 ft. The clearing plane will remain within visual sight of the target until required to clear the area for safety reasons. Survey aircraft shall employ most effective search tactics and capabilities.

(iv) The exercise will be conducted only if marine mammals and are not visible within the buffer zone.

(13) Air-to-Surface Missile Exercises (explosive and non-explosive):

(i) Aircraft will visually survey the target area for marine mammals. Visual inspection of the target area will be made by flying at 1,500 (457 m) feet or lower, if safe to do so, and at slowest safe speed. Firing or range clearance aircraft must be able to actually see ordnance impact areas.

(ii) Explosive ordnance shall not be targeted to impact within 1,800 yds (1646 m) of sighted marine mammals.

(14) Aircraft Training Activities Involving Non-Explosive Devices:

An exclusion zone of 200 yds around the target location, therefore, shall be clear of marine mammals. Pre- and post-surveillance and reporting requirements outlined for underwater detonations shall be implemented during Mining Training Activities.

(15) Extended Echo Ranging/Improved Extended Echo Ranging and Advanced Extended Echo-ranging (EER/IEER/AEER)—The following mitigation measures shall be used with the employment of IEER/AEER sonobuoys:

(i) Crews shall conduct visual reconnaissance of the drop area prior to laying their intended sonobuoy pattern. This search shall be conducted at an altitude below 500 yd (457 m) at a slow speed, if operationally feasible and weather conditions permit. In dual aircraft operations, crews are allowed to conduct coordinated area clearances.

(ii) For IEER (AN/SSQ–110A), crews shall conduct a minimum of 30 minutes of visual and aural monitoring of the search area prior to commanding the first post detonation. This 30-minute observation period may include pattern deployment time.

(iii) For any part of the intended sonobuoy pattern where a post (source/receiver sonobuoy pair) will be deployed within 1,000 yd (914 m) of observed marine mammal activity, the Navy shall deploy the receiver ONLY (i.e., not the source) and monitor while conducting a visual search. When marine mammals are no longer detected within 1,000 yd (914 m) of the intended

post position, the source sonobuoy (AN/SSQ–110A/SSQ–125) will be co-located with the receiver.

(iv) When operationally feasible, Navy crews shall conduct continuous visual and aural monitoring of marine mammal activity. This shall include monitoring of own-aircraft sensors from the time of the first sensor placement until the aircraft have left the area and are out of RF range of these sensors.

(v) *Aural Detection.* If the presence of marine mammals is detected aurally, then that shall cue the Navy aircrew to increase the diligence of their visual surveillance. Subsequently, if no marine mammals are visually detected, then the crew may continue multi-static active search.

(vi) *Visual Detection.* If marine mammals are visually detected within 1,000 yd (914 m) of the explosive source sonobuoy (AN/SSQ–110A/SSQ–125) intended for use, then that payload shall not be activated. Aircrews may utilize this post once the marine mammals have not been re-sighted for 30 minutes, or are observed to have moved outside the 1,000 yd (914 m) safety buffer. Aircrews may shift their multi-static active search to another post, where marine mammals are outside the 1,000 yd (914 m) safety buffer.

(vii) For IEER (AN/SSQ–110A), aircrews shall make every attempt to manually detonate the unexploded charges at each post in the pattern prior to departing the operations area by using the "Payload 1 Release" command followed by the "Payload 2 Release" command. Aircrews shall refrain from using the "Scuttle" command when two payloads remain at a given post. Aircrews shall ensure that a 1,000 yd (914 m) safety buffer, visually clear of marine mammals, is maintained around each post as is done during active search operations.

(viii) Aircrews shall only leave posts with unexploded charges in the event of a sonobuoy malfunction, an aircraft system malfunction, or when an aircraft must immediately depart the area due to issues such as fuel constraints, inclement weather, and in-flight emergencies. In these cases, the sonobuoy will self-scuttle using the secondary or tertiary method.

(ix) The Navy shall ensure all payloads are accounted for. Explosive source sonobuoys (AN/SSQ–110A) that cannot be scuttled shall be reported as unexploded ordnance via voice communications while airborne, then upon landing via naval message.

(x) Marine mammal monitoring shall continue until out of own-aircraft sensor range.

(16) The Navy shall implement the "Stranding Response Plan for Major Navy Training Exercises in the MIRC" (available at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm*), which is incorporated herein by reference, including the following measures:

(i) *Shutdown Procedures.* When an Uncommon Stranding Event (USE—defined in § 216.271) occurs during a Major Training Exercise (MTE) (as defined in the Stranding Plan, meaning including Multi-strike group exercises, Joint Expeditionary exercises, and Marine Air Ground Task Force exercises in the MIRC), the Navy shall implement the procedures described in this section.

(A) The Navy shall implement a Shutdown (as defined in the Stranding Response Plan for MIRC) when advised by a NMFS Office of Protected Resources Headquarters Senior Official designated in the MIRC Stranding Communication Protocol that a USE (as defined in the Stranding Response Plan for MIRC) involving live animals has been identified and that at least one live animal is located in the water. NMFS and Navy shall communicate, as needed, regarding the identification of the USE and the potential need to implement shutdown procedures.

(B) Any shutdown in a given area shall remain in effect in that area until NMFS advises the Navy that the subject(s) of the USE at that area die or are euthanized, or that all live animals involved in the USE at that area have left the area (either of their own volition or herded).

(C) If the Navy finds an injured or dead marine mammal floating at sea during an MTE, the Navy shall notify NMFS immediately or as soon as operational security considerations allow. The Navy shall provide NMFS with species or description of the animal(s), the condition of the animal(s) including carcass condition if the animal(s) is/are dead, location, time of first discovery, observed behaviors (if alive), and photo or video of the animals (if available). Based on the information provided, NMFS shall determine if, and advise the Navy whether, a modified shutdown is appropriate on a case-by-case basis.

(D) In the event, following a USE, that: (a) Qualified individuals are attempting to herd animals back out to the open ocean and animals are not willing to leave, or (b) animals are seen repeatedly heading for the open ocean but turning back to shore, NMFS and the Navy shall coordinate (including an investigation of other potential anthropogenic stressors in the area) to determine if the proximity of MFAS/HFAS activities or explosive detonations, though farther than 14 nm from the distressed animal(s), is likely decreasing the likelihood that the animals return to the open water. If so, NMFS and the Navy shall further coordinate to determine what measures are necessary to further minimize that likelihood and implement those measures as appropriate.

(ii) Within 72 hours of NMFS notifying the Navy of the presence of a USE, the Navy shall provide available information to NMFS (per the MIRC Communication Protocol) regarding the location, number and types of acoustic/explosive sources, direction and speed of units using MFAS/HFAS, and marine mammal sightings information associated with training activities occurring within 80 nm (148 km) and 72 hours prior to the USE event. Information not initially available regarding the 80 nm (148 km), 72 hours, period prior to the event shall be provided as soon as it becomes available. The Navy shall provide NMFS investigative teams with additional relevant unclassified information as requested, if available.

(b) [Reserved]

§ 218.105 Requirements for monitoring and reporting.

(a) *General Notification of Injured or Dead Marine Mammals.* Navy personnel shall ensure that NMFS is notified immediately ((see Communication Plan) or as soon as clearance procedures allow) if an injured, stranded, or dead marine mammal is found during or shortly after, and in the vicinity of, any Navy training exercise utilizing MFAS, HFAS, or underwater explosive detonations. The Navy will provide NMFS with the name of species or description of the animal(s), the condition of the animal(s) (including carcass condition if the animal is dead), location, time of first discovery, observed behaviors (if alive), and photo or video of the animal(s) (if available). In the event that an injured, stranded, or dead marine mammal is found by the Navy that is not in the vicinity of, or during or shortly after, MFAS, HFAS, or underwater explosive detonations, the Navy will report the same information as listed above as soon as operationally feasible and clearance procedures allow.

(b) *General Notification of Ship Strike.* In the event of a ship strike by any Navy vessel, at any time or place, the Navy shall do the following:

(1) Immediately report to NMFS the species identification (if known), location (lat/long) of the animal (or the strike if the animal has disappeared),

and whether the animal is alive or dead, or whether its status is unknown.

(2) Report to NMFS as soon as operationally feasible the size and length of animal, an estimate of the injury status (ex., dead, injured but alive, injured and moving, unknown, etc.), vessel class/type and operational status.

(3) Report to NMFS the vessel length, speed, and heading as soon as feasible.

(4) Provide NMFS a photo or video of the animal(s), if equipment is available.

(c) The Navy must conduct all monitoring and/or research required under the Letter of Authorization, including abiding by the annual MIRC Monitoring Plan. (*http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications*)

(d) *Report on Monitoring required in paragraph (c) of this section.* The Navy shall submit a report annually describing the implementation and results of the monitoring required in paragraph (c) of this section. Required submission date will be identified each year in the LOA. Navy will standardize data collection methods across ranges to allow for comparison in different geographic locations.

(e) *Sonar Exercise Notification.* The Navy shall submit to the NMFS Office of Protected Resources (specific contact information to be provided in LOA) either an electronic (preferably) or verbal report within fifteen calendar days after the completion of any Major Training Exercise for Reporting (MTER) indicating:

(1) Location of the exercise;

(2) Beginning and end dates of the exercise; and

(3) Type of exercise.

(f) *Annual MIRC Report.* The Navy will submit an Annual Exercise MIRC Report every year. This report shall contain the subsections and information indicated below.

(1) MFAS/HFAS Major Training Exercises—This section shall contain the following information for the following Coordinated and Strike Group exercises, which for simplicity will be referred to as MTERs: Joint Multi-strike Group Exercises; Joint Expeditionary Exercises; and Marine Air Ground Task Force MIRC:

(i) Exercise Information (for each MTER):

(A) Exercise designator;

(B) Date that exercise began and ended;

(C) Location;

(D) Number and types of active sources used in the exercise;

(E) Number and types of passive acoustic sources used in exercise;

(F) Number and types of vessels, aircraft, etc., participating in exercise;

(G) Total hours of observation by watchstanders;

(H) Total hours of all active sonar source operation;

(I) Total hours of each active sonar source (along with explanation of how hours are calculated for sources typically quantified in alternate way (buoys, torpedoes, etc.)); and

(J) Wave height (high, low, and average during exercise).

(ii) Individual marine mammal sighting info (for each sighting in each MTER):

(A) Location of sighting;

(B) Species (if not possible—indication of whale/dolphin/pinniped);

(C) Number of individuals;

(D) Calves observed (y/n);

(E) Initial Detection Sensor;

(F) Indication of specific type of platform observation made from (including, for example, what type of surface vessel, *i.e.,* FFG, DDG, or CG);

(G) Length of time observers maintained visual contact with marine mammal(s);

(H) Wave height (in feet);

(I) Visibility;

(J) Sonar source in use (y/n);

(K) Indication of whether animal is <200 yd, 200–500 yd, 500–1,000 yd, 1,000–2,000 yd, or >2,000 yd from sonar source in paragraph (f)(1)(i)(J) of this section;

(L) *Mitigation Implementation.* Whether operation of sonar sensor was delayed, or sonar was powered or shut down, and how long the delay was;

(M) If source in use in paragraph (f)(1)(i)(J) is hullmounted, true bearing of animal from ship, true direction of ship's travel, and estimation of animal's motion relative to ship (opening, closing, parallel); and

(N) *Observed behavior.* Watchstanders shall describe, in plain language and without trying to categorize in any way, the observed behavior of the animals (such as animal closing to bow ride, paralleling course/speed, floating on surface and not swimming, etc.).

(iii) An evaluation (based on data gathered during all of the MTERs) of the effectiveness of mitigation measures designed to avoid exposing marine mammals to MFAS. This evaluation shall identify the specific observations that support any conclusions the Navy reaches about the effectiveness of the mitigation.

(2) *ASW Summary.* This section shall include the following information as summarized from non-major training exercises (unit-level exercises, such as TRACKEXs):

(i) *Total Hours.* Total annual hours of each type of sonar source (along with explanation of how hours are calculated for sources typically quantified in alternate way (buoys, torpedoes, etc.));

(ii) *Cumulative Impacts.* To the extent practicable, the Navy, in coordination with NMFS, shall develop and implement a method of annually reporting non-major training (*i.e.,* ULT) utilizing hull-mounted sonar. The report shall present an annual (and seasonal, where practicable) depiction of non-major training exercises geographically across MIRC. The Navy shall include (in the MIRC annual report) a brief annual progress update on the status of the development of an effective and unclassified method to report this information until an agreed-upon (with NMFS) method has been developed and implemented.

(3) *Sinking Exercises (SINKEXs).* This section shall include the following information for each SINKEX completed that year:

(i) Exercise info:

(A) Location;

(B) Date and time exercise began and ended;

(C) Total hours of observation by watchstanders before, during, and after exercise;

(D) Total number and types of rounds expended/explosives detonated;

(E) Number and types of passive acoustic sources used in exercise;

(F) Total hours of passive acoustic search time;

(G) Number and types of vessels, aircraft, etc., participating in exercise;

(H) Wave height in feet (high, low and average during exercise); and

(I) Narrative description of sensors and platforms utilized for marine mammal detection and timeline illustrating how marine mammal detection was conducted.

(ii) Individual marine mammal observation during SINKEX (by Navy lookouts) information:

(A) Location of sighting;

(B) Species (if not possible—indication of whale/dolphin/pinniped);

(C) Number of individuals;

(D) Calves observed (y/n);

(E) Initial detection sensor;

(F) Length of time observers maintained visual contact with marine mammal;

(G) Wave height;

(H) Visibility;

(I) Whether sighting was before, during, or after detonations/exercise, and how many minutes before or after;

(J) Distance of marine mammal from actual detonations (or target spot if not yet detonated)—use four categories to define distance:

(*1*) The modeled injury threshold radius for the largest explosive used in that exercise type in that OPAREA (TBD m for SINKEX in MIRC);

(*2*) The required exclusion zone (1 nm for SINKEX in MIRC);

(*3*) The required observation distance (if different than the exclusion zone (2 nm for SINKEX in MIRC); and

(*4*) Greater than the required observed distance. For example, in this case, the observer shall indicate if < TBD m, from 426 m–1 nm, from 1 nm–2 nm, and >2 nm.

(K) Observed behavior—Watchstanders will describe, in plain language and without trying to categorize in any way, the observed behavior of the animals (such as animal closing to bow ride, paralleling course/speed, floating on surface and not swimming etc.), including speed and direction.

(L) Resulting mitigation implementation—Indicate whether explosive detonations were delayed, ceased, modified, or not modified due to marine mammal presence and for how long.

(M) If observation occurs while explosives are detonating in the water, indicate munitions type in use at time of marine mammal detection.

(4) Improved Extended Echo-Ranging System (IEER)/Advanced Extended Echo-Ranging (AEER) Summary:

(i) Total number of IEER and AEER events conducted in MIRC;

(ii) Total expended/detonated rounds (buoys); and

(iii) Total number of self-scuttled IEER rounds.

(5) *Explosives Summary.* The Navy is in the process of improving the methods used to track explosive use to provide increased granularity. To the extent practicable, the Navy shall provide the information described below for all of their explosive exercises. Until the Navy is able to report in full the information below, they will provide an annual update on the Navy's explosive tracking methods, including improvements from the previous year.

(i) Total annual number of each type of explosive exercise (of those identified as part of the "activity" in this Subpart) conducted in MIRC; and

(ii) Total annual expended/detonated rounds (missiles, bombs, etc.) for each explosive type.

(g) *MIRC 5-year Comprehensive Report.* The Navy shall submit to NMFS a draft report that analyzes and summarizes all of the multi-year marine mammal information gathered during ASW and explosive exercises for which annual reports are required (Annual MIRC Exercise Reports and MIRC Monitoring Plan Reports). This report will be submitted at the end of the fourth year of the rule (November 2014), covering activities that have occurred through July 15, 2014.

(h) *Comprehensive National ASW Report.* By June, 2014, the Navy shall submit a draft National Report that analyzes, compares, and summarizes the active sonar data gathered (through January 1, 2014) from the watchstanders and pursuant to the implementation of the Monitoring Plans for the Northwest Training Range Complex, the Southern California Range Complex, the Atlantic Fleet Active Sonar Training, the Hawaii Range Complex, the Mariana Islands Range Complex, and the Gulf of Alaska.

(i) The Navy shall comply with the 2009 Integrated Comprehensive Monitoring Program (ICMP) Plan and continue to improve the program in consultation with NMFS. Changes and improvements to the program made during 2010 (as prescribed in the 2009 ICMP and deemed appropriate by the Navy and NMFS) will be described in an updated 2010 ICMP and submitted to NMFS by October 31, 2010, for review. An updated 2010 ICMP will be finalized by December 31, 2010.

§ 218.106 Applications for Letters of Authorization.

To incidentally take marine mammals pursuant to these regulations, the U.S. Citizen (as defined by § 216.103) conducting the activity identified in § 218.100(c) (*i.e.,* the Navy) must apply for and obtain either an initial Letter of Authorization in accordance with § 218.107 or a renewal under § 218.108.

§ 218.107 Letters of Authorization.

(a) A Letter of Authorization, unless suspended or revoked, will be valid for a period of time not to exceed the period of validity of this subpart, but must be renewed annually subject to annual renewal conditions in § 218.108.

(b) Each Letter of Authorization shall set forth:

(1) Permissible methods of incidental taking;

(2) Means of effecting the least practicable adverse impact on the species, its habitat, and on the availability of the species for subsistence uses (*i.e.,* mitigation); and

(3) Requirements for mitigation, monitoring and reporting.

(c) Issuance and renewal of the Letter of Authorization shall be based on a determination that the total number of marine mammals taken by the activity as a whole will have no more than a negligible impact on the affected species or stock of marine mammal(s).

§ 218.108 Renewal of Letters of Authorization and adaptive management.

(a) A Letter of Authorization issued under § 216.106 and § 218.107 of this chapter for the activity identified in § 218.100(c) will be renewed annually upon:

(1) Notification to NMFS that the activity described in the application submitted under § 218.206 will be undertaken and that there will not be a substantial modification to the described work, mitigation or monitoring undertaken during the upcoming 12 months;

(2) Receipt of the monitoring reports and notifications within the timeframes indicated in the previous LOA; and

(3) A determination by NMFS that the mitigation, monitoring and reporting measures required under § 218.104 and the Letter of Authorization issued under §§ 216.106 and 218.107 of this chapter, were undertaken and will be undertaken during the upcoming annual period of validity of a renewed Letter of Authorization.

(b) If a request for a renewal of a Letter of Authorization issued under §§ 216.106 and 218.208 indicates that a substantial modification, as determined by NMFS, to the described work, mitigation or monitoring undertaken during the upcoming season will occur, NMFS will provide the public a period of 30 days for review and comment on the request.

(c) A notice of issuance or denial of a renewal of a Letter of Authorization will be published in the **Federal Register**.

(d) *Adaptive Management.* NMFS may modify or augment the existing mitigation or monitoring measures (after consulting with the Navy regarding the practicability of the modifications) if doing so creates a reasonable likelihood of more effectively accomplishing the goals of mitigation and monitoring set forth in the preamble of these regulations. Below are some of the possible sources of new data that could contribute to the decision to modify the mitigation or monitoring measures:

(1) Results from the Navy's monitoring from the previous year (either from the MIRC Study Area or other locations).

(2) Findings of the Monitoring Workshop that the Navy will convene in 2011.

(3) Compiled results of Navy funded research and development (R&D) studies (presented pursuant to the Integrated Comprehensive Monitoring Plan).

(4) Results from specific stranding investigations (either from the MIRC Study Area or other locations, and involving coincident MFAS/HFAS or explosives training or not involving coincident use).

(5) Results from the Long Term Prospective Study described in the preamble to these regulations.

(6) Results from general marine mammal and sound research.

(7) Any information which reveals that marine mammals may have been taken in a manner, extent or number not anticipated by these regulations or subsequent Letters of Authorization.

§ 218.109 Modifications to Letters of Authorization.

(a) Except as provided in paragraph (b) of this section, no substantive modification (including withdrawal or suspension) to the Letter of Authorization by NMFS, issued pursuant to §§ 216.106 and 218.107 of this chapter and subject to the provisions of this subpart, shall be made until after notification and an opportunity for public comment has been provided. For purposes of this paragraph, a renewal of a Letter of Authorization under § 218.108 without modification (except for the period of validity) is not considered a substantive modification.

(b) If the Assistant Administrator determines that an emergency exists that poses a significant risk to the well-being of the species or stocks of marine mammals specified in § 218.100(b), a Letter of Authorization issued pursuant to §§ 216.106 and 218.107 of this chapter may be substantively modified without prior notification and an opportunity for public comment. Notification will be published in the **Federal Register** within 30 days subsequent to the action.

[FR Doc. 2010–18222 Filed 8–2–10; 8:45 am]

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 75, No. 148
Tuesday, August 3, 2010

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206–AM22

Prevailing Rate Systems; Definition of Tulsa County, OK, and Angelina County, TX, to Nonappropriated Fund Federal Wage System Wage Areas

AGENCY: Office of Personnel Management.

ACTION: Proposed rule with request for comments.

SUMMARY: The U.S. Office of Personnel Management is issuing a proposed rule that would define Tulsa County, Oklahoma, as an area of application to the Oklahoma, OK, nonappropriated fund (NAF) Federal Wage System (FWS) wage area and Angelina County, Texas, as an area of application to the Dallas, TX, NAF FWS wage area. These changes are necessary because there are NAF FWS employees working in Tulsa and Angelina Counties and the counties are not currently defined to NAF wage areas. In addition, this proposed rule would restore Appendix B to subpart B of part 532—Nationwide Schedule of Nonappropriated Fund Regular Wage Schedules by removing, under the State of California, "Santa Clara," which was abolished as a NAF FWS wage area by a final rule published on March 9, 2009.

DATES: We must receive comments on or before September 2, 2010.

ADDRESSES: Send or deliver comments to Jerome D. Mikowicz, Deputy Associate Director for Pay and Leave, Employee Services, U.S. Office of Personnel Management, Room 7H31, 1900 E Street, NW., Washington, DC 20415–8200; email *pay-performance-policy@opm.gov;* or FAX: (202) 606–4264.

FOR FURTHER INFORMATION CONTACT: Madeline Gonzalez, (202) 606–2838; e-mail *pay-performance-policy@opm.gov;* or FAX: (202) 606–4264.

SUPPLEMENTARY INFORMATION: The U.S. Office of Personnel Management (OPM) is issuing a proposed rule that would define Tulsa County, Oklahoma, as an area of application to the Oklahoma, OK, nonappropriated fund (NAF) Federal Wage System (FWS) wage area and Angelina County, Texas, as an area of application to the Dallas, TX, NAF FWS wage area. Veterans Canteen Service (VCS) now operates franchise coffee bars, staffed with NAF employees, at Outpatient Clinics in Tulsa and Angelina Counties. The Ernest Childers VA Outpatient Clinic in Tulsa County employs one NAF FWS employee and the Charles Wilson VA Outpatient Clinic in Angelina County employs two NAF FWS employees.

Under section 532.219 of title 5, Code of Federal Regulations, each NAF wage area "shall consist of one or more survey areas, along with nonsurvey areas, if any, having nonappropriated fund employees." Tulsa and Angelina Counties do not meet the regulatory criteria under 5 CFR 532.219 to be established as separate NAF wage areas; however, nonsurvey counties may be combined with a survey area to form a wage area. Section 532.219 lists the regulatory criteria that OPM considers when defining FWS wage area boundaries:

(i) Proximity of largest facilities activity in each county;

(ii) Transportation facilities and commuting patterns; and

(iii) Similarities of the counties in:

(A) Overall population;

(B) Private employment in major industry categories; and

(C) Kinds and sizes of private industrial establishments.

OPM recently completed reviews of the definitions of Tulsa and Angelina Counties and, based on analyses of the regulatory criteria for defining NAF wage areas, is proposing the changes described below. The Federal Prevailing Rate Advisory Committee, the national labor-management committee responsible for advising OPM on matters concerning the pay of FWS employees, recommended these changes by consensus. These changes would be effective on the first day of the first applicable pay period beginning on or after 30 days following publication of the final regulations.

Tulsa County, OK

Based on an analysis of the regulatory criteria for defining NAF wage areas, we recommend that Tulsa County, OK, be defined as an area of application to the Oklahoma, OK, NAF FWS wage area. The proximity criterion favors the Oklahoma wage area more than the Sedgwick, OK, wage area. The commuting patterns criterion does not favor one wage area more than another. Although the overall population, employment sizes, and kinds and sizes of private industrial establishments criterion does not favor one wage area more than another, the comparison of the total population and workforce, employment, and kinds and sizes of private industrial establishments for Tulsa County is similar to the Oklahoma survey area. The NAF FWS employee in Tulsa County works at the Ernest Childers VA Outpatient Clinic, which is a satellite activity attached to the Jack C. Montgomery VA Medical Center in Muskogee County. Muskogee County is already defined to the Oklahoma NAF wage area. Based on this analysis, OPM proposes to define Tulsa County to the Oklahoma NAF wage area.

The proposed Oklahoma NAF wage area would consist of one survey county, Oklahoma County, OK, and four area of application counties: Garfield, Muskogee, Pittsburgh, and Tulsa Counties, OK.

Angelina County, TX

Based on an analysis of the regulatory criteria for defining NAF wage areas, we recommend that Angelina County, TX, be defined as an area of application to the Dallas, TX, NAF FWS wage area. The proximity criterion favors the Rapides, LA, wage area. The commuting patterns criterion does not favor one wage area more than another. Although the overall population, employment sizes, and kinds and sizes of private industrial establishments criterion does not favor one wage area more than another, the industrial distribution pattern for Angelina County is similar to the Rapides survey area. However, the Department of Veterans Affairs has requested that OPM consider defining Angelina County to the Dallas wage area. The two NAF FWS employees in Angelina County work at the Charles Wilson VA Outpatient Clinic, which is a satellite activity of the Michael E. DeBakey VA Medical Center in Harris

County, which is in the Dallas wage area. Although a standard review of regulatory criteria shows that the proximity criterion favors defining Angelina County to the Rapides wage area, we believe the organizational relationship between the Charles Wilson VA Outpatient Clinic and its parent facility, the Michael E. DeBakey VA Medical Center, supports defining Angelina County to the Dallas wage area. An additional factor to consider is the relative proximity of the Medical Center to the Outpatient Clinic. There is a distance of only 128 miles (206 km) separating the two facilities. The distance from the Outpatient Clinic to the host activity in the Rapides wage area is 126 miles (203 km). The difference between these distances is only 2 miles. Based on our analysis of the organizational relationship and geographic proximity of the Medical Center and its Outpatient Clinic, OPM proposes to define Angelina County to the Dallas NAF wage area.

The proposed Dallas NAF wage area would consist of one survey county, Dallas County, TX, and four area of application counties: Angelina, Fannin, Galveston, and Harris Counties, TX.

Santa Clara, CA

On March 9, 2009, we published a final rule (74 FR 9951) that abolished the Santa Clara, CA, NAF FWS wage area. Therefore, "Santa Clara" should be removed under the State of California in Appendix B to subpart B of part 532—Nationwide Schedule of Nonappropriated Fund Regular Wage Schedules.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

U.S. Office of Personnel Management.

John Berry,

Director.

Accordingly, the U.S. Office of Personnel Management proposes to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552.

Appendix B to Subpart B of Part 532—[Amended]

2. Appendix B to subpart B is amended by removing, under the State of California, the entry for "Santa Clara."

3. Appendix D to subpart B is amended by revising the wage area listing for the Oklahoma, OK, and Dallas, TX, NAF wage areas to read as follows:

Appendix D to Subpart B of Part 532—Nonappropriated Fund Wage and Survey Areas

BILLING CODE 6325–39–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0754; Directorate Identifier 2010–CE–039–AD]

RIN 2120–AA64

Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. (EMBRAER) Model EMB–500 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

It has been found that certain regions of the elevators, elevators trim tabs, and ailerons do not present drain holes to avoid water accumulation inside of these flight control surfaces. Internal water accumulation may lead to flight control surfaces unbalancing possibly reducing the flutter margins, which could result in loss of airplane control.

Since this condition may occur in other airplanes of the same type and affects flight safety, a corrective action is required. Thus, sufficient reason exists to request compliance with this AD in the indicated time limit.

The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by September 17, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; fax: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2010–0754; Directorate Identifier 2010–CE–039–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The AGÊNCIA NACIONAL DE AVIAÇÃO CIVIL—BRAZIL, which is the aviation authority for Brazil, has issued AD No.: 2010–07–01, dated August 9, 2010 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

> It has been found that certain regions of the elevators, elevators trim tabs, and ailerons do not present drain holes to avoid water accumulation inside of these flight control surfaces. Internal water accumulation may lead to flight control surfaces unbalancing possibly reducing the flutter margins, which could result in loss of airplane control.
>
> Since this condition may occur in other airplanes of the same type and affects flight safety, a corrective action is required. Thus, sufficient reason exists to request compliance with this AD in the indicated time limit.

The MCAI requires you to drill new drain holes in the elevators, elevators trim tabs, and ailerons surfaces. You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Empresa Brasileira de Aeronáutica S.A. (EMBRAER) has issued Service Bulletin 500–57–0001, dated April 28, 2010. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of the Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This Proposed AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have proposed different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a Note within the proposed AD.

Costs of Compliance

We estimate that this proposed AD will affect 78 products of U.S. registry. We also estimate that it would take about 18 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is $85 per work-hour. Required parts would cost about $128 per product.

Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $129,324, or $1,658 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Empresa Brasileira de Aeronautica S.A. (EMBRAER): Docket No. FAA–2010–0754; Directorate Identifier 2010–CE–039–AD.

Comments Due Date

(a) We must receive comments by September 17, 2010.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Model EMB–500 airplanes, serial numbers 50000005 through 50000134, 50000136, 50000137, and 50000139 through 50000165, certificated in any category.

Subject

(d) Air Transport Association of America (ATA) Code 27: Flight Controls.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

It has been found that certain regions of the elevators, elevators trim tabs, and ailerons do not present drain holes to avoid water accumulation inside of these flight control surfaces. Internal water accumulation may lead to flight control surfaces unbalancing possibly reducing the flutter margins, which could result in loss of airplane control.

Since this condition may occur in other airplanes of the same type and affects flight safety, a corrective action is required. Thus, sufficient reason exists to request compliance with this AD in the indicated time limit.

The MCAI requires you to drill new drain holes in the elevators, elevators trim tabs, and ailerons surfaces. You may obtain further information by examining the MCAI in the AD docket.

Actions and Compliance

(f) Unless already done, within the next 24 calendar months after the effective date of this AD, rework the elevators, elevators trim tabs, and ailerons surfaces by drilling additional drain holes in them following Empresa Brasileira de Aeronáutica S.A. (EMBRAER) Service Bulletin 500–57–0001, dated April 28, 2010.

FAA AD Differences

Note: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; fax: (816) 329–4090. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(h) Refer to MCAI AGÊNCIA NACIONAL DE AVIAÇÃO CIVIL—BRAZIL (ANAC), AD No.: 2010–07–01, dated August 9, 2010; and Empresa Brasileira de Aeronáutica S.A. (EMBRAER) Service Bulletin 500–57–0001, dated April 28, 2010, for related information.

Issued in Kansas City, Missouri, on July 26, 2010.

Christina L. Marsh,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce plc (RR) RB211–Trent 800 Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. This proposed AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Revision of the Critical Part lives has been necessary due to actual operational flight profiles not conforming to those assumed at entry into service and is associated with a revised Flight Profile Monitoring methodology (originally based on engine thrust rating but now based on operating shaft speeds) introduced by Rolls-Royce.

The new Flight Profile Monitoring methodology allows for seven new profiles replacing the previous three. Six of these profiles, A to F, are intended to cover the requirements of most operators. The Declared Life (in Standard Duty Cycles) is published for each part and life usage may be accounted by factoring the number of flights flown. The factor to be used is defined according to the Flight Profile which is applicable to the fleet.

The seventh profile, called "Heavy", will be applicable to fleets operating outside profiles A to F. A separate Declared Life (in Flight Cycles) is published for each part and life usage is accounted without factoring.

We are proposing this AD to prevent failure of critical rotating parts from exceeding the new, lower life limits, which could result in uncontained failure of the engine and damage to the airplane.

DATES: We must receive comments on this proposed AD by September 17, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* (202) 493–2251.

Contact Rolls-Royce plc, P.O. Box 31, Derby, DE24 8BJ, United Kingdom: Telephone 44 (0) 1332 242424; fax 44 (0) 1332 249936, for the service information identified in this proposed AD.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is the same as the Mail address provided in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: James Lawrence, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; *e-mail: james.lawrence@faa.gov;* telephone (781) 238–7176; fax (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA–2010–0755; Directorate Identifier 2010–NE–12–AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of the Web site, anyone can find and read the comments in any of our dockets, including, if provided, the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2007–0003R1, dated January 15, 2009 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

The MCAI describes the unsafe condition as:

> Revision of the Critical Part lives has been necessary due to actual operational flight profiles not conforming to those assumed at entry into service and is associated with a revised Flight Profile Monitoring methodology (originally based on engine thrust rating but now based on operating shaft speeds) introduced by Rolls-Royce.
>
> The new Flight Profile Monitoring methodology allows for seven new profiles replacing the previous three. Six of these profiles, A to F, are intended to cover the requirements of most operators. The Declared Life (in Standard Duty Cycles) is published for each part and life usage may be accounted by factoring the number of flights flown. The factor to be used is defined according to the Flight Profile which is applicable to the fleet.
>
> The seventh profile, called "Heavy", will be applicable to fleets operating outside profiles A to F. A separate Declared Life (in Flight Cycles) is published for each part and life usage is accounted without factoring.

You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Rolls-Royce plc has issued RB211 Trent 800 Series Propulsion System Non-Modification Service Bulletin Alert RB.211–72–AE935, Revision 7, dated January 19, 2009. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of the United Kingdom, and is approved for operation in the United States. Pursuant to our bilateral agreement with the United Kingdom, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information provided by EASA, and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

The MCAI requires incorporating the revised Trent 800 life limits no later than January 31, 2007. This proposed AD would require incorporating the revised Trent 800 life limits within 30 days after the effective date of this proposed AD.

Costs of Compliance

Based on the service information, we estimate that this proposed AD would affect about 16 products of U.S. registry. The average labor rate is $85 per work-hour; there is no labor cost because disks are replaced at scheduled maintenance intervals. Prorated cost of parts would cost about $45,000 per product. Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $720,000.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Rolls-Royce plc: Docket No. FAA–2010–0755; Directorate Identifier 2010–NE–12–AD.

Comments Due Date

(a) We must receive comments by September 17, 2010.

Affected Airworthiness Directives (ADs)

(b) None.

Applicability

(c) This AD applies to Rolls-Royce plc RB211–Trent 895–17, 892–17, 892B–17, 884–17, 884B–17, 877–17 and 875–17 turbofan engines. These engines are installed on, but not limited to, Boeing 777 series airplanes.

Reason

(d) This AD results from:

Revision of the Critical Part lives has been necessary due to actual operational flight profiles not conforming to those assumed at entry into service and is associated with a revised Flight Profile Monitoring methodology (originally based on engine thrust rating but now based on operating shaft speeds) introduced by Rolls-Royce.

The new Flight Profile Monitoring methodology allows for seven new profiles replacing the previous three. Six of these profiles, A to F, are intended to cover the requirements of most operators. The Declared Life (in Standard Duty Cycles) is published for each part and life usage may be accounted by factoring the number of flights flown. The factor to be used is defined according to the Flight Profile which is applicable to the fleet.

The seventh profile, called "Heavy", will be applicable to fleets operating outside profiles A to F. A separate Declared Life (in Flight Cycles) is published for each part and life usage is accounted without factoring.

This AD is necessary as life reductions are applicable in some cases and failure to comply with the revised life limits could result in an unsafe condition.

We are issuing this AD to prevent failure of critical rotating parts from exceeding the new, lower life limits, which could result in uncontained failure of the engine and damage to the airplane.

Actions and Compliance

(e) Compliance is required within 30 days after the effective date of this AD, unless already done, do the following actions.

(1) Revise the airworthiness limitations section (ALS) of your instructions for continued airworthiness (ICA) to incorporate Task 05–10–01–800–801, "Critical and Critical Group A Parts Lives—Multiple Flight Profile Monitoring" and Task 05–10–01–800–802, "Critical and Critical Group A Parts Lives in the HEAVY Flight Profile" of the Rolls-Royce Trent 800 Time Limits manual (TLM) dated June 15, 2009.

(2) Thereafter, do not revise the ALS of your ICA by incorporating any revision of the Rolls-Royce Trent 800 TLM dated prior to the June 15, 2009 revision.

FAA AD Differences

(f) This AD differs from the Mandatory Continuing Airworthiness Information (MCAI) and or service information as follows:

(1) The MCAI AD requires revising the airworthiness limitations section no later than January 31, 2007. This AD requires revising the airworthiness limitations section within 30 days after the effective date of this AD.

(2) This AD prohibits incorporating into the ALS of the ICA, any revision of the Rolls-Royce Trent 800 TLM earlier than the June 15, 2009.

Other FAA AD Provisions

(g) *Alternative Methods of Compliance (AMOCs):* The Manager, Engine Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

Related Information

(h) Refer to MCAI EASA Airworthiness Directive 2007–0003R1, dated January 15, 2009, and Rolls-Royce plc RB211 Trent 800 Series Propulsion System Non-Modification Service Bulletin Alert RB.211–72–AE935, Revision 7, dated January 19, 2009, for related information. Contact Rolls-Royce plc, P.O. Box 31, Derby, DE24 8BJ, United Kingdom: telephone 044 1332 242424; fax 044 1332 249936, for a copy of this service information.

(i) Contact James Lawrence, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; *e-mail: james.lawrence@faa.gov;* telephone (781) 238–7176; fax (781) 238–7199, for more information about this AD.

Issued in Burlington, Massachusetts, on July 19, 2010.

Thomas A. Boudreau,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Office of the Secretary

14 CFR Parts 234, 244, 250, 253, 259, and 399

[Docket No. DOT–OST–2010–0140]

RIN No. 2105–AD92

Enhancing Airline Passenger Protections

AGENCY: Office of the Secretary (OST), Department of Transportation (DOT).

ACTION: Extension of comment period on proposed rule.

SUMMARY: This action extends the comment period for an NPRM on enhancing airline passenger protections that was published in the **Federal Register** on June 8, 2010. The Department of Transportation is extending the period for interested persons to submit comments on this rulemaking from August 9, 2010, to September 23, 2010. This extension is a result of requests from a number of airline associations, one airport association, and two airlines to extend the comment period for the proposal.

DATES: Comments must be received by September 23, 2010. Comments received after this date will be considered to the extent practicable.

ADDRESSES: You may file comments identified by the docket number DOT–OST–2010–0140 by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave., SE., Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Ave., SE., between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal Holidays.
- *Fax:* (202) 493–2251.

Instructions: You must include the agency name and docket number DOT–OST–2010–0140 or the Regulatory Identification Number, RIN No. 2105–AD92, for the rulemaking at the beginning of your comment. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

Privacy Act: Anyone is able to search the electronic form of all comments received in any of our dockets by the name of the individual submitting the comment (or signing the comment if submitted on behalf of an association, a business, a labor union, etc.). You may review DOT's complete Privacy Act statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you may visit *http://DocketsInfo.dot.gov*.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* or to the street address listed above. Follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Blane A. Workie or Daeleen Chesley, Office of the Assistant General Counsel for Aviation Enforcement and Proceedings, U.S. Department of Transportation, 1200 New Jersey Ave., SE., Washington, DC 20590, 202–366–9342 (phone), 202–366–7152 (fax), *blane.workie@dot.gov* or *daeleen.chesley@dot.gov* (e-mail).

SUPPLEMENTARY INFORMATION: On June 8, 2010, the Department published a Notice of Proposed Rulemaking (NPRM) on enhancing airline passenger protections that proposed to improve the air travel environment for

consumers by: (1) Increasing the number of carriers that are required to adopt tarmac delay contingency plans and the airports at which they must adhere to the plan's terms; (2) increasing the number of carriers that are required to report tarmac delay information to the Department; (3) expanding the group of carriers that are required to adopt, follow, and audit customer service plans and establishing minimum standards for the subjects all carriers must cover in such plans; (4) requiring carriers to include their contingency plans and customer service plans in their contracts of carriage; (5) increasing the number of carriers that must respond to consumer complaints; (6) enhancing protections afforded passengers in oversales situations, including increasing the maximum denied boarding compensation airlines must pay to passengers bumped from flights; (7) strengthening, codifying and clarifying the Department's enforcement policies concerning air transportation price advertising practices; (8) requiring carriers to notify consumers of optional fees related to air transportation and of increases in baggage fees; (9) prohibiting post-purchase price increases; (10) requiring carriers to provide passengers timely notice of flight status changes such as delays and cancellations; (11) prohibiting carriers from imposing unfair contract of carriage choice-of-forum provisions; and (12) soliciting comments on options to provide greater access to air travel for persons with peanut allergies. See 75 FR 32318 (June 8, 2010). Comments on the matters proposed were to be received 60 days after publication of the NPRM, or by August 9, 2010.

We received requests for an extension of time in the comment period for this rulemaking by the Airport Council International (ACI), Association of Asia Pacific Airlines (AAPA), Association of European Airlines (AEA), Latin American & Caribbean Air Transport Association (ALTA), National Airlines Council of Canada (NACC), International Air Carrier Association (IACA), International Air Transport Association (IATA) and Societe Air France & KLM Royal Dutch. We also received a joint statement in support of IATA's request for an extension of the comment period by the Air Transport Association (ATA), Regional Airline Association (RAA) and Air Carrier Association of America (ACAA). According to these requests, the extension of time is needed so the airlines have sufficient time to review and comment on the extensive and complex proposed rule. More specifically, the petitioners note, among other things, the need to consult with multiple offices on the cost, timing and feasibility of the proposals, the need to analyze any international law implications, the need to evaluate and respond to the preliminary regulatory analysis, the need to coordinate and assess several areas addressed in this proposal against other U.S. Government proposals or requirements, the need to understand the implications in this proposal considering its breadth, and the need to address the various specific issues discussed in the preamble on which comments are sought but for which there is no corresponding proposed regulatory text. Most of the petitioners requested an additional 60 days time, a few requested an additional 90 days time, and one supported an additional 30 days time.

While we concur with the requests for an extension of the comment period, we believe that a 90-day or 60-day extension would be excessive. We have decided to grant an extension of 45 days, or until September 23, 2010, for the public to comment on the NPRM. In doing so, we have balanced the stated need for additional time for comments with the need to proceed expeditiously with this important rulemaking. We take note of the fact that with the additional 45 days we are granting here, interested parties will have a total of 105 days to comment on the proposals, which we believe is adequate time for analysis and coordination regarding the proposals. Accordingly, the Department finds that good cause exists to extend the time for comments on the proposed rule from August 9, 2010, to September 23, 2010. We do not anticipate any further extension of the comment period for this rulemaking.

Issued this 29th day of July, 2010, in Washington, DC under authority assigned to me by 14 CFR 385.17(c).

Neil R. Eisner,

Assistant General Counsel, Office of Regulation and Enforcement, U.S. Department of Transportation.

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

31 CFR Part 50

RIN 1505–AC24

Terrorism Risk Insurance Program; Final Netting

AGENCY: Departmental Offices, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of the Treasury ("Treasury") is issuing this proposed rule as part of its implementation of Title I of the Terrorism Risk Insurance Act of 2002 ("TRIA" or "the Act"), as amended by the Terrorism Risk Insurance Extension Act of 2005 ("Extension Act") and the Terrorism Risk Insurance Program Reauthorization Act of 2007 ("Reauthorization Act"). The Act established a temporary Terrorism Risk Insurance Program ("TRIP" or "Program") under which the Federal Government would share the risk of insured losses from certified acts of terrorism with commercial property and casualty insurers. The Reauthorization Act has now extended the Program until December 31, 2014. This proposed rule is the latest in a series of regulations Treasury has issued to implement the Act. The proposed rule incorporates and implements statutory requirements of the Act for the final netting of payments under the Program. In particular, the proposed rule would establish procedures by which, after the Secretary has determined that claims for the Federal share of insured losses arising from a particular Program Year shall be considered final, a final netting of payments to or from insurers will be accomplished. The rule generally builds upon previous rules issued by Treasury.

DATES: Written comments must be received on or before October 4, 2010.

ADDRESSES: Submit comments electronically through the Federal eRulemaking Portal: *http://www.regulations.gov,* or by mail (if hard copy, preferably an original and two copies) to: Terrorism Risk Insurance Program, Public Comment Record, Suite 2100, Department of the Treasury, 1425 New York Avenue, NW., Washington, DC 20220. Because paper mail in the Washington, DC area may be subject to delay, it is recommended that comments be submitted electronically. All comments should be captioned with "TRIA Final Netting Proposed Rule Comments." Please include your name, affiliation, address, e-mail address, and telephone number in your comment. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not disclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. Comments will be available for public inspection on the Federal eRulemaking Portal and by appointment at the TRIP Office. To make appointments, call (202) 622–6770 (not a toll-free number).

FOR FURTHER INFORMATION CONTACT: James P. Brown, Senior Analyst, Terrorism Risk Insurance Program, (202) 622–6770 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

On November 26, 2002, the Terrorism Risk Insurance Act of 2002 (Pub. L. 107–297, 116 Stat. 2322) was enacted. The Act was effective immediately. The Act's purposes are to address market disruptions, ensure the continued widespread availability and affordability of commercial property and casualty insurance for terrorism risk, and allow for a transition period for the private markets to stabilize and build capacity while preserving State insurance regulation and consumer protections.

Title I of the Act establishes a temporary federal program of shared public and private compensation for insured commercial property and casualty losses resulting from an act of terrorism. The Act authorizes Treasury to administer and implement the Terrorism Risk Insurance Program, including the issuance of regulations and procedures. The Program provides a federal backstop for insured losses from an act of terrorism.

The Program was originally set to expire on December 31, 2005. On December 22, 2005, the Terrorism Risk Insurance Extension Act of 2005 (Pub. L. 109–144, 119 Stat. 2660) was enacted, which extended the Program through December 31, 2007. On December 26, 2007, the Terrorism Risk Insurance Program Reauthorization Act of 2007 (Pub. L. 110–160, 121 Stat. 1839), which extends the Program through December 31, 2014, was enacted.

II. Previous Rulemaking

To assist insurers, policyholders, and other interested parties in complying with immediately applicable requirements of the Act, Treasury has issued interim guidances to be relied upon by insurers until superseded by regulations. Rules establishing general provisions implementing the Program, including key definitions, and requirements for policy disclosures and mandatory availability, can be found in Subparts A, B, and C of 31 CFR part 50. Treasury's rules applying provisions of the Act to State residual market insurance entities and State workers' compensation funds are at Subpart D of 31 CFR part 50. Rules setting forth procedures for filing claims for payment of the Federal share of compensation for insured losses are at Subpart F of 31 CFR part 50. Subpart G of 31 CFR part 50 contains rules on audit and recordkeeping requirements for insurers. Subpart H contains recoupment and surcharge procedures, while Subpart J of 31 CFR part 50 contains rules regarding the cap on annual liability. Subpart I of 31 CFR part 50 contains Treasury's rules implementing the litigation management provisions of section 107 of the Act.

III. The Proposed Rule

This proposed rule would add § 50.56 to subpart F of part 50, which comprises Treasury's regulations implementing the Act. It also proposes to amend § 50.53 of subpart F.

A. Overview

Pursuant to Section 103(e)(4) of the Act, the Secretary shall have sole discretion to determine the time at which claims relating to any insured loss or act of terrorism shall become final. Under this authority, this proposed rule would establish procedures by which, after the Secretary has determined that claims for the Federal share of insured losses arising from a particular Program Year shall be considered final, a final netting of payments to or from insurers will be accomplished.

The intent of this proposed rule is to provide a process by which Treasury would close out its claims operation for insured losses from a Program Year. The proposed rule includes some flexibility in how and when steps are taken to accomplish this in order to be able to effectively address future circumstances. As a simplified description, however, Treasury envisions that the steps in the process to close out its claims operation would likely be: (1) Treasury notifies insurers of the date by which all insured losses must be finally reported to Treasury; (2) insurers submit their certifications of loss by that date; (3) Treasury reviews the submissions and requires insurers to submit information supporting a commutation of claims for the Federal share of insured losses irrespective of claim status; (4) Treasury reviews insurer submissions and conducts claims audits as needed; and, (5) Treasury makes a final payment to each insurer that discharges Treasury's payment obligation to the insurer. The description of the proposed rule below provides more detail and discusses certain exceptions to this process for closing out the claims operation. Treasury seeks comment on all aspects of the proposed rule from interested persons and entities.

B. Description of the Proposed Rule

The major provisions of the proposed rule are as follows:

1. Final Netting Date

§ 50.56(b) of the proposed rule provides that the Secretary may determine a Final Netting Date for a Program Year. This would be the date by which an insurer must report to Treasury all underlying losses that have been reported to the insurer by its policyholders. Reporting to Treasury would be on the insurer's bordereaux in support of its Certifications of Loss. Rather than for a particular act of terrorism, the Final Netting Date would apply to a particular Program Year. Treasury believes that this is simpler and consistent operationally with how the TRIP claims process is administered, including treatment of deductibles, insured loss reporting and review of insurer claims for the Federal share of losses.

The criteria that would guide the determination of a Final Netting Date (§ 50.56(b)(1) of the proposed rule) primarily relate to amounts of insured losses that are yet to be paid, and the rate at which insured losses are developing. Certain lines of business may require longer periods for the losses to approach a final amount because of the nature of the losses. Based on discussions with experts in the field of reinsurance concerning sunset clauses in reinsurance contracts, general rules of thumb, and consideration of various statutes of limitation, Treasury believes that a reasonable period of time prior to Final Netting could be as long as 10 years, but is very likely to be in the range of 5–7 years. The proposed rule does not specify such timeframes, however. The determination of a Final Netting Date would be based on the following factors and considerations: (i) Amounts of case reserves previously reported by insurers to Treasury for open, underlying insured losses; (ii) the rate at which claims for the Federal share of compensation for insured losses are being made by insurers to Treasury; (iii) the rate at which new, underlying insured losses are being added by insurers to their bordereaux and reported; (iv) the predominant lines of business for which underlying insured losses are being reported; (v) tort and contract statutes of limitations relevant to insured losses; (vi) common business practices; (vii) issues that are delaying final resolution of insured losses; (viii) the applicability of the liability limitations and procedures under the Support Anti-terrorism by Fostering Effective Technologies Act of 2002 may

affect final resolution of insured losses; (ix) issues related to the cap on annual liability for insurer losses; (x) Treasury's claims administration costs; and (xi) such other factors as the Secretary considers important.

2. Notice of Final Netting Date

§ 50.56(b)(2) of the proposed rule provides that Treasury would give notice of a Final Netting Date and its application to a specific Program Year at least 180 days in advance of such a date.

3. Post-Final Netting Date Claims

Treasury has examined a couple of alternatives for defining and implementing the Final Netting Date. One possibility was to define the Final Netting Date as the date by which all insured losses would be considered final for purposes of claiming the Federal share. Such a specific cut-off could be problematic, however, for insured losses under litigation or otherwise unable to be settled. In addition, Treasury is concerned that this approach could encourage an imprudent rush to settle claims merely to ensure that they are eligible for the Federal share.

Another alternative, which is set forth in proposed § 50.56(c), is to define the Final Netting Date to be the cut-off for any new underlying insured losses to be reported to Treasury. After this date, supplemental certifications of loss for purposes of claiming the Federal share of compensation would only be allowed to provide updated information for the underlying losses already reported to Treasury. Such updated information may reflect a decision by a court of competent jurisdiction concerning a limitation of liability under the Support Anti-terrorism by Fostering Effective Technologies Act of 2002 (6 U.S.C. e*t seq.*). In the case of workers' compensation, where the TRIP bordereau requires the claim to be reported at the policy level with the number of claimants, but not a detailed listing of claimants, updated payment information would be allowed for the number of workers' compensation claimants already included, but no new claimants could be added. The Final Netting Date will be established long enough after the certified act of terrorism so that further significant loss development for reported losses is unlikely.

4. Commutation

A commutation generally is the payment of a lump sum present value of future loss payments in lieu of making payments for losses as they come due in the future. After the establishment of a Final Netting Date, proposed § 50.56(d) provides that Treasury may require, or consider an insurer's request for, a commutation of an insurer's future claims for the Federal share of compensation based on estimates for the underlying insured losses reported to Treasury on or before the Final Netting Date.

Commutation of reinsurance losses normally is heavily influenced by estimates of an insurer's Incurred but Not Reported (IBNR) amounts. Under Section 103(b) of TRIA, as a condition for Federal payment, a claim must first be filed with the insurer. In addition, pursuant to § 50.53(b)(2), the claim must have been paid (or must be paid within five business days upon receipt of an advance payment of the Federal share of compensation). Thus, Federal reimbursement ordinarily is based on paid losses while outstanding losses and IBNR amounts are not considered in computing the Federal share of insured losses. Nevertheless, once a Final Netting Date has been determined, it may be in Treasury's or an insurer's interest to commute the insurer's claim for the Federal share of insured losses that have been reported to the insurer and to Treasury, but have not yet been paid by the insurer.

Prior to consummating any commutation, Treasury may elect to conduct an audit of the insurer's insured losses. Treasury may require additional information to be supplied by the insurer, including an insurer's justification for a final payment amount with necessary actuarial factors and methodology, and pertinent information regarding the insurer's business relationships and other reinsurance recoverables. (*See* Procedural Requirements Section below.) If Treasury notifies an insurer of a commutation requirement, the insurer will have 90 days from the date of notification to submit material required in the notice or forfeit the right to future payments from Treasury. Treasury will evaluate such information in order to determine a final payment amount or (if applicable) an amount owed to the Government. Treasury does not anticipate mandating the use of specific discount factors in determining final payments for commuted amounts. Insurers will be required to justify the factors from which commutation amounts are derived and Treasury will consider them.

Payments of commuted amounts would not be considered to be advance payments requiring a segregated account as described in current § 50.54(d) of the TRIP claims regulations.

Treasury understands that a standard practice in commutation under insurance contracts is for the parties to enter into a commutation and release agreement that serves as the settlement and discharge of both parties' contractual obligations. Because Treasury makes payment of the Federal share of compensation under authority of the Act and not as a matter of contract, Treasury is not proposing that an insurer must sign a release as a condition for payment of a final commuted amount. The conditions for payment, including the discharge of Treasury's obligation and the circumstances under which Treasury may reclaim any payment, are set forth in the regulations. Treasury anticipates, however, that it may provide a statement with any final payment reciting those conditions.

The proposed rule provides that payment by Treasury of a final commuted amount to an insurer is final except under two circumstances. One such circumstance is where Treasury is put on notice that an insurer's claim was fraudulent or that other conditions for Federal payment were not met, in which case an insurer would be required to repay to Treasury those amounts that were not due the insurer. The other circumstance is that additional payments may be made by Treasury under the exception described below.

Because Treasury cannot consider IBNR amounts in establishing final payment, the proposed rule would allow an insurer to request Treasury's reconsideration of its insured losses if there were to be a significant increase due to losses reported to the insurer after the Final Netting Date. The proposed rule states that if within one year after the Final Netting Date, and regardless of commutation, an insurer has additional underlying insured losses that, in the absence of a Final Netting Date, would result in an increase of the Federal share of compensation to that insurer by 20% or more, the insurer may request Treasury to allow those underlying insured losses to be submitted as part of a certification of loss. Under such circumstances and provided other conditions for payment have been met, Treasury may reopen and/or extend the insurer's claim for the Federal share of compensation for insured losses for the pertinent Program Year.

5. Revision to § 50.53(b)(2)

The proposed rule proposes to amend existing § 50.53(b)(2)(i) of the TRIP claims regulations. § 50.53(b)(2) requires, in part, that an insurer certify

that the underlying losses on its bordereau either "have been paid by the insurer; or will be paid by the insurer upon receipt of an advance payment of the Federal share of compensation as soon as possible, consistent with the insurer's normal business practices, but no longer than five business days after receipt of the Federal share of compensation". The amendment adds the language "with current payment information" which restricts the certification to insured losses on the bordereau that are currently being paid by the insurer. This clarifies that the reporting of underlying losses that an insurer has not yet paid, nor is about to pay is allowed. The reporting of case reserve or other information may be appropriate even if losses are not currently being paid and this is particularly pertinent when an insurer must report to Treasury all losses reported to the insurer prior to the Final Netting Date.

IV. Procedural Requirements

Executive Order 12866, "*Regulatory Planning and Review*." This rule is a significant regulatory action for purposes of Executive Order 12866, "Regulatory Planning and Review," and has been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act. Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* it is hereby certified that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. TRIA requires all insurers, regardless of size or sophistication, which receive direct earned premiums for commercial property and casualty insurance, to participate in the Program. The Act also defines property and casualty insurance to mean commercial lines insurance, with certain specific exclusions, without any reference to the size or scope of the insurer. The proposed rule proposes that the Secretary of the Treasury may, as authorized by the Act, establish a Final Netting Date by which all underlying losses to an insurer's claim for the Federal share of compensation must be reported to Treasury. Insurers that are affected by these regulations tend to be large businesses; therefore, Treasury has determined that the rule will not affect a substantial number of small entities. In addition, Treasury has determined that the economic impact of the rule is not significant. Unless there is an act of terrorism, and a Federal sharing of compensation for insured losses, there is no economic impact at all. The only potential economic impact on insurers would be if they were to receive less than a full Federal share of compensation that would be due in the absence of a Final Netting process. The Final Netting Date, as proposed, will be established long enough after the certified act of terrorism so that further significant loss development for reported losses is unlikely. The rule proposes to provide for commutation of remaining losses, and includes a provision that allows for a reopening of an insurer's claim for the Federal share of losses if significant new claims are reported to the insurer subsequent to Final Netting. The economic impact on all commercial property and casualty insurers (including any that might be small entities) should thus be minimal. A regulatory flexibility analysis is therefore not required.

Paperwork Reduction Act. The collection of information contained in this proposed rule has been submitted to the Office of Management and Budget (OMB) for review under the requirements of the Paperwork Reduction Act, 44 U.S.C. 3507(d). Organizations and individuals desiring to submit comments concerning the collection of information in the proposed rule should direct them to: Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503. A copy of the comments should also be sent to Treasury at the addresses previously specified. Comments on the collection of information should be received by October 4, 2010.

Treasury specifically invites comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the mission of Treasury, and whether the information will have practical utility; (b) the accuracy of the estimate of the burden of the collections of information (*see below*); (c) ways to enhance the quality, utility, and clarity of the information collection; (d) ways to minimize the burden of the information collection, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to maintain the information.

Comments are being sought with respect to the collection of information in connection with commutation as proposed at § 50.56(d)(2). The required information and process follow normal business procedures of insurers interacting with their reinsurers. Information would include an insurer's justification for a final payment amount with necessary actuarial factors and methodology, and pertinent information regarding the insurer's business relationships and other reinsurance recoverables. Information must be supplied in enough detail to clearly show the expected future loss payments, how the present value amount has been determined, and reconciliation to the last Certification of Loss. Treasury will evaluate the submission in order to determine a final payment amount or (if applicable) an amount owed to the Government.

If an act of terrorism is certified under the Act, the number of insurers with losses will be determined by the size and nature of the certified act of terrorism. Because of the extreme uncertainty regarding any such event, a "best estimate" has been developed based on the considered judgment of Treasury. This estimate has 100 insurers sustaining insured losses. Out of this initial number, Treasury estimates that there would be 15 insurers involved in commutation after the determination of a Final Netting Date. The necessary data are routinely generated and reported in the insurance industry. Treasury estimates that an insurer would need 40 hours, on average, to assemble and analyze data and develop a submission to Treasury for commutation. The estimated total onetime burden would be 600 hours (15 insurers times 40 hours). At a blended, fully loaded hourly rate of $75, the cost would be $45,000.

List of Subjects in 31 CFR Part 50

Terrorism risk insurance.

Authority and Issuance

For the reasons set forth above, 31 CFR Part 50 is proposed to be amended as follows:

PART 50—TERRORISM RISK INSURANCE PROGRAM

1. The authority citation for part 50 continues to read as follows:

Authority: 5 U.S.C. 301; 31 U.S.C. 321; Title I, Pub. L. 107–297, 116 Stat. 2322, as amended by Pub. L. 109–144, 119 Stat. 2660 and Pub. L. 110–160, 121 Stat. 1839 (15 U.S.C. 6701 note).

2. In § 50.53, paragraph (b)(2)(i) is revised to read as follows:

§ 50.53 Loss certifications.

* * * * *

(b) * * *

(2) * * *

(i) The underlying insured losses listed with current payment information on the bordereau filed pursuant to § 50.53(b)(1) either: Have been paid by the insurer; or will be paid by the

insurer upon receipt of an advance payment of the Federal share of compensation as soon as possible, consistent with the insurer's normal business practices, but not longer than five business days after receipt of the Federal share of compensation;

* * * * *

3. Add § 50.56 to subpart F to read as follows:

§ 50.56 Final Netting

(a) *General.* Pursuant to Section 103(e)(4) of the Act, the Secretary shall have sole discretion to determine the time at which claims relating to any insured loss or act of terrorism shall become final.

(b) *Final Netting Date.* The Secretary may determine a Final Netting Date for a Program Year, which for purposes of this section is the date on or before which an insurer must report to Treasury all underlying insured losses that have been reported by its policyholders on the insurer's bordereaux (*see* § 50.53) in support of its Certifications of Loss for the Program Year.

(1) *Criteria for Final Netting Date.* The establishment of a Final Netting Date will be based on factors and considerations including:

(i) Amounts of case reserves previously reported by insurers to Treasury for open, underlying insured losses;

(ii) The rate at which claims for the Federal share of compensation for insured losses are being made by insurers to Treasury;

(iii) The rate at which new, underlying insured losses are being added by insurers to their bordereaux and reported;

(iv) The predominant lines of business for which underlying insured losses are being reported;

(v) Tort and contract statutes of limitations relevant to insured losses;

(vi) Common business practices;

(vii) Issues that are delaying final resolution of insured losses;

(viii) The applicability of the liability limitations and procedures under the Support Anti-terrorism by Fostering Effective Technologies Act of 2002 may affect final resolution of insured losses;

(ix) Issues related to the cap on annual liability for insurer losses;

(x) Treasury's claims administration costs; and

(xi) Such other factors as the Secretary considers important.

(2) *Notice of Final Netting Date.* Treasury shall announce and publish in the **Federal Register**, or in another manner Treasury deems appropriate, notice of a Final Netting Date and its application to a specific Program Year at least 180 days in advance of such date.

(c) *Post-Final Netting Date Claims.* After the Final Netting Date, insurers may only make further claims for the Federal share of compensation for insured losses by submission of Supplemental Certifications of Loss with updated information on underlying insured losses previously reported to Treasury. Such updated information may reflect a decision by a court of competent jurisdiction concerning a limitation of liability under the Support Anti-terrorism by Fostering Effective Technologies Act of 2002 (6 U.S.C. *et seq.*) In the case of workers' compensation losses, the insurer may provide updated information based on the number of workers' compensation claimants previously reported. An insurer may not report any new underlying insured losses, or increased workers' compensation loss amounts based on an increase in workers' compensation claimants, to Treasury after a Final Netting Date, except as provided in this section.

(d) *Commutation.* A commutation is the payment by Treasury of a lump sum present value of future payments to an insurer in lieu of making payments as they come due in the future, as provided in this section.

(1) In lieu of continued submission of Certifications of Loss after the Final Netting Date as provided in paragraph (c) of this section, Treasury may require, or consider an insurer's request for, a commutation of an insurer's future claims for the Federal share of compensation based on estimates for the underlying insured losses reported to Treasury on or before the Final Netting Date. The payment by Treasury of a final commuted amount to an insurer will discharge Treasury from all further liabilities to the insurer for the Federal share of compensation for insured losses for the applicable Program Year. In the case of an affiliated group of insurers, the requirements of § 50.54(f) apply, provided that payment of the final commuted amount to the designated insurer of the affiliated group discharges Treasury's payment obligation to the insurers in the affiliated group for insured losses for the applicable Program Year.

(2) If future claims are to be commuted, Treasury may require additional information to be supplied by the insurer, including an insurer's justification for a final payment amount with necessary actuarial factors and methodology, and pertinent information regarding the insurer's business relationships and other reinsurance recoverables. Insurers will be required to justify discount and other factors from which the final payment amounts are derived. If Treasury notifies an insurer of a commutation requirement, the insurer will have 90 days from the date of notification to submit material required in the notice or forfeit the right to future payments from Treasury. Treasury will evaluate such information in order to determine a final payment amount or (if applicable) an amount owed to the Government. Treasury may determine that it will not consider commutation until it has completed an audit of an insurer's insured losses.

(3) Payments of commuted amounts are not considered to be advance payments requiring a segregated account as described in § 50.54(d).

(4) Notwithstanding § 50.50(e), a payment by Treasury of a final commuted amount to an insurer is final unless:

(i) Treasury is put on notice that an insurer's claim was fraudulent or that other conditions for Federal payment were not met, in which case the insurer will be required to repay amounts that were not due; or

(ii) The exception in paragraph (e) of this section applies, in which case Treasury may make additional payments for insured losses, but only under the conditions described in paragraph (e).

(e) *Exception.* If within one year after the Final Netting Date, and regardless of commutation, an insurer has additional underlying reported insured losses that, in the absence of a Final Netting Date, would result in an increase of the Federal share of compensation to that insurer by 20% or more, the insurer may request Treasury to allow those underlying insured losses to be submitted as part of a certification of loss. Under such circumstances and provided other conditions for payment have been met, Treasury may reopen and/or extend the insurer's claim for the Federal share of compensation for insured losses for the pertinent Program Year.

Dated: July 14, 2010.

Michael S. Barr,

Assistant Secretary (Financial Institutions).

BILLING CODE 4810–25–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2010–0450; FRL–9182–3]

Approval and Promulgation of Air Quality Implementation Plans; Minnesota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve Minnesota's request to amend its State Implementation Plan (SIP) for sulfur dioxide (SO_2). The Minnesota Pollution Control Agency submitted the SIP revision request to EPA on May 7, 2010. The proposed approval revises the Minnesota SIP by updating information regarding the heat and steam distributor facility located in Fridley, Minnesota. The source, formerly operated as United Defense, LP, Inc. was sold and is now operating as ELT Minneapolis, LLC. The revision replaces the joint Title I/Title V document currently approved in the SIP for the facility to reflect the change in ownership. These revisions do not change any of the SO_2 control requirements and will not result in an increase in SO_2 emissions at the facility because no emission limits were increased.

DATES: Comments must be received on or before **September 2, 2010.**

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2010–0450, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *E-mail: bortzer.jay@epa.gov.*
3. *Fax:* (312) 629–2054.
4. *Mail:* Jay Bortzer, Chief, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.
5. *Hand Delivery:* Jay Bortzer, Chief, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604. Such deliveries are only accepted during the Regional Office normal hours of operation, and special arrangements should be made for deliveries of boxed information. The Regional Office official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

Please see the direct final rule which is located in the Rules section of this **Federal Register** for detailed instructions on how to submit comments.

FOR FURTHER INFORMATION CONTACT: Charles Hatten, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6031, *hatten.charles@epa.gov.*

SUPPLEMENTARY INFORMATION: In the Rules section of this **Federal Register,** EPA is approving the State's SIP submittal as a direct final rule without prior proposal because EPA views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register.**

Dated: July 19, 2010.

Approval and Promulgation of Implementation Plans and Designations of Areas for Air Quality Planning Purposes; Tennessee: Knoxville; Determination of Attainment for the 1997 8-Hour Ozone Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On February 19, 2010, the State of Tennessee, through the Tennessee Department of Environment and Conservation (TDEC), submitted a request to EPA to make a determination that the Knoxville, Tennessee nonattainment area has attained the 1997 8-hour ozone national ambient air quality standards (NAAQS) based on quality assured, quality controlled monitoring data from 2007–2009. The Knoxville, Tennessee 1997 8-hour ozone nonattainment area (hereafter referred to as the "Knoxville Area") is comprised of Anderson, Blount, Jefferson, Knox, Loudon and Sevier Counties in their entireties and a portion of Cocke County (Great Smoky Mountain National Park) in Tennessee. In this action, EPA is proposing to determine that the Knoxville Area has attained the 1997 8-hour ozone NAAQS. This proposed determination is based upon complete, quality assured, quality controlled, and certified ambient air monitoring data for the years 2007–2009 showing that the Knoxville Area has monitored attainment of the 1997 8-hour ozone NAAQS. Preliminary air quality monitoring data available for 2010 are consistent with continued attainment. If this proposed determination is made final, the requirement for the State of Tennessee to submit an attainment demonstration and associated reasonably available control measures (RACM), a reasonable further progress (RFP) plan, contingency measures, and other planning State Implementation Plans (SIPs) related to attainment of the 1997 8-hour ozone NAAQS for the Knoxville, Tennessee 8-hour ozone nonattainment area, shall be suspended for as long as the Knoxville Area continues to meet the 1997 8-hour ozone NAAQS.

DATES: Written comments must be received on or before September 2, 2010.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2007–0228 by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *E-mail: benjamin.lynorae@epa.gov.*
3. *Fax:* (404) 562–9019.
4. *Mail:* "EPA–R04–OAR–2007–0228," Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.
5. *Hand Delivery or Courier:* Lynorae Benjamin, Chief, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency,

Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding Federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R04–OAR–2007–0228. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or by e-mail information that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *i.e.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Twunjala Bradley, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Ms. Bradley may be reached by phone at (404) 562–9352 or via electronic mail at *bradley.twunjala@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What action is EPA taking?
II. What is the effect of this action?
III. What is the background for this action?
IV. What is EPA's analysis of the relevant air quality data?
V. Proposed Action
VI. Statutory and Executive Order Reviews

I. What action is EPA taking?

EPA is proposing to determine that the Knoxville Area has attained the 1997 8-hour ozone NAAQS. The Knoxville Area is comprised of Anderson, Blount, Jefferson, Knox, Loudon and Sevier Counties in their entireties and a portion of Cocke County (Great Smoky Mountains National Park) in Tennessee. EPA's determination is based upon complete, quality assured, quality controlled, and certified ambient air monitoring data for the years 2007–2009 showing that the Knoxville Area has monitored attainment of the 1997 8-hour ozone NAAQS. Preliminary air quality monitoring data available for 2010 are consistent with continued attainment. On March 12, 2008, EPA promulgated a revised 8-hour ozone NAAQS (also known as the 2008 8-hour ozone NAAQS). Subsequently, on January 19, 2010, EPA published a proposed rule to reconsider the 2008 8-hour ozone NAAQS, and to promulgate a revised (2010) 8-hour ozone NAAQS. Today's rulemaking does not address requirements for, or future revisions to, the 2008 or proposed 2010 8-hour ozone NAAQS.

II. What is the effect of this action?

If this determination is made final, under the provisions of EPA's ozone implementation rule (see 40 CFR 51.918), the requirements for the State of Tennessee to submit an attainment demonstration and associated RACM, RFP plan, contingency measures,[1] and any other planning SIPs related to attainment of the 1997 8-hour ozone NAAQS for the Knoxville Area, shall be suspended for as long as the Area continues to meet the 1997 8-hour ozone NAAQS.

On January 16, 2009 (74 FR 2936), EPA published a proposed rulemaking to address, among other issues, the United States Court of Appeals for the District of Columbia Circuit's (DC Circuit) vacatur of the classification system that EPA used to designate a subset of initial 1997 8-hour ozone nonattainment areas under title I, part D, subpart 1 of the Clean Air Act (CAA). In that rulemaking, EPA proposed that all areas designated nonattainment for the 1997 8-hour ozone NAAQS under subpart 1 would be classified as subpart 2 areas (hereafter referred to as the "Subpart 1/Subpart 2 1997 8-Hour Ozone Rulemaking"). The Knoxville Area is among those areas that would be classified if EPA's proposal is finalized. EPA has not yet completed its final rulemaking action for the Subpart 1/Subpart 2 1997 8-Hour Ozone Rulemaking. When the Subpart 1/Subpart 2 1997 8-Hour Ozone Rulemaking is finalized, and if the Knoxville Area continues in attainment for the 1997 8-hour ozone NAAQS, EPA will address in a future rulemaking the consequences of a determination of attainment for any requirements to which the Knoxville Area becomes subject as a result of its reclassification. If after the Knoxville Area is classified under Subpart 2, EPA determines in a future rulemaking that the Knoxville Area continues to be in attainment, then the obligation to submit the pertinent attainment-related requirements for its new classification would be suspended in accordance with 40 CFR 50.918.

As further discussed below, the proposed determination (the subject of this rulemaking) for the Knoxville Area would: (1) Suspend the requirement to submit an attainment demonstration and associated RACM (including reasonably available control technologies), RFP plan, contingency measures, and any other planning SIPs related to attainment of the 1997 8-hour ozone NAAQS; (2) continue until such time, if any, that EPA subsequently determines that the Knoxville Area has violated the 1997 8-hour ozone NAAQS; (3) be separate from, and not influence or otherwise affect, any future designation determination or

[1] Contingency measures associated with a maintenance plan (such as if the State opts to redesignate this Area to attainment for the 1997 8-hour ozone NAAQS) would still be required.

requirements for the Knoxville Area based on the revised or reconsidered 2008 8-hour ozone NAAQS or the proposed 2010 ozone NAAQS; and (4) remain in effect regardless of whether EPA designates the Knoxville Area as a nonattainment area for purposes of the revised or reconsidered 2008 8-hour ozone NAAQS or proposed 2010 8-hour ozone NAAQS.[2] Furthermore, as described below, a final clean data determination is not equivalent to the redesignation of the Knoxville Area to attainment for the 1997 8-hour ozone NAAQS.

If this rulemaking is finalized and EPA subsequently determines, after notice-and-comment rulemaking in the **Federal Register**, that the Knoxville Area has violated the 1997 8-hour ozone NAAQS, the basis for the suspension of the specific requirements, set forth at 40 CFR 51.918, would no longer exist, and the Knoxville Area would thereafter have to address pertinent requirements.

The determination that EPA proposes with this **Federal Register** notice is not equivalent to a redesignation of the Knoxville Area to attainment. Finalizing this proposed action would not constitute a redesignation of the Area to attainment of the 1997 8-hour ozone NAAQS under section 107(d)(3) of the CAA. Further, finalizing this proposed action does not involve approving maintenance plans for this Area as required under section 175A of the CAA, or would a determination that the Area has met all other requirements for redesignation. The designation status of the Knoxville Area would remain nonattainment for the 1997 8-hour ozone NAAQS until such time as EPA determines that it meets the CAA requirements for redesignation to attainment. The State of Tennessee is currently working on a redesignation request and maintenance plan to change the Knoxville Area's status from nonattainment to attainment for the 1997 8-hour ozone NAAQS. EPA will consider Tennessee's redesignation request and maintenance plan for the Knoxville Area in a rulemaking separate from today's proposed action.

This proposed action, if finalized, is limited to a determination that the Knoxville Area has attained the 1997 8-hour ozone NAAQS. As noted above, the 1997 8-hour ozone NAAQS became effective on July 18, 1997 (62 FR 38894), and are set forth at 40 CFR 50.10. On March 12, 2008, EPA promulgated revised 8-hour ozone NAAQS. Subsequently, on January 19, 2010, EPA published a proposed rule to reconsider the 2008 8-hour ozone NAAQS (75 FR 2938) and to propose a revised 2010 NAAQS. In view of these actions, EPA extended the deadline to make designation determinations for the 2008 8-hour ozone NAAQS. EPA has not yet made any designation determination for the Knoxville Area based on the revised 2008 8-hour ozone or proposed 2010 ozone NAAQS. Today's proposed determination for the Knoxville Area, and any final determination, will have no effect on, and is not related to, any future designation determination that EPA may make based on the revised or reconsidered 2008 or proposed 2010 8-hour ozone NAAQS for the Knoxville Area. Conversely, any future designation determination for the Knoxville Area, based on the revised or reconsidered 2008 or 2010 proposed 8-hour ozone NAAQS, will not have any effect on the determination proposed by this notice.

If this proposed determination is made final and the Knoxville Area continues to demonstrate attainment with the 1997 8-hour ozone NAAQS, the obligation for the State of Tennessee to submit for the Knoxville Area an attainment demonstration and associated RACM, RFP plan, contingency measures, and any other planning SIPs related to attainment of the 1997 8-hour ozone NAAQS will remain suspended regardless of whether EPA designates the Knoxville Area as a nonattainment area for purposes of the revised or reconsidered 2008 or proposed 2010 8-hour ozone NAAQS. Once the Knoxville Area is designated for the revised or reconsidered 2008 or proposed 2010 NAAQS, it will have to meet all applicable requirements for that designation.

III. What is the background for this action?

On July 18, 1997 (62 FR 38894), EPA promulgated a revised 8-hour ozone standard of 0.08 parts per million (ppm) for both the primary and secondary standards. These standards are more stringent than the previous 1-hour ozone standards. Under EPA regulations at 40 CFR part 50, the 8-hour ozone NAAQS is attained when the 3-year average of the annual fourth-highest daily maximum 8-hour average ambient air quality ozone concentrations is less than or equal to 0.08 ppm (*i.e.,* 0.084 ppm when rounding is considered). Ambient air quality monitoring data for the 3-year period must meet a data completeness requirement. The ambient air quality monitoring data completeness requirement is met when the average percent of days with valid ambient monitoring data is greater than 90 percent, and no single year has less than 75 percent data completeness as determined in Appendix I of part 50. Specifically, section 2.3 of 40 CFR part 50, Appendix I, "*Comparisons with the Primary and Secondary Ozone Standards*" states:

"The primary and secondary ozone ambient air quality standards are met at an ambient air quality monitoring site when the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration is less than or equal to 0.08 ppm. The number of significant figures in the level of the standard dictates the rounding convention for comparing the computed 3-year average annual fourth-highest daily maximum 8-hour average ozone concentration with the level of the standard. The third decimal place of the computed value is rounded, with values equal to or greater than 5 rounding up. Thus, a computed 3-year average ozone concentration of 0.085 ppm is the smallest value that is greater than 0.08 ppm."

On April 30, 2004 (69 FR 23857), EPA published its air quality designations and classifications for the 1997 8-hour ozone NAAQS based upon air quality monitoring data from those monitors for calendar years 2001–2003 (84 FR 23858). These designations became effective on June 15, 2004. The Knoxville Area is comprised of a portion of Cocke County (Great Smoky Mountains National Park), and the entire counties of Anderson, Blount, Jefferson, Knox, Loudon and Sevier; and was designated nonattainment for the 1997 8-hour ozone NAAQS (*see* 40 CFR part 81).

