SUPPLEMENTARY INFORMATION: The amount of the proposed changes varies considerably for each of the Conservation Practice Standards addressed in this notice. To fully understand the proposed changes, individuals are encouraged to compare these changes with each standard's current version as shown at <http://www.nrcs.usda.gov/technical/Standards/nhcp.html>. To aid in this comparison, following are highlights of the proposed revisions to each standard:

Channel Bed Stabilization (Code 584)—Name changed for better description, plus minor edits.

Dust Control From Animal Activity on Open Lot Surfaces (Code 375)—This is a new Conservation Practice Standard.

Karst Sinkhole Treatment (Code 527)—Practice name changed from "Sinkhole and Sinkhole Area Treatment" to "Karst Sinkhole Treatment." Practice specially does not apply to sinkholes with non-karst origins (structural failures due to piping, etc.), plus minor edits.

Lined Waterway or Outlet (Code 468)—Changes to the standard include: A revision in the range in Manning's roughness and references cited in the criteria section; an expansion of the considerations section to include fish and wildlife and soil bioengineering, etc.; and more comprehensive guidance on what should be included in the plans and specifications section.

Monitoring Well (Code 353)—Updated references to ASTM standards and minor edits.

On-Farm Equipment Efficiency Improvement (Code 374)—This is a new Conservation Practice Standard.

Pond Sealing or Lining—Bentonite Treatment (Code 521C)—The standard was revised to better match the changes to our technical guidance document National Engineering Handbook Series, Part 651, Agricultural Waste Management Field Handbook (AWMFH), Chapter 10, Appendix 10D.

Pond Sealing or Lining—Compacted Clay Treatment (Code 521D)—The standard was revised to better match the changes to our technical guidance document National Engineering Handbook Series, Part 651, AWMFH, Chapter 10, Appendix 10D.

Pond Sealing or Lining—Soil Dispersant Treatment (Code 521B)—The standard was revised to better match the changes to our technical guidance document National Engineering Handbook Series, Part 651, AWMFH, Chapter 10, Appendix 10D.

Salinity and Sodict Soil Management (Code 610)—Clarified the Conditions

Where Practice Applies and General Criteria Applicable to All Purposes sections. Added separate sections for Criteria Applicable to Irrigated Lands and to Non-Irrigated Lands. Expanded the sections for Criteria To Reduce Problems of Crusting, Permeability or Soil Structure on Sodium-Affected Soils, and to Saline Seeps and Their Recharge Areas. Expanded the Considerations section. Added detailed requirements for Plans and Specifications. Deleted the Operation and Maintenance section. Reduced the References section.

Stream Habitat Improvement and Management (Code 395)—Changed "Stream Visual Assessment Protocol" to "Stream Visual Assessment Protocol, Version 2," changed considerations, added monitoring guidelines for evaluating the effectiveness of the conservation actions, and added post-project monitoring to Operation and Maintenance.

Vertical Drain (Code 630)—Additional emphasis on water quality protection if practice is used.

Water Well (Code 642)—Purpose clarified to exclude human consumption. Screen entrance velocity criteria changed in accordance with AWWA standard.

Water Well Decommissioning (Code 351)—Name was changed to Water Well Decommissioning, distinguishing this practice from industry practices for closure of other purposed wells (oil, injection, etc.). Purpose was clarified. Additional clarification on plugging materials was added.