On February 19, 2010, the State of Tennessee, through TDEC, submitted a request to EPA to make a determination that the Knoxville Area has attained the 1997 8-hour ozone NAAQS based on complete, quality assured, quality controlled monitoring data from 2007 through 2009.

IV. What is EPA's analysis of the relevant air quality data?

EPA has reviewed the three most recent years of complete, certified, quality assured and quality controlled ambient air monitoring data for the 1997 8-hour ozone NAAQS, consistent with the requirements contained in 40 CFR part 50, as recorded in the EPA Air Quality System (AQS) database for the Knoxville Area. Based on that review, EPA has concluded that the Knoxville Area attained the 1997 8-hour ozone NAAQS during the 2007–2009 monitoring period. Under EPA

[2] As noted above, at this time the proposed determination of attainment, if finalized, would suspend only those requirements related to attainment that are currently applicable to the Knoxville Area.

regulations at 40 CFR 50.10, the 1997 8-hour primary and secondary ozone ambient air quality standards are met at an ambient air quality monitoring site when the three-year average of the annual fourth-highest daily maximum 8-hour average concentration is less than or equal to 0.08 ppm, as determined in accordance with appendix I of 40 CFR part 50.

Table 1 shows the design values (the metrics calculated in accordance with 40 CFR part 50, appendix I, for determining compliance with the NAAQS) for the 1997 8-hour ozone NAAQS for the Knoxville Area monitors for the years 2007–2009.

TABLE 1—DESIGN VALUES FOR COUNTIES IN THE KNOXVILLE, TENNESSEE NONATTAINMENT AREA FOR THE 1997 8-HOUR OZONE NAAQS

Location	AQS site ID	2007 (ppm)	2008 (ppm)	2009 (ppm)	2007–2009 design value (ppm)
Anderson County	Freels Bend Study Area (470010101–1)	0.080	0.073	0.065	0.072
Blount County	Look Rock, GSMNP (470090101–1)	0.088	0.082	0.069	0.079
	Cades Cove, GSMNP (470090102–1)	0.074	0.071	0.062	0.069
Jefferson County	1188 Lost Creek Road (470890002–1)	0.085	0.075	0.068	0.076
Knox County	9315 Rutledge Pike (470930021–1))	0.087	0.079	0.066	0.077
	4625 Mildred Drive (470931020–1)	0.092	0.086	0.068	0.082
Loudon County	130 Webb Drive (471050109–1)	0.088	0.077	0.067	0.077
Sevier County	Cove Mountain, GSMNP (471550101–1)	0.088	0.079	0.070	0.079

EPA's review of these data indicates that the Knoxville Area has met and continues to meet the 1997 8-hour ozone NAAQS. Preliminary air quality monitoring data available for 2010 also continue to demonstrate attainment. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

V. Proposed Action

EPA is proposing to determine that the Knoxville, Tennessee, 1997 8-hour nonattainment area has attained the 1997 8-hour ozone NAAQS based on 2007–2009 complete, quality-assured, quality-controlled and certified monitoring data. As provided in 40 CFR 51.918, if EPA finalizes this determination, it would suspend the requirements for the State of Tennessee to submit, for the Knoxville Area, an attainment demonstration and associated RACM, RFP plan, contingency measures, and any other planning SIPs related to attainment of the 1997 8-hour ozone NAAQS as long as the Area continues to attain the 1997 8-hour ozone NAAQS.

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission or state request that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions or state request, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this action does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the impacted area is not in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Determination of Attainment for PM_{10} for the Las Vegas Valley Nonattainment Area, NV

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to determine that the Las Vegas Valley nonattainment area in Nevada attained the National Ambient Air Quality Standard (NAAQS) for particulate matter with an aerodynamic diameter of less than or equal to a nominal ten micrometers (PM_{10}) by the applicable attainment date (December 31, 2006), and that the Las Vegas Valley nonattainment area is currently attaining the standard.

DATES: Comments must be received on or before **September 2, 2010.**

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2010–0590, by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions.

2. *E-mail: tax.wienke@epa.gov.*

3. *Mail or deliver:* Wienke Tax, Air Planning Office, EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Please see the direct final rule which is located in the Rules section of this **Federal Register** for detailed instructions on how to submit comments.

FOR FURTHER INFORMATION CONTACT: Wienke Tax at telephone number: (415) 947–4192, e-mail address: *tax.wienke@epa.gov,* or the above EPA, Region IX address.

SUPPLEMENTARY INFORMATION: For further information, please see the direct final action, of the same title, which is located in the Rules section of this **Federal Register**. EPA is approving the attainment determination as a direct final rule without prior proposal because EPA views this as a noncontroversial action and anticipates no adverse comments. A detailed rationale for the approval is set forth in the preamble to the direct final rule. If EPA receives no adverse comments, EPA will not take further action on this proposed rule.

If EPA receives adverse comments, EPA will withdraw the direct final rule and it will not take effect. EPA will address all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. Please note that if we receive adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

Dated: July 21, 2010.

Keith Takata,

Acting Regional Administrator, EPA Region IX.

Oil Pollution Prevention; Spill Prevention, Control, and Countermeasure (SPCC) Rule—Proposed Amendments

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; compliance date amendment.

SUMMARY: The U.S. Environmental Protection Agency (EPA or the Agency) is proposing to amend the date by which certain facilities must prepare or amend their Spill Prevention, Control, and Countermeasure (SPCC) Plans, and implement those Plans. This action would allow additional time for those affected in the regulated community to understand the revisions to the SPCC rule finalized in December 2008 and November 2009. In light of the recent uncertainty surrounding EPA's review of the final amendments to the December 2008 rule and the delay of that rule's effective date, the Agency is proposing to provide an additional year for certain facilities, with a new compliance date of November 10, 2011. Additionally, the Agency is proposing to further delay the compliance date for facilities with milk containers, associated piping and appurtenances that are constructed according to the current applicable 3–A Sanitary Standards, and subject to the current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to the current applicable PMO. The delay would allow the Agency to take final action on a January 15, 2009 action that proposed to exempt these containers from the SPCC requirements. The compliance date would be delayed one year from the effective date of a final rule specifically addressing SPCC requirements for these milk containers, associated piping and appurtenances, or as specified by a rule that otherwise establishes a new compliance date for these facilities. Both the extension and the delay would provide sufficient time for facilities to undertake the actions necessary to prepare or amend their SPCC Plans, as well as implement them. However, EPA is not proposing to extend the compliance date for drilling, production and workover facilities that are offshore or that have an offshore component, or for onshore facilities required to submit Facility Response Plans (FRPs).

DATES: Comments on this proposed rule must be received by August 18, 2010.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OPA–2009–0880, by one of the following methods:

(1) *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.

(2) *E-mail: Docket.RCRA@epa.gov,* Attention Docket ID No. EPA–HQ–OPA–2009–0880.

(3) *Fax:* 202–566–9744, Attention Docket ID No. EPA–HQ–OPA–2009–0880.

(4) *Mail:* EPA Docket Center (EPA/DC), Docket ID No. EPA–HQ–OPA–2009–0880, Mail Code 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

(5) *Hand Delivery:* EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington DC 20460. Attention Docket ID No. EPA–HQ–OPA–2009–0880. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail.

The Federal regulations.gov Web site is an "anonymous access" system, which means that EPA will not know your identity or contact information unless you provide it in the body of your comment. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of the comment and along with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the docket index at

http://www.regulations.gov. Although listed in the index, some information is not publicly available (*i.e.,* CBI or other information whose disclosure is restricted by a statute). Certain material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form.

Publicly available docket materials are available either electronically at *http://www.regulations.gov* or in hard copy at the EPA Docket Center, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number to make an appointment to view the docket is (202) 566–0276.

FOR FURTHER INFORMATION CONTACT: For general information on the SPCC rule, contact the Superfund, TRI, EPCRA, RMP and Oil Information Center at (800) 424–9346 or TDD (800) 553–7672 (hearing impaired). In the Washington, DC metropolitan area, call (703) 412–9810 or TDD (703) 412–3323. For more detailed information on specific aspects of this proposed rule, contact either Vanessa Principe at (202) 564–7913 (*principe.vanessa@epa.gov*) or Mark W. Howard at (202) 564–1964 (*howard.markw@epa.gov*), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460–0002, Mail Code 5104A.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

In the table below, EPA is providing a list of potentially affected entities. However, this proposed action may affect other entities not listed below. The Agency's goal is to provide a guide for readers to consider regarding entities that potentially could be affected by this action. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding section titled **FOR FURTHER INFORMATION CONTACT**.

B. Tips for Preparing Your Comments

When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree, suggest alternatives, and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible.
- Make sure to submit your comments by the comment period deadline identified.

II. Authority

33 U.S.C. 1251 *et seq.*; 33 U.S.C. 2720; E.O. 12777 (October 18, 1991), 3 CFR, 1991 Comp., p. 351.

III. Background

On July 17, 2002, the Agency published a final rule that amended the Spill Prevention, Control and Countermeasure (SPCC) regulation (67 FR 47042). The rule became effective on August 16, 2002. The final rule included compliance dates in § 112.3 for preparing, amending, and implementing SPCC Plans. The dates for complying with amendments to the SPCC

regulations have been amended a number of times: On January 9, 2003 (68 FR 1348), on April 17, 2003 (68 FR 18890), on August 11, 2004 (69 FR 48794), on February 17, 2006 (71 FR 8462), on May 16, 2007 (72 FR 27444), and again on June 19, 2009 (74 FR 29136). These extensions alleviated the need for individual extension requests and provided additional time for the regulated community to, among other things: Understand the July 2002 SPCC amendments and the implications of the litigation (see 69 FR 29728, May 25, 2004 and 73 FR 71941, November 26, 2008); allow those potentially affected in the regulated community an opportunity to make changes to their facilities and to their SPCC Plans necessary to comply with amendments to the SPCC rule as finalized in December 2006, December 2008, and November 2009; and to understand the material presented in the *SPCC Guidance for Regional Inspectors* before preparing or amending their SPCC Plans. All of these changes and amendments were promulgated to provide increased clarity, to tailor requirements to particular industry sectors, and to streamline certain requirements for those facility owners or operators subject to the rule. The current date under § 112.3(a), (b) and (c) by which owners/operators of facilities must prepare or amend their SPCC Plans, and implement those Plans, is November 10, 2010.

In accordance with the January 20, 2009 White House memorandum entitled, "Regulatory Review," and the memorandum from the Office of Management and Budget entitled, "Implementation of Memorandum Concerning Regulatory Review" (M–09–08, January 21, 2009) (OMB memorandum), the effective date of the December 2008 rulemaking was delayed until April 4, 2009 (74 FR 5900, February 3, 2009) and then until January 14, 2010 (74 FR 14736, April 1, 2009). The Agency took this action to ensure that the rule reflected proper consideration of all relevant facts. In the February 3, 2009 notice, EPA requested public comment on the extension of the effective date and its duration, and on the regulatory amendments contained in the December 2008 final rule. Upon reviewing the record for the amendments and the additional comments, EPA promulgated further amendments to the SPCC rule on November 13, 2009 (74 FR 58784), making limited changes to the December 2008 amendments. The effective date for both the December 5, 2008 and the November 13, 2009 final rule is January 14, 2010, with a compliance date of November 10, 2010. Because of the uncertainty that surrounded EPA's review of the final amendments to the December 5, 2008 rule, publication of final rule amendments on November 13, 2009 and the delay of the effective date, the Agency is now proposing to further extend the compliance date for certain facilities.

On January 15, 2009, EPA proposed to exempt from the SPCC requirements milk containers, associated piping and appurtenances provided they are constructed according to current applicable 3–A Sanitary Standards, and are subject to the current applicable PMO or a State dairy regulatory requirement equivalent to the current applicable PMO (74 FR 2461). The Agency also proposed that the capacity of these milk containers would not be included in a facility's total oil storage capacity calculation. This action proposes to further delay the compliance date for facilities that would be impacted by the proposed rule to exempt milk containers, associated piping and appurtenances.

IV. Proposal To Amend Compliance Date

Under the current provisions in § 112.3(a), the owner or operator of a facility that was in operation on or before August 16, 2002 must maintain the facility's SPCC Plan, make any necessary amendments to the Plan, and fully implement it by November 10, 2010; the owner or operator of a facility that came into operation after August 16, 2002, but before November 10, 2010, must prepare and fully implement an SPCC Plan on or before November 10, 2010. Under § 112.3(b), the owner or operator of a facility (excluding oil production facilities) that becomes operational after November 10, 2010 must prepare and implement a Plan before beginning operations; the owner or operator of an oil production facility that becomes operational after November 10, 2010 must prepare and implement a Plan within six months after beginning operations. In addition, § 112.3(c) requires the owners and operators of onshore and offshore mobile or portable facilities to prepare, implement, and maintain an SPCC Plan, and to amend it, if necessary to ensure compliance with this part, on or before November 10, 2010. The owner or operator of any onshore or offshore mobile or portable facility that becomes operational after November 10, 2010, must prepare and implement a Plan before beginning operations.

This proposed rule would amend the dates in § 112.3(a), (b) and (c) by which the owners/operators of facilities (except drilling, production or workover facilities that are offshore or that have an offshore component, and all onshore facilities required to have and submit FRPs [1]) must prepare or amend their SPCC Plans, and implement those Plans, to November 10, 2011, which is one year from the current SPCC compliance date of November 10, 2010. This proposed extension of the compliance date does not apply to drilling, production or workover facilities that are completely offshore or that have both onshore and offshore components (*e.g.,* an oil production facility with offshore wellheads connected to an onshore tank battery by submerged flowlines). For offshore drilling, production or workover facilities, the Agency is concerned about the need to have the most up-to-date SPCC Plans due to the unusual combination of characteristics of these facilities: Continuous flow of oil at the facility, potential discharges being limited only by the capacity and pressure of the underground reservoir, and discharges that would have immediate and direct impact on water.

For onshore facilities, the Agency is concerned that further extending the existing compliance date for facilities with large oil storage capacities could further increase the potential to cause substantial harm if a discharge were to occur. Onshore facilities with large oil storage capacities have the potential to cause substantial harm as identified under the FRP regulation (40 CFR 112.20 and 112.21). FRP facilities are those with storage capacities of 1 million gallons or more that could cause substantial harm [2] or those with storage capacities at or above 42,000 gallons and that transfer oil to or from a vessel over water. The Agency believes that FRP facilities should also have the most up-to-date SPCC Plans. It should be noted the Agency has not changed any

[1] Offshore FRP facilities are addressed in the exception to the compliance date extension as part of the drilling, production or workover facilities that are offshore or that have an offshore component.

[2] A facility may pose "substantial harm" according to the FRP rule if it (1) has a total oil storage capacity greater than or equal to 42,000 gallons and it transfers oil over water to/from vessels; or (2) has a total oil storage capacity greater than or equal to one million gallons and meets one of the following conditions: (a) Does not have sufficient secondary containment for the capacity of the largest aboveground oil storage tank in each aboveground storage area; (b) is located at a distance such that a discharge from the facility could cause "injury" to fish, wildlife, and sensitive environments; (c) is located at a distance such that a discharge from the facility would shut down a public drinking water intake; or (d) has had, within the past five years, a reportable discharge greater than or equal to 10,000 gallons.

compliance dates with respect to the FRP regulations. Therefore, EPA is not proposing to extend the compliance date for drilling, production or workover facilities that are offshore or that have an offshore component, or all onshore facilities required to submit FRPs, due to the threats these facilities pose of significant oil spills to waters of the U.S. or adjoining shorelines.

The Agency is also proposing to delay the compliance date for facilities with milk containers, associated piping and appurtenances. The delay would be effective for facilities with milk containers that are constructed according to the current applicable 3–A Sanitary Standards, and subject to the current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to the current applicable PMO. The delay would be for one year from the effective date of a final rule addressing the SPCC requirements specifically for these milk containers, associated piping and appurtenances, or as specified by a rule that otherwise establishes a compliance date for these facilities. The Agency would establish the new compliance date and publish it in the **Federal Register** as part of any final action on the proposed exemption (74 FR 2461). The delay for these facilities is intended to provide the owner or operator of these facilities the opportunity to fully understand any regulatory amendments that may be finalized.

The Agency is making changes to the regulatory text in § 112.3 to reflect how the compliance date extension would apply for different facilities, as provided for in the proposed rule.

Proposal To Extend Compliance Date by One Year

This proposed rule would extend for most facilities the dates in § 112.3(a), (b) and (c) by which the owner or operator must prepare or amend and implement an SPCC Plan. Exclusions to this compliance date extension are described below. Today's proposed rule amends and combines the current § 112.3(a) with the current § 112.3(b)(1) and (c) to:

- Amend the compliance date for a facility, including a mobile or portable facility, in operation on or before August 16, 2002 that requires the owner or operator to make any necessary amendments to an SPCC Plan and fully implement the amended Plan by November 10, 2011.[3]
- Amend the compliance date for a facility, including a mobile or portable facility, which came into operation after August 16, 2002, but before November 10, 2011, that requires the owner or operator to prepare and fully implement an SPCC Plan on or before November 10, 2011.
- Amend the compliance date for a facility, including a mobile or portable facility, (except an oil production facility[4]) which becomes operational after November 10, 2011 that requires the owner or operator to prepare and implement an SPCC Plan before beginning operations.
- Incorporate the language under the current § 112.3(c) for mobile or portable facilities (such as an onshore drilling or workover rig, or a portable fueling facility) to amend the compliance date for these facilities to November 10, 2011 and maintain the language that allows mobile or portable facilities to prepare a general Plan.

An extension of the compliance date for these facilities is appropriate because it provides the owners or operators of SPCC-regulated facilities the opportunity to fully understand the regulatory amendments offered by revisions to the SPCC rule promulgated on December 5, 2008 (73 FR 74236) and November 13, 2009 (74 FR 58784).[5] Given the delay in the effective date for the December 2008 rule amendment, and the uncertainty that surrounded the final amendments because of this delay, this proposed extension would allow potentially affected facilities an additional year beyond the current compliance date of November 10, 2010 to make any changes to their facilities and SPCC Plans to comply with the revised SPCC requirements. Considering that the changes in the final November 2009 amendments were very limited, and that most of the December 2008 amendments offered compliance options and regulatory burden relief, a limited timeframe for this extension is appropriate. A one-year period from the current compliance date provides sufficient time to understand and implement the streamlined amendments to the SPCC rule.

The Agency seeks comment on the proposed compliance date by which owners and operators would be required to prepare, amend, and implement SPCC Plans in accordance with amendments to the SPCC rule. Any alternative dates suggested must include appropriate rationale and supporting data for the Agency to be able to consider them for final action.

Exceptions to the Proposal To Extend Compliance Date by One Year

The Agency is not proposing to extend the compliance date for drilling, production and workover facilities that are offshore or that have an offshore component; or for onshore facilities required to have and submit FRPs. The Agency is particularly concerned about the potential for immediate environmental impacts resulting from oil spills to waters of the U.S. or adjoining shorelines posed by these facilities. All of these facilities have potentially significant quantities of oil that could be discharged to navigable waters or adjoining shorelines. Offshore drilling, production and workover facilities (and those with an offshore component) have a constant flow of oil associated with them and discharges could be in amounts that far exceed the oil storage capacity of the facility. As in the case of the recent Gulf of Mexico oil spill, the Agency is concerned that any potential oil discharge may be limited only by the capacity and pressure of the underground petroleum reservoir. The Agency's concern regarding these facilities is reflected in the fact that they have a greater number of requirements under the SPCC rule because of their location over waters of the U.S. or adjoining shorelines (40 CFR 112.11). In addition to those facilities completely offshore, the Agency has identified many onshore facilities with offshore components, as in the case of over-water production platforms. While these facilities have their tank batteries located onshore, their wellhead and portions of the flow lines are below the surface of the water. Offshore components include, but are not limited to, flow lines, gathering lines, wellheads, shut in valves, pressure control and sensing devices, cathodic protection devices and related piping and appurtenances. Because the Agency is equally concerned with the potential for immediate environmental impacts resulting from oil spills from a facility's offshore components, it is also excluding these facilities from the proposed extension. FRP facilities are those with storage capacities of 1

[3] To be eligible for the compliance extension, owners or operators of facilities in operation before August 16, 2002 must continue to maintain their existing SPCC Plans.

[4] On December 5, 2008 (73 FR 74236) EPA finalized an amendment to allow a new oil production facility (*i.e.,* one that becomes operational after the compliance date) a period of six months after the start of operations to prepare and implement an SPCC Plan.

[5] A facility owner or operator in operation before August 16, 2002 must continue to maintain an existing Plan. A facility owner or operator who wants to take advantage of the 2002, 2006, 2008, and 2009 regulatory changes may do so, but will need to modify the existing Plan accordingly. Additionally, an owner or operator may need to amend the Plan prior to the new compliance date to address facility modifications for which more stringent requirements apply.

million gallons or more that could cause substantial harm, or those with storage capacities at or above 42,000 gallons and that transfer oil to or from a vessel over water. The Agency is proposing to exclude all onshore FRP facilities from the extension because of their large oil storage capacities and their potential to cause substantial harm in the event of a discharge as identified under the FRP regulation (40 CFR 112.20).

Today's proposed rule amends the current § 112.3(b)(1) to maintain the existing compliance date for this subset of facilities, and combines it with the current § 112.3(c) provision to indicate that the existing compliance date also applies to mobile or portable facilities within this subset:

- Maintain the existing compliance date for a drilling, production and workover facility, including a mobile or portable facility, that is offshore or that has an offshore component; or of an onshore facility required to have and submit an FRP, that was in operation on or before August 16, 2002, that requires the owner or operator to make any necessary amendments to an SPCC Plan and fully implement the amended Plan by November 10, 2010.[6]
- Maintain the existing compliance date for a drilling, production and workover facility, including a mobile or portable facility, that is offshore or that has an offshore component; or of an onshore facility required to have and submit an FRP, that came into operation after August 16, 2002, but before November 10, 2010, that requires the owner or operator to prepare and fully implement an SPCC Plan on or before November 10, 2010.
- Maintain the existing compliance date for a facility (except an oil production facility[7]) that is either: a drilling, production and workover facility, including a mobile or portable facility, that is offshore or that has an offshore component; or an onshore facility required to have and submit an FRP, that becomes operational after November 10, 2010, that requires the owner or operator to prepare and implement an SPCC Plan before beginning operations.
- Incorporate language under the current 112.3(c) to maintain the existing compliance date for mobile or portable facilities that fall within this subset of facilities (such as a barge mounted offshore drilling or workover rig), and maintains the language that allows mobile or portable facilities to prepare a general Plan.

The Agency seeks comment on the proposed exceptions to the compliance date extension. Any alternative exceptions suggested must include appropriate rationale and supporting data for the Agency to be able to consider them for final action.

Oil Production Facilities Beginning Operations After the Compliance Date

The Agency is proposing to amend the current § 112.3(b)(2) to distinguish the two separate compliance dates that would apply to oil production facilities that become operational after the proposed compliance dates. The Agency is also moving this provision to § 112.3(c). These changes are intended to reflect the amendments and rearranged provisions for § 112.3(a), (b), and (c). The new § 112.3(c) would be amended to:

- Maintain the existing compliance date for an oil production facility that is offshore or that has an offshore component; or of an onshore oil production facility required to submit an FRP, that becomes operational after November 10, 2010, and could reasonably be expected to have a discharge as described in § 112.1(b), that requires the owner or operator to prepare and implement a Plan within six months after beginning operations.
- Amend the compliance date for an onshore oil production facility (i.e. one that is not required to submit an FRP) that becomes operational after November 10, 2011, and could reasonably be expected to have a discharge as described in § 112.1(b), that requires the owner or operator to prepare and implement a Plan within six months after beginning operations.

The Agency seeks comment on the proposed extension of the compliance date by which owners and operators would be required to prepare, amend, and implement SPCC Plans in accordance with amendments to the SPCC rule. Any alternative dates or approaches suggested must include appropriate rationale and supporting data for the Agency to be able to consider them for final action.

Proposal for Facilities With Milk Containers, Associated Piping and Appurtenances

The Agency is proposing to further delay the compliance date for the owners and operators of facilities with milk containers, associated piping and appurtenances that are constructed according to the current applicable 3–A Sanitary Standards, and subject to the current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to the current applicable PMO. The Agency is taking this action for facilities that would be affected by any final determination on the proposed rule to exempt these milk containers from SPCC requirements (74 FR 2461; January 15, 2009). The compliance date would be delayed to one year from the effective date of a final rule addressing the SPCC requirements specifically for these milk containers, associated piping and appurtenances, or as specified by a rule that otherwise establishes a new compliance date for these facilities.[8] The Agency would establish the new compliance date and publish it in the **Federal Register** as part of any final action on the proposed exemption. The delay for these facilities is intended to provide the owner or operator of the facility the opportunity to fully understand any new regulatory amendments for milk containers, associated piping and appurtenances. Today's proposed rule amends § 112.3(b)(2) to:

- Further delay the compliance date for any facility that has milk containers, associated piping and appurtenances that are constructed according to the current applicable 3–A Sanitary Standards, and subject to the current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to the current applicable PMO. The delay would be for one year from the effective date of a final rule addressing the SPCC requirements specifically for these milk containers, associated piping and appurtenances, or as specified by a rule that otherwise establishes a new compliance date for these facilities.

The Agency seeks comment on the proposed delay of the compliance date by which owners and operators of facilities that have milk containers, associated piping and appurtenances would be required to prepare, amend, and implement SPCC Plans in accordance with amendments to the SPCC rule. Any alternative dates or approaches suggested must include appropriate rationale and supporting data for the Agency to be able to consider them for final action.

[6] As noted previously, owners or operators of facilities in operation before August 16, 2002 must continue to maintain existing SPCC Plans.

[7] On December 5, 2008 (73 FR 74236) EPA finalized an amendment to allow a new oil production facility (*i.e.,* one that becomes operational after the compliance date) a period of six months after the start of operations to prepare and implement an SPCC Plan.

[8] As noted previously in § 112.3(a) and (b)(1), to be eligible for the compliance extension, owners or operators of facilities in operation before August 16, 2002 must continue to maintain existing SPCC Plans. This includes facilities with milk containers, associated piping and appurtenances.

Alternative Approach to the Proposed Compliance Date Extension

While the Agency believes that a one-year compliance date extension is appropriate, as discussed previously, the Agency also is requesting comments on an alternative approach to extend the compliance date for these facilities. This approach would extend the compliance date to either May 10, 2011 or August 10, 2011 for all SPCC regulated facilities, except for: drilling, production and workover facilities that are offshore or that have an offshore component, or for onshore facilities required to have and submit an FRP, which must comply by November 10, 2010. This alternative approach would not impact the Agency's proposal to delay the compliance date for facilities with milk containers, associated piping and appurtenances that are constructed according to the current applicable 3–A Sanitary Standards, and subject to the current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to the current applicable PMO.

Specifically, for SPCC-regulated facilities, the Agency believes that a compliance date extension is appropriate for these facilities because of the multiple regulatory amendments to the SPCC rule. However, we are also requesting comment on whether it would be appropriate to consider a shorter compliance date extension, such as either six or nine months for them. In considering the shorter compliance date extension, we request comments as to the type of criteria to consider, such as discharge history, size and type of facility, the ability to come into compliance, or the potential risk presented. This extension would not apply to drilling, production and workover facilities that are offshore or that have an offshore component, or for onshore facilities required to have and submit an FRP, which must comply by November 10, 2010.

The Agency seeks comment on the alternative approach to the proposed compliance date extension. Any alternative dates or approaches suggested must include appropriate rationale and supporting data for the Agency to be able to consider them for final action.

Other Considerations

If an owner or operator of an SPCC-regulated facility requires additional time to comply with the SPCC rule, he may submit a written request to the Regional Administrator in accordance with § 112.3(f). Such requests may be granted if the Regional Administrator finds that the owner or operator cannot comply with all SPCC requirements by the compliance date as a result of either non-availability of qualified personnel, or delays in construction or equipment delivery beyond his control and without the fault of such owner or operator.

It should be noted that these proposed compliance date amendments would affect only the requirements of the July 2002, December 2006, December 2008, and November 2009 SPCC rule amendments (67 FR 47042, July 17, 2002; 71 FR 77266, December 26, 2006; 73 FR 74236, December 5, 2008; and 74 FR 29136, November 13, 2009) that are new (*i.e.,* requirements that did not exist or were not in effect prior to the 2002 amendments) or more stringent compliance obligations to those that were in effect in the 1973 SPCC rule. Provisions that provide regulatory relief to facilities are applicable as of the effective date of the amendment and would not require revisions to existing Plans "to ensure compliance" (*see* § 112.3). However, the facility owner or operator must amend the SPCC Plan to include new or more stringent provisions by the compliance date.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review

Under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993), this action has been determined to be a "significant regulatory action." This rule was submitted to the Office of Management and Budget (OMB) for review. Any changes made in response to OMB's recommendations have been documented in the docket for this action.

B. Paperwork Reduction Act

This proposed action does not impose an information collection burden under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* This proposed rule would merely extend the compliance date for certain facilities subject to the rule. The Office of Management and Budget (OMB) has previously approved the information collection requirements contained in the existing regulations at 40 CFR part 112 under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2050–0021. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's proposed rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise that is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule on small entities, I certify that this proposed action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analyses is to identify and address regulatory alternatives "which minimize any significant economic impact of the proposed rule on small entities." 5 U.S.C. 603 and 604. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule.

This proposed rule seeks to extend the compliance date in § 112.3(a) for most facilities by one year and to delay the compliance date in § 112.3(b)(2) for facilities with milk containers, associated piping and appurtenances that meet certain conditions for one year from the effective date of a final rule addressing the SPCC requirements specifically for these containers, or as specified by a rule that otherwise establishes a compliance date for these facilities. The changes in the final November 2009 amendments were very limited, and the December 2008

amendments offered compliance options and regulatory burden relief. We have therefore concluded that today's proposed rule will relieve regulatory burden for all affected small entities. We continue to be interested in the potential impacts of the proposed rule on small entities and welcome comments on issues related to such impacts.

D. Unfunded Mandates Reform Act

This proposed action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector. The action imposes no enforceable duty on any State, local or tribal governments or the private sector. Therefore, this action is not subject to the requirements of sections 202 or 205 of the UMRA. This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. This proposed rule would merely extend the compliance date for most facilities subject to the rule.

E. Executive Order 13132: Federalism

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Under CWA section 311(o), States may impose additional requirements, including more stringent requirements, relating to the prevention of oil discharges to navigable waters. EPA encourages States to supplement the Federal SPCC regulation and recognizes that some States have more stringent requirements (56 FR 54612, October 22, 1991). This proposed rule would not preempt State law or regulations. Thus, Executive Order 13132 does not apply to this proposed rule.

In the spirit of Executive Order 13132, and consistent with EPA policy to promote communications between EPA and State and local governments, EPA specifically solicits comment on this proposed action from State and local officials.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). The proposed rule would not significantly or uniquely affect communities of Indian tribal governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risk

This proposed action is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is not economically significant as defined in Executive Order 12866, and because the Agency does not believe the environmental health or safety risks addressed by this proposed action present a disproportionate risk to children. The public is invited to submit comments or identify peer-reviewed studies and data that assess the effects of early life exposure to oil as affected by the proposed revision to the compliance date.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The overall effect of this action is to decrease the regulatory burden on facility owners or operators subject to its provisions.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Pub. L. 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This proposed rulemaking does not involve technical standards. Therefore, EPA is not considering the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment.

List of Subjects in 40 CFR Part 112

Environmental protection, Milk, Oil pollution, Penalties, Reporting and recordkeeping requirements.

Dated: July 28, 2010.

Lisa P. Jackson,

Administrator.

For the reasons set forth in the preamble, title 40, chapter I, of the Code of Federal Regulations is proposed to be amended as follows:

PART 112—OIL POLLUTION PREVENTION

1. The authority citation for part 112 continues to read as follows:

Authority: 33 U.S.C. 1251 *et seq.;* 33 U.S.C. 2720; E.O. 12777 (October 18, 1991), 3 CFR, 1991 Comp., p. 351.

2. Section 112.3 is amended by revising paragraphs (a), (b), and (c) to read as follows:

§ 112.3 Requirement to prepare and implement a Spill Prevention, Control, and Countermeasure Plan.

* * * * *

(a) If your facility, or mobile or portable facility, was in operation on or before August 16, 2002, you must maintain your Plan, but must amend it, if necessary to ensure compliance with this part, and implement the amended Plan no later than November 10, 2011. If such a facility becomes operational after August 16, 2002, through November 10, 2011, and could reasonably be expected to have a discharge as described in § 112.1(b), you must prepare and implement a Plan on

or before November 10, 2011. If such a facility (excluding oil production facilities) becomes operational after November 10, 2011, and could reasonably be expected to have a discharge as described in § 112.1(b), you must prepare and implement a Plan before you begin operations. You are not required to prepare a new Plan each time you move a mobile or portable facility to a new site; the Plan may be general. When you move the mobile or portable facility, you must locate and install it using the discharge prevention practices outlined in the Plan for the facility. The Plan is applicable only while the mobile or portable facility is in a fixed (non-transportation) operating mode.

(b) Notwithstanding the provisions of paragraph (a) of this section:

(1) If your drilling, production or workover facility, including a mobile or portable facility, is offshore or has an offshore component; or your onshore facility is required to have and submit a Facility Response Plan pursuant to 40 CFR 112.20(a), and was in operation on or before August 16, 2002, you must maintain your Plan, but must amend it, if necessary to ensure compliance with this part, and implement the amended Plan no later than November 10, 2010. If such a facility becomes operational after August 16, 2002, through November 10, 2010, and could reasonably be expected to have a discharge as described in § 112.1(b), you must prepare and implement a Plan on or before November 10, 2010. If such a facility (excluding oil production facilities) becomes operational after November 10, 2010, and could reasonably be expected to have a discharge as described in § 112.1(b), you must prepare and implement a Plan before you begin operations. You are not required to prepare a new Plan each time you move a mobile or portable facility to a new site; the Plan may be general. When you move the mobile or portable facility, you must locate and install it using the discharge prevention practices outlined in the Plan for the facility. The Plan is applicable only while the mobile or portable facility is in a fixed (non-transportation) operating mode.

(2) If your facility has milk containers, associated piping and appurtenances constructed according to current applicable 3–A Sanitary Standards, and subject to current applicable Grade "A" Pasteurized Milk Ordinance (PMO) or a State dairy regulatory requirement equivalent to current applicable PMO, the compliance date described in paragraphs (a) and (b)(1) of this section shall be one year from the effective date of a final rule addressing SPCC requirements specifically for these milk containers, associated piping and appurtenances; or until a rule that otherwise establishes the date by which you must comply with the provisions of this part.

(c) If your oil production facility as described in paragraph (a) of this section becomes operational after November 10, 2011, or as described in paragraph (b)(1) of this section becomes operational after November 10, 2010, and could reasonably be expected to have a discharge as described in § 112.1(b), you must prepare and implement a Plan within six months after you begin operations.

Water Quality Standards for the State of Florida's Lakes and Flowing Waters; Supplemental Notice of Data Availability and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Supplemental notice of data availability and request for comment.

SUMMARY: This action is a supplemental notice of data availability and a request for comment related to EPA's January 26, 2010, notice of proposed rulemaking (NPRM), proposing numeric nutrient water quality criteria to protect aquatic life in lakes and flowing waters within the State of Florida. In the January 2010 NPRM, EPA proposed to classify Florida's streams into four regions (referred to in the proposed rule as "Nutrient Watershed Regions") for application of total nitrogen (TN) and total phosphorus (TP) criteria. Streams within each of these regions (Panhandle, Bone Valley, Peninsula and North Central) reflect similar geographical characteristics including phosphorus-rich soils, nutrient concentrations and nutrient ratios. In this notice, EPA is requesting comment on revised stream region boundaries based on additional information about watershed delineations and phosphorus-rich geological formations in Florida. Based on comments and additional information, this revised regionalization approach would result in five Nutrient Watershed Regions for Florida's streams and a clarification of certain watershed boundaries for the Bone Valley and Peninsula regions. EPA is also requesting comment on basing the TN and TP criteria for the nutrient watershed regions on a combination of the 75th and 90th percentile values (depending on regions) of the benchmark sites outlined in the alternate approach at proposal. EPA is continuing to consider the primary approach proposed in January 2010 to use the 75th percentile of sites with healthy biological condition as measured by the Stream Condition Index (SCI). The January 2010 proposal also proposed application of the Vollenweider equation to ensure that nutrient criteria in streams are protective of downstream lakes and requested comment on alternative approaches such as the BATHTUB model and whether there should be an allowance for use of other models that are demonstrated to be protective and scientifically defensible. Today's notice also requests comment on using the BATHTUB model in place of the Vollenweider equation for deriving both TP and TN criteria to protect downstream lakes, allowing the use of alternative models under certain circumstances, and providing for an alternative approach to protect downstream lakes when limited data are available that would use the lake criteria themselves as criteria for upstream waters flowing into the lake. EPA is seeking comment on alternative stream regionalization approaches, use of the benchmark dataset to derive criteria, and derivation of lake downstream protection values discussed in more detail below, and will consider the comments received before finalizing the proposed rule, "Water Quality Standards for the State of Florida's Lakes and Flowing Waters." This supplemental notice focuses solely on the delineation of stream nutrient regions, resulting criteria associated with two approaches (EPA's SCI-based approach and the alternative benchmark distribution approach), and protection of downstream lakes in Florida. EPA is not soliciting comment on any other provisions of the January 2010 proposal.

DATES: Comments must be received on or before *September 2, 2010.*

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OW–2009–0596, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

2. *E-mail: ow-docket@epa.gov.*

3. *Mail to:* Water Docket, U.S. Environmental Protection Agency, Mail code: 2822T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, Attention: Docket ID No. EPA–HQ–OW–2009–0596.

4. *Hand Delivery:* EPA Docket Center, EPA West Room 3334, 1301 Constitution Avenue, NW., Washington, DC 20004, Attention Docket ID No. EPA–HQ–OW–2009–0596. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–OW–2009–0596. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at a docket facility. The Office of Water (OW) Docket Center is open from 8:30 a.m. until 4:30 p.m., Monday through Friday, excluding legal holidays. The OW Docket Center telephone number is (202) 566–2426, and the Docket address is OW Docket, EPA West, Room 3334, 1301 Constitution Avenue, NW., Washington, DC 20004. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744.

FOR FURTHER INFORMATION CONTACT: Danielle Salvaterra, U.S. EPA Headquarters, Office of Water, Mailcode: 4305T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number: 202–564–1649; fax number: 202–566–9981; e-mail address: *salvaterra.danielle@epa.gov.*

SUPPLEMENTARY INFORMATION: This supplementary information section is organized as follows:

Table of Contents

I. General Information
A. What should I consider as I prepare my comments for EPA?
B. How can I get copies of this document and other related information?
II. Background
III. Supplemental Information on Numeric Nutrient Criteria for the State of Florida's Lakes and Flowing Waters
A. Stream Regionalization and Alternative Approaches to Stream Criteria Derivation
B. Downstream Protection of Lakes

I. General Information

A. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *http://www.regulations.gov* or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

1. Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date, and page number).

2. Follow directions—The agency may ask you to respond to specific questions or to address a particular issue.

3. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

4. Describe any assumptions and provide any technical information and/or data that you used.

5. Provide specific examples to illustrate your concerns, and suggest alternatives.

6. Make sure to submit your comments by the comment period deadline identified.

B. How can I get copies of this document and other related information?

1. *Docket.* EPA has established an official public docket for this action under Docket Id. No. EPA–HQ–OW–2009–0596. The official public docket consists of the document specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include CBI or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the OW Docket, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC 20004. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is 202–566–1744. A reasonable fee will be charged for copies.

2. *Electronic Access.* You may access this **Federal Register** document electronically through the EPA Internet under the "**Federal Register**" listings at *http://www.epa.gov/fedrgstr/.*

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.regulations.gov* to view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. For additional information about EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.* Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the Docket Facility identified in Section I.B.1.

II. Background

On January 26, 2010, EPA proposed "Water Quality Standards for the State of Florida's Lakes and Flowing Waters" (75 FR 4173). EPA conducted 13 public hearing sessions in six cities in Florida and held a 90-day public comment period as part of the proposed rule generating over 22,000 public comments. EPA is reviewing and considering these comments in preparation of the final rule, which is scheduled to be signed by the EPA Administrator on October 15, 2010.

Today's notice reflects a review of comments and new information received by the Agency as part of the public comment process, and requests further comment on possible revisions, additional options, and new information related to specific approaches and issues identified in the January 26, 2010 proposal. EPA is only seeking comment on the items presented in this supplemental notice. EPA is not soliciting comment on any other provisions of the January 2010 proposed rule.

III. Supplemental Information on Numeric Nutrient Criteria for the State of Florida's Lakes and Flowing Waters

A. Stream Regionalization and Alternative Approaches to Stream Criteria Derivation

EPA proposed classification of Florida's streams north of Lake Okeechobee by separating watersheds with substantially different stream molar ratios of TN to TP into Nutrient Watershed Regions (NWR). The resulting regions reflect the inherent differences in the natural factors that contribute to nutrient concentrations in streams (*e.g.,* geology, soil composition, and/or hydrology). Reliance on a watershed-based classification approach reflects the understanding that upstream water quality affects downstream water quality. EPA requested public comment on the stream regionalization approach as well as factoring in geological influences from phosphorus-rich soils when classifying stream regions (75 FR 4195–96). EPA received public comments and information that suggested refining the proposed stream regions to account for natural variability in soil nitrogen and phosphorus as well as clarifying the boundaries of the proposed stream regions.

Today, EPA is requesting comment on a revised approach to certain stream regions suggested by FDEP and other commenters. More specifically, EPA is considering additional information on the influence of phosphorus-rich soils and geology in Florida (associated with the Hawthorne Group) for areas in the northern Panhandle region. Based on comments and information received, the Agency is also considering further refinements to the regional boundaries separating the Peninsula region from the West Central region (referred to in the proposed rule as "Bone Valley").

Based on geological information,[1] EPA is considering dividing the proposed Panhandle region into a Panhandle West (less phosphorus-rich) and Panhandle East (more phosphorus-rich) region. In drawing the boundary between the two regions, EPA is continuing to rely on the watershed approach described in the proposed rule and is considering using the eastern boundary of the Apalachicola River watershed as the dividing line between the two regions. EPA believes that dividing the Panhandle region in this manner may more accurately represent the natural influences on stream TP concentrations and provide finer spatial resolution with respect to TP criteria; however, we request comment on this conclusion.

EPA is considering these adjustments in the Panhandle region to account for natural geological influences on stream phosphorus concentrations. EPA considered different approaches to classifying Florida's streams for application of TN criteria, such as the four Nutrient Watershed Regions discussed in the January 2010 proposal and two regions as originally suggested by FDEP. However, differences in the resulting TN criteria based on these stream classification schemes were minor and the approaches were comparable. Therefore, to assure consistency and clarity in applicability decisions and implementation, EPA is also considering using the same revised Panhandle delineation for stream TN criteria as well as the TP criteria. This consistency in regionalization for TN and TP provides clarity to the public on which stream criteria apply at any given location, which can help facilitate the State's implementation of both stream TN and TP criteria.

EPA also reexamined the watershed delineations of the West Central and Peninsula regions based on comments and information from FDEP and others. As a result of this review, EPA has gained greater knowledge of the watershed boundaries and is considering refining the boundary delineations accordingly. The result for the West Central region would be a modified western boundary that shifts from Florida's west coast shoreline inland to the east as explained in more detail below. EPA believes that these possible adjustments to the West Central and Peninsula stream region boundaries more accurately reflect the watershed boundaries; however, we request comment on this conclusion.

As a result of the new information and possible adjustments to the proposed stream regionalization approach that are outlined above, EPA is considering five Nutrient Watershed Regions for deriving TP and TN criteria for streams. The five Nutrient Watershed Regions would include a Panhandle West region encompassing Perdido Bay Watershed, Pensacola Bay Watershed, Choctawhatchee Bay Watershed, St. Andrew Bay Watershed, and Apalachicola Bay Watershed. It would also include a Panhandle East region encompassing Apalachee Bay Watershed, and Econfina/Steinhatchee Coastal Drainage Area. The West Central (Bone Valley) and Peninsula regions would be revised slightly to more accurately reflect watershed boundaries (*e.g.,* the Sarasota Bay and Charlotte Harbor Watersheds would move from the West Central (Bone Valley) to the Peninsula region). The proposed North Central region encompassing the Suwannee River Watershed would remain unchanged.

EPA is providing the following information in the docket to illustrate and delineate the revised Nutrient Watershed Regions under consideration: 1. Map of revised TN, TP regions, 2. Map of Hawthorne group overlaid on revised Panhandle regions, 3. GIS shapefile of revised TN, TP regions, 4. Florida geological information on the Hawthorne group (*see* footnote 1).

EPA is also providing additional information in this notice and in the docket on the TN and TP criteria that are based on the revised Nutrient Watershed Regions under consideration. Using EPA's previously proposed approach (75th percentile) and the revised stream regions discussed in this notice, the TN and TP criteria would be: Panhandle West—0.84 mg/L and 0.03 mg/L, respectively; Panhandle East—0.77 mg/L and 0.10 mg/L, respectively; North Central—1.48 mg/L and 0.36 mg/L, respectively; West Central—1.80 mg/L and 0.73 mg/L, respectively; and Peninsula—1.20 mg/L and 0.10 mg/L, respectively. To illustrate the derivation of stream criteria based on the revised regions, EPA has re-organized the same

[1] Scott, T.S., 1988, The lithostratigraphy of the Hawthorn Group (Miocene) of Florida: Florida Geological Survey Bulletin No. 59; 148 p.; Scott, T.S., K.M. Campbell, F.R. Rupert, J.D. Arthur, T.M. Missimer, J.M. Lloyd, J.W. Yon and J.G. Duncan, 2001, Geologic map of the state of Florida: Florida Geological Survey Map Series 146; Scott, T.S., 2001, Text to accompany the geologic map of Florida: Florida Geological Survey Open-File Report 80; 29 p.

nutrient dataset provided in the proposed rule and is making it available to the public in the docket for this notice. These data were organized on the basis of site averages to derive the proposed criteria outlined above.

At proposal, EPA also requested comment on the benchmark distribution approach. In response to comments, the Agency is considering using a combination of the 75th and 90th percentile values (depending on regions) based on benchmark sites, with additional data quality screens applied, to establish criteria. EPA is considering the 90th percentile for all regions except the West Central, where the Agency is considering the 75th percentile due to less data available. Using the benchmark distribution approach and the revised stream regions discussed in this notice, the TN and TP criteria would be: Panhandle West—0.62 mg/L and 0.04 mg/L, respectively; Panhandle East—0.97 mg/L and 0.11 mg/L, respectively; North Central—1.90 mg/L and 0.35 mg/L, respectively; West Central—1.30 mg/L and 0.35 mg/L, respectively; and Peninsula—1.67 mg/L and 0.11 mg/L, respectively. Included in the docket for today's notice is the benchmark dataset presented at proposal with the additional quality assurance screens applied, that was used to calculate these values. The stream criteria using this approach are calculated on the basis of Waterbody Identifiers (WBIDs) and the derivation is outlined in more detail in the docket for today's notice. EPA requests comment on this approach.

EPA is soliciting comment on the refined regionalization approach and criteria described in this supplemental notice. The Agency is specifically requesting comment on revised stream criteria using EPA's previously proposed approach (applied to the revised regions) as outlined above as well as alternative stream criteria based on utilization of the benchmark distribution approach applied to the revised regions, also outlined above. EPA will evaluate all data and information submitted by the close of the public comment period for this supplemental notice with regard to regionalization and criteria derivation for Florida's streams.

B. Downstream Protection of Lakes

In its January 2010 FRN, EPA proposed a phosphorus loading model equation first developed by Vollenweider [2] to relate a lake TP concentration criterion to the concentration necessary in incoming streams to support the lake criterion. EPA proposed to apply the equation's resulting stream concentration as the applicable criterion for all stream segments upstream of the lake if those concentrations were more stringent than the otherwise applicable instream criteria for the stream segments. EPA mathematically derived this equation, with allowable input of lake-specific characteristics, to calculate values intended to serve as protective criteria necessary to assure attainment and maintenance of the lake numeric nutrient criteria also included in the proposal (75 FR 4198).

The proposed Vollenweider model equation requires input of two lake-specific characteristics: The fraction of inflow due to stream flow and the hydraulic retention time. Because lake-specific input values may not always be readily available, EPA provided alternative preset values for percent contribution from stream flow and hydraulic retention time that could be used in those instances. EPA's January 2010 proposed rule discussed the flexibility for the State to use site-specific inputs to the Vollenweider equation for these two parameters, as long as the State determines that they are appropriate and documents the site-specific values.

EPA requested comment on several technical aspects of this equation and its application. In addition, EPA requested comment on the potential to develop a corollary approach for nitrogen. Several commenters suggested the need for protective TN values to protect downstream lakes that are nitrogen-limited (such as many of the lakes in the phosphorus-rich areas of the State). EPA recognized that more specific information may be readily available for individual lakes that could allow the use of alternative approaches such as the BATHTUB model [3] and requested comment in the January 2010 proposal on the availability and application of this model. EPA also requested comment on whether there should be a specific allowance for use of alternative lake-specific models where demonstrated to be protective and scientifically defensible based upon current and readily available data.

EPA received many comments on this proposed approach for protection of lakes downstream of rivers and streams. Some felt that that the Vollenweider equation was overly simplistic to represent all lakes in Florida and that it does not include the necessary factors to account for physical, hydrologic, chemical, and biological processes necessary to determine protective criteria. Comments included a recommendation to use models that can better represent site-specific conditions, such as BATHTUB.

BATHTUB is designed to apply empirical eutrophication models to morphometrically complex lakes and reservoirs. The program performs steady-state water and nutrient balance calculations, uses spatially segmented hydraulic networks, and accounts for advective and diffusive transport of nutrients. BATHTUB predicts nutrient-related water quality conditions such as total phosphorus, total nitrogen and chlorophyll a concentrations, transparency, and hypolimnetic oxygen depletion rates. The model can apply to a variety of lake sizes, shapes and transport characteristics. A high degree of flexibility is available for specifying model segments as well as multiple influent streams. Because water quality conditions are calculated using empirically-derived relationships, BATHTUB inherently accounts for internal loading of phosphorus from bottom sediments. Additional technical references are available that describe the model and its applications.[4]

For the provision of EPA's proposed rule for deriving criteria for protection of downstream lakes (§ 131.43(c)(2)(ii)), EPA is considering requiring the use of BATHTUB rather than a loading model equation based on Vollenweider. The rule would therefore require that the criteria for protection of downstream lakes would be the more stringent of the instream TP and TN criteria value or the

[4] Walker, W.W., 1981. *Empirical Methods for Predicting Eutrophication in Impoundments; Report 1, Phase I: Data Base Development.* Technical Report E–81–9, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS.; Walker, W.W., 1982. *Empirical Methods for Predicting Eutrophication in Impoundments; Report 2, Phase II: Model Testing.* Technical Report E–81–9, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS.; Walker, W.W., 1999. *Simplified Procedures for Eutrophication Assessment and Prediction: User Manual;* Instruction Report W–96–2, U.S. Army Corps of Engineers Waterways Experiment Station, Vicksburg, M.S.

concentration of TP and TN derived from application of BATHTUB. The resulting criteria using BATHTUB could be either more or less stringent than the criteria derived using Vollenweider, depending on site-specific lake factors. EPA believes BATHTUB may be more appropriate for downstream protection value calculations than Vollenweider because BATHTUB has the capability to represent a greater number of site-specific variables, which may influence nutrient responses. In addition, BATHTUB can estimate TN concentrations. As noted above, a number of commenters observed that a limitation in EPA's original proposal was that it only addressed TP.

EPA is also considering additional rule language that would specifically authorize FDEP or EPA to use a model other than BATHTUB when either determines that it would be appropriate to use another scientifically defensible technical model or approach that demonstrates protection of downstream lakes. While BATHTUB is a peer reviewed and versatile model, there are other models that, when appropriately calibrated and applied, can offer additional capability to address more complex situations and address an even greater degree of site-specificity.

One example of an alternative model that FDEP or EPA might consider using for particularly complex site-specific conditions is the Water Quality Analysis Simulation Program (WASP) model. This model allows users to conduct detailed simulations of water quality responses to natural and manmade pollutant inputs. WASP is a dynamic compartment-modeling program for aquatic systems, including both the water column and the underlying benthos. WASP allows the user to simulate systems in 1, 2, or 3 dimensions, and a variety of pollutant types. The model can represent time varying processes of advection, dispersion, point and diffuse mass loading, and boundary exchange. WASP also can be linked with hydrodynamic and sediment transport models that can provide flows, depths, velocities, temperature, salinity and sediment fluxes. Additional technical information may be found at *http://www.epa.gov/athens/wwqtsc/html/wasp.html*.

EPA is considering recommending BATHTUB as the method for calculating the TN and TP downstream protective values in streams that flow into lakes because of its ability to incorporate site-specific factors in estimates, its use of data that may be readily available, and its ease of use and rapid processing time. BATHTUB has been used to model nutrients in lakes and reservoirs throughout the United States. BATHTUB allows for greater site-specificity than the Vollenweider approach, and input of more local information to calculate concentrations of both nitrogen and phosphorus in streams that assure downstream protection of lakes. In certain circumstances, a more complex model such as WASP may be appropriate, and EPA is considering and requesting comment on adding specific provisions to allow either the Agency or FDEP to use an alternative model such as WASP where greater spatial or temporal detail in model output is called for, or where water quality considerations that fall outside the scope of BATHTUB are to be explicitly considered.

EPA is also requesting comment on including a provision in this section of the rule that would provide that if data are not readily available to derive a TN or TP downstream protection value using BATHTUB or another scientifically defensible model, the lake criteria values for TN and TP would be used as the downstream protection values where they are more stringent than the instream values. EPA believes that this approach is protective because the allowable concentration of nutrients entering the lake would be equal to criteria that are protective of the lake water itself; however, this approach may result in the application of more stringent criteria in the streams entering the lake than would be calculated using BATHTUB or another scientifically defensible model if site-specific data were available.

EPA is soliciting comment on the approaches to protect downstream lakes described in this supplemental notice. EPA will evaluate all data and information submitted by the close of the public comment period for this supplemental notice with regard to nutrient criteria to protect downstream lakes in Florida.

Dated: July 29, 2010.

Peter S. Silva,

Assistant Administrator for Water.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 272

[EPA–R02–RCRA–2010–0249; FRL–9178–7]

New York: Incorporation by Reference of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to revise the codification of New York's authorized hazardous waste program which is set forth in the regulations entitled "Approved State Hazardous Waste Management Programs", New York's authorized hazardous waste program. EPA will incorporate by reference into the Code of Federal Regulations (CFR) those provisions of the State regulations that are authorized and that EPA will enforce under the Solid Waste Disposal Act, as amended and commonly referred to as the Resource Conservation and Recovery Act (RCRA).

DATES: Send your written comments by September 2, 2010.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R02–RCRA–2010–0249, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- E-mail: *infurna.michael@epa.gov.*
- *Fax:* (212) 637–4437.
- *Mail:* Send written comments to Michael Infurna, Division of Environmental Planning and Protection, EPA, Region 2, 290 Broadway, 22nd Floor, New York, NY 10007.
- *Hand Delivery or Courier:* Deliver your comments to Michael Infurna, Division of Environmental Planning and Protection, EPA, Region 2, 290 Broadway, 22nd Floor, New York, NY 10007. Such deliveries are only accepted during the Regional Office's normal hours of operation. The public is advised to call in advance to verify the business hours. Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–R02–RCRA–2010–0249. EPA's policy is that all comments received will be included in the public docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information

claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov*, or e-mail. The Federal *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties, and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters or any form of encryption, and be free of any defects or viruses. (For additional information about EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/dockets/*).

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy. You can view and copy the records related to this codification effort in the EPA Region 2 Library by appointment only. To make an appointment please call (212) 637–3185.

FOR FURTHER INFORMATION CONTACT: Michael Infurna, Division of Environmental Planning and Protection, EPA Region 2, 290 Broadway, 22nd floor, New York, NY 10007; telephone number (212) 637–4177; fax number: (212) 637–4377; e-mail address: *infurna.michael@epa.gov*.

SUPPLEMENTARY INFORMATION: In the "Rules and Regulations" section of this **Federal Register**, the EPA is codifying and incorporating by reference the State's hazardous waste program as a direct final rule. EPA did not make a proposal prior to the direct final rule because we believe these actions are not controversial and do not expect comments that oppose them. We have explained the reasons for this codification and incorporation by reference in the preamble to the direct final rule. Unless we get written comments which oppose this incorporation by reference during the comment period, the direct final rule will become effective on the date indicated, and we will not take further action on this proposal. If we get comments that oppose these actions, we will withdraw the direct final rule and it will not take effect. We will then respond to public comments in a later final rule based on this proposal. You may not have another opportunity for comment. If you want to comment on this action, you must do so at this time.

For additional information, please see the direct final rule published in the "Rules and Regulations" section of this **Federal Register**.

Dated: April 27, 2010.

Judith A. Enck,

Regional Administrator, Region 2.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 170

Planning and Establishment of State-Level Exchanges; Request for Comments Regarding Exchange-Related Provisions in Title I of the Patient Protection and Affordable Care Act

AGENCY: Office of Consumer Information and Insurance Oversight, Department of Health and Human Services.

ACTION: Request for comments.

SUMMARY: This document is a request for comments regarding the Exchange-related provisions of the Patient Protection and Affordable Care Act (the Affordable Care Act), enacted on March 23, 2010. The Department of Health and Human Services (HHS) invites public comments in advance of future rulemaking and grant solicitations.

DATES: Submit written or electronic comments by October 4, 2010.

ADDRESSES: In commenting, please refer to file code OCIIO–9989–NC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

• *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the instructions under the "More Search Options" tab.

• *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: OCIIO–9989–NC, P.O. Box 8010, Baltimore, MD 21244–8010.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

• *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: OCIIO–9989–NC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

• *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–9994 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Donna Laverdiere, Office of Consumer Information and Insurance Oversight, Department of Health and Human Services, at (301) 492–4100.

Customer Service Information: Individuals interested in obtaining information about the Patient Protection and Affordable Care Act may visit the Department of Health and Human Services' Web site (*http://www.HealthCare.gov*).

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments. All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all electronic comments received before the close of the comment period on the following public Web site as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that Web site to view public comments.

Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at Room 445–G, Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, call 1–800–743–3951.

I. Background

A. General

Title I of the Patient Protection and Affordable Care Act (Affordable Care Act, or the Act), Public Law 111–148, enacted on March 23, 2010, expands access to health insurance through the establishment of American Health Benefits Exchanges ("Exchanges"). Sections 1311(b) and 1321 (b) of the Affordable Care Act provide that each State may elect to establish an Exchange that would (consistent with definitions relating to the individual and group markets and employer size established in Section 1304 of the Act): (1) Facilitate the purchase of qualified health plans (QHPs); (2) provide for the establishment of a Small Business Health Options Program ("SHOP Exchange") designed to assist qualified employers in facilitating the enrollment of their employees in QHPs offered in the SHOP Exchange; and (3) meet other requirements specified in the Act. Additionally, section 1321(c)(1) requires the Secretary to establish and operate an Exchange within States that do not elect to establish an Exchange, or if the Secretary determines, on or before January 1, 2013, that the State will not have an Exchange operable by January 1, 2014 or has not taken the actions necessary to meet required Exchange standards as defined by regulation or to implement other requirements in Subtitles A and C of the Affordable Care Act (relating to insurance market reforms). For purposes of the remainder of this notice, the term "Exchange" will refer to State-operated Exchanges and the Exchange operated by the Federal government on behalf of States that do not elect to establish an Exchange.

B. Requirements for Establishing and Operating Exchanges

Section 1311(d) of the Affordable Care Act specifies certain requirements for Exchanges, and section 1311(e) specifies the requirements for a plan to be certified by the Exchange as a QHP. Additionally, Section 1321 of the Affordable Care Act discusses State flexibility in the operation and enforcement of Exchanges and related requirements. The Secretary will issue regulations setting standards for meeting the requirements under Title I of the Act with respect to the establishment and operations of the Exchanges. Each State electing to establish and operate an Exchange must have in effect Federal standards or a State law or regulation that implements the Federal standards within the State. Also, section 1311(k) specifies that Exchanges may not establish rules that conflict with or prevent the application of regulations promulgated by the Secretary under Subtitle D of the Affordable Care Act.

Section 1321(c) of the Act provides the authority for the Secretary to establish and operate an Exchange on behalf of a State that does not elect to establish an Exchange or that the Secretary determines will not have an Exchange operable by January 1, 2014; or has not taken the necessary actions to implement the requirements in 1321(a) or other market reforms specified in Subtitles A and C of Title I of the Affordable Care Act.

1. General Requirements for Exchanges

Section 1311(d)(1) requires that an Exchange must be a governmental agency or nonprofit entity established by a State. Section 1311(d)(2) requires Exchanges to make QHPs available to eligible individuals and employers. Section 1311(d)(6) requires Exchanges to consult with various stakeholders relevant to carrying out their responsibilities.

Section 1311(d)(4) identifies the minimum functions that an Exchange must perform. These functions include, but are not limited to: Implementing procedures for certification, recertification, and decertification of QHPs; providing for the operation of a toll-free telephone hotline to respond to requests for assistance; maintaining an Internet website containing standardized comparative information on QHPs; assigning ratings to each QHP offered through the Exchange on the basis of relative quality and price, in accordance with criteria as defined by the Secretary; utilizing a standardized format for presenting health benefits options in the Exchange; consistent with requirements in Section 1413 of the Act, informing individuals of eligibility requirements for the Medicaid and CHIP programs or any applicable State or local public program, and enrolling individuals in those programs if the Exchange determines they are eligible through screening of the application by the Exchange; establishing and making available by electronic means a calculator to determine the actual cost of coverage after application of any premium tax credit and cost-sharing reduction; granting certifications to individuals relating to hardship or other exemptions; and establishing a Navigator program consistent with the requirements in Section 1311(i).

2. Requirements Relating to Plan Ratings and Internet Portals

Section 1311(c)(3) requires the Secretary to develop a rating system that would rate QHPs offered through an Exchange on the basis of the relative quality and price. Additionally, Section 1311(c)(4) requires the Secretary to develop an enrollee satisfaction system that would evaluate the level of satisfaction with QHPs that had more than 500 enrollees during the previous year that are offered through an Exchange. The Act requires Exchanges to include quality and enrollee satisfaction ratings in the information provided to individuals and employers through their Internet portals.

Section 1311(c)(5) directs the Secretary to make a model template available to Exchanges for an Internet portal that may be used to direct eligible individuals and employers to QHPs; assist individuals and employers in determining eligibility for participation in Exchanges, premium tax credits, or cost-sharing reductions; and present standardized information (including plan ratings) to assist consumers in making health insurance choices. The Affordable Care Act also directs the Secretary to continue operating, maintaining and updating the Federal Internet portal developed under Section 1103(a) and to assist States in developing and maintaining their own portals.

3. Requirements Relating to Navigator Programs

Section 1311(i) provides that an Exchange shall establish a Navigator program under which it awards grants to eligible entities that meet the law's criteria, including demonstrating to the Exchange that they have existing relationships or could establish relationships with employers and employees, consumers, or self-employed individuals likely to be eligible to enroll in a qualified health plan. The duties of entities that serve as Navigators under such a grant include: Conducting public education activities to raise awareness of the availability of QHPs; distributing fair and impartial information concerning enrollment in QHPs and the availability of premium tax credits and cost-sharing reductions; facilitating enrollment in QHPs; providing referrals to any applicable office of health insurance consumer assistance, health insurance ombudsman, or other State agency to address enrollee complaints and questions about their health plans and coverage determination; and providing information in a manner that is culturally and linguistically appropriate to the needs of the population being served by the Exchange. The Affordable Care Act directs the Secretary, in collaboration with States, to develop standards to ensure that information made available by Navigators is fair, accurate and impartial.

4. Other Requirements Relating to Exchanges

Section 1311(c)(6) requires Exchanges to provide for an initial open enrollment period (as determined by the Secretary no later than July 1, 2012), annual open enrollment periods (as determined by the Secretary), and special enrollment periods.

Section 1311(d)(5)(A) specifies that States must ensure that their Exchanges are self-sustaining on or after January 1, 2015, including allowing Exchanges to charge assessments or user fees to participating health insurance issuers, or otherwise generate funding to support their operations. Section 1311(d)(5)(B) prohibits wasteful use of funds by Exchanges. Additionally, Section 1313 requires Exchanges to keep an accurate accounting of all activities, receipts, and expenditures, and annually submit to the Secretary a report concerning such accounting. Section 1313(a) also specifies that the Secretary has certain enforcement authority if an Exchange or a State has engaged in serious misconduct related to compliance with Title I of the Act.

5. Establishment of Exchanges in the Territories

Section 1323 of the Affordable Care Act provides an opportunity for U.S. Territories to elect to establish Exchanges and appropriates a fixed amount of funds to reduce the cost of coverage provided through an Exchange in the Territories. The Act stipulates that Territories' elections related to establishing Exchanges must be consistent with Section 1321, relating to standards for establishing and operating Exchanges, and received not later than October 1, 2013.

II. Solicitation of Comments

Section 1321(a)(2) of the Affordable Care Act requires the Secretary to consult with stakeholders to ensure balanced representation among interested parties. HHS is inviting public comment to aid in the development of standards for establishment and operation of the Exchanges, to address other Exchange-related provisions in Title I of the Affordable Care Act, and to inform for the awarding of grants to the States to assist them in planning and developing Exchanges. The Department is interested in comments from all interested parties. To assist interested parties in responding, this request for comments describes specific areas in which the Department is particularly interested.

Commenters should use the questions below to provide the Department with relevant information for the development of regulations regarding the Exchange-related provisions in Title I of the Affordable Care Act. However, it is not necessary for commenters to address every question below and commenters may also address additional issues under the Exchange-related provisions in Title I of the Affordable Care Act. Individuals, groups, and organizations interested in providing comments may do so at their discretion by following the above mentioned instructions.

Specific areas in which HHS is particularly interested include the following:

A. State Exchange Planning and Establishment Grants

Section 1311(a) directs the Secretary to make planning and establishment grant awards to States for activities related to establishing an Exchange. For each fiscal year, the Secretary must determine the total amount that will be made available to each State. Grants awarded under this Section may be renewed if a State is making sufficient progress toward establishing an Exchange, implementing other insurance market reforms, and meeting other benchmarks. The Secretary must make the initial grant awards under this Section no later than one year after enactment, and no grants shall be awarded after January 1, 2015.

1. What factors are States likely to consider in determining whether they will elect to offer an Exchange by January 1, 2014? To what extent are States currently planning to develop their own Exchanges by 2014 (*e.g.,* become electing States) versus choosing to opt-in to an Exchange operated by the Federal government for their State? When will this decision be made? Can planning grants assist in identifying and assessing relevant factors and making this decision?

2. To what extent have States already begun to plan for establishment of Exchanges? What kinds of activities are currently underway (*e.g.,* legislative, regulatory, etc.)? What internal and/or external entities are involved, or will likely be involved in this planning process?

a. What kinds of governance structures, rules or processes have States established or are they likely to establish related to operating Exchanges (*e.g.,* legal structure (such as placement in State agency or nonprofit organization), governance structure, requirements relating to governing board composition, etc.)?

b. To what extent have States begun developing business plans or budgets relating to Exchange implementation?

3. What are some of the major factors that States are likely to consider in determining how to structure their Exchanges (*e.g.,* separate or combined individual Exchanges and SHOP Exchanges; regional or interstate Exchanges; subsidiary Exchanges, State agency versus nonprofit entity)? What are the pros and cons of these various options?

4. What kinds of factors are likely to affect States' resource needs related to establishing Exchanges?

a. What is the estimated range of costs that States are likely to incur during the upcoming year (*e.g.,* calendar 2010 through calendar 2011) for each of the major categories of Exchange activities? Which of these expenses are fixed costs, and which costs are variable?

b. To what extent do States have existing resources that could be leveraged as a starting point for Exchange operations (*e.g.,* existing information technology (IT) systems, toll-free hotlines, Web sites, business processes, etc.)?

c. For what kinds of activities are States likely to seek funding using the Exchange establishment and planning grants?

5. What kinds of questions are States likely to receive during the initial planning and start-up phase of establishing Exchanges? How can HHS provide technical assistance, and in what forms, in helping States to answer these questions?

B. Implementation Timeframes and Considerations

Section 1321(b) requires each State that elects to establish an Exchange meeting the Secretary's requirements to have an Exchange operational by January 1, 2014. Section 1321(c) directs the Secretary to establish and operate an Exchange within each State that: (1) Does not elect to establish an Exchange; or (2) the Secretary determines will not have an Exchange operational by January 1, 2014, or has not taken the actions the Secretary determines necessary to implement the requirements in Section 1321(a) or the other insurance market reform requirements in Subtitles A and C of Title I of the Act.

Additionally, the Affordable Care Act includes several statutory deadlines for the Secretary related to establishment of Exchanges, including:

- Issuing regulations and/or guidance relating to requirements for Exchanges, requirements for QHPs, and risk adjustment as soon as practicable;
- Awarding State planning grants no later than one year after enactment (March 23, 2011);
- Determining the dates of the initial open enrollment period by July 1, 2012;
- No later than January 1, 2013, determining States' readiness to have Exchanges operational and implement required insurance market reforms by January 1, 2014;
- No later than July 1, 2013, issuing regulations for health choice compacts and the CO–OP program, and awarding CO–OP program grants; and
- Having in place additional insurance market reforms and providing cost-sharing reductions beginning on January 1, 2014.

In order to carry out the Federal implementation activities to ensure Exchanges are fully operational on January 1, 2014, the Department is seeking comments from stakeholders relating to implementation timeframes.

1. What are the key implementation tasks that need to be accomplished to meet Exchange formation deadlines and what is the timing for such tasks? What kinds of business functions will need to be operational before January 1, 2014, and how soon will they need to be operational?

2. What kinds of guidance or information would be helpful to States, plans, employers, consumers, and other groups or sectors as they begin the planning process?

3. What potential criteria could be considered in determining whether an electing State is making sufficient progress in establishing an Exchange and implementing the insurance market reforms in Subtitles A and C of Title I of the Affordable Care Act? What are important milestones for States to show they are making steady and sufficient progress to implement reforms by the statutory deadlines?

4. What other terms or provisions require additional clarification to facilitate implementation and compliance? What specific clarifications would be helpful?

C. State Exchange Operations

Section 1311(b) requires an Exchange to be established in each State not later than January 1, 2014 that: Facilitates the purchase of QHPs; provides for the establishment of a SHOP Exchange that assists small employers in facilitating the enrollment of their employees in QHPs offered in the small group market in the State; and meets additional requirements for Exchanges outlined in Section 1311(d). The Act requires the Secretary to publish regulations relating to the requirements for operating State Exchanges as soon as practicable, and provides various types of flexibility for States.

A number of additional programs established by the Act are closely related to the establishment of health insurance Exchanges, such as the Navigator program in Section 1311(i) and other consumer assistance programs. In addition, the insurance reforms, consumer protection provisions, and premium rating requirements will apply to plans both inside and outside the Exchanges.

1. What are some of the major considerations for States in planning for and establishing Exchanges?

2. For which aspects of Exchange operations or Exchange standards would uniformity be preferable? For which aspects of Exchange operations or Exchange standards is State flexibility likely to be particularly important?

3. What kinds of systems are States likely to need to enable important Exchange operational functions (*e.g.,* eligibility determination, plan qualification, data reporting, payment flows, etc.), to ensure adequate accounting and tracking of spending, provide transparency to Exchange functions, and facilitate financial audits? What are the relative costs and considerations associated with building Exchange operational, financial, and/or IT systems off of existing systems, versus building new stand-alone Exchange IT systems?

4. What are the tradeoffs for States to utilize a Federal IT solution for operating their Exchanges, as compared to building their own unique systems to conform to the current State environment? For what kinds of functions would it make more sense for States to build their own systems, or modify existing systems?

5. What are the considerations for States as they develop web portals for the Exchanges?

6. What factors should Exchanges consider in reviewing justifications for premium increases from insurers seeking certification as QHPs? How will States leverage/coordinate the work funded by the rate review grants to inform the decisions about which plans will be certified by QHPs?

7. To what extent are Territories likely to elect to establish their own Exchanges? What specific issues apply to establishing Exchanges in the Territories?

8. What specific planning steps should the Exchanges undertake to ensure that they are accessible and available to individuals from diverse cultural origins and those with low literacy, disabilities, and limited English proficiency?

9. What factors should the Secretary consider in determining what constitutes as wasteful spending (as outlined in Section 1311 (d)(5)(B))?

D. Qualified Health Plans (QHPs)

Section 1311(d)(2)(A) requires Exchanges to make QHPs available to qualified individuals and employers, and Section 1311(d)(4)(A) requires Exchanges to implement procedures for the certification, recertification, and decertification of health plans as QHPs, consistent with criteria developed by the Secretary under section 1311(c). This certification criteria include, at a minimum: Meeting marketing requirements; ensuring a sufficient choice of providers and providing information on the availability of providers; including essential community providers within health insurance plan networks; receiving appropriate accreditation; implementing a quality improvement strategy; utilizing a uniform enrollment form and a standard format to present health benefit plan options; and providing quality information to enrollees and prospective enrollees.

1. What are some of the major considerations involved in certifying QHPs under the Exchanges, and how do those considerations differ in the context of individual and SHOP State Exchanges, subsidiary Exchanges, regional or interstate Exchanges, or an Exchange operated by the Federal government on behalf of States that do not elect to establish an Exchange?

2. What factors should be considered in developing the Section 1311(c) certification criteria? To what extent do States currently have similar requirements or standards for plans in the individual and group markets?

a. What issues need to be considered in establishing appropriate standards for ensuring a sufficient choice of providers and providing information on the availability of providers?

b. What issues need to be considered in establishing appropriate minimum standards for marketing of QHPs and enforcement of those standards? What are appropriate Federal and State roles in marketing oversight?

3. What factors are needed to facilitate participation of a sufficient mix of QHPs in the Exchanges to meet the needs of consumers?

a. What timeframes and key milestones will be most important in assessing plans' participation in Exchanges?

b. What kinds of factors are likely to encourage or discourage competition among plans in the Exchanges based on price, quality, value, and other factors?

4. What health plan standards and bidding processes would help to facilitate getting the best value for consumers and taxpayers?

5. What factors are important in establishing minimum requirements for the actuarial value/level of coverage?

6. What factors, bidding requirements, and review/selection practices are likely to facilitate the participation of multiple plans in Exchanges? To what extent should the Exchanges accept all plans that meet minimum standards or select and negotiate with plans?

7. What are some important considerations related to establishing the program to offer loans or grants to foster the promotion of qualified nonprofit health plans under CO–OP plans? How prevalent are these organizations today? What is the likely demand for these loans and grants? What kinds of guidance are they likely to need from HHS and what legislative or regulatory changes are they likely to need from States?

8. Are there any special factors that are important for consideration in establishing standards for the participation of multi-State plans in Exchanges?

9. To what extent are States considering setting up State Basic Health Plans under Section 1331 of the Act?

E. Quality

The Affordable Care Act requires the Secretary to develop a health plan rating system on the basis of quality and prices that would be used by the Exchanges and to establish quality improvement criteria that health plans must meet in order to be qualified plans for Exchanges.

1. What factors are most important for consideration in establishing standards for a plan rating system?

a. How best can Exchanges help consumers understand the quality and cost implications of their plan choices?

b. Are the measures and standards that are being used to establish ratings for health plans in the Medicare Advantage program appropriate for rating QHPs in the Exchanges? Are there other State Medicaid or commercial models that could be considered?

c. How much flexibility is desirable with respect to establishing State-specific thresholds or quality requirements above the minimum Federal thresholds or quality requirements?

2. What are some minimum standards or other factors that could be considered with respect to establishing quality measurement and improvement thresholds or quality requirements that should be met by QHPs? What other strategies, including payment structures, could be used by plans to improve the practices of plan providers?

F. An Exchange for Non-Electing States

Section 1321(c) requires that in the case of States that do not elect to establish Exchanges, or that the Secretary determines will not have Exchanges operational by January 1, 2014 or have not taken the necessary actions to implement the requirements in Section 1321(a) or other insurance market reforms specified in Subtitles A and C of Title I of the Act, the Secretary shall establish (directly or through agreement with a not-for-profit entity) and operate an Exchange within the State.

1. How can the Federal government best work to implement an Exchange in States that do not elect to establish or are unable to establish their own Exchanges?

2. Are there considerations for an Exchange operated by the Federal government on behalf of States that do not elect to establish an Exchange that would be different from the State-run Exchanges?

G. Enrollment and Eligibility

Section 1411 of the Affordable Care Act requires the Secretary to establish a program for determining whether an individual meets certain eligibility requirements for Exchange participation, premium tax credits and cost-sharing reductions, and individual responsibility exemptions. Additionally, Sections 1412, 1413 and 2201 contain additional requirements to assist Exchanges by making advance determinations regarding income eligibility and cost-sharing reductions; providing for residents of each State to apply for enrollment in, receive a determination of eligibility for participation in, and continue participation in applicable State health subsidy programs; and simplifying and coordinating enrollment in the Exchanges, Medicaid and the Children's Health Insurance Program (CHIP).

1. What are the advantages and issues associated with various options for setting the duration of the open enrollment period for Exchanges for the first year and subsequent years? What factors are important for developing criteria for special enrollment periods?

2. What are some of the key considerations associated with conducting online enrollment?

3. How can eligibility and enrollment be effectively coordinated between Medicaid, CHIP, and Exchanges? How could eligibility systems be designed or adapted to accomplish this? What steps can be taken to ease consumer navigation between the programs and ease administrative burden? What are the key considerations related to States using Exchange or Medicaid/CHIP application information to determine eligibility for all three programs?

4. What kinds of data linkages do State Medicaid and CHIP agencies currently have with other Federal and State agencies and data sources? How can the implementation of Exchanges help to streamline these processes for States, and how can these linkages be leveraged to support Exchange operations?

5. How do States or other stakeholders envision facilitating the requirements of Section 1411 related to verification with Federal agencies of eligibility for enrollment through an Exchange?

6. What are the verification and data sharing functions that States are capable of performing to facilitate the determination of Exchange eligibility and enrollment?

7. What considerations should be taken into account in establishing

procedures for payment of the cost-sharing reductions to health plans?

H. Outreach

Section 1311(i) provides that Exchanges shall establish grant programs for Navigators, to conduct public education activities, distribute enrollment information, facilitate enrollment, and provide referrals for grievances, complaints, or questions.

1. What kinds of consumer enrollment, outreach, and educational activities are States and other entities likely to conduct relating to Exchanges, insurance market reforms, premium tax credits and cost-sharing reductions, available plan choices, etc., and what Federal resources or technical assistance are likely to be beneficial?

2. What resources are needed for Navigator programs? To what extent do States currently have programs in place that can be adapted to serve as patient Navigators?

3. What kinds of outreach strategies are likely to be most successful in enrolling individuals who are eligible for tax credits and cost-sharing reductions to purchase coverage through an Exchange, and retaining these individuals? How can these outreach efforts be coordinated with efforts for other public programs?

I. Rating Areas

Section 2701(a)(2) of the Public Health Service Act, as added by Section 1201 of the Affordable Care Act requires each State to establish one or more rating areas within the State for purposes of applying the requirements of Title I of the Affordable Care Act (including the Exchange provisions), subject to review by the Secretary.

1. To what extent do States currently utilize established premium rating areas? What are the typical geographical boundaries of these premium rating areas (*e.g.,* Statewide, regional, county, etc.)? What are the pros and cons associated with interstate, statewide, and sub-State premium rating areas? What insurance markets are typically required to utilize these premium rating areas?

2. To the extent that States utilize premium rating areas, how are they established? What kinds of criteria do States and other entities typically consider when determining the adequacy of premium rating areas? What other criteria could be considered?

J. Consumer Experience

1. What kinds of design features can help consumers obtain coverage through the Exchange? What information are consumers likely to find useful from Exchanges in making plan selections? Which kinds of enrollment venues are likely to be most helpful in facilitating individual enrollment in Exchanges and QHPs?

2. What kinds of information are likely to be most useful to consumers as they determine whether to enroll in an Exchange and which plans to select (within or outside of an Exchange)? What are some best practices in conveying information to consumers relating to health insurance, plan comparisons, and eligibility for premium tax credits, or eligibility for other public health insurance programs (*e.g.,* Medicaid)? What types of efforts could be taken to reach individuals from diverse cultural origins and those with low literacy, disabilities, and limited English proficiency?

3. What are best practices in implementing consumer protections standards?

4. Given that consumer complaints can be an important source of information in identifying compliance issues, what are the pros and cons of various options for collecting and reporting Exchange-related complaints (*e.g.,* collecting complaints at the Federal level, versus at the State or Exchange level)?

K. Employer Participation

Section 1311(b)(1)(B) provides for the establishment of Small Business Health Options Programs, referred to as SHOP Exchanges, which are designed to assist qualified employers in the State who are small employers in facilitating the enrollment of their employees in QHPs offered in the small group market in the State. Section 1304(b) provides that for plan years beginning before January 1, 2016, States have the option to define "small employers" as those with (1) 100 or fewer employees, or (2) 50 or fewer employees. Section 1312(f)(2)(B) specifies that beginning in 2017, States may elect to include issuers of health insurance coverage in the large group market to offer QHPs through the Exchange, and for large employers to purchase coverage through the Exchange.

In addition, employers that do not offer affordable coverage to their employees will also interact with the Exchanges including where their employees purchase coverage through the Exchange.

1. What Exchange design features are likely to be most important for employer participation, including the participation of large employers in the future? What are some relevant best practices?

2. What factors are important for consideration in determining the employer size limit (*e.g.,* 50 versus 100) for participation in a given State's Exchange?

3. What considerations are important in facilitating coordination between employers and Exchanges? What key issues will require collaboration?

4. What other issues are there of interest to employers with respect to their participation in Exchanges?

L. Risk Adjustment, Reinsurance, and Risk Corridors

Sections 1341, 1342, and 1343 of the Act provide for the establishment of transitional reinsurance programs, risk corridors, and risk adjustment systems for the individual and small group markets within States.

1. To what extent do States and other entities currently risk-adjust payments for health insurance coverage in order to counter adverse selection? In what markets (*e.g.,* Medicaid, CHIP, government employee plans, etc.) are these risk adjustment activities currently performed? To the extent that risk adjustment is or has been used, what methods have been utilized, and what are the pros and cons of such methods?

2. To what extent do States currently collect demographic and other information, such as health status, claims history, or medical conditions under treatment on enrollees in the individual and small group markets that could be used for risk adjustment? What kinds of resources and authorities would States need in order to collect information for risk adjustment of plans offered inside and outside of the Exchanges?

3. What issues are States likely to consider in carrying out risk adjustment for health plans inside and outside of the Exchanges? What kinds of technical assistance might be useful to States and QHPs?

4. What are some of the major administrative options for carrying out risk adjustment? What kinds of entities could potentially conduct risk adjustment or collect and distribute funds for risk adjustment? What are some of the options relating to the timing of payments, and what are the pros and cons of these options?

5. To what extent do States currently offer reinsurance in the health insurance arena (*e.g.,* Medicaid, State employee plans, etc.) or in other arenas? How is that reinsurance typically structured in terms of contributions, coverage levels, and eligibility? How much is typically taken in and paid out? Is the reinsurance fund capped in any way?

6. What kinds of non-profit entities currently exist in the marketplace that could potentially fulfill the role of an "applicable reinsurance entity" as defined in the Act?

7. What methods are typically used to determine which individuals are deemed high-risk or high cost for the purposes of reinsurance?

8. What challenges are States likely to face in implementing the temporary reinsurance program?

9. How do other programs (*e.g.,* Medicaid) use risk corridors to share profits and losses with health plans or other entities? How are the corridors defined and monitored under these programs? What mechanisms are used to collect and disburse payments?

10. Are there non-Federal instances in which reinsurance and/or risk corridors and/or risk adjustment were used together? What kinds of special considerations are important when implementing multiple risk selection mitigation strategies at once?

M. Comments Regarding Economic Analysis, Paperwork Reduction Act, and Regulatory Flexibility Act

Executive Order 12866 requires an assessment of the anticipated costs and benefits of a significant rulemaking action and the alternatives considered, using the guidance provided by the Office of Management and Budget. These costs and benefits are not limited to the Federal government, but pertain to the affected public as a whole. Under Executive Order 12866, a determination must be made whether implementation of the Exchange-related provisions in Title I of the Affordable Care Act will be economically significant. A rule that has an annual effect on the economy of $100 million or more is considered economically significant.

In addition, the Regulatory Flexibility Act may require the preparation of an analysis of the economic impact on small entities of proposed rules and regulatory alternatives. An analysis under the Regulatory Flexibility Act must generally include, among other things, an estimate of the number of small entities subject to the regulations (for this purpose, plans, employers, and in some contexts small governmental entities), the expense of the reporting, recordkeeping, and other compliance requirements (including the expense of using professional expertise), and a description of any significant regulatory alternatives considered that would accomplish the stated objectives of the statute and minimize the impact on small entities.

The Paperwork Reduction Act requires an estimate of how many "respondents" will be required to comply with any "collection of information" requirements contained in regulations and how much time and cost will be incurred as a result. A collection of information includes recordkeeping, reporting to governmental agencies, and third-party disclosures.

Furthermore, Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditure in any one year by State, local, or tribal governments, in the aggregate, or by the private sector, of $135 million.

The Department is requesting comments that may contribute to the analyses that will be performed under these requirements, both generally and with respect to the following specific areas:

1. What policies, procedures, or practices of plans, employers and States may be impacted by the Exchange-related provisions in Title I of the Affordable Care Act?

a. What direct or indirect costs and benefits would result?

b. Which stakeholders will be affected by such benefits and costs?

c. Are these impacts likely to vary by insurance market, plan type, or geographic area?

2. Are there unique effects for small entities subject to the Exchange-related provisions in Title I of the Affordable Care Act?

3. Are there unique benefits and costs affecting consumers? How will these consumer benefits be affected by States' Exchange design and flexibilities and the magnitude and substance of provisions mandated by the Act? Please discuss tangible and intangible benefits.

4. Are there paperwork burdens related to the Exchange-related provisions in Title I of the Affordable Care Act, and, if so, what estimated hours and costs are associated with those additional burdens?

N. Comments Regarding Exchange Operations

The Exchange-related provisions in Title I of the Affordable Care Act may affect/will involve various stakeholders. HHS wants to ensure receipt of all comments pertaining to the operations of the Exchanges.

1. What other considerations related to the operations of Exchanges should be addressed? If your questions related to the operations of Exchanges have not been asked, or you would like to add additional comments, you may do so here.

Signed at Washington, DC, this 27th day of July 2010.

Jay Angoff,

Director, Office of Consumer Information and Insurance Oversight, Department of Health and Human Services.

BILLING CODE 4150–65–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[WC Docket No. 07–245, GN Docket No. 09–51; FCC 10–84]

Implementation of Section 224 of the Act; A National Broadband Plan for Our Future

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a proposed rule published in the **Federal Register** on July 15, 2010, with respect to attachments to poles by any telecommunications carrier or cable operator providing telecommunications services. Specifically, this corrects how the maximum just and reasonable rate would be calculated under proposed rule § 1.1409(e)(2).

FOR FURTHER INFORMATION CONTACT: Marvin Sacks, 202–418–2017.

Correction

In proposed rule FR Doc. 2010–17048, beginning on page 41338 in the issue of July 15, 2010, make the following corrections in the **SUPPLEMENTARY INFORMATION** section. On page 41361 in the third column, under the proposed formula in § 1.1409(e)(2)(ii), delete the word "Maximum" before the word "Rate" and add the words "Maintenance and Administrative" before the words "Carrying Charge Rate," so the formula reads as follows:

Federal Communications Commission.

Bulah P. Wheeler,

Deputy Manager.

$$\text{Rate} = \text{Space Factor} \times \text{Net Cost of a Bare Pole} \times \left[\begin{array}{c}\text{Maintenance and Administrative}\\ \text{Carrying Charge Rate}\end{array}\right]$$

$$\text{Where Space Factor} = \left[\frac{\left(\begin{array}{c}\text{Space}\\ \text{Occupied}\end{array}\right) + \left(\frac{2}{3} \times \frac{\text{Unusable Space}}{\text{No. of Attaching Entities}}\right)}{\text{Pole Height}}\right]$$

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2009–0203]

Pipeline Safety: Notice of Technical Pipeline Safety Advisory Committee Meetings

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA); DOT.

ACTION: Notice of technical pipeline safety advisory committee meetings.

SUMMARY: This notice announces a public meeting of the Technical Pipeline Safety Standards Committee (TPSSC) and of the Technical Hazardous Liquid Pipeline Safety Standards Committee (THLPSSC). The PHMSA staff will brief the committee members on pipeline regulatory actions and policy concerns. The purpose of the meeting is to keep the members updated on current safety concerns, proposed rules, and future proposals.

DATES: The meeting will be on Thursday, August 19, 2010, from 1 p.m. to 4 p.m. EST.

FOR FURTHER INFORMATION CONTACT: Cheryl Whetsel by phone at 202–366–4431 or by e-mail at *cheryl.whetsel@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Meeting Details

The TPSSC and the THLPSSC will take part in the meeting by telephone conference call. The public may attend the meeting at the U.S. Department of Transportation, 1200 New Jersey Avenue, SE., Washington, DC 20590, Room E27–302. Attendees should register in advance at *http://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=66.* PHMSA will post any new information or changes on the PHMSA/Office of Pipeline Safety web page (*http://PHMSA.dot.gov*) about 15 days before the meeting takes place.

Comments on the meeting may be submitted to the docket in the following ways:

E-Gov Web Site: http://www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency.

Fax: 1–202–493–2251.

Mail: Docket Management Facility; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue, SE., West Building, Room W12–140, Washington, DC 20590–001.

Hand Delivery: Room W12–140 on the ground level of the DOT West Building, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Instructions: Identify the docket number, PHMSA–2009–0203 at the beginning of your comments. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. You should know that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). Therefore, you may want to review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477) or view the Privacy Notice at *http://www.regulations.gov* before submitting any such comments.

Docket: For access to the docket or to read background documents or comments, go to *http://www.regulations.gov* at any time or to Room W12–140 on the ground level of the DOT West Building, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

If you wish to receive confirmation of receipt of your written comments, please include a self-addressed, stamped postcard with the following statement: "Comments on PHMSA–2009–0203." The Docket Clerk date stamps the postcard prior to returning it to you via the U.S. mail. Please note that due to delays in the delivery of U.S. mail to Federal offices in Washington, DC, we recommend that persons consider an alternative method (internet, fax, or professional delivery service) of submitting comments to the docket and ensuring their timely receipt at DOT.

Privacy Act Statement

Anyone may search the electronic form of comments received in response to any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). DOT's complete Privacy Act Statement was published in the **Federal Register** on April 11, 2000 (65 FR 19477).

Information on Services for Individuals With Disabilities

For information on facilities or services for individuals with disabilities, or to seek special assistance at the meetings, please contact Cheryl Whetsel at 202–366–4431 by August 16, 2010.

II. Committee Background

These two statutorily-mandated committees advise PHMSA on proposed safety standards, risk assessments, and safety policies for natural gas pipelines and for hazardous liquid pipelines. Both committees fall under the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. 1) and both are mandated by the pipeline safety law (49 U.S.C. Chap. 601). Each committee consists of 15 members—with membership evenly divided among the Federal and State Government, the regulated industry, and the public. The committees advise PHMSA on technical feasibility, practicability, and cost-effectiveness of each proposed pipeline safety standard.

III. Preliminary Agenda

The PHMSA staff will brief the committees on several regulatory and policy initiatives including:

- Pipeline safety reauthorization.
- PHMSA accomplishments (National Transportation Safety Board, General Accounting Office, Congressional mandates).
- PHMSA priorities (new construction, damage prevention), and the status of PHMSA rulemaking initiatives.
- Administrative matters of the committee (charter, how we can best conduct business).

Authority: 49 U.S.C. 60102, 60115; 60118.

Issued in Washington, DC, on July 27, 2010.

Jeffrey D. Wiese,

Associate Administrator for Pipeline Safety.

RIN 1018-AW55

Endangered and Threatened Wildlife and Plants; Designation of Critical Habitat for *Carex lutea* (Golden Sedge)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Revised proposed rule; reopening of comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the reopening of the comment period on our March 10, 2010 (75 FR 11080), proposed rule to designate critical habitat for *Carex lutea* (golden sedge) under the Endangered Species Act of 1973, as amended (Act). We also announce the availability of the draft economic analysis (DEA) associated with the proposed rule. In addition, in this document, we propose to enlarge two previously proposed subunits of critical habitat because we discovered that *Carex lutea* occupies an area at these two subunits that is greater than what we believed when we were preparing the March 10, 2010 proposed rule. We are reopening the comment period on the proposal for an additional 30 days to allow interested parties an opportunity to comment simultaneously on the revised proposed critical habitat designation, the associated DEA, and our amended required determinations section. Comments previously submitted need not be resubmitted and will be fully considered in preparation of the final rule.

DATES: We will consider public comments received or postmarked on or before September 2, 2010. Please note that if you are using the *Federal eRulemaking Portal* (see **ADDRESSES** section, below) the deadline for submitting an electronic comment is 11:59 p.m. Eastern Daylight Savings Time on this date.

ADDRESSES: You may submit comments by one of the following methods:

- Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions for submitting comments to Docket No. FWS-R4-ES-2010-0003.
- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: FWS-R4-ES-2010-0003; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, Suite 222; Arlington, VA 22203.

We will post all comments on *http://www.regulations.gov*. This generally means that we will post any personal information you provide us (see the Public Comments section below for more information).

FOR FURTHER INFORMATION CONTACT: Pete Benjamin, Field Supervisor, U.S. Fish and Wildlife Service, Raleigh Fish and Wildlife Office, P.O. Box 33726, Raleigh, NC 27636-3726; by telephone 919-856-4520; or by facsimile 919-856-4556. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Public Comments

We will accept written comments and information during this reopened comment period on the proposed designation of critical habitat for *Carex lutea* that we published in the **Federal Register** on March 10, 2010 (75 FR 11080), the two expanded subunits proposed as critical habitat and our amended required determinations section provided in this document, and the draft economic analysis (DEA) of the proposed designation of critical habitat for *Carex lutea.* We will consider information and recommendations from all interested parties. We are particularly interested in comments concerning:

(1) The reasons why we should or should not designate areas as "critical habitat" under section 4 of the Act (16 U.S.C. 1531 *et seq.*), including whether there are threats to *Carex lutea* from human activity, the degree of which can be expected to increase due to the designation, and whether the benefit of designation would outweigh threats to the species caused by the designation, such that the designation of critical habitat is prudent.

(2) Specific information on:

- The amount and distribution of *Carex lutea*;
- What areas containing features essential to the conservation of the species should be included in the designation and why;
- Special management considerations or protections for the physical and biological features essential to *Carex lutea* conservation that have been identified in the proposed rule that may be needed, including managing for the potential effects of climate change; and
- What areas not currently occupied by the species are essential to the conservation of the species and why.

(3) Specific information on *Carex lutea* and the habitat components (physical and biological features) essential to the conservation of this species.

(4) Any information on the biological or ecological requirements of this species.

(5) Land-use designations and current or planned activities in areas occupied by the species, and their possible impacts on the species and the proposed critical habitat.

(6) Any foreseeable economic, national security, or other potential impacts resulting from the proposed designation and, in particular, any impacts on small entities and the benefits of including or excluding areas that are subject to these impacts.

(7) Whether the benefits of excluding any particular area from critical habitat outweigh the benefits of including that area as critical habitat under section 4(b)(2) of the Act, after considering the potential impacts and benefits of the proposed critical habitat designation.

(8) Whether our approach to designating critical habitat could be improved or modified in any way to provide for greater public participation and understanding, or to assist us in accommodating public concerns and comments.

(9) Information on the extent to which the description of potential economic impacts in the DEA is complete and accurate.

You may submit your comments and materials concerning the proposed rule, this document, or the DEA by one of the methods listed in the **ADDRESSES** section.

If you submitted comments or information on the proposed critical habitat rule for *Carex lutea* that we

published on March 10, 2010 (75 FR 11080), you do not have to resubmit them. Your comments are included in the public record for this rulemaking, and we will fully consider them in the preparation of our final determination.

If you submit a comment via *http://www.regulations.gov*, your entire comment—including your personal identifying information—will be posted on the website. We will post all hardcopy comments on *http://www.regulations.gov* as well. If you submit a hardcopy comment that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Please include sufficient information with your comments to allow us to verify any scientific or commercial information you include.

Comments and materials we receive, as well as supporting documentation used in preparing the proposed rule and DEA, will be available for public inspection on *http://www.regulations.gov*, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service's Raleigh Fish and Wildlife Office (see **FOR FURTHER INFORMATION CONTACT**). You may obtain copies of the proposed rule and the DEA on the Internet at *http://www.regulations.gov* at Docket Number: FWS-R4-ES-2010-0003, or by mail from the Raleigh Fish and Wildlife Office (see **FOR FURTHER INFORMATION CONTACT**).

Background

Species Information

Carex lutea is a perennial member of the sedge family (Cyperaceae). The species is endemic to the Black River section of the Coastal Plain Province of North Carolina. The North Carolina Natural Heritage Program (NCNHP) recognizes eight populations, all within a 16-by-5-mile (26-by-8-kilometer) area, extending southwest from the community of Maple Hill.

Carex lutea occurs in the Pine Savanna (Very Wet Clay Variant) natural community type characterized by an open to sparse canopy dominated by pond pine (*Pinus serotina*), and usually with some longleaf pine (*P. palustris*) and pond cypress (*Taxodium ascendens*).

Carex lutea is threatened by fire suppression; habitat alteration, such as land conversion for residential, commercial, or industrial development; mining; drainage for silviculture and agriculture; highway expansion; and herbicide use along utility and highway rights-of-way.

Previous Federal Actions

We listed *Carex lutea* as an endangered species on January 23, 2002 (67 FR 3120). We found that the designation of critical habitat was not prudent in the proposed listing rule (64 FR 44470, August 16, 1999). Upon reconsideration, we found that a critical habitat designation was prudent in the final listing rule (67 FR 3120, January 23, 2002); however, at that time, we deferred proposal of critical habitat due to budgetary and workload constraints.

On December 19, 2007, the Center for Biological Diversity filed a complaint for declaratory and injunctive relief challenging the Service's continuing failure to timely designate critical habitat for this species as well as three other plant species (*Center for Biological Diversity* v. *Kempthorne*, C-04-3240 JL (N. D. Cal.)). In a settlement agreement dated April 11, 2008, the Service agreed to submit for publication in the **Federal Register** a proposed designation of critical habitat, if prudent and determinable, on or before February 28, 2010, and a final determination by February 28, 2011. The Service determined that critical habitat was prudent for *Carex lutea* and published a proposed critical habitat designation on March 10, 2010 (75 FR 11080).

In total, approximately 189 acres (ac) (76 hectares (ha)) of land in Onslow and Pender Counties, North Carolina, fall within the areas that we proposed as critical habitat for this species on March 10, 2010.

Proposed Critical Habitat Designation—Amended

Additional field surveys at two extant *Carex lutea* subpopulations indicate that the extent of the golden sedge at those sites is actually greater than what was originally believed (Suiter 2010, pers. obs.). These two areas contain all of the primary consitutent elements that were identified in our previously published critical habitat designation for *Carex lutea*. Therefore, we propose the following changes to units 5 and 8.

Proposed Changes to Unit 5, Onslow County, North Carolina

Additional *Carex lutea* plants were found on the north side of the private sand road immediately adjacent to the area previously defined as subunit 5D (Sandy Run Savannas) in Onslow County, North Carolina. Due to their close proximity to each other, these plants are considered an extension of the subpopulation at subunit 5D. Although not discovered until 2010, it is extremely likely that this subpopulation was present at the time of listing. The area where the additional plants were found has been fire suppressed for several years, and it is believed that recent prescribed fires in the winter of 2010 opened this area to sunlight, allowing the *Carex lutea* plants to flourish. The fire also removed some thick, woody vegetation and allowed easy access for Service biologists to conduct surveys. This remnant pine savanna contains all of the primary constituent elements (PCEs) identified for *Carex lutea*.

Excluding the roadbed, subunit 5D, which was 0.3 ac (0.1 ha) in our March 10, 2010, proposed rule (75 FR 11080), would increase by 4.6 ac (1.9 ha) to a total of 4.9 ac (2.0 ha) in size. Based on this new information and the adjustment to our previously proposed critical habitat areas, Unit 5, all of which is owned by the N.C. Division of Parks and Recreation and managed as the Sandy Run Savannas State Natural Area, would increase from 20.6 ac (8.3 ha) to 25.2 ac (10.2 ha) of proposed critical habitat.

Proposed Changes to Unit 8, Pender County, North Carolina

The area we identified in our March 10, 2010, proposed rule (75 FR 11080), as subunit 8C (McLean Savanna) in Pender County, North Carolina, is owned by The Nature Conservancy (TNC) and a private company; however, TNC anticipates acquiring the privately owned section in the next 12 months. The *Carex lutea* plants in subunit 8C occupy an area larger than what was originally known (Suiter 2010, pers. obs.). Based on what we know about the biology of the species, we believe that the additional plants have been present for many years, but they were not discovered until May 2010, when the Service first thoroughly surveyed the site. Accordingly, the Service has expanded the area of proposed subunit 8C from 1.6 ac (0.6 ha) to 9.8 ac (4.0 ha), for an increase of 8.2 ac (3.3 ha). The revised proposed critical habitat area contains all of the PCEs identified for *Carex lutea*. Unit 8 would increase from 44.4 ac (17.9 ha) to 52.6 ac (21.3 ha) of proposed critical habitat.

With the inclusion of these additional areas, the Service is now proposing 8 units (21 subunits) totaling approximately 201.8 ac (81.7 ha) in Onslow and Pender Counties, North Carolina, as critical habitat for *Carex lutea*.

Section 3 of the Act defines critical habitat as the specific areas within the geographical area occupied by a species, at the time it is listed in accordance

with the Act, on which are found those physical or biological features essential to the conservation of the species and that may require special management considerations or protection, and specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. If the proposed rule is made final, section 7 of the Act will prohibit destruction or adverse modification of critical habitat by any activity funded, authorized, or carried out by any Federal agency. Federal agencies proposing actions affecting critical habitat are required to consult with us on the effects of their proposed actions, under section 7(a)(2) of the Act.

Possible Exclusions from Critical Habitat and Draft Economic Analysis

Section 4(b)(2) of the Act requires that we designate critical habitat based upon the best scientific data available, after taking into consideration the economic impact, impact on national security, or any other relevant impact of specifying any particular area as critical habitat. We may exclude an area from critical habitat if we determine that the benefits of excluding the area outweigh the benefits of including the area as critical habitat, provided such exclusion will not result in the extinction of the species. We have not proposed to exclude any areas from critical habitat for *Carex lutea*. However, the final decision on whether to exclude any areas will be based on the best scientific data available at the time of the final designation, including information obtained during the comment period and information about the economic impact of designation. Accordingly, we have prepared a DEA concerning the proposed critical habitat designation, which is available for review and comment (see **ADDRESSES**).

The intent of the DEA is to identify and analyze the potential economic impacts associated with the proposed critical habitat designation for *Carex lutea* that we published in the **Federal Register** on March 10, 2010 (75 FR 11080) and the two additional areas proposed in this document. The DEA quantifies the economic impacts of all potential conservation efforts for *Carex lutea*, some of which will likely be incurred whether or not we designate critical habitat. The economic impact of the proposed critical habitat designation is analyzed by comparing scenarios both "with critical habitat" and "without critical habitat." The "without critical habitat" scenario represents the baseline for the analysis, considering protections already in place for the species (e.g., under the Federal listing and other Federal, State, and local regulations). The baseline, therefore, represents the costs incurred regardless of whether we designate critical habitat. The "with critical habitat" scenario describes the incremental impacts associated specifically with the designation of critical habitat for the species. The incremental conservation efforts and associated impacts are those not expected to occur absent the designation of critical habitat for the species. In other words, the incremental costs are those attributable solely to the designation of critical habitat, above and beyond the baseline costs; these are the costs we may consider in the final designation of critical habitat when evaluating the benefits of excluding particular areas under section 4(b)(2) of the Act. The analysis forecasts both baseline and incremental impacts likely to occur if we finalize the proposed designation of critical habitat.

The DEA describes economic impacts of *Carex lutea* conservation efforts associated with the following categories of activity: (1) Residential development, (2) silviculture activities, and (3) transportation and utilities projects. The DEA estimates that no economic impacts are likely to result from the designation of critical habitat for *Carex lutea*. This determination is based on the fact that more than 80 percent of the proposed critical habitat is already subject to conservation measures that benefit the plant. Economic impacts are unlikely in the remaining 20 percent, given the limited potential for future economic activity and the low probability of a Federal nexus that would require consultation with the Service.

The DEA also discusses the potential benefits associated with the designation of critical habitat. The primary intended benefit of critical habitat is to support the conservation of endangered and threatened species, such as *Carex lutea*. Quantification and monetization of species conservation benefits requires information on the incremental change in the probability of *Carex lutea* conservation that is expected to result from the designation. As described in the DEA, modifications to future projects are unlikely given the extensive baseline protections already provided to *Carex lutea* habitat and the lack of anticipated economic activity and a Federal nexus on privately-owned, unprotected parcels.

Required Determinations—Amended

In our March 10, 2010, proposed rule (75 FR 11080), we indicated that we would defer our determination of compliance with several statutes and Executive Orders until the information concerning potential economic impacts of the designation and potential effects on landowners and stakeholders became available in the DEA. We have now made use of the DEA data in making this determination. In this document, we affirm the information in our proposed rule concerning: *Regulatory Planning and Review* (E.O. 12866), E.O. 12630 (Takings), Executive Order (E.O.) 13132 (Federalism), E.O. 12988 (Civil Justice Reform), the Paperwork Reduction Act, the National Environmental Policy Act, and the President's memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments" (59 FR 22951). However, based on the DEA data, we are updating our required determinations concerning the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), and E.O. 13211 (Energy Supply, Distribution, or Use).

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small government jurisdictions), as described below. However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant economic impact on a substantial number of small entities. Based on the DEA of the proposed designation, we provide our analysis for determining whether the proposed rule would result in a significant economic impact on a substantial number of small entities. Based on comments we receive, we may revise this determination as part of a final rulemaking.

According to the Small Business Administration, small entities include small organizations, such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include manufacturing and mining concerns with fewer than 500 employees, wholesale trade entities

with fewer than 100 employees, retail and service businesses with less than $5 million in annual sales, general and heavy construction businesses with less than $27.5 million in annual business, special trade contractors doing less than $11.5 million in annual business, and agricultural businesses with annual sales less than $750,000. To determine if potential economic impacts to these small entities are significant, we considered the types of activities that might trigger regulatory impacts under this designation as well as types of project modifications that may result. In general, the term significant economic impact is meant to apply to a typical small business firm's business operations.

To determine if the proposed designation of critical habitat for *Carex lutea* would affect a substantial number of small entities, we considered the number of small entities affected within particular types of economic activities, such as residential and commercial development. In order to determine whether it is appropriate for our agency to certify that this rule would not have a significant economic impact on a substantial number of small entities, we considered each industry or category individually. In estimating the numbers of small entities potentially affected, we also considered whether their activities have any Federal involvement. Critical habitat designation will not affect activities that do not have any Federal involvement; designation of critical habitat only affects activities conducted, funded, permitted, or authorized by Federal agencies.

If we finalize this proposed critical habitat designation, Federal agencies must consult with us under section 7 of the Act if their activities may affect designated critical habitat. In areas where *Carex lutea* is present, Federal agencies would also be required to consult with us under section 7 of the Act, due to the endangered status of the species. Consultations to avoid the destruction or adverse modification of critical habitat would be incorporated into the same consultation process.

In the DEA, we evaluated the potential economic effects on small entities resulting from implementation of conservation actions related to the proposed designation of critical habitat for *Carex lutea*. The DEA estimates that no economic impacts are likely to result from the designation of critical habitat for *Carex lutea*. This determination is based on the fact that more than 80 percent of the proposed critical habitat is already subject to conservation measures that benefit the plant. Economic impacts are unlikely in the remaining 20 percent, given the limited potential for future economic activity and the low probability of a Federal nexus that would require consultation with the Service. Based on that analysis, no impacts to small entities are expected as a result of the proposed critical habitat designation. Please refer to Appendix A of the DEA of the proposed critical habitat designation for a more detailed discussion of our analysis.

In summary, we have considered whether the proposed designation would result in a significant economic impact on a substantial number of small entities. Information for this analysis was gathered from the Small Business Administration, stakeholders, and the Service. For the reasons discussed above, and based on currently available information, we certify that if promulgated, the proposed designation would not have a significant economic impact on a substantial number of small business entities. Therefore, an initial regulatory flexibility analysis is not required.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), we make the following findings:

(a) This revised rule would not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both "Federal intergovernmental mandates" and "Federal private sector mandates." These terms are defined in 2 U.S.C. 658(5)-(7). "Federal intergovernmental mandate" includes a regulation that "would impose an enforceable duty upon State, local, or Tribal governments" with two exceptions. It excludes "a condition of Federal assistance." It also excludes "a duty arising from participation in a voluntary Federal program," unless the regulation "relates to a then-existing Federal program under which $500,000,000 or more is provided annually to State, local, and Tribal governments under entitlement authority," if the provision would "increase the stringency of conditions of assistance" or "place caps upon, or otherwise decrease, the Federal Government's responsibility to provide funding," and the State, local, or Tribal governments "lack authority" to adjust accordingly. At the time of enactment, these entitlement programs were: Medicaid; Aid to Families with Dependent Children work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. "Federal private sector mandate" includes a regulation that "would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program."

The designation of critical habitat does not impose a legally binding duty on non-Federal government entities or private parties. Under the Act, the only regulatory effect is that Federal agencies must ensure that their actions do not jeopardize the continued existence of the species, or destroy or adversely modify critical habitat under section 7. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency. Furthermore, to the extent that non-Federal entities are indirectly impacted because they receive Federal assistance or participate in a voluntary Federal aid program, the Unfunded Mandates Reform Act would not apply; nor would critical habitat shift the costs of the large entitlement programs listed above onto State governments.

(b) As discussed in the DEA of the proposed designation of critical habitat for *Carex lutea*, we do not believe that this rule would significantly or uniquely affect small governments because it would not produce a federal mandate of $100 million or greater in any year; that is, it is not a "significant regulatory action" under the Unfunded Mandates Refrom Act . The lands being proposed for critical habitat designation are owned by private individuals, The Nature Conservancy and the State of North Carolina (Division of Parks and Recreation, Department of Transportation and Wildlife Resources Commission). None of these government entities fit the definition of "small governmental jurisdiction." The DEA also identified no cost resulting from the critical habitat designation. Because no incremental costs are anticipated, no small entities are expected to be affected by the rule. Therefore, a Small Government Agency Plan is not required.

Energy Supply, Distribution, or Use

On May 18, 2001, the President issued an Executive Order (E.O. 13211; Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) on regulations that significantly affect energy supply, distribution, and use. E.O. 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. The OMB's guidance for implementing this Executive Order outlines nine outcomes that may constitute "a significant adverse effect" when compared to no regulatory action. As discussed in Appendix A, the DEA finds that none of these criteria are relevant to this analysis. The DEA concludes that since no modifications are anticipated to result from the designation of critical habitat, energy-related impacts are not expected. Since no incremental impacts are forecast associated specifically with this rulemaking on the production, distribution, or use of energy, designation of critical habitat for *Carex lueta* is not expected to lead to any adverse outcomes (such as a reduction in electricity production or an increase in the cost of energy production or distribution). A Statement of Energy Effects is not required.

Proposed Regulation Promulgation

Accordingly, we propose to further amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as proposed to be amended at 75 FR 11080 (March 10, 2010), as follows:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361-1407; 16 U.S.C. 1531-1544; 16 U.S.C. 4201-4245; Pub. L. 99-625, 100 Stat. 3500; unless otherwise noted.

2. Critical habitat for *Carex lutea* (golden sedge) in § 17.96, which was proposed to be added to paragraph (a) on March 10, 2010, at 75 FR 11080, is proposed to be amended by revising the maps in paragraphs (5), (10)(vi), and (13)(iv), to read as follows:

§ 17.96 Critical habitat—plants.

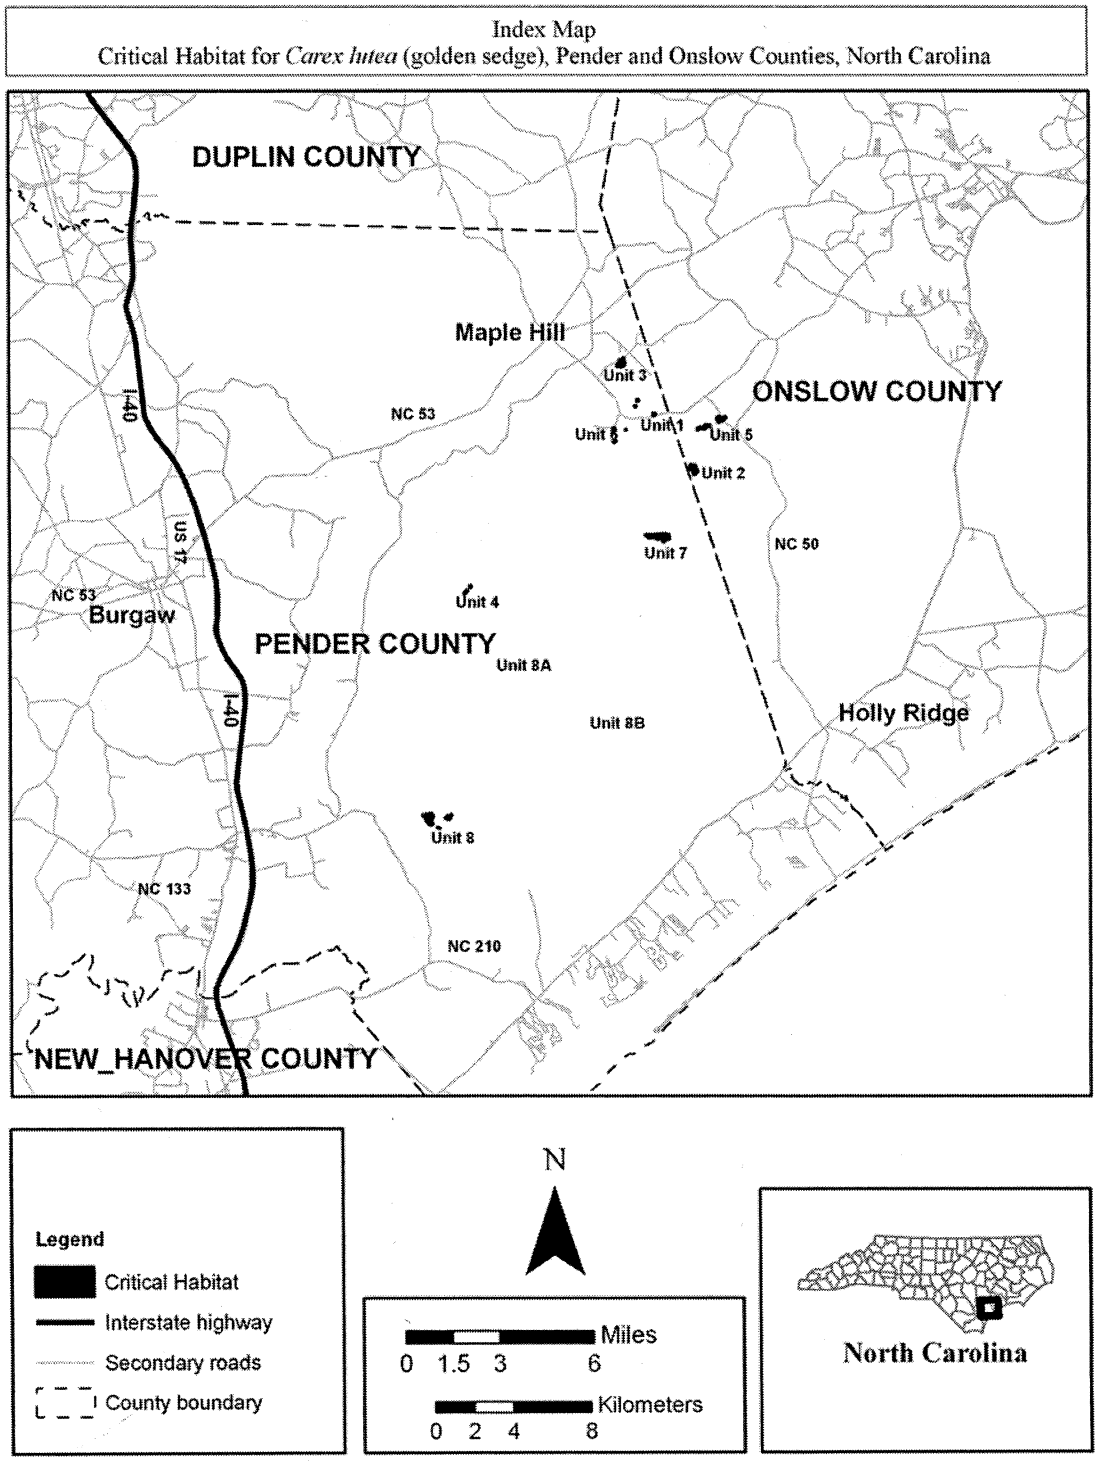
(a) Flowering plants.

* * * * *

Family Cyperaceae: *Carex lutea* (golden sedge)

* * * * *

(5) **Note:** Index Map (Map 1) follows:



* * * * *

(10) * * *

Notices

Federal Register
Vol. 75, No. 148
Tuesday, August 3, 2010

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

AFRICAN DEVELOPMENT FOUNDATION

African Development Foundation, Board of Directors Meeting

TIME: Tuesday, August 17, 2010, 8:30 a.m. to 1 p.m.

PLACE: African Development Foundation, Conference Room, 1400 I Street, NW., Suite 1000, Washington, DC 20005.

DATE: Tuesday, January 26, 2010.

STATUS: 1. Open session, Tuesday, January 26, 2010, 8:30 a.m. to 12 a.m.; and

2. Closed session, Tuesday, January 26, 2010, 12 p.m. to 1 p.m.

Due to security requirements and limited seating, all individuals wishing to attend the open session of the meeting must notify Michele M. Rivard at (202) 673–3916 or *mrivard@usadf.gov* of your request to attend by 5 p.m. on Thursday, August 12, 2010.

Doris Martin,

General Counsel, USADF.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Information Collection: Emergency Conservation Program

AGENCY: Farm Service Agency, USDA.

ACTION: Notice; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is seeking comments from all interested individuals and organizations on an extension with revision of currently approved information collection associated with the Emergency Conservation Program (ECP). To assist with the modernization of ECP, new forms, which allow for multiple practices and multiple farms and tracts, will be used in lieu of the AD–245 for application processed through the new web-based software.

DATES: We will consider comments that we receive by October 4, 2010. We will consider comments submitted after this date to extent possible.

ADDRESSES: We invite you to submit comments on this Notice. In your comment, include the volume, date, and page number of this issue of the **Federal Register**. You may submit comments by any of the following methods:

E-Mail: Send comments to: *Katina.Hanson@wdc.usda.gov.*

Fax: (202) 720–4619.

Mail: Katina Hanson, ECP Program Manager, Conservation and Environmental Programs Division, Farm Service Agency, United States Department of Agriculture, STOP 0513, 1400 Independence Avenue, SW., Washington, DC 20250–0513.

Comments also should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Katina Hanson, ECP Program Manager, (202) 720–0062.

SUPPLEMENTARY INFORMATION:

Description of Information Collection

Title: Emergency Conservation Program.

OMB Control Number: 0560–0082.

Expiration Date: January 31, 2011.

Type of Request: Extension and Revision of a Currently Approved Information Collection.

Abstract: This information collection is to allow FSA to effectively administer the regulations under the ECP. The regulations at 7 CFR part 701 set forth basic policies, program provisions, and eligibility requirements for owners and operators to enter into agreement with, to apply for financial and technical assistance and for receiving cost-share payments under the ECP. The revision to the currently approved information collection is in response to the need to continue to service ECP customers and more efficiently collect information on cost-share requests, agreements, and performance by modernizing the ECP forms and software processes.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .3 hours (19 minutes) per response. The average travel time, which is included in the total annual burden, is estimated to be 1 hour per respondent.

Respondents: Owners, operators and other eligible agricultural producers on eligible farmland.

Number of Respondents: 40,000.

Estimated Number of Responses per Respondent: 1.

Estimated Annual Number of Respondents: 40,000.

Estimated Total Annual Burden Hours: 51,263.

We are requesting comments on all aspects of this information collection, and to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility and clarity of the information to be collected;

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission for Office of Management and Budget approval.

Signed at Washington, DC, on July 27, 2010.

Jonathan W. Coppess,

Administrator, Farm Service Agency.

[FR Doc. 2010–19045 Filed 8–2–10; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Information Collection; Customer Data Worksheet Request for Service Center Information Management System (SCIMS) Record Changes

AGENCY: Farm Service Agency, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on an extension of a currently approved information collection to support Customer Data Worksheet Request for Service Center Information Management System (SCIMS) that contains the producer's personal information. Specifically, FSA is requesting comment on the form AD–2047, "Customer Data Worksheet Request for SCIMS Record Change." FSA is using the collected information in support of documenting critical producer data changes (customer name, current mailing address and tax identification number) in SCIMS made at the request of the producer to correct or update their information. The collection of critical producer data are being used to update existing producer record data and document when and who initiates and changes the record in SCIMS.

DATES: We will consider comments that we receive by October 4, 2010.

ADDRESSES: We invite you to submit comments on this notice. In your comments, include date, volume, and page number of this issue of the **Federal Register**. You may submit comments by any of the following methods:

- *Mail:* Mike Sienkiewicz, Agricultural Program Specialist, USDA, FSA, STOP 0517, 1400 Independence Avenue, SW., Washington, DC 20250–0517.
- *E-mail: mike.sienkiewicz@wdc.usda.gov.*
- *Fax:* 202–720–0051.

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

SUPPLEMENTARY INFORMATION:

Title: Customer Data Worksheet Request for SCIMS Record Changes.

OMB Control Number: 0560–0265.

Type of Request: Extension of currently approved information collection.

Abstract: The information collection is necessary to effectively monitor critical producer data changes made in the SCIMS at the request of the producer to correct or update their information. The form of AD–2047, "Customer Data Worksheet Request for SCIMS Record Change", is used to collect the information from the producers to make changes to the information in SCIMS. The necessity to monitor critical producer data changes in the SCIMS database is a direct result of the OMB Circular A–123 Remediation/Corrective Action Plan for County Office Operations which requires effective internal controls to be in place for Federal programs. The FSA team was established and reviewed and documented key controls related to all material producer accounts. FSA also included the analysis on a review of the SCIMS.

Estimated Average Time to Respond: Public reporting burden for collection of this information is estimated to average .17 hours per response. The average travel time, which is included in the total annual burden, is estimated to be 1 hour per respondent.

Type of Respondents: FSA, NRCS, and RD customers currently residing in SCIMS.

Estimated Number of Respondents: 45,000.

Estimated Number of Responses per Respondent: 1.15.

Estimated Annual Number of Responses: 45,000.

Estimated Total Annual Burden Hours: 8,798.

We are requesting comments on all aspects of this information collection and to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of burden, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission for Office of Management and Budget approval.

Signed at Washington, DC, on July 27, 2010.

Jonathan W. Coppess,

Administrator, Farm Service Agency.

[FR Doc. 2010–19047 Filed 8–2–10; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2010-0064]

Notice of Request for Extension of Approval of an Information Collection; Emerald Ash Borer; Host Material from Canada

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request extension of approval of an information collection associated with regulations for the importation of certain articles from Canada to prevent the introduction and spread of emerald ash borer in the United States.

DATES: We will consider all comments that we receive on or before October 4, 2010.

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to (*http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2010-0064*) to submit or view comments and to view supporting and related materials available electronically.
- Postal Mail/Commercial Delivery: Please send one copy of your comment to Docket No. APHIS-2010-0064, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comment refers to Docket No. APHIS-2010-0064.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at (*http://www.aphis.usda.gov*).

FOR FURTHER INFORMATION CONTACT: For information on regulations for the importation of certain articles from Canada to prevent the introduction and

spread of emerald ash borer in the United States, contact Mr. David Lamb, Import Specialist, Regulations, Permits, and Manuals, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 734-0627. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Emerald Ash Borer; Host Material from Canada.

OMB Number: 0579-0319.

Type of Request: Extension of approval of an information collection.

Abstract: As authorized by the Plant Protection Act (7 U.S.C. 7701 *et seq.*) (PPA), the Secretary of Agriculture may prohibit or restrict the importation, entry, exportation, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, means of conveyance, or other article if the Secretary determines that the prohibition or restriction is necessary to prevent a plant pest or noxious weed from being introduced into or disseminated within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA.

APHIS regulations in 7 CFR part 319 prohibit or restrict the importation of certain plants and plant products into the United States to prevent the introduction of plant pests. Subpart—Nursery Stock, Plants, Roots, Bulbs, Seeds, and Other Plant Products (7 CFR 319.37 through 319.37-14) restricts, among other things, the importation of living plants, plant parts, and seeds for propagation; and Subpart–Logs, Lumber, and Other Unmanufactured Wood Articles (7 CFR 310.40-1 through 319.40-11) governs the importation of various logs, lumber, and other unmanufactured wood products into the United States. Both subparts contain regulations that restrict or prohibit the importation of emerald ash borer host material from Canada to prevent the introduction and spread of EAB, a destructive wood-boring insect that attacks ash trees, in the United States. These regulations involve information collection activities, including phytosanitary certificates, permit applications, and certificates of inspection.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.6666 hours per response.

Respondents: Importers of certain articles from Canada; and the Canadian Food Inspection Agency.

Estimated annual number of respondents: 6.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 6.

Estimated total annual burden on respondents: 4 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 28th day of July 2010.

Kevin Shea

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2010–18989 Filed 8–2–10; 8:45 am]

BILLING CODE 3410–34–S

DEPARTMENT OF AGRICULTURE

Forest Service

Kern and Tulare Counties Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Kern and Tulare Counties Resource Advisory Committee (RAC) will meet in Porterville, Kernville, and Bakersfield, California. The committee is meeting as authorized under the Secure Rural Schools and Community Self-Determination Act (Pub. L. 110–343) and in compliance with the Federal Advisory Committee Act. The purpose of the meetings is to establish and implement a process to accept projects and determine which projects to recommend to the Forest Supervisor for funding under Title II of the Act.

DATES: The meetings will be held on August 26, September 23, September 29, October 28, and November 18, 2010. All meetings will begin at 5 p.m.

ADDRESSES: The August 26, September 29, October 28 meetings will be held at the Sequoia National Forest Headquarters, 1839 South Newcomb Street, Porterville, California. Videoconferencing for the August 26 meeting will be available only at the Kernville Office of the Kern River Ranger District, 105 Whitney Road, Kernville, California. The September 23 and November 18 meetings will be held at the County of Kern Administrative Office, 1115 Truxtun Avenue, Bakersfield, California.

Written comments should be sent to Priscilla Summers, Western Divide Ranger District, 32588 Highway 190, Springville, California 93265. Comments may also be sent via e-mail to *psummers@fs.fed.us,* or via facsimile to 559–539–2067.

All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Western Divide Ranger District, 32588 Highway 190, Springville, CA 93265. Visitors are encouraged to call ahead to 559–539–2607 to facilitate entry into the building and access to the record.

FOR FURTHER INFORMATION CONTACT: Penelope Shibley, RAC Coordinator, Kernville Ranger Station, P.O. Box 9, Kernville, CA 93238; (760) 376–3781; or e-mail: *pshibley@fs.fed.us.* Individuals who use telecommunication devices for the deaf (TDD) may call 559–781–6650 between 8 a.m. and 4:30 p.m., Pacific Daylight Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The meetings are open to the public. Committee discussions are limited to Forest Service staff and committee members. The following business will be conducted: (1) Introductions of all committee members, replacement members, and Forest Service personnel; (2) develop a procedure to receive, process, and recommend projects for funding; (3) develop a schedule for accepting and processing project applications; and (4) receive public comment. Persons who wish to bring

related matters to the attention of the Committee may file written statements with the Committee staff before or after the meeting.

Dated: July 28, 2010.

Tina J. Terrell,

Forest Supervisor.

[FR Doc. 2010–19023 Filed 8–2–10; 8:45 am]

BILLING CODE 3410–11–P

DEPARTMENT OF COMMERCE

International Trade Administration

Determination by the Department of Commerce on the Wholly Formed Requirement for Qualifying Woven Fabric Under the Dominican Republic Earned Import Allowance Program

July 29, 2010.

AGENCY: Department of Commerce, International Trade Administration.

ACTION: Notice.

SUMMARY: The Department of Commerce has determined to maintain the current interpretation of the wholly formed requirement of qualifying woven fabric under the Dominican Republic Earned Import Allowance Program (DREIAP).

FOR FURTHER INFORMATION CONTACT: Robert Carrigg, Office of Textiles and Apparel, Import Administration, U.S. Department of Commerce, (202) 482–2573.

SUPPLEMENTARY INFORMATION:

Authority: Section 2(a) of the Andean Trade Preference Extension Act of 2008 ("ATPEA"); Section 404(b)(2)(H) of the Dominican Republic-Central America-United States Free Trade Agreement ("CAFTA–DR FTA") Implementation Act, as amended; Imports of Certain Apparel Articles: Interim Procedures for the Implementation of the Earned Import Allowance Program Established Under the Andean Trade Preference Extension Act of 2008 (74 FR 3563, published January 21, 2009) ("Interim Procedures").

DATES: *Effective Date:* August 3, 2010.

Background

On December 1, 2008, the Department of Commerce implemented provisions under the Andean Trade Preference Extension Act of 2008 (Pub. L. 110–436, 122 Stat. 4976) (ATPEA or implementing legislation). Section 2 of the ATPEA amends Title IV of the CAFTA–DR FTA Implementation Act (Pub. L. 109–53; 119 Stat. 495). Specifically, Title IV of the CAFTA–DR FTA Implementation Act is amended by adding Section 404, creating a benefit for eligible apparel articles wholly assembled in the Dominican Republic that meet the requirements for a "2 for 1" earned import allowance. Section 2 of the ATPEA requires the Secretary of Commerce to establish a program to provide earned import allowance certificates to any producer or entity controlling production of eligible apparel articles in the Dominican Republic, such that apparel wholly assembled in the Dominican Republic from fabric or yarns, regardless of their source, and imported directly from the Dominican Republic, may enter the United States duty-free, pursuant to the satisfaction of the terms governing issuance of the earned import allowance certificate. The Secretary of Commerce has delegated his authority under the CAFTA–DR FTA Implementation Act to implement and administer the Earned Import Allowance Program to the International Trade Administration's Office of Textiles and Apparel ("OTEXA").

On January 21, 2009, OTEXA published interim procedures, 74 FR 3563, implementing Section 2 of the ATPEA. These procedures set forth the provisions OTEXA will follow in implementing the DREIAP. In accordance with these procedures, OTEXA issues certificates to qualifying apparel producers to accompany imports of eligible apparel articles wholly formed in the Dominican Republic and exported from the Dominican Republic. Such certificates will be issued as long as there is a sufficient balance of square meter equivalents available as a result of the purchase of qualifying woven fabric. "Qualifying woven fabric" is defined in Section 2 of the ATPEA and in OTEXA's interim procedures as "woven fabric of cotton wholly formed in the United States from yarns wholly formed in the United States" and intended for production of apparel in the Dominican Republic. *See* Section 2(e) of the *Interim Procedures;* Section 404(c)(4) of the CAFTA–DR FTA Implementation Act, as amended by Section 2 of the ATPEA. Neither the ATPEA nor the interim procedures define the term "wholly formed" as it is used in the definition of "qualifying woven fabric."

OTEXA received inquiries regarding the interpretation of "wholly formed" as a requirement under the definition of "qualifying woven fabric." Accordingly, on April 3, 2009 (74 FR 15254), OTEXA requested public comment on the intended meaning of the "wholly formed" requirement in the definition of "qualifying woven fabric" for the purposes of the DREIAP. In that request for public comment, OTEXA explained that it "currently interprets 'wholly formed' within the definition of 'qualifying woven fabric' to require that all production processes and finishing operations, starting with weaving and ending with a fabric ready for cutting or assembly without further processing, take place in the United States." *Id.,* 74 FR at 15255.

OTEXA received ten comments and has carefully analyzed the points raised in each submission. These comments are available on OTEXA's Web site at *http://web.ita.doc.gov/tacgi/otexa_dr_eiap_publiccomments.nsf/504ca249c786e20f85256284006da7ab?OpenView&Start=1.* Department officials have also discussed this matter on several occasions with interested stakeholders to ensure that all points have been considered.

Commentators that support OTEXA's current interpretation contend that the DREIAP was intended to improve the competitiveness of Dominican apparel producers and create new export opportunities for United States manufacturers of qualifying fabrics. These commentators suggest that from the beginning, it was clear that the intent was to base the program on the delivery of qualifying fabric ready for cutting and sewing into trousers. There was never any discussion of permitting greige fabric (raw fabric that has yet to be bleached or dyed) to be shipped to another country for finishing and allowing such fabric to qualify for benefits under the program because it was understood that support from United States industry was dependent on the requirement that fabric be produced and finished in the United States so that it would be ready for cutting and sewing upon arrival in the Dominican Republic. These commentators argue that effective enforcement of the program would be more difficult if third countries were able to participate as finishers. They also contend that the dyeing and finishing stage imparts distinct characteristics that only then make the fabric suitable for a specific apparel application as envisaged by the legislation. Unfinished fabric can be used for applications other than the assembly of trousers and similar garments. The commentators contend that although the program was enacted as an amendment to the CAFTA–DR FTA Implementation Act, it could have been implemented as a stand-alone bill or as an amendment to other relevant legislation. These commentators suggest that the connection between the program and the vehicle to which it was attached is one of legislative convenience. These commentators state that at no time was there an expression

to treat the program as other than a preferential program and at no time was it contemplated that the finishing of qualifying fabrics could take place outside the United States.

Furthermore, these commentators state that allowing finishing outside the United States does not preserve or promote the use of United States fabrics as intended by the program. Lastly, these commentators contend that there is more than sufficient capacity in the United States to dye, print, and finish the amount of fabric required by Dominican Republic apparel manufacturers for qualification under the program.

Commentators who disagree with OTEXA's current interpretation assert that the term "wholly formed" as used in the DREIAP does not require the fabric to be dyed and finished in the United States, and that such an interpretation negates the benefits of the program. These commentators contend that this issue was never addressed during the discussions leading to the creation of the program. As such, they contend that OTEXA's current interpretation was not contemplated in the drafting of the legislation and is not required under the express terms of the legislation. They argue that Customs and Border Protection ("CBP") interpreted the term "wholly formed" when used in the Caribbean Basin Trade Preference Act ("CBTPA") of 2000 (Pub. L. 106–200, 114 Stat, 251, 2766) as not requiring dyeing and finishing. These commentators contend that Congress did not amend the definition of "wholly formed" in the Trade Act of 2002 (Pub. L. 107–210), but only added a new requirement. These commentators state that because the DREIAP is not an amendment to the CAFTA–DR FTA, the requirements for dyeing and finishing specified in two footnotes in that agreement do not apply to the term in this program. They contend that there is no requirement to directly ship qualifying fabric to the Dominican Republic; therefore, dyeing and finishing of United States greige fabric is not precluded. They argue that OTEXA's interpretation is inconsistent with other similar programs. Finally, these commentators argue that originating apparel under free trade agreements need not be dyed or finished by the parties.

Analysis and Determination

After careful consideration of the interested party comments, OTEXA has determined it will continue to interpret "wholly formed" within the definition of "qualifying woven fabric" to require that all production processes and finishing operations, starting with weaving and ending with a fabric ready for cutting or assembly without further processing, take place in the United States under the DREIAP.

Neither the ATPEA nor the interim procedures define the term "wholly formed" as it is used in the definition of "qualifying woven fabric." Additionally, there is no legislative history regarding this term as it is used in this program. Although not controlling, OTEXA considered testimony given by former Special Textile Negotiator for the United States Trade Representative, Scott Quesenberry. See Testimony before the United States International Trade Commission on the matter of the Earned Import Allowance Program: Evaluation of the Effectiveness of the Program for Certain Apparel from the Dominican Republic (Investigation No.: 332–503) (Nov. 18, 2009). Mr. Quesenberry testified "through the course of many years of hard negotiation on this issue, plus several months of hard work on the legislative language, this issue never came up, so I can tell you that it was not the intent of the negotiator that finishing would be allowed from outside of the United States at the Dominican Republic. This was designed to be a program between those two countries."

Without any legislative history, OTEXA considered the interpretation of "wholly formed" in light of other programs it administers. The CBTPA, which was enacted pursuant to the Trade and Development Act of 2000 (Pub. L. 106–200, 114 Stat. 251, 2766), included the phrase "wholly formed," but did not define that term. In implementing the CBTPA, CBP promulgated regulations (United States-Caribbean Basin Trade Partnership Act and Caribbean Basin Innitiative, 65 FR 59650, October 5, 2000) which did not require finishing, dyeing, or printing to occur within the region for preferential treatment. Subsequent to the promulgation of the regulations implementing CBTPA, Congress enacted the Trade Act of 2002 (Pub. L. 107–210), which amended and extended the CBTPA and established the ATPDEA. In that Act, Congress amended the CBTPA and provided in the ATPDEA the wholly formed requirement that all dyeing, printing and finishing of fabrics be carried out in the United States (Pub. L. 107–210, 116 Stat, 1035–1036):

> Apparel articles entered on or after September 1, 2002, shall qualify under the preceding sentence only if all dyeing, printing, and finishing of the fabrics from which the articles are assembled, if the fabrics are knit fabrics, is carried out in the United States. Apparel articles entered on or after September 1, 2002, shall qualify under the first sentence of this clause only if all dyeing, printing, and finishing of the fabrics from which the articles are assembled, if the fabrics are woven fabrics, is carried out in the United States.

Further, the CAFTA–DR FTA uses the term "wholly formed" in two provisions, footnote 6 to Article 3.25(8) and footnote 7 to Article 3.26. In both provisions, the definition of "wholly formed" includes dyeing and finishing. Although the terminology is used in different instances in the DREIAP Implementation Act and the CAFTA–DR FTA, OTEXA considers it persuasive in defining the term here.

OTEXA agrees with the commentators who stated that the dyeing and finishing stages impart distinct characteristics which only then make the fabric suitable for a specific apparel application; *i.e.,* intended for production of apparel in the Dominican Republic as stated in the DREIAP Implementation Act. Unfinished fabric can be used for other applications beyond the assembly of trousers and similar garments covered by DREIAP. OTEXA does not believe that dyeing and finishing outside the United States would preserve or promote the use of United States fabrics as intended by the DREIAP. Furthermore, in OTEXA's experience administering trade preference programs, OTEXA understands that often over 50 percent of the value of a fabric is attributable to the dyeing, finishing and printing process. Thus, allowing offshore finishing undercuts critical benefits to the United States textile sector, contrary to an aim of the DREIAP.

OTEXA is also mindful of the manner in which Congress directed it to administer the program. Permitting finishing outside the United States prior to the fabric being shipped to the Dominican Republic would potentially involve one or more countries and companies involved, and it would be difficult if not impossible to verify that the fabric was eventually exported to the Dominican Republic from the United States for cutting and assembly. This is a critical determination for fabric to qualify for duty free importation into the United States. See Sections 4 and 6 of the Interim Procedures, 74 FR at 3565–66.

Based on the foregoing, OTEXA has determined it will continue to interpret the term "wholly formed" within the definition of "qualifying woven fabric" to require that all production processes and finishing operations, starting with weaving and ending with a fabric ready for cutting or assembly without further

processing, took place in the United States under the DREIAP.

Kim Glas,

Deputy Assistant Secretary, Office of Textiles and Apparel.

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* August 3, 2010.

FOR FURTHER INFORMATION CONTACT: Joy Zhang or George McMahon, AD/CVD Operations, Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone: (202) 482–1168 or (202) 482–1167, respectively.

SUPPLEMENTARY INFORMATION:

Correction

On October 19, 2009, the Department of Commerce ("the Department") published in the **Federal Register** the following notice: *Stainless Steel Plate in Coils From Belgium: Final Results of Antidumping Duty Administrative Review*, 74 FR 53468 (October 19, 2009) ("*Final Results*"). Subsequent to the publication of the notice in the **Federal Register**, we identified an inadvertent error in the *Final Results.* The Department made an error in the "Cash Deposit Requirements" section of the notice, by inadvertently including an incorrect "all others" rate for exporters and/or manufacturers not covered by the review for which the *Final Results* were published. Specifically, the "all others" rate should have been listed as 8.54 percent pursuant to the implementation of the findings of the World Trade Organization ("WTO") Panel in US—Zeroing (EC). *See Implementation of the Findings of the WTO Panel in US—Zeroing (EC): Notice of Determinations Under Section 129 of the Uruguay Round Agreements Act and Revocations and Partial Revocations of Certain Antidumping Duty Orders,* 72 FR 25261 (May 4, 2007). For reference, below is the corrected paragraph regarding the "all others" rate discussed in the *Final Results.*

Cash Deposit Requirements

The following antidumping duty deposit rates will be effective upon publication of the final results of this administrative review for all shipments of stainless steel plate in coils ("SSPC") from Belgium entered, or withdrawn from warehouse, for consumption on or after the publication date of these final results, as provided for by section 751(a)(1) of the Tariff Act of 1930, as amended ("the Act"): (1) For AMS Belgium, the cash deposit rate will be the rate established in the final results of this review; (2) if the exporter is not a firm covered in this review, but was covered in a previous review or the original less-than-fair-value ("LTFV") investigation, the cash deposit rate will continue to be the company-specific rate established for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the subject merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered by this review, a prior review, or the LTFV investigation, the cash deposit rate will be 8.54 percent ad valorem, the "all-others" rate established in the implementation of the findings of the WTO Panel in US—Zeroing (EC). *See Implementation of the Findings of the WTO Panel in US—Zeroing (EC): Notice of Determinations Under Section 129 of the Uruguay Round Agreements Act and Revocations and Partial Revocations of Certain Antidumping Duty Orders*, 72 FR 25261 (May 4, 2007). These cash deposit rates shall remain in effect until further notice.

Conclusion

The Department clarifies that the "Cash Deposit Requirements" section of the *Final Results* inadvertently listed the "all others" rate as 9.86 percent and that the correct "all others" rate is 8.54 percent. The Department intends to issue revised cash deposit instructions to U.S. Customs and Border Protection (CBP) for entries made during the period of review of May 1, 2007, through April 30, 2008, which includes the corrected "all others" rate of 8.54 percent.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 27, 2010.

Paul Piquado,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN: 0648–XX96

Fisheries of the South Atlantic and Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); assessment webinar 5 for SEDAR 22 yellowedge grouper and tilefish.

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 22 Gulf of Mexico yellowedge grouper and tilefish assessment webinar 5.

SUMMARY: The SEDAR 22 assessments of the Gulf of Mexico stocks of yellowedge grouper and tilefish will consist of a series of workshops and webinars: a Data Workshop, a series of Assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The fifth SEDAR 22 Assessment Process webinar will be held on Monday, August 23, 2010 from 10 a.m. until approximately 2 p.m. (EDT). The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie Neer at SEDAR (See **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information.

A listening station will be available at the Gulf of Mexico Fishery Management Council office located at 2203 N Lois Avenue, Suite 1100, Tampa, FL 33607. Those interested in participating via the listening station should contact Julie A. Neer at SEDAR (See **FOR FURTHER INFORMATION CONTACT**) at least 1 day prior to the webinar.

FOR FURTHER INFORMATION CONTACT: Julie A Neer, SEDAR Coordinator, 4055 Faber Place, Suite 201, North Charleston, SC 29405; phone: (843) 571–4366; e-mail: *Julie.neer@safmc.net*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR)

process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop, (2) Assessment Process utilizing webinars and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 22 Assessment Webinar V:

Using datasets recommended from the Data Workshop, participants will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to the meeting.

Dated: July 28, 2010.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

International Trade Administration

Department of Commerce Measuring and Enhancing Services Trade Data Conference

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of kickoff event to improve services trade data.

SUMMARY: The International Trade Administration, in conjunction with the Bureau of Economic Analysis, the Census Bureau and the Bureau of Labor Statistics, is announcing a kick-off event for its services trade data initiative. DOC is working to ensure that the measurement of economic activity and trade in the services sector is more robust, granular and meaningful. Primary goals include enhancements to services data to ensure that it is effective for commercial decision-making, policy planning, and is relevant for trade agreements in support of increased US services exports. DOC has invited well-known policy leaders from the White House, the Department, and private sector innovators in the services information arena to speak on the topic.

DATES: The conference will be held on September 14, 2010.

Address all comments concerning this notice to the Office of Service Industries, U.S. Department of Commerce, 1401 Constitution Ave., NW., Room 1104, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Barb Rawdon, 202–482–0474 or *Barb.Rawdon@trade.gov*

SUPPLEMENTARY INFORMATION: There are significant weaknesses in data on services, even though services industries account for roughly 70 percent of the U.S. gross domestic product. Without timely, accurate information on the services sector, businesses and policy makers lack the information necessary to understand a major share of the economy and to develop modern trade and investment policy. As a first step in our Service Industry Statistical Initiative, DOC will hold a conference on September 14, 2010, to focus on measuring and enhancing services trade data.

The conference will include key players from the public and private sector with the main goal of seeking broader support and direction for improving the quality and timeliness of services trade data. A key outcome of the conference will be the development of an action plan and working groups to improve certain discrete elements of services data collection and dissemination by various public and private sector organizations.

Current issues regarding services statistics include: limitations of the industry classification system, granularity of data, adequacy of survey detail in tracking of services, accounting for intangible assets, and accuracy of service price indices.

The target audience for the conference includes senior managers from private sector companies and government, along with participants from the public policy community. The morning session will focus on the current and future status of services trade data along with innovative ideas for the future. The afternoon sessions will feature free-flowing industry-specific discussions designed to spark a dialogue on improvement ranging from readily available solutions to transformational technologies and analytics that enable better business and public policy decision-making.

DOC will accept registrations on a first-come-first-served basis. Participants will be charged $75 for attending these events if they register before September 7, 2010, and $100 if they register on or after September 7, 2010. Those who are interested in attending this event should call 703–925–9455 ext. 0.

Dated: July 29, 2010.

Barb Rawdon,

Director, Education, Healthcare and Professional Services.

BILLING CODE 3510–DR–P

COUNCIL ON ENVIRONMENTAL QUALITY

Interagency Ocean Policy Task Force—Final Recommendations of the Interagency Ocean Policy Task Force

AGENCY: Council on Environmental Quality.

ACTION: Notice of Availability, Interagency Ocean Policy Task Force's

"Final Recommendations of the Interagency Ocean Policy Task Force".

SUMMARY: On June 12, 2009, the President established an Interagency Ocean Policy Task Force, led by the Chair of the Council on Environmental Quality. The Task Force was charged with developing, with appropriate public input, a recommended national policy for the stewardship of the ocean, our coasts, and the Great Lakes; a framework for policy coordination, including specific recommendations to improve coordination and collaboration among Federal, State, tribal, and local authorities, and regional governance structures; an implementation strategy that identifies a set of priority objectives; and a framework for effective costal and marine spatial planning.

On July 19, 2010, the Task Force submitted its Final Recommendations to the President. They provide: (1) Our Nation's first ever *National Policy for the Stewardship of the Ocean, Our Coasts, and the Great Lakes;* (2) a strengthened governance structure to provide sustained, high-level, and coordinated attention to ocean, coastal, and Great Lakes issues; (3) a targeted implementation strategy that identifies and prioritizes nine categories for action that the United States should pursue; and (4) a framework for effective coastal and marine spatial planning that establishes a comprehensive, integrated, ecosystem-based approach to address conservation, economic activity, user conflict, and sustainable use of ocean, coastal, and Great Lakes resources.

DATES: None.

ADDRESSES: The Task Force's Final Recommendations are available at *http://www.whitehouse.gov/oceans* or by writing to The Council on Environmental Quality, Attn: Michael Weiss, 722 Jackson Place, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Michael Weiss, Deputy Associate Director for Ocean and Coastal Policy, (202) 456–3892.

SUPPLEMENTARY INFORMATION: On June 12, 2009, President Obama issued a Memorandum to the Heads of Executive Departments and Agencies that established an Interagency Ocean Policy Task Force, led by the Chair of the Council on Environmental Quality. That Presidential memo charged the Task Force with, within 90 days, developing recommendations that include: (1) A national policy for the oceans, our coasts, and the Great Lakes; (2) a United States framework for policy coordination of efforts to improve stewardship of the oceans, our coasts, and the Great Lakes; and (3) an implementation strategy that identifies and prioritizes a set of objectives the United States should pursue to meet the objectives of a national policy. On September 17, 2009, the Task Force's Interim Report addressing these three items was issued for 30 days public comment. The comment period ended on October 17, 2009.

The Task Force was also charged with, within 180 days, developing a recommended framework for effective coastal and marine spatial planning. The memorandum provides that the framework should be "a comprehensive, integrated, ecosystem-based approach that addresses conservation, economic activity, user conflict, and sustainable use of ocean, coastal, and Great Lakes resources consistent with international law, including customary international law as reflected in the 1982 United Nations Convention on the Law of the Sea." On December 14, 2009, the Task Force's Interim Framework addressing this item was issued for 60 days public comment. The comment period ended on February 12, 2010.

In response to this direction, the Task Force has completed its *Final Recommendations of the Interagency Ocean Policy Task Force* (Final Recommendations). The Task Force Final Recommendations set a new direction for improved stewardship of the ocean, our coasts, and the Great Lakes. They provide: (1) Our Nation's first ever *National Policy for the Stewardship of the Ocean, Our Coasts, and the Great Lakes;* (2) a strengthened governance structure to provide sustained, high-level, and coordinated attention to ocean, coastal, and Great Lakes issues; (3) a targeted implementation strategy that identifies and prioritizes nine categories for action that the United States should pursue; and (4) a framework for effective coastal and marine spatial planning that establishes a comprehensive, integrated, ecosystem-based approach to address conservation, economic activity, user conflict, and sustainable use of ocean, coastal, and Great Lakes resources.

The Final Recommendations are now available at the National Ocean Council Web site at *http://www.whitehouse.gov/oceans.*

Dated: July 27, 2010.

Nancy Sutley,

Chair, Council on Environmental Quality.

BILLING CODE 3125–W0–P

DEPARTMENT OF ENERGY

[OE Docket No. EA–281–B]

Application To Export Electric Energy; Manitoba Hydro

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of application.

SUMMARY: Manitoba Hydro (Manitoba) has applied to renew its authority to transmit electric energy from the United States to Canada pursuant to section 202(e) of the Federal Power Act (FPA).

DATES: Comments, protests, or requests to intervene must be submitted on or before September 2, 2010.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Electricity Delivery and Energy Reliability, Mail Code: OE–20, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585–0350 (FAX 202–586–8008).

FOR FURTHER INFORMATION CONTACT: Christopher Lawrence (Program Office) 202–586–5260 or Michael Skinker (Program Attorney) 202–586–2793.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the FPA (16 U.S.C. 824a(e)).

On November 17, 2003, the Department of Energy (DOE) issued Order No. EA–281, which authorized Manitoba to transmit electric energy from the United States to Canada as a power marketer using existing international transmission facilities for a two-year term. DOE renewed the Manitoba export authorization as of November 17, 2005, in Order No. EA–281–A for an additional five-year term. That Order will expire on November 17, 2010. On July 15, 2010, Manitoba filed an application with DOE for renewal of the export authority contained in Order No. EA–281–A for an additional ten-year term.

The electric energy that Manitoba proposes to export to Canada would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States. The existing international transmission facilities to be utilized by Manitoba have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate

for open access transmission by third parties.

Procedural Matters: Any person desiring to become a party to these proceedings or to be heard by filing comments or protests to this application should file a petition to intervene, comment, or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Fifteen copies of each petition and protest should be filed with DOE on or before the date listed above.

Comments on the Manitoba application to export electric energy to Canada should be clearly marked with Docket No. EA–281–B. Additional copies are to be filed directly with K. Jennifer Moroz, Manitoba Hydro Law Department, 360 Portage Avenue, Winnipeg, Manitoba Canada R3C 0G8 *and* Giuseppe Fina, Bruder, Gentile & Marcoux, L.L.P., 1701 Pennsylvania Avenue, NW., Suite 900, Washington, DC 20006. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at *http://www.oe.energy.gov/permits_pending.htm,* or by e-mailing Odessa Hopkins at *Odessa.Hopkins@hq.doe.gov.*

Issued in Washington, DC, on July 28, 2010.

Anthony J. Como,

Director, Permitting and Siting, Office of Electricity Delivery and Energy Reliability.

[FR Doc. 2010–19018 Filed 8–2–10; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Employees Occupational Illness Compensation Program Act of 2000; Corrected Revision to List of Covered Facilities

AGENCY: Department of Energy.

ACTION: Notice of corrected revision of list of covered facilities.

SUMMARY: The Department of Energy ("Department" or "DOE") periodically publishes or revises a list of facilities covered under the Energy Employees Occupational Illness Compensation Program Act of 2000, as amended ("EEOICPA" or "Act"). On June 30, 2010, DOE published a notice (75 FR 37781) that amended the previous lists. DOE has determined that the June 30, 2010, notice should be replaced. This corrected notice now replaces the previous lists by removing two facilities designated as atomic weapons employer (AWE) facilities that should not have been so designated. Previous lists or revisions were published on April 9, 2009, June 28, 2007, November 30, 2005, August 23, 2004, July 21, 2003, December 27, 2002, June 11, 2001, and January 17, 2001.

FOR FURTHER INFORMATION CONTACT: Patricia R. Worthington, Ph.D, Director, Office of Health and Safety (HS–10), (301) 903–5926.

ADDRESSES: The Department welcomes comments on this notice. Comments should be addressed to: Patricia R. Worthington, Ph.D, Director, Office of Health and Safety (HS–10), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

SUPPLEMENTARY INFORMATION:

Purpose

The EEOICPA establishes a program to provide compensation to certain employees who develop illnesses as a result of their employment with AWEs, DOE and its predecessor Agencies, certain of its contractors and subcontractors, and listed beryllium vendors. Section 3621(4) of the Act (codified at 42 U.S.C. 7384l(4)) defines an AWE as "an entity, other than the United States, that—(A) processed or produced, for use by the United States, material that emitted radiation and was used in the production of an atomic weapon, excluding uranium mining and milling; and (B) is designated by the Secretary of Energy as an [AWE] for the purposes of the compensation program." Section 3621(5) defines an AWE facility as "a facility, owned by an [AWE], that is or was used to process or produce, for use by the United States, material that emitted radiation and was used in the production of an atomic weapon, excluding uranium mining or milling."

It has recently come to the attention of the Department that one facility was previously mistakenly designated as an AWE facility because the designated facility was owned by the U.S. Government, and the statutory definitions of AWE and AWE facility exclude facilities owned by the United States. A second entity identified as an AWE facility is being removed from the list because the work performed by that entity was not related to production of an atomic weapon and was not performed for, or on behalf of, DOE or its predecessor Agencies.

This notice formally makes the changes to the list as indicated below:

- Painsville Site (Diamond Magnesium Company) of Ohio is no longer designated as an AWE facility because the work performed at that site was not related to atomic weapons production and was not conducted by, or on behalf of, DOE or its predecessor Agencies.
- St. Louis Airport Storage Site is no longer designated as an AWE facility because the facility was owned by the U.S. Government. This change has no effect on the determination of the Department of Labor that the work site is a DOE facility.

Issued in Washington, DC, on July 26, 2010.

Glenn S. Podonsky,

Chief Health, Safety and Security Officer, Office of Health, Safety and Security.

[FR Doc. 2010–19020 Filed 8–2–10; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Blue Ribbon Commission on America's Nuclear Future, Transportation and Storage Subcommittee

AGENCY: Department of Energy, Office of Nuclear Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces an open meeting of the Transportation and Storage (T&S) Subcommittee. The T&S Subcommittee is a subcommittee of the Blue Ribbon Commission on America's Nuclear Future (the Commission). The establishment of subcommittees is authorized in the Commission's charter. The Commission was organized pursuant to the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) (the Act). This notice is provided in accordance with the Act.

DATES: Thursday, August 19, 2010, 8:30 a.m.–5 p.m.

ADDRESSES: Washington Marriott Hotel, 1221 22nd Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Timothy A. Frazier, Designated Federal Officer, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585; telephone (202) 586–4243 or facsimile (202) 586–0544; e-mail *CommissionDFO@nuclear.energy.gov.* Additional information will be available at *http://www.brc.gov.*

SUPPLEMENTARY INFORMATION:

Background: The President directed that the Blue Ribbon Commission on America's Nuclear Future (the Commission) be established to conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle. The Commission will provide advice and make recommendations on issues including alternatives for the storage, processing, and disposal of civilian and defense spent nuclear fuel and nuclear waste.

The Co-chairs of the Commission requested the formation of the T&S Subcommittee to answer the question: "[S]hould the U.S. change the way in which it is storing used nuclear fuel and high level waste while one or more final disposal locations are established?"

Purpose of the Meeting: The session will provide the T&S Subcommittee with a range of input from public health and safety officials, industry representatives, public policy experts, and nongovernmental organizations. The presenters will focus on technical, regulatory, safety, and risk perception issues related to onsite storage of spent nuclear fuel at operating and shutdown commercial nuclear facilities. Discussion will include issues related to ongoing and planned transport of such materials for eventual treatment and/or disposal.

Tentative Agenda: The public meeting will begin at approximately 8:30 a.m. at the Washington Marriott Hotel, 1221 22nd Street, NW., Washington, DC. The Subcommittee will hear presentations from a series of panelists, ask questions of presenters, and conclude with a public comment session. The public session is expected to conclude by 5 p.m.

Public Participation: Subcommittee meetings are not required to be open to the public; however, the Commission has elected to open the presentation sessions of the meeting to the public. Individuals and representatives of organizations who would like to offer comments and suggestions may do so at the end of the public session on Thursday, August 19, 2010. Approximately 45 minutes will be reserved for public comments from 4:15 p.m. to 5 p.m. Time allotted per speaker will depend on the number who wish to speak but will not exceed 5 minutes. The Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Those wishing to speak should register to do so beginning at 8 a.m. on August 19, 2010, at the Washington Marriott Hotel.

Those not able to attend the meeting or have insufficient time to address the subcommittee are invited to send a written statement to Timothy A. Frazier, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, e-mail to *CommissionDFO@nuclear.energy.gov,* or post comments on the Commission Web site at *http://www.brc.gov.*

Additionally, the meeting will be available via live video Webcast. The link will be available at *http://www.brc.gov.*

Minutes: The minutes of the meeting will be available at *http://www.brc.gov* or by contacting Mr. Frazier. He may be reached at the postal address or e-mail address above.

Issued in Washington, DC, on July 28, 2010.

Carol A. Matthews,

Committee Management Officer.

[FR Doc. 2010–19003 Filed 8–2–10; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC10–542–000]

Commission Information Collection Activities (FERC–542); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed information collection and request for comments.

SUMMARY: In compliance with the requirements of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A) (2006) (Pub. L. 104–13), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the proposed information collection described below.

DATES: Comments in consideration of the collection of information are due October 4, 2010.

ADDRESSES: Comments may be filed either electronically (eFiled) or in paper format, and should refer to Docket No. IC10–542–000. Documents must be prepared in an acceptable filing format and in compliance with Commission submission guidelines at *http://www.ferc.gov/help/submission-guide.asp.* eFiling instructions are available at: *http://www.ferc.gov/docs-filing/efiling.asp.* First-time users must follow eRegister instructions at: *http://www.ferc.gov/docs-filing/eregistration.asp,* to establish a user name and password before eFiling. The Commission will send an automatic acknowledgement to the sender's e-mail address upon receipt of eFiled comments. Commenters making an eFiling should not make a paper filing. Commenters that are not able to file electronically must send an original and two (2) paper copies of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426.

Users interested in receiving automatic notification of activity in this docket may do so through eSubscription at *http://www.ferc.gov/docs-filing/esubscription.asp.* In addition, all comments and FERC issuances may be viewed, printed or downloaded remotely through FERC's eLibrary at: *http://www.ferc.gov/docs-filing/elibrary.asp,* by searching on Docket No. IC10–542. For user assistance, contact FERC Online Support by e-mail at *ferconlinesupport@ferc.gov,* or by phone, toll-free, at: (866) 208–3676, or (202) 502–8659 for TTY.

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by e-mail at *DataClearance@FERC.gov,* telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC–542 "Gas Pipeline Rates: Rate Tracking" (OMB No. 1902–0070) is used by the Commission to implement the statutory provisions of Title IV of the Natural Gas Policy Act (NGPA), 15 U.S.C. 3301–3432, and Sections 4, 5 and 16 of the Natural Gas Act (NGA) (Pub. L. 75–688) (15 U.S.C. 717–717w). These statutes empower the Commission to collect natural gas transmission cost information from interstate natural gas transporters for the purpose of verifying that these costs, which are passed on to pipeline customers, are just and reasonable.

Interstate natural gas pipeline companies are required by the Commission to track their transportation-associated costs to allow for the Commission's review and, where appropriate, approve the pass-through of these costs to pipeline customers. These FERC–542 tracking filings are accountings of the cost of (1) research, development, and deployment expenditures; (2) annual charge adjustments and (3) periodic rate adjustments.

Tracking filings may be submitted at any time or on a regularly scheduled basis in accordance with the pipeline company's tariff. Filings may be either: (1) Accepted; (2) suspended and set for hearing; (3) suspended, but not set for

hearing; or (4) suspended for further review, such as technical conference or some other type of Commission action. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR parts 154, 154.4, 154.7, 154.307, 154.201, 154.207–154.208 and 154.401–154.403.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

FERC data collection	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Total annual burden hours
	(1)	(2)	(3)	(1) × (2) × (3)
FERC–542	95	3.5	40	13,300

Estimated cost burden to respondents is $881,598 (13,300 hours/2,080 hours [1] times $137,874 [2]). The cost per respondent is $9,280.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

[1] Number of hours an employee works each year.

[2] Average annual salary per employee.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP05–92–007]

Liberty Gas Storage LLC; Notice of Amendment

Take notice that on July 26, Liberty Gas Storage LLC ("Liberty"), 101 Ash Street, San Diego, CA 92101, filed in the above referenced docket, an application pursuant to section 7 of the Natural Gas Act (NGA), to amend its Application to Amend Certificate of Public Convenience and Necessity that was filed with the Commission on December 14, 2009, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the Web at *http://www.ferc.gov* using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or TTY, contact (202) 502–8659.

Any questions regarding this application should be directed to William Rapp, Liberty Gas Storage, 101 Ash Street, San Diego, CA 92101, phone (619) 699–5050.

The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@gerc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the eFiling link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the eLibrary link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov*, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: August 17, 2010.

Kimberly D. Bose,

Secretary.

[FR Doc. 2010–18969 Filed 8–2–10; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP10–471–000]

Texas Eastern Transmission LP; Notice of Application

July 27, 2010.

Take notice that on July 15, 2010, Texas Eastern Transmission (Texas Eastern), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP10–471–000, an application pursuant to Section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations, requesting authorization to construct and operate approximately 8.4 miles of 16-inch diameter natural gas pipeline and associated facilities to enable Texas Eastern to provide up to 112,000 dekatherms per day (Dth/d) of firm lateral line transportation service to the Hot Spring Energy Facility in Hot Spring County, Arkansas and to establish initial recourse rates for firm and interruptible transportation service on the facilities to be constructed, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may also be viewed on the Commission's Web site at *http://www.ferc.gov* using the "eLibrary" link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, call (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding this application should be directed to Arthur C. Diestel, Analyst, Rates and Certificates, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251–1642, or by calling (713) 627–5116 (telephone) or (713) 627–5947 (fax), *acdiestel@spectraenergy.com*, to Marcy F. Collins, Associate General Counsel, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251–1642, or by calling (713) 627–6137 (telephone) or (713) 989–3191, *mfcollins@spectraenergy.com*, or to James D. Seegers, Vinson & Elkins L.L.P., 1001 Fannin, Suite 2500, Houston, Texas 77002, or by calling (713) 758–2939 (telephone) or (713) 615–5206 (fax), *jseegers@velaw.com*.

Pursuant to Section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Motions to intervene, protests and comments may be filed electronically via the Internet in lieu of paper; see, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. The Commission strongly encourages electronic filings.

Comment Date: August 17, 2009.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

July 22, 2010.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG10–54–000.

Applicants: Solar Partners I, LLC.

Description: Notice of Self-Certification of Exempt Wholesale Generator Status of Solar Partners I, LLC.

Filed Date: 07/21/2010.

Accession Number: 20100721–5171.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: EG10–55–000.

Applicants: Solar Partners II, LLC.

Description: Notice of Self-Certification of Exempt Wholesale Generator Status of Solar Partners II, LLC.

Filed Date: 07/21/2010.

Accession Number: 20100721–5172.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: EG10–56–000.

Applicants: Solar Partners VIII, LLC.

Description: Notice of Self-Certification of Exempt Wholesale Generator Status of Solar Partners VIII, LLC.

Filed Date: 07/21/2010.

Accession Number: 20100721–5175.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER05–305–007; ER04–878–006.

Applicants: Pinelawn Power LLC; Equus Power I, L.P.

Description: J-Power North America Holding, Ltd submits revisions to the Market-Based Rate Tariffs for Pinelawn Power LLC *et al.*

Filed Date: 07/19/2010.

Accession Number: 20100719–0214.

Comment Date: 5 p.m. Eastern Time on Monday, August 9, 2010.

Docket Numbers: ER07–1106–007.

Applicants: ArcLight Energy Marketing, LLC.

Description: ArcLight Energy Marketing, LLC submits requested additional information as supplement to its SPP Region Triennial.

Filed Date: 07/16/2010.

Accession Number: 20100719–0064.

Comment Date: 5 p.m. Eastern Time on Friday, August 6, 2010.

Docket Numbers: ER08–695–004.

Applicants: New England Conference of Public Utilities.

Description: Errata filing of New York Independent System Operator, Inc.

Filed Date: 07/22/2010.

Accession Number: 20100722–5031.

Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER08–770–004.

Applicants: Longview Power.

Description: Longview Power, LLC Change-In-Status Notification.

Filed Date: 07/21/2010.

Accession Number: 20100721–5181.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1357–002.

Applicants: Southern California Edison Company.

Description: Southern California Edison Company submits tariff filing per 35: TOT_Sec 8_Amendment_072210 to be effective 6/1/2010.

Filed Date: 07/22/2010.

Accession Number: 20100722–5000.

Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1424–001.

Applicants: Eagle Industrial Power Services (IL), LLC.

Description: Eagle Industrial Power Services, LLC submits a substitute original tariff sheet for rate Schedule FERC 1.

Filed Date: 07/16/2010.

Accession Number: 20100719–0206.

Comment Date: 5 p.m. Eastern Time on Friday, August 6, 2010.

Docket Numbers: ER10–1425–001.

Applicants: EDF Industrial Power Services (NY), LLC.

Description: EDF Industrial NY submits Substitute Original Sheet 1 *et al.* to Rate Schedule FERC No 1.

Filed Date: 07/16/2010.

Accession Number: 20100719–0205.

Comment Date: 5 p.m. Eastern Time on Friday, August 6, 2010.

Docket Numbers: ER10–1463–002.

Applicants: Midwest Independent Transmission System Operator, Inc.

Description: Midwest Independent Transmission System Operator, Inc. submits an amendment to the June filing to update re the Interconnection Agreement.

Filed Date: 07/12/2010.

Accession Number: 20100712–0206.

Comment Date: 5 p.m. Eastern Time on Monday, August 2, 2010.

Docket Numbers: ER10–1818–000.

Applicants: Public Service Company of Colorado.

Description: Public Service Company of Colorado submits tariff filing per 35: 20100720_Baseline Filing to be effective 7/20/2010.

Filed Date: 07/20/2010.

Accession Number: 20100720–5084.

Comment Date: 5 p.m. Eastern Time on Tuesday, August 10, 2010.

Docket Numbers: ER10–1854–000.

Applicants: Doswell Limited Partnership.

Description: Doswell Limited Partnership submits tariff filing per 35.12: Doswell Baseline Filing to be effective 7/21/2010.

Filed Date: 07/21/2010.

Accession Number: 20100721–5133.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1855–000.

Applicants: FPL Energy Burleigh County Wind, LLC.

Description: FPL Energy Burleigh County Wind, LLC submits tariff filing per 35.12: FPLE Burleigh Baseline Filing to be effective 7/21/2010.

Filed Date: 07/21/2010.

Accession Number: 20100721–5136.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1856–000.

Applicants: FPL Energy Cabazon Wind, LLC.

Description: FPL Energy Cabazon Wind, LLC submits tariff filing per 35.12: FPLE Cabazon Baseline Filing to be effective 7/21/2010.

Filed Date: 07/21/2010.

Accession Number: 20100721–5137.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1857–000.

Applicants: FPL Energy Cape, LLC.

Description: FPL Energy Cape, LLC submits tariff filing per 35.12: FPLE Cape Baseline Filing to be effective 7/21/2010.

Filed Date: 07/21/2010.

Accession Number: 20100721–5147.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1858–000.

Applicants: TBG Cogen Partners.

Description: TBG Cogen Partners submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/21/2010.

Filed Date: 07/21/2010.
Accession Number: 20100721–5149.
Comment Date: 5 p.m. Eastern Time on Wednesday, August 11, 2010.

Docket Numbers: ER10–1859–000.
Applicants: Santa Rosa Energy Center, LLC.
Description: Santa Rosa Energy Center, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/21/2010.
Filed Date: 07/21/2010.

Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1884–000.
Applicants: Geysers Power Company, LLC.
Description: Geysers Power Company, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5095.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

As it relates to any qualifying facility filings, the notices of self-certification [or self-recertification] listed above, do not institute a proceeding regarding qualifying facility status. A notice of self-certification [or self-recertification] simply provides notification that the entity making the filing has determined the facility named in the notice meets the applicable criteria to be a qualifying facility. Intervention and/or protest do not lie in dockets that are qualifying facility self-certifications or self-recertifications. Any person seeking to challenge such qualifying facility status may do so by filing a motion pursuant to 18 CFR 292.207(d)(iii). Intervention and protests may be filed in response to notices of qualifying facility dockets other than self-certifications and self-recertifications.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the web site that enables subscribers to receive e-mail notification when a document is added to a subscribed dockets(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

July 26, 2010.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER93–3–007.
Applicants: The United Illuminating Company.
Description: Response of The United Illuminating Company to Commission Staff Request.
Filed Date: 07/22/2010.

Accession Number: 20100722–5155.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER01–48–019.
Applicants: Powerex Corp.
Description: Powerex Corp. Non-Material Change in Status.
Filed Date: 07/26/2010.
Accession Number: 20100726–5122.
Comment Date: 5 p.m. Eastern Time on Monday, August 16, 2010.

Docket Numbers: ER06–1399–007.
Applicants: Sunbury Generation LP.
Description: Notice of non-Material Change in Status of Sunbury Generation LP.
Filed Date: 07/26/2010.
Accession Number: 20100726–5133.
Comment Date: 5 p.m. Eastern Time on Monday, August 16, 2010.

Docket Numbers: ER08–695–004; EL07–39–006.
Applicants: New England Conference of Public Utilities.
Description: Errata filing of New York Independent System Operator, Inc.
Filed Date: 07/22/2010.
Accession Number: 20100722–5031.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1357–002.
Applicants: Southern California Edison Company.
Description: Southern California Edison Company submits tariff filing per 35: TOT_Sec 8_Amendment_072210 to be effective 6/1/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5000.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1383–001; ER07–412–005; ER06–745–005; ER09–1099–004; ER10–1089–001; ER99–1714–009.
Applicants: Dighton Power, LLC; ECP Energy I, LLC; MASSPOWER; Empire Generating Co., LLC; EquiPower Resources Management, LLC; Lake Road Generating Company, L.P.
Description: ECP MBR Entities submits additional information in response to a discussion with Commission Staff on the Notice Filing.
Filed Date: 07/20/2010.
Accession Number: 20100720–0015.
Comment Date: 5 p.m. Eastern Time on Tuesday, August 10, 2010.

Docket Numbers: ER10–1789–001.
Applicants: PSEG Energy Resources & Trade LLC.
Description: PSEG Energy Resources & Trade LLC submits tariff filing per 35: Filing in compliance with FERC Letter Order of May 17, 2010 to be effective 7/1/2010.
Filed Date: 07/23/2010.
Accession Number: 20100723–5165.
Comment Date: 5 p.m. Eastern Time on Friday, August 13, 2010.

Docket Numbers: ER10–1885–000.
Applicants: Delta Energy Center, LLC.
Description: Delta Energy Center, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5096.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1886–000.
Applicants: Decatur Energy Center, LLC.
Description: Decatur Energy Center, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5097.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1887–000.
Applicants: FPL Energy Cowboy Wind, LLC.
Description: FPL Energy Cowboy Wind, LLC submits tariff filing per 35.12: Cowboy Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5099.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1888–000.
Applicants: Creed Energy Center, LLC.
Description: Creed Energy Center, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5103.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1889–000.
Applicants: CPN Bethpage 3rd Turbine, Inc.
Description: CPN Bethpage 3rd Turbine, Inc. submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5108.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1890–000.
Applicants: FPL Energy Green Power Wind, LLC.
Description: FPL Energy Green Power Wind, LLC submits tariff filing per 35.12: Green Power Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5110
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010

Docket Numbers: ER10–1891–000.
Applicants: Citigroup Energy Inc.
Description: Citigroup Energy Inc. submits tariff filing per 35.12: Citigroup Energy Inc. MBR Tariff to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5115.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1892–000.
Applicants: Columbia Energy LLC.
Description: Columbia Energy LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5116.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1893–000.
Applicants: CES Marketing X, LLC.
Description: CES Marketing X, LLC submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5117.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1894–000; ER10–1894–001.
Applicants: Wisconsin Public Service Corporation.
Description: Wisconsin Public Service Corporation submits tariff filing per 35.12: Market Based Rate Tariff, Volume No. 10 to be effective 7/22/2010.
Filed Date: 07/22/2010; 07/23/2010.
Accession Number: 20100722–5119; 20100723–5079.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1895–000.
Applicants: KIAC Partners.
Description: KIAC Partners submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5121.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1896–000.
Applicants: Citigroup Energy Canada ULC.
Description: Citigroup Energy Canada ULC submits tariff filing per 35.12: Citigroup Energy Canada ULC MBR Tariff to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5125.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1897–000.
Applicants: FPL Energy Hancock County Wind, LLC.
Description: FPL Energy Hancock County Wind, LLC submits tariff filing per 35.12: Hancock County Baseline Filing, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5127.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1898–000.
Applicants: CES Marketing V, L.P.
Description: CES Marketing V, L.P. submits tariff filing per 35.12: Market-Based Rate Tariff in Compliance with Order No. 714, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5128.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1899–000.
Applicants: FPL Energy Illinois Wind, LLC.
Description: FPL Energy Illinois Wind, LLC submits tariff filing per 35.12: Illinois Wind Baseline Filing 2, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5129.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1900–000.
Applicants: FPL Energy Maine Hydro, LLC.
Description: FPL Energy Maine Hydro, LLC submits tariff filing per 35.12: Maine Hydro Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5131.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1901–000.
Applicants: Upper Peninsula Power Company.
Description: Upper Peninsula Power Company submits tariff filing per 35.12: Market Based Rate Tariff, Volume No. 1 to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5132.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1902–000.
Applicants: FPL Energy Marcus Hook, L.P.
Description: FPL Energy Marcus Hook, L.P. submits tariff filing per 35.12: Marcus Hook Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5133.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1903–000.
Applicants: FPL Energy MH50 L.P.
Description: FPL Energy MH50 L.P. submits tariff filing per 35.12: MH50 Baseline Filing, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5134.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1904–000.
Applicants: Dominion Energy Salem Harbor, LLC.
Description: Dominion Energy Salem Harbor, LLC submits tariff filing per 35.12: Baseline, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5135.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1905–000.
Applicants: FPL Energy Mower County, LLC.
Description: FPL Energy Mower County, LLC submits tariff filing per 35.12: Mower Baseline Filing, to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5136.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1906–000.
Applicants: FPL Energy New Mexico Wind, LLC.
Description: FPL Energy New Mexico Wind, LLC submits tariff filing per 35.12: New Mexico Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5137.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1907–000.
Applicants: FPL Energy North Dakota Wind, LLC.
Description: FPL Energy North Dakota Wind, LLC submits tariff filing per 35.12: North Dakota Baseline Filing to be effective 7/22/2010.
Filed Date: 07/22/2010.
Accession Number: 20100722–5138.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1913–000.
Applicants: Midwest Independent Transmission System.
Description: Midwest Independent Transmission System Operator, Inc submits their Adjacent Balancing Authority Coordination Agreement with Western Area Power Administration etc.
Filed Date: 07/22/2010.
Accession Number: 20100723–0203.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Docket Numbers: ER10–1914–000.
Applicants: Michigan Waste Energy, Inc.
Description: Michigan Waste Energy, Inc submits a Notice of Cancellation of their initial FERC Electric Tariff, Original Volume 1.
Filed Date: 07/22/2010.
Accession Number: 20100723–0202.
Comment Date: 5 p.m. Eastern Time on Thursday, August 12, 2010.

Take notice that the Commission received the following PURPA 210(m)(3) filings:

Docket Numbers: QM10–5–000.
Applicants: Delmarva Power & Light Company, Potomac Electric Power Company, Atlantic City Electric Company.
Description: Application of Atlantic City Electric Company, Delmarva Power & Light Company and Potomac Electric Power Company to Terminate PURPA Purchase Obligation.
Filed Date: 07/22/2010.
Accession Number: 20100722–5153.
Comment Date: 5 p.m. Eastern Time on Thursday, August 19, 2010.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

As it relates to any qualifying facility filings, the notices of self-certification [or self-recertification] listed above, do not institute a proceeding regarding qualifying facility status. A notice of self-certification [or self-recertification] simply provides notification that the entity making the filing has determined the facility named in the notice meets the applicable criteria to be a qualifying facility. Intervention and/or protest do not lie in dockets that are qualifying facility self-certifications or self-recertifications. Any person seeking to challenge such qualifying facility status may do so by filing a motion pursuant to 18 CFR 292.207(d)(iii). Intervention and protests may be filed in response to notices of qualifying facility dockets other than self-certifications and self-recertifications.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

Take notice that the Commission received the following land acquisition reports:

Docket Numbers: LA10–2–000.
Applicants: Order 697–C 2010 1st Qtr Site Acquisition.
Description: Notice of change in status and Q2 2010 land acquisition report of Baltimore Gas and Electric Company, *et al.*
Filed Date: 07/27/2010.
Accession Number: 20100727–5077.
Comment Date: 5 p.m. Eastern Time on Tuesday, August 17, 2010.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern Time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov*. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the

Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the web site that enables subscribers to receive e-mail notification when a document is added to a subscribed dockets(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

[Docket No. AD10–12–000]

Increasing Market and Planning Efficiency Through Improved Software; Notice Establishing Date for Comments

July 27, 2010.

In June 2010, Commission staff convened the following technical conferences regarding models and software related to wholesale electricity markets and planning: [1]

June 2–3 Enhanced Unit-Commitment Models.

June 9–10 Enhanced Wide-Area Planning Models.

June 23–24 Enhanced Optimal Power Flow Models.

Parties wishing to submit written comments regarding the matters discussed at the technical conferences should submit their comments in Docket No. AD10–12–000 on or before September 10, 2010.

Kimberly D. Bose,

Secretary.

Federal Energy Regulatory Commission

[Docket No. EL10–79–000]

Morris Energy Group, LLC v.PSEG Energy Resources & Trade LLC; PSEG Fossil LLC; and PSEG Power LLC; Notice of Complaint

July 27, 2010.

Take notice that on July 23, 2010, Morris Energy Group, LLC (Morris Energy) (Complainant) filed a complaint against PSEG Energy Resources & Trade, LLC, PSEG Fossil LLC and PSEG Power LLC (PSEG Power Companies) (Respondents), requesting that the Federal Energy Regulatory Commission (Commission) find that the PSEG Power Companies violated their market-based rate authority and engaged in market manipulation in connection with a preferential affiliate retail gas delivery rate.

Morris Energy certifies that copies of the complaint were served on the contacts listed for Respondent in the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at *http://www.ferc.gov.* Persons unable to fileelectronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov*, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. Eastern Time on August 12, 2010.

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

[Case No. RF–014]

Energy Conservation Program for Consumer Products: Decision and Order Granting a Waiver to Samsung Electronics America, Inc. From the Department of Energy Residential Refrigerator and Refrigerator-Freezer Test Procedure

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Decision and Order.

SUMMARY: The U.S. Department of Energy (DOE) gives notice of the decision and order (Case No. RF–014) that grants to Samsung Electronics America, Inc. (Samsung) a waiver from the DOE electric refrigerator and refrigerator-freezer test procedure for certain basic models of residential refrigerator-freezers containing relative humidity sensors and adaptive control anti-sweat heaters. Under today's decision and order, Samsung shall be required to test and rate these refrigerator-freezers equipped with adaptive control anti-sweat heaters using an alternate test procedure that takes this technology into account when measuring energy consumption.

DATES: This decision and order is effective August 3, 2010.

FOR FURTHER INFORMATION CONTACT: Dr. Michael G. Raymond, U.S. Department of Energy, Building Technologies Program, Mailstop EE–2J, 1000 Independence Avenue, SW., Washington, DC 20585–0121. Telephone: (202) 586–9611, E-mail: *Michael.Raymond@ee.doe.gov.*

Jennifer Tiedeman, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC–71, 1000 Independence Avenue, SW., Washington, DC 20585–0103, (202) 287–6111, E-mail: *Jennifer.Tiedeman@hq.doe.govmailto:.*

SUPPLEMENTARY INFORMATION: In accordance with Title 10 of the Code of Federal Regulations (10 CFR) 430.27(l), DOE gives notice of the issuance of its

decision and order as set forth below. The decision and order grants Samsung a waiver from the applicable residential refrigerator and refrigerator-freezer test procedure found in 10 CFR part 430, subpart B, appendix A1 for certain basic models of refrigerator-freezers with relative humidity sensors and adaptive control anti-sweat heaters, provided that Samsung tests and rates such products using the alternate test procedure described in this notice. Today's decision prohibits Samsung from making representations concerning the energy efficiency of these products unless the product has been tested consistent with the provisions and restrictions in the alternate test procedure set forth in the decision and order below, and any representations fairly disclose the test results. Distributors, retailers, and private labelers are held to the same standard when making representations regarding the energy efficiency of these products. 42 U.S.C. 6293(c).

Cathy Zoi,

Assistant Secretary, Energy Efficiency and Renewable Energy.

Decision and Order

In the Matter of: Samsung Electronics America, Inc. (Case No. RF–014).

Background

Title III of the Energy Policy and Conservation Act (EPCA) sets forth a variety of provisions concerning energy efficiency, including Part A, which provides for the "Energy Conservation Program for Consumer Products Other Than Automobiles." 42 U.S.C. 6291–6309. Part A of Title III includes definitions, test procedures, labeling provisions, energy conservation standards, and the authority to require information and reports from manufacturers. Further, EPCA authorizes the Secretary of Energy to prescribe test procedures that are reasonably designed to produce results that measure energy efficiency, energy use, or estimated operating costs, and that are not unduly burdensome to conduct. 42 U.S.C. 6293(b)(3).

Today's notice involves residential electric refrigerator and refrigerator-freezer products covered under Part A of Title III. The test procedure for residential electric refrigerators and refrigerator-freezers is contained in 10 CFR part 430, subpart B, appendix A1.

DOE's regulations for covered products contain provisions allowing a person to seek a waiver for a particular basic model from the test procedure requirements for covered consumer products when (1) the petitioner's basic model contains one or more design characteristics that prevent testing according to the prescribed test procedure, or (2) when prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. (10 CFR 430.27(a)(1)) Petitioners must include in their petition any alternate test procedures known to them to evaluate the basic model in a manner representative of its energy consumption characteristics. (10 CFR 430.27(b)(1)(iii))

The Assistant Secretary for Energy Efficiency and Renewable Energy (the Assistant Secretary) may grant a waiver subject to conditions, including adherence to alternate test procedures. (10 CFR 430.27(l)) Waivers remain in effect pursuant to the provisions of 10 CFR 430.27(m).

The waiver process also allows any interested person who has submitted a petition for waiver to file an application for interim waiver of the applicable test procedure requirements. (10 CFR 430.27(a)(2)). The Assistant Secretary will grant an interim waiver request if it is determined that the applicant will experience economic hardship if the interim waiver is denied, if it appears likely that the petition for waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the petition for waiver. (10 CFR 430.27(g))

On September 9, 2009, Samsung filed a petition for waiver and application for interim waiver from the test procedure applicable to residential electric refrigerators and refrigerator-freezers set forth in 10 CFR Part 430, subpart B, appendix A1. The products covered by the petition employ relative humidity sensors, which detect and respond to temperature and humidity conditions, and then activate adaptive heaters as needed to evaporate excess moisture. DOE published Samsung's petition for waiver for residential refrigerator-freezers with adaptive anti-sweat heaters, as well as its grant of interim waiver to Samsung for these products, in the **Federal Register** on December 15, 2009. 74 FR 66340. DOE granted Samsung's petition for waiver on March 18, 2010. 75 FR 13120.

Assertions and Determinations

Samsung's Petition for Waiver:

On January 20, 2010, Samsung informed DOE that, after it filed its petition for waiver in September 2009, it developed additional basic models with adaptive anti-sweat heater technology. Samsung asserted that these new products function in the same manner as the basic models listed in Samsung's September 2009 petition with respect to the properties that made those products eligible for a waiver. Therefore, Samsung requested that DOE add these models to the list of basic models for which the interim waiver was granted. Samsung also requested that DOE grant a new waiver for these additional basic models. Samsung's petition was published in the **Federal Register** on April 16, 2010. 75 FR 19959.

Samsung requested that it be permitted to use the same alternate test procedure DOE prescribed for GE, Whirlpool, and other companies manufacturing refrigerators and refrigerator-freezers equipped with a similar technology. Specifically, DOE granted GE, Whirlpool, Electrolux, Samsung, and Haier waivers on February 27, 2008 (73 FR 10425), May 5, 2009 (74 FR 20695), December 15, 2009 (74 FR 66338), March 18, 2010 (75 FR 13122), and June 7, 2010 (75 FR 32175), respectively. The alternate test procedure simulates the energy used by the adaptive heaters in a typical consumer household, as explained in the respective decisions and orders referenced above. As DOE has stated in the past, it is in the public interest to have similar products tested and rated for energy consumption on a comparable basis.

Consultations With Other Agencies

DOE consulted with the Federal Trade Commission (FTC) staff concerning the Samsung petition for waiver. The FTC staff did not have any objections to granting a waiver to Samsung.

Conclusion

After careful consideration of all the material that was submitted by Samsung and consultation with the FTC staff, it is ordered that:

(1) The petition for waiver submitted by Samsung Electronics America, Inc. (Case No. RF–014) is hereby granted as set forth in the paragraphs below.

(2) Samsung shall not be required to test or rate the following Samsung models on the basis of the current test procedures contained in 10 CFR part 430, subpart B, appendix A1. Instead, it shall be required to test and rate such products according to the alternate test procedure as set forth in paragraph (3) below:

RB***H***, RF***H***, RF#***H***, RS***H***, RS#***H***.

(3) Samsung shall be required to test the products listed in paragraph (2)

above according to the test procedures for electric refrigerator-freezers prescribed by DOE at 10 CFR part 430, appendix A1, except that, for the Samsung products listed in paragraph (2) only:

(A) The following definition is added at the end of Section 1:

1.13 Variable anti-sweat heater control means an anti-sweat heater where power supplied to the device is determined by an operating condition variable(s) and/or ambient condition variable(s).

(B) Section 2.2 is revised to read as follows:

2.2 Operational conditions. The electric refrigerator or electric refrigerator-freezer shall be installed and its operating conditions maintained in accordance with HRF–1–1979, section 7.2 through section 7.4.3.3, except that the vertical ambient temperature gradient at locations 10 inches (25.4 cm) out from the centers of the two sides of the unit being tested is to be maintained during the test. Unless shields or baffles obstruct the area, the gradient is to be maintained from 2 inches (5.1 cm) above the floor or supporting platform to a height 1 foot (30.5 cm) above the unit under test. Defrost controls are to be operative. The anti-sweat heater switch is to be off during one test and on during the second test. In the case of an electric refrigerator-freezer equipped with variable anti-sweat heater control, the result of the second test will be derived by performing the calculation described in 6.2.3. Other exceptions are noted in 2.3, 2.4, and 5.1 below.

(C) New section 6.2.3 is inserted after section 6.2.2.2.

6.2.3 Variable anti-sweat heater control test. The energy consumption of an electric refrigerator-freezer with a variable anti-sweat heater control in the on position (E_{on}), expressed in kilowatt-hours per day, shall be calculated equivalent to:

E_{ON} = E + (Correction Factor)

where E is determined by sections 6.2.1.1, 6.2.1.2, 6.2.2.1, or 6.2.2.2, whichever is appropriate, with the anti-sweat heater switch in the off position.

Correction Factor = (Anti-sweat Heater Power × System-loss Factor) × (24 hrs/1 day) × (1 kW/1,000 W)

Where:

Anti-sweat Heater Power
= A1 * (Heater Watts at 5%RH)
+ A2 * (Heater Watts at 15%RH)
+ A3 * (Heater Watts at 25%RH)
+ A4 * (Heater Watts at 35%RH)
+ A5 * (Heater Watts at 45%RH)
+ A6 * (Heater Watts at 55%RH)
+ A7 * (Heater Watts at 65%RH)
+ A8 * (Heater Watts at 75%RH)
+ A9 * (Heater Watts at 85%RH)
+ A10 * (Heater Watts at 95%RH)

where A1–A10 are defined in the following table:

A1 = 0.034	A6 = 0.119
A2 = 0.211	A7 = 0.069
A3 = 0.204	A8 = 0.047
A4 = 0.166	A9 = 0.008
A5 = 0.126	A10 = 0.015

Heater Watts at a specific relative humidity = the nominal watts used by all heaters at that specific relative humidity, 72 °F ambient, and DOE reference temperatures of fresh food (FF) average temperature of 45 °F and freezer (FZ) average temperature of 5 °F. System-loss Factor = 1.3

(4) Representations. Samsung may make representations about the energy use of its adaptive control anti-sweat heater refrigerator-freezer products for compliance, marketing, or other purposes only to the extent that such products have been tested in accordance with the provisions outlined above and such representations fairly disclose the results of such testing.

(5) This waiver shall remain in effect consistent with the provisions of 10 CFR 430.27(m).

(6) This waiver is issued on the condition that the statements, representations, and documentary materials provided by the petitioner are valid. DOE may revoke or modify this waiver at any time if it determines the factual basis underlying the petition for waiver is incorrect, or the results from the alternate test procedure are unrepresentative of the basic models' true energy consumption characteristics.

Issued in Washington, DC, on July 27, 2010.

Cathy Zoi,

Assistant Secretary, Energy Efficiency and Renewable Energy.

[Project No. 13356–000–RI]

Slatersville Hydro, LLC; Notice of Availability of Environmental Assessment

July 27, 2010.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has reviewed the application for exemption from licensing for the Slatersville Hydroelectric Project, to be located on the Branch River, in Providence County, Rhode Island, and has prepared an Environmental Assessment (EA). In the EA, Commission staff analyze the potential environmental effects of the project and conclude that issuing an exemption for the project, with appropriate environmental measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at *http://www.ferc.gov* using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll-free at 1–866–208–3676, or for TTY, (202) 502–8659.

Any comments should be filed within 30 days from the date of this notice. Comments may be filed electronically via the Internet. *See* 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (*http://www.ferc.gov/docs-filing/ferconline.asp*) under the "eFiling" link. For a simpler method of submitting text only comments, click on "eComment." For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov;* call toll-free at (866) 208–3676; or, for TTY, contact (202) 502–8659. Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, mail an original and eight copies to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Please affix Project No. 13356–000 to all comments. For further information, contact Tom Dean at (202) 502–6041.

Kimberly D. Bose,

Secretary.

[Docket No. ER10–1821–000]

Goshen Phase II LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

July 23, 2010.

This is a supplemental notice in the above-referenced proceeding, of Goshen Phase II LLC's application for market-based rate authority, with an accompanying rate schedule, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability is August 12, 2010.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above-referenced proceeding(s) are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Federal Energy Regulatory Commission

[Docket No. EL10–78–000]

PJM Interconnection, L.L.C.; Notice of Petition for Declaratory Order

July 27, 2010.

Take notice that on July 20, 2010, pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure (18 CFR 385.207), PJM Interconnection, L.L.C. (PJM) filed a Petition for Declaratory Order Or, In The Alternative Request for Limited Waiver of 18 CFR 35.34(j)(1)(i), requesting the Commission to issue a declaratory order to find that PJM's proposed application of methodology will allow, under limited circumstances, employees and board members of PJM to hold a financial interest in certain companies or their affiliates that are defined by the Commission as "Market Participants" but whose participation in PJM's markets are miniscule in relation to their overall business activities.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to

serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov*, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9184–5]

Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods: Designation of One New Equivalent Method

AGENCY: Environmental Protection Agency.

ACTION: Notice of the designation of one new equivalent method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated, in accordance with 40 CFR part 53, one new equivalent method for measuring concentrations of lead (Pb) in total suspended particulate matter (TSP) in the ambient air.

FOR FURTHER INFORMATION CONTACT: Surender Kaushik, Human Exposure and Atmospheric Sciences Division (MD–D205–03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: (919) 541–5691, e-mail: *Kaushik.Surender@epa.gov.*

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQSs) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference methods or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining compliance with the NAAQSs.

The EPA hereby announces the designation of one new equivalent method for measuring Pb in TSP in the ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on November 12, 2008 (73 FR 67057–67059).

The new equivalent method for Pb is a manual method that uses the sampling procedure specified in the Reference Method for the Determination of Suspended Particulate Matter in the Atmosphere (High-Volume Method), 40 CFR part 50, appendix B, with an alternative extraction and analytical procedure. The method is identified as follows:

EQL–0710–192, "*Heated Nitric Acid Hot Block Digestion and ICP/MS Analysis for Lead (Pb) on TSP High-Volume Filters.*"

In this method, total suspended particulate matter (TSP) is collected on glass fiber filters according to 40 CFR Appendix B to part 50, *EPA Reference Method for the Determination of Suspended Particulate Matter in the Atmosphere (High-Volume Method),* extracted with a solution of nitric acid, heated on a hot block to 95°C for one hour, and brought to a final volume of 50 mL. The lead content of the sample extract is analyzed by Inductively Coupled Plasma-Mass Spectrometry (ICP–MS) based on EPA Method 200.8 and SW–846 Method 6020A.

The application for an equivalent method determination for this method was submitted by the Region 9 Laboratory, U.S. Environmental Protection Agency, 1337 South 46th Street, Bldg 201, Richmond, CA 94804 and was received by the Office of Research and Development on March 30, 2010.

The analytical procedure of this method has been tested in accordance with the applicable test procedures specified in 40 CFR part 53, as amended on November 12, 2008. After reviewing the results of those tests and other information submitted in the application, EPA has determined, in accordance with Part 53, that this method should be designated as an equivalent method for lead. The information in the application will be kept on file, either at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711 or in an approved archive storage facility, and will be available for inspection (with advance notice) to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated equivalent method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the complete operating procedure (SOP) associated with the method and subject to any specifications and limitations specified in the procedure.

Use of the method should also be in general accordance with the guidance and recommendations of applicable sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R–94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Ambient Air Quality Monitoring Program" EPA–454/B–08–003, December, 2008. Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of appendix C to 40 CFR part 58.

Consistent or repeated noncompliance with the method procedure/SOP should be reported to: Director, Human Exposure and Atmospheric Sciences Division (MD–E205–01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this new equivalent method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR Part 58. Questions concerning the technical aspects of the method should be directed to the applicant.

Dated: July 26, 2010.

Jewel F. Morris,

Acting Director, National Exposure Research Laboratory.

BILLING CODE 6560–50–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at *www.ffiec.gov/nic/*.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 27, 2010.

A. Federal Reserve Bank of Boston (Richard Walker, Community Affairs Officer) P.O. Box 55882, Boston, Massachusetts 02106–2204:

1. NBH Holdings Corp., Boston, Massachusetts; to become a bank holding company by acquiring 100 percent of the voting shares of Bank Midwest, National Association, Kansas City, Missouri.

B. Federal Reserve Bank of New York (Ivan Hurwitz, Vice President) 33 Liberty Street, New York, New York 10045–0001:

1. China Investment Corporation, Beijing, China; to acquire at least 5 percent of the voting shares of Morgan Stanley, New York, New York, and thereby indirectly acquire voting shares of Morgan Stanley Capital Management LLC; Morgan Stanley Domestic Holdings, Inc., both of New York, New York; Morgan Stanley Bank, National Association, Salt Lake City, Utah; Morgan Stanley Private Bank, National Association, Purchase, New York; and Morgan Stanley Trust National Association, Wilmington, Delaware. Comments regarding this application must be received not later than August 25, 2010.

C. Federal Reserve Bank of Atlanta (Clifford Stanford, Vice President) 1000 Peachtree Street, N.E., Atlanta, Georgia 30309:

1. Southeastern Bank Financial Corporation, Augusta, Georgia; to acquire 100 percent of the voting shares of Southern Bank & Trust, Aiken, South Carolina, upon its conversion to a state chartered bank.

Board of Governors of the Federal Reserve System, July 28, 2010.

Robert deV. Frierson,

Deputy Secretary of the Board.

[FR Doc. 2010–18963 Filed 8–2–10; 8:45 am]

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Delayed Update of the HHS Poverty Guidelines for the Remainder of 2010

AGENCY: Department of Health and Human Services.

ACTION: Notice.

SUMMARY: This notice provides a delayed update of the Department of Health and Human Services (HHS) poverty guidelines for the remainder of 2010, and until the 2011 poverty guidelines are published, which is expected to occur in late January 2011. HHS is issuing this delayed update due to recent legislation that prohibited the Secretary of HHS from publishing 2010 poverty guidelines before May 31, 2010, and required that the 2009 poverty guidelines remain in effect until the Secretary of HHS published updated guidelines.

DATES: *Effective Date:* Date of publication, unless an office administering a program using the guidelines specifies a different effective date for that particular program.

ADDRESSES: Office of the Assistant Secretary for Planning and Evaluation, Room 404E, Humphrey Building, Department of Health and Human Services, Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: For information about how the guidelines are used or how income is defined in a particular program, contact the Federal, State, or local office that is responsible for that program. For information about poverty figures for immigration forms, the Hill-Burton Uncompensated Services Program, and the number of people in poverty, use the specific telephone numbers and addresses given below.

For general questions about the poverty guidelines themselves, contact Gordon Fisher, Office of the Assistant Secretary for Planning and Evaluation, Room 404E, Humphrey Building, Department of Health and Human Services, Washington, DC 20201—telephone: (202) 690–7507—or visit *http://aspe.hhs.gov/poverty/*.

For information about the percentage multiple of the poverty guidelines to be used on immigration forms such as USCIS Form I–864, Affidavit of Support, contact U.S. Citizenship and Immigration Services at 1–800–375–5283.

For information about the Hill-Burton Uncompensated Services Program (free or reduced-fee health care services at certain hospitals and other facilities for persons meeting eligibility criteria involving the poverty guidelines), contact the Office of the Director, Division of Facilities Compliance and Recovery, Health Resources and Services Administration, HHS, Room 10–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. To speak to a staff member, please call (301) 443–5656. To receive a Hill-Burton information package, call 1–800–638–0742 (for callers outside Maryland) or 1–800–492–0359 (for callers in Maryland). You also may visit *http://www.hrsa.gov/hillburton/default.htm.*

For information about the number of people in poverty, visit the Poverty section of the Census Bureau's Web site at *http://www.census.gov/hhes/www/poverty/poverty.html* or contact the Census Bureau's Demographic Call Center Staff at (301) 763–2422 or 1–866–758–1060 (toll-free).

SUPPLEMENTARY INFORMATION:

Background

Section 673(2) of the Omnibus Budget Reconciliation Act (OBRA) of 1981 (42 U.S.C. 9902(2)) requires the Secretary of HHS to update the poverty guidelines at least annually, adjusting them on the basis of the Consumer Price Index for All Urban Consumers (CPI–U). The poverty guidelines are used as an eligibility criterion by the Community Services Block Grant program and a number of other Federal programs. The *poverty guidelines* issued here are a simplified version of the *poverty thresholds* that the Census Bureau uses

to prepare its estimates of the number of individuals and families in poverty.

However, provisions in three recent laws prohibited the Secretary of HHS from publishing updated poverty guidelines for 2010 before May 31, 2010, and required that the poverty guidelines published on January 23, 2009, remain in effect until updated poverty guidelines were published. These provisions were section 1012 of the Department of Defense Appropriations Act, 2010 (Pub. L. 111–118), section 7 of the Temporary Extension Act of 2010 (Pub. L. 111–144), and section 6 of the Continuing Extension Act of 2010 (Pub. L. 111–157).

The provisions included in these laws were in response to a decrease in the annual average CPI–U for 2009. In the absence of a legislative change, this decrease would have required HHS to issue 2010 poverty guidelines that were lower than the 2009 poverty guidelines, resulting in an adverse effect on potential and actual program beneficiaries. An explanatory statement in the December 16, 2009 *Congressional Record* described the first legislative provision to delay the publication of the 2010 guidelines as a "freeze" of the guidelines at 2009 levels "in order to prevent a reduction in eligibility for certain means-tested programs, including Medicaid, Supplemental Nutrition Assistance Program (SNAP), and child nutrition * * *." (*Congressional Record* (House), December 16, 2009, p. H15370).

Legislation to further delay the publication of the 2010 poverty guidelines beyond May 31, 2010, did not pass Congress. Accordingly, HHS is publishing poverty guidelines for the remainder of 2010 in this notice. These 2010 guidelines will remain in effect until HHS publishes the 2011 poverty guidelines, which is expected to occur in late January 2011.

If HHS had published the 2010 poverty guidelines in late January 2010, on the normal schedule, the update would have been based on the 2008 Census Bureau poverty thresholds and the percentage change in the annual average CPI–U from calendar year 2008 to calendar year 2009 (the period from January through December 2009). Since the publication of the 2010 poverty guidelines was delayed through May 31, 2010, HHS is basing this update on the 2008 Census Bureau poverty thresholds—which remain the most recent published thresholds available—and the percentage change in the average CPI–U from calendar year 2008 to the period beginning with January 2009 and ending on May 31, 2010. The average CPI–U for the January 2009–May 2010 period was 0.042 percent higher than the annual average CPI–U for calendar year 2008. (The Omnibus Budget Reconciliation Act of 1981 requires that the starting point for the update of the poverty guidelines shall be the latest published Census Bureau poverty thresholds, rather than the previous HHS poverty guidelines.) The percentage increase in the CPI–U was so small that after the rounding procedures used in the guidelines calculation, the guidelines for the remainder of 2010 showed no change from the 2009 guidelines.

The poverty guidelines are calculated each year using the latest published Census Bureau poverty thresholds as the starting point. They are not calculated from the previous year's poverty guidelines. As a result, the level of next year's poverty guidelines—the 2011 guidelines—will not be affected by the way in which these 2010 poverty guidelines were calculated.

The poverty guidelines for the remainder of 2010 are provided below. The guideline figures shown represent annual income. These guidelines will remain in effect until HHS publishes the 2011 poverty guidelines, which is expected in late January 2011.

2010 POVERTY GUIDELINES FOR THE 48 CONTIGUOUS STATES AND THE DISTRICT OF COLUMBIA

Persons in family	Poverty guideline
1	$10,830
2	14,570
3	18,310
4	22,050
5	25,790
6	29,530
7	33,270
8	37,010

For families with more than 8 persons, add $3,740 for each additional person.

2010 POVERTY GUIDELINES FOR ALASKA

Persons in family	Poverty guideline
1	$13,530
2	18,210
3	22,890
4	27,570
5	32,250
6	36,930
7	41,610
8	46,290

For families with more than 8 persons, add $4,680 for each additional person.

2010 POVERTY GUIDELINES FOR HAWAII

Persons in family	Poverty guideline
1	$12,460
2	16,760
3	21,060
4	25,360
5	29,660
6	33,960
7	38,260
8	42,560

For families with more than 8 persons, add $4,300 for each additional person.

Dated: July 30, 2010.

Kathleen Sebelius,

Secretary of Health and Human Services.

[FR Doc. 2010–19129 Filed 7–30–10; 4:15 pm]

BILLING CODE 4151–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Solicitation of Nomination for Appointment to the Chronic Fatigue Syndrome Advisory Committee

AGENCY: Department of Health and Human Services, Office of the Secretary, Office of Public Health and Science.

ACTION: Notice.

Authority: 42 U.S.C. 217a, section 222 of the Public Health Service (PHS) Act, as amended. The committee is governed by the provisions of Public Law 92–463, as amended (5 U.S.C. App 2), which sets forth standards for the formation and use of advisory committees.

SUMMARY: The Office of Public Health and Science, Office on Women's Health, HHS, is seeking nominations of qualified candidates to be considered for appointment as a member of the Chronic Fatigue Syndrome Advisory Committee (CFSAC). CFSAC provides science-based advice and recommendations to the Secretary of Health and Human Services, through the Assistant Secretary for Health, on a broad range of issues and topics pertaining to chronic fatigue syndrome (CFS). CFSAC, which was formerly known as the Chronic Fatigue Syndrome Coordinating Committee, was established by the Secretary of Health and Human Services on September 5, 2002. Several Committee member appointments are scheduled to end on April 1, 2011. Nominations of qualified candidates are being sought to fill future vacancies.

DATES: Nominations for membership on the Committee must be received no later than 5 p.m. EDT on Wednesday,

September 15, 2010, at the address listed below.

ADDRESSES: All nominations should be mailed or delivered to Wanda K. Jones, Dr.P.H., Executive Secretary, Chronic Fatigue Syndrome Advisory Committee; C/O Office on Women's Health; Department of Health and Human Services; 200 Independence Avenue, SW.; Room 712E; Washington, DC20201. E-mail delivery of nominations will not be accepted.

FOR FURTHER INFORMATION CONTACT: Wanda K. Jones, Dr.P.H.; Department of Health and Human Services, C/O Office on Women's Health; 200 Independence Avenue, SW.; Room 712E; Washington, DC 20201; please refer all inquiries to *cfsac@hhs.gov*.

SUPPLEMENTARY INFORMATION: CFSAC was established on September 5, 2002. The Committee was established to advise, consult with, and make recommendations to the Secretary, through the Assistant Secretary for Health, on a broad range of topics including (1) the current state of the knowledge and research about the epidemiology and risk factors relating to chronic fatigue syndrome, and identifying potential opportunities in these areas; (2) current and proposed diagnosis and treatment methods for chronic fatigue syndrome; and (3) development and implementation of programs to inform the public, health care professionals, and the biomedical, academic, and research communities about chronic fatigue syndrome advances.

Nominations

The Office on Women's Health is requesting nominations to future committee member vacancies for the CFSAC. The positions are scheduled to become vacant on April 1, 2011. The Committee is composed of seven scientists with demonstrated expertise in biomedical research and four individuals with demonstrated expertise in health services, insurance, or voluntary organizations concerned with the problems of individuals with CFS. The vacant positions include the biomedical research and health services categories.

Individuals selected for appointment to the Committee will serve as voting members. Individuals selected for appointment to the Committee can be invited to serve terms of up to four years. Committee members receive a stipend for attending Committee meetings and conducting other business in the interest of the Committee. Committee members also are authorized to receive per diem and reimbursement for travel expenses incurred for conducting Committee business. To qualify for consideration of appointment to the Committee, an individual must possess demonstrated experience and expertise in the designated fields or disciplines, as well as expert knowledge of the broad issues and topics pertinent to chronic fatigue syndrome.

Nominations should be typewritten, and the original nomination and three copies submitted in one package. The following information must be part of the package submitted for each individual being nominated for consideration: (1) A letter of nomination that clearly states the name and affiliation of the nominee, the basis for the nomination (*i.e.,* specific attributes which qualify the nominee for service in this capacity), and a statement that the nominee is willing to serve as a member of the Committee; (2) the nominator's name, address, and daytime telephone number, and the home and/or work address, telephone number, and e-mail address of the individual being nominated; and (3) a current copy of the nominee's curriculum vitae. Federal employees should not be nominated for consideration of appointment to this Committee.

The Department makes every effort to ensure that the membership of HHS Federal advisory committees is fairly balanced in terms of points of view represented and the committee's function. Every effort is made to ensure that a broad representation of geographic areas, females, ethnic and minority groups, and people with disabilities are given consideration for membership on HHS Federal advisory committees. Appointment to this Committee shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, disability, and cultural, religious, or socioeconomic status. Nominations must state that the nominee is willing to serve as a member of CFSAC and appears to have no conflict of interest that would preclude membership. Potential candidates are required to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

Dated: July 28, 2010.

Wanda K. Jones,

Designated Federal Officer, Chronic Fatigue Syndrome Advisory Committee.

BILLING CODE 4150–42–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Survey of State Underage Drinking Prevention Policies and Practices—New

The *Sober Truth on Preventing Underage Drinking Act* (the "STOP Act") [1] states that the "Secretary [of Health and Human Services] shall * * * annually issue a report on each State's performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking." The Secretary has delegated responsibility for this report to SAMHSA. Therefore, SAMHSA is developing a *Survey of State Underage Drinking Prevention Policies and Practices* (the "*State Survey*") to provide input for an *Annual Report on State Underage Drinking Prevention and Enforcement Activities* (the "State Report").

The STOP Act also requires the Secretary to develop "a set of measures to be used in preparing the report on best practices" and to consider categories including but not limited to the following:

Category #1: Sixteen specific underage drinking laws/regulations enacted at the State level (*e.g.,* laws prohibiting sales to minors; laws related to minors in possession of alcohol);

Category #2: Enforcement and educational programs to promote compliance with these laws/regulations;

Category #3: Programs targeted to youths, parents, and caregivers to deter underage drinking and the number of individuals served by these programs;

Category #4: The amount that each State invests, per youth capita, on the prevention of underage drinking broken into five categories: (a) Compliance check programs in retail outlets; (b) Checkpoints and saturation patrols that include the goal of reducing and

[1] Public Law 109–422. It is assumed Congress intended to include the District of Columbia as part of the State Report.

deterring underage drinking; (c) Community-based, school-based, and higher-education-based programs to prevent underage drinking; (d) Underage drinking prevention programs that target youth within the juvenile justice and child welfare systems; and (e) Any other State efforts or programs that target underage drinking.

Congress' purpose in mandating the collection of data on State policies and programs through the *State Survey is* to provide policymakers and the public with currently unavailable but much needed information regarding State underage drinking prevention policies and programs. SAMHSA and other Federal agencies that have underage drinking prevention as part of their mandate will use the results of the *State Survey* to inform Federal programmatic priorities. The information gathered by the *State Survey* will also establish a resource for State agencies and the general public for assessing policies and programs in their own State and for becoming familiar with the programs, policies, and funding priorities of other States. It is also consistent with SAMHSA's Strategic Initiative, "Prevention of Substance Abuse and Mental Illness," which includes the prevention of underage drinking and is designed to create prevention prepared communities where individuals, families, schools, workplaces, and communities take action to promote emotional health and prevent and reduce mental illness, substance abuse, and suicide across the lifespan.

Because of the broad scope of data required by the STOP Act, SAMHSA will rely on existing data sources where possible to minimize the survey burden on the States. SAMHSA will employ data on State underage drinking policies from the National Institute on Alcohol Abuse and Alcoholism's Alcohol Policy Information System (APIS), an authoritative compendium of State alcohol-related laws. The APIS data will be augmented by SAMHSA with original legal research on State laws and policies addressing underage drinking to include all of the STOP Act's requested laws and regulations (Category #1 of the four categories included in the STOP Act, as described above, page 2).

The STOP Act mandates that the *State Survey* assess "best practices" and emphasize the importance of building collaborations with Federally Recognized Tribal Governments ("Tribal Governments"). It also emphasizes the importance at the Federal level of promoting interagency collaboration and to that end established the Interagency Coordinating Committee on the Prevention of Underage Drinking (ICCPUD). SAMHSA has determined that to fulfill the Congressional intent, it is critical that the *State Survey* gather information from the States regarding the best practices standards that they apply to their underage drinking programs, collaborations between States and Tribal Governments, and the development of State-level interagency collaborations similar to ICCPUD.

SAMHSA has determined that data on Categories #2, #3, and #4 mandated in the STOP Act (as listed on page 2) (enforcement and educational programs; programs targeting youth, parents, and caregivers; and State expenditures) as well as States' best practices standards, collaborations with Tribal Governments, and State-level interagency collaborations *are not available from secondary sources* and therefore must be collected from the States themselves. The *State Survey* will therefore be necessary to fulfill the Congressional mandate found in the STOP Act.

The *State Survey* is a single document that is divided into four sections, as follows:

(1) Enforcement of underage drinking prevention laws;

(2) Underage drinking prevention programs, including data on State best practices standards and collaborations with Tribal Governments;

(3) State interagency collaborations used to implement the above programs; and

(4) Estimates of the State funds invested in the categories specified in the STOP Act (*see* description of Category #4, above, page 2) and descriptions of any dedicated fees, taxes or fines used to raise these funds.

The number of questions in each Section is as follows:

Section 1: 29 questions.
Section 2A: 18 questions.[2]
Section 2B: 6 questions.[3]
Section 2C: 6 questions.
Section 3: 12 questions.
Section 4: 19 questions.
Total: 90 Questions.

It is anticipated that respondents will actually respond to only a subset of this total. This is because the survey is designed with "skip logic," which means that many questions will only be directed to a subset of respondents who report the existence of particular programs or activities.

To ensure that the *State Survey* obtains the necessary data while minimizing the burden on the States, SAMHSA has conducted a lengthy and comprehensive planning process. It has sought advice from key stakeholders (as mandated by the STOP Act) including hosting an all-day stakeholders meeting, conducting two field tests with State officials likely to be responsible for completing the *State Survey,* and investigating and testing various *State Survey* formats, online delivery systems, and data collection methodologies.

Based on these investigations, SAMHSA has decided to collect the required data using an online survey instrument over an 8-week period. The *State Survey* will be sent to each State Governor's office and the Office of the Mayor of the District of Columbia, for a total of 51 survey respondents. Based on the feedback received from stakeholders and field pilot testers, it is anticipated that the State Governors will designate staff from State agencies that have access to the requested data (typically State Alcohol Beverage Control [ABC] agencies and State Substance Abuse Program agencies). SAMHSA will provide both telephone and online technical support to State agency staff and will emphasize that the States are only expected to provide data that is readily available and are not required to provide data that has not already been collected. The burden estimate below takes into account these assumptions.

The estimated annual response burden to collect this information is as follows:

[2] Note that the number of questions in Sections 2A is an estimate. This Section asks States to identify their programs that are *specific* to underage drinking prevention. For each program identified there are six follow-up questions. Based on feedback from stakeholders and pilot testers, it is anticipated that States will report an average of three programs for a total of 18 questions.

[3] Note that the number of questions in Section 2B is an estimate. This Section asks States to identify their programs that are *related* to underage drinking prevention. For each program identified there are two follow-up questions. Based on feedback from stakeholders and pilot testers, it is anticipated that States will report an average of three such programs for a total of six questions.

Instrument	Number of respondents	Responses/ respondent	Burden/ response (hrs)	Annual burden (hrs)
State Questionnaire	51	1	17.7	902.7

Written comments and recommendations concerning the proposed information collection should be sent by September 2, 2010 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–5806.

Dated: July 20, 2010.

Elaine Parry,

Director, Office of Program Services.

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: Financial Institution Data Match.

OMB No.: 0970–0196.

Description: Section 466(a)(17) of the Social Security Act (the Act) requires States to establish procedures under which the State Child Support Enforcement IV–D agencies shall enter into agreements with financial institutions doing business in States for the purpose of securing information leading to the enforcement of child support orders. Under 452(l) and 466(a)(17)(A)(i) of the Act, the Secretary may aid State agencies conducting data matches with financial institutions doing business in multiple States by centrally matching through the Federal Parent Locator Service.

Respondents: Financial institutions doing business in two or more States.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Financial Data Match Result File	259	4	0.33	341.88
Election Form	122	1	0.50	10.2

Estimated Total Annual Burden Hours: 402.88.

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. E-mail address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Dated: July 29, 2010.

Robert Sargis,

Reports Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0382]

Animal Drug User Fee Rates and Payment Procedures for Fiscal Year 2011

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the rates and payment procedures for fiscal year (FY) 2011 animal drug user fees. The Federal Food, Drug, and Cosmetic Act (the act), as amended by the Animal Drug User Fee Act of 2003 (ADUFA) and the Animal Drug User Fee Amendments of 2008 (ADUFA II), authorizes FDA to collect user fees for certain animal drug applications and supplements, on certain animal drug products, on certain establishments where such products are made, and on certain sponsors of such animal drug applications and/or investigational animal drug submissions. This notice establishes the fee rates for FY 2011.

FOR FURTHER INFORMATION CONTACT: Visit FDA's Web site at *http://www.fda.gov/ForIndustry/UserFees/AnimalDrugUserFeeActADUFA/default.htm* or contact Lisa Kable, Center for Veterinary Medicine (HFV–10), Food and Drug Administration, 7529 Standish Pl., Rockville, MD 20855, 240–276–9718. For general questions, you may also e-mail the Center for Veterinary Medicine (CVM) at: *cvmadufa@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 740 of the act (21 U.S.C. 379j-12) establishes four different kinds of user fees: (1) Fees for certain types of animal drug applications and supplements, (2) annual fees for certain animal drug products, (3) annual fees for certain establishments where such products are made, and (4) annual fees for certain sponsors of animal drug applications and/or investigational animal drug submissions (21 U.S.C. 379j-12(a)). When certain conditions are met, FDA will waive or reduce fees (21 U.S.C. 379j-12(d)).

For FY 2009 through FY 2013, the act establishes aggregate yearly base revenue amounts for each of these fee categories. Base revenue amounts established for years after FY 2009 are subject to adjustment for workload. Fees for applications, establishments, products, and sponsors are to be established each year by FDA so that the revenue for each fee category will approximate the level established in the statute, after the level has been adjusted for workload.

For FY 2011, the animal drug user fee rates are: $316,200 for an animal drug application; $158,100 for a supplemental animal drug application for which safety or effectiveness data is required and for an animal drug application subject to the criteria set forth in section 512(d)(4) of the act (21 U.S.C. 360b(d)(4)); $7,235 for an annual product fee; $83,100 for an annual establishment fee; and $64,000 for an annual sponsor fee. FDA will issue invoices for FY 2011 product, establishment, and sponsor fees by December 31, 2010, and these invoices will be due and payable within 30 days of issuance of the invoice.

The application fee rates are effective for applications submitted on or after October 1, 2010, and will remain in effect through September 30, 2011. Applications will not be accepted for review until FDA has received full payment of application fees and any other animal drug user fees owed.

II. Revenue Amount for FY 2011

A. Statutory Fee Revenue Amounts

ADUFA II (Public Law 110–316 signed by the President on August 14, 2008) specifies that the aggregate revenue amount for FY 2011 for each of the 4 animal drug user fee categories is $4,862,000, before any adjustment for workload is made. (See 21 U.S.C. 379j-12(b)(1) through (b)(4).)

B. Inflation Adjustment to Fee Revenue Amount

The amounts established in ADUFA II for each year for FY 2009 through FY 2013 include an inflation adjustment; so, no further inflation adjustment is required.

C. Workload Adjustment to Inflation Adjusted Fee Revenue Amount

For each FY beginning in FY 2010, ADUFA provides that fee revenue amounts shall be further adjusted to reflect changes in review workload (21 U.S.C. 379j-12(c)(1)).

FDA calculated the average number of each of the five types of applications and submissions specified in the workload adjustment provision (animal drug applications, supplemental animal drug applications for which data with respect to safety or efficacy are required, manufacturing supplemental animal drug applications, investigational animal drug study submissions, and investigational animal drug protocol submissions) received over the 5-year period that ended on September 30, 2002 (the base years), and the average number of each of these types of applications and submissions over the most recent 5-year period that ended on June 30, 2010.

The results of these calculations are presented in the first two columns of table 1 of this document. Column 3 reflects the percent change in workload over the two 5-year periods. Column 4 shows the weighting factor for each type of application, reflecting how much of the total FDA animal drug review workload was accounted for by each type of application or submission in the table during the most recent 5 years. Column 5 of table 1 of this document is the weighted percent change in each category of workload, and was derived by multiplying the weighting factor in each line in column 4 by the percent change from the base years in column 3. At the bottom right of the table the sum of the values in column 5 is added, reflecting a total change in workload of -25% percent for FY 2011. This is the workload adjuster for FY 2011.

TABLE 1—WORKLOAD ADJUSTER CALCULATION (NUMBERS MAY NOT ADD DUE TO ROUNDING)

Application Type	Column 1 5-Year Average (Base Years)	Column 2 Latest 5-Year Average	Column 3 Percent Change	Column 4 Weighting Factor	Column 5 Weighted % Change
New Animal Drug Applications (NADAs)	28.8	12.2	-58%	0.0372	-2%
Supplemental NADAs With Safety or Efficacy Data	23.4	13.2	-44%	0.0241	-1%
Manufacturing Supplements	366.6	430.4	17%	0.1699	3%
Investigational Study Submissions	336.6	230.4	-32%	0.5431	-17%
Investigational Protocol Submissions	292.4	198.6	-32%	0.2257	-7%
FY 2011 Workload Adjuster					-25%

ADUFA specifies that the workload adjuster may not result in fees that are less than the fee revenue amount in the statute (21 U.S.C. 379j-12(c)(1)(B)). Because applying the FY 2011 workload adjuster would result in fees less than the statutory amount, the workload adjustment will not be applied in FY 2011. As a result, the statutory revenue target amount for each of the 4 categories of fees remains at $4,862,000 with the new total revenue target for fees in FY 2011 being $19,448,000.

III. Adjustment for Excess Collections in Previous Years

ADUFA II amended the annual offset provision of ADUFA I to require one offset when FY 2013 fees are set in August of 2012, if aggregate collections from FY 2009 through 2011 plus the amount of fees estimated to be collected for FY 2012 exceed aggregate appropriations over the same period (21 U.S.C. 379j-12(g)(4), as amended by ADUFA II). Therefore FDA is not offsetting for excess collections at this time.

IV. Application Fee Calculations for FY 2011

The terms "animal drug application" and "supplemental animal drug application" are defined in section 739 of the act (21 U.S.C. 379j-11(1) and (2)).

A. Application Fee Revenues and Numbers of Fee-Paying Applications

The application fee must be paid for any animal drug application or supplemental animal drug application that is subject to fees under ADUFA and that is submitted on or after September 1, 2003. The application fees are to be set so that they will generate $4,862,000 in fee revenue for FY 2011. This is the amount set out in the statute and no adjustments are required for FY 2011. The fee for a supplemental animal drug application for which safety or effectiveness data are required and for an animal drug application subject to criteria set forth in section 512(d)(4) of the act is to be set at 50 percent of the animal drug application fee. (See 21 U.S.C. 379j-12(a)(1)(A)(ii), as amended by ADUFA II.)

To set animal drug application fees and supplemental animal drug application fees to realize $4,862,000, FDA must first make some assumptions about the number of fee-paying applications and supplements the agency will receive in FY 2011.

The agency knows the number of applications that have been submitted in previous years. That number fluctuates significantly from year to year. In estimating the fee revenue to be generated by animal drug application fees in FY 2011, FDA is assuming that the number of applications that will pay fees in FY 2011 will equal the average number of submissions over the 4 most recent years (including an estimate for the current year). This may not fully account for possible year to year fluctuations in numbers of fee-paying applications, but FDA believes that this is a reasonable approach after 7 years of experience with this program.

Over the past 4 years, the average number of animal drug applications that would have been subject to the full fee was 8.5, including the number for the most recent year, estimated at 9. Over this same period, the average number of supplemental applications and applications subject to the criteria set forth in section 512(d)(4) of the act that would have been subject to half of the full fee was 13.75, including the number for the most recent year, estimated at 14.

Thus, for FY 2011, FDA estimates receipt of 8.5 fee paying original applications and 13.75 fee-paying supplemental animal drug applications and applications subject to the criteria set forth is section 512(d)(4) of the act which pay half of the full fee.

B. Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 8.5 applications that pay the full fee and the estimated 13.75 supplements and applications subject to the criteria set forth in section 512(d)(4) of the act that pay half of the full fee will generate a total of $4,862,000. To generate this amount, the fee for an animal drug application, rounded to the nearest hundred dollars, will have to be $316,200, and the fee for a supplemental animal drug application for which safety or effectiveness data are required and for applications subject to the criteria set forth in section 512(d)(4) of the act will have to be $158,100.

V. Product Fee Calculations for FY 20111

A. Product Fee Revenues and Numbers of Fee-Paying Products

The animal drug product fee (also referred to as the product fee) must be paid annually by the person named as the applicant in a new animal drug application or supplemental new animal drug application for an animal drug product submitted for listing under section 510 of the act (21 U.S.C. 360), and who had an animal drug application or supplemental animal drug application pending at FDA after September 1, 2003. (See 21 U.S.C. 379j-12(a)(2).) The term "animal drug product" is defined in 21 U.S.C. 379j-11(3). The product fees are to be set so that they will generate $4,862,000 in fee revenue for FY 2011. This is the amount set out in the statute and no adjustments are required for FY 2011.

To set animal drug product fees to realize $4,862,000, FDA must make some assumptions about the number of products for which these fees will be paid in FY 2011. FDA developed data on all animal drug products that have been submitted for listing under section 510 of the act, and matched this to the list of all persons who had an animal drug application or supplement pending after September 1, 2003. As of July 2010, FDA estimates that there are a total of 747 products submitted for listing by persons who had an animal drug application or supplemental animal drug application pending after September 1, 2003. Based on this, FDA estimates that a total of 747 products will be subject to this fee in FY 2011.

In estimating the fee revenue to be generated by animal drug product fees in FY 2011, FDA is again assuming that 10 percent of the products invoiced, or about 75, will not pay fees in FY 2011 due to fee waivers and reductions. Based on experience with other user fee programs and the first 7 years of ADUFA, FDA believes that this is a reasonable basis for estimating the number of fee-paying products in FY 2011.

Accordingly, the agency estimates that a total of 672 (747 minus 75) products will be subject to product fees in FY 2011.

B. Product Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 672 products that pay fees will generate a total of $4,862,000. To generate this amount will require the fee for an animal drug product, rounded to the nearest 5 dollars, to be $7,235.

VI. Establishment Fee Calculations for FY 2011

A. Establishment Fee Revenues and Numbers of Fee-Paying Establishments

The animal drug establishment fee (also referred to as the establishment fee) must be paid annually by the person who: (1) Owns or operates, directly or through an affiliate, an animal drug establishment; (2) is named as the applicant in an animal drug application or supplemental animal drug application for an animal drug product submitted for listing under section 510 of the act; (3) had an animal drug application or supplemental animal drug application pending at FDA after September 1, 2003; and (4) whose establishment engaged in the manufacture of the animal drug product during the fiscal year. (See 21 U.S.C. 379j-12(a)(3).) An establishment subject to animal drug establishment fees is assessed only 1 such fee per fiscal year. (See 21 U.S.C. 379j-12(a)(3).) The term "animal drug establishment" is defined in 21 U.S.C. 379j-11(4). The establishment fees are to be set so that they will generate $4,862,000 in fee revenue for FY 2011. This is the amount set out in the statute and no adjustments are required for FY 2011.

To set animal drug establishment fees to realize $4,862,000, FDA must make some assumptions about the number of establishments for which these fees will be paid in FY 2011. FDA developed data on all animal drug establishments and matched this to the list of all persons who had an animal drug application or supplement pending after September 1, 2003. As of July 2010, FDA estimates that there are a total of 65 establishments owned or operated by persons who had an animal drug application or supplemental animal drug application pending after September 1, 2003. Based on this, FDA believes that 65 establishments will be subject to this fee in FY 2011.

In estimating the fee revenue to be generated by animal drug establishment fees in FY 2011, FDA is assuming that 10 percent of the establishments invoiced, or 6.5, will not pay fees in FY 2011 due to fee waivers and reductions. Based on experience with the first 7 years of ADUFA, FDA believes that this is a reasonable basis for estimating the number of fee-paying establishments in FY 2011.

Accordingly, the agency estimates that a total of 58.5 establishments (65 minus 6.5) will be subject to establishment fees in FY 2011.

B. Establishment Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 58.5 establishments that pay fees will generate a total of $4,862,000. To generate this amount will require the fee for an animal drug establishment, rounded to the nearest 50 dollars, to be $83,100.

VII. Sponsor Fee Calculations for FY 2011

A. Sponsor Fee Revenues and Numbers of Fee-Paying Sponsors

The animal drug sponsor fee (also referred to as the sponsor fee) must be paid annually by each person who: (1) Is named as the applicant in an animal drug application, except for an approved application for which all subject products have been removed from listing under section 510 of the act or has submitted an investigational animal drug submission that has not been terminated or otherwise rendered inactive; and (2) had an animal drug application, supplemental animal drug application, or investigational animal drug submission pending at FDA after September 1, 2003. (See 21 U.S.C. 379j-11(6) and 379j-12(a)(4).) An animal drug sponsor is subject to only 1 such fee each fiscal year. (See 21 U.S.C. 379j-12(a)(4).) The sponsor fees are to be set so that they will generate $4,862,000 in fee revenue for FY 2011. This is the amount set out in the statute, and no adjustments are required for FY 2011.

To set animal drug sponsor fees to realize $4,862,000, FDA must make some assumptions about the number of sponsors who will pay these fees in FY 2011. Based on the number of firms that would have met this definition in each of the past 7 years, FDA estimates that a total of 162 sponsors will meet this definition in FY 2011.

Careful review indicates that about one third or 33 percent of all of these sponsors will qualify for minor use/minor species waiver or reduction (21 U.S.C. 379j-12(d)(1)(C)). Based on the agency's experience to date with sponsor fees, FDA's current best estimate is that an additional 20 percent will qualify for other waivers or reductions, for a total of 53 percent of the sponsors invoiced, or 86, who will not pay fees in FY 2011 due to fee waivers and reductions. FDA believes that this is a reasonable basis for estimating the number of fee-paying sponsors in FY 2011.

Accordingly, the agency estimates that a total of 76 sponsors (162 minus 86) will be subject to and pay sponsor fees in FY 2011.

B. Sponsor Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 76 sponsors that pay fees will generate a total of $4,862,000. To generate this amount will require the fee for an animal drug sponsor, rounded to the nearest 50 dollars, to be $64,000.

VIII. Fee Schedule for FY 2011

The fee rates for FY 2011 are summarized in table 2 of this document.

TABLE 2—FY 2011 FEE RATES

Animal Drug User Fee Category	Fee Rate for FY 2011
Animal Drug Application Fees	
Animal Drug Application	$316,200
Supplemental Animal Drug Application for Which Safety or Effectiveness Data are Required or Animal Drug Application Subject to the Criteria Set Forth in Section 512(d)(4) of the Act	$158,100
Animal Drug Product Fee	$7,235
Animal Drug Establishment Fee[1]	$83,100
Animal Drug Sponsor Fee[2]	$64,000

[1] An animal drug establishment is subject to only one such fee each fiscal year.
[2] An animal drug sponsor is subject to only one such fee each fiscal year.

IX. Procedures for Paying the FY 2011 Fees

A. Application Fees and Payment Instructions

The appropriate application fee established in the new fee schedule must be paid for an animal drug application or supplement subject to fees under ADUFA that is submitted after September 30, 2010. Payment must be made in U.S. currency by check, bank draft, or U.S. postal money order payable to the order of the Food and Drug Administration, by wire transfer, or electronically using Pay.gov. (The Pay.gov payment option is available to you after you submit a cover sheet. Click the "Pay Now" button.) On your check, bank draft, or U.S. postal money order, please write your application's unique Payment Identification Number (PIN), beginning with the letters AD, from the upper right-hand corner of your completed Animal Drug User Fee Cover Sheet. Also write the FDA post office box number (P.O. Box 953877) on the enclosed check, bank draft, or money order. Your payment and a copy of the completed Animal Drug User Fee Cover

Sheet can be mailed to: Food and Drug Administration, P.O. Box 953877, St. Louis, MO, 63195–3877.

If payment is made by wire transfer, send payment to: U.S. Department of Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, FDA Deposit Account Number: 75060099, U.S. Department of Treasury routing/transit number: 021030004, SWIFT Number: FRNYUS33. You are responsible for any administrative costs associated with the processing of a wire transfer. Contact your bank or financial institution regarding additional fees.

If you prefer to send a check by a courier such as Federal Express (FEDEX) or United Parcel Service (UPS), the courier may deliver the check and printed copy of the cover sheet to: U.S. Bank, Attn: Government Lockbox 953877, 1005 Convention Plaza, St. Louis, MO 63101. (Note: This address is for courier delivery only. If you have any questions concerning courier delivery contact the U.S. Bank at 314–418–4821. This telephone number is only for questions about courier delivery.)

The tax identification number of the Food and Drug Administration is 530196965. (Note: In no case should the payment for the fee be submitted to FDA with the application.)

It is helpful if the fee arrives at the bank at least a day or two before the application arrives at FDA's CVM. FDA records the official application receipt date as the later of the following: The date the application was received by FDA's CVM, or the date U.S. Bank notifies FDA that your payment in the full amount has been received, or when the U.S. Treasury notifies FDA of receipt of an electronic or wire transfer payment. U.S. Bank and the U.S. Treasury are required to notify FDA within 1 working day, using the PIN described previously.

B. Application Cover Sheet Procedures

Step One—Create a user account and password. Log on to the ADUFA Web site at *http://www.fda.gov/ForIndustry/UserFees/AnimalDrugUserFeeActADUFA/default.htm* and, under Tools and Resources click "The Animal Drug User Fee Cover Sheet" and then click "Create ADUFA User Fee Cover Sheet." For security reasons, each firm submitting an application will be assigned an organization identification number, and each user will also be required to set up a user account and password the first time you use this site. Online instructions will walk you through this process.

Step Two—Create an Animal Drug User Cover Sheet, transmit it to FDA, and print a copy. After logging into your account with your user name and password, complete the steps required to create an Animal Drug User Fee Cover Sheet. One cover sheet is needed for each animal drug application or supplement. Once you are satisfied that the data on the cover sheet is accurate and you have finalized the cover sheet, you will be able to transmit it electronically to FDA and you will be able to print a copy of your cover sheet showing your unique PIN.

Step Three—Send the payment for your application as described in section IX.A of this document.

Step Four—Please submit your application and a copy of the completed Animal Drug User Fee Cover Sheet to the following address: Food and Drug Administration, Center for Veterinary Medicine, Document Control Unit (HFV–199), 7500 Standish Pl., Rockville, MD 20855.

C. Product, Establishment, and Sponsor Fees

By December 31, 2010, FDA will issue invoices and payment instructions for product, establishment, and sponsor fees for FY 2011 using this Fee Schedule. Payment will be due and payable within 30 days of issuance of the invoice. FDA will issue invoices in November 2011 for any products, establishments, and sponsors subject to fees for FY 2011 that qualify for fees after the December 2010 billing.

Dated: July 29, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2009–N–0340]

Animal Generic Drug User Fee Rates and Payment Procedures for Fiscal Year 2011

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the rates and payment procedures for fiscal year (FY) 2011 generic new animal drug user fees. The Federal Food, Drug, and Cosmetic Act (the act), as amended by the Animal Generic Drug User Fee Act of 2008 (AGDUFA), authorizes FDA to collect user fees for certain abbreviated applications for generic new animal drugs, on certain generic new animal drug products, and on certain sponsors of such abbreviated applications for generic new animal drugs and/or investigational submissions for generic new animal drugs. This notice establishes the fee rates for FY 2011.

For FY 2011, the generic animal drug user fee rates are: $92,600 for each abbreviated application for a generic new animal drug; $5,440 for each generic new animal drug product; $55,950 for each generic new animal drug sponsor paying 100 percent of the sponsor fee; $41,963 for each generic new animal drug sponsor paying 75 percent of the sponsor fee; and $27,975 for a generic new animal drug sponsor paying 50 percent of the sponsor fee. FDA will issue invoices for FY 2011 product and sponsor fees by December 31, 2010. These fees will be due and payable within 30 days of the issuance of the invoices.

The application fee rates are effective for all abbreviated applications for a generic new animal drug submitted on or after October 1, 2010, and will remain in effect through September 30, 2011. Applications will not be accepted for review until FDA has received full payment of related application fees and any other fees owed under the Animal Generic Drug User Fee program.

FOR FURTHER INFORMATION CONTACT: Visit the FDA Web site at *http://www.fda.gov/ForIndustry/UserFees/AnimalGenericDrugUserFeeActAGDUFA/default.htm* or contact Bryan Walsh, Center for Veterinary Medicine (HFV–10), Food and Drug Administration, 7529 Standish Pl., Rockville, MD 20855, 240–276–9730. For general questions, you may also e-mail the Center for Veterinary Medicine (CVM) at: *cvmagdufa@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

Section 741 of the act (21 U.S.C. 379j–21) establishes three different kinds of user fees: (1) Fees for certain types of abbreviated applications for generic new animal drugs, (2) annual fees for certain generic new animal drug products, and (3) annual fees for certain sponsors of abbreviated applications for generic new animal drugs and/or investigational submissions for generic new animal drugs (21 U.S.C. 379j–21(a)). When certain conditions are met, FDA will waive or reduce fees for generic new animal drugs intended solely to provide for a minor use or minor species indication (21 U.S.C. 379j–21(d)).

For FY 2009 through FY 2013, the act establishes aggregate yearly base revenue amounts for each of these fee

categories. Base revenue amounts established for years after FY 2009 may be adjusted for workload. Fees for applications, products, and sponsors are to be established each year by FDA so that the revenue for each fee category will approximate the level established in the statute, after the level has been adjusted for workload.

II. Revenue Amount for FY 2011

A. Statutory Fee Revenue Amounts

AGDUFA (Title II of Public Law 110–316 signed by the President on August 14, 2008) specifies that the aggregate revenue amount for FY 2011 for abbreviated application fees is $1,619,000 and each of the other two generic new animal drug user fee categories, annual product fees and annual sponsor fees, is $1,889,000 each, before any adjustment for workload is made (see 21 U.S.C. 379j–21(b)).

B. Inflation Adjustment to Fee Revenue Amount

The amounts established in AGDUFA for each year for FY 2009 through FY 2013 include an inflation adjustment, so no inflation adjustment is required.

C. Workload Adjustment to Inflation Adjusted Fee Revenue Amount

For each FY beginning after FY 2009, AGDUFA provides that statutory fee revenue amounts shall be further adjusted to reflect changes in review workload (21 U.S.C. 379j–21(c)(1)).

FDA calculated the average number of each of the four types of applications and submissions specified in the workload adjustment provision (abbreviated applications for generic new animal drugs, manufacturing supplemental abbreviated applications for generic new animal drugs, investigational generic new animal drug study submissions, and investigational generic new animal drug protocol submissions) received over the 5-year period ended on September 30, 2008 (the base years), and the average number of each of these types of applications and submissions over the most recent 5-year period that ended on June 30, 2010.

The results of these calculations are presented in the first two columns of table 1 of this document. Column 3 reflects the percent change in workload over the two 5-year periods. Column 4 shows the weighting factor for each type of application, reflecting how much of the total FDA generic new animal drug review workload was accounted for by each type of application or submission in the table during the most recent 5 years. Column 5 of table 1 is the weighted percent change in each category of workload, and was derived by multiplying the weighting factor in each line in column 4 by the percent change from the base years in column 3. At the bottom right of table 1, the sum of the values in column 5 is calculated, reflecting a total change in workload of negative 24.47 percent for FY 2011. This is the workload adjuster for FY 2011.

TABLE 1—WORKLOAD ADJUSTER CALCULATION

Application Type	Column 1 5-Year Avg. 2004–2008 (Base Years)	Column 2 Latest 5-Year Avg. (thru June 30, 2010)	Column 3 Percent Change	Column 4 Weighting Factor	Colum 5 Weighted Percent Change
Abbreviated New Animal Drug Applications (ANADAs)	44.2	30.2	-32%	56%	-17.74%
Manufacturing Supplements ANADAs[1]	114.6	102.6	-10%	19%	-1.99%
Generic Investigational Study Submissions[2]	17.4	17.4	0%	10%	0.00%
Generic Investigational Protocol Submissions	21.6	15.2	-30%	16%	-4.74%
FY 2011 AGDUFA Workload Adjuster					-24.47%

[1] This number is slightly lower than the 114.8 shown in last year's notice because FDA refused to file some applications.
[2] This number is slightly lower than the 18 shown in last years notice because FDA refused to accept some submissions.

AGDUFA specifies that the workload adjuster may not result in fees for a fiscal year that are less than the statutory revenue amount (21 U.S.C. 379j–21(c)(1)(B)) for that fiscal year. Because applying the workload adjuster for FY 2011 would result in fees less than the statutory amount, the workload adjustment will not be applied in FY 2011. As a result, the statutory revenue amount for each category of fees for FY 2011 ($1,619,000 for application fees and $1,889,000 for both product and sponsor fees) becomes the revenue target for the fees in FY 2011, for a total fee revenue target in FY 2011 of $5,397,000 for fees from all three categories.

III. Abbreviated Application Fee Calculations for FY 2011

The term "abbreviated application for a generic new animal drug" is defined in 21 U.S.C. 379j–21(k)(1).

A. Application Fee Revenues and Numbers of Fee-Paying Applications

The application fee must be paid for abbreviated applications for a generic new animal drug that is subject to fees under AGDUFA and that is submitted on or after July 1, 2008. The application fees are to be set so that they will generate $1,619,000 in fee revenue for FY 2011. This is the amount set out in the statute.

To set fees for abbreviated applications for generic new animal drugs to realize $1,619,000, FDA must first make some assumptions about the number of fee-paying abbreviated applications it will receive during FY 2011.

The agency knows the number of applications that have been submitted in previous years. That number fluctuates significantly from year to year. FDA is making estimates and applying different assumptions for two types of submissions: Original submissions of abbreviated applications for generic new animal drugs and "reactivated" submissions of abbreviated applications for generic new animal drugs. Any original submissions of abbreviated applications for generic new animal drugs that were received by FDA before July 1, 2008, were not assessed

fees (21 U.S.C. 379j–21(a)(1)(A)). Some of these nonfee paying submissions were later resubmitted after July 1 because the initial submission was not approved by FDA (i.e. FDA marked the submission as incomplete and requested additional nonadministrative information) or because the original submission was withdrawn by the sponsor. Because these abbreviated applications for generic new animal drugs are resubmitted after July 1, 2008, they are assessed fees. In this notice, FDA refers to these resubmitted applications as "reactivated" applications.

Regarding original submissions of abbreviated applications for generic new animal drugs, FDA is assuming that the number of applications that will pay fees in FY 2011 will equal 30 percent less than the average number of submissions over the 5 most recent years. This 30-percent reduction is made because of the anticipated impact of fees on the number on submissions. During FY 2010, FDA estimates it will receive only 6 original submissions of abbreviated applications for generic new animal drugs, compared to average receipts of 14.4 per year over the latest 5 years, including our FY 2010 estimate. Applying a 30-percent reduction to the 14.4 average, the estimate for original submissions of abbreviated applications for generic new animal drugs for FY 2011 is 10.1. (If the number of original submissions of abbreviated applications for generic new animal drugs does not increase over the next year, a higher percent reduction will have to be applied a year from now when fees are set for FY 2012.)

Regarding reactivated submissions of abbreviated applications for generic new animal drugs, FDA is applying a 50-percent reduction based on the FDA's experience with these types of submissions during the third year of other user fee programs. This assumption is based on the fact that there were a limited number of original submissions of abbreviated applications for generic new animal drugs received by FDA before July 1, 2008, and which were not assessed fees. For these original submissions that were not approved before July 1, 2008, resubmission to FDA would trigger an application fee (21 U.S.C. 379j–21(a)(1)(A)). Once these initial original submissions of abbreviated applications for generic new animal drugs received by FDA before July 1, 2008, have either been withdrawn or resubmitted, "reactivation submissions" will cease completely. This reduction is consistent with estimates made when this user fee program was in the development process. During FY 2010, FDA estimates it will receive only 9 reactivated submissions of abbreviated applications for generic new animal drugs, compared to average receipts of 14.8 per year average over the most recent 5 years, including our estimate for FY 2010. Applying a 50-percent reduction to the 14.8 average, the estimate for reactivated submissions of abbreviated applications for generic new animal drugs for FY 2011 is 7.4. These reductions may not fully account for possible year to year fluctuations in numbers of fee-paying applications, but FDA believes that this is a reasonable approach after about 7 years of experience with a similar user fee program.

Based on the previous assumptions, FDA is estimating that it will receive a total of 17.5 fee paying generic new animal drug applications in FY 2011 (10.1 original applications and 7.4 reactivations).

B. Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 17.5 abbreviated applications that pay the fee will generate a total of $1,619,000. To generate this amount, the fee for a generic new animal drug application, rounded to the nearest hundred dollars, will have to be $92,600.

IV. Generic New Animal Drug Product Fee Calculations for FY 2011

A. Product Fee Revenues and Numbers of Fee-Paying Products

The generic new animal drug product fee (also referred to as the product fee) must be paid annually by the person named as the applicant in an abbreviated new animal drug application or supplemental abbreviated application for generic new animal drugs for an animal drug product submitted for listing under section 510 of the act (21 U.S.C. 360), and who had an abbreviated application for a generic new animal drug or supplemental abbreviated application for a generic new animal drug pending at FDA after September 1, 2008 (see 21 U.S.C. 379j–21(a)(2)). The term "generic new animal drug product" means each specific strength or potency of a particular active ingredient or ingredients in final dosage form marketed by a particular manufacturer or distributor, which is uniquely identified by the labeler code and product code portions of the national drug code, and for which an abbreviated application for a generic new animal drug or supplemental abbreviated application for a generic new animal drug has been approved (21 U.S.C. 379j–21(k)(6)). The product fees are to be set so that they will generate $1,889,000 in fee revenue for FY 2011. This is the amount set out in the statute and no further adjustments are required for FY 2011.

To set generic new animal drug product fees to realize $1,889,000, FDA must make some assumptions about the number of products for which these fees will be paid in FY 2011. FDA gathered data on all generic new animal drug products that have been submitted for listing under section 510 of the act, and matched this to the list of all persons who FDA estimated would have an abbreviated new animal drug application or supplemental abbreviated application pending after September 1, 2008. FDA estimates a total of 386 products submitted for listing by persons who had an abbreviated application for a generic new animal drug or supplemental abbreviated application for a generic new animal drug pending after September 1, 2008. Based on this, FDA believes that a total of 386 products will be subject to this fee in FY 2011. The number of products has dropped substantially from the numbers in last year's **Federal Register** fee notice because a number of products were de-listed and are no longer subject to fee. That also causes the fee per product to increase.

In estimating the fee revenue to be generated by generic new animal drug product fees in FY 2011, FDA is assuming that 10 percent of the products invoiced, or 38.6, will not pay fees in FY 2011 due to fee waivers and reductions. Based on experience with other user fee programs and the first 2 years of AGDUFA, FDA believes that this is a reasonable basis for estimating the number of fee-paying products in FY 2011.

Accordingly, the agency estimates that a total of 347.4 (386 minus 38.6) products will be subject to product fees in FY 2011.

B. Product Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated 347.4 products that pay fees will generate a total of $1,889,000. To generate this amount will require the fee for a generic new animal drug product, rounded to the nearest five dollars, to be $5,440.

V. Generic New Animal Drug Sponsor Fee Calculations for FY 2011

A. Sponsor Fee Revenues and Numbers of Fee-Paying Sponsors

The generic new animal drug sponsor fee (also referred to as the sponsor fee) must be paid annually by each person who: (1) Is named as the applicant in an

abbreviated application for a new generic animal drug, except for an approved application for which all subject products have been removed from listing under section 510 of the act, or has submitted an investigational submission for a generic new animal drug that has not been terminated or otherwise rendered inactive; and (2) had an abbreviated application for a generic new animal drug, supplemental abbreviated application for a generic new animal drug, or investigational submission for a generic new animal drug pending at FDA after September 1, 2008 (see 21 U.S.C. 379j–21(k)(7) and 379j–21(a)(3)). A generic new animal drug sponsor is subject to only one such fee each fiscal year (see 21 U.S.C. 379j–21(a)(3)(B)). Applicants with more than 6 approved abbreviated applications will pay 100 percent of the sponsor fee, applicants with 2 to 6 approved abbreviated applications will pay 75 percent of the sponsor fee, and applicants with 1 or fewer approved abbreviated applications will pay 50 percent of the sponsor fee (see 21 U.S.C. 379j–21(a)(3)(B)). The sponsor fees are to be set so that they will generate $1,889,000 in fee revenue for FY 2011. This is the amount set out in the statute and no adjustments are required for FY 2011.

To set generic new animal drug sponsor fees to realize $1,889,000, FDA must make some assumptions about the number of sponsors who will pay these fees in FY 2011. Based on the number of firms that meet this definition, FDA estimates that in FY 2011, 12 sponsors will pay 100 percent fees, 12 sponsors will pay 75 percent fees, and 33 sponsors will pay 50 percent fees. That totals the equivalent of 37.5 full sponsor fees (12 times 100 percent or 12, plus 12 times 75 percent or 9, plus 33 times 50 percent or 16.5).

FDA estimates that about 10 percent of all of these sponsors, or 3.75, may qualify for a minor use/minor species waiver.

Accordingly, the agency estimates that the equivalent of 33.75 full sponsor fees (37.5 minus 3.75) are likely to be paid in FY 2011.

B. Sponsor Fee Rates for FY 2011

FDA must set the fee rates for FY 2011 so that the estimated equivalent of 33.75 full sponsor fees will generate a total of $1,889,000. To generate this amount will require the 100-percent fee for a generic new animal drug sponsor, rounded to the nearest $50, to be $55,950. Accordingly, the fee for those paying 75 percent of the full sponsor fee will be $41,963, and the fee for those paying 50 percent of the full sponsor fee will be $27,795.

VI. Fee Schedule for FY 2011

The fee rates for FY 2011 are summarized in table 2 of this document.

TABLE 2—FY 2011 FEE RATES

Generic New Animal Drug User Fee Category	Fee Rate for FY 2011
Abbreviated Application Fee for Generic New Animal Drug Application	$92,600
Generic New Animal Drug Product Fee	5,440
100 Percent Generic New Animal Drug Sponsor Fee[1]	55,950
75 Percent Generic New Animal Drug Sponsor Fee [1]	41,963
50 Percent Generic New Animal Drug Sponsor Fee [1]	27,975

[1] An animal drug sponsor is subject to only one fee each fiscal year.

VII. Procedures for Paying FY 2011 Generic New Animal Drug User Fees

A. Abbreviated Application Fees and Payment Instructions

The FY 2011 fee established in the new fee schedule must be paid for an abbreviated new animal drug application subject to fees under AGDUFA that is submitted on or after October 1, 2010. Payment must be made in U.S. currency by check, bank draft, or U.S. postal money order payable to the order of the Food and Drug Administration, by wire transfer, or by automatic clearing house (ACH) using Pay.gov. (The Pay.gov payment option is available to you after you submit a cover sheet. Click the "Pay Now" button). On your check, bank draft, U.S. or postal money order, please write your application's unique Payment Identification Number, beginning with the letters "AG", from the upper right-hand corner of your completed Animal Generic Drug User Fee Cover Sheet. Also write the FDA post office box number (PO Box 953877) on the enclosed check, bank draft, or money order. Your payment and a copy of the completed Animal Generic Drug User Fee Cover Sheet can be mailed to: Food and Drug Administration, P.O. Box 953877, St. Louis, MO, 63195–3877.

If payment is made via wire transfer, send payment to U.S. Department of the Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, Account Name: Food and Drug Administration, Account Number: 75060099, Routing Number: 021030004, Swift Number: FRNYUS33. You are responsible for any administrative costs associated with the processing of a wire transfer. Contact your bank or financial institution regarding the amount of the fees that need to be paid in addition to the wire transfer amount.

If you prefer to send a check by a courier such as FEDEX or UPS, the courier may deliver the check and printed copy of the cover sheet to: US Bank, Attn: Government Lockbox 953877, 1005 Convention Plaza, St. Louis, Missouri 63101. (Note: This address is for courier delivery only. If you have any questions concerning courier delivery contact the US Bank at 314–418–4821. This phone number is only for questions about courier delivery.)

The tax identification number of the Food and Drug Administration is 530196965. (Note: In no case should the payment for the fee be submitted to FDA with the application.)

It is helpful if the fee arrives at the bank at least a day or two before the abbreviated application arrives at FDA's Center for Veterinary Medicine. FDA records the official abbreviated application receipt date as the later of the following: The date the application was received by FDA's Center for Veterinary Medicine, or the date US Bank notifies FDA that your payment in the full amount has been received, or when the U.S. Department of the Treasury notifies FDA of payment. US Bank and the United States Treasury are required to notify FDA within 1 working day, using the Payment Identification Number described previously.

B. Application Cover Sheet Procedures

Step One—Create a user account and password. Log onto the AGDUFA Web site at *http://www.fda.gov/ForIndustry/UserFees/AnimalGenericDrugUserFeeActAGDUFA/ucm137049.htm* and scroll down the page until you find the link "Create AGDUFA User Fee Cover Sheet." Click on that link and follow the directions. For security reasons, each firm submitting an application will be assigned an organization identification number, and each user will also be required to set up a user account and password the first time you use this site. Online instructions will walk you through this process.

Step Two—Create an Animal Generic Drug User Fee Cover Sheet, transmit it to FDA, and print a copy. After logging into your account with your user name and password, complete the steps required to create an Animal Generic Drug User Fee Cover Sheet. One cover sheet is needed for each abbreviated animal drug application. Once you are

satisfied that the data on the cover sheet is accurate and you have finalized the Cover Sheet, you will be able to transmit it electronically to FDA and you will be able to print a copy of your cover sheet showing your unique Payment Identification Number.

Step Three—Send the Payment for your application as described in section VII.A of this document.

Step Four—Please submit your application and a copy of the completed Animal Generic Drug User Fee Cover Sheet to the following address: Food and Drug Administration, Center for Veterinary Medicine, Document Control Unit (HFV–199), 7500 Standish Pl., Rockville, MD 20855.

C. Product and Sponsor Fees

By December 31, 2010, FDA will issue invoices and payment instructions for product and sponsor fees for FY 2011 using this fee schedule. Fees will be due and payable 30 days after the issuance of the invoices. FDA will issue invoices in November 2012 for any products and sponsors subject to fees for FY 2011 that qualify for fees after the December 2010 billing.

Dated: July 29, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

[Docket No. FDA–2010–D–0246]

Draft Guidance for Industry on Residual Drug in Transdermal and Related Drug Delivery Systems; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Residual Drug in Transdermal and Related Drug Delivery Systems." This draft guidance provides recommendations to developers and manufacturers of transdermal drug delivery systems (TDDS), transmucosal drug delivery systems (TMDS), and topical patch products regarding use of an appropriate scientific approach during product design and development—as well as during manufacturing and product lifecycle management—to ensure that the amount of residual drug substance at the end of the labeled use period is minimized. The draft guidance is applicable to investigational new drug applications (INDs), new drug applications (NDAs), abbreviated new drug applications (ANDAs), and supplemental new drug applications (sNDAs) for TDDS, TMDS, and topical patch products.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance, including comments regarding the proposed collection of information, by November 1, 2010.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 2201, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to *http://www.regulations.gov*. Submit written comments on the draft guidance to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Terrance Ocheltree, Center for Drug Evaluation and Research, Food and Drug Administration, Bldg. 21, rm. 1609, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002, 301–796–1988.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Residual Drug in Transdermal and Related Drug Delivery Systems." This draft guidance provides recommendations to developers and manufacturers of TDDS, TMDS, and topical patch products regarding use of an appropriate scientific approach during product design and development—as well as during manufacturing and product lifecycle management—to ensure that the amount of residual drug substance at the end of the labeled use period is minimized.

Existing TDDS, TMDS, and topical patches contain a larger amount of the drug substance than what is intended to be delivered to the patient. This excess amount of drug substance is needed to facilitate delivery of the intended amount of the drug to the patient and remains as residual drug in the used system. The amount of residual drug substance in TDDS, TMDS, and topical patches has a significant potential to impact the products' quality, safety, and efficacy. Consequently, it is necessary to ensure that an appropriate scientific approach is used to design and develop these products. The approach should ensure that the amount of residual drug substance is minimized consistent with the current state of technology.

Currently marketed TDDS, TMDS, and topical patches may retain 10 to 95 percent of the initial total amount of drug after the intended use period. This raises a potential safety issue not only to the patient, but also to others including family members, caregivers, children, and pets. For example, adverse events due to a patient's failure to remove TDDS at the end of the intended use period have been reported and are generally related to an increased or prolonged pharmacological effect of the drug. Some children have died from inadvertent exposure to discarded TDDS. Reported adverse events resulting from various quality problems pertaining to TDDS have lead to product recalls, withdrawals, and public health advisories.

To reduce some of these risks, we recommend that an enhanced design and development approach—specifically Quality by Design (QbD), as described in the International Conference on Harmonization (ICH) guidance for industry Q8(R2) *Pharmaceutical Development*—be used when developing and manufacturing TDDS, TMDS, and topical patches. We also recommend that sufficient scientific justification to support the amount of residual drug in TDDS, TMDS, or topical patches be included in an application. The level of information in the justification should be sufficient to demonstrate product and process understanding and ensure that a scientific, risk-based approach has been taken to minimize the amount of residual drug in a system after use to the lowest possible level. Furthermore, it is expected that the amount of residual drug in a newly developed system will not exceed that of similar FDA-approved products.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency's current thinking on residual drug in transdermal and related drug delivery systems. It does not create or confer any rights for or on

any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) either electronic or written comments regarding this document. It is only necessary to send one set of comments. It is no longer necessary to send two copies of mailed comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

III. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Information in an application on the product and process development and justification for the final formulation and system design is approved by OMB under control numbers 0910–0001 and 0910–0014.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: July 29, 2010.

[Docket No. FDA–2009–D–0181]

Guidance for Industry on Label Comprehension Studies for Nonprescription Drug Products; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a guidance for industry entitled "Label Comprehension Studies for Nonprescription Drug Products." The guidance provides recommendations on the design of label comprehension studies that can be used to assess the extent to which consumers understand the information conveyed by proposed nonprescription drug product labeling. This guidance finalizes the draft guidance published on May 1, 2009.

DATES: Submit either electronic or written comments on agency guidances at any time.

ADDRESSES: Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 2201, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

Submit electronic comments on the guidance to *http://www.regulations.gov*. Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Murewa Oguntimein, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, rm. 5475,Silver Spring, MD 20993–0002, 301–796–4869.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled "Label Comprehension Studies for Nonprescription Drug Products." This guidance is intended for individuals or organizations involved in the development of label comprehension studies for nonprescription drug products. This guidance discusses general concepts that should be considered in the design and conduct of a label comprehension study. This guidance also incorporates advice obtained from the September 25, 2006, meeting of the Nonprescription Drug Advisory Committee that considered issues related to the analysis and interpretation of consumer studies conducted to support marketing of nonprescription drug products, and comments submitted to the draft guidance published in the **Federal Register** of May 1, 2009 (74 FR 20322).

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on label comprehension studies for nonprescription drug products. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR parts 312 and 314 have been approved under OMB control numbers 0910–0014 and 0910–0001, respectively.

III. Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) either electronic or written comments regarding this document. It is only necessary to send one set of comments. It is no longer necessary to send two copies of mailed comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: July 29, 2010.

Food and Drug Administration

[Docket No. FDA–2010–N–0363]

Medical Device User Fee Rates for Fiscal Year 2011

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the

fee rates and payment procedures for medical device user fees for fiscal year (FY) 2011. The Federal Food, Drug, and Cosmetic Act (the act), as amended by the Medical Device User Fee Amendments of 2007 (title II of the Food and Drug Administration Amendments Act of 2007 (FDAAA)), authorizes FDA to collect user fees for certain medical device submissions, and annual fees both for certain periodic reports and for certain establishments subject to registration. The FY 2011 fee rates are provided in this document. These fees apply from October 1, 2010, through September 30, 2011. To avoid delay in the review of your application, you should pay the fee before or at the time you submit your application to FDA. The fee you must pay is the fee that is in effect on the later of the date that your application is received by FDA or the date your fee payment is received. If you want to pay a reduced small business fee, you must qualify as a small business before you make your submission to FDA; if you do not qualify as a small business before you make your submission to FDA, you will have to pay the higher standard fee. This document provides information on how the fees for FY 2011 were determined, the payment procedures you should follow, and how you may qualify for reduced small business fees.

FOR FURTHER INFORMATION CONTACT:

For information on MDUFMA: Visit FDA's Web site, *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Overview/MedicalDeviceUserFeeandModernizationActMDUFMA/default.htm*.

For questions relating to this notice: David Miller, Office of Financial Management (HFA–100), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850, 301–796–7103.

SUPPLEMENTARY INFORMATION:

I. Background

Section 738 of the act (21 U.S.C. 379j) establishes fees for certain medical device applications, submissions, supplements, and notices (for simplicity, this document refers to these collectively as "submissions"); for periodic reporting on class III devices; and for the registration of certain establishments. Under statutorily-defined conditions, a qualified applicant may receive a fee waiver or may pay a lower small business fee. (See 21 U.S.C. 379j(d) and (e).)

Under the act, the fee rate for each type of submission is set at a specified percentage of the standard fee for a premarket application (a premarket application is a premarket approval application (PMA), a product development protocol (PDP), or a biologics license application (BLA)). The act specifies the standard fee for a premarket application for each year from FY 2008 through FY 2012; the standard fee for a premarket application received by FDA during FY 2011 is $236,298. From this starting point, this document establishes FY 2011 fee rates for other types of submissions, and for periodic reporting, by applying criteria specified in the act.

The act specifies the annual fee for establishment registration for each year from FY 2008 through FY 2012; the registration fee for FY 2011 is $2,179. There is no reduction in the registration fee for small businesses. An establishment must pay the registration fee if it is any of the following types of establishments:

- *Manufacturer.* An establishment that makes by any means any article that is a device, including an establishment that sterilizes or otherwise makes such article for or on behalf of a specification developer or any other person.
- *Single-Use Device Reprocessor.* An establishment that performs additional processing and manufacturing operations on a single-use device that has previously been used on a patient.
- *Specification Developer.* An establishment that develops specifications for a device that is distributed under the establishment's name but which performs no manufacturing, including an establishment that, in addition to developing specifications, also arranges for the manufacturing of devices labeled with another establishment's name by a contract manufacturer.

The fees for FY 2011 go into effect on October 1, 2010, and will remain in effect through September 30, 2011.

II. Fees for FY 2011

Under the act, all submission fees and the periodic reporting fee are set as a percent of the standard (full) fee for a premarket application (see 21 U.S.C. 379j(a)(2)(A)), and the act sets the standard fee for a premarket application, including a BLA, a premarket report, and an efficacy supplement, at $236,298 for FY 2011 (see 21 U.S.C. 379j(b)); this is referred to as the "base fee"). The fees set by reference to the base fee are:

- For a panel-track supplement, 75 percent of the base fee;
- For a 180-day supplement, 15 percent of the base fee;
- For a real-time supplement, 7 percent of the base fee;
- For a 30-day notice, 1.6 percent of the base fee;
- For a 510(k) premarket notification, 1.84 percent of the base fee;
- For a 513(g) (21 U.S.C. 360c(g)) request for classification information, 1.35 percent of the base fee; and
- For an annual fee for periodic reporting concerning a class III device, 3.5 percent of the base fee.

For all submissions other than a 510(k) premarket notification, a 30-day notice, and a 513(g) request for classification information, the small business fee is 25 percent of the standard (full) fee. (See 21 U.S.C. 379j(d)(2)(C).) For a 510(k) premarket notification submission, a 30-day notice, and a 513(g) request for classification information, the small business fee is 50 percent of the standard (full) fee. (See 21 U.S.C. 379j(e)(2)(C).)

The statute sets the annual fee for establishment registration at $2,179 in FY 2011, and there is no small business rate for the annual establishment registration fee; all establishments pay the same fee. The statute authorizes increases in the annual establishment fee for FY 2011 and subsequent years if the estimated number of establishments submitting fees for FY 2009 is fewer than 12,250. (See 21 U.S.C. 379j(c)(2)(A).) The number of establishments submitting fees in FY 2009 was in excess of 12,250, so no establishment fee increase is warranted under this provision of the statute.

Table 1 of this document sets out the FY 2011 rates for all medical device fees.

TABLE 1.—MEDICAL DEVICE FEES FOR FY 2011

Application Fee Type	Standard Fee, as a Percent of the Standard Fee for a Premarket Application	FY 2011 Standard Fee	FY 2011 Small Business Fee
Premarket application (a PMA submitted under section 515(c)(1) of the act (21 U.S.C. 360e(c)(1)), a PDP submitted under section 515(f) of the act, or a BLA submitted under section 351 of the Public Health Service (PHS) Act (42 U.S.C. 262))	Set in Statute	$236,298	$59,075
Premarket report (submitted under section 515(c)(2) of the act)	100%	$236,298	$59,075
Efficacy supplement (to an approved BLA under section 351 of the PHS Act)	100%	$236,298	$59,075
Panel-track supplement	75%	$177,224	$44,306
180-day supplement	15%	$35,445	$8,861
Real-time supplement	7%	$16,541	$4,135
510(k) premarket notification submission	1.84%	$4,348	$2,174
30-day notice	1.6%	$3,781	$1,890
513(g) request for classification information	1.35%	$3,190	$1,595
Annual Fee Type			
Annual fee for periodic reporting on a class III device	3.5%	$8,270	$2,068
Annual establishment registration fee (to be paid by each establishment that is a manufacturer, a single-use device reprocessor, or a specification developer, as defined by 21 U.S.C. 379i(13))	Set in Statute	$2,179	$2,179

III. How to Qualify as a Small Business for Purposes of Medical Device Fees

If your business has gross receipts or sales of no more than $100 million for the most-recent tax year, you may qualify for reduced small business fees. If your business has gross sales or receipts of no more than $30 million, you may also qualify for a waiver of the fee for your first premarket application (PMA, PDP, or BLA) or premarket report. You must include the gross receipts or sales of all of your affiliates along with your own gross receipts or sales when determining whether you meet the $100 million or $30 million threshold. If you want to pay the small business fee rate for a submission, or you want to receive a waiver of the fee for your first premarket application or premarket report, you should submit the materials showing you qualify as a small business 60 days before you send your submission to FDA. If you make a submission before FDA finds that you qualify as a small business, you must pay the standard fee for that submission.

If your business qualified as a small business for FY 2010, your status as a small business will expire at the close of business on September 30, 2010. You must re-qualify for FY 2011 in order to pay small business fees during FY 2011.

If you are a domestic (U.S.) business, and wish to qualify as a small business for FY 2011, you must submit the following to FDA:

1. A completed FY 2011 MDUFMA Small Business Qualification Certification (Form FDA 3602). This form is provided in FDA's guidance document, "FY 2011 Medical Device User Fee Small Business Qualification and Certification," available on FDA's Web site at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Overview/MedicalDeviceUserFeeandModernizationActMDUFMA/default.htm*. This form is not available separate from the guidance document.

2. A certified copy of your Federal (U.S.) Income Tax Return for the most recent tax year. The most recent tax year will be 2010, except—

- If you submit your FY 2011 MDUFMA Small Business Qualification before April 15, 2011, and you have not yet filed your return for 2010, you may use tax year 2009.
- If you submit your FY 2011 MDUFMA Small Business Qualification on or after April 15, 2011, and have not yet filed your 2010 return because you obtained an extension, you may submit your most-recent return filed prior to the extension.

3. For each of your affiliates, either—

- If the affiliate is a domestic (U.S.) business, a certified copy of the affiliate's Federal (U.S.) income tax return for the most recent tax year, or
- If the affiliate is a foreign business and cannot submit a Federal (U.S.) Income Tax Return, a National Taxing Authority Certification completed by, and bearing the official seal of, the National Taxing Authority of the country in which the firm is headquartered. The National Taxing Authority is the foreign equivalent of the U.S. Internal Revenue Service. This certification must show the amount of gross receipts or sales for the most recent tax year, in both U.S. dollars and the local currency of the country, the exchange rate used in converting the local currency to U.S. dollars, and the dates of the gross receipts or sales collected. The applicant should also submit a statement signed by the head of the applicant's firm or by its chief financial officer that the applicant has submitted certifications for all of its affiliates, identifying the name of each affiliate, or that the applicant has no affiliates.

If you are a foreign business, and wish to qualify as a small business for FY 2011, you must submit the following:

1. A completed FY 2011 MDUFMA Foreign Small Business Qualification Certification (Form FDA 3602A). This form is provided in FDA's guidance document, "FY 2011 Medical Device User Fee Small Business Qualification and Certification," available on FDA's Internet site at *http://www.fda.gov/cdrh/mdufma*. This form is not available separate from the guidance document.

2. A National Taxing Authority Certification, completed by, and bearing the official seal of, the National Taxing Authority of the country in which the firm is headquartered. This Certification must show the amount of gross receipts or sales for the most recent tax year, in both U.S. dollars and the local currency of the country, the exchange rate used in converting the local currency to U.S. dollars, and the dates of the gross receipts or sales collected.

3. For each of your affiliates, either—

• If the affiliate is a domestic (U.S.) business, a certified copy of the affiliate's Federal (U.S.) Income Tax Return for the most recent tax year (2009 or later), or

• If the affiliate is a foreign business and cannot submit a Federal (U.S.) Income Tax Return, a National Taxing Authority Certification completed by, and bearing the official seal of, the National Taxing Authority of the country in which the firm is headquartered. The National Taxing Authority is the foreign equivalent of the U.S. Internal Revenue Service. This certification must show the amount of gross receipts or sales for the most recent tax year, in both U.S. dollars and the local currency of the country, the exchange rate used in converting the local currency to U.S. dollars, and the dates for the gross receipts or sales collected. The applicant should also submit a statement signed by the head of the applicant's firm or by its chief financial officer that the applicant has submitted certifications for all of its affiliates, identifying the name of each affiliate, or that the applicant has no affiliates.

IV. Procedures for Paying Application and Annual Report Fees

If your application or submission is subject to a fee and your payment is received by FDA from October 1, 2010, through September 30, 2011, you must pay the fee in effect for FY 2011. The later of the date that the application or annual report is received in the reviewing center's document room or the date that the check is received by U.S. Bank determines whether the fee rates for FY 2010 or FY 2011 apply. FDA must receive the correct fee at the time that an application or annual report is submitted, or the application or annual report will not be accepted for filing or review.

FDA requests that you follow the steps below before submitting a medical device application or annual report subject to a fee. Please pay close attention to these procedures to ensure that FDA links the fee with the correct application. (Note: In no case should the check for the fee be submitted to FDA with the application.)

A. Step One—Secure a Payment Identification Number (PIN) and Medical Device User Fee Cover Sheet From FDA Before Submitting Either the Application or the Payment. (Note: Both the FY 2010 and FY 2011 fee rates will be available on the Cover Sheet Web Site beginning on the date of publication of this document, and only the FY 2011 rates will appear after September 30, 2010)

Log on to the MDUFMA Web site at: *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Overview/MedicalDeviceUserFeeandModernizationActMDUFMA/default.htm* and, under the MDUFMA Forms heading, click on the link "Create a User Fee Cover Sheet." Complete the Medical Device User Fee cover sheet. Be sure you choose the correct application submission date range. (Two choices will be offered until October 1, 2010. One choice is for applications that will be received on or before September 30, 2010, which will be subject to FY 2010 fee rates. A second choice is for applications that will be received on or after October 1, 2010, which will be subject to FY 2011 fee rates.) After completing data entry, print a copy of the Medical Device User Fee cover sheet and note the unique PIN located in the upper right-hand corner of the printed cover sheet.

B. Step Two—Electronically Transmit a Copy of the Printed Cover Sheet With the PIN to FDA's Office of Financial Management

Once you are satisfied that the data on the cover sheet is accurate, electronically transmit that data to FDA according to instructions on the screen. Because electronic transmission is possible, applicants are required to set up a user account and use passwords to assure data security in the creation and electronic submission of cover sheets.

C. Step Three—Submit Payment for the Completed Medical Device User Fee Cover Sheet as Described in This Section, Depending on the Method You Will Use to Make Payment

(1) If paying with a paper check:

• All paper checks must be in U.S. currency from a U.S. bank and made payable to the Food and Drug Administration. (FDA's tax identification number is 53–0196965, should your accounting department need this information.)

• Please write your application's unique PIN, from the upper right-hand corner of your completed Medical Device User Fee cover sheet, on your check.

• Mail the paper check and a copy of the completed cover sheet to: Food and Drug Administration, P.O. Box 956733, St. Louis, MO, 63195–6733. (Please note that this address is for payments of application and annual report fees only and is not to be used for payment of annual establishment registration fees.)

If you prefer to send a check by a courier (such as Federal Express (FEDEX), DHL, United Parcel Service (UPS), etc.), the courier may deliver the check to: U.S. Bank, Attn: Government Lockbox 956733, 1005 Convention Plaza, St. Louis, MO 63101. (Note: This address is for courier delivery only. Contact the U.S. Bank at 314–418–4821 if you have any questions concerning courier delivery.)

It is helpful if the fee arrives at the bank at least 1 day before the application arrives at FDA. FDA records the official application receipt date as the later of the following: (1) The date the application was received by FDA or (2) the date U.S. Bank receives the payment. U.S. Bank is required to notify FDA within 1 working day, using the PIN described previously in this document.

(2) If Paying With Credit Card or Electronic Check (Automated Clearing House (ACH)):

FDA has partnered with the U.S. Department of the Treasury to utilize Pay.gov, a Web-based payment application, for online electronic payment. Pay.gov can now be used to submit online payments for cover sheets to FDA. You now have the option to make a payment via electronic check or credit card after submitting your coversheet. To pay online, select the "Pay Now" button. Credit card transactions for cover sheets are limited to $5,000.00.

(3) If paying with a wire transfer:

• Please include your application's unique PIN, from the upper right-hand corner of your completed Medical Device User Fee cover sheet, in your wire transfer. Without the PIN your payment may not be applied to your cover sheet and review of you application will be delayed.

• The originating financial institution usually charges a wire transfer fee

between $15.00 and $35.00. Please ask your financial institution about the fee and include it with your payment to ensure that your cover sheet is fully paid.

Use the following account information when sending a wire transfer: New York Federal Reserve Bank, U.S. Department of Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, Acct. No. 75060099, Routing No. 021030004, SWIFT: FRNYUS33, Beneficiary: FDA, 1350 Piccard Dr., Rockville, MD 20850.

D. Step Four—Submit Your Application to FDA With a Copy of the Completed Medical Device User Fee Cover Sheet

Please submit your application and a copy of the completed Medical Device User Fee cover sheet to one of the following addresses:

1. Medical device applications should be submitted to: Food and Drug Administration, Center for Devices and Radiological Health, Document Mail Center—WO66, rm. 0609, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002.

2. Biologic applications should be sent to: Food and Drug Administration, Center for Biologics Evaluation and Research, Document Control Center (HFM–99), suite 200N, 1401 Rockville Pike, Rockville, MD 20852–1448.

V. Procedures for Paying Annual Establishment Fees

If you are required to pay an annual establishment registration fee, you must pay for each establishment prior to registration. Payment must be submitted by first creating a Device Facility User Fee (DFUF) order through the User Fee Web site at *https://fdasfinapp8.fda.gov/OA_HTML/fdaCAcdLogin.jsp*. (FDA has verified the Web site address, but FDA is not responsible for any subsequent changes to the Web site after this document publishes in the **Federal Register**.) You will be issued a PIN once you place your order. After payment has been processed, you will be issued a payment confirmation number (PCN). You will not be able to register your establishment if you do not have a PIN and a PCN. An establishment required to pay an annual establishment registration fee is not legally registered in FY 2011 until it has completed the steps below to register and pay any applicable fee. (See 21 U.S.C. 379j(f)(2).)

Companies that do not manufacture any product other than a licensed biologic are required to register in the Blood Establishment Registration (BER) system. FDA's Center for Biologics and Research (CBER) will send establishment registration fee invoices annually to these companies.

A. Step One—Submit a DFUF Order With a PIN From FDA Before Registering or Submitting Payment

To submit a DFUF order, you must create or have previously created a user account and password for the User Fee Web site listed previously in this section. After creating a user name and password, log into the Establishment Registration User Fee 2011 store. Complete the DFUF order by entering the number of establishments you are registering. Once you are satisfied that the data on the order is accurate, electronically transmit that data to FDA according to instructions on the screen. Print a copy of the final DFUF order and note the unique PIN located in the upper right-hand corner of the printed order.

B. Step Two—Pay For Your Device Facility User Fee Order

Unless paying by credit card, all payments must be in U.S. currency and drawn on a U.S. bank.

(1) If paying with credit card or electronic check (ACH):

The DFUF order will include payment information, including details on how you can pay online using a credit card or electronic checks. Follow the instructions provided to make an electronic payment.

(2) If paying with a paper check:

If you prefer not to pay online, you may pay by a check, in U.S. dollars and drawn on a U.S. bank, mailed to: Food and Drug Administration, P.O. Box 70961, Charlotte, NC 28272–0961. (Note: This address is different from the address for payments of application and annual report fees and is to be used only for payment of annual establishment registration fees.)

If a check is sent by a courier that requests a street address, the courier can deliver the check to: Wells Fargo, Attn: Food and Drug Administration—Lockbox 70961, rm. NC0810, 1525 West WT Harris Blvd., Charlotte, NC 28262. (Note: This Wells Fargo address is for courier delivery only; do not send mail to this address.)

Please make sure that both of the following are written on your check: (1) The FDA post office box number (P.O. Box 70961) and (2) the PIN that is printed on your order. A copy of your printed order should also be mailed along with your check. FDA's tax identification number is 53–0196965.

(3) If paying with a wire transfer:

Wire transfers may also be used to pay annual establishment fees. To send a wire transfer, please read and comply with the following information:

- Include your order's unique PIN, from the upper right-hand corner of your completed Medical Device User Fee order, in your wire transfer. Without the PIN your payment may not be applied to your facility and your registration will be delayed.
- The originating financial institution usually charges a wire transfer fee between $15.00 and $35.00. Please ask your financial institution about the fee and include it with your payment to ensure that your order is fully paid. Use the following account information when sending a wire transfer: New York Federal Reserve Bank, U.S. Dept of Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, Acct. No. 75060099, Routing No. 021030004, SWIFT: FRNYUS33, Beneficiary: FDA, 5600 Fishers Lane, Rockville, MD 20857.

C. Step Three—Complete the Information Online to Update Your Establishment's Annual Registration for FY 2011, or to Register a New Establishment for FY 2011

Go to CDRH's Web site at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/HowtoMarketYourDevice/RegistrationandListing/default.htm* and click the "Access Electronic Registration" link on the left of the page. This opens up a new page with important information about the FDA Unified Registration and Listing System (FURLS). After reading this information, click on the link (Access Electronic Registration) at the bottom of the page. This link takes you to an FDA Industry Systems page with tutorials that demonstrate how to create a new FURLS user account if your establishment did not create an account in FY 2009 or FY 2010. Biologics manufacturers should register in the BER system at *http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/EstablishmentRegistration/BloodEstablishmentRegistration/default.htm*.

Enter your existing account ID and password to log into FURLS. From the FURLS/FDA Industry Systems menu, there will be a button that you will click to go to the Device Registration and Listing Module (DRLM) of FURLS. New establishments will need to register and existing establishments will update their annual registration using choices on the DRLM menu. Once you choose to register or update your annual registration, the system will prompt you through the entry of information about your establishment and your devices. If

you have any problems with this process, e-mail: *reglist@cdrh.fda.gov* or call 301–796–7400 for assistance. (Note: this e-mail address and this telephone number are for assistance with establishment registration only, and not for any other aspects of medical device user fees.) Problems with BER should be directed to *bloodregis@fda.hhs.gov* or call 301–827–3546.

D. Step Four—Enter Your DFUF Order PIN and PCN

After completing your annual or initial registration and device listing, you will be prompted to enter your DFUF order PIN and PCN, when applicable. This process does not apply to licensed biologic devices. CBER will send invoices for payment of the establishment registration fee to companies who only manufacture licensed biologics devices. Fees are only required for those establishments defined in section I of this document.

Dated: July 29, 2010.

Leslie Kux,

Acting Assistant Commissioner for Policy.

National Institutes of Health

National Institute of Mental Health; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Mental Health Special Emphasis Panel; SBIR Phase II Topic 60.

Date: August 18, 2010.

Time: 1 p.m. to 3 p.m.

Agenda: To review and evaluate contract proposals.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Telephone Conference Call).

Contact Person: Marina Broitman, PhD, Scientific Review Officer, Division of Extramural Activities, National Institute of Mental Health, NIH, Neuroscience Center, 6001 Executive Blvd., Room 6153, MSC 9608, Bethesda, MD 20892–9608, 301–402–8152, *mbroitma@mail.nih.gov.*

Name of Committee: National Institute of Mental Health Special Emphasis Panel; SBIR Phase II Topic 59.

Date: August 20, 2010.

Time: 1 p.m. to 4 p.m.

Agenda: To review and evaluate contract proposals.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Telephone Conference Call).

Contact Person: Marina Broitman, PhD, Scientific Review Officer, Division of Extramural Activities, National Institute of Mental Health, NIH, Neuroscience Center, 6001 Executive Blvd., Room 6153, MSC 9608, Bethesda, MD 20892–9608, 301–402–8152, *mbroitma@mail.nih.gov.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2010–N–0001]

Design of Clinical Trials of Aerosolized Antimicrobials for the Treatment of Cystic Fibrosis; Public Workshop

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop.

SUMMARY: The Food and Drug Administration (FDA) is announcing a public workshop regarding scientific issues in clinical development of aerosolized antimicrobials for the management and/or treatment of patients with cystic fibrosis. Aerosolized antimicrobials are used to treat chronic bacterial infection in the lungs and thus improve the respiratory symptoms in patients with cystic fibrosis. This public workshop is intended to provide information for and gain perspective from health care providers, patients and patient advocacy organizations, academia, and industry on various aspects of the design of clinical trials of aerosolized antimicrobials in patients with cystic fibrosis. The input from this public workshop will help in developing topics for further discussion.

Dates and Times: The public workshop will be held on September 23, 2010, from 8:30 a.m. to 5:30 p.m. and on September 24, 2010, from 8 a.m. to 4 p.m.

Location: The public workshop will be held at the Crowne Plaza Hotel,8777 Georgia Ave., Silver Spring, MD 20910. Seating is limited and available only on a first-come, first-served basis.

Contact Persons: Chris Moser or Lori Benner, Center for Drug Evaluation and Research,Food and Drug Administration, Office of Antimicrobial Products, 10903 New Hampshire Ave., Bldg. 22, rm. 6209, Silver Spring, MD 20993–0002, 301–796–1300.

Registration: Registration is free for the public workshop. Interested parties are encouraged to register early because space is limited. Seating will be available on a first-come, first-served basis. To register electronically, e-mail registration information (including name, title, firm name, address, telephone, and fax number) to *CFWORKSHOP@fda.hhs.gov* Persons without access to the Internet can call 301–796–1300 to register. Persons needing a sign language interpreter or other special accommodations should notify Christine Moser or Lori Benner (see Contact Persons) at least 7 days in advance.

SUPPLEMENTARY INFORMATION: FDA is announcing a public workshop regarding scientific considerations in the design of clinical trials of aerosolized antimicrobials to treat chronic bacterial infection in the lungs and thus improve the respiratory symptoms in patients with cystic fibrosis. The development of clinical trial endpoints to establish efficacy is a major challenge in the design of informative clinical trials of aerosolized antimicrobials for the management and/or treatment of patients with cystic fibrosis. The workshop will include discussion of clinical trial endpoints to establish efficacy, such as timing and definitions of pulmonary exacerbations, changes in the results of pulmonary function testing, and changes on patient reported outcome measures. An important consideration will be the evaluation of new aerosolized antimicrobials in the context of approved aerosolized antimicrobials on the basis of these or other efficacy endpoints. Other issues in the design of clinical trials of aerosolized antimicrobials include: The development of drug resistance and

other safety concerns, microbiologic testing such as sputum bacterial density, the utility of in-vitro susceptibility testing, and the need for pediatric use information.

The agency encourages individuals, patient advocates, industry, consumer groups, health care professionals, researchers, and other interested persons to attend this public workshop.

Transcripts: Please be advised that as soon as a transcript is available, it will be accessible at *http://www.regulations.gov*. It may be viewed at the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD. A transcript will also be available in either hardcopy or on CD-ROM, after submission of a Freedom of Information request. Written requests are to be sent to Division of Freedom of Information (HFI–35), Office of Management Programs, Food and Drug Administration, 5600 Fishers Lane, rm. 6–30, Rockville, MD 20857. Transcripts will also be available on the Internet *http://www.fda.gov/Drugs/NewsEvents/ucm205809.htm* approximately 45 days after the workshop.

Dated: July 29, 2010.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–0605]

Certificate of Alternative Compliance for the Offshore Supply Vessel C-COURAGEOUS

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that a Certificate of Alternative Compliance was issued for the offshore supply vessel C-COURAGEOUS as required by 33 U.S.C. 1605(c) and 33 CFR 81.18.

DATES: The Certificate of Alternate Compliance was issued on June 18, 2010.

ADDRESSES: The docket for this notice is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2010–0605 in the "Keyword" box, and then clicking "Search."

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call LTJG Christine Dimitroff, District Eight, Prevention Branch, U.S. Coast Guard, telephone 504–671–2176. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background and Purpose

A Certificate of Alternative Compliance, as allowed for under Title 33, Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel C-COURAGEOUS, O.N. 1060716. The horizontal distance between the forward and aft masthead lights may be 21′–8¾″. Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck where it would interfere with loading and unloading operations.

The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: July 15, 2010.

R.S. Keister,

Commander, U.S. Coast Guard, Chief, Inspections & Investigations Branch, By Direction of the Commander, Eighth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

[Internal Agency Docket No. FEMA–1926–DR; Docket ID FEMA–2010–0002]

Oklahoma; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Oklahoma (FEMA–1926–DR), dated July 26, 2010, and related determinations.

DATES: *Effective Date:* July 26, 2010.

FOR FURTHER INFORMATION CONTACT: Peggy Miller, Recovery Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3886.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated July 26, 2010, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act"), as follows:

I have determined that the damage in certain areas of the State of Oklahoma resulting from severe storms, tornadoes, straight-line winds, and flooding during the period of June 13–15, 2010, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act"). Therefore, I declare that such a major disaster exists in the State of Oklahoma.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Gregory W. Eaton, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Oklahoma have been designated as adversely affected by this major disaster:

Beaver, Cimarron, Lincoln, Logan, Major, Oklahoma, and Texas Counties for Public Assistance.

All counties within the State of Oklahoma are eligible to apply for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWO350000.L14300000.PN0000]

Extension of Approval of Information Collection, OMB Control Number 1004–0009

AGENCY: Bureau of Land Management, Interior.

ACTION: 60-Day Notice and Request for Comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Bureau of Land Management (BLM) is announcing its intention to request approval to continue the collection of information from State and local governments and private citizens in applications to use, occupy, or develop public lands administered by the BLM. This information collection activity was previously approved by the Office of Management and Budget (OMB), and was assigned control number 1004–0009.

DATES: Submit comments on the proposed information collection by October 4, 2010.

ADDRESSES: Comments may be mailed to U.S. Department of the Interior, Bureau of Land Management, Mail Stop 401–LS, 1849 C St., NW., Washington, DC 20240. Comments may also be submitted electronically to *Jean_Sonneman@blm.gov* or by fax to Jean Sonneman at 202–912–7109. Please attach "Attn: 1004–0019" to any form of comment.

FOR FURTHER INFORMATION CONTACT: To receive a copy of the information collection request, contact Vanessa Engle, Division of Lands, Realty, and Cadastral Survey, at 202–912–7339. Persons who use a telecommunication device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, to leave a message for Ms. Engle.

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act, 44 U.S.C. 3501–3521, require that interested members of the public and affected agencies be given an opportunity to comment on information collection and recordkeeping activities (*see* 5 CFR 1320.8 (d) and 1320.12(a)). This notice identifies an information collection that the BLM will be submitting to OMB for approval. The Paperwork Reduction Act provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

The BLM will request a 3-year term of approval for this information collection activity. Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany our submission of the information collection requests to OMB.

Before including your address, telephone number, e-mail address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

The following information is provided for the information collection:

Title: Land Use Application and Permit (43 CFR Part 2920).

Forms:

- Form 2920–1, Land Use Application and Permit.

OMB Control Number: 1004–0009.

Abstract: Section 302 of the Federal Land Policy and Management Act of 1976 (FLPMA) (43 U.S.C. 1732) and regulations at 43 CFR part 2920 authorize the issuance of leases, permits, and easements for the use, occupancy, or development of public lands administered by the BLM. Respondents include individuals, private entities, and State or local governments. They use Form 2910–1 to apply for leases, permits, or easements, and the BLM uses the information collected on Form 2920–1 to determine whether or not to grant the applications.

A variety of land uses may be authorized under FLPMA Section 302 and 43 CFR part 2920: commercial filming, advertising displays, commercial or noncommercial croplands, apiaries, livestock holding or feeding areas not related to grazing permits and leases, harvesting of native or introduced species, temporary or permanent facilities for commercial purposes (other than mining claims), ski resorts, construction equipment storage sites, assembly yards, oil rig stacking sites, mining claim occupancy if the residential structures are not incidental to the mining operation, and water pipelines and well pumps related to irrigation and non-irrigation facilities. The complexity of the applications, and therefore the burdens to respondents, vary widely.

Frequency of Collection: On occasion.

Estimated Number and Description of Respondents: 519 applicants annually: 5 from individuals, 5 from State/local governments, and 509 from the private sector (499 applications from small entities, and 10 applications from large entities).

Estimated Reporting and Recordkeeping "Hour" Burden: The currently approved annual burden for this collection is 1709 hours: 5 hours for individuals, 5 hours for State and local government, and 1,699 hours for the private sector.

Jean Sonneman,

Bureau of Land Management, Acting Information Collection Clearance Officer, Bureau of Land Management.

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that the Bureau of Land Management (BLM) will issue an appealable decision approving the conveyance of the surface and subsurface estates for certain lands to Doyon, Limited, pursuant to the Alaska Native Claims Settlement Act. The lands are in the vicinity of Holy Cross, Alaska, and are located in:

Seward Meridian, Alaska

T. 23 N., R. 55 W.,
Secs. 19 and 20.
Containing 1,130.74 acres.

T. 24 N., R. 58 W.,
Secs. 6 to 10, inclusive;
Secs. 15, 16, and 17;
Secs. 20, 21, and 22;
Secs. 27 to 32, inclusive.
Containing 10,112.30 acres.

T. 23 N., R. 59 W.,
Secs. 25, 26, 35, and 36.
Containing 1,535.94 acres.
Aggregating 12,778.98 acres.

Notice of the decision will also be published four times in the Fairbanks Daily News Miner.

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision within the following time limits:

1. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until September 2, 2010 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights.

ADDRESSES: A copy of the decision may be obtained from: Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7504.

FOR FURTHER INFORMATION CONTACT: The BLM by phone at 907–271–5960, by e-mail at *ak.blm.conveyance@blm.gov,* or by telecommunication device (TTD) through the Federal Information Relay Service (FIRS) at 1–800–877–8339, 24 hours a day, 7 days a week.

Suzette Claypool,

Land Law Examiner, Land Transfer Adjudication II Branch.

Endangered and Threatened Wildlife and Plants; Permits

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permits.

SUMMARY: We announce our receipt of an application to conduct certain activities pertaining to enhancement of survival of endangered species. The Endangered Species Act requires that we invite public comment on this permit application.

DATES: Written comments on this request for a permit must be received by September 2, 2010.

ADDRESSES: Submit written data or comments to the Assistant Regional Director-Ecological Services, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, CO 80225–0486; facsimile 303–236–0027.

SUPPLEMENTARY INFORMATION:

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal indentifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Document Availability

Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552), by any party who submits a request for a copy of such documents within 30 days of the date of publication of this notice to Kris Olsen, by mail (*see* **ADDRESSES**) or by telephone at 303–236–4256. All comments we receive from individuals become part of the official public record.

Application

The following applicant has requested issuance of enhancement of survival permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Applicant: John Mull, Weber State University, Ogden, Utah, TE–207948. The applicant requests a permit amendment to remove and reduce to possession *Astragalus holmgreniorum* (Holmgren milk-vetch) in conjunction with recovery activities throughout the species' range for the purpose of enhancing its survival and recovery.

Dated: July 21, 2010.

Noreen E. Walsh,

Regional Director, Denver, Colorado.

Notice of Intent To Prepare a Resource Management Plan for the Dominguez-Escalante National Conservation Area and Dominguez Canyon Wilderness, Colorado and Associated Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969 (NEPA), as amended, the Federal Land Policy and Management Act of 1976 (FLPMA), as amended, and the Omnibus Public Lands Management Act of 2009 (Omnibus Act), the Bureau of Land Management (BLM) Grand Junction and Uncompahgre Field Offices, Grand Junction and Montrose, Colorado intend to prepare a Resource Management Plan (RMP) with an associated Environmental Impact Statement (EIS) for the Dominguez-Escalante National Conservation Area (NCA) and Dominguez Canyon Wilderness. By this notice, the BLM is announcing the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public scoping process for the RMP with associated EIS. Comments on issues and planning criteria may be submitted in writing until September 2, 2010. The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers, and the Colorado BLM Web site at: *http://www.blm.gov/co/st/en/nca/denca/denca_rmp.html.* In order to be considered in the development of the Draft RMP/EIS, all comments must be received prior to the close of the 30 day scoping period or 30 days after the last public meeting, whichever is later. The BLM will provide additional opportunities for public participation upon publication of the Draft RMP/EIS.

ADDRESSES: You may submit comments on issues and planning criteria related to the Dominguez-Escalante NCA and Dominguez Canyon Wilderness RMP/EIS at any public scoping meeting or by any of the following methods:

- *Web site: http://www.blm.gov/co/st/en/nca/denca/denca_rmp.html.*
- *E-mail: dencarmp@blm.gov.*
- *Fax:* 970–244–3083.
- *Mail:* Grand Junction Field Office, 2815 H Road, Grand Junction, Colorado 81506.

Documents pertinent to this proposal may be examined at the Grand Junction Field Office.

FOR FURTHER INFORMATION CONTACT: For more information and/or to have you name added to our mailing list, contact Katie A. Stevens, Interim NCA Manager, telephone (970) 244–3049; address 2815 H Road, Grand Junction, Colorado 81506; or by e-mail: *Katie_A_Stevens@blm.gov.*

SUPPLEMENTARY INFORMATION: The RMP will replace portions of the existing 1987 Grand Junction Resource Area RMP and the 1989 Uncompahgre Basin RMP. This new planning process will allow the BLM to focus specifically on developing management to conserve, protect and enhance the resources and values of the NCA and the wilderness area as set forth in Section 2402(b) of the Omnibus Act, including the geological, cultural, archaeological, paleontological, natural, scientific, recreational, wilderness, wildlife, riparian, historical, educational, and scenic resources of the public land; and the water resources of area streams, based on seasonally available flows, that are necessary to support aquatic, riparian, and terrestrial species and communities. In developing new management for the NCA and Wilderness Area, the BLM will comply with the direction set forth in the Omnibus Act, which allows certain uses (including grazing, measures to control fire, insects and disease) to continue in accordance with current laws and regulations. The Omnibus Act also withdraws the NCA and the Wilderness Area from certain other uses, including all forms of entry, appropriation, or disposal under the public land laws; location, entry, and patent under the mining laws; and operation of the mineral leasing, mineral materials, and geothermal leasing laws, subject to valid existing rights. Congress' withdrawal of the area to these uses may foreclose certain alternatives. However, the withdrawal in and of itself does not necessarily preclude consideration of these uses in the RMP.

The planning area is located in Mesa, Delta, and Montrose Counties, Colorado and encompasses approximately 209,610 acres of public land. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the planning process. Preliminary issues for the planning area have been identified by BLM personnel, Federal, state, and local agencies, and other stakeholders. The issues include:

- Is special management needed to restore, maintain, or enhance priority species (including special status species) and their habitats?
- How should uses, including recreational, grazing, and motorized and mechanized vehicle use be managed to provide for wildlife (including special status species) habitat needs?
- What goals, objectives, and management actions, including desired future conditions and land restoration actions, are necessary to continue progress toward achieving land health standards?
- What goals, objectives and management actions, including desired future conditions and riparian and aquatic restoration actions, are necessary to ensure that these water resources are of sufficient quality and quantity to support aquatic, riparian, and terrestrial species and communities?
- How should the Dominguez Canyon Wilderness be managed to protect wilderness values and provide outstanding opportunities for solitude and/or primitive and unconfined recreation?
- Is special management still warranted for the relevant and important values recognized in the two existing Areas of Critical Environmental Concern (ACEC) nominations, and should additional lands be considered for ACEC status?
- What stream segments are suitable for designation as Wild, Scenic, or Recreational under the Wild and Scenic Rivers Act?
- What Visual Resource Management classes will be necessary outside the wilderness to provide adequate protection for the scenic resources and visual quality of the NCA?
- How should the cultural resources and archaeological values (prehistoric and historic) of the area be protected and preserved, while still allowing for appropriate information/education efforts?
- What recreational experiences and outcomes should be used to focus future recreation management in the NCA?

Preliminary planning criteria include:

- Completing the RMP in compliance with FLPMA, NEPA, the Omnibus Act, and all other applicable laws, rules, regulations, policies, and guidelines (including environmental laws and Executive Orders listed as supplemental authorities in Appendix 1 of the NEPA Handbook H–1790–1);
- Ensuring that proposed management within the wilderness is consistent with the Wilderness Act of 1964 and develop a Wilderness Management Plan during the RMP process;
- Initiating broad-based public participation as an integral part of the planning and EIS development process;
- Working with the Dominguez-Escalante National Conservation Area Advisory Council consistent with their established charter;
- Inviting cooperating agency and local government input;
- Consulting with Native American Tribes and other governments at required intervals;
- Developing adaptive management criteria and protocols and also clearly identify the criteria that would trigger re-evaluation of management;
- Developing a comprehensive travel management plan during the RMP process to identify all travel needs for the public, as well as administrative and resource management activities such as research and monitoring, permitting, or emergency or fire access;
- Designating all public lands within the planning area as open, limited, or closed to off-road vehicle use, mechanized use, and/or non-motorized use;
- Incorporating Standards for Public Land Health and Guidelines for Livestock Grazing Management into the planning process; and
- Responding to the Omnibus Act by developing management to "conserve and protect for the benefit and enjoyment of present and future generations [those resources and values identified as purposes in the legislation, including the] geological, cultural, archeological, paleontological, natural, scientific, recreational, wilderness, wildlife, riparian, historical, educational, and scenic resources of the public land; and the water resources of area streams, based on seasonally available flows, that are necessary to support aquatic, riparian, and terrestrial species and communities."

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The minutes and list of attendees for each scoping meeting will be available to the public and open for 30 days after the meeting to any participant who wishes to clarify the views he or she expressed.

The BLM will evaluate identified issues to be addressed in the plan, and will place them into one of three categories:

1. Issues to be resolved in the plan;
2. Issues to be resolved through policy or administrative action; or
3. Issues beyond the scope of this plan. A public comment that suggests developing management for one of the resource uses from which the area was withdrawn by the legislation would likely fall within this category.

The BLM will provide an explanation in the Draft RMP/EIS as to why an issue was placed in category two or three. The public is also encouraged to help identify any management questions and concerns that should be addressed in the plan. The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns.

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: rangeland management, minerals and geology, forestry, outdoor recreation, wilderness, archaeology, paleontology, wildlife and fisheries, lands and realty, hydrology, soils, sociology and economics.

Authority: 40 CFR 1501.7, 43 CFR 1610.

Lynn E. Rust,

Acting State Director.

[LLIDI03000.L71220000.EX0000. XXXX.LVTFD0977180; IDI–33145, IDI–35728]

Notice of Intent To Prepare an Environmental Impact Statement and Resource Management Plan Amendment for the Proposed Modification to the Thompson Creek Mine Plan of Operations, Section 404 Clean Water Act Permit Application, and Public Land Disposal, Custer and Bannock Counties, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM), Challis Field Office, Idaho intends to prepare an Environmental Impact Statement (EIS) to analyze the potential environmental effects of the proposed approval by the BLM and U.S. Forest Service (Forest Service) of a modified mining plan of operations (MMPO) for the Thompson Creek molybdenum mine in Custer County, Idaho and the potential for disposal of BLM-administered public lands. The MMPO would allow an approximate 15-year extension of the mine life and an expansion of some facilities, requiring additional surface disturbance on approximately 350 acres of Federal lands and approximately 80 acres of private land. The EIS will include analysis of the potential environmental effects to waters of the United States that could occur under the MMPO. The Thompson Creek Mining Company (TCMC), has also proposed to exchange 900 acres of private lands owned by TCMC in Custer and Bannock counties for 5,000 acres of BLM-administered public land in the vicinity of the mine in Custer County, including the BLM-administered public land involved in the MMPO. The EIS will also evaluate a proposed amendment to the BLM Challis Field Office 1999 Resource Management Plan (RMP), to identify if the public land involved would be available for disposal pursuant to the FLPMA.

DATES: This notice initiates the public scoping process for the EIS. To be included in the Draft EIS comments must be submitted in writing using any of the methods described in the **ADDRESSES** section below until 30 days after publication of this notice in the **Federal Register** or 30 days after the last public meeting held to obtain scoping input, whichever is later. When a public meeting is held, documentation of that meeting and the list of attendees will be available to the public for 30 days so that any participant who wishes to clarify the views he or she expressed may do so. The date(s) and location(s) of any public scoping meetings will be announced at least 15 days in advance of the meetings through local media, newspapers, individual mailing, and the following BLM Web site: *http://www.blm.gov/id/st/en/info/nepa/nepa/thompson_creek_mine.html.* Additional opportunities for public participation will be provided upon publication of the Draft EIS.

ADDRESSES: You may submit comments regarding the proposed actions and planning criteria, and request to have your name added to the mailing list for the EIS by any of the following methods:

- *E-mail: tcm_eis@jbr.com;*
- *Fax:* (801) 942–1852, attention Brian Buck; or
- *Mail:* Thompson Creek Mine EIS, c/o Brian Buck, JBR Environmental Consultants, 8160 South Highland Drive, Sandy, Utah 84093.

The public may also examine documents pertinent to the proposed actions at the BLM Challis Field Office, 1151 Blue Mountain Road, Challis, Idaho 83226 during regular business hours (7:45 a.m. to 4:30 p.m.), Monday through Friday, except Federal holidays. Project information and documents will also be available on the following Web site: *http://www.blm.gov/id/st/en/info/nepa/nepa/thompson_creek_mine.html.*

FOR FURTHER INFORMATION CONTACT: BLM Challis Field Office, telephone (208) 879–6200; address 1151 Blue Mountain Road, Challis, Idaho 83226. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at (800) 877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: TCMC owns and operates the Thompson Creek molybdenum mine, located 7 miles northwest of Clayton and 21 miles southwest of Challis in Custer County, Idaho. The mine has been in operation since 1981 and is permitted for about 3,400 acres of surface disturbance, of which approximately 2,300 acres are private land and approximately 1,100 acres are Federal lands administered by the BLM and the Forest Service.

TCMC has proposed to modify its mining plan of operations. The proposed MMPO would allow mining to be extended by about 15 years, ending around 2030. The MMPO would expand two waste rock storage facilities and the tailings impoundment, requiring additional surface disturbance on about 350 acres of Federal lands, and 80 acres of private land. As a separate action TCMC has proposed to exchange 900 acres of private land owned by TCMC in Custer and Bannock counties for 5,000 acres of BLM-administered land near the mine in Custer County. The BLM is currently conducting a feasibility analysis of the proposed exchange. Upon completion of the feasibility analysis, the BLM may enter into an Agreement to Initiate a Land Exchange with TCMC and subsequently publish a separate Notice of Exchange Proposal (NOEP) in the newspapers servicing Custer and Bannock counties. Public comments received in response to the NOEP would be considered in the EIS if the NOEP is issued.

In response to these proposals (1) The BLM will decide whether to approve the portion of the MMPO involving BLM-administered public land under BLM regulations at 43 CFR 3809; (2) the Forest Service will decide whether to approve the portion of the MMPO involving National Forest System lands under Forest Service regulations at 36 CFR part 228 subpart A; (3) the USACE will decide whether to issue a permit under section 404 of the CWA and USACE regulations at 33 CFR part 320 to discharge fill materials into waters of the United States; (4) the BLM will decide whether to amend the Challis RMP pursuant to Section 202 of FLPMA and BLM regulations at 43 CFR part 1600, and identify the public land involved for disposal; and (5) the BLM will decide whether to approve a land disposal action.

The authorizations by the Forest Service for National Forest System lands and USACE may be required to implement the MMPO regardless of whether the BLM approves a land disposal action. If TCMC obtains title to all of the BLM-administered land within the mine area, the BLM's approval of the MMPO would no longer be necessary because the BLM does not regulate mining operations on private land. On the other hand, if TCMC obtains title to only some of the BLM-administered land involved with the MMPO, then any continuing mining operations on BLM-administered land would require BLM authorization under 43 CFR part 3809.

The purpose and need of the proposed actions are for (1) The BLM to respond to TCMC's proposed MMPO, which would enable TCMC to continue reasonable development of the existing mine in compliance with BLM laws and regulations (FLPMA, 43 CFR 3809); (2) the Forest Service to similarly respond to the MMPO in compliance with Forest Service laws and regulations (Organic Act of 1897; 36 CFR 228, Subpart A); (3) the USACE to respond to TCMC's application for a permit to discharge fill materials into waters of the United States, as necessary in the MMPO, in compliance with USACE laws and regulations (CWA, 33 CFR 320); (4) the BLM to consider amending the Challis RMP to allow a land disposal in compliance with Section 102 of FLPMA, and (5) the BLM to respond to TCMC's proposal for a land exchange and determine if a public land disposal would be in the public interest pursuant to FLPMA.

The No Action alternative (*i.e.,* completion of mining and reclamation under the current mining plan of operations) and alternatives that consider the RMP amendment and various aspects of the proposed MMPO and public land disposal will be analyzed. Alternatives identified to date for the MMPO include using different locations for waste rock storage and alternative reclamation measures. Alternatives identified to date for the possible public land disposal include exchange of private land for public land; how the public and private lands would be managed if these lands were exchanged, including analysis of potential impacts of conducting the mining operations identified in the proposed MMPO under the applicable statutory and regulatory authority; and possible variations in the amount of public land and/or restrictions on the public land that might be exchanged. The planning criteria for the RMP amendment would include that lands identified for disposal would serve the national interest and that newly acquired lands or interests in lands would be managed for their highest potential or for the purposes for which they were acquired.

By this notice, the BLM is complying with the requirements in 43 CFR 1610.2(c) to notify the public of potential amendments to land use plans, predicated on the analysis in the EIS. The BLM will integrate the land use planning process with the NEPA process for the EIS. The BLM will utilize and coordinate the NEPA commenting process to satisfy the public involvement for section 106 of the National Historic Preservation Act (16 U.S.C. 470f) as provided for in 36 CFR 800.2(d)(3).

The BLM is the lead Federal agency for the NEPA analysis process and preparation of the EIS. The BLM anticipates that the Forest Service, the USACE; the U.S. Environmental Protection Agency, the Idaho Department of Environmental Quality, and the Idaho Department of will be cooperating agencies. Other cooperating agencies may be identified during the scoping process.

Native American tribal consultation will be conducted in accordance with policy, and tribal concerns will be given due consideration, including impacts on Indian trust assets. Federal, State, and local agencies, along with other stakeholders that may be interested or affected by the proposed actions subject to the EIS are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate as a cooperating agency.

The public is invited to submit comments and resource information as well as identify issues, concerns and alternatives to be analyzed in the EIS. Public input should be as specific as possible (*i.e.,* clearly articulate concerns and contentions) to best assist in the NEPA process. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 42 U.S.C. 4321 et seq.; 33 CFR 325.3; 43 CFR 1610.2.

David Rosenkrance,

Field Manager.

Bureau of Land Management

[LLCAD070000 L16100000.DP0000]

Notice of Re-Opening of Comment Period for the Draft Imperial Sand Dunes Recreation Area Management Plan and Draft Environmental Impact Statement, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) announces the re-opening of the comment period on the Draft Imperial Sand Dunes Recreation Area Management Plan (RAMP) and Draft Environmental Impact Statement (EIS). The original notice published in the **Federal Register** on March 26, 2010 [75 FR 14623] provided for a comment period ending on June 24, 2010. The BLM is re-opening the comment period to end on August 9, 2010.

DATES: To assure that comments will be considered, the BLM must receive written comments on the Draft RAMP/EIS by August 9, 2010.

ADDRESSES: You may submit comments at the public meetings or by any of the following methods:

- *E-mail: caisdrmp@ca.blm.gov.*
- *Fax:* (760) 337–4490.
- *Mail:* 1661 So. 4th St., El Centro, California 92243.

Copies of the Draft Imperial Sand Dunes RAMP/EIS are available in the El Centro Field Office at the above address and at the BLM California State Office, 2800 Cottage Way, Sacramento, California 95825. Interested persons may also review the Draft Resource

Management Plan (RMP)/EIS at the following Web site: *http://www.blm.gov/en/fo/elcentro.*

FOR FURTHER INFORMATION CONTACT: Tom Zale, BLM El Centro Field Office, 1661 S. 4th Street, El Centro, CA 92243. (760) 337–4400.

SUPPLEMENTARY INFORMATION: The original Notice of Availability provided for comments on the Draft RMP/Draft EIS to be received through June 24, 2010. The BLM is re-opening the comment period to accommodate numerous requests for additional time to review the document, given the complexity of the plan, and the broad public interest in its outcome. Comments on the Draft RMP and EIS will now be accepted through August 9, 2010. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1503.1 and 1506.6, and 43 CFR 1610.2.

Thomas Pogacnik,

Deputy State Director, Natural Resources.

Bureau of Land Management

[LLWY–957400–10–L14200000–BJ0000]

Notice of Filing of Plats of Survey, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Filing of Plats of Survey, Wyoming.

SUMMARY: The Bureau of Land Management (BLM) has filed the plats of survey of the lands described below in the BLM Wyoming State Office, Cheyenne, Wyoming, on the dates indicated.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 5353 Yellowstone Road, P.O. Box 1828, Cheyenne, Wyoming 82003.

SUPPLEMENTARY INFORMATION: These surveys were executed at the request of the Bureau of Land Management, and are necessary for the management of resources. The lands surveyed are:

The plat and field notes representing the dependent resurvey of portions of the Seventh Standard Parallel North through Ranges 108, 109 and 110 West, a portion of the Thirteenth Auxiliary Guide Meridian in Township 29 North, between Ranges 108 and 109 West, portions of the west boundary, and the subdivisional lines, Township 29 North, Range 109 West, Sixth Principal Meridian, Wyoming, Group No. 799, was accepted March 29, 2010.

The plat and field notes representing the dependent resurvey of a portion of the west boundary, a portion of the subdivisional lines, and the subdivision of certain sections, Township 29 North, Range 84 West, Sixth Principal Meridian, Wyoming, Group No. 713, was accepted March 29, 2010.

The plat and field notes representing the dependent resurvey of a portion of the subdivisional lines and the subdivision of section 12, Township 29 North, Range 85 West, Sixth Principal Meridian, Wyoming, Group No. 713, was accepted March 29, 2010.

The plat and field notes representing the dependent resurvey of a portion of the east boundary, a portion of the subdivisional lines, and the subdivision of certain sections, Township 30 North, Range 85 West, Sixth Principal Meridian, Wyoming, Group No. 714, was accepted March 29, 2010.

The supplemental plat showing the corrected Tract number for Tract 52A, Township 41 North, Range 117 West, Sixth Principal Meridian, Wyoming, was accepted March 29, 2010, and is based upon the plat accepted May 13, 2009.

The plat and field notes representing the dependent resurvey of a portion of Tracts 49 and 50, and the metes and bounds survey of Lot 10, Township 47 North, Range 88 West, Sixth Principal Meridian, Wyoming, Group No. 820, was accepted July 27, 2010.

The supplemental plat representing the segregation of Tract 51A from Tract 51 and Tract 54, and Lot 2 and Lot 3 in Section 23, Township 41 North, Range 117 West, Sixth Principal Meridian, Wyoming, Group No. 814, was accepted July 27, 2010.

The plat and field notes representing the dependent resurvey of a portion of the west and north boundaries, and a portion of the subdivisional lines, and the subdivision of certain sections, Township 27 North, Range 83 West, Sixth Principal Meridian, Wyoming, Group No. 725, was accepted July 27, 2010.

The plat and field notes representing the dependent resurvey of a portion of the west boundary, and a portion of the subdivisional lines, and the subdivision of certain sections, Township 28 North, Range 83 West, Sixth Principal Meridian, Wyoming, Group No. 725, was accepted July 27, 2010.

The plat and field notes representing the dependent resurvey of a portion of the subdivisional lines, and the subdivision of certain sections, Township 27 North, Range 84 West, Sixth Principal Meridian, Wyoming, Group No. 725, was accepted July 27, 2010.

The plat and field notes representing the dependent resurvey of a portion of the south boundary, and a portion of the subdivisional lines, and the subdivision of certain sections, Township 28 North, Range 84 West, Sixth Principal Meridian, Wyoming, Group No. 725, was accepted July 27, 2010.

The supplemental plat showing the subdivision of Tract 51–D into new Tracts 51–Q and 51–R, Township 43 North, Range 92 West, Sixth Principal Meridian, Wyoming, Group No. 824, was accepted July 27, 2010 and is based upon a survey performed in May 2006, by Sherman B. Allred, Wyoming Professional Engineer and Land Surveyor, Registration No. 2920.

Copies of the preceding described plats and field notes are available to the public at a cost of $1.10 per page.

Dated: July 28, 2010.

John P. Lee,

Chief Cadastral Surveyor, Division of Support Services.

BILLING CODE 4310–22–P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent to Repatriate a Cultural Item: Taylor Museum of the Colorado Springs Fine Arts Center, Colorado Springs, CO

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate a cultural item in the possession of the Taylor Museum of the Colorado Springs Fine Arts Center, Colorado Springs, CO, that meets the definition of object of cultural patrimony under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal

agency that has control of the cultural items. The National Park Service is not responsible for the determinations in this notice.

In 1951, the Taylor Museum purchased a Northwest Coast totem pole (TM 3991) from Ralph C. Altman/Lumber Yard of Joshua Marks, Los Angeles, CA. The piece was officially accessioned into the museum's collection on May 7, 1951.

The totem pole, dated circa 1870, is from the Haida village of Old Kasaan, Prince of Wales Island, southeastern Alaska. The totem pole originally stood in front of a house, and both were used by Chief Son-i-hat, "Southeast Wind," of the Eagle phratry and one of the great chiefs of Old Kasaan. The house was named Adolescent Girl House. Chief Son-i-Hat also had a home not far from present-day Kasaan, which is currently the only remaining traditional Haida longhouse in Alaska.

The pole was bought by a man from Los Angeles around 1908. The pole and house were taken to Los Angeles, and the dismantled house was rebuilt on a smaller scale. Chief Son-i-hat, who took along dancing paraphernalia, also accompanied the house and pole. Chief Son-i-hat stayed about two years, and according to his son, staged dances and gave speeches about the ways of his fellow Haida people. When the Taylor Museum of the Colorado Springs Fine Arts Center acquired the pole, it was laying in a lumber yard ready to be sawed up for wood pulp.

In approximately early 2007, the museum began researching the pole and started consultations with tribal representatives from the Organized Village of Kasaan. Totem poles in the Haida culture represent clans, serve as grave markers, and also relate important events. According to representatives of the Organized Village of Kasaan, the totem pole is clan property. A totem pole is not property owned by an individual, and no single individual can alienate or convey this clan property. Furthermore, the totem pole was clan property at the time of its alienation, and ownership of the totem pole and crest designs depicted are owned by the clan, Yaadas of Gasa'aan (Old Kasaan). Therefore, the totem pole is an object of cultural patrimony under NAGPRA.

Officials of the Taylor Museum of the Colorado Springs Fine Arts Center have determined that, pursuant to 25 U.S.C. 300(3)(D), the one cultural item described above has ongoing historical, traditional, or cultural importance central to the Native American group or culture itself, rather than property owned by an individual. Officials of the Taylor Museum of the Colorado Springs Fine Arts Center also have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the object of cultural patrimony and the Organized Village of Kasaan

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the object of cultural patrimony should contact Tariana Navas-Nieves, Curator of Hispanic and Native American Art, Taylor Museum of the Colorado Springs Fine Arts Center, 30 West Dale St., Colorado Springs, CO 80903, telephone (719) 477–4334, before September 2, 2010. Repatriation of the object of cultural patrimony to the Organized Village of Kasaan may proceed after that date if no additional claimants come forward.

The Taylor Museum of the Colorado Springs Fine Arts Center is responsible for notifying the Organized Village of Kasaan that this notice has been published.

Dated: July 26, 2010

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: University of Colorado Museum, Boulder, CO

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the control of the University of Colorado Museum, Boulder, CO. The human remains were removed from Converse County, WY.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by the University of Colorado Museum professional staff in consultation with representatives of the Apache Tribe of Oklahoma; Arapahoe Tribe of the Wind River Reservation, Wyoming; Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Comanche Nation, Oklahoma; Crow Tribe of Montana; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Kiowa Indian Tribe of Oklahoma; Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe of the Pine Ridge Reservation, South Dakota; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Santee Sioux Nation, Nebraska; Standing Rock Sioux Tribe of North & South Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and Yankton Sioux Tribe of South Dakota.

In 1948, 1949, 1952, 1956, or 1963, human remains representing a minimum of one individual were removed from a cave at Little Box Elder Site, in Converse County, WY. The human remains were removed by either a museum archeological crew, which excavated the site in 1948 (test), 1949, 1952, and 1956, or by Dr. Robinson, Paleontology Curator Emeritus, who excavated stratigraphically at the site in 1963. The property is private and belonged to Orsa D. Ferguson who passed away in the 1950s, and then it belonged to his brother-in-law, William Barber. The human remains were found in the Paleontology section of the museum during re-analysis and transferred to the Anthropology section of the museum for NAGPRA compliance. No known individual was identified. No associated funerary objects are present.

The human remains are Native American based on the biological assessment and the site context. The cave dates from recent time to 15,000 years before present. Evidence of human occupation was present in the upper levels. The earliest levels contained a "nest" of three spherical stones of material foreign to the cave deposits, suggesting the possibility of human occupation at that time. During preliminary re-study of material from the cave, two tools were identified. Both were made from elements of extinct horse (Equus conversidens). The site also yielded several tools made from mountain goat humeri and metapodial. Although not extinct, mountain goat is no longer present in the region of Little Box Elder.

Officials of the University of Colorado Museum have determined that,

pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of one individual of Native American ancestry. Lastly, officials of the University of Colorado Museum have determined that, pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot reasonably be traced between the Native American human remains and any present-day Indian tribe.

The Native American Graves Protection and Repatriation Review Committee (Review Committee) is responsible for recommending specific actions for disposition of culturally unidentifiable human remains. In October 2009, the University of Colorado Museum requested that the Review Committee recommend disposition of the culturally unidentifiable human remains to the Arapahoe Tribe of the Wind River Reservation, Wyoming, based on Arapaho aboriginal land claims and supported by oral tradition, as well as the support of the other Indian tribes consulted. The Comanche Nation, Oklahoma, signed the disposition agreement in support of the disposition to the Arapahoe Tribe. Furthermore, none of the Indian tribes consulted objected to the determination of "culturally unidentifiable" status by the University of Colorado Museum and the disposition to the Arapahoe Tribe of the Wind River Reservation, Wyoming.

The Review Committee considered the proposal at its October 30–31, 2009, meeting and recommended disposition of the human remains to the Arapahoe Tribe of the Wind River Reservation, Wyoming. The Secretary of Interior agreed with the Review Committee's recommendation. An April 19, 2010, letter from the Designated Federal Officer, writing on behalf of the Secretary of the Interior, transmitted the authorization for the University of Colorado Museum to effect disposition of the physical remains of the culturally unidentifiable individual to the Arapahoe Tribe of the Wind River Reservation, Wyoming, contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Steve Lekson, Curator of Anthropology, University of Colorado Museum, in care of Jan Bernstein, NAGPRA Consultant, Bernstein & Associates, 1041 Lafayette St., Denver, CO 80218, telephone (303) 894-0648, before September 2, 2010. Disposition of the human remains to the Arapahoe Tribe of the Wind River Reservation, Wyoming, may proceed after that date if no additional claimants come forward.

The University of Colorado Museum is responsible for notifying the Apache Tribe of Oklahoma; Arapahoe Tribe of the Wind River Reservation, Wyoming; Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Comanche Nation, Oklahoma; Crow Tribe of Montana; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Kiowa Indian Tribe of Oklahoma; Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe of the Pine Ridge Reservation, South Dakota; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Santee Sioux Nation, Nebraska; Standing Rock Sioux Tribe of North & South Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and Yankton Sioux Tribe of South Dakota, that this notice has been published.

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: U.S. Department of Agriculture, Forest Service, Siuslaw National Forest, Waldport, OR

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of the U.S. Department of Agriculture, Forest Service, Siuslaw National Forest, Waldport, OR. The human remains were removed from the Cape Perpetua Visitor Center, Lincoln County, OR.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by Siuslaw National Forest professional staff in consultation with representatives of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians of Oregon; Confederated Tribes of the Grand Ronde Community of Oregon; Confederated Tribes of Siletz Indians of Oregon; and the Coquille Tribe of Oregon.

At an unknown date prior to 1988, human remains representing a minimum of one individual were removed near Cape Perpetua, near Yachats, Lincoln County, OR, and given to the Cape Perpetua Visitor Center. No known individual was identified. No associated funerary objects are present.

The Visitor Center held the human remains in secure storage until transferring to the Forest Archaeologist. No information accompanied the human remains regarding the specific location and conditions of discovery other than the remains were retrieved from a crevice in the rocky shoreline between Cape Perpetua and Yachats.

Consultation evidence and the ethnographic record show that this area was part of the ancestral territory of the Alsea Indians. At Contact, the territory of the Alsea extended along the Oregon coast and rivers from approximately 8 miles south of Yachats to approximately 10 miles north of Waldport. In 1855, this land base and the Alsea people were included within the Coast Indian Reservation. This reservation was later referred to as the Siletz Indian Reservation. For approximately 10 years during the reservation era, other tribes, including the Coos, Lower Umpqua, Coquille, and some Siuslaw people whose traditional territories lay to the south of the Alsea, were forcibly held at the Alsea Sub-agency of the Coast Indian Reservation, which was located at present-day Yachats. Of these tribal peoples, only the Alsea are known to have primarily practiced above ground interment at locations similar to that identified for this individual. Descendants of the Alsea are members of the Confederated Tribes of Siletz Indians of Oregon.

Officials of the Siuslaw National Forest have determined that, pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of the Siuslaw National Forest also have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American

human remains and the Confederated Tribes of Siletz Indians of Oregon.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Phyllis Steeves, Heritage Program Manager, Siuslaw National Forest, 1130 Forestry Lane/PO Box 400, Waldport, OR 97394, telephone (541) 563–8425, before September 2, 2010. Repatriation of the human remains to the Confederated Tribes of Siletz Indians of Oregon may proceed after that date if no additional claimants come forward.

The Siuslaw National Forest is responsible for notifying the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians of Oregon; Confederated Tribes of the Grand Ronde Community of Oregon; Confederated Tribes of Siletz Indians of Oregon; and the Coquille Tribe of Oregon, that this notice has been published.

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: University of Colorado Museum, Boulder, CO

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the control of the University of Colorado Museum, Boulder, CO. The human remains were removed from Washington County, CO.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by the University of Colorado Museum professional staff in consultation with representatives of the Apache Tribe of Oklahoma; Arapahoe Tribe of the Wind River Reservation, Wyoming; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Comanche Nation, Oklahoma; Crow Tribe of Montana; Fort Sill Apache Tribe of Oklahoma; Jicarilla Apache Nation, New Mexico; Kiowa Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe of the Pine Ridge Reservation, South Dakota; Pawnee Nation of Oklahoma; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Standing Rock Sioux Tribe of North & South Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; and Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah.

In 1953, human remains representing a minimum of three individuals were removed from the Claypool site, Washington County, CO, by the University of Colorado Museum. Local residents had been collecting artifacts in that area for years. In January 2004, the human remains were discovered in the museum during an inventory. No known individuals were identified. No associated funerary objects are present.

The human remains are Native American based on the biological assessment and the site context. The Claypool site appears to have been a Cody Complex campsite. Diagnostic artifacts found there include Eden points, a Scottsbluff point, and a Cody knife. Other material culture consists of scrapers, numerous stone flakes, charred and uncharred bone, and pieces of grooved sandstone. The stratigraphy indicates the artifacts are postglacial and date from 10,000 to 7,000 years ago.

Officials of the University of Colorado Museum have determined that, pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of three individuals of Native American ancestry. Lastly, officials of the University of Colorado Museum have determined that, pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot reasonably be traced between the Native American human remains and any present-day Indian tribe.

The Native American Graves Protection and Repatriation Review Committee (Review Committee) is responsible for recommending specific actions for disposition of culturally unidentifiable human remains. In October 2009, the University of Colorado Museum requested that the Review Committee recommend disposition of the culturally unidentifiable human remains to the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah, based on aboriginal land claims supported by oral tradition, as well as the support of the other Indian tribes consulted. The Comanche Nation, Oklahoma, and Pawnee Nation of Oklahoma signed the disposition agreement in support of the disposition to the Ute Mountain Tribe. Furthermore, none of the Indian tribes consulted objected to the determination of "culturally unidentifiable" status by the University of Colorado Museum and the disposition to the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah.

The Review Committee considered the proposal at its October 30–31, 2009, meeting and recommended disposition of the human remains to the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah. The Secretary of the Interior agreed with the Review Committee's recommendation. An April 19, 2010, letter from the Designated Federal Officer, writing on behalf of the Secretary of the Interior, transmitted the authorization for the University of Colorado Museum to effect disposition of the physical remains of the culturally unidentifiable individuals to the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah, contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Steve Lekson, Curator of Anthropology, University of Colorado Museum, in care of Jan Bernstein, NAGPRA Consultant, Bernstein & Associates, 1041 Lafayette Street, Denver, CO 80218, telephone (303) 894-0648, before September 2, 2010. Disposition of the human remains to the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah, may proceed after that date if no additional claimants come forward.

The University of Colorado Museum is responsible for notifying the Apache Tribe of Oklahoma; Arapahoe Tribe of the Wind River Reservation, Wyoming; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Comanche Nation, Oklahoma; Crow Tribe of Montana; Fort Sill Apache Tribe of Oklahoma; Jicarilla Apache Nation, New Mexico; Kiowa

Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe of the Pine Ridge Reservation, South Dakota; Pawnee Nation of Oklahoma; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Standing Rock Sioux Tribe of North & South Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; and Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah, that this notice has been published.

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Museum of Cultural and Natural History, Central Michigan University, Mt. Pleasant, MI; Correction

AGENCY: National Park Service, Interior.

ACTION: Notice; correction.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Museum of Cultural and Natural History, Central Michigan University, Mt. Pleasant, MI. The human remains and associated funerary objects were removed from Arenac, Isabella, and Saginaw Counties, MI.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

This notice replaces a Notice of Inventory Completion previously published in the **Federal Register** (75 FR 16175–16176, March 31, 2010) in order to correctly list the name of an Indian tribe, and the listing of the Indian tribes that were parties to the disposition request.

A detailed assessment of the human remains was made by the Museum of Cultural and Natural History professional staff and physical anthropologists from Western Michigan University, Kalamazoo, MI, and the University of Western Ontario, Canada, and in consultation with representatives of the Little Traverse Bay Bands of Odawa Indians, Michigan, and the Saginaw Chippewa Indian Tribe of Michigan.

In 1970, human remains representing a minimum of two individuals were removed from Point Lookout, 20AC18, in Arenac County, MI. Students from Central Michigan University and amateur archeologists excavated the site and the material was immediately turned over to the Museum of Cultural and Natural History. No known individuals were identified. The 11 associated funerary objects are 2 (reconstructed) ceramic vessels, 1 piece of worked bone, 1 small sheet of copper, 1 bag of ochre sand, 1 stone object, 1 bag of ceramic sherds, 1 group of copper beads and bead fragments, 1stone tool, 1 bone needle, and 1 tooth from an unknown animal.

Archeological evidence dates the material from the Early Late Woodland Era, and the determination is supported by publications of the State Archaeologist's Office of Michigan. The human remains were identified as being of Native American ancestry based on archeological dating and osteological examination.

In 1970–1971, human remains representing a minimum of 18 individuals were removed from Indian Mound Park, 20IB1, in Isabella County, MI. Faculty and students from Central Michigan University excavated the site and the material was immediately turned over to the Museum of Cultural and Natural History. No known individuals were identified. The five associated funerary objects are one celt, one projectile point, and three ceramic sherds.

Archeological evidence dates the material from the Early Late Woodland Era, and the determination is supported by publications of the State Archaeologist's Office of Michigan. The human remains were identified as being of Native American ancestry based on archeological dating and osteological examination.

From 1968 to 1970, and in 1972, human remains representing a minimum 124 individuals were removed from the Frazier-Tyra site, 20SA9, in Saginaw County, MI. Amateur archeologists excavated the site from 1968 to 1970, and turned over the material to the Anthropology Department of Central Michigan University, which transferred it to the Museum of Cultural and Natural History in the early 1990s. Students from Central Michigan University excavated the site again in 1972, and immediately turned over the materials they found to the Museum of Cultural and Natural History. No known individuals were identified. The 372 associated funerary objects are 285 ceramic sherds, 76 pieces of lithic debitage, 4 scrapers, 1 piece of copper, 1 abrading stone, 1 projectile point, 1 piece of conch, 1 bag of ochre, 1 pipe and 1 pipe fragment.

Archeological evidence dates the material from the Early Late Woodland Era, and the determination is supported by publications of the State Archaeologist's Office of Michigan. The human remains were identified as being of Native American ancestry based on archeological dating and osteological examination.

The area of Arenac, Isabella, and Saginaw Counties in mid-Michigan has a long established history of Native American occupation before European encroachment in the early 17th century. The Anishnaabek, which is composed of the Odawa/Ottawa, Ojibwe/Chippewa and Potawatomi, have long called this area home. Officials of the Museum of Cultural and Natural History have reasonably determined that the individuals described above from Arenac, Isabella, and Saginaw Counties are Native American; however, officials of the Museum of Cultural and Natural History have determined that the evidence is insufficient to determine cultural affiliation with any present-day Indian tribe.

Officials of the Museum of Cultural and Natural History have determined that, pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of 144 individuals of Native American ancestry. Officials of the Museum of Cultural and Natural History also have determined that, pursuant to 25 U.S.C. 3001(3)(A), the 388 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Museum of Cultural and Natural History have determined that, pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and associated funerary objects and any present-day Indian tribe.

The Native American Graves Protection and Repatriation Review Committee (Review Committee) is responsible for recommending specific actions for disposition of culturally unidentifiable human remains. In February 2009, the Museum of Cultural and Natural History requested that the Review Committee recommend disposition of the 144 culturally unidentifiable human remains and associated funerary objects. Supporters of the disposition were the Bay Mills Indian Community, Michigan; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Potawatomi Indian Community, Michigan; Keweenaw Bay Indian Community, Michigan; Lac Vieux Desert Band of Lake Superior Chippewa Indians, Michigan; Little River Band of Ottawa Indians, Michigan; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Pokagon Band of Potawatomi Indians, Michigan; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians of Michigan; Sac & Fox Nation, Oklahoma; and Wyandotte Nation, Oklahoma. According to documentation submitted by the museum, parties of the disposition agreement were the Bay Mills Indian Community, Michigan; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Keweenaw Bay Indian Community, Michigan; Lac Vieux Desert Band of Lake Superior Chippewa Indians, Michigan; Little River Band of Ottawa Indians, Michigan; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians of Michigan; and Wyandotte Nation, Oklahoma.

The Review Committee considered the proposal at its May 23 - 24, 2009, meeting and recommended disposition of the human remains and associated funerary objects to the Indian tribes. The Secretary of the Interior concurred with the Review Committee's recommendation. A September 16, 2009, letter on behalf of the Secretary of Interior from the Designated Federal Official transmitted the authorization for the museum to effect disposition of the culturally unidentifiable human remains and associated funerary objects contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement. In the same letter, the Secretary recommended the transfer of the associated funerary objects to the Indian tribes listed above to the extent allowed by Federal, state, or local law.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Dr. Pamela Gates, NAGPRA Representative, Museum of Cultural and Natural History, 103 Rowe Hall, Central Michigan University, Mt. Pleasant, MI 48859, telephone (989) 774–3341, before September 2, 2010. Disposition of the human remains and associated funerary objects to the Bay Mills Indian Community, Michigan; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Keweenaw Bay Indian Community, Michigan; Lac Vieux Desert Band of Lake Superior Chippewa Indians, Michigan; Little River Band of Ottawa Indians, Michigan; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians of Michigan; and/or Wyandotte Nation, Oklahoma, may proceed after that date if no additional claimants come forward.

The Museum of Cultural and Natural History is responsible for notifying the Bay Mills Indian Community, Michigan; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Indian Community, Michigan; Keweenaw Bay Indian Community, Michigan; Lac Vieux Desert Band of Lake Superior Chippewa Indians, Michigan; Little River Band of Ottawa Indians, Michigan; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Sac & Fox Nation, Oklahoma; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians of Michigan; and Wyandotte Nation, Oklahoma, that this notice has been published.

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Field Museum of Natural History, Chicago, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Field Museum of Natural History, Chicago, IL. The human remains and associated funerary objects were removed from various locations on the Hopi Indian Reservation, Coconino County, AZ.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by the Field Museum of Natural History professional staff in consultation with representatives of the Hopi Tribe of Arizona.

In 1900, human remains representing a minimum of 71 individuals were removed from Awatobi, Burned Corn House, Chukuli, Mishongovi, Old Mishongovi, Payapki, Kishuba, Shongopovi, and Sityatki, on the Hopi Indian Reservation, Coconino County, AZ, by Charles L. Owen for the Field Museum of Natural History (Field Museum accession number 709). No known individuals were identified. The 51 associated funerary objects are 5 ceramic jars, 26 bowls, 5 pots, 5 ladles, 2 vases, 2 mugs, 2 beads, 1 figure, 1 chert flake, 1 lot of paint, and 1 piki stone.

In 1901, human remains representing a minimum of 180 individuals were removed from Old Walpi on the Hopi Indian Reservation, Coconino County, AZ, by Charles L. Owen for the Field Museum of Natural History (Field Museum accession numbers 769, 780). No known individuals were identified. The 100 associated funerary objects are 30 ceramic jars, 26 bowls, 16 pots, 5 bahos, 4 pitchers, 6 ladles, 3 vases, 2 mugs, 1 lot of stone images, 1 lot of stone slabs, 4 faunal remains, 1 bead, and 1 seed.

The human remains have been identified as Native American based on the burial context and the specific cultural and geographic attribution in Field Museum of Natural History records. All of the remains were identified as "Hopi" from archeological sites on the Hopi Indian Reservation, AZ. "Hopi" descendants from the Hopi

Indian Reservation are represented by the present-day Hopi Tribe of Arizona.

Officials of the Field Museum of Natural History have determined that, pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of 251 individuals of Native American ancestry. Officials of the Field Museum of Natural History also have determined that, pursuant to 25 U.S.C. 3001(3)(A), the 151 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Officials of the Field Museum of Natural History have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Hopi Tribe of Arizona.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Helen Robbins, Repatriation Director, Field Museum of Natural History, 1400 South Lake Shore Dr., Chicago, IL 60605–2496, telephone (312) 665–7317, before September 2, 2010. Repatriation of the human remains and associated funerary objects to the Hopi Tribe of Arizona may proceed after that date if no additional claimants come forward.

The Field Museum of Natural History is responsible for notifying the Hopi Tribe of Arizona that this notice has been published.

Dated: July 26, 2010

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Tennessee Department of Environment and Conservation, Division of Archaeology, Nashville, TN

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Tennessee Department of Environment and Conservation, Division of Archaeology, Nashville, TN. The human remains and associated funerary objects were removed from the Fewkes archeological site (40WM1), Williamson County, TN.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by the Tennessee Department of Environment and Conservation, Division of Archaeology, professional staff in consultation with representatives of the Absentee-Shawnee Tribe of Oklahoma; Alabama-Quassarte Tribal Town, Oklahoma; Cherokee Nation, Oklahoma; Chickasaw Nation, Oklahoma; Choctaw Nation of Oklahoma; Eastern Band of Cherokee Indians of North Carolina; Eastern Shawnee Tribe of Oklahoma; Kialegee Tribal Town, Oklahoma; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians, Alabama; Quapaw Tribe of Oklahoma; Seminole Nation of Oklahoma; Shawnee Tribe, Oklahoma; Thlopthlocco Tribal Town, Oklahoma; and the United Keetoowah Band of Cherokee Indians, Oklahoma.

In 1998, human remains representing a minimum of 21 individuals were removed from the Fewkes archeological site (40WM1), in Williamson County, TN, by a Tennessee Department of Transportation contractor during a data recovery excavation for a state-funded road improvement project. In August 1999, the individuals were transferred from the Tennessee Department of Transportation contractor to the Tennessee Department of Environment and Conservation, Division of Archaeology. In February 2008, the associated funerary objects were transferred. No known individuals were identified. The 17 associated funerary objects are 2 ceramic earplugs, 1 ceramic earplug fragment, 1 ceramic Beckwith Incised frog effigy jar, 1 ceramic human effigy hooded bottle, 1 ceramic Matthews Incised frog effigy jar, 1 ceramic disk, 1 Clovis biface/preform, 2 Madison-style projectile points, 1 Sand Mountain-style projectile point, 2 greenstone celts, 1 shale gorget, 1 turkey bone awl, 1 drilled dog tooth, and 1 bone pin fragment.

The Fewkes archeological site (40WM1) is a late prehistoric Mississippian period mound center located in Brentwood, Williamson County, TN. In October 1920, William E. Myer conducted the first recorded exploration of this site for the Smithsonian Institution. The results of this exploration were published in the 41st Annual Report of the Bureau of American Ethnology (pages 561–615), in 1928. Myer recorded five mounds (platform and burial), an extensive habitation area, and numerous "stone-box" graves during his investigation. Among the recovered artifacts were shell-tempered pottery jars, bowls, bottles, and pans. The recorded earthworks, stone-box graves, and shell-tempered ceramic vessels provide unequivocal evidence that this site dates to the Mississippian period in middle Tennessee, approximately A.D. 1000–1475. Results from modern archeological investigations at the site support this cultural assignment (Tennessee Department of Transportation, 1995–1998; Middle Tennessee State University, 2004; and Tennessee Department of Environment and Conservation, Division of Archaeology, 2006).

Extensive archeological research within the Middle Cumberland River valley has identified a virtual abandonment of the area by native residents around A.D. 1450 (K. Smith 1992; Moore et al. 2006; Moore and Smith 2009). This drastic population reduction has been studied as supporting evidence for the "Vacant Quarter" hypothesis (Williams 1990; Cobb and Butler 2002). This hypothesis notes the general abandonment of Mississippian sites within portions of the Ohio, Mississippi, Tennessee, and Cumberland River drainages around A.D. 1450–1550. Given the current level of archeological knowledge, and that there are no tribal lands in Tennessee, officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, are not able to identify the descendants of the Fewkes site residents.

Officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, have determined that, pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and associated funerary objects and any present-day Indian tribe.

The Eastern Band of Cherokee Indians of North Carolina is the aboriginal land tribe under 43 CFR 10.11(c)(1), according to the decision of the Indian Claims Commission (Land Claim Map 137). In addition, the Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; and the

United Keetoowah Band of Cherokee Indians, Oklahoma, are named in treaties for 1784–1894 Land Cessions in Williamson County, TN (Map 13). On February 29, 2008 and June 26, 2008, the Tennessee Department of Environment and Conservation, Division of Archaeology, consulted with these Indian tribes recognized as aboriginal to the area from which these Native American human remains and associated funerary objects were removed.

The Secretary of the Interior may make a recommendation for the culturally unidentifiable human remains to be reinterred under State or other law. In May 2010, officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, requested that the Secretary, through the Native American Graves Protection and Repatriation Review Committee (Review Committee), recommend reinterment of the Native American human remains and associated funerary objects according to State law, 43 CFR 10.11(c)(2)(ii). The request is to reinter under Tennessee state law (T.C.A. 11–6–119), which requires the reburial of Native American skeletal remains and associated funerary objects. In addition, the Chickasaw Nation, Oklahoma, will lead the reburial of the removed individuals and associated funerary objects on the Fewkes site property in a location selected by the Tennessee Department of Environment and Conservation, Division of Archaeology, and approved by the City of Brentwood, Williamson County, TN. The Chickasaw Nation has performed previous reburials of Mississippian period human remains and associated burial objects from middle Tennessee. Finally, the Tennessee Department of Environment and Conservation, Division of Archaeology, has provided proof that consultation has occurred with all Indian tribes from whose aboriginal lands the Native American human remains and associated funerary objects were removed, and that none have objected to the reinterment.

On June 11, 2010, the Review Committee considered the proposal for reinterment and concurred with the proposal. The Secretary of the Interior considered the Review Committee's recommendation in favor of the proposal and independently concurred with it. A June 16, 2010, letter from the Designated Federal Officer, writing on behalf of the Secretary of the Interior, transmitted the authorization for the Tennessee Department of Environment and Conservation, Division of Archaeology, to reinter the culturally unidentifiable individuals under Tennessee state law (T.C.A 11–6–119), contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement. In the same letter, the Secretary of the Interior recommended the reinterment of the associated funerary objects to the extent allowed by Federal, state, or local law.

Officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, have determined that, pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of 21 individuals of Native American ancestry. Officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, also have determined that, pursuant to 25 U.S.C. 3001(3)(A), the 17 objects described above were placed with the individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Tennessee Department of Environment and Conservation, Division of Archaeology, have received a recommendation by the Secretary of the Interior, pursuant to 43 CFR 10.11(c)(2)(ii), that the human remains and associated funerary objects can be reinterred according to Tennessee state law (T.C.A 11–6–119).

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects or any other Indian tribe that believes it satisfies the criteria in 43 CFR 10.11(c)(1) should contact Michael C. Moore, Tennessee Division of Archaeology, 1216 Foster Ave., Cole Bldg 13, Nashville, TN 37243, telephone (615) 741–1588, before September 2, 2010. The human remains and associated funerary objects may be reinterred after that date if no additional claimants come forward.

The Tennessee Department of Environment and Conservation, Division of Archaeology, is responsible for notifying the Absentee-Shawnee Tribe of Oklahoma; Alabama-Quassarte Tribal Town, Oklahoma; Cherokee Nation, Oklahoma; Chickasaw Nation, Oklahoma; Choctaw Nation of Oklahoma; Eastern Band of Cherokee Indians of North Carolina; Eastern Shawnee Tribe of Oklahoma; Kialegee Tribal Town, Oklahoma; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians, Alabama; Quapaw Tribe of Oklahoma; Seminole Nation of Oklahoma; Shawnee Tribe, Oklahoma; Thlopthlocco Tribal Town, Oklahoma; and the United Keetoowah Band of Cherokee Indians, Oklahoma, that this notice has been published.

BILLING CODE 4312–50–S

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLIDB00100 L17110000.PH0000 241A 4500013040]

Notice of Permanent Closure on Public Lands in Ada County, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of permanent closure.

SUMMARY: On April 12, 2010, Higby Cave and all public lands within 1,000 feet of the entrance were permanently closed to vehicle access and public use at all times, due to changes in the cave's structural integrity and related potential hazards. The cave entrance has been gated and access limited to BLM-permitted and administrative activities. Exempt from this order are BLM employees, authorized permittees, and other Federal, State and County employees while on official business of their respective agencies, including associated vehicle use for administrative and emergency purposes.

DATES: This closure of public land became effective on April 12, 2010.

FOR FURTHER INFORMATION CONTACT: Jarod Fluckiger, Outdoor Recreation Planner, Morley Nelson Snake River Birds of Prey National Conservation Area at the Boise District Office, 3948 Development Avenue, Boise, Idaho 83705, via e-mail at *jarod_fluckiger@blm.gov,* or phone (208) 384–3342.

SUPPLEMENTARY INFORMATION: Higby Cave lies in the S½NW¼ NW¼ and N½SW¼ NW¼ of Section 32, T.1 S., R.3 E., Boise Meridian, Ada County, Idaho, in an area containing approximately 72 acres. This closure is intended to provide for public safety and protect public land and resources from further degradation. The cave entrance has been enclosed with a bat-friendly gate, and vehicle access to the area around the cave is now blocked by the placement of large rocks at the closure perimeter. Signs have also been posted at routes leading into the area.

The decision to close Higby Cave was analyzed in the Snake River Birds of Prey National Conservation Area (NCA) Proposed Resource Management Plan/Final Environmental Impact Statement (2008), and in the Environmental

Assessment (2010) to implement the decision.

This closure is established and administered by the BLM under the authority of Section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)) and complies with 43 CFR 8364.1 (Closure and Restriction Orders). In accordance with 43 CFR 8360.0–7, violation of this order is punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months. Violators may also be subject to the enhanced fines provided for in 18 U.S.C. 3571.

Definitions: (a) "Public lands" means any lands or interests in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management; (b) "Administrative purposes" means any use by an employee or designated representative of the Federal government or one of its agents or contractors in the course of their employment or representation; and (c) "Emergency purposes" means actions related to fire, rescue or law enforcement activities.

Terry Humphrey,

Four Rivers Field Manager.

[FR Doc. 2010–19049 Filed 8–2–10; 8:45 am]

BILLING CODE 4310–GG–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCAC09000–14300000–ET; CACA 51408]

Notice of Proposed Withdrawal and Opportunity for Public Meeting; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary of the Interior for Land and Minerals Management proposes to withdraw approximately 28,953 acres of public lands from location and entry under the United States mining laws (30 U.S.C. 22 *et seq.*) for a period of 20 years, on behalf of the Bureau of Land Management (BLM), to limit impacts to public safety and human health from naturally occurring asbestos and past mining activities within the Clear Creek Management Area (CCMA). This notice temporarily segregates the lands for up to 2 years from location and entry under the United States mining laws (30 U.S.C. 22 *et seq.*) while various studies and analyses are made to support a final decision on the withdrawal application. In addition, approximately 3,763 acres of non-Federal lands located inside of the boundary of the proposed withdrawal area, if acquired by or returned to the United States, would also be included in the proposed withdrawal and subject to the temporary segregation authorized by this notice.

DATES: Comments and meeting requests should be received on or before November 1, 2010.

ADDRESSES: Comments should be sent to Rick Cooper, Field Manager, Hollister Field Office, Bureau of Land Management, 20 Hamilton Court, Hollister, California 95023.

FOR FURTHER INFORMATION CONTACT: Dan Byrne, Hollister Field Office, BLM, 831–630–5031 or Brandon G. Anderson, California State Office, BLM, 916–978–4674.

SUPPLEMENTARY INFORMATION: The BLM ordered the temporary closure of 31,000 acres of public lands in the CCMA on May 1, 2008, based on the results of the Environmental Protection Agency's (EPA) CCMA Asbestos Exposure and Human Health Risk Assessment. Using activity-based air sampling methods, the EPA concluded that visiting the CCMA more than once per year can put adults and children above the EPA's acceptable risk range for exposure to carcinogens.

The applicant for the proposed withdrawal is the BLM at the address stated above. The petition/application requests the Assistant Secretary for Land and Minerals Management to withdraw, for a period of 20 years and subject to valid existing rights, the following described public lands from location and entry under the United States mining laws (30 U.S.C. 22 *et seq.*), but not the public land, mineral or geothermal leasing, or the mineral materials laws:

(a) Public Lands.

Sec. 22, NW¼NE¼;
Sec. 25, lots 2, 7, 10, 12, and 13, Mineral Survey No. 4976, patented;
Sec. 26, S½;
Sec. 36.
T. 18 S., R. 13 E.,
Sec. 32, Mineral Survey Nos. 6696 and 6724, both patented;
Secs. 33 and 34, Mineral Survey No. 6680, both patented;
Sec. 34, S½S½.

The areas described aggregate 3,763 acres, more or less, in Fresno and San Benito Counties.

The BLM's petition has been approved by the Assistant Secretary for Land and Minerals Management. Therefore, the petition constitutes a withdrawal proposal of the Secretary of the Interior (43 CFR 2310.1–3(e)).

The purpose of the proposed withdrawal is to minimize impacts to human health and the environment from hazardous emissions of airborne asbestos fibers associated with mining activities on the 33,000-acre portion of the CCMA designated as the Serpentine Area of Critical and Environmental Concern (ACEC).

The use of a right-of-way, interagency agreement, or cooperative agreement would not adequately constrain non-discretionary uses that could irrevocably expose to excess lifetime cancer risks.

There are no suitable alternative sites for the requested withdrawal.

No water rights would be needed to fulfill the purpose of the requested withdrawal.

A preliminary review of mineral resources in the subject area determined that no mineral leases are known to exist in the subject area and no known potential for commercial fossil fuel or geothermal energy minerals exists in the subject area. Asbestos, mercury, chromite, and magnesite are among the only locatable minerals of interest in the area, although none are expected to be commercially important commodities in the foreseeable future. Nevertheless, the KCAC mine, formerly owned and operated by Union Carbide, Corp., is still considered an active mining claim, even though asbestos production ceased after 2002. Other locatable minerals of interest, including precious gem-quality benitoite and semi-precious jadeite, continue to be mined intermittently on a small-scale in the subject area. Mining and production of these gem minerals has been occurring for decades on public and privately owned lands in the ACEC. This proposed withdrawal would be subject to valid existing rights and therefore would not prohibit future exploration or mining activities on valid pre-existing claims.

Until November 1, 2010, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing, by the date specified above, to the Field Manager, Hollister Field Office, BLM, 20 Hamilton Court, Hollister, California 95023.

Comments, including names and street addresses for respondents, will be available for public review at the BLM's Hollister Field Office, during regular business hours, 7:30 a.m. to 4 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. Before including your address, telephone number, e-mail address, or other personal identifying information in your comment, you should be aware the your entire comment—including your personal identifying information—may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organization or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

Notice is hereby given that at least one public meeting will be held in connection with the proposed withdrawal. Upon determination of the time and place a notice will be published in the **Federal Register** and a local newspaper at least 30 days prior to the scheduled date of the meetings. All interested persons who desire additional public meetings for the purpose of being heard on the proposed withdrawal must submit a written request to the Field Manager, Hollister Field Office, BLM, 20 Hamilton Court, Hollister, California 95023, no later than November 1, 2010.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from August 3, 2010, the lands described in this notice will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date.

Licenses, permits, cooperative agreement, or discretionary land use authorizations of a temporary nature which will not significantly impact the values to be protected by the withdrawal may be allowed with the approval of the authorized officer of the BLM during the segregative period.

Authority: 43 CFR 2310.3–1(a).

Karla Norris,

Assistant Deputy State Director, Natural Resources (CA–930).

BILLING CODE 4310–40–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–730]

In the Matter of: Certain Inkjet Ink Supplies and Components Thereof; Corrected Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on June 25, 2010, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Hewlett-Packard Company of Palo Alto, California and Hewlett-Packard Development Company, L.P. of Houston, Texas. Letters supplementing the complaint were filed on July 15, 2010 and July 27, 2010. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain inkjet ink supplies and components thereof by reason of infringement of certain claims of U.S. Patent No. 6,959,985 ("the '985 patent") and U.S. Patent No. 7,104,630 ("the '630

patent"). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainants request that the Commission institute an investigation and, after the investigation, issue an exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Anne Goalwin, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2574.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2010).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on July 26, 2010, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain inkjet ink supplies or components thereof that infringe one or more of claims 1–5, 7, 22–25, and 27–28 of the '985 patent and claims 1–7, 11–12, 14, 26–30, 32, and 34–35 of the '630 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are:

Hewlett-Packard Company, 3000 Hanover Street, Palo Alto, California 94304;

Hewlett-Packard Development Company, L.P., 11455 Compaq Center Drive West, Houston, Texas 77070.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Mipo International Ltd., 1600 Atlanta Financial Center, 3343 Peachtree Road, NE., Atlanta, Georgia 30326;

Mextec Group Inc., c/o The Law Office of Hongwei Shang, LLC, 9100 S. Dadeland Blvd., Suite 1500, Miami, Florida 33156;

Shanghai Angel Printer Supplies Co. Ltd., Room 1208, No. 495, Jiangning Road, Shanghai, China 200233;

Shenzhen Print Media Co., Ltd., #310, Huayuan Business Building, Xixiang Town, Baoan District, Shenzhen, Guangdong, China 518102;

Zhuhai National Resources & Jingjie Imaging, Products Co., Ltd., No. 1 Industrial Building, Pingdong 2 Road, Nanping S&T Industrial Community, Zhuhai, Guangdong, China 519060;

Tatrix International, 10 C, Garden Building, No. 1083 JiuZhou Road, Jida, Zhuhai, Guangdong, China 519015;

Ourway Image Co., Ltd., 15F, No. 125 Renmin East Road, Xiangzhong, Zhuhai, Guangdong, China 33156.

(c) The Commission investigative attorney, party to this investigation, is Anne Goalwin, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Suite 401, Washington, DC 20436; and

(3) For the investigation so instituted, the Honorable Paul J. Luckern, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d)–(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: July 28, 2010.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Justice Management Division

[OMB Number 1103–0018]

Agency Information Collection Activities; Proposed Collection; Comments Requested

ACTION: 30-Day Notice of Information Collection Under Review: Extension of Previously Approved Collection, Department of Justice Procurement Blanket Clearance.

The Department of Justice (DOJ), Justice Management Division, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the pubic and affected agencies. This proposed information collection was previously published in the **Federal Register** (Volume 75, Number 105, page 30858) on June 2, 2010, allowing for a 60 day public comment period.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until September 2, 2010. This process is conducted in accordance with 5 CFR 3120.10.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory

Affairs, Attention: Department of Justice Desk Officer, Washington, DC 20503. Additionally, comments may be submitted to OMB via facsimile on 202–395–7285.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Department of Justice Procurement Blanket Clearance.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form Number:* None. *Sponsor:* Justice Management Division.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract. Primary:* Commercial organizations and individuals who voluntarily submit offers and bids to compete for contract awards to provide supplies and services required by the Government. All work statements and pricing data are required to evaluate the contractors bid or proposal.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 5,996 respondents will complete each form, with a total of 20 hours average response time.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 119,920 total annual burden hours associated with this collection.

If additional information is required contact: Ms. Lynn Bryant, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street, NE., Suite 2E–502, Washington, DC 20530.

Dated: July 21, 2010.

Lynn Bryant,

Department Clearance Officer, PRA, U.S. Department of Justice.

DEPARTMENT OF JUSTICE

[OMB Number 1105–0086]

Justice Management Division; Office of Attorney Recruitment and Management; Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 30-Day Notice of Information Collection Under Review: Applications for Attorney Student Loan Repayment Program.

The U.S. Department of Justice (DOJ), Justice Management Division, Office of Attorney Recruitment and Management (OARM), will be submitting the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. Office of Management and Budget (OMB) approval is sought for the information collection listed below. This proposed information collection was previously published in the **Federal Register** on October 4, 2010, allowing for a 60-day public comment period.

The purpose of this notice is to allow an additional 30 days for public comment until October 4, 2010. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, Washington, DC 20530. Additionally, comments may be submitted to OMB via facsimile to 202–395–7285. Comments may also be submitted to the Department Clearance Officer, United States Department of Justice, Suite 1600, 601 D Street, NW., Washington, DC 20530.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Proposed new collection.

(2) *Title of the Form/Collection:* Applications for Attorney Student Loan Repayment Program.

(3) *Agency form number, if any, and the applicable component of the Department sponsoring the collection: Form Number:* none. Office of Attorney Recruitment and Management, Justice Management Division, U.S. Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. *Other:* None. The Department of Justice Attorney Student Loan Repayment Program (ASLRP) is an agency recruitment and retention incentive program based on 5 U.S.C. 5379, as amended, and 5 CFR Part 537. The Department selects participants during an annual open season each spring. Any one currently employed as an attorney or hired to serve in an attorney position within the Department may request consideration for the ASLRP. The Department selects new attorneys each year for participation on a competitive basis and renews current beneficiaries who remain qualified for these benefits, subject to availability of funds. There are two types of application forms—one is for new requests, and the other for renewal requests. In addition, there is a three-year service agreement form, and a one-year service extension form.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to

respond/reply: The Department anticipates that on a yearly basis, about 300 respondents will complete the application for a new request. In addition, each year the Department expects to receive approximately 175 applications from attorneys and law clerks requesting renewal of the benefits they received in previous years. It is estimated that each new application will take one (1) hour to complete, and each renewal application approximately 15 minutes to complete.

(6) An estimate of the total public burden (in hours) associated with the collection: The total estimated annual public burden associated with this collection is 250 hours.

If additional information is required, contact Lynn Bryant, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street, NE., Suite 2E–502, Washington, DC 20530.

Dated: July 21, 2010.

Lynn Bryant,

Department Clearance Officer, PRA, United States Department of Justice.

BILLING CODE 4410–PB–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA")

Notice is hereby given that on July 28, 2010, a proposed Consent Decree in *United States* v. *BIM Investment Corp. et al.,* Civil Action No. 1:10-cv-11263, was lodged with the United States District Court for the District of Massachusetts.

The Consent Decree resolves claims brought by the United States, on behalf of the United States Environmental Protection Agency ("EPA"), against four parties ("Settling Defendants") under Sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9606 and 9607. In its Complaint, filed concurrently with the Consent Decree, the United States sought injunctive relief in order to address the release or threatened release of hazardous substances at or from the Blackburn and Union Privileges Superfund Site in Walpole, Massachusetts (the "Site"), along with the recovery of costs the United States incurred for response activities undertaken at the Site.

Under the Consent Decree, the Settling Defendants—BIM Investment Corporation, Shaffer Realty Nominee Trust, Tyco Healthcare Group LP, and W.R. Grace & Co.-Conn.—will implement the remedy selected by EPA for the Site, including the excavation of soil and sediment and the extraction and treatment of groundwater. The Consent Decree also requires the Settling Defendants to reimburse the United States for $1,431,860 in past response costs incurred at the Site, and to reimburse the United States for its future oversight costs at the Site, up to $2,000,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to *pubcomment-ees.enrd@usdoj.gov* or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States* v. *BIM Investment Corp. et al.,* D.J. Ref. No. 90–11–3–09667.

The Consent Decree may be examined at the Office of the United States Attorney, District of Massachusetts, United States Courthouse, 1 Courthouse Way, Suite 9200, Boston, Massachusetts, 02210, and at U.S. EPA Region 1, 5 Post Office Square, Suite 100, Boston, Massachusetts, 02109. During the public comment period, the Consent Decree may also be examined on the following Department of Justice website: *http://www.justice.gov/enrd/Consent_Decrees.html.* A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (*tonia.fleetwood@usdoj.gov*), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of $136.50 for a copy of the complete Consent Decree (25 cents per page reproduction cost), or $30.25 for a copy without Appendix A (the 425-page Record of Decision, which is available at *http://www.epa.gov/region1/superfund/sites/blackburn/293498.pdf*), payable to the U.S. Treasury or, if by email or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Maureen Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under Comprehensive Environmental Response, Compensation And Liability Act Under 28 CFR 50.7, notice is hereby given that on July 28, 2010, a proposed Consent Decree in *United States* v. *Anacomp, Inc., et al,* No. 3:10-cv-1158, was lodged with the United States District Court for the District of Connecticut.

The proposed Consent Decree resolves claims of the United States, on behalf of the Environmental Protection Agency ("EPA"), under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9601 *et seq.,* in connection with the Solvents Recovery Service of New England, Inc. Superfund Site ("SRS Site") in Southington, Connecticut, against the defendants.

The proposed Consent Decree requires the seven settling defendants to pay $389,003 in aggregate.

The Consent Decree provides that the settlors are entitled to contribution protection as provided by Section 113(f)(2) of CERCLA, 42 U.S.C. 9613(f)(2), for matters addressed by the settlement.

The Department of Justice will receive for a period of 30 days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and either emailed to *pubcomment-ees.enrd@usdoj.gov* or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, D.C. 20044–7611, and should refer to *United States* v. *Anacomp, Inc., et al,* No. 3:10cv158, D.J. No. 90–7–1–23/10. Commenters may request an opportunity for a public meeting in the affected area, in accordance with Section 7003(d) of RCRA, 42 U.S.C. 6973(d).

The proposed Consent Decree may be examined at the Office of the United States Attorney, District of Connecticut, 157 Church Street, New Haven, CT 06510. During the public comment

period, the proposed Consent Decree may also be examined on the following Department of Justice website, *http://www.usdoj.gov/enrd/Consent_Decrees.html.* Copies of the proposed Consent Decree may be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (*tonia.fleetwood@usdoj.gov*), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy of the proposed Consent Decree, please enclose a check in the amount of $6.50 (25 cent per page reproduction cost), payable to the U.S. Treasury.

Maureen Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Judgment Under the Clean Air Act

Notice is hereby given that on July 28, 2010, a proposed Consent Judgment in *United States* v. *Nassau Chromium Plating Co., Inc.,* No. CV–09–2706, was lodged with the United States District Court for the Eastern District of New York.

The proposed Consent Judgment resolves claims of the United States, on behalf of the Environmental Protection Agency ("EPA"), under the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.* (hereinafter, the "Act"), against Defendant Nassau Chromium Plating Co., Inc. ("Defendant"). The United States alleges that Defendant has owned and operated a facility located at 112–122 Second Street, Mineola, New York, that sprays paint and applies chromium on, among other things, aluminum and steel parts, at which Defendant violated Sections 101–114 of the Act, 42 U.S.C. 7401–7414, and its implementing regulations, 40 CFR part 63, subpart N.

The Consent Judgment requires the Defendant to pay a civil penalty of $4,000.00, which was calculated after conducting an ability-to-pay analysis. The Consent Judgment also provides for injunctive relief that requires Defendant to maintain compliance with the provisions of Sections 101–114 of the Act, 42 U.S.C. 7401–7414, and its implementing regulations, 40 CFR part 63, subpart N, and submit reports to EPA for a three-year period demonstrating such compliance.

The Department of Justice will receive for a period of 30 days from the date of this publication comments relating to the proposed Consent Judgment. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to *pubcomment-ees.enrd@usdoj.gov* or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to: *United States* v. *Nassau Chromium Plating Co., Inc.,* No. CV–09–2706 (E.D.N.Y.), D.J. Ref. 90–5–2–1–08190.

The proposed Consent Judgment may be examined at the Office of the United States Attorney, Eastern District of New York, 271 Cadman Plaza East, 7th Fl., Brooklyn, New York 11201, and at the United States Environmental Protection Agency, Region II, 290 Broadway, New York, New York 10007–1866. During the public comment period, the proposed Consent Judgment may also be examined on the following Department of Justice Web site, *http://www.usdoj.gov/enrd/Consent_Decrees.html.* A copy of the proposed Consent Judgment may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (*tonia.fleetwood@usdoj.gov*), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of $5.00 (25 cents per page reproduction cost), payable to the U.S. Treasury.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

National Institute Of Corrections

Solicitation for a Cooperative Agreement: Strategies for Women Executives in Corrections

AGENCY: National Institute of Corrections, U.S. Department of Justice.

ACTION: Solicitation for a cooperative agreement.

SUMMARY: The National Institute of Corrections (NIC) is soliciting proposals from organizations, groups, or individuals to enter into an 18-month cooperative agreement to update its 36-hour Executive Leadership for Women in Corrections program, newly titled Strategic Development of the Executive Woman. The award recipient will update the current training and ensure it supports the learning process, leadership styles, and required competencies for executive women in corrections. The award includes responsibility for the updated Instructional Theory into Practice (ITIP) formatted curriculum, the contracting and training of NIC-approved faculty, and the administration of participant expenses, including the dispersal of program acceptance letters, coordination of registration, lodging, meals, and transportation. The recipient will also be responsible for conducting, in collaboration with the NIC Research and Evaluation Division, an evaluation of the initial program delivery using the NIC training evaluation protocol. This should represent a minimal cost to the award recipient. The project will also address strategies for additional learning and networking upon training completion. The training is anticipated to begin no later than August 2011.

The pilot will be held at the National Center for Educational Development in Norman, OK. This has proven to be a favorable site in the past and represents the accommodations and amenities expected for future programming.

DATES: Applications must be received by 2 p.m. EDT on Friday, August 20, 2010.

ADDRESSES: Mailed applications must be sent to: Director, National Institute of Corrections, 320 First Street, NW., Room 5007, Washington, DC 20534. Applicants are encouraged to use Federal Express, UPS, or similar service to ensure delivery by the due date.

Hand delivered applications should be brought to 500 First Street, NW., Washington, DC 20534. At the front desk, dial 7–3106, extension 0 for pickup.

Faxed applications will NOT be accepted. Electronic applications can be submitted only via *http://www.grants.gov.*

FOR FURTHER INFORMATION CONTACT: A copy of this announcement can be downloaded from the NIC web page at *http://www.nicic.gov.*

All technical or programmatic questions concerning this announcement should be directed to Evelyn Bush, Correctional Program Specialist, National Institute of Corrections. She can be reached at *e1bush@bop.gov.*

SUPPLEMENTARY INFORMATION:

Overview: NIC's Executive Leadership for Women in Corrections program

provides executive women leaders with critical competencies, self-awareness, and the confidence necessary to seek higher levels in an organization and perform their leadership responsibilities effectively. The program addresses three main objectives: Correctional leadership, barriers and promotional strategies, and career and life planning. Three assessment instruments (LSI, MBTI, and Change Style Indicator) with individual feedback, classroom presentations, and tabletop and outdoor activities center around the core set of developmental competencies. The developmental competencies were based on a gap analysis comparing the boss/peer/subordinate scores on each competency of the LEADERSHIP 360, a set of eight leadership abilities commonly found among most outstanding leaders. These scores were compared against the midrange point of a future leadership competency set. The result of this analysis provided the basis for three major competencies—strategy, communication, and consent—which are to be incorporated into NIC's new "Strategies for Women Executives in Corrections."

Additionally, over the last five years, NIC's Executive Leadership for Women in Corrections program has kept current with recent trends such as those that appear in the multigenerational workforce and that are noted in the NIC Correctional Competencies publication.

Background: The National Institute of Corrections Prisons Division offered the first Executive Training for Women program in 1994. The program was designed to address both the personal and professional aspects of women's correctional leadership in a nontraditional profession. Through a two-part series, NIC has sought to close the gap for women executives in their knowledge, recognition of their value to the organization, and self and observer perception.

Although the past three decades have witnessed a tremendous increase in the number of women working in corrections, increasing numbers of women in the workforce have not been matched by corresponding advancement in executive and senior level leadership positions. Women are underrepresented in senior level (CEO) leadership positions across all professions, but they are significantly underrepresented in the corrections field. To further complicate the issue, studies have found that few women have had the same quantity and quality of leadership development opportunities and experiences as men, thus thwarting their ability to compete adequately for higher level positions.

By 2012, women will comprise 47.5% of the workforce. With the anticipated rise of women in the ranks of senior level positions, NIC continues to build upon the success of its programming for a women's-only environment, where gender barriers are eliminated and acceleration of learning is possible.

The occurrence of strategic partnerships within and between organizations is on the rise. In a time of a changing workforce, security issues, technology advances and new government regulations, it is imperative that organizations and individuals learn to adapt. Getting individuals to do things differently is the measure of success or failure. Approaching leadership strategically is a learned skill. Forward-looking organizations proactively seek ways to advance the leadership capacities of the women they promote, or intend to promote, to senior and executive administration.

Target Audience: Women who are senior, upper-level correctional managers serving in jails, prisons, and community corrections, functioning administratively at the level of warden or superintendent and above, and who wish to enter the ranks of chief executives of state departments of corrections.

Intended Program Results: This program will assist women leaders in understanding their value to, and involvement with, moving themselves and an organization forward. It is an acknowledgement for their way of learning and thinking, without judgment. It is to provide the tools necessary to become more self aware, more strategic in assessing and isolating critical problems, more mission driven, politically savvy, and adept at teaming with others for success. The program also takes into account the best learning environment, the best setting for the greatest outcome, and a way to close the gap for women executives in their knowledge, self-awareness, and observer's perception of their value to an organization.

Learning Outcomes: It is intended that leaders will: Acknowledge the need for, and rely upon, the support system of other professionals who can offer feedback and advice; develop appreciation for teams, teamwork and the application of strategic teaming; extend their abilities to evaluate themselves and address their needs for developing mastery of the skills required in executive leadership; and grow in their understanding of self.

Products and Deliverables: A training curriculum designed with ITIP model instruction, which will contain an instructor/facilitator's guide with associated tools, materials, and resources with a final, agreed upon curriculum delivered to NIC no later than December 31, 2011; a participant resource guide to be used in conjunction with all training activities; instructional aides and materials, including presentation slide shows, CDs, charts, handouts, case studies, assessments, etc. to support instruction and facilitation; and training delivery and facilitation of a 36-hour classroom training for 20 participants with blended learning tools.

Training Program Description: The training program will be announced on NIC's website with its list of other training courses. A description follows but may be downloaded online at *http://nicic.gov/Library/023761.*

Scope of Project: The recipient of this cooperative agreement award must, at a minimum, do the following within the scope of this project: (1) In collaboration with the NIC Research and Evaluation Division, conduct a survey to query senior executives regarding critical leadership competencies or sets that organizations should be developing, (2) In collaboration with the NIC Research and evaluation Division, conduct a survey to capture barriers that women and minorities face when seeking promotion to senior executive positions in corrections, and (3) Use the NIC publication "Correctional Leadership Competencies for the 21st Century" as a resource to build upon.

The narrative portion of the cooperative agreement application should include, at a minimum, (1) a clear description of women's learning orientations and the methodology that will be used to take these into consideration as part of the newly revised curriculum, (2) a brief summary that indicates the applicant's understanding of the purpose of this cooperative agreement, (3) two to three paragraphs that detail the applicant's understanding of the need for this program, (4) a brief paragraph that summarizes the project goals and objectives, (5) a clear description of the methodology that will be used to complete the project and achieve its goals, (6) a clearly developed work plan with measurable project milestones and timelines for the completion of each milestone, (7) a description of the qualifications of the applicant and each project staff, (8) a description of the staffing plan, including the role and time commitment for each project staff member and a statement from individual staff that he/she will be available to work on this project, and (9) a budget that details all costs for the project, shows consideration for all

contingencies, and notes a commitment to work within the proposed budget. The application must also include a budget narrative that explains how all costs were determined.

Specific Requirements: The applicant will provide an example of several topics/modules that may be considered and their accompanying learning activity. The applicant must also demonstrate a recent working knowledge of leadership development programming specific to women. Experienced correctional professional(s) are expected to be on the project team. These person(s) can be project staff or consultants. The correctional experience cited as qualifications must be at the level of warden or above. Continuous consultation with the NIC Correctional Program Specialist (CPS) on both proposed curriculum content and training program strategies is necessary. The CPS will have final approval of both. The selected applicant will conduct a face-to-face training/planning meeting with the CPS and NIC-selected and approved trainers and/or faculty to deliver the program at least 60 days before the program start date and provide a climate of inclusion and support in which women can concentrate on the learning process. The awardee will be responsible for the preparation of all program training materials, negotiation, timely completion of faculty contracts, and coordination of all program site logistics. Participant/faculty lodging, meals, travel, and administration of the associated logistics are to be funded within this agreement, based on the complete meal package. Knowledge and previous use of level one and two evaluation methods is necessary. The use of blended learning tools, such as a live Web-based training environment or supplemental online information transfer, is expected.

Curriculum Specifications: The curriculum must be designed and developed, adhering to the following standards and specifications: (1) The curriculum and training design must be consistent with, and embrace the Instructional Theory into Practice (ITIP) model. A reference to this model can be found at *http://nicic.gov/Library/010714;*

(2) Written products are developed to support the training;

(3) The curriculum facilitation guide is written using a standard curriculum document format to include, at a minimum, module/sections and titles, performance objectives/expectations, a learning activities guide, practice/application activities, evaluation method and resources needed to conduct training activities; (4) Cited references support curriculum content and concepts; (5) Copyright permissions are secured for the use of copyright protected publications and materials with a minimum usage of three years; (6) All documents must be delivered electronically in both MS Word 2003 or higher and hard copy; (7) NIC will have final approval of the format, design, and organization of the curriculum documents.

Required Expertise: The successful applicant and/or project staff will possess knowledge, skills, and experience in the following areas: Program design, strategic processes, correctional organizational culture team dynamics, and change management. Demonstrated knowledge and experience with the dynamics affecting women in corrections is necessary. The applicant will provide an example of recent involvement in leadership development programming specific to women and possess knowledge and experience in curriculum development based on adult learning theory and the Instructional Theory into Practice (ITIP) format. Knowledge and expertise in a variety of instructional delivery strategies should utilize, but are not limited to, instructor led e-learning, including asynchronous computer/Web-based instructor led, synchronous Web-based, and social learning networks, etc. Skill in designing training curriculum linked to training objectives, knowledge of available training evaluation methods, and effective written and oral communication skills are necessary.

Review Considerations: Applications received under this announcement will be subject to the NIC Review Process. The criteria for the evaluation of each application will be as follows,

Programmatic (40%)

Are all the tasks adequately discussed? Is there a clear statement of how each of the tasks will be accomplished, including the staffing, resources, and strategies to be employed? Are there any innovative approaches, techniques, or design aspects proposed that will enhance the project?

Organizational (30%)

Do the skills, knowledge, and expertise of the organization and the proposed project staff demonstrate a high level of competency to carry out the tasks? Does the applicant organization have the necessary experience and organizational capacity to carry out all five goals of the project? Are the proposed project management and staffing plans realistic and sufficient to complete the project within the time frame?

Project Management/Administration (20%)

Does the applicant identify reasonable objectives, milestones, and measures to track progress? If consultants and/or partnerships are proposed, is there a reasonable justification for their inclusion in the project and a clear structure to insure effective coordination?

Fiscal (10%)

Is the proposed budget realistic, provide sufficient cost detail/narrative, and represent good value relative to the anticipated results?

Application Requirements: Applications should be concisely written, typed double spaced and reference the "NIC Funding Opportunity Number" and Title provided in this announcement. The application package must include: OMB Standard Form 424, Application for Federal Assistance; a cover letter that identifies the audit agency responsible for the applicant's financial accounts as well as the audit period or fiscal year that the applicant operates under (e.g., July 1 through June 30), an outline of projected costs, and the following forms: OMB Standard Form 424A, Budget Information—Non Construction Programs, OMB Standard Form 424B, Assurances—Non Construction Programs (available at *http://www.grants.gov*), and DOJ/NIC Certification Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements (available at *http://www.nicic.gov/Downloads/PDF/certif-frm.pdf.*)

Applications may be submitted in hard copy, or electronically via *http://www.grants.gov.* If submitted in hard copy, there needs to be an original and three copies of the full proposal (program and budget narratives, application forms and assurances). The original should have the applicant's signature in blue ink. The program narrative text must be limited to 15 double-spaced pages, exclusive of resumes and summaries of experience. Please do not submit full curriculum vitae.

Authority: Public law 93–415.

Funds Available: NIC is seeking the applicant's best ideas regarding accomplishment of the scope of work and the related costs for achieving the goals of this solicitation. Funds (up to $100,000) may be used only for the activities that are linked to the desired outcome of the project.

This project will be a collaborative venture with the NIC Prisons Division.

Eligibility of Applicants: An eligible applicant is any private agency, educational institution, organization, individual or team with expertise in the areas described.

Review Considerations: Applications received under this announcement will be subjected to a 3- to 5-person NIC Peer Review Process.

Note: NIC will not award a cooperative agreement to an applicant who does not have a Dun and Bradstreet Database Universal Number (DUNS) and is not registered in the Central Contractor Registry.

A DUNS number can be received at no cost by calling the dedicated toll-free DUNS number request line at 1–800–333–0505 (if you are a sole proprietor, you would dial 1–866–705–5711 and select option 1).

Number of Awards: One.

NIC Funding Opportunity Number: 10P12. This number should appear as a reference line in the cover letter, where indicated on Standard Form 424, and outside of the envelope in which the application is sent.

Catalog of Federal Domestic Assistance Number: 16.601.

Executive Order 12372: This project is not subject to the provisions of Executive Order 12372.

Morris L. Thigpen,

Director, National Institute of Corrections.

BILLING CODE 4410–36–P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

July 28, 2010.

The Department of Labor (DOL) hereby announces the submission of the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35). A copy of the ICR, with applicable supporting documentation; including, among other things, a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAMain* or by contacting Linda Watts Thomas on 202–693–2443 (this is not a toll-free number)/e-mail: *DOL_PRA_PUBLIC@dol.gov.*

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor—Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202–395–7316/Fax: 202–395–5806 (these are not toll-free numbers), E-mail: *OIRA_submission@omb.eop.gov* within 30 days from the date of this publication in the **Federal Register**. In order to ensure the appropriate consideration, comments should reference the OMB Control Number (*see below*).

The OMB is particularly interested in comments which:

- Evaluate whether the proposed information collection requirements are necessary for the proper performance of the Agency, including whether the information will have practical utility;
- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collections of information on those who are to respond including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Occupational Exposure to Noise (29 CFR 1910.95).

OMB Control Number: 1218–0048.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 254,475.

Estimated Total Annual Burden Hours: 2,604,597.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $82,190,075.

Description: The information collection requirements specified in the Occupational Exposure to Noise Standard protect workers from suffering material hearing impairment. The information collection requirements of the Standard include conducting noise monitoring; notifying workers when they are exposed at or above an 8-hour time-weighted average of 85 decibels; providing workers with initial and annual audiograms; notifying workers of a loss in hearing based on comparing audiograms; training workers on the effects of noise, hearing protectors, and audiometric examinations; maintaining records of workplace noise exposure and workers' audiograms; and allowing workers, OSHA, and the National Institute for Occupational Safety and Health (NIOSH) access to materials and records required by the Standard. For additional information, see the related 60-day preclearance notice published in the **Federal Register** on May 5, 2010, (75 FR 24740).

Dated: July 28, 2010.

Linda Watts Thomas,

Acting Departmental Clearance Officer.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

July 28, 2010.

The Department of Labor (DOL) hereby announces the submission of the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35). A copy of the ICR, with applicable supporting documentation; including, among other things, a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAMain* or by contacting Linda Watts Thomas on 202–693–2443 (this is not a toll-free number)/e-mail: *DOL_PRA_PUBLIC@dol.gov.*

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor—Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202–395–7316/Fax: 202–395–5806 (these are not toll-free numbers), e-mail: *OIRA_submission@omb.eop.gov* within 30 days from the date of this publication in the **Federal Register**. In order to ensure the appropriate consideration, comments should reference the OMB Control Number (see below).

The OMB is particularly interested in comments which:

- Evaluate whether the proposed information collection requirements are necessary for the proper performance of

the Agency, including whether the information will have practical utility;

• Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Derricks (29 CFR 1910.181).

OMB Control Number: 1218–0222.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 500.

Estimated Total Annual Burden Hours: 1,356.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $0.

Description: The Standard specifies several paperwork requirements. The purpose of these requirements is to prevent death and serious injuries among workers by ensuring that the derrick is not used to lift loads beyond its rated capacity and that all the ropes are inspected for wear and tear. For additional information, see the related 60-day preclearance notice published in the **Federal Register** on April 14, 2010, (Vol. 75, No. 19423).

Dated: July 28, 2010.

Linda Watts Thomas,

Acting Departmental Clearance Officer.

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor—Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202–395–7316/Fax: 202–395–5806 (these are not toll-free numbers), E-mail: *OIRA_submission@omb.eop.gov* within 30 days from the date of this publication in the **Federal Register.** In order to ensure the appropriate consideration, comments should reference the OMB Control Number (*see below*).

The OMB is particularly interested in comments which:

• Evaluate whether the proposed information collection requirements are necessary for the proper performance of the Agency, including whether the information will have practical utility;

• Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Asbestos in General Industry (29 CFR 1910.1001).

OMB Control Number: 1218–0133.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 243.

Estimated Total Annual Burden Hours: 11,933.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $862,347.

Description: The basic purpose of the information collection requirements in the Standard is to document that employers in general industry are providing their workers with protection from hazardous asbestos exposure. Asbestos exposure results in asbestosis, an emphysema-like condition; lung cancer; mesothelioma; and gastrointestinal cancer.

Several provisions of the Standard specify paperwork requirements, including: Implementing an exposure monitoring program that notifies workers of their exposure monitoring results; establishing a written compliance program; and informing laundry personnel of the requirement to prevent release of airborne asbestos above the time-weighted average and excursion limit. Other provisions associated with paperwork requirements include: Maintaining records of information obtained concerning the presence, location, and quantity of asbestos-containing materials (ACMs) and/or presumed asbestos-containing materials (PACMs) in a building/facility; notifying housekeeping workers of the presence and location of ACMs and PACMs in areas they may contact during their work; posting warning signs demarcating regulated areas; posting signs in mechanical rooms/areas that workers may enter and that contain ACMs and PACMs, informing them of the identity and location of these materials and work practices that prevent disturbing the materials; and affixing warning labels to asbestos-containing products and to containers holding such products. Additional provisions that contain paperwork requirements include: Developing specific information and training programs for workers; using information, data, and analyses to demonstrate that PACMs do not contain asbestos; providing medical surveillance for workers potentially exposed to ACMs and/or PACMs, including administering a worker medical questionnaire, providing information to the examining physician, and providing the physician's written opinion to the worker; maintaining exposure monitoring records, objective data used for exposure determinations, and medical surveillance; making specified records (*e.g.,* exposure monitoring and medical surveillance records) available to designated parties; and transferring exposure monitoring and medical surveillance records to the National Institute for Occupational Safety and Health (NIOSH) on cessation of business, if so requested by NIOSH.

These paperwork requirements permit employers, workers and their designated

representatives, OSHA, and other specified parties to determine the effectiveness of an employer's asbestos-control program. Accordingly, the requirements ensure that workers exposed to asbestos receive all of the protection afforded by the Standard.

For additional information, see the related 60-day preclearance notice published in the **Federal Register** on April 5, 2010, (75 FR 17164).

Dated: July 28, 2010.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Formaldehyde (29 CFR 1910.1048).

OMB Control Number: 1218–0145.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 103,511.

Estimated Total Annual Burden Hours: 327,535.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $42,626,346.

Description: The Standard specifies a number of paperwork requirements. The following is a brief description of the collection of information requirements contained in the Formaldehyde Standard. The Formaldehyde Standard requires employers to conduct worker exposure monitoring to determine workers' exposure to formaldehyde, notify workers of their formaldehyde exposures, provide medical surveillance to workers, provide examining physicians with specific information, ensure that workers receive a copy of their medical examination results, maintain workers' exposure monitoring and medical records for specific periods, and provide access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected workers, and their authorized representatives.

For additional information, see the related 60-day preclearance notice published in the **Federal Register** on April 5, 2010, (75 FR 17163).

OFFICE OF MANAGEMENT AND BUDGET

Collection of Information Under Review by Office of Management and Budget

AGENCY: Office of Management and Budget, Office of Federal Financial Management.

ACTION: Notice; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) invites the general public and Federal agencies to comment on the renewal without change of two standard forms: SF–270, Request for Advance or Reimbursement and SF–271, Outlay and Request for Reimbursement for Construction Programs. We are particularly interested in comments on whether the information collected in the forms could be more consistent with other governmentwide grant-related information collections.

DATES: Comments must be received by September 2, 2010. Due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit comments electronically to ensure timely receipt. We cannot guarantee that comments mailed will be received before the comment closing date.

ADDRESSES: Comments should be addressed to the OMB Desk Officer and sent via electronic mail to *oira_submission@omb.eop.gov* or faxed to (202) 395–5806. Written comments and suggestions from the public and affected agencies regarding items contained in this notice and especially with regard to the estimated public burden and associated response time should be directed to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments may also be sent to regulations.gov, a Federal E-Government Web site that allows the public to find, review, and submit comments on documents that agencies have published in the **Federal Register** and that are open for comment. Simply type "SF–270 PRA" (in quotes) in the Comment or Submission search box, click Go, and follow the instructions for submitting comments. Comments received by the date specified above will be included as part of the official record.

FOR FURTHER INFORMATION CONTACT: Marguerite Pridgen, Office of Federal Financial Management, Office of Management and Budget, 725 17th

Street, NW., Washington, DC 20503; telephone 202–395–7844; fax 202–395–3952; e-mail *mpridgen@omb.eop.gov.*

OMB Control No.: 0348–0004.

Title: Request for Advance or Reimbursement.

Form No.: SF–270.

Type of Review: Extension of a currently approved collection.

Respondents: States, Local Governments, Universities, Non-Profit Organizations.

Number of Responses: 100,000.

Estimated Time per Response: 60 minutes.

Needs and Uses: The SF–270 is used to request funds for all nonconstruction grant programs when letters of credit or predetermined advance payment methods are not used. The Federal awarding agencies use information reported on this form for the award and general management of Federal assistance program awards.

OMB Control No.: 0348–0002.

Title: Outlay and Request for Reimbursement for Construction Programs.

Form No.: SF–271.

Type of Review: Extension of a currently approved collection.

Respondents: States, Local Governments, Universities, Non-Profit Organizations.

Number of Responses: 40,000.

Estimated Time per Response: 60 minutes.

Needs and Uses: The SF–271 is used to request reimbursement for all construction grant programs. The Federal awarding agencies use information reported on this form for the award and general management of Federal assistance program awards.

Debra J. Bond,

Deputy Controller.

BILLING CODE P

OFFICE OF MANAGEMENT AND BUDGET

Compliance Assistance Resources and Points of Contact Available to Small Businesses

AGENCY: Office of Management and Budget, Executive Office of the President.

ACTION: Notice.

SUMMARY: In accordance with the Small Business Paperwork Relief Act of 2002 (44 U.S.C. 3520), the Office of Management and Budget (OMB) is publishing a "list of the compliance assistance resources available to small businesses" and a list of the points of contacts in agencies "to act as a liaison between the agency and small business concerns" with respect to the collection of information and the control of paperwork. This information is posted on the following Web site: *http://www.business.gov/business-law/contacts/federal/*

FOR FURTHER INFORMATION CONTACT: Wendy Liberante, Office of Information and Regulatory Affairs, Office of Management and Budget, E-mail: *wliberante@omb.eop.gov,* Telephone: (202) 395–3647. Inquiries may be submitted by facsimile to (202) 395–5167.

SUPPLEMENTARY INFORMATION: The Small Business Paperwork Relief Act of 2002 (Pub. L. 107–198) requires OMB to "publish in the **Federal Register** and make available on the Internet (in consultation with the Small Business Administration) on an annual basis a list of the compliance assistance resources available to small businesses" (44 U.S.C. 3504(c)(6)). OMB has, with the active assistance and support of the Small Business Administration (SBA) and Business.gov, assembled a list of the compliance assistance resources available to small businesses. This list is available today on the following Web site: *http://www.business.gov/business-law/contacts/federal/.* There is also a link to this information on the OMB Web site.

In addition, under another provision of this Act, "each agency shall, with respect to the collection of information and the control of paperwork, establish 1 point of contact in the agency to act as a liaison between the agency and small business concerns" (44 U.S.C. 3506(i)(1)). These contacts are also available at *http://www.business.gov/business-law/contacts/federal/.*

OMB and SBA have chosen to implement this statutory responsibility by publishing agency compliance contact information on Business.gov Web site. Business.gov delivers compliance information to the public more effectively than having businesses go to individual agency Web sites, thereby improving the probability of success for business owners and agency regulatory programs. The public is not only able to find agency points of contact for compliance under the "contacts and help" tab on Business.gov, but when users look for information in the "small business guides" on particular topics, the relevant agency points of contact automatically appear as part of the guide.

Cass Sunstein,

Administrator, Office of Information and Regulatory Affairs.

BILLING CODE P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (10 –085)]

Opportunity To Comment on Proposed and/or Continuing Information Collection

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. 3506(c)(2)(A)).

DATES: All comments should be submitted within 30 calendar days from the date of this publication.

ADDRESSES: All comments should be addressed to Lori Parker, National Aeronautics and Space Administration, Washington, DC 20546–0001.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Lori Parker, NASA PRA Officer, NASA Headquarters, 300 E Street, SW., JF000, Washington, DC 20546, (202) 358–1351, *Lori.Parker@nasa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

Information is needed to guide implementation of GLOBE (Global Learning and Observations to Benefit the Environment) based on feedback from participating teachers, students, and partners in order to help meet the Program's goal of improving student achievement in mathematics and science.

II. Method of Collection

The GLOBE Partner survey is Web-based on-line instrument. The survey gathers data on all activities related to GLOBE implementation for the year prior to administration of the survey.

III. Data

Title: GLOBE Program Evaluation.
OMB Number: 2700–0114.
Type of Review: Extension of currently approved collection.
Affected Public: State, Local, or Tribal Government; Individuals or households; and Not-for-profit institutions.
Number of Respondents: 258.
Responses per Respondent: 1.
Annual Responses: 258.
Hours per Request: 2.
Annual Burden Hours: 516.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Lori Parker,

NASA PRA Clearance Officer.

BILLING CODE P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Privacy Act of 1974, as Amended; System of Records Notices

AGENCY: National Archives and Records Administration [NARA].

ACTION: Notice of the establishment of new privacy system of record, NARA 40.

SUMMARY: The National Archives and Records Administration (NARA) proposes to add a system of records to its existing inventory of systems subject to the Privacy Act of 1974, as amended (5 U.S.C. 552(a)) ("Privacy Act"). In this notice, NARA publishes NARA 40, the Office of Government Information Services (OGIS) Case Files.

DATES: This new system of records, NARA 40, will become effective September 2, 2010 without further notice unless comments are received that result in further revision. NARA will publish a new notice if the effective date is delayed to review comments or if changes are made based on comments received. To be assured of consideration, comments should be received on or before the date above.

ADDRESSES: You may submit comments, identified by SORN number NARA 40, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 301–837–0293.
- *Mail:* Privacy Act Officer, Office of General Counsel (NGC), Room 3110, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001.

FOR FURTHER INFORMATION CONTACT: Jay Olin, Deputy FOIA Officer, Office of General Counsel (NGC), Room 3110, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: (301) 837–2025. Fax: 301–837–0293.

SUPPLEMENTARY INFORMATION: The OPEN Government Act of 2007 amended the Freedom of Information Act (5 U.S.C. Section 552) to create an Office of Government Information Services (OGIS) within the National Archives and Records Administration (NARA). OGIS's mission is to review policies and procedures of administrative agencies under the Freedom of Information Act (FOIA) and their compliance with FOIA by agencies; offer mediation services to resolve disputes between persons making FOIA requests and agencies (nonexclusive alternative to litigation); and serve as ombudsman, *i.e.* solicit and receive comments and questions from Federal agencies and the public regarding the administration of FOIA to improve FOIA processes and facilitate communication between agencies and FOIA requesters.

The notice for this system of records states the name and the location of the record system, the authority for and manner of its operation, the categories of individuals that it covers, the types of records that it contains, the sources of information in the records, and the proposed "routine uses" of the system of records. The notice also includes the business address of the NARA official who will inform interested persons of the procedures whereby they may gain access to, and correct, records pertaining to themselves.

One of the purposes of the Privacy Act, as stated in section 2(b)(4) of the Act, is to provide certain safeguards for an individual against an invasion of personal privacy by requiring Federal agencies to disseminate any record of identifiable personal information in a manner that assures that such action is for a necessary and lawful purpose, that the information is current and accurate for its intended use, and the adequate safeguards are provided to prevent misuse of such information. NARA intends to follow these principles in transferring information to another agency or individual as a "routine use," including assurance that the information is relevant for the purposes for which it is transferred.

Dated: July 28, 2010.

David S. Ferriero,

Archivist of the United States.

NARA Privacy Act Systems: NARA 40

SYSTEM NAME:

The Office of Government Information Services (OGIS) Case Files.

SYSTEM LOCATION:

The OGIS case files are maintained in the National Archives and Records Administration, Office of Government Information Services, Room 2510, 8601 Adelphi Road, College Park, MD 20740.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by this system include persons who request OGIS assistance in connection with the filing of a Freedom of Information (FOIA) and/or Privacy Act request or appeal to any Federal department or agency.

CATEGORIES OF RECORDS IN THE SYSTEM:

The OGIS case files include: correspondence, case notes, FOIA and Privacy Act request letters, appeal letters, agency replies to original requests and appeals, supporting documents, research, and other administrative forms used in the process. These files may also contain information or determinations furnished by, and correspondence with, other Federal agencies. OGIS case files may contain some or all of the following information about an individual: name, address, telephone number, e-mail address, Federal inmate register number, research interests, other information provided by the requester and by other agencies, and copies of documents furnished to the requester.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 552a(a)(3), as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

OGIS maintains case files on individuals to record: requests for assistance, actions taken on cases; and,

the status of cases in logs and databases. In addition, OGIS also serves as the FOIA Ombudsman in connection with its mission to review agency compliance with the FOIA. In this role, OGIS will capture and address systematic problems in FOIA administration as such individual case problems may serve as one of the bases to establish current systematic trends in the process. For this latter function, OGIS will remove personal information and use the remaining information collected for statistical purposes.

OGIS may disclose information in case files to agencies that have an equity in the subject FOIA and/or Privacy Act request and/or appeal in order for those agencies to participate in informal or formal mediation efforts. The routine use statements A, E, F, G and H, described in Appendix A following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and electronic records.

RETRIEVABILITY:

Information in OGIS case files may be retrieved by one or more of the following data elements: the name of the individual and an alphanumeric case file number.

SAFEGUARDS:

OGIS case files are at all times maintained in buildings with security guards or secured doors, and all entrances are monitored by electronic surveillance equipment. During business hours, paper records are accessible only by authorized NARA personnel. Electronic records are accessible via passwords from terminals located in attended offices. After business hours, or when OGIS personnel are not present in the offices, the OGIS offices are secured in addition to building security.

RETENTION AND DISPOSAL:

OGIS case files are temporary records and are destroyed in accordance with the disposition instructions in the NARA records schedule contained in FILES 203, the NARA Files Maintenance and Records Disposition Manual. Individuals may request a copy of the disposition instructions from the NARA Privacy Act Officer.

SYSTEM MANAGER(S) AND ADDRESS:

For OGIS case files, the system manager is the Director of the OGIS, Room 2510, 8601 Adelphi Road, College Park, MD 20740.

NOTIFICATION PROCEDURE:

Individuals interested in inquiring about their records should notify the NARA Privacy Act Officer, whose address is listed above and in Appendix B to the Privacy Act of 1974 Republication of Systems of Records Notice (72 FR 56570, October 3, 2007).

RECORD ACCESS PROCEDURES:

Individuals who wish to gain access to their records should submit their request in writing to the NARA Privacy Act Officer at the address listed in Appendix B.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR part 1202.

RECORD SOURCE CATEGORIES:

Information in OGIS case files is obtained from persons who request assistance in connection with the submission of a FOIA and/or Privacy Act request or appeal to a Federal agency, and from agencies that have acted on the request or appeal.

BILLING CODE 7515–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95–541)

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by September 2, 2010. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy at the above address or (703) 292–7405.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

The applications received are as follows:

Permit Application No. 2011–009

1. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennaial, CO 80112.

Activity for Which Permit is Requested: Take. The applicant plans herd or remove seals and seabirds who venture onto McMurdo Station roads, airstrips and ice pier when they pose operational safety concerns as well as potential harm to the animals. Herding and removal activities will be conducted in accordance with "Wildlife Removal" standard operating procedures, which includes notification to station authorities and reporting such herding and removal activities to the Permit Office.

Location: McMurdo Station roads, airstrips, and ice pier.

Dates: September 1, 2010 to August 31, 2015.

Permit Application No. 2011–010

2. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Take. The applicant plans herd or remove seals and seabirds who venture onto the Palmer Station pier and other operational areas when they pose operational safety concerns as well as potential harm to the animals. Herding and removal activities will be conducted by station management and science personnel in a non-lethal and humane manner in order to cause as little disturbance as possible.

Location: Palmer Station pier and operational areas.

Dates September 1, 2010 to August 31, 2015.

Permit Application No. 2011–011

3. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Enter Antarctic Specially Protected Area. The applicant plans to enter Avian Island (ASPA 117) in support of research work conducted at the NOAA marine mammal research facility. Activities to be performed are the movement of personnel and supplies from ship to shore via zodiac or small boat, opening and closing tasks for the research facilities on shore, and maintenance and servicing of on-shore facilities and equipment.

Location: Avian Island (ASPA 117).

Dates: September 1, 2010 to August 31, 2015.

Permit Application No. 2011–012

4. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Enter Antarctic Specially Protected Area. The applicant plans to enter Cape Shirreff (ASPA 149) in support of research work conducted at the NOAA marine mammal research facility. Activities to be performed are the movement of personnel and supplies from ship to shore via zodiac or small boat, opening and closing tasks for the research facilities on shore, and maintenance and servicing of on-shore facilities and equipment.

Location Cape Shirreff (ASPA 149).

Dates September 1, 2010 to August 31, 2015.

Permit Application No. 2011–013

5. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Enter Antarctic Specially Protected Area. The applicant plans to enter "Copacabana" research site on the Western Shore of Admiralty Bay, King George Island (ASPA 128) in support of research work conducted at the USAP research facility. Activities to be performed are the movement of personnel and supplies from ship to shore via zodiac or small boat, opening and closing tasks for the research facilities on shore, and maintenance and servicing of on-shore facilities and equipment.

Location: Cape Shirreff (ASPA 128).

Dates: September 1, 2010 to August 31, 2015.

Permit Application No. 2011–014

6. *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Enter Antarctic Specially Protected Area. The applicant plans to enter Beaufort Island (ASPA 105), Cape Royds (ASPA 121), Arrival Heights (ASPA 122), Cape Crozier (ASPA 124), Tramway Ridge (ASPA 130), Canada Glacier (ASPA 131), Linnaeus Terrance (ASPA 138), and Botany Bay (ASPA 154) to review the sites' management plans and verify that the values being protected are maintained. Article 6.3 of Annex V to the Madrid Protocol requires "A review of the (ASPA) Management Plan shall be initiated at least every five years. The plans will be updated as necessary." The USAP Environmental team members will enter the sites in anticipation of the 5 year ASPA review, or to address any environmental concern or potential environmental release within the ASPA.

Location: Beaufort Island (ASPA 105), Cape Royds (ASPA 121), Arrival Heights (ASPA 122), Cape Crozier (ASPA 124), Tramway Ridge (ASPA 130), Canada Glacier (ASPA 131), Linnaeus Terrance (ASPA 138), and Botany Bay (ASPA 154)

Dates: September 1, 2010 to August 31, 2015.

Permit Application No. 2011–015

7 *Applicant:* Sam Feola, Director, Raytheon Polar Services Company, 7400 South Tucson Way, Centennial, CO 80112.

Activity for Which Permit is Requested: Enter Antarctic Specially Protected Area. The applicant plans to enter Litchfield Island (ASPA 113) to remove (for inspection and resupply) the survival cache located on Litchfield Island, and to return the cache. This cache is a requirement for boating safety purposes. Additionally, ongoing assessment of the ASPA notification signs at the three primary landing sites on the island is required.

Location: Litchfield Island (ASPA 113).

Dates: September 1, 2010 to August 31, 2015.

Nadene G. Kennedy,

Permit Officer, Office of Polar Programs.

[FR Doc. 2010–19028 Filed 8–2–10; 8:45 am]

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC–2010–0235]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The NRC invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* 10 CFR Part 39—Licenses and Radiation Safety Requirements for Well Logging.

2. *Current OMB approval number:* 3150–0130.

3. *How often the collection is required:* Applications for new licenses and amendments may be submitted at any time. Applications for renewal are submitted every 10 years. Reports are submitted as events occur.

4. *Who is required or asked to report:* Applicants for and holders of specific licenses authorizing the use of licensed radioactive material for well logging.

5. *The number of annual respondents:* 278 (34 NRC Licensees + 244 Agreement State Licensees).

6. *The number of hours needed annually to complete the requirement or request:* 60,296 hours (7,375 total NRC licensees hrs + 52,921 total Agreement State licensees hrs). The NRC licensees total burden is 7,375 hours (108 reporting hrs + 7,267 recordkeeping hrs). The Agreement State licensees total burden is 52,921 hours (767 reporting hrs + 52,154 recordkeeping hrs). The average burden per response for both NRC licensees and Agreement State licensees is 3.2 hours and the burden per recordkeeper is 214 hours.

7. *Abstract:* 10 CFR part 39 establishes radiation safety requirements for the use of radioactive material in well logging operations. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct

material is in compliance with license and regulatory requirements.

Submit, by October 4, 2010 comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, Maryland 20852. OMB clearance requests are available at the NRC worldwide Web site: *http://www.nrc.gov/public-involve/doc-comment/omb/index.html.* The document will be available on the NRC home page site for 60 days after the signature date of this notice. Comments submitted in writing or in electronic form will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed. Comments submitted should reference Docket No. NRC–2010–0235. You may submit your comments by any of the following methods. Electronic comments: Go to *http://www.regulations.gov* and search for Docket No. NRC–2010–0235. Mail comments to NRC Clearance Officer, Tremaine Donnell (T–5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. Questions about the information collection requirements may be directed to the NRC Clearance Officer, Tremaine Donnell (T–5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, by telephone at 301–415–6258, or by e-mail to *INFOCOLLECTS.Resource@NRC.GOV.*

Dated at Rockville, Maryland, this 26th day of July, 2010.

For the Nuclear Regulatory Commission.

Tremaine Donnell,

NRC Clearance Officer, Office of Information Services.

[FR Doc. 2010–19013 Filed 8–2–10; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2010–0229]

Draft Regulatory Guide, DG–1216,"Plant-Specific Applicability of Transition Break Size Specified in 10 CFR 50.46a." Issuance, Availability; Extension of Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of comment period.

FOR FURTHER INFORMATION CONTACT: Robert Tregoning, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone 301–251–7662, or e-mail *Robert.Tregoning@nrc.gov.*

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is extending the public comment period for DG–1216 from August 25, 2010 to November 8, 2010.

DATES: The comment period closes on November 8, 2010.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC–2010–0229 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site *Regulations.gov.* Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.

Federal Rulemaking Web site: Go to *http://www.regulations.gov* and search for documents filed under Docket ID NRC–2010–0229. Address questions about NRC dockets to Carol Gallagher 301–492–3668; e-mail *Carol.Gallagher@nrc.gov.*

Mail comments to: Cindy K. Bladey, Chief, Rules, Announcements, and Directives Branch (RADB), Division of Administrative Services, Office of Administration, Mail Stop: TWB–05–B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, or by fax to RDB at (301) 492–3446.

You can access publicly available documents related to this notice using the following methods:

NRC's Public Document Room (PDR): The public may examine and have copied for a fee publicly available documents at the NRC's PDR, Public File Area C1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

NRC's Agencywide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/reading-rm/adams.html.* From this page, the public can gain entry into ADAMS, which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's PDR reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr.resource@nrc.gov.* The Draft Regulatory Guide, DG–1216, "Plant-Specific Applicability of Transition Break Size Specified in 10 CFR 50.46a," is available electronically under ADAMS Accession Number ML100430356.

SUPPLEMENTARY INFORMATION: On June 28, 2010 (75 FR 36700), the NRC published a notice of issuance and availability of Draft Regulatory Guide DG–1216, "Plant-Specific Applicability of Transition Break Size Specified in 10 CFR 50.46a." By letter dated July 13, 2010, the Nuclear Energy Institute (ADAMS Accession No. ML102070019) requested an extension of the stated comment period for the purpose of gathering input from personnel with varied technical expertise. It is the desire of the NRC to receive comments of a high quality from all stakeholders. Several factors have been considered in granting an extension. 10 CFR 50.46a will be an optional regulation for licensees, the requested comment period extension is within the rulemaking period, and the rule encompasses complex technical bases. Therefore the comment submittal period is extended from the original date of August 25, 2010 to November 8, 2010.

Dated at Rockville, Maryland, this 26th day of July, 2010.

For the Nuclear Regulatory Commission.

Harriet Katagiannis,

Acting Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2010–19016 Filed 8–2–10; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2009–0303]

Notice of Availability of Interim Staff Guidance Document for Fuel Cycle Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Tamara D. Powell, Nuclear Process Engineer, Technical Support Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20005–0001. Telephone: (301) 492–3211; Fax: (301) 492–3363; E-mail: *Tamara.Powell@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) prepares and issues Interim Staff Guidance (ISG) documents for fuel cycle facilities. These ISG documents provide clarifying guidance to the NRC staff when reviewing licensee's integrated safety analyses (ISA), license applications, amendment requests, or other related licensing activities for fuel cycle facilities under Title 10 of the *Code of Federal Regulations* (10 CFR) Part 70. This notice is being published to inform the public that after general revision based on NRC staff and public comment, FCSS–ISG–12, Revision 0, "10 CFR Part 70, Appendix A—Reportable Safety Events," Revision 0, has been issued and is provided for information, however additional comments will be accepted. The final disposition of the information addressed in this guidance may later be issued as an NRC Regulatory Guide.

II. Discussion of Significant Comments and Changes

On July 10, 2009, notice was given in the **Federal Register** (74 FR 33281) of the availability for public comment of the draft of FCSS–ISG–12 (then numbered FCSS–ISG–11). In response to comments received on the draft ISG, the following modifications were made.

The NRC made minor editorial changes and re-numbered the ISG to be consistent with existing Fuel Cycle Safety and Safeguards ISG documents. In addition, there was a general comment from one commentator about the NRC's interpretation of when event "discovery" occurs. The commentator considers event "discovery" to have occurred after the initial event has been observed, appropriate internal notifications made, and a licensee determination made that the event meets the applicable reporting requirements. The commentator further believes that the time of "discovery" will vary because it is driven by the culmination of three actions, and, as such, should not be determined based solely upon the occurrence of the actual event or the observation. The NRC agrees that event "discovery" will vary and starts when an individual who, by position or experience, is expected to understand that a particular condition or event adversely impacts safety observes, identifies, or is notified of a safety significant event or condition. The NRC, however, does not agree that the time of "discovery" is delayed until after the licensee has determined reportability. As stated in the guidance, the twenty-four hour time period for reportable events allows for this evaluation and determination step. The more substantive comments on the draft ISG are summarized below along with the NRC's response.

Proposed Time of Discovery Section

Some general editorial comments were suggested by the commentator related to the event "discovery" concern discussed above; however, the NRC determined that the proposed changes in wording could create ambiguity so no changes were made. There was also a recommendation that the third example in Table 1, "Examples of Discovery Determination," be changed to state that the time of "discovery" would be when the operator informed the supervisor of the possible exposure not when the operator realized that he would have been exposed. The staff reviewed the suggested revision and determined that a cognizant individual, as defined earlier in the guidance, may not necessarily be aware of the NRC reporting requirements, but should understand when a condition impacts safety. The NRC expects that operators would be trained to recognize, when possible, when they may have received an acute exposure to a hazardous material such as UF_6, therefore no change to the wording was made.

Loss or Degradation of Items Relied on for Safety (IROFS) Section

The last sentence of this section states that all situations where IROFS have failed or degraded are reportable. One commentator suggested that this section be edited to remove this statement because IROFS may have failed or become degraded without meeting the reporting requirement. The NRC disagreed with removing this statement, but rearranged the section for clarity. The intent of "all other situations" in the sentence in question was meant to apply to those situations not discussed in the section.

Inadequate ISA Section

The NRC did not receive any comments on this section, however substantial edits were made. The use of the concept "creditable controls" and the term "non-IROFS" were removed from this section. 10 CFR 70.61 (e) requires that the controls needed to meet the performance requirements be designated as IROFS. The NRC determined that using "non-IROFS" in combination with available IROFS to meet the performance requirements was not supported by the regulations.

Press Release Section

With respect to licensee-issued press releases, the guidance states that routine radiation releases are not specifically reportable under Appendix A unless the release receives media attention. One commentator indicated that 10 CFR Part 70 licensees issue semi-annual reports on effluent releases which are routine radiation releases of low safety significance. The commentator felt that simple media inquiries about these routine radiation releases should not result in a required report to the NRC. The regulation states that, "[a]ny event or situation related to the health and safety of the public or onsite personnel, or protection of the environment, for which a news release is planned…shall be reported." In the example of an effluent release which has some impact on the environment, media attention would likely result and should be reported. The NRC agrees that simple media inquiries may not necessarily result in reportability, but if a news release is planned in response to such inquiries, this would be reportable. The NRC revised the section to clarify that radiation releases that receive "significant media attention" would be reportable under paragraph (c) of Appendix A to 10 CFR Part 70.

Attachment C

The commentator provided a suggested revision to the flow chart in Attachment C. The NRC reviewed the suggested changes and determined that if followed, the revised flow chart would lead to the failure to report under paragraph (a)(5) of Appendix A. Therefore, the NRC did not incorporate the suggested revisions and removed the flow chart from the ISG.

Glossary Section

The NRC agreed with the commentator that the definition for "degraded IROFS" should be modified to ensure consistency of use throughout the guidance. The NRC incorporated, in part, the suggested change. The NRC did not incorporate that portion of the suggested change which would have stated that a degraded IROFS was also an IROFS that is "potentially unable to perform the required safety function." The NRC determined that an IROFS meeting this part of the definition would, in many cases, be considered a failed IROFS and did not include this portion in the revision. The NRC also removed the definitions of "non-IROFS" and "creditable control" for the reasons discussed earlier in this notice.

III. Further Information

The NRC maintains an Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. These documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at *http://www.nrc.gov/reading-rm/adams.html.* The ADAMS accession number for the document related to this notice is provided in the following table.

Interim staff guidance	ADAMS accession No.
FCSS Interim Staff Guidance-12, Revision 0	ML102020267

This document may also be viewed electronically on the public computers located at the NRC's PDR, O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC Public Document Room (PDR) reference staff at 1(800) 397–4209, (301) 415–4737, or via e-mail to *pdr@nrc.gov.*

Dated at Rockville, Maryland, this 21 day of July 2010.

For the Nuclear Regulatory Commission.

Marissa G. Bailey,

Deputy Director,Special Projects and Technical Support Directorate, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62573; File No. 4–533]

Joint Industry Plan; Notice of Filing and Immediate Effectiveness of Amendment to the National Market System Plan for the Selection and Reservation of Securities Symbols To Add EDGA Exchange, Inc. and EDGX Exchange, Inc., Each as a Party Thereto

July 26, 2010.

Pursuant to Section 11A(a)(3) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 608 thereunder,[2] notice is hereby given that on July 7, 2009, EDGA Exchange, Inc. ("EDGA") and EDGX Exchange, Inc. ("EDGX") filed with the Securities and Exchange Commission ("Commission") an amendment to the National Market System Plan for the Selection and Reservation of Securities Symbols ("Symbology Plan" or "Plan").[3] The amendment proposes to add EDGA and EDGX, each as a party to the Symbology Plan. The Commission is publishing this notice to solicit comments on the proposed amendment from interested persons.

I. Description and Purpose of the Amendment

The current parties to the Symbology Plan are BATS Exchange, Inc. ("BATS"), NASDAQ OMX BX, Inc. ("BSE"), Chicago Board Options Exchange, Incorporated ("CBOE"), CHX, FINRA, the International Securities Exchange, LLC ("ISE"), Nasdaq, New York Stock Exchange LLC ("NYSE"), NYSE Arca, Inc. ("NYSE Arca"), NYSE Amex LLC ("NYSE Amex") (f/k/a "NYSE Alternext US LLC" ("NYSE Alternext")), NSX and Phlx.[4] The proposed amendment to the Symbology Plan would add EDGA and EDGX, each as a party to the Symbology Plan. A self-regulatory organization ("SRO") may become a party to the Symbology Plan if it satisfies the requirements of Section I(c) of the Plan. Specifically, an SRO may become a party to the Symbology Plan if: (i) It

[1] 15 U.S.C. 78k–1(a)(3).

[2] 17 CFR 242.608.

[3] On November 6, 2008, the Commission approved the Symbology Plan that was originally proposed by the Chicago Stock Exchange, Inc. ("CHX"), The Nasdaq Stock Market, Inc. ("Nasdaq"), National Association of Securities Dealers, Inc. ("NASD") (n/k/a Financial Industry Regulatory Authority, Inc. ("FINRA")), National Stock Exchange, Inc. ("NSX"), and Philadelphia Stock Exchange, Inc. ("Phlx"), subject to certain changes. *See* Securities Exchange Act Release No. 58904, 73 FR 67218 (November 13, 2008) (File No. 4–533).

[4] On November 18, 2008, ISE filed with the Commission an amendment to the Plan to add ISE as a member to the Plan. *See* Securities and Exchange Act Release No. 59024 (November 26, 2008), 73 FR 74538 (December 8, 2008) (File No. 4–533). On December 22, 2008, NYSE, NYSE Arca, and NYSE Alternext ("NYSE Group Exchanges") and CBOE filed with the Commission amendments to the Plan to add the NYSE Group Exchanges and CBOE as members to the Plan. *See* Securities Exchange Act Release No. 59162 (December 24, 2008), 74 FR 132 (January 2, 2009) (File No. 4–533). On December 24, 2008, BSE filed with the Commission an amendment to the Plan to add BSE as a member to the Plan. *See* Securities Exchange Act Release No. 59187 (December 30, 2008), 74 FR 729 (January 7, 2009) (File No. 4–533). On September 30, 2009, BATS filed with the Commission an amendment to the Plan to add BATS as a member to the Plan. *See* Securities Exchange Act Release No. 60856 (October 21, 2009), 74 FR 55276 (October 27, 2009) (File No. 4–533).

maintains a market for the listing or trading of Plan Securities [5] in accordance with rules approved by the Commission, which securities are identified by one, two, or three character symbols, on the one hand, or four or five character symbols, on the other hand, in each case prior to any suffix or special conditional identifier; (ii) it signs a current copy of the Plan; and (iii) it pays to the other parties a proportionate share of the aggregate development costs, based upon the number of symbols reserved by the new party during the first twelve (12) months of such party's membership.[6]

EDGA and EDGX have submitted a signed copy of the Symbology Plan to the Commission in accordance with the requirement set forth in the Symbology Plan regarding new parties to the plan.

II. Effectiveness of the Proposed Symbology Plan Amendment

The foregoing proposed Symbology Plan amendment has become effective pursuant to Rule 608(b)(3)(iii) [7] because it involves solely technical or ministerial matters. At any time within sixty days of the filing of the amendment, the Commission may summarily abrogate the amendment and require that it be refiled pursuant to paragraph (b)(1) of Rule 608,[8] if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanisms of, a national market system or otherwise in furtherance of the purposes of the Act.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the amendment is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number 4–533 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number 4–533. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of EDGA and EDGX. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number 4–533 and should be submitted on or before August 24, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62580; File No. SR–NYSEArca–2010–69]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change Amending Rule 6.47

July 28, 2010.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the "Act") [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 20, 2010, NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.47 to describe new procedures for executing a cross transaction. The text of the proposed rule change is attached as Exhibit 5 to the 19b-4 form. A copy of this filing is available on the Exchange's Web site at *http://www.nyse.com,* at the Exchange's principal office, on the Commission's Web site at *http://www.sec.gov,* and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE Arca proposes to modify Rule 6.47(a) to describe new procedures for Floor Brokers wishing to execute a Non-Facilitation cross transaction.[4] Currently, after requesting a market, Floor Brokers are required to disclose the terms of a cross, after which Market Makers are allowed to revise their bids and offers to block the cross.

NYSE Arca proposes that Market Makers, after being informed of a potential cross, should provide their best bid and best offer, but not be allowed to step ahead of subsequently disclosed trading interest. The Exchange

[4] Facilitation Crosses are governed by Rule 6.47(b), and are not affected by this proposal.

intends for Market Makers to make markets and not prevent better priced trading interests from interacting with each other.

The proposed rule change would allow a Floor Broker to request, without revealing the size of the orders, a final quote for a cross from the Trading Crowd, and then to cross above the highest bid, or below the lowest offer, and, if not on a price provided by the Crowd, to execute the cross in its entirety. If the cross were to take place on the price provided by the Crowd, the Floor Broker would be obligated to trade with that interest prior to crossing the orders. The cross would be required to be within the National Best Bid/Offer, and would also be obligated to satisfy any bids or offers in the Consolidated Book equal to or better than the crossing price.

For example, if the prices of the orders to be crossed allowed for a range of possible crossing prices, and the Trading Crowd provided a final quote that was two or more Minimum Price Variations ("MPV") wide, the Floor Broker could bid above the Trading Crowd's bid and consummate the cross without trading on a final quote price.

If, alternatively, the final quote was only one MPV wide, (*i.e.,* 3.10 bid for 20 contracts at 3.20 offer for 50 contracts) the Floor Broker could not meet the obligation to the orders without trading on a final quote price. In this case, the Floor Broker would bid above the final quote bid (*i.e.,* bid 3.20) or offer below the final quote offer (*i.e.,* offer at 3.10), each instance of which is equal to a final quote price. The Floor Broker would then be obligated to trade with the final quote interest at that price (*i.e.,* buy 50 at 3.20 or sell 20 at 3.10) before crossing the balance of the orders.

Additionally, if, because of movement in the markets while the order was being brought to the crowd, the limit on one of the orders only allowed for a cross to be effected at a final quote price, regardless of the width of the final quote, the Floor Broker would be required to bid above the final quote bid or offer below the final quote offer yet still be at a final quote price. Again, the Floor Broker would be obligated to trade with the final quote interest at that price before crossing the balance of the orders. For instance, the electronic market in the series is 3.00 bid offered at 3.30, and the Floor Broker receives orders to cross at 3.10 or 3.20. When the Floor Broker requests a Final Quote, the crowd responds with a market of 3.20 bid at 3.30. In order to meet the obligation to execute the order, the Floor Broker would have to offer at 3.20, fill the bids in the crowd at 3.20, and then cross the balance of the orders.

Additionally, the Exchange proposes to add two commentaries to Rule 6.47. Commentary .01 would allow an OTP Holder to submit an order that has been solicited prior to transmittal to the Floor, but would not allow the new procedures to be used to circumvent limitations on principal transactions as described in Rule 6.47A, nor allow the OTP Holder to solicit a contra order from an NYSE Arca Market Maker assigned to the class of options to trade against an agency order.

Commentary .02 would state it is a violation of a Floor Broker's duty for best execution to cancel an agency order to avoid execution at a better price.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with and furthers the objectives of Section 6(b)(5) of the Act, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change will provide encouragement for Market Makers to provide their best prices earlier, upon the initial presentation of trading interest to the crowd, and the broker will be required to better the crowd's price in order to execute the cross transaction. The proposed new process should thus increase the possibility of price improvement for Customer orders.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2010–69 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2010–69. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–

NYSEArca–2010–69 and should be submitted on or before August 24, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[5]

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–62584; File No. SR–FINRA–2010–035]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of Proposed Rule Change Amendments to the Discovery Guide and Rules 12506 and 12508 of the Code of Arbitration Procedure for Customer Disputes

July 28, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 12, 2010, the Financial Industry Regulatory Authority, Inc. ("FINRA") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend the Discovery Guide, which includes Document Production Lists, and to make conforming changes to Rules 12506 and 12508 of the Code of Arbitration Procedure for Customer Disputes ("Customer Code").

The text of the proposed rule change is available on FINRA's Web site at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA proposes to revise the Discovery Guide ("Guide") to expand the guidance FINRA gives to parties and arbitrators on the discovery process and to update the Document Production Lists ("Lists"). The proposal includes conforming changes to Rules 12506 and 12508 of the Customer Code.

Background

The SEC approved the current Guide in 1999 and FINRA made it available for use in arbitration proceedings involving customer disputes upon the publication of Notice to Members (NTM) 99–90 (November 1999). The Guide provides guidance to parties on which documents parties should exchange without arbitrator or staff intervention, and to arbitrators in determining which documents customers and member firms or associated persons are presumptively required to produce in customer arbitrations.

In March 2004, FINRA determined to review the Guide and consider whether FINRA should update the Guide after more than four years of use. A FINRA Advisory Committee, the National Arbitration and Mediation Committee ("NAMC"), conducted the review. The NAMC is a majority public committee made up of attorneys who represent investors, attorneys who represent brokerage firms, arbitrators, and mediators. In addition, FINRA staff met with other frequent users of the forum representing both the public and the industry to listen to the concerns of each side about the current lists, their proposals for changes, and their reactions to other constituents' proposals. FINRA worked for three years to build a consensus on revisions to the Guide.

In 2008, FINRA filed a proposed rule change with the SEC to update the Guide ("the 2008 proposal"). The 2008 proposal added clarifying and conforming language to the introduction in the Guide and updated the Lists. The SEC received 53 comment letters on the 2008 proposal that clearly signaled that the consensus reached on revisions to the Guide was not broad enough. In light of the comment letters, FINRA withdrew the filing.[3]

FINRA staff drafted a new Guide which would replace the current Guide in its entirety. The starting point was the 2008 proposal and the comment letters submitted to the SEC on the 2008 proposal. NAMC members shared the staff's draft with interested parties including, among others, attorneys who represent investors, in-house counsel at brokerage firms, and attorneys who handle investor claims at Law School clinics. The NAMC recommended that FINRA appoint a Subcommittee to review the proposal. The Subcommittee, comprised of public and industry NAMC members, reached consensus on a number of revisions to the Guide. The NAMC reviewed the Subcommittee's recommended changes and agreed to make additional revisions. The proposed rule change incorporates the NAMC's suggested revisions.

Commenters on the 2008 proposal suggested that it may be appropriate to eliminate the Lists for specific types of claims since claimants are not required to plead causes of action under the Customer Code. In response to these comments, FINRA proposes to replace the 14 current Lists (two general Lists and 12 separate Lists for specific types of claims) with two Lists. The Lists identify "presumptively discoverable" documents—one for firms/associated persons to produce and one for customers to produce. Although each item on the Lists (with a few exceptions) would be presumptively discoverable in every customer case, parties can still urge that certain documents should not be discoverable. Likewise, parties can ask arbitrators to order production of additional documents that are not on the Lists. The proposed rule change emphasizes that arbitrators retain the flexibility necessary to tailor the Guide to the facts and circumstances of each case. This is especially important because, with the reduction of the Lists from 14 to two, production is no longer dependent on the nature of the claim.

Proposed Revisions to the Guide's Introduction

FINRA is proposing a number of revisions to the Guide's introduction that expand the guidance given to parties and arbitrators on the discovery process generally and clarify how arbitrators should apply the Guide in arbitration proceedings.

The current Guide states that it does not intend to remove the arbitrators' and parties' flexibility in the discovery

[5] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] FINRA filed SR–FINRA 2008–024 on June 11, 2008 and withdrew the filing on May 21, 2009.

process and that arbitrators can order parties to produce documents that are not on the Lists or alter the parties' production schedule. FINRA would revise the introduction to add that arbitrators also can order that parties do not have to produce certain documents on the Lists. The proposed revision would add clarity to the Guide by indicating that the arbitrator's flexibility also includes the ability to order that parties do not have to produce particular documents.

FINRA is proposing to add guidance on how arbitrators should handle objections based on cost or burden of production. The introduction would state that if a party demonstrates that the cost or burden is disproportionate to the need for the document, the arbitrators should determine if the document is relevant or likely to lead to relevant evidence. If the arbitrators determine that the document is relevant or likely to lead to relevant evidence they should consider whether there are alternatives that can lessen the impact of production, such as narrowing the time frame or scope of an item, or determining whether another document can provide the same information. Since FINRA is proposing to require production of most of the List items in every case, it is important to emphasize that arbitrators may consider alternative ways to facilitate discovery. FINRA believes the discussion will help arbitrators to balance the parties' discovery needs with the need to keep the arbitration process expeditious and cost effective.

FINRA is proposing to move to the introduction the content in current footnote one, which explains that only parties must produce documents pursuant to the Guide. FINRA is not proposing to make any substantive changes to the content of the footnote.

FINRA is proposing to state that certain items on the Lists may not be relevant in a particular case when the firm's business model (*e.g.,* full service firm, discount broker, or online broker) is considered. FINRA members create and retain various documents for business and regulatory purposes. Depending on how a firm operates, a particular item on the Lists may or may not be relevant. The proposed addition to the introduction would enhance the Guide because it makes parties and arbitrators aware that it is appropriate to recognize firm differences during the discovery process.

FINRA considers electronic files to be documents within the meaning of the Guide. FINRA is proposing to update the Guide by expressly stating that electronic files are documents within the meaning of the Guide and that arbitrators shall decide any disputes that arise about the form in which a party produces a document.

Commenters on the 2008 proposal expressed concerns that FINRA does not give arbitrators and parties enough guidance about what information they should treat as confidential. The commenters asked FINRA to incorporate into the Guide language from an article in FINRA's newsletter for arbitrators and mediators, the *Neutral Corner,*[4] that advises arbitrators that the party asserting confidentiality in the discovery process has the burden of establishing that the documents require confidential treatment and enumerates factors that arbitrators should consider when deciding questions about confidentiality. In response to the comments, FINRA is proposing to expand the discussion on confidentiality in the Guide to include the statement relating to the burden of establishing that documents require confidential treatment and to enumerate factors that arbitrators should consider when deciding questions about confidentiality. The factors include:

- Whether the disclosure would constitute an unwarranted invasion of personal privacy (*e.g.,* an individual's Social Security number, or medical information);
- Whether there is a threat of harm attendant to disclosure of the information;
- Whether the information contains proprietary confidential business plans and procedures or trade secrets;
- Whether the information has previously been published or produced without confidentiality or is already in the public domain;
- Whether an excessively broad confidentiality order could be against the public interest or could otherwise impede the interests of justice; and
- Whether there are legal or ethical issues which might be raised by excessive restrictions on the parties.

Currently, if a party states that no responsive documents for a particular item "exist," and the requesting party asks for an affirmation to that effect, the responding party is required to make such an affirmation. FINRA is proposing to delete the word "exist" and to refer instead to documents "in the party's possession, custody, or control." FINRA believes that "exist" is vague and that the new phrase would add clarity to the Guide by explaining which documents parties are required to produce. FINRA would clarify that, in appropriate cases, the arbitrators may order a party to provide an affirmation regarding a discovery request for documents beyond those contained in the Guide. FINRA also proposes to revise the Guide to emphasize that parties are not required to create documents in response to items on the Lists that are not already in the parties' possession, custody, or control.

List 1—Documents the Firm/Associated Persons Shall Produce in All Customer Cases

The documents identified in each numbered item are presumptively discoverable in every case unless the item specifically limits production to a specific type of claim. To distinguish between customers who are parties to an arbitration and other customers of a brokerage firm, the discussion below refers to customer parties as "claimants" throughout.

Proposed List 1, Item 1—In the current Guide, firms/associated persons are required to produce agreements with claimants relating to account opening documents, and new account forms, cash, margin, and option agreements, trading authorizations, discretionary authorizations, and powers of attorney (see current List 1, Item 1). FINRA is also proposing to expand this item to require firms/associated persons to produce account record information (including the claimants' names, tax identification numbers, addresses, telephone numbers, dates of birth, employment statuses, annual incomes, net worth, and account investment objectives) and documents relating to the claimants' risk tolerance. The account record contains information about the claimants that the firm recorded. The record also indicates whether the associated persons responsible for the account signed the record and whether a principal at the firm approved or accepted the record.

Proposed List 1, Item 2—The current Guide requires firms/associated persons to produce all correspondence between the claimants and the firm/associated person relating to the transactions at issue (see current List 1, item 5). Firms/associated persons are also required to produce account statements for the claimants' accounts (see current List 1, Item 2) and confirmations for the claimants' transactions at issue (see current List 1, Item 3).

FINRA is proposing to add clarity to the item by: (1) Specifying that the required documents are those that were sent to the claimants or received by the firm and relate to the accounts or

[4] The article, *Arbitrators and Orders of Confidentiality,* The Neutral Corner, April 2004, is available at: *http://www.finra.org/ArbitrationMediation/Neutrals/Education/NeutralCorner/P010040.*

transactions at issue; and (2) specifying that firms/associated persons are required to produce, among other documents, those that relate to asset allocation, diversification, trading strategies, and market conditions.

Commenters on the 2008 proposal requested that FINRA require firms/associated persons to produce statement inserts and marketing materials if requested. In response to the commenters' request, FINRA proposes to expand the item to require firms/associated persons to produce all advertising materials sent to customers of the firm that refer to the securities and/or account types that are at issue. This addition would provide claimants with documents the firm disseminated which advertised the specific products or account types that are at issue in the case, without requiring firms to produce all generic materials sent to all customers.

FINRA is proposing to eliminate the requirement that firms/associated persons produce account statements for the claimants' accounts and confirmations for the claimants' transactions at issue. In many instances, the claimants have retained account statements and/or confirmations, and requiring production of these documents in every case adds unnecessary delay and cost to the discovery process. If necessary, the claimants may request these documents separately.

Proposed List 1, Item 3—FINRA is proposing to require firms/associated persons to produce documents evidencing investment or trading strategies utilized or recommended in the claimants' accounts, including, but not limited to, options programs, and any supervisory review of such strategies. This new item in the Guide would ensure that claimants have access to evidence of trading strategies utilized or recommended that the firm/associated persons may not have publicly disseminated. The proposal also provides claimants with documentation of any management supervision over the accounts.

Proposed List 1, Item 4—In the current Guide, for claims alleging unauthorized trading, firms/associated persons are required to produce the documents they relied on to establish that claimants authorized the transactions at issue (See current List 11, Item 3). For claims alleging unauthorized trading, the proposed Guide would also require firms/associated persons to produce all documents relating to the claimants' authorization of transactions. This addition acknowledges that there may be documents in addition to those relied on by the firm that are relevant or could lead to relevant evidence.

Proposed List 1, Item 5—The current Guide requires firms/associated persons to produce, for specified claim types, all materials prepared or used by the firm/associated persons relating to the transactions or products at issue, including research reports, prospectuses, and other offering documents such as documents intended or identified as being "for internal use only," and worksheets or notes indicating the associated persons reviewed or read such documents. As an alternative, the firm/associated persons may produce a list of such documents that contains sufficient detail for the claimants to identify each document listed. Upon request by a party, the firm/associated persons are required to provide any documents identified on that alternative list (see current List 7 titled Misrepresentation/Omissions, List 9 titled Negligence/Breach of Fiduciary Duty, and List 13, Item 1 relating to claims alleging unsuitability).

FINRA is proposing to add clarity to this item by specifying that, in addition to materials prepared or used by the firm/associated persons, the firm/associated persons must produce the materials provided to the claimants. The amendments would also require production of sales materials and performance or risk data. FINRA is proposing to delete the alternative two-step production procedure to reduce delays in the discovery process.

Proposed List 1, Item 6—The current Guide requires firms/associated persons to produce all notes, including entries in any diary or calendar, relating to the claimants' accounts at issue (see current List 1, Item 6). FINRA is proposing to expand the scope of the item by requiring production of notes relating to the claimants in addition to the claimants' accounts or transactions at issue. For example, notes about the claimants' other accounts may provide evidence in the case.

Proposed List 1, Item 7—The current Guide requires firms/associated persons to produce records relating to the claimants' accounts at issue, such as internal reviews and exception and activity reports, which reference the claimants' accounts at issue (see current List 1, Item 11). FINRA is proposing to clarify the item by specifying that firms/associated persons would be required to produce notes or memoranda evidencing supervisory, compliance, or managerial review of the claimants' accounts or trades for the period at issue. The item would also require production of correspondence between the claimants and the firm/associated persons relating to the claimants' accounts or transactions that bear indications of managerial, compliance, or supervisory review of such correspondence. The Guide would address exception reports and supervisory reviews, among other documents, in proposed Item 13.

Proposed List 1, Item 8—The current Guide requires firms/associated persons to produce recordings and notes of telephone calls or conversations about the claimants' accounts at issue that occurred between the associated persons and the claimants (see current List 1, Item 7). FINRA proposes to expand this item to include telephone logs. Currently, telephone logs are only required in cases alleging unauthorized trading (see current List 11, Item 2). However, FINRA would narrow the item from records relating to the claimant's "accounts at issue" to records relating to the "transactions at issue." Producing recordings of telephone calls is labor intensive, expensive, and difficult for firms unless the claimants are able to specify a telephone call's date and time, provide the name of a person the claimants spoke to at the firm, and/or specify the trade placed during the conversation.

Proposed List 1, Item 9—FINRA is proposing to require firms/associated persons to produce writings reflecting communications between the associated persons assigned to the claimants' accounts at issue during the time period at issue and members of the firm's compliance department relating to the securities/products at issue and/or the claimants' accounts. FINRA believes that such writings may provide evidence relating to, among other matters, supervision of the associated persons handling the claimants' accounts. This item would be new in the Guide.

Proposed List 1, Item 10—The current Guide requires firms/associated persons to produce Forms RE–3, U–4, and U–5, including all amendments, customer complaints identified in the forms, and customer complaints of a similar nature against the associated persons handling the accounts at issue (see current List 1, Item 8).

FINRA proposes to amend this item to require that firms/associated persons produce Forms RE–3, U–4, and U–5, and the Disclosure Reporting Pages for the associated persons assigned to the claimants' accounts at issue during the time period at issue. Disclosure Reporting Pages, which are actually part of Forms U–4 and U–5, provide claimants with valuable, detailed information about prior customer

complaints. FINRA would narrow production of these forms to the associated persons assigned to the claimants' accounts at issue during the time period at issue, to ease the burden of production for the firms. Because of the sensitive nature of the personal information, FINRA would permit the firm to redact the associated persons' Social Security numbers.

Commenters on the 2008 proposal requested that FINRA require firms/associated persons to produce all customer complaints against the associated persons. To respond to these comments, FINRA proposes to require firms/associated persons to produce all customer complaints filed against the associated persons assigned to the accounts at issue that were generated between three years prior to the first transactions at issue through filing of the Statement of Claim, redacted to prevent disclosure of nonpublic personal information about complaining customers.

Proposed List 1, Item 11—The current Guide requires firms/associated persons to produce all sections of the firm's Compliance Manuals related to the claims alleged in the Statement of Claim, including any separate or supplemental manuals governing the duties and responsibilities of the associated persons and supervisors, any bulletins (or similar notices) issued by the compliance department, and the table of contents and index to each Manual (see current List 1, Item 9).

FINRA is proposing to amend this Item to replace compliance manuals with "manuals and all updates thereto" and compliance department with "firm." The proposal would clarify that the firm/associated persons must produce the manuals regardless of whether the firm characterizes them as "compliance manuals," and firms/associated persons must produce bulletins from any department issuing them. FINRA is also proposing to clarify that production of manuals, bulletins, and updates is required for all years in which the Statement of Claim alleges that the conduct occurred. Updates are material to establishing the firm procedures in place during a specified time frame.

FINRA would also amend the item to require firms/associated persons to provide a list of all of manuals and bulletins which may contain directives related to the conduct or product at issue in the claim. The list would enable claimants to identify any additional manual or bulletin sections that may be relevant to their claims.

Proposed List 1, Item 12—The current Guide requires firms/associated persons to produce all analyses and reconciliations of the claimants' accounts during the time period and/or relating to the transactions at issue (see current List 1, Item 10). FINRA is proposing to amend this item to clarify that production is limited to analyses and reconciliations "prepared" during the time period at issue, and includes analyses and reconciliations prepared as part of a review of the claimants' accounts or transactions at issue. These documents are valuable because they may contain firm findings concerning reviews of claimants' accounts.

Proposed List 1, Item 13—For claims alleging failure to supervise, the current Guide requires the production of all exception reports and supervisory activity reviews relating to the associated persons and/or the claimants' accounts generated not earlier than one year before or not later than one year after the transactions at issue, and all other documents reflecting supervision of the associated persons and the claimants' accounts (see current List 5, Item 2).

FINRA is proposing to require firms/associated persons to produce all exception reports, supervisory activity reviews, concentration reports, active account runs, and similar documents produced to review for activity in the claimants' accounts related to the allegations in the Statement of Claim or in which the transactions at issue are referenced or listed.

For claims alleging failure to supervise, FINRA is proposing to expand production beyond the review of activity in the claimants' accounts also to cover other customer accounts handled by associated persons at the firm. In such cases, FINRA is proposing to require firms/associated persons to produce all exception reports, supervisory activity reviews, concentration reports, active account runs, and similar documents produced to review for activity in customer accounts handled by associated persons and related to the allegations in the Statement of Claim that were generated not earlier than one year before or not later than one year after the transactions at issue.

FINRA would limit production to documents related to the allegations made in the Statement of Claim to ease the burden of production for firms/associated persons. FINRA believes that narrowing the item would not negatively impact claimants because firms/associated persons would continue to produce reports related to the claimants' claims.

Proposed List 1, Item 14—For claims alleging failure to supervise, the current Guide requires production of the portions of internal audit reports at the branch in which the claimants maintained accounts that focused on the associated persons or the transactions at issue, and were generated not earlier than one year before or not later than one year after the transactions at issue and discussed alleged improper behavior in the branch against other individuals similar to the improper conduct alleged in the Statement of Claim (see current List 5, Item 3). FINRA is not proposing any substantive changes to this Item.

Proposed List 1, Item 15—The current Guide requires the production of records of disciplinary action taken against associated persons by any regulator or employer for all sales practice violations or conduct similar to the conduct alleged to be at issue (see current List 1, Item 12). FINRA is not proposing any substantive changes to this item.

Proposed List 1, Item 16—FINRA is proposing to require firms/associated persons to produce all investigations, charges, or findings by any regulator (state, federal or self-regulatory organization) and the firm/associated persons' responses to such investigations, charges, or findings for the associated persons' alleged improper behavior similar to that alleged in the Statement of Claim. This new item in the Guide would expand the scope of documents that relate to the associated persons' disciplinary history.

Proposed List 1, Item 17—For claims alleging failure to supervise, the current Guide requires production of the portions of examination reports or similar reports following an examination or an inspection conducted by a state or federal agency or a self-regulatory organization that focused on the associated persons or the transactions at issue or that discussed alleged improper behavior in the branch against other individuals similar to the improper conduct alleged in the Statement of Claim (see current List 5, Item 4). Commenters on the 2008 proposal requested that FINRA include a time limit for production of these documents. In response to these comments, FINRA is proposing to limit production to those reports issued for the period one year before the transactions at issue through the filing of the Statement of Claim. FINRA believes that restricting the time frame for production would reduce the firms' burden of production and offset the expansion of this production to all cases while ensuring that claimants have access to the reports that relate to their claims.

Proposed List 1, Item 18—FINRA is proposing to require firms/associated persons to produce documents the respondents obtained by subpoena or by document requests directed to third parties. While this item would be new in the Guide, it is not a new requirement because the subpoena rule, Rule 12512(e), already requires production of subpoenaed documents. FINRA is proposing to cross-reference that rule in the Guide. FINRA would also add documents received by request directed to third parties at any time during the case to ensure that all parties have access to documents obtained without a subpoena from non-parties.

Proposed List 1, Items 19, 20, and 21—In the current Guide, firms/associated persons are required to produce documents relating to associated persons' commissions and/or compensation when claimants allege churning (see current List 3, Items 1–3), failure to supervise (see current List 5, Item 1), or unsuitability (see current List 13, Item 2).

Proposed List 1, Item 19—FINRA is proposing to require firms/associated persons to produce documents showing the associated persons' gross and net compensation for the transactions at issue in the Statement of Claim. This is new in the Guide. Documentation of compensation on an order-by-order basis provides parties with a clear understanding of how much firms paid associated persons for the trading at issue. If the accounts at issue were the subject of fee arrangements that are not based on remuneration per trade, firms/associated persons would be required to produce a record of compensation earned for the period when the transactions in the accounts took place.

Proposed List 1, Item 20—The current Guide requires firms/associated persons to produce commission runs relating to the claimants' accounts at issue or, in the alternative, a consolidated commission report relating to the accounts (see current List 3, Item 1). It also requires firms/associated persons to produce documents reflecting compensation of any kind, including commissions, from all sources generated by the associated persons assigned to the claimants' accounts for the two months preceding, through the two months following, the transactions at issue, or up to 12 months, whichever is longer. The firm may redact all information identifying customers who are not parties to the action except for the last four digits of the non-party customer account number for each transaction (see current List 3, Item 2).

In addition, for claims related to solicited trading activity, FINRA is proposing to require the firm/associated persons to produce a record of all compensation, monetary and non-monetary, including, but not limited to, monthly commission runs for the associated persons who handled the claimants' accounts. That record should reflect the securities traded, dates traded, whether the trades were solicited or unsolicited, and the gross and net commission from each trade. Firms would be required to produce this record for a period of time beginning three months before and ending three months after the trades at issue in the claimants' accounts. FINRA is proposing to impose this additional production only in claims relating to solicited trading activity because the records would be most relevant to such activity. The required documents may provide claimants with evidence regarding the extent to which the associated person recommended securities to other customers.

The firm may redact names and other non-public personal information concerning customers who are not parties to this claim, but would be required to provide sufficient information to identify: (1) The non-party customers' accounts, including the last four digits of the non-party customers' account numbers; (2) the associated persons' own and related accounts, including the last four digits of the associated persons' account numbers; and (3) the type of account (IRA, 401(k), etc.). Activity in the associated persons' account may be correlated to the transactions in the customers' accounts.

Proposed List 1, Item 21—The current Guide requires firms/associated persons to produce documents describing the basis upon which the firm compensated the associated persons during the years in which the transactions or occurrences in question occurred, including any bonus or incentive program, and compensation and commission schedules (see current List 3, Item 3 and current List 13, Item 2). FINRA would add clarity to this item by requiring production of a record of all agreements pertaining to the relationship between the associated person and the firm, summarizing the associated person's compensation arrangement or plan with the firm, including commission and concession schedules, bonus or incentive plans, and schedules showing compensation. If the firm based the associated persons' compensation on factors other than remuneration per trade, the item would require documentation of the method by which compensation was determined.

Proposed List 1, Item 22—For claims with allegations relating to an insurance product that includes a death benefit, FINRA is proposing to require firms/associated persons to produce all information concerning the claimants' insurance holdings and the recommendations, if any, to the claimants regarding insurance products. This new requirement in the Guide could provide parties with evidence in cases involving annuities.

Items Firms/Associated Persons Would No Longer Be Required To Produce

Holding Pages—In the current Guide, firms/associated persons are required to produce holding pages for the claimants' accounts at issue (see current List 1, Item 4). FINRA is proposing to delete this item from the Guide because holding pages (hand written records of transactions made and kept by associated persons) are, generally, no longer in use. Firms provide transaction information to customers on account statements and/or confirmations.

Order tickets—In the current Guide, firms/associated persons are required to produce order tickets for the claimants' transactions in cases alleging unauthorized trading (see current List 11, Item 1). FINRA is proposing to delete this requirement from the Guide because production of order tickets is burdensome and evidence relating to whether the claimants authorized a particular transaction would be produced under proposed List 1, Items 4, 6, and 8.

List 2—Documents the Customers Shall Produce in All Customer Cases

The documents identified in each numbered item are presumptively discoverable in every case unless the item specifically limits production to a specific type of claim.

As stated above, to distinguish between customers who are parties to an arbitration and other customers of a brokerage firm, the discussion below refers to customer parties as "claimants" throughout.

Proposed List 2, Item 1—In the current Guide, claimants are required to produce all claimant and claimant-owned business (including partnership or corporate) federal income tax returns, limited to pages 1 and 2 of Form 1040, Schedules B, D, and E, or the equivalent for any other type of return, for the three years prior to the first transaction at issue in the Statement of Claim through the date the Statement of Claim was filed (see current List 2, Item 1). FINRA is proposing to expand this item to require production of Form 1040 schedule A and the IRS worksheets

related to Schedules A, B, D, and E. The expanded production would provide parties with a broader understanding of the claimants' financial status and investment activity during the relevant period. The amendments would provide that the income tax returns must be identical to those that the claimants filed with the Internal Revenue Service.

Because of the sensitive nature of the personal information, FINRA would permit claimants to redact their Social Security numbers. FINRA would also permit claimants to redact information relating to medical and dental expenses and the names of charities on Schedule A unless the information relates to the allegations in the Statement of Claim.

Proposed List 2, Item 2—The current Guide requires claimants to produce financial statements or similar statements of the claimants' assets, liabilities, and/or net worth for the period covering the three years prior to the first transaction at issue in the Statement of Claim through the date the claimants filed the Statement of Claim (see current List 2, Item 2). FINRA is proposing to add clarity to this item by specifying that financial statements include statements within a loan application. The item would also provide that claimants are not required to create financial statements in order to comply with the item.

Proposed List 2, Item 3—The current Guide requires claimants to produce copies of all documents received from the firm/associated persons and from any entities in which the claimants invested through the firm/associated persons, including monthly statements, opening account forms, confirmations, prospectuses, annual and periodic reports, and correspondence (see current List 2, Item 3). FINRA is proposing to expand this item to include research reports. Research reports may provide evidence concerning the basis for the claimants' investment decisions.

FINRA is proposing to eliminate mandatory production of account statements and confirmations if claimants stipulate to having received them. The amendments would require claimants to produce any statements or confirmations with hand written notations on them or which are not identical to those sent by the firm. The amendments would decrease claimants' discovery costs while preserving the requirement to produce documents that may have probative value.

Proposed List 2, Item 4—The current Guide requires claimants to produce account statements and confirmations for accounts maintained at securities firms other than the respondent firm for the three years prior to the first transaction at issue in the Statement of Claim through the date the claimants filed the Statement of Claim (see current List 2, Item 4). FINRA is proposing to amend this item to permit claimants to provide written authorization allowing the firm/associated persons to obtain account statements directly from the securities firms instead of providing copies of the statements. If the claimants elect to provide written authorization to the firm/associated persons to obtain the account statements, the claimants would still be required to provide all account statements in the claimants' possession, custody, or control with hand written notations on them or which are not identical to those sent by the firm. The proposal would ensure that other parties to the matter have a complete understanding of the claimants' investing history. FINRA proposes to eliminate confirmations from the item to ease the burden for investors. If necessary, firms would be able to request confirmations separately.

Proposed List 2, Item 5—The current Guide requires claimants to produce agreements, forms, information, or documents relating to the accounts at issue signed by or provided by the claimants to the firm/associated persons (see current List 2, Item 5). FINRA is proposing to expand the scope of this item by requiring production of documents relating to accounts or transactions at the firm regardless of whether claimants signed the documents.

Proposed List 2, Item 6—The current Guide requires claimants to produce account analyses and reconciliations prepared by or for the claimants relating to the accounts at issue (see current List 2, Item 6). FINRA is proposing to provide clarity to this item by changing "the account(s) at issue" to "the accounts at the respondent firm or transactions with the respondent firm during the time period at issue."

Proposed List 2, Item 7—The current Guide requires claimants to produce notes, including entries in diaries or calendars, relating to the accounts at issue (see current List 2, Item 7). FINRA is proposing to amend this item to provide clarity by changing "the account(s) at issue" to "accounts at the respondent firm or transactions at issue with the respondent firm."

Proposed List 2, Item 8—The current Guide requires claimants to produce recordings and notes of telephone calls or conversations about the claimants' accounts at issue that occurred between the associated persons and the claimants (and any person purporting to act on behalf of the claimants) (see current List 2, Item 8). For claims alleging unauthorized trading, claimants are also required to produce telephone records, including telephone logs, evidencing telephonic contact between the claimants and the firm/associated persons (see current List 12, Item 1). FINRA is proposing to combine these items into new Item 8. FINRA is not proposing any substantive changes to the items.

Proposed List 2, Item 9—The current Guide requires claimants to produce correspondence between the claimants (and any person acting on behalf of the claimants) and the firm/associated persons relating to the accounts at issue (see current List 2, Item 9). FINRA is proposing to amend this item to broaden the scope of production by deleting the reference to firm/associated persons. The claimants may have corresponded with persons/entities unrelated to the firm concerning the transactions at issue.

Proposed List 2, Item 10—The current Guide requires claimants to produce previously prepared written statements by persons with knowledge of the facts and circumstances related to the accounts at issue, including those by accountants, tax advisors, financial planners, other associated persons, and any other third party (see current List 2, Item 10). FINRA is not proposing any substantive changes to the current item.

Proposed List 2, Item 11—The current Guide requires claimants to produce complaints/Statements of Claim and answers filed in all civil actions involving securities matters and securities arbitration proceedings, and all final decisions and awards entered in these matters (see current List 2, Item 12). FINRA is proposing to expand the scope of this item by requiring claimants to produce non-confidential settlements entered in these matters because the subject matter of non-confidential settlements may be relevant to the pending case. The item would specify that claimants must produce the documents for all claims or complaints filed prior to the filing of the current Statement of Claim.

FINRA is also proposing to add that, if a person is party to a confidential settlement agreement that by its terms does not preclude identification of the existence of the settlement agreement, the party must identify the documents comprising the confidential settlement agreement. The proposed change would state that, although not presumptively discoverable, the panel could order the claimants to produce a confidential settlement agreement. The proposal would ensure that parties are aware of

other securities actions in which the claimants were parties.

Proposed List 2, Item 12—For claims alleging misrepresentation/omissions (see current List 8, Item 1), negligence/breach of fiduciary duty (see current List 10, item 1), or unsuitability (see current List 14, Item 1), the current Guide requires claimants to produce documents showing the claimants' ownership in or control over any business entity, including general and limited partnerships and closely held corporations. FINRA is proposing to expand the scope of this item to require that if the claimants are Trustees, they must also provide documents showing all accounts over which they have trading authority. The Trustees' trading activity for other accounts may provide evidence of the Trustees' investment sophistication.

Proposed List 2, Item 13—For claims alleging unsuitability, the current Guide requires claimants to produce written documents they relied upon in making the investment decisions at issue (see current List 14, Item 2). FINRA is proposing to delete the reference to "documents relied upon" and require production of all documents the claimants "received, including documents found through the claimants' own efforts, relating to the investments at issue." Documents the claimants received that relate to the investment at issue could provide relevant evidence in a case even if the claimants did not rely on them in making an investment decision.

Proposed List 2, Item 14—For claims alleging unauthorized trading, the current Guide requires claimants to produce documents relied on to show that transactions were made without the claimants' knowledge or consent (see current List 12, Item 2). FINRA is not proposing any substantive changes to the item and is proposing to limit the item to claims alleging unauthorized trading.

Proposed List 2, Item 15—FINRA is proposing to require claimants to produce all materials received or obtained from any source relating to the transactions or products at issue, and other investment opportunities, including research reports, sales literature, performance or risk data, prospectuses, and other offering documents, including documents intended or identified as being "for internal use only," and worksheets or notes. This item would be new in the Guide. Production of these documents may provide evidence concerning the bases for claimants' trading decisions. Therefore, FINRA also is proposing to require claimants to produce any similar materials received or obtained relating to other investment opportunities.

Proposed List 2, Item 16—For claims alleging misrepresentation/omission (see current List 8, Item 2), negligence/breach of fiduciary duty (see current List 10, Item 2), or unsuitability (see current List 14, Item 3), claimants are required to produce a copy of their resumes. While FINRA is not proposing any substantive changes to the item, claimants would be required to produce the documents in every case.

Proposed List 2, Item 17—For claims alleging misrepresentation/omission (see current List 8, Item 3), negligence/breach of fiduciary duty (see current List 10, Item 3), or unsuitability (see current List 14, Item 4), claimants are required to produce documents showing their educational and employment background, or a description of their background if not set forth in a resume. While FINRA is not proposing any substantive changes to the item, claimants would be required to produce the documents in every case.

Proposed List 2, Item 18—FINRA is proposing to require claimants to produce documents the claimants obtained by subpoena or by document requests directed to third parties. While this item would be new in the Guide, it is not a new requirement because the subpoena rule, Rule 12512(e), already requires production of subpoenaed documents. FINRA is proposing to cross-reference that rule in the Guide. FINRA would also add documents received by request directed to third parties at any time during the case, to ensure that all parties have access to documents obtained without a subpoena from non-parties.

Proposed List 2, Item 19—For claims involving an insurance product that provides a death benefit, FINRA is proposing to require claimants to produce all insurance information received from an insurance sales agent or securities broker relating to the insurance. This new requirement in the Guide could provide parties with evidence that may be relevant in cases involving annuities.

Items Customers Would No Longer Be Required To Produce

Claimants' complaints—The current Guide requires claimants to produce all prior complaints by or on behalf of the claimants involving securities matters and the firm's/associated persons' responses (see current List 2, Item 11). FINRA is proposing to delete this item as unnecessary because the respondent firm/associated persons would be in possession of such complaints and any responsive documents.

Claimants' action to limit losses—The current Guide requires claimants to produce all documents showing action taken by the claimants to limit losses in the transactions at issue (see current List 2, Item 13). FINRA is proposing to delete this item because, in most instances, the firm/associated persons are in possession of any documents that would be responsive to this item. If necessary, firms would be able to request additional documents.

Conforming Changes

FINRA is proposing to amend Rules 12506 (Document Production Lists) and 12508 (Objecting to Discovery; Waiver of Objection) to remove references to Lists three through 14 since FINRA would delete these lists in the proposed Guide.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[5] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that these revisions to the Guide will reduce the number and limit the scope of disputes involving document production and other matters, thereby improving the arbitration process for the benefit of the public investors, broker-dealer firms, and associated persons who use the process.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or

[5] 15 U.S.C. 78o–3(b)(6).

(ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–FINRA–2010–035 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2010–035. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2010–035 and should be submitted on or before August 24, 2010.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SOCIAL SECURITY ADMINISTRATION

Agency Information Collection Activities: Proposed Request, Comment Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law (Pub. L.) 104–13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes extensions of OMB-approved information collections.

SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Director to the following addresses or fax numbers.

(OMB), Office of Management and Budget, Attn: Desk Officer for SSA, Fax: 202–395–6974, E-mail address: *OIRA_Submission@omb.eop.gov.*

(SSA), Social Security Administration, DCBFM, Attn: Reports Clearance Officer, 1333 Annex Building, 6401 Security Blvd., Baltimore, MD 21235, Fax: 410–965–6400, E-mail address: *OPLM.RCO@ssa.gov.*

I. The information collection below is pending at SSA. SSA will submit it to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than October 4, 2010. Individuals can obtain copies of the collection instruments by calling the SSA Director for Reports Clearance at 410–965–0454 or by writing to the above e-mail address.

Work History Report—20 CFR 404.1515, 404.1560, 404.1565, 416.960 and 416.965–0960–0578. Under certain circumstances, SSA asks individuals about work they have performed in the past. Applicants use Form SSA–3369 to provide detailed information about jobs held prior to becoming unable to work. State Disability Determination Services evaluate the information, together with medical evidence, to determine eligibility for disability.

Type of Request: Revision of an OMB-approved information collection.

Collection method	Number of respondents	Frequency of response	Average burden per response (hours)	Estimated annual burden hours
SSA–3369 (Paper form)	1,090,346	1	1	1,090,346
EDCS 3369	607,122	1	1	607,122
Totals	1,697,468			1,697,468

II. SSA has submitted the information collections listed below to OMB for clearance. Your comments on the information collections would be most useful if OMB and SSA receive them within 30 days from the date of this publication. To be sure we consider your comments, we must receive them no later than September 2, 2010. You can obtain a copy of the OMB clearance packages by calling the SSA Director for Reports Clearance at 410–965–0454 or by writing to the above e-mail address.

Application for Child's Insurance Benefits—20 CFR 404.350–404.368, 404.603, & 416.350—0960–0010. SSA uses Form SSA–4–BK to determine if

[6] 17 CFR 200.30–3(a)(12).

children of living and deceased workers are entitled to their parents' monthly Social Security payments. The respondents are guardians completing the form on behalf of the children of living or deceased workers, or the children of living or deceased workers.

Type of Request: Revision of an OMB-approved information collection.

Collection method	Number of respondents	Frequency of response	Response time (minutes)	Burden (hours)
Life claims (paper)	8,052	1	12	1,610
Life Claims (MCS)	152,983	1	12	30,597
Life Claims- Signature Proxy	152,983	1	11	28,047
Death Claims (paper)	19,061	1	12	3,812
Death Claims (MCS)	362,150	1	12	72,430
Death Claims-Signature Proxy	362,150	1	11	66,394
Totals	1,057,379			202,890

Liz Davidson,

Director, Center for Reports Clearance, Social Security Administration.

BILLING CODE 4191–02–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Request for Comments and Notice of Public Hearing Concerning China's Compliance With WTO Commitments

AGENCY: Office of the United States Trade Representative.

ACTION: Request for comments and notice of public hearing concerning China's compliance with its WTO commitments.

SUMMARY: The interagency Trade Policy Staff Committee (TPSC) will convene a public hearing and seek public comment to assist the Office of the United States Trade Representative (USTR) in the preparation of its annual report to the Congress on China's compliance with the commitments made in connection with its accession to the World Trade Organization (WTO).

DATES: Persons wishing to testify at the hearing must provide written notification of their intention, as well as a copy of their testimony, by noon, Wednesday, September 22, 2010. Written comments are due by noon, Monday, September 27, 2010. A hearing will be held in Washington, DC, on Wednesday, October 6, 2010.

ADDRESSES: Comments should be submitted electronically via the Internet at *http://www.regulations.gov.* For alternatives to on-line submissions please contact Gloria Blue, Executive Secretary, Trade Policy Staff Committee, at (202) 395–3475.

FOR FURTHER INFORMATION CONTACT: For procedural questions concerning written comments or participation in the public hearing, contact Gloria Blue, (202) 395–3475. All other questions should be directed to Terrence J. McCartin, Deputy Assistant United States Trade Representative for China Enforcement, (202) 395–3900, or Eric I. Garfinkel, Chief Counsel for China Trade, (202) 395–3150.

SUPPLEMENTARY INFORMATION:

1. Background

China became a Member of the WTO on December 11, 2001. In accordance with section 421 of the U.S.-China Relations Act of 2000 (Pub. L. 106–286), USTR is required to submit, by December 11 of each year, a report to Congress on China's compliance with commitments made in connection with its accession to the WTO, including both multilateral commitments and any bilateral commitments made to the United States. In accordance with section 421, and to assist it in preparing this year's report, the TPSC is hereby soliciting public comment. Last year's report is available on USTR's Internet Web site (at *http://www.ustr.gov/sites/default/files/2009%20China%20Report%20to%20Congress.pdf*).

The terms of China's accession to the WTO are contained in the Protocol on the Accession of the People's Republic of China (including its annexes) (Protocol), the Report of the Working Party on the Accession of China (Working Party Report), and the WTO agreements. The Protocol and Working Party Report can be found on the Department of Commerce Webpage, *http://www.mac.doc.gov/China/WTOAccessionPackage.htm,* or on the WTO Web site, *http://docsonline.wto.org* (document symbols: WT/L/432, WT/MIN(01)/3, WT/MIN(01)/3/Add.1, WT/MIN(01)/3/Add.2).

2. Public Comment and Hearing

USTR invites written comments and/or oral testimony of interested persons on China's compliance with commitments made in connection with its accession to the WTO, including, but not limited to, commitments in the following areas: (a) Trading rights; (b) import regulation (e.g., tariffs, tariff-rate quotas, quotas, import licenses); (c) export regulation; (d) internal policies affecting trade (e.g., subsidies, standards and technical regulations, sanitary and phytosanitary measures, government procurement, trade-related investment measures, taxes and charges levied on imports and exports); (e) intellectual property rights (including intellectual property rights enforcement); (f) services; (g) rule of law issues (*e.g.,* transparency, judicial review, uniform administration of laws and regulations) and status of legal reform; and (h) other WTO commitments. In addition, given the United States' view that China should be held accountable as a full participant in, and beneficiary of, the international trading system, USTR requests that interested persons also specifically identify unresolved compliance issues that warrant review and evaluation by USTR's China Enforcement Task Force.

Written comments must be received no later than noon, Monday, September 27, 2010.

A hearing will be held on Wednesday, October 6, 2010, in Room 1, 1724 F Street, NW., Washington, DC 20508. If necessary, the hearing will continue on the next business day.

Persons wishing to testify orally at the hearing must provide written notification of their intention by noon, Wednesday, September 22, 2010. The notification should include: (1) The name, address, and telephone number of the person presenting the testimony; and (2) a short (one or two paragraph) summary of the presentation, including the commitments at issue and, as applicable, the product(s) (with HTSUS numbers), service sector(s), or other subjects to be discussed. A copy of the

testimony must accompany the notification. Remarks at the hearing should be limited to no more than five minutes to allow for possible questions from the TPSC.

All documents should be submitted in accordance with the instructions in section 3 below.

3. Requirements for Submissions

Persons submitting intent to testify and/or comments must do so in English and must identify (on the first page of the submission) "China's WTO Compliance."

In order to ensure the most timely and expeditious receipt and consideration of comments, USTR has arranged to accept on-line submissions via *http://www.regulations.gov.* To submit comments via *http://www.regulations.gov,* enter docket number USTR–2010–0019 on the home page and click "go". The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice by selecting "Notice" under "Document Type" on the left side of the search-results page, and click on the link entitled "Send a Comment or Submission." (For further information on using the *www.regulations.gov http://www.regulations.gov/*> Web site, please consult the resources provided on the website by clicking on "How to Use This Site" on the left side of the home page.)

The *http://www.regulations.gov* Web site provides the option of making submissions by filling in a "General Comments" field, or by attaching a document. We expect that most submissions will be provided in an attached document. If a document is attached, it is sufficient to type "See attached" in the "General Comments" field.

Submit any documents containing business confidential information, beginning with the characters "BC". Submit, as a separate submission, a public version of the submission with a file name beginning with the character "P". The "BC" and "P" should be followed by the name of the person or entity submitting the comments. For comments that contain no business confidential information, the file name should begin with the character "P", followed by the name of the person or entity submitting the comments. Electronic submissions should not attach separate cover letters; rather, information that might appear in a cover letter should be included in the comments you submit. Similarly, to the extent possible, please include any exhibits, annexes, or other attachments to a submission in the same file as the submission itself and not as separate files.

We strongly urge submitters to use electronic filing. If an on-line submission is impossible, alternative arrangements must be made with Ms. Blue prior to delivery for the receipt of such submissions. Ms. Blue may be contacted at (202) 395–3475.

General information concerning USTR may be obtained by accessing its Internet Web site (*http://www.ustr.gov*).

Carmen Suro-Bredie,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–W0–P

DEPARTMENT OF TRANSPORTATION

ITS Joint Program Office; IntelliDrive℠ Task Force Meeting; Notice of Meeting

AGENCY: Research and Innovative Technology Administration, U.S. Department of Transportation.

ACTION: Notice.

The USDOT Intelligent Transportation Systems (ITS) Joint Program Office will hold a meeting with the Institute of Transportation Engineers (ITE) IntelliDrive Task Force on August 10 and 11, 2010 during the ITE's Annual meeting at the Vancouver Convention and Exhibit Center, 1055 Canada Place, Vancouver, BC V6C 0C3, Canada.

The purpose of the meeting is to review various aspects of the IntelliDrive research program and to obtain stakeholder input on user needs for the definition of the core IntelliDrive System. The ITE IntelliDrive Task Force represents transportation engineering professionals from the public and private sectors.

The meeting is open to the public at no charge (public attendees do not need to register for the ITE meeting). However please RSVP your intent to attend to Delores Colbert at *delores.colbert@dot.gov* and include the following in the subject line: ITE IntelliDrive Task Force Meeting.

Following is the meeting preliminary agenda: Day one; ITE IntelliDrive Task Force Committee Business, IntelliDrive mobility program summary, IntelliDrive safety program policy research roadmap, IntelliDrive infrastructure deployment scenarios research, and IntelliDrive systems engineering research project overview. Day two; IntelliDrive systems engineering user needs gathering exercise.

Information about the IntelliDrive research program is available at: *http://www.its.dot.gov/index.htm.* Additional opportunities to provide input to the IntelliDrive systems engineering research program are available on August 25–26, 2010 in Detroit, MI (9–4:30 local time) and September 1–2, 2010 in San Jose, CA (9–4:30 local time). Information is available at: *http://www.its.dot.gov/press/2010/intellidrive_user_workshop.htm.*

Issued in Washington, DC, on the 28th day of July 2010.

Linda Dodge,

Chief of Staff, ITS Joint Program Office.

BILLING CODE 4910–HY–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[FTA Docket No. FTA–2010–0028]

Agency Information Collection Activity Under OMB Review

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of request for comments.

SUMMARY: The Federal Transit Administration invites public comment about our intention to request the Office of Management and Budget's (OMB) to approve the revision of the currently approved information collection: 49 U.S.C. Sections 5310 and 5311—Capital Assistance Program for Elderly Persons and Persons with Disabilities and Nonurbanized Area Formula Program. The **Federal Register** Notice with a 60-day comment period soliciting comments was published on May 21, 2010.

DATES: Comments must be submitted before September 2, 2010. A comment to OMB is most effective if OMB receives it within 30 days of publication.

FOR FURTHER INFORMATION CONTACT: LaStar Matthews, Office of Administration, Office of Management Planning, (202) 366–2295.

SUPPLEMENTARY INFORMATION:

Title: 49 U.S.C. Sections 5310 and 5311—Capital Assistance Program for Elderly Persons and Persons with Disabilities and Nonurbanized Area Formula Program (OMB Number 2132–0500)

Abstract: The Capital Assistance Program for Elderly Persons and Persons with Disabilities provides financial assistance for the specialized transportation service needs of elderly persons and persons with disabilities. The program is administered by the States and may be used in all areas,

urbanized, small urban, and rural. The Nonurbanized Area Formula Program provides financial assistance for the provision of public transportation services in nonurbanized areas and this program is also administered by the States. 49 U.S.C. sections 5310 and 5311 authorize FTA to review applications for federal financial assistance to determine eligibility and compliance with statutory and administrative requirements. Information collected during the application stage includes the project budget, which identifies funds requested for project implementation; a program of projects, which identifies subrecipients to be funded, amount of funding that each will receive, and a description of the projects to be funded; the project implementation plan; the State management plan; a list of annual certifications and assurances; and public hearings notice, certification and transcript. The applications must contain sufficient information to enable FTA to make the findings required by law to enforce the program requirements. Information collected during the project management stage includes an annual financial report, an annual program status report, and pre-award and post-delivery audits. The annual financial report and program status report provide a basis for monitoring approved projects to ensure timely and appropriate expenditure of federal funds by grant recipients.

Estimated Total Annual Burden: 11,775 hours.

ADDRESSES: All written comments must refer to the docket number that appears at the top of this document and be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725—17th Street, NW. Washington, DC 20503, Attention: FTA Desk Officer.

Comments Are Invited On: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued: July 28, 2010.

Ann M. Linnertz,

Associate Administrator for Administration.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Final Federal Agency Actions on Trans-Texas Corridor 35 (TTC–35) in Texas

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Limitation on Claims for Judicial Review of Actions by FHWA

SUMMARY: This notice announces actions taken by the FHWA that are final within the meaning of 23 U.S.C. 139(l)(1). The actions relate to a proposed transportation project, TTC–35, extending from the Texas-Oklahoma line to the City of Laredo, generally paralleling existing I–35 in the State of Texas.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before January 31, 2011. If the Federal law that authorizes judicial review of a claim provides a time period of less than 180 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Mr. Gregory Punske, P.E., District Engineer, District B (South), Federal Highway Administration, 300 East 8th Street, Room 826 Austin, Texas 78701; telephone: (512) 536–5960; e-mail: *gregory.punske@fhwa.dot.gov.* The FHWA Texas Division Office's normal business hours are 7:45 a.m. to 4:15 p.m. (central time) Monday through Friday. You may also contact Dianna Noble, P.E., Texas Department of Transportation, Environmental Affairs Division, 118 E. Riverside Drive, Austin, Texas 78704; telephone: (512) 416–2734; e-mail: *dnoble@dot.state.tx.us.* The Texas Department of Transportation's normal business hours are 8 a.m. to 5 p.m. (central time) Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the FHWA has taken final agency actions by issuing approval for the No Action Alternative for the following transportation project in the State of Texas: The TTC–35 project as proposed generally parallels I–35 from the Texas-Oklahoma state line to the City of Laredo. TTC–35 was envisioned as a multi-modal corridor to meet the transportation challenges of the I–35 corridor. EIS No. 20100133. The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Final Environmental Impact Statement (FEIS) for the project, approved on February 24, 2010, in the FHWA Record of Decision (ROD) issued on July 20, 2010 and in other documents in the FHWA administrative record. The FEIS, ROD, and other documents in the FHWA administrative record file are available by contacting the FHWA or the Texas Department of Transportation at the addresses provided above.

This notice applies to all Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321-4335]; Federal-Aid Highway Act [23 U.S.C. 109].

2. *Air:* Clean Air Act, 42 U.S.C. 7401–7671(q).

3. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303].

4. *Wildlife:* Endangered Species Act [16 U.S.C. 1531–1544] Fish and Wildlife Coordination Act [16 U.S.C. 661–667(d)], Migratory Bird Treaty Act [16 U.S.C. 703–712].

5. *Historic and Cultural Resources:* Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) *et seq.*]; Archeological Resources Protection Act of 1977 [16 U.S.C. 470(aa)–(11)]ogical and Historic Preservation Act [16 U.S.C. 469–469(c)].

6. *Social and Economic:* Civil Rights Act of 1964 [42 U.S.C. 2000(d)-2000(d)(1)]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].

7. *Wetlands and Water Resources:* Clean Water Act, 33 U.S.C. 1251–1342; Land and Water Conservation Fund (LWCF), 16 U.S.C. 4601–4604.

8. *Executive Orders:* E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations; E.O. 11514 Protection and Enhancement of Environmental Quality.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(l)(1).

Issued on: July 27, 2010.

Gregory S. Punske,

District Engineer, Austin, Texas.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE–2007–54]

Petition for Exemption; Summary of Petition Received

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of 14 CFR. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number involved and must be received on or before August 23, 2010.

ADDRESSES: You may send comments identified by Docket Number FAA–2009–0796 using any of the following methods:

- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Send comments to the Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590.
- *Fax:* Fax comments to the Docket Management Facility at 202–493–2251.
- *Hand Delivery:* Bring comments to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: To read background documents or comments received, go to *http://www.regulations.gov* at any time or to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Laverne Brunache, 202–267–3133, or Tyneka L. Thomas, 202–267–7626, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on July 28, 2010.

Pamela Hamilton-Powell,

Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2009–0796.

Petitioner: Florida Air Transport, Inc.

Section of 14 CFR Affected: §§ 119.1(a)(2), 119.5(h), 119.23, and 125.1.

Description of Relief Sought: Florida Air Transport seeks an exemption from 14 CFR 119.1(a)(2), 119.5(h), 119.23, and 125.1 to operate DC–4 aircraft in common carriage with a payload greater than 6,000 pounds.

[FR Doc. 2010–18986 Filed 8–2–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2010–0194]

Pipeline Safety: Personal Electronic Device Related Distractions

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA); DOT.

ACTION: Notice; Issuance of Advisory Bulletin.

SUMMARY: PHMSA is issuing an Advisory Bulletin to remind owners and operators of natural gas and hazardous liquid pipeline facilities of the risks associated with the use of personal electronic devices (PEDs) by individuals performing operations and maintenance activities on a pipeline facility.

FOR FURTHER INFORMATION CONTACT: Cameron Satterthwaite by phone at 202–366–1319 or by e-mail at *cameron.satterthwaite@dot.gov.* General information about the Department of Transportation initiative on distracted driving may be found at *http://www.distractions.gov.* Information about PHMSA may be found at *http://phmsa.dot.gov.*

SUPPLEMENTARY INFORMATION:

Background

The U.S. Department of Transportation is leading the effort to end the dangerous practice of distracted driving on our nation's roadways and in other modes of transportation. The use of PEDs, such as cellular telephones and mobile computers, while operating motor vehicles has been the subject of recent Departmental regulations and guidance. (*e.g.,* Restrictions on Railroad Operating Employees' Use of Cellular Telephones and Other Electronic Devices, 75 FR 9754, May 18, 2010; Limiting the Use of Wireless Communication Devices, 75 FR 16391, April 1, 2010.) In furtherance of this effort, PHMSA recognizes that the use of PEDs by pipeline employees who are performing operations and maintenance activities may pose a similar risk to safety if those individuals are distracted, especially when such use is for personal business.

The Federal pipeline safety regulations in 49 CFR Parts 190 through 199 prescribe minimum safety standards for pipeline transportation and for pipeline facilities. Owners and operators of natural gas and hazardous liquid pipeline facilities are required to have and follow written procedures for safely conducting operations and maintenance tasks. (49 CFR 192.605, 193.2503, and 195.402) Individuals performing those tasks, particularly activities that affect the operation or integrity of the pipeline facility, must be qualified under a program developed by each operator that ensures individuals are trained and have the knowledge, skills, and ability necessary to perform the tasks safely and to recognize and react to abnormal conditions. (49 CFR 192.805, 193.2707, and 195.505.)

There may be increased risks associated with the use of PEDs by personnel performing pipeline activities affecting operation or integrity. Pipeline operations and maintenance tasks require a critical level of attention and skill, which may be compromised by visual, manual, or cognitive distractions caused by the use of PEDs. Such distractions may also hinder their prompt recognition and reaction to abnormal operating conditions and emergencies.

PHMSA recommends that operators integrate into their written procedures for operations and maintenance appropriate controls regarding the use of PEDs by individuals performing pipeline tasks that may affect pipeline operation or integrity. PHMSA is not discouraging the use of PEDs as a part of normal business operations. PHMSA

also recommends that operators provide guidance and training for all personnel about the risks associated with the use of PEDs while driving, and while performing activities on behalf of the company if that use poses a risk to safety.

Advisory Bulletin (ADB–10–06)

To: Owners and Operators of Hazardous Liquid and Natural Gas Pipeline Systems.

Subject: Personal Electronic Device (PED) Related Distractions.

Advisory: As with other modes of transportation, PHMSA recognizes the use of PEDs by pipeline employees who are performing operations and maintenance activities may increase safety risks if those individuals become distracted. In furtherance of the Department's effort to end the dangerous practice of distractions caused by PEDs throughout the various modes of transportation, PHMSA is issuing this Advisory Bulletin about the potential for distractions affecting pipeline safety.

PHMSA reminds owners and operators of natural gas and hazardous liquid pipeline facilities that there may be increased risks associated with the use of PEDs by individuals performing activities that affect pipeline operation or integrity. Pipeline operations and maintenance tasks require a critical level of attention and skill, which may be compromised by visual, manual, and cognitive distractions caused by the use of PEDs. Such distractions may also hinder their prompt recognition and reaction to abnormal operating conditions and emergencies.

Owners and operators of natural gas and hazardous liquid pipeline facilities should integrate into their written procedures for operations and maintenance appropriate controls regarding the personal use of PEDs by individuals performing pipeline tasks that may affect the operation or integrity of a pipeline. PHMSA is not discouraging the use of PEDs as a part of normal business operations. Owners and operators should also provide guidance and training for all personnel about the risks associated with the use of PEDs while driving and while performing activities on behalf of the company if that use poses a risk to safety.

Issued in Washington, DC, on July 27, 2010.

Jeffrey D. Wiese,

Associate Administrator for Pipeline Safety.

[FR Doc. 2010–18947 Filed 8–2–10; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

[Docket No. PHMSA–2010–0202; Notice No. 10–5]

Safety Advisory Notice: Personal Electronic Device Related Distractions

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA); DOT.

ACTION: Notice.

SUMMARY: PHMSA is issuing a safety advisory notice to remind offerors and carriers of hazardous materials of the risks associated with the use of personal electronic devices (PEDs) by individuals operating motor vehicles that contain hazardous materials.

FOR FURTHER INFORMATION CONTACT: Stuart Streck by telephone at (404) 832–1140 or by e-mail at *stuart.streck@dot.gov.* General information about the Department of Transportation initiative on distracted driving may be found at *http://www.distractions.gov.* Information about PHMSA may be found at *http://phmsa.dot.gov.*

SUPPLEMENTARY INFORMATION: Research conducted by the United States Department of Transportation (DOT) and other governmental and non-governmental organizations has shown the danger posed by drivers who are distracted by cellular telephones and other PEDs. For example, Virginia Tech Transportation Institute conducted a study under contract with Federal Motor Carrier Safety Administration (FMCSA) entitled "Driver Distraction in Commercial Vehicle Operations." The final report, released on October 1, 2009, found that text messaging on a cellular telephone increased the risk of a safety-critical event by 23.2 percent.

The DOT is leading the effort to end the dangerous practice of distracted driving on our nation's roadways and in other modes of transportation. The FMCSA recently initiated a rulemaking designed to prohibit texting by commercial motor vehicle (CMV) drivers operating in interstate commerce and to impose sanctions for drivers who fail to comply. *See* Limiting the Use of Wireless Communication Devices, 75 FR 16391 (proposed Apr. 1, 2010). The majority of the 50 states have forbidden the operation of PEDs while driving any motor vehicle. *See* DOT Distracted Driving Web site, *http://www.distractions.gov; see also* Insurance Institute for Highway Safety Web site, *http://www.iihs.org/.*

PHMSA's Office of Hazardous Materials Safety is the Federal safety authority for the transportation of hazardous materials by air, rail, highway, and water. Safety is at the core of PHMSA's mission. PHMSA strives to reduce the risk of harm from the transportation of hazardous materials. In light of PHMSA's vital safety mission, we issue this advisory bulletin to raise awareness of the problems and dangers presented by the use of PEDs by hazardous materials drivers.

Operators of vehicles transporting hazardous materials should guard against distraction, including the use of PEDs while operating a vehicle. All CMV drivers transporting hazardous materials should be aware that the use of a PED while driving constitutes a safety risk to themselves, other motorists, and bystanders. The consequences of using PEDs while driving can include state and local sanctions, FMCSA fines, and possible revocation of commercial driver's licenses.

In addition, businesses that prepare or transport hazardous materials in commerce should be aware that the dangers of distracted driving are heightened due to the risk of the release of hazardous materials in the event of an accident. Accordingly, hazardous materials companies should institute policies and provide awareness training to discourage the use of PEDs by drivers. PHMSA recognizes that there are already members of the hazardous materials transportation community with policies in place that exceed the legal requirements for curbing the risk of distracted driving. PHMSA applauds these and all other efforts to enhance the safety of hazardous materials transportation.

Issued in Washington, DC, on July 27, 2010.

Magdy El-Sibaie,

Associate Administrator for Hazardous Materials Safety.

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1995, as Amended by Public Law 104–13; Proposed Collection, Comment Request

AGENCY: Tennessee Valley Authority.

ACTION: Proposed collection; comment request.

SUMMARY: The proposed information collection described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, as

amended). The Tennessee Valley Authority is soliciting public comments on this proposed collection as provided by 5 CFR 1320.8(d)(1). Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer: Mark Winter, Tennessee Valley Authority, 1101 Market Street (MP–3C), Chattanooga, Tennessee 37402–2801; (423) 751–6004.

Comments should be sent to the Agency Clearance Officer or to OMB Office of Information and Regulatory Affairs, Attention: Desk Officer for Tennessee Valley Authority, Washington, DC 20503, no later than *September 2, 2010.*

SUPPLEMENTARY INFORMATION:

Type of Request: Regular submission.

Title of Information Collection: Employment Application.

Frequency of Use: On Occasion.

Type of Affected Public: Individuals.

Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 999.

Estimated Number of Annual Responses: 39,925.

Estimated Total Annual Burden Hours: 35,161.

Estimated Average Burden Hours per Response: .88.

Need For and Use of Information: The employment application process collects information on qualifications, suitability for employment, and eligibility for veteran's preference. The information is used to make comparative appraisals and to assist in selections. The affected public consists of individuals who apply for TVA employment.

James W. Sample,

Director, Enterprise Information Security and Policy.

Medicare Program: Changes to the Hospital Outpatient Prospective Payment System and CY 2010 Payment Rates; Changes to the Ambulatory Surgical Center Payment System and CY 2010 Payment Rates; Corrections

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Correction of final rule with comment period.

SUMMARY: This document corrects technical errors that appeared in the final rule with comment period found in the **Federal Register** (FR) on November 20, 2009, entitled "Medicare Program: Changes to the Hospital Outpatient Prospective Payment System and CY 2010 Payment Rates; Changes to the Ambulatory Surgical Center Payment System and CY 2010 Payment Rates" and in the correction document found in the **Federal Register** on December 31, 2009, entitled "Medicare Program: Changes to the Hospital Outpatient Prospective Payment System and CY 2010 Payment Rates; Changes to the Ambulatory Surgical Center Payment System and CY 2010 Payment Rates."

DATES: *Effective Date:* This document is effective on August 3, 2010.

Applicability Date: The corrections in this document are applicable on and after January 1, 2010.

FOR FURTHER INFORMATION CONTACT: Alberta Dwivedi, (410) 786–0378.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. E0–26499 of November 20, 2009 (74 FR 60316) (hereinafter referred to as the CY 2010 OPPS/ASC final rule), there were several technical and typographic errors. Some of these errors were corrected in the correction document of December 31, 2009 (74 FR 69502) (hereinafter referred to as the December 31, 2009 CY 2010 OPPS/ASC correction document). We identified additional errors to the practice expense (PE) relative value units (RVUs) and the conversion factor (CF) for the Medicare Physician Fee Schedule (MPFS) in the November 25, 2009 Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010 final rule with comment period (74 FR 61738) (hereinafter referred to as the CY 2010 MPFS final rule), which were corrected in the May 11, 2010 CY 2010 MPFS correction document (75 FR 26350). The revised ASC payment system uses the PE RVUs and the CF for the MPFS as part of the office-based and ancillary radiology payment methodology. This notice updates the CY 2010 OPPS/ASC final rule to include these additional corrections.

The provisions in this correction document are effective as if they had been included in the CY 2010 OPPS/ASC final rule appearing in the November 20, 2009 **Federal Register** (74 FR 60316). Accordingly, the corrections are effective January 1, 2010.

II. Summary of Errors

A. Errors in the December 31, 2009 Correction

In the December 31, 2009 CY 2010 OPPS/ASC correction document, we republished Addendum AA on pages 69505 through 69629 and Addendum BB on pages 69630 through 69675 to take into account updated CY 2010 MPFS information. As required under § 416.171(d), the revised ASC payment system limits payment for office-based procedures and covered ancillary radiology services to the lesser of the ASC rate or the amount calculated by multiplying the nonfacility PE RVUs for the service by the CF under the MPFS. However, the MPFS CF and PE RVUs listed for some CPT codes in Addendum B to the CY 2010 MPFS final rule (74 FR 62017) were incorrect due to certain technical errors and, consequently, were corrected in a December 10, 2009 correction document to the CY 2010 MPFS final rule (74 FR 65450). Since the ASC payment amounts for office-based procedures and covered ancillary radiology services are determined using the amounts in the MPFS final rule, we corrected the CY 2010 payment amounts for ASC procedures and services using the corrected MPFS amounts in the December 31, 2009 CY 2010 OPPS/ASC correction document.

Additional technical and typographical errors were discovered in the CY 2010 MPFS final rule, as well as the December 10, 2009 CY 2010 MPFS correction document. These changes were corrected in the May 11, 2010 CY 2010 MPFS correction document (75 FR 26350). That correction document:

- Made corrections to the PE and malpractice (MP) RVUs to align their values to the final CY 2010 MPFS policies for PE and MP RVUs; and
- Made corrections to the CF resulting from corrections to the PE and MP RVUs to align their values with the final CY 2010 MPFS policies for PE and MP RVUs, taking into consideration comments received from the public and further review following display of the CY 2010 MPFS final rule.

We refer readers to the May 11, 2010 CY 2010 MPFS correction document (75 FR 26350) for more information on the changes made to the MPFS.

In summary, addenda AA and BB in the December 31, 2009 CY 2010 OPPS/ASC correction document contained errors in the rates for surgical procedures designated as office-based and for covered ancillary radiology procedures which are corrected in this notice.

B. Correction of Errors in the December 31, 2010 Correction

The changes to the MPFS impacted multiple codes within Addenda AA and BB. Therefore, we are republishing Addenda AA and BB, which were republished on pages 69505 through 69629 and 69630 through 69675 of the December 31, 2009 CY 2010 OPPS/ASC correction document to take into account the updated CY 2010 MPFS information. The ASC payment amounts for office-based procedures and covered ancillary radiology services are determined using the MPFS final calendar year CF and PE RVUs. We must correct the CY 2010 payment amounts for covered office-based procedures and covered ancillary radiology services using the final CY 2010 corrected MPFS values. The revised rates continue to reflect the negative update to the MPFS for CY 2010 based on current law at the time of publication of the CY 2010 MPFS final rule and the corrections to the RVUs and CFs. The corrected payment amounts are reflected in Addenda AA and BB to this correction document and also are posted on the CMS Web site at: *http://www.cms.gov/ASCPayment.*

We note that the Department of Defense Appropriations Act, 2010 (Pub. L. 111–118), the Temporary Extension Act of 2010 (Pub. L. 111–144), and the Continuing Extension Act of 2010 (Pub. L. 111–157) extended a zero percent update for the MPFS from January 1, 2010 through May 31, 2010. We are publishing a notice around the same time as this correction document announcing certain provision of the Patient Protection and Affordable Care Act (Affordable Care Act), as amended by the Health Care and Education Reconciliation Act of 2010 (HCERA), for CY 2010. Because the changes required by the Affordable Care Act and HCERA are effective January 1, 2010, and because the public laws listed above

authorize a zero percent update for the MPFS for CY 2010 through May 31, 2010, the notice incorporates a zero percent update for MPFS payment. If Congress chooses not to extend the zero percent MPFS update beyond May 31, 2010 or chooses to revise the MPFS update to be something other than zero, we will recalculate the payment rates presented in that notice based on the CY 2010 MPFS payment rates calculated using the revised update factor.

The payment rates presented in this correction document technical corrections made to the CY 2010 OPPS/ASC final rule and will not be used for payment. The payment rates presented in the notice being published around the same time as this correction document are the final ASC payment rates from January 1, 2010, through May 31, 2010. We recalculated the ASC payment rates, including budget neutrality calculations, in that notice to reflect changes created by the Affordable Care Act and HCERA, and the technical corrections addressed in this correction document.

IV. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a notice such as this take effect, in accordance with the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). We also ordinarily provide a 30-day delay in the effective date of the provisions of a notice in accordance with the APA (5 U.S.C. 553(d)). However, we can waive both the notice and comment procedures and the 30-day delay in the effective date if the Secretary finds, for good cause, that it is impracticable, unnecessary or contrary to the public interest to follow the notice and comment procedures or to comply with the 30-day delay in the effective date, and incorporates a statement of the finding and the reasons therefor in the notice. This correction document merely provides technical corrections to the CY 2010 OPPS/ASC final rule, as corrected by the December 31, 2009 CY 2010 OPPS/ASC correction document, that was effective on January 1, 2010. The provisions of the CY 2010 OPPS/ASC final rule were promulgated through notice and comment rulemaking, and the corrections contained in this document do not make substantive changes to the policies or payment methodologies that were finalized in the CY 2010 OPPS/ASC final rule. In addition, we believe it is in the public interest to have the correct information and to have it as soon as possible and not delay its dissemination. For the reasons stated above, we find that both notice and comment procedures and the 30-day delay in effective date for this correction document are unnecessary and contrary to the public interest. Therefore, we find there is good cause to waive notice and comment procedures and the 30-day delay in effective date for this correction document.

(Catalog of Federal Domestic Assistance Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: June 24, 2010.

Dawn L. Smalls,

Executive Secretary to the Department.

Therefore, CMS is republishing Addenda AA and BB, which were republished on pages 69505 through 69629 and 69630 through 69675 of the December 31, 2009, CY 2010 OPPS/ASC correction document to take into account the updated CY 2010 MPFS information.

NOTE 1: The Medicare program payment is 80 percent of the total payment amount and beneficiary coinsurance is 20 percent of the total payment amount, except for screening flexible sigmoidoscopies and screening colonoscopies for which the program payment is 75 percent and the beneficiary coinsurance is 25 percent.

Addendum AA -- Final ASC Covered Surgical Procedures for CY 2010 (Including Surgical Procedures for Which Payment is Packaged)

HCPCS Code	Short Descriptor	Subject To Multiple Procedure Discounting	CY 2010 Comment Indicator	CY 2010 Payment Indicator	CY 2010 Third Year Transition Payment Weight	CY 2010 Third Year Transition Payment
NOTE 2: Payment indicators for "office-based" procedures (P2, P3) are based on a comparison of the final rates according to the ASC standard ratesetting methodology and the MPFS. Under current law, the MPFS payment rates will have a negative update for CY 2010. For a discussion of those rates, we refer readers to the CY 2010 MPFS final rule, as corrected.						
*: Asterisked codes(*) indicate that the procedure's "office-based," designation is temporary because we have insufficient claims data. We will reconsider this designation when new claims data become available.

NOTE 1: The Medicare program payment is 80 percent of the total payment amount and beneficiary coinsurance is 20 percent of the total payment amount, except for screening flexible sigmoidoscopies and screening colonoscopies for which the program payment is 75 percent and the beneficiary coinsurance is 25 percent.

NOTE 2: Payment indicators for radiology services (Z2, Z3) are based on a comparison of the final rates according to the ASC standard rate setting methodology and the MPFS. Under current law, the MPFS payment rates will have a negative update for CY 2010. For a discussion of those rates, we refer readers to the CY 2010 MPFS final rule.

NOTE 1: The Medicare program payment is 80 percent of the total payment amount and beneficiary coinsurance is 20 percent of the total payment amount, except for screening flexible sigmoidoscopies and screening colonoscopies for which the program payment is 75 percent and the beneficiary coinsurance is 25 percent.

NOTE 2: Payment indicators for radiology services (Z2, Z3) are based on a comparison of the final rates according to the ASC standard rate setting methodology and the MPFS. Under current law, the MPFS payment rates will have a negative update for CY 2010. For a discussion of those rates, we refer readers to the CY 2010 MPFS final rule.

78605	Brain image 4+ views		Z2	2.7917	$116.90

NOTE 1: The Medicare program payment is 80 percent of the total payment amount and beneficiary coinsurance is 20 percent of the total payment amount, except for screening flexible sigmoidoscopies and screening colonoscopies for which the program payment is 75 percent and the beneficiary coinsurance is 25 percent.

NOTE 2: Payment indicators for radiology services (Z2, Z3) are based on a comparison of the final rates according to the ASC standard rate setting methodology and the MPFS. Under current law, the MPFS payment rates will have a negative update for CY 2010. For a discussion of those rates, we refer readers to the CY 2010 MPFS final rule.

Medicare Program; Changes to the Hospital Outpatient Prospective Payment System and Ambulatory Surgical Center Payment System for CY 2010, and Extension of Part B Payment for Services Furnished by Hospitals or Clinics Operated by the Indian Health Service, Indian Tribes, or Tribal Organizations Made by the Affordable Care Act

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This Notice contains the final wage indices, hospital reclassifications, payment rates, impacts and addenda for payments made under the Medicare hospital outpatient payment system (OPPS) for CY 2010. This Notice also contains the payment rates and addenda for payments made under the Medicare Ambulatory Surgical Center (ASC) payment system for CY 2010. The final rates, wage indices, addenda and impacts for the OPPS and as applicable for the ASC payment system contained in this Notice reflect the provisions of the Affordable Care Act. It also announces the extension of payment under Medicare Part B to hospitals and ambulatory care clinics operated by the Indian Health Service, Indian Tribes, or Tribal Organizations.

DATES: *Effective Date:* The revised CY 2010 national unadjusted OPPS and ASC payment rates described in this Notice are effective for payments for services furnished on or after January 1, 2010.

FOR FURTHER INFORMATION CONTACT: Alberta Dwivedi, (410) 786–0378.

SUPPLEMENTARY INFORMATION:

I. Provisions of the Notice

A. Medicare Hospital Outpatient Prospective Payment System (OPPS)

1. Background

We finalized changes to the payment rates and factors under the hospital outpatient prospective payment system (OPPS) in the CY 2010 OPPS/ASC final rule with comment period appearing in the November 20, 2009 **Federal Register**. On March 23, 2010, subsequent to the publication of the CY 2010 OPPS/ASC final rule, the Patient Protection and Affordable Care Act (Pub. L. 111–148) was signed into law. Shortly thereafter, on March 30, 2010, the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) was signed into law. These two laws are discussed in this Notice and are collectively referred to as the "Affordable Care Act" throughout this Notice. As discussed in detail below, several provisions of these public laws revised components of the OPPS, and those revisions required us to revise the payment rates and various factors under the CY 2010 OPPS. This Notice addresses the provisions of the Affordable Care Act that impact the CY 2010 OPPS final wage index tables, rates, and impacts. We note that the payment rates and policies set forth in the CY 2010 OPPS/ASC final rule with comment period appearing in the November 20, 2009 **Federal Register** continue to apply to those aspects of the OPPS that are unaffected by the Affordable Care Act. This Notice makes no changes to the OPPS payment methodologies or policies.

2. CY 2010 OPPS OPD Fee Schedule Increase Factor

Section 1833(t)(3)(C)(ii) of the Act requires us to update the conversion factor used to determine payment rates under the OPPS on an annual basis using the OPD fee schedule increase factor in 1833(t)(3)(C)(iv) of the Act for the year involved. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to 1833(t)(17) and 1833(t)(3)(F), the OPD fee schedule increase factor is equal to the market basket percentage increase applicable under section 1886(b)(3)(B)(iii) of the Act to hospital discharges occurring during the fiscal year ending in such year, reduced by 1 percentage point for such factor for services furnished in each of 2000 and 2002. In addition, under 1833(t)(17) of the Act, hospitals that fail to meet the reporting requirements of the Hospital Outpatient Quality Data Reporting Program (HOP QDRP) are subject to a reduction of 2.0 percentage points from the OPD fee schedule increase factor. In accordance with 1833(t)(3)(C)(iv), the CY 2010 OPD fee schedule increase factor (commonly referred to as the "hospital operating market basket increase factor") finalized in the CY 2010 OPPS final rule was 2.1 percent (74 FR 60419). In addition, under the CY 2010 OPPS/ASC final rule (74 FR 60419), a hospital that fails to meet the reporting requirements of the HOP QDRP reporting requirements receives a .1 percent update (that is, the CY 2010 estimate of the OPD fee schedule increase factor of 2.1 percent minus 2.0 percentage points) for services to which the OPD fee schedule increase factor applies.

Section 1833(t)(3)(F)(ii) and (G)(i) of the Social Security Act, as added by section 3401(i) of the Public Law 111–148, and as amended by section 10319(g) of such Act and section 1105(e) of Public Law 111–152, required the Secretary after calculating the OPD fee schedule increase factor, to reduce such factor by an adjustment of 0.25 percentage point, effective for services furnished on or after January 1, 2010 and before January 1, 2011. (In addition, new 1833(t)(3)(F) of the Act also provides that application of this subparagraph [1833(t)(3)(F)] may result in the increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 for a year, and may result in payment rates under the payment system under this subsection for a year being less than such payment rates for the preceding year.) Therefore, the reduction of 0.25 percentage point applied to the full hospital operating market basket increase factor of 2.1 percent results in a revised hospital operating market basket increase factor of 1.85 percent. A hospital that failed to meet the reporting requirements of the HOP QDRP reporting requirements receives a negative 0.15 percent hospital operating market basket increase factor (that is, the revised hospital operating market basket increase factor of 1.85 percent minus 2.0 percentage points.)

3. CY 2010 OPPS Conversion Factor

To calculate the OPPS conversion factor for CY 2010 in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60419), we increased the CY 2009 conversion factor of $66.059 by 2.1 percent. We then adjusted the conversion factor for CY 2010 to ensure that any revisions we made to our updates for a revised wage index and rural adjustment were budget neutral. We calculated an overall budget neutrality factor of 0.9997 for wage index changes by comparing total payments from our simulation model using the FY 2010 IPPS final wage index values to those total payments using the FY 2009 IPPS final wage index values. For CY 2010, we did not propose a change to our rural adjustment policy. Therefore, the budget neutrality factor for the rural adjustment was 1.0000. For the CY 2010 OPPS/ASC final rule, we estimated that pass-through spending for both drugs and biologicals and devices for CY 2010 will equal approximately $45.5 million, which represents 0.14 percent of total projected CY 2010 OPPS spending. Therefore, the conversion factor was also adjusted by the difference between

the 0.11 percent estimate of pass-through spending set aside for CY 2009 and the 0.14 percent estimate for CY 2010 pass-through spending. Finally, estimated payments for outliers remain at 1.0 percent of total OPPS payments for CY 2010. In our November 20, 2009 CY 2010 OPPS/ASC final rule with public comment, we announced a full conversion factor of $67.406 for the CY 2010 OPPS.

As indicated previously, hospitals that fail to meet the reporting requirements of the Hospital Outpatient Quality Data Reporting Program (HOP QDRP) are subject to a reduction of 2.0 percentage points from the OPD fee schedule increase factor, which is applied to the conversion factor that is used to calculate their payment rates. To calculate the CY 2010 reduced OPD fee schedule increase factor for those hospitals that fail to meet the requirements of the HOP QDRP for the full CY 2010 payment update in the CY 2010 OPPS/ASC final rule, we made all other adjustments described above, but used a reduced OPD fee schedule increase factor of 0.1 percent. This resulted in a reduced conversion factor of $66.086 for those hospitals that fail to meet the HOP QDRP reporting requirements.

As discussed previously, section 1833(t)(3)(F)(ii) and (G)(i) of the Social Security Act, as added by section 3401(i) of the Affordable Care Act, and as amended by section 10319(g) of such Act and section 1105(e) of Public Law 111–152, requires the Secretary, after calculating the OPD fee schedule increase factor, to reduce such factor by an adjustment of 0.25 percentage point effective for services furnished on and after January 1, 2010 through December 31, 2010. Moreover, as discussed in more detail in section I.A.4 below, section 3137 of the Affordable Care Act extended section 508 reclassifications and special exception wage indices from October 1, 2009 to September 30, 2010. Section 3137(a) also required the Secretary, for the second half of the year, to recalculate wage indices by excluding section 508 and special exception hospital wage data in certain circumstances. The OPPS adopts the final fiscal year IPPS wage index on a calendar year basis. We use both the OPD fee schedule increase factor and the budget neutrality adjustment which accounts for the effects of adopting the new fiscal year IPPS wage index on a calendar year basis in the calculation of the OPPS conversion factor. Therefore, the reduction of 0.25 percentage point applied to the OPD fee schedule increase factor of 2.1 percent and the revised wage index budget neutrality factor of 0.9997 required us to recalculate the CY 2010 OPPS conversion factor. We note that none of the other components of the conversion factor calculation, specifically the adjustment to account for estimated cost of pass through drugs and non-implantable biologicals, and device categories and the proportion of estimated total OPPS payments for outlier payments changed as a result of the provisions of Affordable Care Act. The budget neutrality adjustment for the rural adjustment continues to be 1.0000 because we did not propose and the Affordable Care Act did not authorize any changes to the rural adjustment. Therefore, the only changes to the conversion factor, and thus to the CY 2010 OPPS payment rates, that are reflected in this Notice are caused by the statutorily required reduction applied to the OPD fee schedule increase factor and the statutory changes to the wage index.

To calculate the revised OPPS conversion factor for CY 2010 that is effective for covered OPD services furnished on or after January 1, 2010 through December 31, 2010, we used the same methodology that was used in the CY 2010 OPPS/ASC final rule (74 FR 60419). We first increased the CY 2009 conversion factor of $66.059 by the revised OPD fee schedule increase factor of 1.85 percent (2.1 percent which is the full inpatient operating market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act less the 0.25 percentage point reduction) for CY 2010. We further adjusted the conversion factor to ensure that any revisions we made to our updates accounting for the statutorily required changes to the wage index were made on a budget neutral basis. We calculated an overall budget neutrality adjustment factor of 0.9997 for wage index changes by comparing total payments from our simulation model using the FY 2010 IPPS final wage index values, as adjusted by the Affordable Care Act (*see* discussion in section I.A.4.), to those payments using the final FY 2009 IPPS wage index values and multiplied this by the conversion factor which already was adjusted to reflect the revised OPD fee schedule increase factor. For purposes of calculating the overall budget neutrality adjustment for wage index changes, we created a single CY 2010 average wage index with 50 percent of the wage index in effect between January 1, 2010 and June 30, 2010 and 50 percent of the wage index in effect between July 1, 2010 and December 31, 2010. We note that the wage index adjustment of 0.9997 that we recalculated using the wage index values that resulted from the Affordable Care Act provisions is identical (when rounded to the 4th decimal) to the wage index adjustment that we calculated for the CY 2010 OPPS conversion factor that we published on November 20, 2009. Next, we multiplied the wage adjusted conversion factor by the budget neutrality factor for the rural adjustment of 1.0000 that was finalized in the CY 2010 OPPS/ASC final rule (74 FR 60419). Therefore, the final revised full conversion factor for CY 2010 resulting from the above-described steps is $67.241 for services furnished on and after January 1, 2010 and before January 1, 2011. We then adjusted the CY 2009 conversion factor to reflect changes in our estimate of total OPPS expenditures that would be dedicated to pass-through payments in CY 2010 that were finalized in the CY 2010 OPPS/ASC final rule (74 FR 60419). Finally, estimated payments for outliers remained at 1.0 percent of total OPPS payments for CY 2010 (74 FR 60419).

To calculate the revised final CY 2010 reduced market basket conversion factor for those hospitals that fail to meet the requirements of the HOP QDRP for the full CY 2010 payment update, we used the same methodology and adjustments discussed above, except that we used a reduced OPD fee schedule increase factor of negative 0.15 percent (that is, the revised OPD fee schedule increase factor of 1.85 percent minus 2.0 percentage points). This resulted in a final reduced conversion factor for CY 2010 of $65.921 for those hospitals that fail to meet the HOP QDRP requirement effective for covered OPD services furnished on or after January 1, 2010 through December 31, 2010. To calculate the reduced payment for these hospitals in our claims processing systems we apply a reduction ratio, that we refer to as the "reporting ratio" of 0.980, which remains unchanged from the reporting ratio we published on November 20, 2009 (74 FR 60641), notwithstanding the changes to the hospital operating market basket and wage index values for some hospitals required by the Affordable Care Act.

The recalculated CY 2010 final conversion factor of $67.241 is reflected in the revised CY 2010 OPPS payment rates and rate dependent files that are posted on the CMS Web site at *http://www.cms.gov/HospitalOutpatientPPS/*. Because the conversion factor was revised, we were required to recalculate a number of aspects of the CY 2010 OPPS using our established methodologies as set forth in the CY 2010 OPPS/ASC final rule (74 FR

60316) using the revised conversion factor, including the OPPS payment rates that rely on the conversion factor and other components of the payment system that depend on OPPS payment rates for CY 2010 OPPS using our established methodologies to take this revision into account.

These include CY 2010 OPPS APC payment rates that are printed in Addenda A and B of this Notice. We use the conversion factor to calculate OPPS payment rates for services in APCs with the following status indicators, "P", "Q1", "Q2", "Q3", "R", "S", "T", "V", "X", and "U". The components of the payment system that are impacted by these changes include: The offset amounts for devices (devices and implantable biologicals), "policy packaged" drugs (diagnostic radiopharmaceuticals and contrast agents), and "threshold packaged" drugs (drugs and non-implantable biologicals that maybe packaged under the drug packaging threshold) that are used for assessment of pass-through applications and reductions to payment for certain device-dependent procedures, nuclear medicine procedures, or other imaging procedures using contrast agents, when a diagnostic radiopharmaceutical, device or implantable biological, or contrast agent is receiving pass through payment (74 FR 60462 through 60463, and 60480 through 60484). The revised offset amounts are not published as addenda to OPPS update rules but are available at *www.cms.hhs.gov/HospitalOutpatientPPS/* under "Annual Policy Files." These revisions are effective for covered OPD services furnished on or after January 1, 2010 through December 31, 2010.

The offset amount for each group of items, devices, "threshold packaged" drugs and nonimplantable biologicals, and "policy packaged" drugs and biologicals, are calculated using the same methodology. For a discussion of the methodology we use for devices and implantable biologicals, *see* our CY 2008 final rule with comment period (72 FR 66751 through 66752 and 74 FR 60463), and for our discussion of the methodology we use for diagnostic radiopharmaceuticals and contrast agents, *see* our CY 2010 final rule with comment period discussion at 74 FR 60482. We use these offset amounts in our cost significance calculation when evaluating an application for pass-through payment for both drugs and nonimplantable biologicals, and devices including implantable biologicals. Finally, for a subset of the device-dependent procedures, we reduce OPPS payment by the device offset amount when a hospital furnishes a device received at no cost or full credit and by half of the device offset amount when a hospital furnishes a device received for partial credit (74 FR 60464 through 60466).

4. Revision of Hospital Wage Index Values for CY 2010 as Required by Section 3137(a) of Affordable Care Act

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust, for geographic wage differences, the portion of the OPPS payment rate, which includes copayment, that is attributable to labor and labor-related cost. This adjustment must be made in a budget neutral manner. The OPPS labor-related share is 60 percent of the national OPPS payment. The OPPS has consistently adopted the final fiscal year IPPS wage indices as the wage index values for adjusting the OPPS standard payment amounts for labor market differences. Thus, the wage index that applies to a particular acute care short-stay hospital under the IPPS would also apply to that hospital under the OPPS. We discuss our wage index policy in the CY 2010 OPPS/ASC final rule with comment (74 FR 60419).

In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually. The IPPS wage index values that we adopted in the CY 2010 OPPS included all reclassifications that were approved by the Medicare Geographic Classification Review Board (MGCRB) for FY 2010. Reclassifications under section 508 of Public Law 108–173 (MMA) and the assignment of certain special exception wage indices that were extended by section 106(a) of Public Law 109–432 (MIEA–TRHCA), section 117(a)(1) of Public Law 110–173 (MMSEA), and section 124 of Public Law 110–275 (MIPPA) were set to terminate on September 30, 2009. Similar to our treatment of section 508 reclassifications extended under Public Law 110–173 as described in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68586), we expected hospitals with section 508 reclassifications to revert to their home area wage index, with out-migration adjustment if applicable, or a current MGCRB reclassification, from October 1, 2009 to December 31, 2009 after section 508 reclassifications expired. We also extended the assignment of certain special exceptions wage indices for certain hospitals from January 1, 2009 through December 31, 2009, under the OPPS, in order to give these hospitals their special exception wage index under the OPPS for the same time period as under the IPPS. We refer readers to the Federal Register Notice published subsequent to the FY 2009 IPPS final rule for a detailed discussion of the changes to the wage index values as required by section 124 of Public Law 110–275 (73 FR 57888). Because the provisions of section 124 of Public Law 110–275 expired in 2009 and because the Affordable Care Act had not yet passed, we did not propose to recognize section 508 reclassifications and wage indices for certain special exceptions hospitals for the OPPS wage indices for CY 2010 (74 FR 60419).

Section 3137(a), as amended by section 10317, of the Affordable Care Act extended the wage index reclassifications originally designated under section 508 of Public Law 108–173 and certain special exception wage indices effective for services furnished on and after October 1, 2009 through September 30, 2010. We will implement the section 508 wage indices for OPPS payments for fiscal year 2010 under the OPPS. As indicated, the extended section 508 reclassifications will expire on September 30, 2010. Hospitals with a section 508 reclassification wage index will revert to their home area wage index, with out-migration adjustment if applicable, or a current MGCRB reclassification, from October 1, 2010 to December 31, 2010 after the section 508 reclassifications expire on September 30, 2010.

Further, as we did for CY 2009, the OPPS will recognize the special exception wage indices for certain hospitals from January 1, 2010 through December 31, 2010, under the OPPS, in order to give these hospitals the special exception wage index values under the OPPS for the same time period as under the IPPS. Finally, provisions of section 3137(a) required us to recalculate wage indices for certain areas to exclude the wage data of section 508 and special exception hospitals in certain circumstances. This recalculation resulted in revised wage indices beginning on April 1, or midway through the fiscal year. To implement the same policy on a calendar year basis, the OPPS will adopt these revised wage indices midway through the calendar year beginning July 1, 2010. The revised wage indices that would apply for all providers that are paid under the OPPS are on public display on the CMS Web site at *http://www.cms.gov/AcuteInpatientPPS/WIFN/itemdetail.asp.* The revised wage indices also have been published by CMS in the June 2, 2010 **Federal Register** (75 FR 31147). We used these wage indices along with the wage indices that we finalized in our CY 2010 OPPS/ASC final rule with comment

period and in effect in the OPPS between January 1, 2010 and June 30, 2010 to calculate the budget neutrality adjustment for CY 2010 to the conversion factor discussed in I.A.3.above. As a result of the changes to the wage indices that are required by section 3137, we estimate a budget neutrality adjustment for the revised wage index of 0.9997 that we used for calculating the revised CY 2010 OPPS conversion factor of $67.241.

We also note that section 3137(a), as amended by Section 10317, specifies that if the Section 508 or special exception hospital's wage index applicable for the period beginning on October 1, 2009, and ending on March 31, 2010, is lower than for the period beginning on April 1, 2010, and ending on September 30, 2010, the hospital shall be paid an additional amount that reflects the difference between the wage indices. To apply this provision to both inpatient and outpatient hospital payments we compared the two wage index values applicable for the period beginning on October 1, 2009, and ending on March 31, 2010, and for the period beginning on April 1, 2010, and ending on September 30, 2010 and assigned each Section 508 and special exception hospital the higher of the two wage index values. Consistent with our typical application of the wage index for these two sets of providers, we assigned the Section 508 providers their higher FY 2010 wage index from October 1, 2009 through September 30, 2010 and assigned the special exception providers their higher FY 2010 wage index from January 1, 2010 through December 31, 2010.

5. Extension of Transitional Outpatient Payments (TOPs) for Small Rural Hospitals That Are Not Sole Community Hospitals and That Have 100 or Fewer Beds and Extension of TOPs to All SCHs (Including EACHs), Irrespective of the 100 Bed Limitation

Section 5105 of the Deficit Reduction Act of 2005 (DRA) reinstituted TOPs for covered OPD services furnished on or after January 1, 2006 and before January 1, 2009, for rural hospitals having 100 or fewer beds that are not sole community hospitals (SCHs). When the OPPS payment was less than the provider's pre-BBA amount, the amount of payment was increased by 95 percent of the amount of the difference between these two amounts for CY 2006, by 90 percent in CY 2007, and 85 percent in CY 2008. Section 147 of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) extended the period of TOPs for small rural hospitals with 100 or fewer beds through December 31, 2009; when the OPPS payment was less than the provider's pre-BBA amount, the amount of payment was increased by 85 percent of the amount of the difference between these two amounts for CY 2009. Section 147 also provided 85 percent of the hold harmless amount from January 1, 2009 through December 31, 2009 to sole community hospitals (SCHs) including essential access community hospitals (EACHs) with 100 or fewer beds. We note that EACHs are considered to be SCHs under section 1886(d)(5)(D)(iii)(III) of the Act. Accordingly, under the statute, EACHs are treated as SCHs.

Section 3121 of the Affordable Care Act extends the hold harmless provision for small rural hospitals with 100 or fewer beds and that are not sole community hospitals (as defined in section 1886(d)(5)(iii) of the Social Security Act) for an additional year through December 31, 2010, at 85 percent of the hold harmless amount. Thus, for covered OPD services furnished on or after January 1, 2010 through December 31, 2010, for which the PPS amount is less than the pre-BBA amount, the amount of payment shall be increased by 85 percent of the amount of the difference between these two amounts for CY 2010. In addition, section 3121 of the Affordable Care Act extended for an additional year the period of TOPs payments for SCHs (as defined in section 1886(d)(5)(iii) of the Act). As stated previously, EACHs fall within the definition of an SCH as set forth in 1886(d)(5)(iii) of the Act. Further, section 3121(b) of the Affordable Care Act amended section 1833(t)(7)(D)(i)(III) of the Act to provide that in the case of covered OPD services furnished on or after January 1, 2010 and before January 1, 2011, the 100-bed limitation will not be applied for SCHs (including EACHs) under 1833(t)(3)(D)(i)(III) of the Act. Therefore, under section 1833(t)(3)(D)(i)(III) of the Act, payment will be increased under section 1833(t) of the Act to SCHs (including EACHs) for covered OPD services furnished on or after January 1, 2010 through December 31, 2010, by 85 percent of the amount of the difference between these two amounts when the PPS amount is less that the pre-BBA amount without regard to the 100-bed limitation. Cancer and children's hospitals are permanently held harmless under section 1833(t)(7)(D)(ii) of the Social Security Act and continue to receive TOPs payments in CY 2010.

B. Ambulatory Surgical Center Payment System

1. Background

In the CY 2010 OPPS/ASC final rule with comment period (74 FR 60596), we updated and finalized the CY 2010 ASC rates and lists of covered surgical procedures and covered ancillary services. We also corrected some of those ASC rates in a correction notice published in the **Federal Register** on December 31, 2009 (74 FR 69502). In that correction notice, we revised the ASC rates to reflect changes in the Medicare Physician Fee Schedule (MPFS) conversion factor and practice expense (PE) relative value units (RVUs) listed for some CPT codes in Addendum B to the CY 2010 MPFS final rule with comment period (74 FR 62017), which were incorrect due to certain technical errors and, consequently, were corrected in a correction notice to that final rule (74 FR 65449). We are also publishing a second correction notice in the **Federal Register** around the same time as this Notice to address changes to the ASC rates resulting from corrections to the PE RVUs and to the MPFS conversion factor identified subsequent to publication of the December 31, 2009 correction notice. In this Notice, we discuss changes to the ASC payment rates due to changes to the OPPS and MPFS under the Affordable Care Act. The rates in this Notice also reflect technical corrections to the CY 2010 ASC payment rates published in the CY 2010 OPPS/ASC final rule with comment period as corrected by the two correction notices. None of these changes affected ASC payment methodologies or policies.

2. Changes to the CY 2010 Ambulatory Surgical Center Payment System Required by the Changes to the Hospital Outpatient Prospective Payment System and the Medicare Physician Fee Schedule

Under the revised ASC payment system, for most covered surgical procedures, we use the OPPS APCs to group services paid under the ASC payment system and we use the APC relative payment weights developed under the OPPS as the basis for ASC relative payment weights for calculating ASC payment rates. Specifically, we multiply an ASC relative payment weight derived from the OPPS APC relative weight by a budget neutral ASC conversion factor to calculate national unadjusted ASC payment rates each year. We refer to this as the standard ratesetting methodology for the ASC payment system. We transitioned to the standard ratesetting methodology over a

four-year period for procedures on the CY 2007 list of covered surgical procedures. CY 2010 is the third year of this four-year transition to fully implementing the standard ratesetting methodology. ASC payment rates for CY 2010 are a transitional blend of 25 percent of the CY 2007 ASC payment rate for a covered surgical procedure on the CY 2007 ASC list of surgical procedures and 75 percent of the payment rate for the procedure calculated under the standard ratesetting methodology. We discuss the standard ratesetting methodology and our transition to the full implementation of the standard ratesetting methodology in our August 2, 2007 ASC final rule (72 FR 42491 through 42493, 42519 through 42521). We update the ASC relative payment weights annually using the OPPS relative payment weights for that calendar year. Because the standard ratesetting methodology adopts the OPPS relative payment weights (not rates), reductions to OPPS payments created by the Affordable Care Act as discussed in section I.A.3. above do not impact payment made under the standard ratesetting methodology as the Affordable Care Act did not change any OPPS APC relative weights for CY 2010.

However, the ASC payment system establishes the payment rates for several services using other methodologies that are impacted by the Affordable Care Act. Specifically, the calculation of device-intensive services, brachytherapy services, and bone density scans (a type of covered ancillary radiology service) under the ASC payment system rely directly on the actual payment rates under the OPPS and MPFS, which are impacted by the provisions of the Affordable Care Act discussed above and below. The Affordable Care Act changed the OPPS payment rates for any service where the OPPS conversion factor is used in its calculation, because the Affordable Care Act revised the CY 2010 OPD fee schedule increase factor (*see* I.A.3. of this Notice). This change impacted payments for device-intensive services and brachytherapy services, which are dependent on payments established under the OPPS.

We use a modified ASC methodology based on OPPS data to establish payment rates for the device-intensive procedures under the ASC payment system. ASC device-intensive services are covered surgical procedures that are assigned to the OPPS device-dependent APCs with a device offset percentage (*i.e.,* the proportion of the APC relative weight attributable to devices under the OPPS) greater than 50 percent of the APC cost under the OPPS. Under the ASC payment system, we sum the device portion and the service portion to derive the ASC payment rate for each service's device dependent APC. The device portion is equal to the device offset amount multiplied by the OPPS payment rate, which is the OPPS conversion factor multiplied by the OPPS relative payment weight, for each service's device dependent APC. The service portion is equal to the ASC standard ratesetting methodology (or blended payment rates during the transition period) applied to the service portion of the OPPS relative payment weight (72 FR 42503 through 42508). Because CY 2010 OPPS APC payment rates have changed as a result of the Affordable Care Act, the device offset amount, and therefore the device portion of the ASC payment rate for device-intensive services also changed.

The ASC Payment System also employs a modification to the standard ratesetting methodology to establish payment for brachytherapy sources. As discussed in our August 2, 2007 ASC final rule (72 FR 42498 to 42499), we finalized a policy to pay for brachytherapy services at the OPPS payment rates if OPPS rates were available, and if unavailable, to pay at contractor-priced rates. The CY 2010 OPPS established payment rates for brachytherapy sources based on a relative weight and the OPPS conversion factor, which has changed as a result of the Affordable Care Act. Because the ASC payment system adopts the final payment rate from the OPPS, these payment rates have changed for the ASC payment system.

Finally, payment for bone density scans under the ASC payment system is impacted by the changes made to the MPFS under section 3111 of the Affordable Care Act. Under the ASC payment system, payment for covered ancillary radiology services, which includes bone density scans, is capped at the lesser of the MPFS non-facility practice expense payment amount (calculated by multiplying the non-facility practice expense RVU by the MPFS conversion factor) or the ASC rate developed according to the ASC standard ratesetting methodology. Section 3111 of the Affordable Care Act requires that, for CY 2010, payment under the MPFS for certain bone density scans be established at 70 percent of the product of the CY 2006 MPFS relative value units for the service, the CY 2006 MPFS conversion factor and the CY 2010 geographic adjustment factor for the service. Therefore, the final payment rate for these bone density scans depends on both the ASC payment and the MPFS non-facility practice expense payment amount, which changed under the Affordable Care Act.

In addition to the changes made under the Affordable Care Act, the ASC payment rates in this Notice reflect the technical corrections to the CY 2010 ASC payment rates published in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60316), and as corrected in a December 31, 2009 correction notice and a second correction notice that will be published around the same time as this Notice to address changes to covered office-based and covered ancillary radiology services payment rates resulting from technical corrections to the MPFS non-facility practice expense payment amounts for CY 2010. Office-based procedures are procedures added to the ASC list of covered surgical procedures in CY 2008 or later years that we determine are performed predominantly (more than 50 percent of the time) in physicians' offices and are paid based on the same methodology as covered ancillary radiology services (*i.e.,* the lesser of the MPFS rate or the ASC rate under the standard methodology). We have already implemented the changes made by these correction notices.

We note that the Department of Defense Appropriations Act, 2010 (Pub. L. 111–118), the Temporary Extension Act of 2010 (Pub. L. 111–144), and the Continuing Extension Act of 2010 (Pub. L. 111–157) extended a zero percent update for the MPFS from January 1, 2010 through May 31, 2010. Because the Affordable Care Act changes are effective January 1, 2010, and because the public laws listed above authorize a zero percent update for the MPFS for CY 2010 through May 31, 2010, this Notice incorporates a zero percent update for MPFS payment. On June 25, 2010 the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (Pub L. 111–192) authorized a 2.2 percent update for the MPFS from June 1, 2010 through November 30, 2010. As is our standard practice, we will recalculate the revised ASC CY 2010 payment rates based on CY 2010 MPFS payment rates using the 2.2 percent update factor, and we will make these revised payment rates available on our Web site under "Addenda Updates" at *http://www.cms.gov/ASCPayment/11_Addenda_Updates.asp#TopOfPage.*

Because of these changes to payment for device-intensive services, brachytherapy sources, and bone density scans created by the Affordable Care Act, and changes to MPFS non-facility practice expense payment amounts and the MPFS conversion factor for covered office-based services

and ancillary radiology services created by technical corrections that we explained in the correction notices, we recalculated budget neutrality for the CY 2010 ASC payment system as part of this Notice.

We discuss our budget neutrality methodology in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60625 through 60629). Using updated payment amounts for the OPPS and MPFS for the services affected by the Affordable Care Act and additional changes to the CY 2010 MPFS non-facility practice expensive payment amounts based on the correction notices, we followed our standard scaling methodology to take into account the changes in the OPPS and MPFS payment amounts. We used the same claims data and scaling methodology described in the CY 2010 OPPS/ASC final rule with comment period to calculate a revised CY 2010 ASC payment weight scalar of 0.9556. (We previously finalized a CY 2010 ASC payment weight scalar of 0.9567 (74 FR 60628)). After scaling the weights, we calculated a wage index adjustment of 0.9996 and a final ASC conversion factor of $41.873. Both of these numbers did not change from what we previously finalized for CY 2010 (74 FR 60629). The Affordable Care Act did not impact the pre-floor, pre-reclassification wage indices that we adopt in the ASC payment system or the CPI–U. Therefore, the wage index adjustment and the final ASC conversion factor remained the same. We note that the technical corrections in the second correction notice impacted covered office-based procedures and covered ancillary radiology services with payment indicators of "P3" and "Z3". When we recalculated budget neutrality to address Affordable Care Act changes in this Notice, we also reflected the technical changes made in previous correction notices; therefore, the CY 2010 payment for many covered office-based procedures and covered ancillary radiology services changed at least modestly.

We historically also have reported the payment weight scalar that we would have calculated if we proposed to fully implement the ASC payment system in the coming calendar year without further transition. In the CY 2010 OPPS/ASC final rule, we published a fully implemented CY 2010 ASC payment weight scalar of 0.9338 (74 FR 60674). Using the same claims data and budget neutrality methodology, including adjusting for changes in the wage index, and updating the OPPS and MPFS inputs, we calculated a revised fully implemented CY 2010 ASC payment weight scalar of 0.9326.

Using the revised scaled ASC payment weights and the conversion factor of $41.873, the revised OPPS payment amounts, and the revised MPFS non-facility practice expense payment amounts, we recalculated the revised CY 2010 ASC payment rates for all services, including device-intensive services, brachytherapy sources, and office-based and ancillary radiology services, appearing in Addenda AA and BB of this notice. These payment rates are effective for services furnished on and after January 1, 2010 through December 31, 2010. These files also may be viewed as supporting documentation to this Notice at *http://www.cms.gov/ASCPayment.*

For purposes of applying the policy to reduce ASC payment for procedures involving devices furnished without cost or at reduced cost (74 FR 60613 through 60618), the revised offset amounts of the ASC payment are not published as addenda to the ASC update rules but are available at *http://www.cms.gov/ASCPayment* under "Annual Policy Files."

C. Elimination of Sunset for Reimbursement for All Medicare Part B Services in Hospitals and Clinics Operated by the Indian Health Service, Indian Tribes, or Tribal Organizations

Section 2902 of the Affordable Care Act indefinitely extends Section 630 of the MMA, retroactive to January 1, 2010. The specific Part B services are:

- Ambulance services;
- Clinical laboratory services;
- Part B drugs processed by the J4 A/B MAC and the DME MACs;
- Influenza and pneumonia vaccinations;
- Durable medical equipment;
- Therapeutic shoes;
- Prosthetics and orthotics;
- Surgical dressings, splints, and casts; and
- Screening and preventive services not covered prior to the implementation of section 630 of the MMA

Section 2902 of the Affordable Care Act indefinitely extends section 630 of the MMA to provide coverage for all Medicare Part B services listed above that were previously not covered under the Social Security Act. Hospitals operated by the Indian Health Service, Indian Tribes, or Tribal Organizations, however, will continue to be paid for Part B services under an all inclusive rate for hospital outpatient services rather than under the OPPS.

II. Other Required Information

A. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

B. Waiver of Proposed Rulemaking

We ordinarily publish a Notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 553(b) of the Administrative Procedures Act (APA) and section 1871 of the Act. In addition in accordance with section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act, we ordinarily provide a 30-day delay to a substantive rule's effective date. For substantive rules that constitute major rules, in accordance with 5 U.S.C. 801, we ordinarily provide a 60-day delay in the effective date.

None of the above processes or effective date requirements apply, however, when the rule in question is interpretive, a general statement of policy or a rule of agency organization, procedure or practice. They also do not apply when Congress, itself, has created the rules that are to be applied, leaving no discretion or gaps for an agency to fill in through rulemaking.

In addition, an agency may waive notice and comment rulemaking, as well as any delay in effective date, when the agency for good cause finds that notice and public comment on the rule, as well as the effective date, are impracticable, unnecessary or contrary to the public interest. In cases where an agency finds good cause, the agency must incorporate a statement of this finding and its reason in the rule issued.

The policies being publicized in this Notice do not constitute agency rulemaking. Rather, Congress, in the Affordable Care Act, has already required that the agency make these changes and we are simply notifying the public of the statutory requirements and their effect on payments made under the CY 2010 OPPS and ASC payment system. Specifically, we are notifying the public of the changes to payments for the CY 2010 OPPS that result from the reduction to the OPD fee schedule increase factor and the changes to the wage indices required by the Affordable Care Act. We are also notifying the public of the extension of section 508 reclassifications and special exception wage indices for FY 2010 (which apply to the OPPS for CY 2010), as well as the

wage Indices resulting from Congress' requirement that certain reclassification wage indices be recalculated (effective April 1, 2010) to account for such extensions. We are also notifying the public that Congress extended transitional outpatient payments (TOPs) for a rural hospital that has not more than 100 beds and that is not a sole community hospital as well as for sole community hospitals such that the sole community hospital need not satisfy the 100-bed limitation for covered OPD service furnished on or after January 1, 2010 and before January 1, 2011. We are notifying the public that Congress extended Medicare payments to the Indian Health Service, Indian Tribes, or Tribal Organizations for selected Part B services. We are notifying the public of changes made to ASC payment rates due to changes to the OPPS conversion factor under the Affordable Care Act. Lastly, we are notifying the public that Congress has changed payment for bone density scans under the MPFS, which may impact payment for these services furnished in ASCs on or after January 1, 2010. As this Notice merely informs the public of these required modifications to the CY 2010 payment rates under the OPPS and, indirectly, to the ASC payment system, it is not a rule and does not require any notice and comment rulemaking. Additionally, for the ASC payment system, the payment rates announced in this Notice reflect technical corrections made to the MPFS that impact the ASC payment rates that we addressed in prior ASC correction notices; we are simply notifying the public of the effect on payment made under the CY 2010 ASC payment system based on these prior correction notices. To the extent that any of the policies articulated in this Notice constitute interpretations of Congress's requirements or procedures that will be used to implement Congress's directives, they are interpretative rules, general statements of policy and/or rules of agency procedure or practice, which are not subject to notice and comment rulemaking or a delayed effective date.

However, to the extent that notice and comment rulemaking or a delay in effective date or both would otherwise apply, we find good cause to waive such requirements. Specifically, we find it unnecessary to undertake notice and comment rulemaking in this instance because the provisions of the Affordable Care Act are self-implementing, and further many are already effective and have been implemented. Therefore, we would be unable to change any of the policies governing the OPPS and ASC payment systems for CY 2010, or the other changes made by the Affordable Care in response to public comment on this Notice. As the changes outlined in this Notice have already taken effect and are a result of the statutory effective dates, it would also be impracticable to undertake notice and comment rulemaking. Additionally, this Notice does not make any changes to the policies and payment methodologies for the OPPS and ASC payment system that were finalized in the CY 2010 OPPS/ASC final rule with comment period. Further, we believe it is in the public interest to have the accurate information and to have it as soon as possible and not delay its dissemination. For these reasons, we also find that a waiver of any delay in effective date, if it were otherwise applicable, is necessary to comply with the requirements of sections 2902, 3111, 3121, 3137, 3401 and 10319 of the Patient Protection and Affordable Care Act and section 1105 of the Health Care and Education Reconciliation Act of 2010. Therefore we find good cause to waive notice and comment procedures as well as any delay in effective date, if such procedures or delays are required at all.

III. Regulatory Impact Statement or Analysis

A. Overall Impact

Although this Notice merely announces provisions of the Affordable Care Act, and does not constitute a substantive rule, we are nevertheless preparing this impact analysis in the interest of ensuring that the impact of these changes are fully understood. The changes in this Notice are already in effect, with changes made to the OPPS pricer and the ASC payment system and have been announced through a Joint Signature Memorandum of instruction to Medicare contractors. We have, nevertheless, examined the impacts of this Notice as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), Executive Order 13132 on Federalism, and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules that have economically significant effects ($100 million or more in any 1 year) or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal government or communities.

We estimate that the effects of the OPPS provisions that are announced in this Notice will not result in expenditures exceeding $100 million in any 1 year and therefore are not economically significant. We estimate the difference between CY 2010 OPPS expenditures required by or resulting from the Affordable Care Act that are announced in this Notice, when compared to the estimated expenditures announced in our November 20, 2009 CY 2010 final rule, (74 FR 60316) to be a decrease of approximately $98 million. Because this Notice is not a major rule, and because, furthermore, the expected change in expenditures resulting from the Affordable Care Act does not reach the $100 million threshold for a RIA, we are not required to provide a regulatory impact analysis.

However, because the changes required by the Affordable Care Act for the CY 2010 OPPS affect payment, we have prepared a regulatory impact analysis of changes to the OPPS payment system that, to the best of our ability, presents the costs and benefits of this Notice. Table I of this Notice displays the redistributional impact of the CY 2010 changes required by the Affordable Care Act on OPPS payment. The provisions of the Affordable Care Act result in a change in OPPS payments for CY 2010 as announced in this Notice compared to the CY 2010 payments established under the CY 2010 OPPS/ASC final rule appearing in the November 20, 2009 **Federal Register**. Table I presents only the changes in CY OPPS 2010 payments that result from the Affordable Care Act. We estimate that the effects of the changes to the CY 2010 OPPS and the non-facility MPFS PE RVUs resulting from the Affordable Care Act on the ASC payment system that are announced by this Notice will not exceed $100 million in any 1 year and, therefore, are not economically significant. Overall, we observe no change in aggregate expenditures under the CY 2010 ASC Payment System resulting from changes to the CY 2010 OPPS and MPFS as required by the Affordable Care Act and by technical changes implemented by prior correction notices.

The RFA requires agencies to analyze options for regulatory relief of small businesses if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Many hospitals, other providers, ASCs, and other suppliers are considered to be small entities, either by being nonprofit organizations or by meeting the Small Business Administration (SBA) definition of a small business (hospitals having revenues of $34.5 million or less in any 1 year and ASCs having revenues of $10 million or less in any 1 year). (For details on the latest standards for health care providers, we refer readers to the SBA's Web site at: *http://sba.gov/idc/groups/public/documents/sba_homepage/serv_sstd_tablepdf.pdf* (refer to the 620000 series).)

For purposes of the RFA, we have determined that many hospitals and most ASCs would be considered small entities according to the SBA size standards. Individuals and States are not included in the definition of a small entity. Therefore, the Secretary has determined that this Notice will have a significant impact on a substantial number of small entities. We acknowledge that many of the affected entities are small entities. The discussion presented in this Notice and the impact analysis presented in Table I constitute our regulatory flexibility analysis of the impact of the provisions of the Affordable Care Act on small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. With the exception of hospitals located in certain New England counties, for purposes of section 1102(b) of the Act, we now define a small rural hospital as a hospital that is located outside an urban area and has fewer than 100 beds. Section 601(g) of the Social Security Amendments of 1983 (Pub. L. 98–21) designated hospitals in certain New England counties as belonging to the adjacent urban areas. Thus, for OPPS purposes, we continue to classify these hospitals as urban hospitals.

We believe that the changes to the OPPS announced by this Notice affect both a substantial number of rural hospitals as well as other classes of hospitals and that the effects on some may be significant. Therefore, the Secretary has determined that this Notice has a significant impact on the operations of a substantial number of small rural hospitals. Specifically, section 3121 of the Affordable Care Act extends TOPs payment for small rural hospitals that are not sole community hospitals and that have 100 or fewer beds and payments for SCHs (including EACHs), that meet applicable requirements regardless of the 100-bed limitation for covered OPD services furnished on and after January 1, 2010 through December 31, 2010. *See* our discussion of this change in section I.A.5 above. In addition, section 3137 as amended by section 10317 of the Affordable Care Act extends section 508 reclassifications and special exception wage index values from October 1, 2009 through September 30. It also resulted in the recalculation of wage index values to exclude the wage data of section 508/special exception hospitals in certain circumstances, thereby changing the final wage index values, effective April 1 for IPPS and July 1 for OPPS. These wage index changes affect some small rural hospitals. *See* section I.A.4 of this Notice for a discussion of the wage index changes required by Affordable Care Act. We also anticipate that Affordable Care Act changes impacting ASC payment in general will impact payment to rural ASCs.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $133 million. This Notice will not mandate any requirements for State, local, or tribal governments, nor will it affect private sector costs.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have examined the provisions included in this Notice in accordance with Executive Order 13132, Federalism, and have determined that they will not have a substantial direct effect on State, local or tribal governments, preempt State law, or otherwise have a Federalism implication.

The following analysis, in conjunction with the remainder of this document, demonstrates that this Notice is consistent with the regulatory philosophy and principles identified in Executive Order 12866, the RFA, and section 1102(b) of the Act. The changes to the payment amounts under CY 2010 OPPS that are required by the Affordable Care Act and that are announced in this Notice will affect payments to a substantial number of small rural hospitals and a small number of rural ASCs, as well as other classes of hospitals and ASCs, and some effects may be significant.

The impact analysis presented in the CY 2010 OPPS/ASC final rule (74 FR 60662 through 60673) showed the estimated impact of changes to payments for CY 2010 OPPS compared to the estimated payments for CY 2009 OPPS. In contrast, the impact analysis presented in this Notice shows the estimated impact of changes to payment for CY 2010 as a result of the implementation of the changes required by the Affordable Care Act. The Affordable Care Act changed payments for services for which the payment is calculated using the conversion factor. In addition, we note that none of the APC relative weights changed because the relative weight calculations are not made using the conversion factor. For an assessment of distributional impact of changes to the relative weights between CY 2009 and CY 2010 please see the CY 2010 OPPS/ASC final rule (74 FR 60667 through 60672). Therefore, the decrease of 0.1 percent reflects changes to the total OPPS payment that would have been made in CY 2010 absent the provisions of the Affordable Care Act (This impact does not include the impact of changes to TOPs). However, we note that hospitals continue to receive a positive payment increase relative to CY 2009. When we compare the estimated total payments for the CY 2010 OPPS, including the provisions of the Affordable Care Act, to the estimated total payments for the CY 2009 OPPS, we find that for CY 2010, we expect that hospitals will see an aggregate increase in total OPPS payment of approximately $500 million, compared to CY 2009.

Effects of OPPS Changes in This Notice

This Notice announces changes to the OPPS and ASC payments for services furnished in CY 2010 that are required as a result of Sections 3121, 3401, 3137 and 10319 of the Patient Protection and Affordable Care Act and section 1105 of the Health Care and Education Reconciliation Act of 2010. These changes are discussed in detail in I.A of this Notice. Under the recalculated OPPS payment rates announced in this Notice, we estimate that the revised update to the conversion factor and other adjustments as provided by the statute will decrease total OPPS

payments by 0.1 percent in CY 2010 compared to payment rates under the November 20, 2009 CY 2010 OPPS/ASC final rule.

The distributional impacts presented here are the projected effects of changes to the CY 2010 payments on various hospital groups, comparing the estimated CY 2010 OPPS payments under this Notice to the estimated payments under the November 20, 2009 CY 2010 OPPS/ASC final rule. We post on the CMS Web site our hospital-specific estimated payments for CY 2010 with the other supporting documentation for this Notice. To view the hospital-specific estimates of CY 2010 OPPS payments that we calculated including the effects of the changes made by the Affordable Care Act, we refer readers to the CMS Web site at: *http://www.cms.gov/HospitalOutpatientPPS/*. Select "regulations and Notices" from the left side of the page and then select "CMS–1504–N" from the list of regulations and Notices. The hospital-specific file layout and the hospital-specific file are listed with the other supporting documentation for this Notice of changes to the CY 2010 payment rates. We show hospital-specific data only for hospitals whose claims were used for modeling the impacts shown in Table I below. We do not show hospital-specific impacts for hospitals whose claims we were unable to use. We refer readers to section II.A.2. of the CY 2010 OPPS final rule (75 FR 60347) for a discussion of the hospitals whose claims we do not use for ratesetting and impact purposes.

We estimate the effects of the individual policy changes by estimating payments per service, while holding all other payment policies constant. We use the best data available, but do not attempt to predict behavioral responses to our policy changes. In addition, we do not make adjustments for future changes in variables such as service volume, service mix, or number of encounters.

Table 1 below shows the estimated impact of the changes on hospitals' CY 2010 OPPS payment as a result of the Affordable Care Act. Historically, the first line of the impact table, which estimates the change in payments to all hospitals, has always included cancer and children's hospitals, which are held harmless to their pre-BBA payment-to-cost ratio. We also are including CMHCs in the first line that includes all providers because we included CMHCs in our CY 2010 weight scaler estimate discussed in our November 20, 2009 CY 2010 OPPS/ASC final rule with comment period (74 FR 60408).

We present separate impacts for CMHCs in Table 1 because CMHCs are paid under only two APCs for services under the OPPS: APC 0172 (Level 1 Partial Hospitalization (3 units of service)) and APC 0173 (Level II Partial Hospitalization (4 or more units of service)). We note that CMHCs are also a different provider type.

The estimated decrease in the total payments made under the CY 2010 OPPS is a result of the decrease in the OPD fee schedule update factor as required by sections 3401 and 10319 of the Patient Protection and Affordable Care Act and section 1105 of the Health Care and Education Reconciliation Act of 2010, and the influence of the changes to the wage index required by section 3137 as amended by section 10317 of the Affordable Care Act. The distributional impacts presented do not include assumptions about changes in volume and service mix. The enactment of Public Law 108–173 on December 8, 2003, provided for the additional payment outside of the budget neutrality requirement for wage index for specific hospitals reclassified under section 508. Section 3137 as amended by section 10317 of the Affordable Care Act extended these section 508 reclassifications for October 1, 2009 through September 30, 2010. The amounts attributable to these reclassifications are incorporated into the CY 2010 estimates in the final column of Table 1.

Table 1 shows the estimated redistribution of hospital and CMHC payments among providers between payments under the November 20, 2009 CY 2010 OPPS/ASC final rule published for CY 2010 and the CY 2010 payments announced in this Notice as a result of APC reconfiguration and recalibration (Column 2; which remain unchanged from the publication of the CY 2010 OPPS on November 20, 2009 because there were no changes made by the Affordable Care Act to the assignment of services to APCs or the median costs from which the scaled relative weights are derived); wage index changes (Column 3; which reflect the changes made by section 3137 (amended by section 10317) of the Affordable Care Act)); the combined impact of the APC recalibration, wage index effects, and the reduction applied to the OPD fee schedule increase factor (which is revised as required by sections 3401 and 10319 of the Patient Protection and Affordable Care Act and section 1105 of the Health Care and Education Reconciliation Act of 2010) which is used to update the conversion factor (Column 4); and, finally, estimated redistribution considering all payments for CY 2010 under this Notice relative to all CY 2010 payments under the November 20, 2009 CY 2010 OPPS/ASC final rule (Column 5). Because the reduction that applies to the OPD fee schedule increase factor as required by the Affordable Care Act, is applied uniformly across services for which the conversion factor is used to calculate OPPS payment, observed redistributions of payments in the impact table for hospitals largely depend on the impact of the wage index changes under section 3137 including changes to the wage index for the second half of the year and the extension of the section 508 reclassifications for part of CY 2010. However, total payments made under this system and the extent to which the changes required by Affordable Care Act would redistribute money during implementation also depend on volume, practice patterns, and the mix of services billed by various groups of hospitals, which CMS cannot forecast.

Overall, the revised CY 2010 OPPS rates are expected to have a negative effect for providers paid under the OPPS, resulting in a 0.1 percent estimated decrease in Medicare payments compared to CY 2010 OPPS rates announced in the November 20, 2009 final rule with comment period. Removing cancer and children's hospitals, because their payments are held harmless to the pre-BBA ratio between payment and cost, and CMHCs because they are a different provider type paid under two specific APCs, suggests that the required changes will continue to result in a 0.1 percent estimated decrease in Medicare payments to all other hospitals.

Table 1 contains the standard content that is provided in every OPPS impact table published in the **Federal Register**. Specifically, Column 1 contains the number of hospitals in total and by category for which we calculated an impact. These are the same hospitals whose claims were used for ratesetting and modeling of impacts for the CY 2010 OPPS that was published on November 20, 2010. Column 2 displays the CY 2010 APC changes due to the reassignment and recalibration under this Notice, relative to the November 20, 2009 CY 2010 OPPS/ASC final rule (74 FR 60431). Because nothing in the Affordable Care Act changed APC assignment or calibration, there are no changes in this column. Column 3 displays the effect of the new wage index changes required by the Affordable Care Act compared to the previous FY 2010 wage index adopted in the November 20, 2009 CY 2010 OPPS/ASC final rule. Although there are changes to the wage indices for some

hospitals for half of the year because of changes made by the Affordable Care Act, the impact does not rise to a tenth of a percent for any category of provider. Column 4 displays the effect of the budget neutrality changes between the November 20, 2009 CY 2010 OPPS/ASC final rule and the payment rates for CY 2010 as announced by this Notice, specifically the reduction applied to the OPD fee schedule update factor as a result of the Affordable Care Act. Because not all OPPS payments are based on the conversion factor (*e.g.* separately paid drugs and biologicals are paid at ASP+4 percent for CY 2010), the impact of the 0.25 percentage point reduction to the OPD fee schedule update factor does not affect payment for all services and therefore the impact of the reduction is slightly less than 0.25. Column 5 displays the combined impact of all changes made for CY 2010, including changes in the section 508 reclassification wage index as required by the Affordable Care Act relative to payments announced in the November 20, 2009 CY2010 OPPS/ASC final rule. Therefore it incorporates the changes in payment that are outside of budget neutrality for section 508 and certain special exception hospitals. The increase in payment outside budget neutrality for section 508 hospitals is present throughout column 5 and is isolated as a 1.8 percent increase in the last row of Table 1.

Column (1) shows total hospitals.
Column (2) shows that Affordable Care Act did not change the reclassification of HCPCS codes among APC groups and the recalibration of APC weights for CY 2010 payment.
Column (3) shows the impact of revising final wage index values by excluding wage data for special exception/section 508 hospitals in certain circumstances from July 1, 2010 to December 31, 2010. These wage index revisions are subject to budget neutrality and included in column (3).
Column (4) shows the impact of the Affordable Care Act required 0.25 percentage point reduction to the OPD fee schedule increase factor.
Column (5) shows the combined effects of the Affordable Care Act resulting in a revised conversion factor, the revised wage index from column (3), and change in payments to hospitals reclassified under section 508, which expire on September 30, 2010.
* These 4,222 providers include children and cancer hospitals, which are held harmless to their pre-BBA payments, and CMHCs.
** Section 3121 of the Affordable Care Act extended "hold harmless" status for sole community hospitals, including essential access hospitals, irrespective of the 100-bed limitation for covered OPD-services furnished on or after January 1, 2010 through December 31, 2010, and for small rural hospitals that are not sole community hospitals with 100 or fewer beds through December 31, 2010.
*** Complete DSH numbers are not available for providers that are not paid under IPPS, including rehabilitation hospitals, freestanding psychiatric hospitals, and long-term care hospitals.

5. Estimated Effect of This Notice on Beneficiaries

For services for which the beneficiary pays a copayment of 20 percent of the payment rate, the beneficiary share of payment will increase for services for which the OPPS payments will rise and will decrease for services for which the OPPS payments will fall. In all cases, the statute limits beneficiary liability for copayment for a procedure to the hospital inpatient deductible for the applicable year. The CY 2010 hospital inpatient deductible is $1,100.

In order to better understand the impact of changes in copayment on beneficiaries, we modeled the percent change in total copayment liability. We estimate, using the claims of the 4,222 hospitals and CMHCs on which our modeling is based, that total beneficiary liability for copayments continues to be 22.6 percent, as estimated in the November 20, 2009 CY 2010 OPPS/ASC final rule (74 FR 60673). To assess whether there are changes to the aggregate percentage of beneficiary liability, we recalculated the percentage using the revised conversion factor and wage indices on which the revised payments being announced in this Notice are based.

6. Conclusion

The changes announced in this Notice will affect all classes of hospitals and CMHCs. We estimated that most classes of hospitals will experience minor losses or remain neutral and that all classes of hospitals will experience negative updates in OPPS payments in CY 2010 compared to the payments announced in the November 20, 2009 CY 2010 OPPS/ASC final rule as a result of the provisions of the Affordable Care Act.

Table 1 demonstrates the estimated distributional impact of the OPPS budget neutrality requirements that are expected to result in a 0.1 percent decrease in payments for all services paid under the OPPS in CY 2010 under this Notice when compared to the November 20, 2009 CY 2010 OPPS/ASC final rule, after considering the OPD fee schedule increase factor (revised by the Affordable Care Act), wage index changes (including the effects of the extension of the section 508 reclassifications), estimated payment for outliers (which did not change as a result of the Affordable Care Act), and changes to the pass-through payment estimate (which did not change as a result of the Affordable Care Act). The accompanying discussion, in combination with the rest of this Notice, constitutes a regulatory impact analysis.

7. Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf*), in Table 2, we have prepared an accounting statement showing the CY 2010 estimated hospital OPPS incurred benefit impact associated with the changes to the CY 2010 OPD fee schedule increase factor and budget neutral wage index changes (as revised by the Affordable Care Act) shown in this Notice based on the baseline for the 2010 Medicare Trustees Report. All estimated impacts are classified as transfers.

TABLE 2--ACCOUNTING STATEMENT: CY 2010 ESTIMATED HOSPITAL OPPS INCURRED BENEFIT IMPACT ASSOCIATED WITH THE CY 2010 OPD FEE SCHEDULE INCREASE FACTOR AND BUDGET NEUTRAL WAGE INDEX CHANGES AS REVISED BY THE AFFORDABLE CARE ACT

Category	Transfers
Annualized Monetized Transfers	$0.1 billion
From Whom to Whom	Outpatient hospitals and other providers who received payment under the hospital OPPS to Federal Government
Total	$0.1 billion

BILLING CODE 4120–01–P

Addendum A.-OPPS APCs for CY 2010 as Revised by the Affordable Care Act
